The Ohio State University

Ohio State is the major comprehensive University in the state of Ohio. Through its central campus in Columbus, four regional campuses, Agricultural Technical Institute, educational telecommunications programs, cooperative extension service, and health care programs, the University serves the entire state. As a major land grant university Ohio State is also a national resource. Its fundamental purpose—in teaching, research, and public service—is to enhance the quality of human life through developing the individual capacity for enlightened understanding, thinking, and acting. Through the dissemination of knowledge, the University not only serves the individual but acts as a force to shape society for the common good. As such, it is also a significant international resource.

Ohio State offers degree programs in a variety of disciplines, including baccalaureate and graduate programs in the liberal arts and sciences, in agriculture, in the various professional areas, and in the health sciences. As the major graduate institution of the state, The Ohio State University plays an important role in the generation of new knowledge through research and other creative work, and in the preparation of mature scholars. The University provides the only programs in Ohio in graduate study in agriculture, in certain of the allied medical professions, in optometry, and in veterinary medicine. The quality and diversity of its instructional programs and resources afford students the opportunity to elect programs of unusual strength in the traditional university disciplines, as well as interdisciplinary programs which reflect new ways of organizing knowledge and new approaches to contemporary problems.

Equality of opportunity is a basic philosophy of Ohio State. Mindful of the need for all persons to adapt to the changing roles and needs of society, the University also provides evening programs and continuing education opportunities to serve a wide spectrum of lifelong learning needs. In the exploration of new ideas and in the preparation of citizens for their roles in a changing society, the University represents a human commitment—an expression of the aspiration of people to better themselves and the world in which they live.

Student Responsibility

Students are responsible for knowing their own standing scholastically in reference to the published regulations and standards of the University and of their college or school.

Examinations and Marks

Course Examinations (Rule 3335-7-19)

At the close of each course as defined in rule 3335-7-01 of the Administrative Code, an examination will be given on the student's capabilities relative to the stated course objectives, the method of examining to be determined by the instructor or supervisor of the course. Examinations in laboratory and seminar courses shall be optional with the instructor concerned. Examinations for graduating students shall be given at a time near the end of each course, preferably during the last week of classes.

Schedules for Final Examinations (Rule 3335-7-20)

Examinations for classes taught on the regional campuses and for classes whose enrollment is exclusively of students registered in the Colleges of Dentistry, Law, Medicine, Optometry, Pharmacy, and Veterinary Medicine will be scheduled by the offices of the regional campuses and the colleges, respectively. All examination schedules prepared outside the Office of the University Registrar shall, before publication, be cleared with the Office of the University Registrar which shall have the power to resolve all conflicts. Examinations for graduating students shall be arranged by individual instructors so that final grades for the affected students may be submitted to the Office of the University Registrar by the deadlines established by that office.

All other final examinations shall be centrally scheduled by the Office of the University Registrar. The official examination schedules shall be strictly adhered to by all instructors. Any deviation must first be approved by the appropriate university official (department chairperson, regional campus dean and director, or college dean) in consultation with the Office of the University Registrar, which shall have the power to resolve all conflicts.

In performing its scheduling function the Office of the University Registrar shall limit individual examinations to two-hour duration and the total examination period to no more than five days.

Marks (Rule 3335-7-21)

The official marks of the University are A, A-, B+, B, B-, C+, C, C-, D+, D, E, EM, I, K, P, PA, NP, R, S, U, and W. The marks shall have the following meanings:

A, A- The instructor judged the student to have satisfied the stated objectives of the course in an excellent manner. The student's performance was judged to be in this range of high quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor's personal expectations relative to the stated objectives of the course, based on the instructor's experience and expertise.

B+, B, B- The instructor judged the student to have satisfied the stated objectives of the course in an above-average manner. The student's performance was judged to be in this range of above-average quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor's personal expectations relative to the stated objectives of the course, based on the instructor's experience and expertise.

C+, C, C- The instructor judged the student to have satisfied the stated objectives of the course in an average manner. The student's performance was judged to be in this range of average quality based upon a comparison with other students in the course, and/or students who have
taken the course previously, and/or the instructor's personal expectations relative to the stated objectives of the course, based on the instructor's experience and expertise.

