The Ohio State University

Ohio State is the major comprehensive university in the state of Ohio. Through its campuses, educational telecommunications programs, cooperative extension service, and health care programs, the University serves the entire state. As a major land-grant university, Ohio State is also a national resource. Its fundamental purpose — in teaching, research, and public service — is to enhance the quality of human life through developing the individual capacity for enlightened understanding, thinking, and acting. Through the dissemination of knowledge, the University not only serves the individual but acts as a force to shape society for the common good. As such, it is also a significant international resource.

Ohio State offers degree programs in a wide variety of disciplines, including baccalaureate and graduate programs in the liberal arts and sciences, in agriculture, in the various professional areas, and in the health sciences. As the major graduate institution of the state, The Ohio State University plays an important role in the generation of new knowledge through research and other creative work, and in the preparation of mature scholars. The University provides the only programs in Ohio in graduate study in agriculture, in certain of the allied medical professions, in optometry, and in veterinary medicine. The quality and diversity of its instructional programs and resources afford students the opportunity to elect programs of unusual strength in the traditional university disciplines, as well as interdisciplinary programs that reflect new ways of organizing knowledge and new approaches to contemporary problems.

Equality of opportunity is a basic philosophy of Ohio State. Mindful of the need for all persons to adapt to the changing roles and needs of society, the University also provides evening programs and continuing education opportunities to serve a wide spectrum of lifelong learning needs. In the exploration of new ideas and in the preparation of citizens for their roles in a changing society, the University represents a human commitment — an expression of the aspiration of people to better themselves and the world in which they live.

Student Responsibility

The student is responsible for knowing his own standing scholastically in reference to the published regulations and standards of the University and of his college or school.

Examinations and Marks

Course Examinations (Faculty Rule 3335-7-19)

At the close of each course, an examination will be given on the student’s capabilities relative to the stated course objectives, the method of examining to be determined by the instructor or supervisor of the course. Examinations in laboratory and seminar courses shall be optional with the instructor concerned. Examinations for graduating students shall be given at a time near the end of each course, preferably during the last week of classes.

Schedules for Final Examinations (Faculty Rule 3335-7-20)

Examinations for classes taught on the regional campuses and for classes whose enrollment is exclusively of students registered in the Colleges of Dentistry, Law, Medicine, Optometry, Pharmacy, and Veterinary Medicine will be scheduled by the offices of the regional campuses and of the colleges respectively. All examination schedules prepared outside the Office of the Registrar shall, before publication, be cleared with the Office of the Registrar which shall have the power to resolve all conflicts.

Examinations for graduating students shall be arranged by individual instructors so that final grades for the affected students may be submitted to the Office of the Registrar by the deadlines established by that office.

All other final examinations shall be centrally scheduled by the Office of the Registrar. The official examination schedules shall be strictly adhered to by all instructors. Any deviation must first be approved by the appropriate university official (department chairman, regional campus dean and director, or college dean) in consultation with the Office of the Registrar, which shall have the power to resolve all conflicts.

In performing its scheduling function the Office of the Registrar shall limit individual examinations to two-hour duration and the total examination period to no more than five days.

Marks (Faculty Rule 3335-7-21)

The official marks of the University are as follows:

A, A− The instructor judged the student to have satisfied the stated objectives of the course in an excellent manner. The student’s performance was judged to be in this range of high quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on his experience and expertise.

B+, B, B− The instructor judged the student to have satisfied the stated objectives of the course in an above average manner. The student’s performance was judged to be in this range of above average quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on his experience and expertise.

C+, C, C− The instructor judged the student to have satisfied the stated objectives of the course in an average manner. The student’s performance was judged to be in this range of average quality based upon a comparison with other students in the course, and/or students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on his experience and expertise.

D+, D The instructor judged the student to have satisfied the stated objectives of the course in a low but acceptable manner. The student’s performance was judged to be in this range of below average but acceptable quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on his experience and expertise.

