The Ohio State University

Ohio State is the major comprehensive University in the state of Ohio. Through its central campus in Columbus, four regional campuses, Agricultural Technical Institute, educational telecommunications programs, cooperative extension service, and health care programs, the University serves the entire state. As a major land grant university Ohio State is also a national resource. Its fundamental purpose—in teaching, research, and public service—is to enhance the quality of human life through developing the individual capacity for enlightened understanding, thinking, and acting. Through the dissemination of knowledge, the University not only serves the individual but acts as a force to shape society for the common good. As such, it is also a significant international resource.

Ohio State offers degree programs in a variety of disciplines, including baccalaureate and graduate programs in the liberal arts and sciences, in agriculture, in the various professional areas, and in the health sciences. As the major graduate institution of the state, The Ohio State University plays an important role in the generation of new knowledge through research and other creative work, and in the preparation of mature scholars. The University provides the only programs in Ohio in graduate study in agriculture, in certain of the allied medical professions, in optometry, and in veterinary medicine. The quality and diversity of its instructional programs and resources afford students the opportunity to elect programs of unusual strength in the traditional university disciplines, as well as interdisciplinary programs which reflect new ways of organizing knowledge and new approaches to contemporary problems.

Equality of opportunity is a basic philosophy of Ohio State. Mindful of the need for all persons to adapt to the changing roles and needs of society, the University also provides evening programs and continuing education opportunities to serve a wide spectrum of lifelong learning needs. In the exploration of new ideas and in the preparation of citizens for their roles in a changing society, the University represents a human commitment—an expression of the aspiration of people to better themselves and the world in which they live.

Student Responsibility

Students are responsible for knowing their own standing scholastically in reference to the published regulations and standards of the University and of their college or school.

Examinations and Marks

Course Examinations (Faculty Rule 3335-7-19)

At the close of each course, an examination will be given on the student’s capabilities relative to the stated course objectives, the method of examining to be determined by the instructor or supervisor of the course. Examinations in laboratory and seminar courses shall be optional with the instructor concerned. Examinations for graduating students shall be given at a time near the end of each course, preferably during the last week of classes.

Schedules for Final Examinations (Faculty Rule 3335-7-20)

Examinations for classes taught on the regional campuses and for classes whose enrollment is exclusively of students registered in the Colleges of Dentistry, Law, Medicine, Optometry, Pharmacy, and Veterinary Medicine will be scheduled by the offices of the regional campuses and of the colleges respectively. All examination schedules prepared outside the Office of the University Registrar shall, before publication, be cleared with the Office of the University Registrar which shall have the power to resolve all conflicts.

Examinations for graduating students shall be arranged by individual instructors so that final grades for the affected students may be submitted to the Office of the University Registrar by the deadlines established by that office.

All other final examinations shall be centrally scheduled by the Office of the University Registrar. The official examination schedules shall be strictly adhered to by all instructors. Any deviation must first be approved by the appropriate university official (department chairperson, regional campus dean and director, or college dean) in consultation with the Office of the University Registrar, which shall have the power to resolve all conflicts.

in performing its scheduling function the Office of the University Registrar shall limit individual examinations to two-hour duration and the total examination period to no more than five days.

Marks (Faculty Rule 3335-7-21)

The official marks of the University are as follows:

- **A, A−**  The instructor judged the student to have satisfied the stated objectives of the course in an excellent manner.
- **B+, B, B−** The instructor judged the student to have satisfied the stated objectives of the course in an above average manner. The student’s performance was judged to be in this range of high quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on the instructor’s experience and expertise.
- **C+, C, C−** The instructor judged the student to have satisfied the stated objectives of the course in an average manner. The student’s performance was judged to be in this range of average quality based upon a comparison with other students in the course, and/or students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on the instructor’s experience and expertise.
- **D+, D** The instructor judged the student to have satisfied the stated objectives of the course in a low but acceptable manner. The student’s performance was judged to be in this range of below average but acceptable quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor’s personal expectations relative to the stated objectives of the course, based on the instructor’s experience and expertise.
- **E** The instructor judged the student not to have satisfied the stated objectives of the course. Credit for a course in which the mark E has been received can be obtained only by repeating and passing the course in class. (See Faculty Rules 3335-7-23 to 3335-7-28).
EM Examination

This mark indicates credit given to students registered in the University on the basis of examinations taken prior to or after admission to the University. The level of achievement which must be demonstrated by the student on these examinations in order to receive EM credit shall be determined by the department or school in which the course is offered for credit, in accord with the criteria for the award of letter grades. This credit, up to a maximum of 45 credit hours, shall be assigned only upon the authorization of the chairperson of the department or the director of the school and with the approval of the authorized representative of the dean or director of the student’s enrollment unit. Additional examination credit hours may be assigned specific curricular programs with the prior approval of the Council on Academic Affairs.

Examination credit shall not be given to a student for a course in which the student has received a mark at this University or for which the student has transfer credit from some other college or university. Conversely, no course for which EM credit has been received can be taken later for a grade or credit. No credit points are allowed for courses in which a mark of EM is given.

Incomplete

An I indicates that the student has completed a major portion of the work in the course in a satisfactory manner; but for reasons judged by the instructor to be legitimate, a portion of the course requirements remains to be completed.

The mark I shall be reported to the Office of the University Registrar together with the mark which the registrar is authorized to enter on the student’s official record unless a different mark is reported to the Office of the University Registrar in the manner and within the time described below.