D+, D The instructor judged the student to have satisfied the stated objectives of the course in a low but acceptable manner. The student's performance was judged to be in this range of below average but acceptable quality based upon a comparison with other students in the course, and/or with students who have taken the course previously, and/or the instructor's personal expectations relative to the stated objectives of the course, based on the instructor's experience and expertise.

E The instructor judged the student not to have satisfied the stated objectives of the course. Credit for a course in which the mark E has been received can be obtained only by repeating and passing the course in class. (See rules 3335-7-23 to 3335-7-28 of the Administrative Code.)

EM Examination

This mark indicates credit given to students registered in the University on the basis of examinations taken prior to or after admission to the University. The level of achievement which must be demonstrated by the student on these examinations in order to receive EM credit shall be determined by the department or school in which the course is offered for credit, in accord with the criteria for the award of letter grades. This credit, up to a maximum of 45 credit hours, shall be assigned only upon the authorization of the chairperson of the department or the director of the school and with the approval of the authorized representative of the dean or director of the student's enrollment unit. Additional examination credit hours may be assigned specific curricular programs with the prior approval of the Council on Academic Affairs.

Examination credit shall not be given to a student for a course in which the student has received a mark at this University or for which the student has transfer credit from some other college or university. Conversely, no course for which EM credit has been received can be taken later for a grade or credit. No credit points are allowed for courses in which a mark of EM is given.

I Incomplete

An I indicates that the student has completed a major portion of the work in the course in a satisfactory manner, but for reasons judged by the instructor to be legitimate, a portion of the course requirements remains to be completed.

The mark I shall be reported to the Office of the University Registrar together with the mark which the University Registrar is authorized to enter on the student's official record unless a different mark is reported to the Office of the University Registrar in the manner and within the time described below. The student must complete the work so that the instructor of the course may report the final mark at the earliest possible time, but not later than noon of the Wednesday of the quarter, semester, or session following that in which the I was received. For legitimate reason, the instructor may establish a deadline for the completion of the work which is within the maximum time permitted. Upon petition of the student within this period, the authorized representative of the dean or director of the enrollment unit in which the student was last enrolled after consultation with the instructor of the course, or, if the instructor is unavailable, the chairperson of the department involved, may for good reason allow a student additional time in which to complete the work. Generally, this shall not be longer than the end of the quarter, semester, or session following that in which the I was received. The decision extending the period shall set forth the time in which the student shall complete the work and a copy of the decision shall be forwarded to the Office of the University Registrar. As soon as the incomplete work has been made up, the instructor, or in the case of the instructor's absence from the University, the department chairperson or the director of the school, shall file the proper mark in the Office of the University Registrar. Until such time as a final mark is recorded the credit for the mark I shall be counted as hours only, and shall not be considered in determining a student's point-hour ratio under Rule 3335-7-26 of the Administrative Code.

In no case shall a student who has received the mark I be permitted to repeat the course in which such mark was received that in which the I has been removed and then only in such cases as fall within Rule 3335-7-28 of the Administrative Code.

K Credit

This mark shall be used for work credited from other institutions by the director of admissions only. K credit shall be counted as hours only and shall not be considered in determining a student's point-hour ratio under Rule 3335-7-26 of the Administrative Code (page 6).

P Progress

This mark is used to indicate that the student has shown satisfactory progress in a series or sequence of courses where the mark is not recorded until the final quarter, semester, or session of the series or sequence is completed. Until such time as a final mark is recorded the mark of P shall be given and the credit shall be counted as hours only, and shall not be considered in determining a student's point-hour ratio under Rule 3335-7-26 of the Administrative Code (page 7). When a final mark is submitted by the instructor, all previous P marks shall assume and be recorded with the value of the final mark.

P mark is not to be used for any course approved for the S, U grading option.

PA-pass, NP-non-pass

The grade pass PA means the student has satisfied the stated objectives of the course, and the grade non-pass NP is the equivalent of the grade E.

These marks may be used at the option of undergraduate or continuing education students only, subject to the following conditions:

This grading pattern may be chosen for a maximum of thirty credit hours, provided the student has an accumulated point-hour ratio of 2.00 or higher. Among these thirty credit hours, an undergraduate student may elect this option for courses in fulfillment of the curricular requirements of Rule 3335-7-06 of the Administrative Code.

An undergraduate student may elect this option for courses that are not required or designated as required electives in the curriculum leading to the degree for which the student is a candidate.