E The instructor judged the student not to have satisfied the stated objectives of the course. Credit for a course in which the mark E has been received can be obtained only by repeating and passing the course in class. (See Faculty Rules 3335-7-23 to 3335-7-28.)
EM Examination

This mark indicates credit given to students registered in the University on the basis of examinations taken prior to or after admission to the University. The level of achievement which must be demonstrated by the student on these examinations in order to receive EM credit shall be determined by the department or school in which the course is offered for credit, in accord with the criteria for the award of letter grades. This credit, up to a maximum of 45 credit hours, shall be assigned only upon the authorization of the chairman of the department or the director of the school and with the approval of the authorized representative of the dean or director of the student's enrollment unit.

Additional examination credit hours may be assigned specific curricular programs with the prior approval of the Council on Academic Affairs.

Examination credit shall not be given to a student for a course in which he has received a mark at this University or for which he has transfer credit from some other college or university. Conversely, no course for which EM credit has been received can be taken later for a grade or credit. No credit points are allowed for courses in which a mark of EM is given.

I Incomplete

An I indicates that the student has completed a major portion of the work in the course in a satisfactory manner, but for reasons judged by the instructor to be legitimate, a portion of the course requirements remains to be completed.

The mark I shall be reported to the Office of the Registrar together with the mark which the registrar is authorized to enter on the student’s official permanent record unless a different mark is reported to the Office of the Registrar in the manner and within the time described below.

The student must complete the work so that the instructor of the course may report the final mark at the earliest possible time, but not later than noon of the sixth Saturday of the quarter following the quarter in which the I was received. For legitimate reason, the instructor may establish a deadline for the completion of the work which is within the maximum time permitted. Upon petition of the student within this period, the authorized representative of the dean or director of the enrollment unit in which the student was last enrolled after consultation with the instructor of the course, or, if the instructor is unavailable, the chairman of the department involved, may for good reason allow a student additional time in which to complete the work. Generally, this shall not be longer than the end of the quarter following the quarter in which the I was received. Any decision extending the period shall set forth the time in which the student shall complete the work and a copy of the decision shall be forwarded to the Office of the Registrar.

As soon as the incomplete work has been made up, the instructor, or in the case of his absence from the University, the department chairman or the director of the school, shall file the proper mark in the Office of the Registrar. Until such time as a final mark is recorded the credit for the mark I shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26 (page 477).

In no case shall a student who has received the mark I be permitted to repeat the course in which such mark was received until such time as the I has been removed and then only in such cases as fall within Faculty Rule 3335-7-28 (page 475).

K Credit

This mark shall be used for work credited from other institutions by the director of admissions only. K credit shall be counted as hours only and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26 (page 474).

P Progress

This mark is used to indicate that the student has shown satisfactory progress in a series or sequence of courses where the mark is not recorded until the final quarter of the series or sequence is completed. Until such time as a final mark is recorded the mark of P shall be given and the credit shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26 (page 474). When a final mark is submitted by the instructor, all previous P marks shall assume and be recorded with the value of the final mark.

P mark is not to be used for any course approved for the S/U mark.
PA/NP  Pass/Non-Pass

This mark may be used at the option of the student.

This grading pattern may be chosen by undergraduates or Continuing Education students for a maximum of 30 credit hours. Among these 30 credit hours, an undergraduate student may elect Pass/Non-Pass grading for courses in fulfillment of the curricular requirements (free electives) of Faculty Rule 3335-7-06 (page 478).

An undergraduate student who has accumulated a point-hour ratio of 2.00 or higher may elect courses for Pass/Non-Pass that are not required or designated as required electives in the curriculum leading to the degree for which the student is a candidate.

A student registered in Continuing Education who has an accumulated point-hour ratio of 2.00 or higher may elect courses for Pass/Non-Pass for a maximum of 30 credit hours.

Hours graded Pass (PA) count toward the degree. Pass/Non-Pass marks (PA/NP) are not computed in the point-hour average of the student.

Before 5:00 p.m. of the third Friday of a quarter or the second Friday of a term, a student must have declared his intention to take a course on the Pass/Non-Pass basis by filing the appropriate form with the dean or director of his enrollment unit. A student may not change to or from the Pass/Non-Pass Option after 5:00 p.m. of the third Friday of a quarter or the second Friday of a term.