The student must complete the work so that the instructor of the course may report the final mark at the earliest possible time, but not later than noon of the sixth Saturday of the quarter or semester if applicable, following the quarter or semester in which the I was received. For legitimate reason, the instructor may establish a deadline for the completion of the work which is within the maximum time permitted. Upon petition of the student within this period, the authorized representative of the dean or director of the enrollment unit in which the student was last enrolled after consultation with the instructor of the course, or, if the instructor is unavailable, the chairperson of the department involved, may for good reason allow a student additional time in which to complete the work. Generally, this shall not be longer than the end of the quarter, or semester if applicable, following the quarter or semester in which the I was received. Any decision extending the period shall set forth the time in which the student shall complete the work and a copy of the decision shall be forwarded to the Office of the University Registrar.

As soon as the incomplete work has been made up, the instructor, or in the case of the instructor’s absence from the University, the department chairperson or the director of the school, shall file the proper mark in the Office of the University Registrar. Until such time as a final mark is recorded the credit for the mark I shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26.

In no case shall a student who has received the mark I be permitted to repeat the course in which such mark was received until such time as the I has been removed and then only in such cases as fall within Faculty Rule 3335-7-28.

K Credit

This mark shall be used for work credited from other institutions by the director of admissions only. K credit shall be counted as hours only and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26 (page 7).

P Progress

This mark is used to indicate that the student has shown satisfactory progress in a series or sequence of courses where the mark is not recorded until the final quarter, or semester if applicable, of the series or sequence is completed. Until such time as a final mark is recorded the mark of P shall be given and the credit shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26 (page 7). When a final mark is submitted by the instructor, all previous P marks shall assume and be recorded with the value of the final mark.

P mark is not to be used for any course approved for the S/U mark.

PA/NP Pass/Non-Pass

The grade PA means the student has satisfied the stated objectives of the course, and the grade non-pass NP is the equivalent of the grade E.
These marks may be used at the option of undergraduate or continuing education students only, subject to the following conditions:

This grading pattern may be chosen for a maximum of thirty credit hours, provided the student has an accumulated point-hour ratio of 2.00 or higher.

Among these thirty credit hours, an undergraduate student may elect this option for courses in fulfillment of the curricular requirements of Faculty Rule 3335-7-06 of the Administrative Code.

An undergraduate student may elect this option for courses that are not required or designated as required electives in the curriculum leading to the degree for which the student is a candidate.

Hours graded pass PA count toward the minimal number of hours required for a degree. Pass or non-pass marks PA, NP are not computed in the point-hour average of the student.

Before five p.m. of the third Friday of a quarter or the second Friday of a term, a student must have declared intention to take a course on this basis by filing the appropriate form with the dean or director of the student’s enrollment unit.

A student may not change to or from this option after five p.m. of the third Friday of a quarter or the second Friday of a term.

R Registered to Audit

This mark indicates that the student has registered to audit the course and has met the conditions established for audit enrollment in the course. No credit hours shall be awarded for this mark.

Before five p.m. of the third Friday of a quarter, semester, or session, or the second Friday of a term, a student must have declared intention to take a course for audit or to change from a credit to an audit basis by filing the appropriate form with the dean or director of the student’s enrollment unit. A student may not change to or from the audit option after five p.m. of the third Friday of a quarter, semester, or session, or the second Friday of a term.

S/U Satisfactory/Unsatisfactory

The mark S may be used to record either satisfactory progress in or completion of work, provided that the course has been approved for this mark by the dean of the college offering the course, and in the case of courses carrying graduate credit, by the dean of the Graduate School. It shall be used as an alternative to U or I in all individual studies courses whatever their number. S credit shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26.

The mark U shall be used for unsatisfactory work in courses in which a student would be entitled to the mark of S if the student’s work has been satisfactory. No credit shall be given for work marked U. This mark shall not be considered in determining a student’s point-hour ratio under Faculty Rule 3335-7-26.

W Withdrawn

This mark is used for students withdrawing from one or more courses or from the University. See Faculty Rule 3335-7-32 for procedures and provisions governing withdrawals.

Report of Marks (Faculty Rule 3335-7-22)

Upon completion of the course requirements marks for every student shall be reported to the Office of the University Registrar in accord with deadlines listed in the quarterly Master Schedule of Classes.

This office maintains the student's official permanent record and is responsible for issuing a quarterly grade report to each student.

Alteration of Marks (Faculty Rule 3335-7-23)

(A) A mark filed in the Office of the University Registrar is a part of the official records of the University. It is subject to change only when a procedural error has been discovered in evaluation or recording of a grade. Action to change a grade must be initiated before the end of the second succeeding quarter. In no case will a grade be revised in accordance with criteria other than those applied to all students in the class. If the instructor agrees that an error in the mark was made, the mark will be changed upon the written authorization of: the instructor of the course; the instructor’s department chairperson; the director of the instructor’s school, if applicable; the dean of the instructor’s college; and the authorized representative of the dean or director of the student’s enrollment unit.

If a student believes that a procedural error in grading was made, the student should meet with the instructor. If the instructor does not agree that a procedural error was made, the student may meet with the department chairperson to discuss the grade grievance. The chairperson shall respond to the student no later than 30 days after the student has requested a review by the chairperson. Upon receipt of the chairperson’s response, if the issue is not resolved to the satisfaction of the student, the student may within two weeks request in writing by duplicate submission to the dean or director of the instructional unit and the department chairperson, the procedures in paragraph (B) of this rule. Unresolved cases of grade grievance due to grading procedures are subject to paragraph (B) of this rule; unresolved cases of grade grievance due to course content are not subject to paragraph (5) of this rule.
(B) Unresolved cases of grade grievances due to grading procedures shall be reviewed by a faculty departmental committee appointed by the department chairperson.