Hours graded pass PA count toward the minimal number of hours required for a degree. Pass or non-pass marks (PA, NP) are not computed in the point-hour average of the student. Before five p.m., of the third Friday of a quarter or the second Friday of a term, a student must have declared intention to take a course on this basis by filing the appropriate form with the dean or director of the student's enrollment unit. A student may not change to or from this option after five p.m. of the third Friday of a quarter or the second Friday of a term.

R Registered to Audit

This mark indicates that the student has registered to audit the course and has met the conditions established for audit enrollment in the course. No credit hours shall be awarded for this mark (See rules 3335-7-29 and 3335-7-33 of the Administrative Code).

Before five p.m. of the third Friday of a quarter, semester, or session, or the second Friday of a term, a student must have declared intention to take a course for audit or to change from a credit to an audit basis by filing the appropriate form with the dean or director of the student's enrollment unit. A student may not change to or from the audit option after five p.m. of the third Friday of a quarter, semester, or session, or the second Friday of a term.
S-Satisfactory, U- Unsatisfactory

The mark S may be used to record either satisfactory progress in or completion of work, provided that the course has been approved for this mark by the dean of the college offering the course, and in the case of courses carrying graduate credit, by the dean of the Graduate School. It shall be used as an alternative to U or I in all individual studies courses whatever their number. S credit shall be counted as hours only, and shall not be considered in determining a student’s point-hour ratio under Rule 3335-7-26 of the Administrative Code.

The mark U shall be used for unsatisfactory work in courses in which a student would be entitled to the mark of S if the student's work had been satisfactory. No credit shall be given for work marked U. This mark shall not be considered in determining a student’s point-hour ratio under Rule 3335-7-26 of the Administrative Code.

W Withdraw

This mark is used for students withdrawing from one or more courses or from the University. See Rule 3335-7-32 of the Administrative Code for procedures and provisions governing withdrawals.

Report of Marks (Rule 3335-7-22)

Upon completion of the course requirements, marks for every student shall be reported to the Office of the University Registrar in accord with deadlines listed in the quarterly Master Schedule of Classes.

This office maintains the student’s official permanent record and is responsible for issuing a quarterly grade report to each student.

Alteration of Marks (Rule 3335-7-23)

(A) A mark filed in the Office of the University Registrar is a part of the official records of the University. It is subject to change only when a procedural error has been discovered in evaluation or recording of a grade. Action to change a grade must be initiated before the end of the second succeeding quarter. In no case will a grade be revised in accordance with criteria other than those applied to all students in the class. If the instructor agrees that an error in the mark was made, the mark will be changed upon written authorization of: the instructor of the course; the instructor’s department chairperson; the director of the instructor’s school, if applicable; the dean of the instructor’s college; and the authorized representative of the dean or director of the student’s enrollment unit.

If a student believes that a procedural error in grading was made, the student should meet with the instructor. If the instructor does not agree that a procedural error was made, the student may meet with the department chairperson to discuss the grade grievance. The chairperson shall respond to the student no later than 30 days after the student has requested a review by the chairperson. Upon receipt of the chairperson’s response, if the issue is not resolved to the satisfaction of the student, the student may within two weeks request in writing by duplicate submission to the dean or director of the instruction unit and the department chairperson the procedures in paragraph (B) of this rule. Unresolved cases of grade grievance due to grading procedures are subject to paragraph (B) of this rule; unresolved cases of grade grievance due to other causes are not subject to paragraph (B) of this rule.

(B) Unresolved cases of grade grievances due to grading procedures shall be reviewed by a faculty departmental committee appointed by the department chairperson.

In cases of instructors still affiliated with the University, the review committee shall consult both the student and the instructor and shall determine the validity of the grade grievance due to grading procedures. The review committee shall make its findings known in writing to both the student and the instructor within 30 days of the student’s request to the chairperson. If the committee finds that a procedural error has occurred and if the instructor declines to accept the findings of the review committee, the committee shall consider the reasons for not authorizing a grade change given by the instructor and may, upon consideration of these reasons, authorize in writing a grade change to be instituted by the department chairperson.

• In cases of instructors no longer affiliated with the University, the findings of the committee shall be reported to both the student and the instructor. If the instructor chooses not to respond, the judgment of the committee shall prevail. If the instructor responds and declines to accept the findings of the committee that a procedural error has occurred, the committee shall consider the reasons for not authorizing a grade change given by the instructor. In either case, the committee may, upon due consideration, authorize in writing a grade change (if such can be determined) to be instituted by the department chairperson.