The grade Pass (PA) is the equivalent of the grades A, B+, B, C+, C, C-, D+, D, and the grade Non-Pass (NP) is the equivalent of the grade E.

R  Registered to Audit

This mark indicates that the student has registered to audit the course and has met the conditions established for audit enrollment in the course (page 476). No credit hours shall be awarded for this mark.

S/U  Satisfactory/Unsatisfactory

The mark S may be used to record either satisfactory progress in or completion of work, provided that the course has been approved for this mark by the dean of the college offering the course, and in the case of courses carrying graduate credit, by the dean of the Graduate School. It shall be used as an alternative to U or I in all individual studies courses whatever their number. S credit shall be counted as hours only, and shall not be considered in determining a student's point-hour ratio.

The mark U shall be used for unsatisfactory work in courses in which a student would be entitled to the mark of S if his work has been satisfactory. No credit shall be given for work marked U. This mark shall not be considered in determining a student's point-hour ratio.

W  Withdraw

This mark is used for students withdrawing from one or more courses or from the University. See Withdrawal from Courses or from the University on page 476 for procedures and provisions governing withdrawals.

Report of Marks (Faculty Rule 3335-7-22)

Upon completion of the course requirements marks for every student shall be reported to the Office of the Registrar in accord with deadlines listed in the quarterly Master Schedule of Classes. This office maintains the student's official permanent record and is responsible for issuing a quarterly grade report to each student.

Alteration of Marks (Faculty Rule 3335-7-23)

A mark filed in the Office of the Registrar is a part of the official records of the University. It is subject to change only when a procedural error has been discovered in evaluation or recording of a grade. Action to change a grade must be initiated before the end of the second succeeding quarter. In no case will a grade be revised in accordance with criteria other than those applied to all students in the class. If the instructor agrees that an error in the mark was made, the mark will be changed upon the written authorization of: the instructor of the course; the instructor's department chairman; the director of the instructor's school, if applicable; the dean of the instructor's college; and the authorized representative of the dean or director of the student's enrollment unit.

If a student believes that a procedural error in grading was made, the student should meet with the instructor. If the instructor does not agree that a procedural error was made, the student may meet with the department chairman to discuss the grade grievance. The chairman shall respond to the student no later than 30 days after the student has requested a review by the chairman. Upon receipt of the chairman's response, if the issue is not resolved to the satisfaction of the student, the student may within two weeks request in writing by duplicate submission to the dean or
indicating any recommended grade changes. The department chairman shall be authorized to institute grade changes in accordance with the recommendations of the committee.

If a department committee can find no academic basis upon which to recommend an appropriate grade for the course, the student shall be given the option of having the course stricken from the student’s record and, if so desired, to retake that course without prejudice or penalty.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and publish the rule in their bulletin.

Air Force Aerospace Studies 39

Aerospace Studies
353 Converse Hall, 2121 Tuttle Park Place, 422-5441
Air Force aerospace studies leading to a commission in
the United States Air Force may be pursued on either a
four-, three- or two-year basis. The academic
requirements in all these programs are essentially
identical. Compressed courses are offered at summer
encampments to afford cadets the opportunity to obtain
course material in which they are deficient. The General
Military Course (first two years of enrollment, normally
freshman/sophomore) deals with aerospace doctrine
and history of military aviation. The Professional Officer
Course (last two years of enrollment, normally juniors
and seniors) deals with communicative skills, leadership
and management training, and national defense policy.

Air Force aerospace studies courses are open to a
limited number of non-cadet students with the
permission of the instructor. Initial enrollment in the
ROTC program may be completed by scheduling Air Sci
101 during Autumn Quarter registration. For registration
instructions during other academic terms, contact the
Department of Air Force Aerospace Studies.

AFROTC requires General Military Course scholarship
recipients to complete an English composition course
(English 110). All scholarship cadets must complete one
quarter of a foreign language (i.e., French 101, Spanish
101, etc.). In addition, all Professional Officer Course
cadets must complete one quarter of a mathematical
reasoning course (Math 117 or higher; Statistics 125; or

Course Credit
Credit Hours (Faculty Rule 3335-7-24)
All courses shall be assigned a number of credit hours. This may be any number from zero on up; however, in determining the credit hours assigned, the department, school, college and Council on Academic Affairs should use as a guide the following suggested standards:

- One credit hour shall be assigned for each three hours per week of the average student's time, including class hours, required to earn the average grade of C in this course.
- One credit hour shall be assigned for each two consecutive hours of practical or experimental work per week in any department or school.
- One credit hour shall be assigned for each three hours of laboratory work per week, when no additional outside work is required. When outside work is required, then the first standard listed above shall be applied.