- In cases of instructors still affiliated with the University, the review committee shall consult both the student and the instructor and shall determine the validity of the grade grievance due to grading procedures. The review committee shall make its findings known in writing to both the student and the instructor within 30 days of the student's request to the chairperson. If the committee finds that a procedural error has occurred and if the instructor declines to accept the findings of the review committee, the committee shall consider the reasons for not authorizing a grade change given by the instructor and may, upon consideration of these reasons, authorize in writing a grade change to be instituted by the department chairperson.

- In cases of instructors no longer affiliated with the University, the findings of the committee shall be reported to both the student and the instructor. If the instructor chooses not to respond, the judgment of the committee shall prevail. If the instructor responds and declines to accept the findings of the committee that a procedural error has occurred, the committee shall consider the reasons for not authorizing a change given by the instructor. In either case, the committee may, upon due consideration, authorize in writing a grade change (if such can be determined) to be instituted by the department chairperson.

If a department committee can find no academic basis upon which to recommend an appropriate grade for the course, the student shall be given the option of having the course stricken from the student's record and, if so desired, to retake that course without prejudice or penalty.

(C) If charges of grave academic misconduct against an instructor are made and substantiated under Faculty Rule 3335-5-04, the department chairperson shall be authorized to appoint a department grade grievance committee to consider grading errors that are alleged to be related to the misconduct. The committee shall consider all evidence and present, in writing, a report to the chairperson indicating any recommended grade changes. The department chairperson shall be authorized to institute grade changes in accordance with the recommendations of the committee.

If a department committee can find no academic basis upon which to recommend an appropriate grade for the course, the student shall be given the option of having the course stricken from the student's record and, if so desired, to retake that course without prejudice or penalty.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and publish the rule in their bulletins.
Course Credit

Credit Hours (Faculty Rule 3335-7-24)

All courses shall be assigned a number of credit hours in accordance with the procedures outlined in rule 3335 7 02 to 3335 7 04. This may be any number from zero on up; however, in determining the credit hours assigned, the department, school, college, and Council on Academic Affairs should use as a guide the following suggested standards:

• One credit hour shall be assigned for each three hours per week of the average student’s time, including class hours, required to earn the average grade of C in this course.

• One credit hour shall be assigned for each two consecutive hours of practical or experimental work per week in any department or school.

• One credit hour shall be assigned for each three hours of laboratory work per week, when no additional outside work is required. When outside work is required, then the first standard listed above shall be applied.

In determining the hours per week required by the course or work, the Council on Academic Affairs may, in appropriate cases, consider the average weekly hours spent during a quarter or semester on the course or work. It should be remembered that the above are guides only and may be deviated from for good cause.

When comparing or combining semester credit hours with quarter credit hours, one semester credit hour shall be the equivalent of one and one-half quarter credit hour.

Credit Points and Point-hour Ratio
(Synopsis of Faculty Rules 3335-7-25 and 3335-7-26)

A student’s academic standing for a quarter or semester is expressed by the point-hour ratio. This ratio is found by dividing the total number of points earned by the total number of credit hours scheduled or undertaken. Courses in which the marks E, F, I, K, NP, P, PA, R, S, U, or W are given are not included in the computations. Courses in which the marks A, A-, B+, B-, C+, C, C-, D+, D, or E are given are computed according to the scale:

A=4.00, A-=3.70, B+=3.30, B-=3.00, B=2.70, C+=2.30, C=2.00, C-=1.70, D+=1.30, D=1.00, and E=0.00. The following example shows how a point-hour ratio is determined.

Point-hour ratio: 2.44

When the final grade on Course No. 3 is recorded, the points and hours will be included in the computation of the student’s point-hour ratio. When a student has a record for two or more quarters or semesters, the student will have a cumulative point-hour ratio determined by dividing the total points earned by the total hours undertaken.

The point-hour ratio begins anew when a student enrolls in Dentistry, Law, Medicine, Optometry, Pharmacy, Veterinary Medicine, or the Agricultural Technical Institute.

When determining the point-hour ratio of a student:

• For a quarter, or semester if applicable, the applicable number of credit hours shall be the student’s scheduled credit hours in that quarter or semester.

• For the student’s work in the University, the applicable number of credit hours shall be the total number of credit hours undertaken in the University except as modified by Faculty Rule 3335-7-271.

• For the student’s work in the Graduate School, the applicable number of credit hours shall be the total number of graduate credit hours undertaken while enrolled in the Graduate School. For the student’s work in a professional college or school or professional division of a college, the applicable number of credit hours shall be the total number of credit hours undertaken while enrolled in the professional college or school or professional division of a college.

• For the student’s work in the major field of interest, the applicable number of credit hours shall be the total number of credit hours undertaken in courses approved for the major program.
No College of Medicine point-hour average shall
be computed for a student enrolled in the
College of Medicine in a curriculum leading to
the degree, Doctor of Medicine, when that
student has received only the marks of H, S, or
E in the College of Medicine.

Recalculation of Cumulative Point-
hour Ratio—Fresh Start Rule
(Faculty Rule 3335-7-261)

Undergraduate students who re-enroll in the
University after an absence of five or more years
may petition the dean or director of their
enrollment unit to recalculate the cumulative
point-hour ratio of their previous residency. If the
petition is approved, all courses taken will remain
on the permanent record. Those with marks of
A, A−, B+, B, B−, C+, C, C−, EM, K, PA, or S,
will be counted for credit only. No other marks
will be counted for credit.