If a department committee can find no academic basis upon which to recommend an appropriate grade for the course, the student shall be given the option of having the course stricken from the student’s record and, if so desired, to retake that course without prejudice or penalty.

(C) If charges of grave academic misconduct against an instructor are made and substantiated under Rule 3335-5-04 of the Administrative Code, the department chairperson shall be authorized to appoint a department grade grievance committee to consider grading errors that are alleged to be related to the misconduct. The committee shall consider all evidence and present, in writing, a report to the chairperson indicating any recommended grade changes. The department chairperson shall be authorized to institute grade changes in accordance with the recommendations of the committee.

If a department committee can find no academic basis upon which to recommend an appropriate grade for the course, the student shall be given the option of having the course stricken from the student’s record and, if so desired, to retake that course without prejudice or penalty.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and publish this rule in their bulletins.

Course Credit

Credit Hours (Rule 3335-7-24)

(A) All courses shall be assigned a number of credit hours in accordance with the procedure outlined in rules 3335-7-02 to 3335-7-04 of the Administrative Code. This may be any number from zero on up; however, in determining the credit hours assigned, the department, school, college, and Council on Academic Affairs should use as a guide the following suggested standards:

1) One credit hour shall be assigned for each three hours per week of the average student's time, including class hours, required to earn the average grade of C in this course.

2) One credit hour shall be assigned for each two consecutive hours of practical or experimental work per week in any department or school.

3) One credit hour shall be assigned for each three hours of laboratory work per week, when no additional outside work is required. When outside work is required, then the standard in paragraph (A) (1) of this rule shall be applied.

(B) In determining the hours per week required by the course or work, the Council on Academic Affairs may, in appropriate cases, consider the average weekly hours spent during a quarter, semester, or session on the course or work. It should be remembered that the above are guides only and may be deviated from for good cause.
(C) When comparing or combining semester credit hours with quarter credit hours, one semester credit hour shall be the equivalent of one and one-half quarter credit hour.

Credit Points and Point-hour Ratio (Synopsis of Rules 3335-7-25 and 3335-7-26)
A student’s academic standing for a quarter, semester, or session is expressed by the point-hour ratio. This ratio is found by dividing the total number of points earned by the total number of credit hours scheduled or undertaken. Courses in which the marks EM, I, K, NP, P, PA, R, S, U, or W are given are not included in the computations. Courses in which the marks A, A-, B+, B-, B+, C-, C, C+, D+, D, or E are given are computed according to the scale: A=4.00, A=3.70, B+=3.30, B=3.00, B-=2.70, C+=2.30, C=2.00, C=1.70, D+=1.30, D=1.00, and E=0.00. The following example shows how a point-hour ratio is determined.

Point-hour ratio: 2.44

When the final grade on Course No. 3 is recorded, the points and hours will be included in the computation of the student’s point-hour ratio. When a student has a record for two or more quarters, semesters, or sessions, the student will have a cumulative point-hour ratio determined by dividing the total points earned by the total hours undertaken.

The point-hour ratio begins anew when a student enrolls in Dentistry, Law, Medicine, Optometry, Pharmacy, Veterinary Medicine, or the Agricultural Technical Institute.

When determining the point-hour ratio of a student:
- For a quarter, semester, or session if applicable, the applicable number of credit hours shall be the student’s scheduled credit hours in that quarter, semester, or session.
- For the student’s work in the University, the applicable number of credit hours shall be the total number of credit hours undertaken in the University except as modified by Rule 3335-7-271.
- For the student’s work in the Graduate School, the applicable number of credit hours shall be the total number of graduate credit hours undertaken while enrolled in the Graduate School.
- For the student’s work in a professional college or school or professional division of a college, the applicable number of credit hours shall be the total number of credit hours undertaken while enrolled in the professional college or school or professional division of a college.
- For the student’s work in the major field of interest, the applicable number of credit hours undertaken in courses approved for the major program.

No College of Medicine point-hour average shall be computed for a student enrolled in the College of Medicine in a curriculum leading to the degree, Doctor of Medicine, when that student has received only the marks of H, S, or E in the College of Medicine.