In determining the hours per week required by the course or work, the Council on Academic Affairs may, in appropriate cases, consider the average weekly hours spent during the quarter on the course or work. It should be remembered that the above are guides only and may be deviated from for good cause.

Credit Points and Point-Hour Ratio (Faculty Rules 3335-7-25 and 7-26)
A student's academic standing for a quarter is expressed by the point-hour ratio. This ratio is found by dividing the total number of points earned by the total number of credit hours scheduled or undertaken. Courses in which the marks EM, I, K, NP, P, PA, R, S, U, or W are given are not included in the computations. Courses in which the marks A, A-, B+, B, B-, C+, C-, D+, D, or E are given are computed according to the scale: A=4.0, A-=3.7, B+=3.3, B+=3.0, B-=2.7, C+=2.3, C=2.0, C-=1.7, D+=1.3, D=1.0, and E=0.0. The following example shows how a point-hour ratio is determined.

Point-hour ratio: 2.44
When the final grade on Course No. 3 is recorded, the points and hours will be included in the computation of the student's point-hour ratio. When a student has a record for two or more quarters, he will have a cumulative point-hour ratio determined by dividing the total points earned by the total hours undertaken.

The point-hour ratio begins anew when student enrolls in Dentistry, Law, Medicine, Optometry, Pharmacy, Veterinary Medicine, or the Agricultural Technical Institute.

When determining the point-hour ratio of a student:

- For a quarter, the applicable number of credit hours shall be the student's scheduled credit hours in that quarter.
- For the students' work in the University, the applicable number of credit hours shall be the total number of credit hours undertaken in the University except as modified by Faculty Rule 3335-7-271 (page 475).
- For the student's work in the Graduate School, the applicable number of credit hours shall be the total number of graduate credit hours undertaken while enrolled in the Graduate School. For the student's work in a professional college or school or professional division of a college, the applicable number of credit hours shall be the total number of credit hours undertaken while enrolled in the professional college or school or professional division of a college.
- For the student's work in the major field of interest, the applicable number of credit hours shall be the total number of credit hours undertaken in courses approved for the major program.
No College of Medicine point-hour average shall be computed for a student enrolled in the College of Medicine in a curriculum leading to the degree, Doctor of Medicine, when that student has received only the marks of H, S, or E in the College of Medicine.

Recalculation of Cumulative Point-hour Ratio—Fresh Start Rule (Faculty Rule 3335-7-261)

An undergraduate student who re-enrolls in the University after an absence of five or more years may petition the dean or director of his enrollment unit to recalculate the cumulative point-hour ratio of his previous residency. If the petition is approved, all courses taken will remain on the permanent record. Those with marks of A, A−, B+, B, B−, C+, C, C−, EM, K, PA, or S will be counted for credit only. No other marks will be counted for credit.

If the petition is approved, the student resumes his academic program with no cumulative point-hour ratio, and thereafter is subject to the conditions of warning, probation, and dismissal that govern all students (see Faculty Rules 3335-9-24 to 3335-9-29, Pages 477-478).

Under the provisions of this rule a student, before graduation, must be re-enrolled for a minimum of 45 quarter credit hours and three academic quarters.

All courses ever taken at the university will be used in the calculation of the cumulative point-hour ratio required for the purposes of graduation with honors.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and publish the rule in their bulletins.

Failure in a Required Course (Faculty Rule 3335-7-27)

An undergraduate or professional student who has not been dismissed from the University must repeat in a regularly scheduled class, at the first opportunity, a required course in which a mark of E has been received, unless an equivalent course is recommended and approved by the authorized representative of the dean or director of the enrollment unit.

A graduate student who has not been dismissed from the University must repeat in a regularly scheduled class a required course in which a mark of E has been received only if this is required by the student's adviser.