If the petition is approved, students resume their
academic program with no cumulative point-hour
ratio, and thereafter are subject to the conditions
of warning, probation, and dismissal that govern
all students (see Faculty Rules 3335-9-24 to
3335-9-28).

Under the provisions of this rule a student,
before graduation, must be re-enrolled for a
minimum of 45 quarter credit hours and three
academic quarters.

All courses ever taken at the University will be
used in the calculation of the cumulative point-
hour ratio required for the purposes of
graduation with honors.

The Graduate School and graduate professional
colleges may formulate appropriate modifications
of this rule, subject to the approval of the
Council on Academic Affairs, and publish the
rule in their bulletins.

Failure in a Required Course (Faculty
Rule 3335-7-27)

Undergraduate or professional students who
have not been dismissed from the University
must repeat a regularly scheduled class, at
the first opportunity, a required course in which
a mark of E has been received, unless an
equivalent course is recommended and
approved by the authorized representative of the
dean or director of the enrollment unit.

Graduate students who have not been dismissed
from the University must repeat a regularly
scheduled class a required course in which a
mark of E has been received only if this is
required by the students’ adviser.

Student Substitution of Marks—
Forgiveness Rule (Faculty Rule
3335-7-271) Revision Proposed

Undergraduate students who have received a
grade of D+, D or E in a course or courses
taken during their freshman year (the period
during which the student accumulates the first
44 credit hours on their official permanent
record) may repeat or substitute up to 15 credit
hours of such courses subject to the following
regulations:

- The course serving as a repetition or substitute
  for a course in which a grade of D+, D or E was
  received must be recommended by the
  student’s adviser and have the approval of the
  authorized representative of the dean or director
  of the student’s enrollment unit, before noon of
  the third Saturday of the quarter in which the
  substitute course is taken.

- The mark received in the repeated or
  substitute course shall be entered on the
  student’s permanent record and count toward
  the student’s cumulative point-hour average and
  credit hours toward graduation. The original
course and mark shall remain on the student’s
  permanent record but will not count on the
  student’s cumulative point-hour ratio or credit
  hours toward graduation.

- Courses repeated or substituted according to
  this rule shall be completed no later than the
  end of the quarter during which the student will
  have accumulated a total of 89 credit hours.

The Graduate School and graduate professional
colleges may formulate appropriate modifications
of this rule, subject to the approval of the
Council on Academic Affairs, and publish the
rule in their respective bulletins.

Repetition of Courses (Faculty Rule
3335-7-28)

Except as specified by Faculty Rule 3335-7-27,
undergraduate students who have received a
mark of E or NP in a course at this university
may repeat the course for credit at their option.

Undergraduate or professional students, as
defined in Faculty Rule 3335-9-01, who have
received a mark of D+ or D in a course at this
university may repeat the course for credit only
upon the recommendation of the authorized
representative of the dean or director of their
enrollment unit.

Undergraduate or professional students, as
defined in Faculty Rule 3335-9-01, who have
received a mark of A, A−, B+, B, B−, C+, C,
C−, or Pass in a course at this university or
elsewhere may repeat the course only as
auditors, in accordance with Faculty Rule
3335-7-29.
A graduate student, as defined in Faculty Rule 3335-9-01, may repeat for credit any course when approval is given by the student’s adviser. A student who has audited a course may subsequently repeat the course for credit with permission of the authorized representative of the dean or director of the student’s enrollment unit. The credit hours for a repeated course shall in no case be counted more than once in meeting graduation requirements. When a student repeats a course, both grades appear on the student’s record and both are used in computing the point-hour ratio, except as modified by Faculty Rule 3335-7-271.

Admission to Courses as an Auditor (Faculty Rule 3335-7-29)
An undergraduate or professional student may audit a course upon the approval of the professor in charge of the course and the dean of the college, or designee, in which the student is registered. (For repetition of courses, see Faculty Rule 3335-7-28.) A graduate student may audit a course upon the approval of the professor in charge of the course and the student’s adviser.

Rescheduled Courses (Faculty Rule 3335-7-30)
Each department or school is authorized to administer placement examinations to students enrolling for the first time in a course offered by that department or school. Following such placement examinations, a department or school may instruct the secretary of the college or school in which the student is registered to change such student’s enrollment either to a more elementary or to a more advanced course.
If, within the first four weeks of a quarter or semester if applicable, a student’s previous preparation is demonstrably inadequate for a course in which the student originally enrolled, the department or school concerned is empowered to instruct the college or school in which that student is registered to remove the course from the student’s schedule and to replace it with a more suitable one.

Credit for Rescheduled Courses (Faculty Rule 3335-7-31)
Credit for all rescheduled courses resulting from action under Faculty Rule 3335-7-30 shall count toward the fulfillment of graduation requirements unless the student has previously earned university or college credit in a course having substantially the same subject matter content; or the substituted course is one which the department or school, with the approval of the Council on Academic Affairs, has established for students with inadequate preparation for college-level courses of that department or school.

Withdrawal from Courses or from the University (Faculty Rule 3335-7-32)
Withdrawal from the University during a quarter or semester if applicable, constitutes withdrawal from all courses in which a student is enrolled during that quarter or semester. Upon official notification of the student’s withdrawal from the University, the registrar is authorized to enter the dated notation withdrew on the student’s official permanent record.

To withdraw from any or all courses, a student must file the appropriate form with the authorized representative of the dean or director of the student’s enrollment unit.
Until 5:00 p.m. of the third Friday of a quarter or the second Friday of a summer term, a student may withdraw from any or all courses which began in the same quarter (or term), and no record for the course(s) will be entered on the student’s official permanent record.