Recalculation of Cumulative Point-hour Ratio (Fresh Start Rule) (Rule 3335-7-261)
An undergraduate student who re-enrolls in the University after an absence of five or more years may petition the dean or director of his enrollment unit to recalculate the cumulative point-hour ratio of his previous residency. If the petition is approved, all courses taken will remain on the permanent record. Those with marks of A, A-, B+, B-, B+, C+, C, C-, EM, K, PA, or S, will be counted for credit only. No other marks will be counted for credit.

If the petition is approved, a student resumes his academic program with no cumulative point-hour ratio, and thereafter is subject to the conditions of warning, probation, and dismissal that govern all students (see Rules 3335-5-24 to 3335-5-25 of the Administrative Code).

Under the provisions of this rule a student, before graduation, must be re-enrolled for a minimum of 45 quarter credit hours and three academic quarters.

All courses ever taken at the University will be used in the calculation of the cumulative point-hour ratio required for the purposes of graduation with honors.

The Graduate School and graduate professional colleges may formulate appropriate modifications of this rule, subject to the approval of the Council on Academic Affairs, and shall publish the rule in their bulletins.

Failure in a Required Course (Rule 3335-7-27)
An undergraduate or professional student who has not been dismissed from the University must repeat in a regularly scheduled class, at the first opportunity, a required course in which a mark of E has been received, unless an equivalent course in which a mark of E has been received, unless an equivalent course is recommended and approved by the authorized representative of the dean or director of the enrollment unit.

A graduate student who has not been dismissed from the University must repeat in a regularly scheduled class a required course in which a mark of E has been received only if this is required by the student’s adviser.

Freshman Forgiveness Rule (Rule 3335-7-271)
(A) If a course in which an undergraduate student receives a grade of D+, D, or E, taken during the freshman year (the period during which the first forty-four credit hours are accumulated on the student’s official permanent record) is repeated before the end of that student’s sophomore year (when the student will have accumulated a total of eighty-nine credit hours), the original course credit and grade will be automatically excluded from the calculation of the student’s cumulative point-hour ratio and deficiency points, but will remain on the student’s official permanent record. This action will be subject to the following conditions:
1) If the grade in the original course was a D+ or D, a student may repeat the course for credit only upon the recommendation of the authorized representative of the dean, or director of the student’s enrollment unit. Such recommendation must be obtained before noon of the third Saturday of the quarter in which the repeated course is taken.
2) The same course may be repeated only once under this rule.
3) This rule may be applied for a maximum of fifteen credit hours.

(B) The graduate school and graduate professional colleges may formulate appropriate modifications of paragraph (A) of this rule, subject to the approval of the council on academic affairs, and publish the rule in their bulletins.

Repetition of Courses (Rule 3335-7-28)
Except as specified by Rule 3335-7-27 of the Administrative Code, undergraduate students who have received a mark of E or NP in a course at this university may repeat the course for credit at their option.

Undergraduate or professional students, as defined in Rule 3335-9-01 of the Administrative Code, who have received a mark of D+ or D in a course at this university may repeat the course for credit only upon the recommendation of the authorized representative of the dean or director of their enrollment unit.
Undergraduate or professional students, as defined in Rule 3335-9-01 of the Administrative Code, who have received a mark of A, A-, B+, B, B-, C+, C, C-, or FA in a course at this university or elsewhere may repeat the course only as auditors, in accordance with Rule 3335-7-29 of the Administrative Code.

A graduate student, as defined in Rule 3335-9-01 of the Administrative Code, may repeat for credit any course when approval is given by the student's adviser.

A student who has audited a course may subsequently repeat the course for credit only upon receiving permission of the authorized representative of the dean or director of the student's enrollment unit.

The credit hours for a repeated course shall in no case be counted more than once in meeting graduation requirements. When a student repeats a course, both grades appear on the student's record and both are used in computing the point-hour ratio, except as modified by Rule 3335-7-271 of the Administrative Code.

Admission to Courses as an Auditor (Rule 3335-7-29)

An undergraduate or professional student may audit a course upon the approval of the professor in charge of the course and the dean of the college, or designee, in which the student is registered. (For repetition of courses, see Rule 3335-7-28 of the Administrative Code). A graduate student may audit a course upon the approval of the professor in charge of the course and the student's adviser.