Student Substitution of Marks—Forgiveness Rule (Faculty Rule 3335-7-271)

An undergraduate student who has received a grade of D+, D or E in a course or courses taken during his freshman year (the period during which the student accumulates the first 44 credit hours on his official permanent record) may repeat or substitute up to 15 credit hours of such courses subject to the following regulations:

- The course serving as a repetition or substitute for a course in which a grade of D+, D or E was received must be recommended by the student's adviser and have the approval of the authorized representative of the dean or director of the student's enrollment unit, before noon of the third Saturday of the quarter in which the substitute course is taken.

- The mark received in the repeated or substitute course shall be entered on the student's permanent record and count toward his cumulative point-hour average and credit hours toward graduation. The original course and mark shall remain on the student's permanent record but will not count on his cumulative point-hour ratio or credit hours toward graduation.

- Courses repeated or substituted according to this rule shall be completed no later than the end of the quarter during which the student will have accumulated a total of 89 credit hours.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and publish the rule in their respective bulletins.

Repetition of Courses (Faculty Rule 3335-7-28)

Except as specified by Faculty Rule 3335-7-27 (page 475), undergraduate students who have received a mark of E or NP in a course at this university may repeat the course for credit at their option.

Undergraduate or a professional students, as defined in Faculty Rule 3335-9-01, who have received a mark of D+ or D in a course at this university may repeat the course for credit only upon the recommendation of the authorized representative of the dean or director of his enrollment unit.
Undergraduate or professional students, as defined in Faculty Rule 3335-9-01, who have received a mark of A, A−, B+, B, B−, C+, C, C−, or Pass in a course at this university or elsewhere may repeat the course only as auditors, in accordance with Faculty Rule 3335-7-29 (see below).

A graduate student, as defined in Faculty Rule 3335-9-01 may repeat for credit any course when approval is given by the student’s adviser.

A student who has audited a course may subsequently repeat the course for credit with permission of the authorized representative of the dean or director of his enrollment unit.

The credit hours for a repeated course shall in no case be counted more than once in meeting graduation requirements.

When a student repeats a course, both grades appear on the student’s record and both are used in computing the point-hour ratio, except as modified by Faculty Rule 3335-7-271 (page 475).

Admission to Courses as an Auditor (Faculty Rule 3335-7-29)

An undergraduate or professional student may audit a course upon the approval of the professor in charge of the course and the dean of the college, or designee, in which the student is registered. (For repetition of courses, see Faculty Rule 3335-7-28, page 475.) A graduate student may audit a course upon the approval of the professor in charge of the course and the student’s adviser.

Withdrawal from Courses or from the University (Faculty Rule 3335-7-32)

Withdrawal from the University during a quarter constitutes withdrawal from all courses in which a student is enrolled during that quarter. Upon official notification of the student’s withdrawal from the University, the registrar is authorized to enter the dated notation withdrew on the student’s official permanent record.

To withdraw from any or all courses, a student must file the appropriate form with the authorized representative of the dean or director of the student’s enrollment unit.

Until 5:00 p.m. of the third Friday of a quarter or the second Friday of a summer term, a student may withdraw from any or all courses which began in the same quarter (or term), and no record for the course(s) will be entered on the student’s official permanent record.

After 5:00 p.m. of the third Friday of a quarter and until 5:00 p.m. of the seventh Friday of a quarter, if a student withdraws from any or all courses which began in the same quarter, the registrar is authorized to enter the mark W on the student’s official permanent record for the courses withdrawn.

After 5 p.m. of the seventh Friday of the quarter or the second Friday of a summer term, a student who because of circumstances beyond his control finds it necessary to withdraw from any or all courses, must file the appropriate petition with the authorized representative of the dean or director of the enrollment unit. Reasons not acceptable include (but are not limited to) the student’s performance in the course(s), lack of preparation for the course(s), or dissatisfaction with the subject matter offered in the course(s). If the petition is approved, a copy will be filed with the registrar who is then authorized to enter the mark W on the student’s official permanent record and the instructor(s) of the course(s) will be so notified. If the petition is not approved, the student continues to be enrolled in the course(s) and a final mark must be submitted by the instructor(s). Withdrawal from any and all courses shall not be permitted after the last day of regularly scheduled classes except when the student experiences a genuine emergency after the regularly scheduled classes end and prior to sitting for the final examination in a given course or courses.