After 5:00 p.m. of the third Friday of a quarter and until 5:00 p.m. of the seventh Friday of a quarter, if a student withdraws from any or all courses which began in the same quarter, the registrar is authorized to enter the mark W on the student’s official permanent record for the courses withdrawn.

After 5:00 p.m. of the seventh Friday of the quarter or the second Friday of a summer term, students who, because of circumstances beyond their control, find it necessary to withdraw from any or all courses, must file the appropriate petition with the authorized representative of the dean or director of the enrollment unit. Reasons not acceptable include (but are not limited to) the student’s performance in the course(s), lack of preparation for the course(s), or dissatisfaction with the subject matter offered in the course(s).
If the petition is approved, a copy will be filed with the University registrar who is then authorized to enter the mark W on the student’s official permanent record and the instructor(s) of the course(s) will be so notified. If the petition is not approved, the student continues to be enrolled in the course(s) and a final mark must be submitted by the instructor(s). Withdrawal from any and all courses shall not be permitted after the last day of regularly scheduled classes except when the student experiences a genuine emergency after the regularly scheduled classes end and prior to sitting for the final examination in a given course or courses.
Withdrawal from any or all courses shall not be permitted after the final examination in that course has been given.
A student who stops attending a course (or courses) and does not officially withdraw from it (them) shall have the appropriate mark as submitted by the instructor entered on the student's official permanent record for the course(s). Such a mark shall be based on the grading criteria used to evaluate all students in the course.

Graduate professional colleges shall formulate rules to govern withdrawal of their students from courses in their respective curricula, subject to the approval of the Council on Academic Affairs, and publish these rules in their respective bulletins.

For provision regarding return of fees, when applicable, see Faculty Rule 3335-9-18. This information may also be found in the Master Schedule of Classes Bulletin.

**Conditions for Continued Enrollment in a Course (Faculty Rule 3335-7-33)**

A. After consultation with the instructor, the chairperson of the instructor's department (or other appropriate administrative official) may disenroll a student from a course if:

1. By the third instructional day of the quarter or semester or term if applicable, or the second scheduled class session of the course, whichever occurs later, the student fails to attend the scheduled course without giving prior notification to the instructor. In such cases the chairperson (or other appropriate administrative official) shall notify the student's college office. A change ticket removing the course from the student's schedule shall be prepared and copies forwarded to the student and to the Office of University Registrar. The student is not relieved of the responsibility for dropping such course in the customary way.

2. The student enrolls to audit a course without the instructor's approval, or fails to meet the prerequisites of the course, or fails to demonstrate adequate preparation as provided in Faculty Rule 3335-7-30. Disenrollment procedures shall be the same as in the preceding paragraph of this rule.

B. After consultation with the instructor, students in the course, and the student in question, the chairperson (or other appropriate administrative official) may disenroll a student from a course if the student presents a clear and present threat of bodily harm or injury to the instructor or fellow students, or after warning continues to engage in disruptive conduct, either of which results in impairment of teaching or learning processes:

1. If, after attempting to resolve the difficulty by informal means, the department chairperson (or other appropriate administrative official) deems disenrollment necessary, the affected student shall be notified in writing. The notice shall be delivered by hand or sent through ordinary mail to the student at the last address supplied pursuant to Faculty Rule 3335-9-09. Copies of the disenrollment action shall be sent to the dean of the instructional college, the dean of the student's college, the Office of the University Registrar, and the Office of Student Affairs.

2. The student may appeal to the vice president for academic affairs and provost or designee for waiver of disenrollment, provided the appeal is filed within 10 days of the disenrollment action. The vice president for academic affairs and provost shall make final determination on the appeal within seven days.

3. Disenrollment is effective upon the action of the department chairperson (or other appropriate administrative official), unless reversed by the vice president for academic affairs and provost, or designee.

C. For disenrollment, exclusive of audit, the University registrar shall enter on the student's official permanent record:

1. No mark, if the disenrollment occurs before five p.m. of the third Friday of a quarter or semester course, or the second Friday of a summer term course.

2. The mark, W, if the disenrollment occurs after five p.m. of the third Friday of a quarter or semester course, or the second Friday of a summer term course.

D. If a student who has enrolled to audit a course fails to complete the requirements for audit specified by the instructor and also fails to withdraw from the course, the instructor shall so inform the Office of the University Registrar when all marks are reported for the quarter. That office will then disenroll the student from the course, removing the course from the student's permanent record, and will notify the student and the student's college of the action taken.

**Admission**

**Classification of Students for Admission (Faculty Rule 3335-9-01)**

Students shall be classified as:

- Undergraduate students: regular or special.

This shall include students registered in the colleges of Agriculture, Arts, Biological Sciences, Business, Home Economics, Humanities, Mathematical and Physical Sciences, Social and Behavioral Sciences, the University College, the division of pre-professional education of the College of Education, the pre-engineering division of the College of Engineering, and Continuing Education.
• Graduate students: regular, special, graduate nondegree, conditional, or transient. The provisional classification is used in conjunction with the regular, special, and conditional classifications.

• Professional students: regular or special. This shall include students either regularly or specially registered in the colleges or divisions of a college which admit after completion of a pre-professional curriculum.

• Transient students. This shall include regular enrollees of other institutions who with the recommendation of their college authorities enter this university for a brief residence or (usually one quarter or semester) without transfer of credits.

• Auditors. This shall include persons who desire to attend classes without receiving credit for any courses taken.