Withdrawal from Courses or from the University (Rule 3335-7-32)

Withdrawal from the University during a quarter, semester, or session, constitutes withdrawal from all courses in which a student is enrolled during that quarter, semester, or session. Upon official notification of the student's withdrawal from the University, the University registrar is authorized to enter the dated notation withdrawn on the student's official permanent record.

To withdraw from any or all courses, a student must file the appropriate form with the authorized representative of the dean or director of the student's enrollment unit.

Until 5:00 p.m. of the third Friday of a quarter, semester, or session or the second Friday of a summer term, a student may withdraw from any or all courses which began in the same quarter, semester, session, or term, and no record for the course(s) will be entered on the student's official permanent record.

After 5:00 p.m. of the third Friday of a quarter, semester, or session, and until 5:00 p.m. of the seventh Friday of a quarter, semester, or session, if a student withdraws from any or all courses which began in the same quarter, semester, or session, the University registrar is authorized to enter the mark W on the student's official permanent record for the courses withdrawn.

After 5:00 p.m. of the seventh Friday of the quarter, semester, or session or the second Friday of a summer term, a student who, because of circumstances beyond his/her control, finds it necessary to withdraw from any or all courses, must file the appropriate petition with the authorized representative of the dean or director of the enrollment unit. Reasons not acceptable include (but are not limited to) the student's performance in the course(s), lack of preparation for the course(s), or dissatisfaction with the subject matter offered in the course(s). If the petition is approved, a copy will be filed with the University registrar who is then authorized to enter the mark W on the student's official permanent record, and the instructor(s) of the course(s) will be so notified. If the petition is not approved, the student continues to be enrolled in the course(s) and a final mark must be submitted by the instructor(s). Withdrawal from any and all courses shall not be permitted after the last day of regularly scheduled classes except when the student experiences a genuine emergency after the regularly scheduled classes end and prior to sitting for the final examination in a given course or courses.

Withdrawal from any or all courses shall not be permitted after the final examination in that course has been given.

A student who stops attending a course (or courses) and does not officially withdraw from it (them) shall have the appropriate mark as submitted by the instructor entered on the student's official permanent record for the course(s). Such a mark shall be based on the grading criteria used to evaluate all students in the course.

Graduate professional colleges shall formulate rules to govern withdrawal of their students from courses in their respective curricula, subject to the approval of the Council on Academic Affairs, and publish these rules in their respective bulletins.

For provision regarding return of fees, when applicable, see Rule 3335-9-18 of the Administrative Code. This information may also be found in the Master Schedule of Classes Bulletin.

Conditions and Procedures for Disenrollment from a Course (Rule 3335-7-33)

Subject to final approval by the Ohio State University Board of Trustees.

(A) The instructor (or in the case of a graduate teaching associate, the supervising faculty member), the chairperson of the instructor's department (with the agreement of the instructor), or other appropriate administrative official may disenroll a student from a course if:

1) After the third instructional day of the quarter, semester, session, or term, the first Friday of the quarter, or the student's second scheduled class session of the course, whichever occurs first, the student fails to attend the scheduled course without giving prior notification to the instructor. Under this paragraph, no student may be disenrolled from a course until after the first course meeting following the student's registration. When the department elects to use this procedure, the instructor, the chairperson, or other appropriate administrative official shall notify the student's enrollment unit. The enrollment unit will notify the student and take appropriate action to remove the student from the course. Since not all departments exercise the option to disenroll students in all courses, this rule does not relieve the student of the responsibility for dropping a course the student is not attending.

2) The student enrolls to audit a course without the instructor's approval, or fails to meet the prerequisites of the course. Disenrollment procedures shall be the same as in paragraph (A) (1) of this rule.

3) Before the third Friday of a quarter, semester, or session, or the second Friday of a summer term, and following completion of a placement examination, or another appropriate measure of preparation or ability, the student is judged to be registered in an inappropriate course. The department or school offering the course may then instruct the secretary of the college or school in which the student is enrolled to change the student's registration either to a more elementary or more advanced course.

4) Disenrollment is effective upon action of the instructor, department chairperson, or other appropriate administrative official.