Withdrawal from any or all courses shall not be permitted after the final examination in that course has been given.

A student who stops attending a course (or courses) and does not officially withdraw from it (them) shall have the appropriate mark as submitted by the instructor entered on the student’s official permanent record for the course(s). Such a mark shall be based on the grading criteria used to evaluate all students in the course.

Graduate professional colleges shall formulate rules to govern withdrawal of their students from courses in their respective curricula, subject to the approval of the Council on Academic Affairs, and publish these rules in their respective bulletins.

For provision regarding return of fees, when applicable, see the quarterly Master Schedule of Classes Bulletin.
Warning and Dismissal

Minimum Scholastic Requirements (Faculty Rule 3335-9-23)

These requirements shall apply only to undergraduate students. The academic standards controlling warning, probation, and dismissal of professional and graduate students shall be established by rule by the faculties of the colleges in which the professional students are registered, or of the Graduate School if the student is a graduate student; provided, however, that an undergraduate professional student shall not be dismissed from the University unless he has 15 or more deficiency points which are computed on the basis of the entire undergraduate program.

A transfer student from another university who is admitted to advanced standing in this university shall have the point-hour ratio and deficiency points computed only upon work done at this university.

In order to remain in good academic standing in the university, a student must maintain a cumulative point-hour ratio of at least 2.00. Deficiency points are applied only to the records of students whose point-hour ratio is below 2.00 and are defined as the number of credit points a student would have to earn to bring his point-hour ratio up to that level. Deficiency points may be calculated by subtracting the number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A−, B+, B, B−, C+, C, C−, D+, D, or E) were given.

Academic Warning (Faculty Rule 3335-9-24)

Any student who has never attended another college or university and who seeks to enroll as a new freshman in this university shall be placed on special warning when his application for admission is received and processed if his academic credentials indicate the probability of low achievement. He shall be so informed before final registration and the payment of fees are completed, except as provided in Faculty Rule 3335-9-27. The fact that special warning has been given shall be made known to the office of the college or school to which he seeks admission.

If, at the end of any quarter, a student subject to the provisions of Faculty Rule 3335-9-23 has accumulated fewer than fifteen deficiency points, he shall receive a warning from the dean of his college or director of his school, except as provided in Faculty Rule 3335-9-27.

Academic Probation (Faculty Rule 3335-9-25)

Any student who has accumulated fifteen or more deficiency points shall be placed on probation. The probation shall continue provided that the student's college considers his progress to be satisfactory and shall be removed when he has reduced his deficiency points to fewer than fifteen. The student shall be notified of probationary status by the dean of the college or the director of the school in which he is registered, except as provided in Faculty Rule 3335-9-27. Such notification shall include a clear statement of what shall be considered to be satisfactory progress.

Probation by special action. If at any time the preparation, progress, or success of a student in his academic program is determined to be unsatisfactory, the college or school in which the student is registered shall be empowered to place him on academic probation.

Requirements and definition. In order to remain in good standing in the university a student must maintain a point-hour ratio (see Faculty Rule 3335-7-26, page 474) of at least 2.00. Deficiency points are applied only to the records of students whose point-hour ratio is below 2.00 and are defined as the number of credit points a student would have to earn to bring his point-hour ratio up to that level. Deficiency points may be calculated by subtracting the total number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A−, B+, B, B−, C+, C, C−, D+, D, or E) were given.

An undergraduate student admitted with conditions and who has not satisfied the conditions after earning 30 quarter credit hours through regular course enrollment as this university shall be placed on academic probation.

Academic Dismissal (Faculty Rule 3335-9-26)

If the student's college or school considers a student's progress as unsatisfactory in meeting the conditions placed on his probation, the college or school shall be empowered to dismiss him from the university. An exception to this authority for undergraduate professional students shall be in accordance with Faculty Rule 3335-9-23. Notice of the dismissal shall be
sent to the student by the dean of the college or the director of the school in which the student was registered for the quarter, except as provided in Faculty Rule 3335-9-27. No student shall be subject to academic dismissal unless he is currently on probation.