Warning and Dismissal

Minimum Scholastic Requirements (Synopsis of Faculty Rule 3335-9-23)

These requirements shall apply only to undergraduate students. The academic standards controlling warning, probation, and dismissal of professional and graduate students shall be established by rule of the faculties of the college in which the professional student is registered, or of the Graduate School if the student is a graduate student; provided, however, that an undergraduate professional student shall not be dismissed from the University unless the student has 15 or more deficiency points which are computed on the basis of the entire undergraduate program.

A transfer student from another university who is admitted to advanced standing in this university shall have the point-hour ratio and deficiency points computed only upon work done at this university.

In order to remain in good academic standing in the University, a student must maintain a cumulative point-hour ratio of at least 2.00. Deficiency points are applied only to the record of students whose point-hour ratio is below 2.00 and are defined as the number of credit points students would have to earn to bring their point-hour ratio up to that level. Deficiency points may be calculated by subtracting the number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A−, B+, B, B−, C+, C, C−, D+, D, or E) were given.

Academic Warning (Faculty Rule 3335-9-24)

Students who have never attended another college or university and who seek to enroll as new freshmen in this university shall be placed on special warning when their applications for admission are received and processed if their academic credentials indicate the probability of low achievement. They shall be so informed before final registration and the payment of fees are completed, except as provided in Faculty Rule 3335-9-27. The fact that special warning has been given shall be made known to the office of the college or school to which he seeks admission.

If, at the end of any quarter, students subject to the provisions of Faculty Rule 3335-9-23 has accumulated fewer than 15 deficiency points, they shall receive a warning from the dean of their college or director of their school, except as provided in Faculty Rule 3335-9-27.

Improper Registration

Improper Registration (Faculty Rule 3335-9-20)

Admission or registration may be cancelled by the Director of Admissions or the University Registrar in cases of improper registration or when false or incomplete information is provided on the application for admission, registration forms, or other official documents. No credits earned subsequent to such cancellation and prior to proper admission or registration shall be entered upon the permanent record of the student. Students whose admission or registration is cancelled are not entitled to any refund of fees.

Absences

Absences (Faculty Rule 3335-9-21)

Each department or school may make its own rules relative to occasional absences by students from scheduled activities. If, however, students are absent from a course to such an extent as to imperil their credit, or is notably irregular in attendance, it shall be the duty of the instructor concerned to report the facts promptly to the dean of the college in which the student is enrolled. Deans may take such action as they deem appropriate.
Academic Probation (Faculty Rule 3335-9-25)

Any student who has accumulated 15 or more deficiency points shall be placed on probation. The probation shall continue provided the student's college considers the student's progress to be satisfactory and shall be removed when the deficiency points are fewer than 15. The student shall be notified of probationary status by the dean of the college or the director of the school in which the student is registered, except as provided in Faculty Rule 3335-9-27. Such notification shall include a clear statement of what shall be considered to be satisfactory progress.

Probation by special action. If at any time the preparation, progress, or success of a student in an academic program is determined to be unsatisfactory, the college or school in which the student is registered shall be empowered to place the student on academic probation. An undergraduate student admitted with conditions and who has not satisfied the conditions after earning 30 quarter credit hours through regular course enrollment at this university shall be placed on academic probation.

Requirements and definition. In order to remain in good standing in the University a student must maintain a point-hour ratio (see Faculty Rule 3335-7-26), of at least 2.00. Deficiency points are applied only to the records of students whose point-hour ratio is below 2.00 and are defined as the number of credit points a student would have to earn to bring the student's point-hour ratio up to that level. Deficiency points may be calculated by subtracting the total number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A-, B+, B, B-, C+, C, C-, D+, D, or E) were given.

Academic Dismissal (Faculty Rule 3335-9-26)

If the student's college or school considers a student's progress as unsatisfactory in meeting the conditions placed on the student's probation, the college or school shall be empowered to dismiss the student from the University. An exception to this authority for undergraduate professional students shall be in accordance with Faculty Rule 3335-9-23. Notice of the dismissal shall be sent to the student by the dean of the college or the director of the school in which the student was registered for the quarter, except as provided in Faculty Rule 3335-9-27. No student shall be subject to academic dismissal unless the student is currently on probation.

Notice of Dismissal (Faculty Rule 3335-9-27)

Notice of dismissal from the University shall be sent by the dean of the college in which the dismissed student is registered.

Reinstatement after Academic Dismissal (Faculty Rule 3335-9-28)

Any student who may be reinstated by a college or school following academic dismissal shall be subject to such special requirements as may be determined appropriate by the dean of the college or director of the school. If the performance record of any reinstated student does not meet the conditions of probation specified at the time of reinstatement, then the college or school in which the student is registered shall determine whether the student is to be dismissed or continued on probation.

College Preparatory High School Curriculum

The Ohio State University's college preparatory high school curriculum policy applies to the admission of undergraduate degree students who enter the University Autumn Quarter 1984 and thereafter. Derived from recommendations made in the Report of the Advisory Commission on Articulation between Secondary Education and Ohio Colleges, this policy reflects Ohio State's concern that students obtain the high school academic background needed to prepare them properly for success in their college-level work.

For unconditional admission as a regular undergraduate student, applicants who graduated from high school on or after April 1, 1984, and who enter the University Autumn Quarter 1984, are required to have at least 15 high school units distributed in accordance with the preparatory curriculum specified here. This policy applies both to new freshmen and to transfer students who will have fewer than 45 transferable quarter credit hours at the time of their first enrollment at Ohio State.