5) Credit for all rescheduled courses resulting from action under paragraph (A) (3) of this rule shall count toward the fulfillment of graduation requirements unless the student has previously earned university or college credit in a course having substantially the same subject matter content or the substituted course is one which the department or school, with the approval of the council on academic affairs, has established for students with inadequate preparation for college level courses of that department or school.
6) If a student who has enrolled to audit a course fails to complete the requirements for audit specified by the instructor and also fails to withdraw from the course, the instructor shall so inform the Office of the University Registrar when marks are reported for the quarter, semester, or session. That office will then disenroll the student from the course, removing the course from the student's permanent record, and will notify the student and the student's college of the action taken.

(B) After investigation, including consultation with the instructor, the student in question, and utilizing other University resources, as desirable, the chairperson (or other appropriate administrative official) may disenroll a student from a course if the student presents a clear and present threat of bodily harm or injury to the instructor or fellow students, or, after warning, continues to engage in disruptive conduct, either of which results in impairment of teaching or learning processes:

1) If, after attempting to resolve the difficulty by informal means, the department chairperson (or other appropriate administrative official) deems disenrollment necessary, the affected student shall be notified in writing. The notice shall be delivered by hand or sent through ordinary mail to the student at the last address supplied pursuant to Rule 3335-9-09 of the Administrative Code. Copies of the disenrollment action shall be sent to the dean of the instructional college, the dean of the student's college, the Office of the University Registrar, and the Office of Student Affairs.

2) The student may appeal to the senior vice president for academic affairs and provost or designee for waiver of disenrollment under paragraph (B) (2) of this rule, provided the appeal is filed within 10 days of the disenrollment action. The senior vice president for academic affairs and provost shall make final determination on the appeal within seven days.

3) Disenrollment is effective upon the action of the department chairperson (or other appropriate administrative official), unless reversed by the vice president for academic affairs and provost, or designee.

(C) For disenrollment, exclusive of audit under paragraphs (A) and (B) of this rule, the University registrar shall enter on the student's official permanent record:

1) No mark, if the disenrollment occurs before five p.m. of the third Friday of a quarter, semester, or session course, or the second Friday of a summer term course;

2) The mark, W, if the disenrollment occurs after five p.m. of the third Friday of a quarter, semester, or session course, or the second Friday of a summer term course.

Admission

Classification of Students for Admission (Rule 3335-9-01)

Students shall be classified as:

- Undergraduate students: regular or special. This shall include students registered in the colleges of Agriculture, Arts, Biological Sciences, Business, Home Economics, Humanities, Mathematical and Physical Sciences, Social and Behavioral Sciences, the University College, the division of preprofessional education of the College of Education, the engineering division of the College of Engineering, and the division of Continuing Education.

- Graduate students: regular, special, graduate nondegree, conditional, or transient. The provisional classification is used in conjunction with the regular, special, and conditional classifications.

- Professional students: regular or special. This shall include students either regularly or specially registered in the colleges or divisions of a college which admit after completion of a preprofessional curriculum.

- Transient students. This shall include regular enrollees of other institutions who with the recommendation of their college authorities enter this university for a brief residence (usually one quarter, semester, session, or term) without transfer of credits.

- Auditors. This shall include persons who desire to attend classes without receiving credit for any courses taken.

Administrative Hold

Administrative holds (Rule 3335-9-16)

With the approval of the vice president for student affairs, an administrative hold may be placed on the records or accounts of any person who fails to comply in a reasonable period of time with an obligation imposed under University rules or who has an overdue debt or fine. An administrative hold will cause certain services to be withheld, including, but not limited to: obtaining current quarter grades, registering or enrolling, being certified as eligible to obtain a degree or certificate, receiving a transcript, borrowing books or equipment, or participating in discount plans available to faculty, staff, or alumni.

The unit originating an administrative hold on the records or accounts of any person shall notify the person in writing of the obligation that is overdue by providing another itemized billing or list of actions requested, specifying when the administrative hold will become effective, and indicating the name and method of contacting an individual who can provide additional information. Any disputes concerning the legitimacy of a hold or its processing will be resolved by the University Registrar.

Improper Registration

Improper Admission or Registration (Rule 3335-9-20)

Admission or registration may be cancelled by the Director of Admissions or the University Registrar in cases of improper registration or when false or incomplete information is provided on the application for admission, registration forms, or other official documents. No credits earned subsequent to such cancellation and prior to proper admission or registration shall be entered upon the permanent record of the student. Students whose admission or registration is cancelled are not entitled to any refund of fees.