Notice of Dismissal (Faculty Rule 3335-9-27)

Notice of dismissal from the university shall be sent by the dean of the college in which the dismissed student is registered.

Reinstatement after Academic Dismissal (Faculty Rule 3335-8-28)

Any student who may be reinstated by a college or school following academic dismissal shall be subject to such special requirements as may be determined appropriate by the dean of the college or director of the school. If the performance record of any reinstated student does not meet the conditions of probation specified at the time of reinstatement, then the college or school in which he is registered shall determine whether the student is to be dismissed or continued on probation.

Curricular information

College or School Requirements

Each college or school has certain requirements which must be met by every student seeking to earn a degree in that college or school. The specific course requirements for the curricula administered by a given college or school can be found in the bulletin for that college or school. In addition to these, the University has established certain requirements outlined below.

University Required Courses

Curricular Requirements—Free Electives (Faculty Rule 3335-7-06)

Every undergraduate curriculum must provide for a minimum of 15 hours of free electives.

Basic Education Requirements—BER (Faculty Rule 3335-7-07)

Every undergraduate student must complete 45 hours selected to ensure acquaintance with the three basic areas of academic study: the humanities, the social sciences, and the natural sciences. A minimum of 15 hours is required in each of the three areas.

Courses which may be used to meet the BER are so designated throughout this bulletin. Not all BER courses are acceptable in all curricula. Students should consult their specific college or school publications or their advisers before scheduling courses to be applied to this requirement.

The objectives of this part of the curriculum, as set forth by the University faculty, are as follows.

Humanities The objectives are to introduce the student to his possibilities for continuing growth as a thoughtful and reasoning person, sensitive to the aspirations and attainments of others; to acquaint him to at least some degree with the treasures of human thought and expression at his command; and to develop a continuing desire to have his full share of the legacy of all creative efforts.

Natural Sciences The objectives are to acquaint the student with the kinds of problems which lend themselves to possible solutions through the use of science; to introduce him to different scientific techniques through significant illustrative experiences; to give him a sense of perspective in the development of science; and to develop in him an understanding of the basic community of all scientific disciplines.

Social Sciences The objectives are to ensure that the student has a basic understanding of the fundamental ideas upon which our society has been built, the social institutions through which these ideas have been given effective meaning, and the never-ending process of development through free choices limited only by concern for the rights and well-being of others. Emphasis is put upon the values of a free society and the responsibility of the individual for participating actively in the issues and decisions of the day.

Requirements for the Associate of Arts Degree

To obtain the Associate of Arts degree, undergraduate students who have attended, or are attending, the Lima, Mansfield, Marion, or Newark campuses must:

- Successfully complete at least 90 quarter credit hours of university credit.

These 90 hours of credit may include a maximum of 12 quarter hours of special technical credit. Remedial courses (English 100.01, 100.02, 100.03; Math 100, 102; and courses listed in the Course Offerings Bulletin as not counting toward the baccalaureate degree) may not be applied.
Level IV placement on the OSU Math Placement Exam or the completion of Math 100 is required. University College 100, if required, must be completed before the degree is granted.

- Successfully complete a core of 50 hours of requirements distributed as follows: English 110 or 111 (5), humanities (10-15), foreign language (0-10), social science (10-15), natural science (10-15), and analytical skills/mathematics (0-10).

Courses used to satisfy the humanities, social science, and natural science components must be chosen from the lists of courses approved for those components of the University Basic Education Requirements. Similarly, courses used to satisfy the foreign language and analytical skills components must be chosen from the list of courses approved for the Liberal Arts Core of the Colleges of the Arts and Sciences components I, II, and III respectively. Students who intend to pursue a bachelor’s degree at Ohio State must take care to ensure that the courses they select to satisfy the Associate of Arts requirements also satisfy the corresponding requirements of the chosen baccalaureate degree. In accordance with Faculty Rule 3335-7-21, the Pass/Non-Pass Option may not be used for any of the core courses.