The following college preparatory high school course work is required for unconditional admission:

English A minimum of four units of high school course work is required in this area, with subjects taken to emphasize the acquisition of writing skills.
Mathematics  A background of not fewer than three units of college preparatory mathematics is required, to include Algebra I, Algebra II, and geometry. Completion of one (Algebra I) of these three units while enrolled in the eighth grade is acceptable. It is strongly recommended that students schedule one unit of mathematics in their senior year of high school when possible.

Social Sciences  At least two units of high school course work are required in this area.

Natural Sciences  At least two units of science are required, with significant laboratory experience.

Foreign Languages  Two units of course work are required in the same foreign language. Completion of one of these two units while enrolled in the eighth grade is acceptable.

Visual and Performing arts  One unit of high school work earned in the visual or performing arts is required. Ohio State will accept art; cinema; clothing design and construction; dance; drafting; drama; mechanical drawing; music; oral interpretation; photography; speech; studio art; survey courses in the arts and humanities; theatre; visual arts; and certain vocational agricultural courses which include preparatory experiences in oral interpretation, speech, wood working, metal working, and design and construction.

Above-Mentioned Subject Areas  One additional unit from any of the above-mentioned subject areas is required.

Students are eligible for admission without having followed this curriculum. If you are admitted with deficiencies in one or more areas, however, you will be notified of conditions placed on your enrollment when you receive notice of your admission. You will be required to satisfy the conditions of your enrollment by the time you have completed 30 credit hours at Ohio State (two quarters of full-time study). An academic adviser will help you plan your course work in order to remove any condition within the stated time.

Enrollment conditions will be satisfied by earning college credits in the subject areas of deficiency in high school preparation. Conditions in the areas of mathematics and English will be determined for new freshmen (and transfer students with insufficient transferable credits in these subjects) by placement examinations, which will indicate any additional course work required in these subjects. In other subjects, students will be required to earn five hours of college credit in the same area of study for each college preparatory unit not completed in high school. Such credits may be earned by satisfactory completion of courses at Ohio State, satisfactory course work at other colleges, or by examination for credit. Credit hours earned to satisfy enrollment conditions are not counted toward the minimum number of credit hours required for the particular degree program the student is pursuing.

Ohio State courses which may be used to fulfill admission conditions in foreign language, the natural sciences, the social sciences, and the visual and performing arts are indicated in the following lists. For specific course descriptions, please see the course offerings listings in this book.

Foreign Languages

Students studying foreign languages at the elementary and intermediate levels typically take the sequence of courses numbered 101-102-103-104 (including the decimal subdivisions such as 101.51, etc.) and then move on to advanced courses. Students who need to satisfy the Arts and Sciences foreign language requirement must demonstrate competence at the 104 level. The courses numbered 100.01-100.02 are for students: 1) who do not intend to take foreign language beyond the level of 100.02; 2) who do not expect to complete more than ten credit hours sequentially; 3) who prefer a slower-paced introduction (also available in 101.51, etc.).

Students admitted with a foreign language condition should take the 101-102 sequence if they intend to continue in a language. Those who do not plan to take more than ten credit hours of foreign language study may take the 100.01-100.02 sequence.

Completion of 100.02 or 102 or equivalent or placement into 103 is required to fulfill foreign language conditions. Not all of the following languages are offered each quarter.

Curricular information

College or School Requirements

Each college or school has certain requirements which must be met by every student seeking to earn a degree in that college or school. The specific course requirements for the curricula administered by a given college or school can be found in the bulletin for that college or school. In addition to these, the University has established certain requirements outlined below.

University Required Courses

Curricular Requirements—Free Electives (Faculty Rule 3335-7-06)

Every undergraduate curriculum must provide for a minimum of 15 hours of free electives.

Basic Education Requirements—BER (Faculty Rule 3335-7-07)

Every undergraduate student must complete 45 hours selected to ensure acquaintance with the three basic areas of academic study: the humanities, the social sciences, and the natural sciences. A minimum of 15 hours is required in each of the three areas.

Courses which may be used to meet the BER are so designated throughout this bulletin. Not all BER courses are acceptable in all curricula. Students should consult their specific college or school publications or their advisers before scheduling courses to be applied to this requirement.

The objectives of this part of the curriculum, as set forth by the University faculty, are as follows.
Humanities The objectives are to introduce students to their possibilities for continuing growth as a thoughtful and reasoning persons, sensitive to the aspirations and attainments of others; to acquaint them to at least some degree with the treasures of human thought and expression at their command; and to develop a continuing desire to have their full share of the legacy of all creative efforts.

Natural Sciences The objectives are to acquaint students with the kinds of problems which lend themselves to possible solutions through the use of science; to introduce them to different scientific techniques through significant illustrative experiences; to give them a sense of perspective in the development of science; and to develop in them an understanding of the basic community of all scientific disciplines.

Social Sciences The objectives are to ensure that the student has a basic understanding of the fundamental ideas upon which our society has been built, the social institutions through which these ideas have been given effective meaning, and the never-ending process of development through free choices limited only by concern for the rights and well-being of others. Emphasis is put upon the values of a free society and the responsibility of the individual for participating actively in the issues and decisions of the day.

University Class Ranking System

Student rank in all the undergraduate colleges is based on total credit hours completed and recorded.

</tbody>
</table>

Rank begins anew when the student enters in Dentistry, Law, Medicine, Optometry, Pharmacy, Veterinary Medicine, or the Agricultural Technical Institute.

Students enrolled in the Graduate School receive the rank of either M-Master’s (0-50 earned hours) or P-PhD (51 or more earned hours or master’s degree).

Should there be any doubt concerning the correctness of one’s rank, the student should consult with the appropriate enrollment unit.

Retroactive Graduate Credit

Students registered in an undergraduate college, in Continuing Education, or in a professional college cannot receive graduate credit for courses taken when the student is not enrolled in the Graduate School.

Graduate Credit for Undergraduates

An undergraduate may petition to take certain courses for graduate credit provided that:

- the student is a senior;
- the credit for the course is not used to meet baccalaureate degree requirements;
- the student’s cumulative point-hour ratio is 3.00 or above;
- the student completes a Senior Petition form and secures permission by the end of the first day of classes from: the secretary of the student’s college or school, the instructor in charge of the course, and the Graduate School; and
- the course is offered for graduate credit.

These courses may not be counted toward a graduate degree until the student has been admitted to the Graduate School, and until the Graduate Studies Committee accepts them and notifies the Graduate School. The hours are counted in the student’s graduate earned and cumulative credit hours, and the grades are counted in the student’s graduate cumulative point-hour ratio. Not more than 15 graduate credit hours may be completed under the Senior Petition.

Degrees and Certificates
(Faculty Rule 3335-9-29)

Degrees and certificates shall be awarded undergraduate and professional students by the Board of Trustees upon recommendation of the college or school faculties and the University Senate, transmitted to the board by the president.

Degrees and certificates shall be awarded graduate students by the Board of Trustees upon recommendation of the Graduate Council and the University Senate, transmitted to the board by the president. (See Faculty Rule 3335-5-35.)

To obtain the Associate of Arts degree, undergraduate students who have attended, or are attending, the Lima, Mansfield, Marion, or Newark campuses must:

- Successfully complete at least 90 quarter credit hours of university credit.

These 90 hours of credit may include a maximum of 12 quarter hours of technical special credit. Remedial courses (English 050, 051, 060, 100.01, 100.02, and 100.03, Math 050, 075, 076, 100, 102, and 104 and courses listed in the Course Offerings Bulletin as not counting

University Basic Education Requirements.
Similarly, courses used to satisfy the analytical/
mathematics skills component must be chosen
from the list of courses approved for Category II
of the Liberal Arts Requirements of the Colleges
of the Arts and Sciences, plus Mathematics 105
and 106. If a student should decide to pursue a
baccalaureate degree after obtaining the
Associate of Arts degree, the student would be

unit. In accordance with Faculty Rule 3335-7-21,
the Pass/Non-Pass Option may not be used for

Air Force Aerospace Studies

353 Converse Hall, 2121 Tuttle Park Place, 292-5441
Air Force aerospace studies leading to a commission in the United States Air Force may be pursued on either a four-, three- or two-year basis. The academic requirements in all three programs are essentially identical. Comprehensive courses are offered at summer encampments to afford cadets the opportunity to obtain course material in which they are deficient. The General Military Course (first two years of enrollment, normally freshman/sophomore) deals with aerospace doctrine and history of military aviation. The Professional Officer Course (last two years of enrollment, normally juniors and seniors) deals with communicative skills, leadership and management training, and national defense policy.

Air Force aerospace studies courses are open to a limited number of non-cadet students with the permission of the instructor. Initial enrollment in the ROTC program may be completed by scheduling Air Sci 101 during Autumn Quarter registration. For registration instructions during other academic terms, contact the Department of Air Force Aerospace Studies.

German

314 Cunz Hall, 1841 Millikan Road, 292-6985

Placement and Proficiency Examinations
In order to ensure proper registration, placement tests are required of all students who continue their study of German in the dept after beginning their language in high school. Such tests are given during Summer Orientation and on the first day of instruction in each quarter. Consult the College of Humanities section of the Colleges of the Arts and Sciences Bulletin or the dept.

Students who are given advanced standing in the dept as a result of the placement and proficiency examination become eligible for University credit.

Excess Entrance Credits in German
Freshmen who have excess credits in a foreign language are eligible for examination for advanced standing. The examination is given at the same time as the placement test mentioned above.

Students studying foreign languages at the elementary and intermediate levels typically take the sequence of courses numbered 101-102-122-104 (including the decimal subdivisions such as 101.51, etc.) and then move on to advanced courses. Students who need to satisfy the Arts and Sciences foreign language requirement must demonstrate competence at the 104 level. Nondiscrimination Policy

The policy of The Ohio State University, both traditionally and currently, is that discrimination against any individual for reasons of race, color, creed, religion, sex, sexual harassment, sexual orientation, national origin, age, handicap, or Vietnam-era veteran status is specifically prohibited. Title IX of the Education Amendments of 1972 prohibits sex discrimination and Section 504 of the Rehabilitation Act of 1973 prohibits discrimination on the basis of handicap in education programs and activities. Accordingly, equal access to employment opportunities, admissions, educational programs, and all other University activities is extended to all persons, and the University promotes equal opportunity through a positive and continuing affirmative action program.

The University’s Office of Affirmative Action, 1100 Lincoln Tower, 1800 Cannon Drive, Columbus, Ohio 43210-1230, 614-292-4207, is responsible for the coordination of matters relating to equal opportunity and this nondiscrimination policy, information concerning violations of the policy and inquiries regarding University compliance with equal opportunity mandates, affirmative action, the requirements of Title IX of the Education Amendments of 1972, Section 504 of the Rehabilitation Act of 1973, and other applicable statutes and regulations pertaining to equality of opportunity may be addressed to the director or associate director of affirmative action at the address and telephone number indicated.

Further policy guidelines pertaining to affirmative action at The Ohio State University are detailed in the University Operating Manual, Section 1.0 and 1.15. Copies of the Operating Manual are available for reference in college and department offices throughout the campus.