- Maintain a cumulative point-hour ratio of at least 2.00 on all work attempted at OSU at the time of, or after the completion of, all other requirements.

- Complete 30 of the last 45 quarter credit hours through regular course enrollment at OSU.

- Complete 15 of the required 90 quarter credit hours on a regional campus.

- Complete a minimum of three quarter credit hours in regular course enrollment at OSU Summer Quarter 1980 or thereafter.

- Not have received a baccalaureate or a professional degree from an accredited institution.

- Have filed an application for the degree in accordance with rules and procedures prescribed by the Colleges of the Arts and Sciences. Application must be made within four years after the requirements have been completed.

To obtain an undergraduate baccalaureate degree from this university, an undergraduate student must:

- Have earned a minimum of 45 quarter hours credit through regular course enrollment at this university.

- Have been enrolled in the college, the Colleges of the Arts and Sciences, or the school recommending that degree during the last quarter necessary to complete degree requirements. The executive committee of the college, the Colleges of the Arts and Sciences, or the school recommending the degree may, upon petition by the student, waive this requirement.

- Have satisfactorily completed the number of credit hours required for the curriculum he is pursuing. The minimum number of credit hours required in each curriculum shall include the credit hours required under Faculty Rules 3335-7-06 and 3335-7-07. Credit hours required to satisfy admission conditions shall not be used to satisfy the requirements of Faculty Rules 3335-7-06 and 3335-7-07. Credit hours are considered as “satisfactorily completed” only if the student has received, at this university the mark A, A−, B+, B, B−, C+, C, C−, D+, D, EM, K, PA or S in those hours.

- Have earned credit points (Faculty Rule 3335-7-25) totaling at least twice the number of credit hours attempted at this university for which calculable grades (A, A−, B+, B, B−, C+, C, C−, D+, D, or E) were given.

- Have satisfactorily met all additional college and curricular requirements for the degree involved.

- Have filed an application for the degree in accordance with rules prescribed by the college or school.

Except as provided in the second paragraph above, waiver of any part of this rule (3335-9-30) in the case of individual students may be made only by the Council on Academic Affairs following prior approval by the appropriate executive committee. The provost shall transmit all affirmative actions of the Council on Academic Affairs under this section to the secretary of the student’s college and to the registrar for notation on the student’s permanent record.

In establishing such minimum requirements, the college or school shall include or exceed the minimum requirements stipulated by the appropriate accrediting body. Such graduation requirements shall be subject to approval by the Council on Academic Affairs and shall be filed with the secretary of the Board of Trustees.

Requirements for Certificate of Study (Faculty Rule 3335-9-321)

A certificate of study may be awarded concurrent with or following the student's receipt of a baccalaureate degree. Award of such certificates shall attest to demonstrated competence in a coherent academic curriculum, program or area of study.

To obtain a certificate a student must:

- Have been or be enrolled in the University during the last quarter of work necessary to complete the certificate requirement. In addition, the student must meet any residency requirement established by the college, the Colleges of the Arts and Sciences, or the school recommending the certificate.

Nondiscrimination Policy

The policy of The Ohio State University, both traditionally and currently, is that discrimination against any individual for reasons of race, color, creed, religion, national origin, sex, age, handicap, or Vietnam-era veteran status is specifically prohibited. Title IX of the Education Amendments of 1972 prohibits sex discrimination and Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of handicap in education programs and activities. Accordingly, equal access to employment opportunities, admissions, educational programs, and all other University activities is extended to all persons, and the University promotes equal opportunity through a positive and continuing affirmative action program.

The University's Office of Affirmative Action, 134 Archer House, 2130 Neil Avenue, Columbus, Ohio 43210, phone 614-422-4207, is responsible for the coordination of matters relating to equal opportunity and this nondiscrimination policy. Information concerning violations of the policy and inquiries regarding University compliance with equal opportunity mandates, affirmative action, the requirements of Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and other applicable statutes and regulations pertaining to equality of opportunity may be addressed to the director or associate director of Affirmative Action at the address and telephone number indicated.

Further policy guidelines pertaining to affirmative action at The Ohio State University are detailed in the University Operating Manual, Section 1.0. Copies of the Operating Manual are available for reference in college and department offices throughout the campus.