Absences

Absences (Rule 3335-9-21)

Each department or school may make its own rules relative to occasional absences by students from scheduled activities. If, however, a student is absent from a course to such an extent as to imperil his credit, or is notably irregular in attendance, it shall be the duty of the instructor concerned to report the facts promptly to the dean of the college in which the student is enrolled. The dean may take such action as he deems appropriate.

Warning and Dismissal

Minimum Scholastic Requirements (Synopsis of Rule 3335-9-23)

The academic standards controlling warning, probation, and dismissal of professional and graduate students shall be established by rule of the faculties of the college in which the professional student is registered, or of the Graduate School if the student is a graduate student; provided, however, that an undergraduate professional student shall not be dismissed from the University unless the student has 15 or more deficiency points which are computed on the basis of the entire undergraduate program.
A transfer student from another university who is admitted to advanced standing in this University shall have the point-hour ratio and deficiency points computed only upon work done at this University.

In order to remain in good academic standing in the University, an undergraduate student must maintain a cumulative point-hour ratio of at least 2.00. Deficiency points are applied only to the record of students whose point-hour ratio is below 2.00 and are defined as the number of credit points students would have to earn to bring their point-hour ratio up to that level. Deficiency points may be calculated by subtracting the number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A-, B+, B, B-, C+, C, C-, D+, D, or E) were given.

Academic Warning (Rule 3335-9-24)

Any student who has never attended another college or university and who seeks to enroll as a new freshman in this university shall be placed on special warning when his application for admission is received and processed if his academic credentials indicate the probability of low achievement. He shall be so informed before final registration and the payment of fees are completed, except as provided in Rule 3335-9-27 of the Administrative Code. The fact that special warning has been given shall be made known to the office of the college or school to which he seeks admission.

If, at the end of any quarter, a student subject to the provisions of Rule 3335-9-23 of the Administrative Code has accumulated fewer than 15 deficiency points, he shall receive a warning from the dean of his college or director of his school, except as provided in Rule 3335-9-27 of the Administrative Code.

Academic Probation (Rule 3335-9-25)

Any student who has accumulated 15 or more deficiency points shall be placed on probation. The probation shall continue provided the student's college considers the student's progress to be satisfactory and shall be removed when the deficiency points are fewer than 15. The student shall be notified of probationary status by the dean of the college or the director of the school in which the student is registered, except as provided in Rule 3335-9-27 of the Administrative Code. Such notification shall include a clear statement of what shall be considered to be satisfactory progress.

Probation by special action: If at any time the preparation, progress, or success of a student in an academic program is determined to be unsatisfactory, the college or school in which the student is registered shall be empowered to place the student on academic probation. An undergraduate student admitted with conditions and who has not satisfied the conditions after earning 30 quarter credit hours through regular course enrollment at this university shall be placed on academic probation.

Requirements and definition: In order to remain in good standing in the University a student must maintain a point-hour ratio (see Rule 3335-7-26 of the Administrative Code) of at least 2.00. Deficiency points are applied only to the records of students whose point-hour ratio is below 2.00 and are defined as the number of credit points a student would have to earn to bring the student's point-hour ratio up to that level. Deficiency points may be calculated by subtracting the total number of credit points earned from twice the total number of credit hours attempted for which calculable grades (A, A-, B+, B, B-, C+, C, C-, D+, D, or E) were given.

Academic Dismissal (Rule 3335-9-26)

If the student's college or school considers a student's progress as unsatisfactory in meeting the conditions placed on his probation, the college or school shall be empowered to dismiss him from the University. An exception to this authority for undergraduate professional students shall be in accordance with paragraph (A) of Rule 3335-9-23 of the Administrative Code. Notice of the dismissal shall be sent to the student by the dean of the college or the director of the school in which the student was registered for the quarter, except as provided in Rule 3335-9-27 of the Administrative Code. No student shall be subject to academic dismissal unless he is currently on probation.

Notice of Dismissal (Rule 3335-9-27)

Notice of dismissal from the University shall be sent by the dean of the college in which the dismissed student is registered.

Reinstatement after Academic Dismissal (Rule 3335-9-28)

Any student who may be reinstated by a college or school following academic dismissal shall be subject to such special requirements as may be determined appropriate by the dean of the college or director of the school. If the performance record of any reinstated student does not meet the conditions of probation specified at the time of reinstatement, then the college or school in which he is registered shall determine whether the student is to be dismissed or continued on probation.

Conditional/Unconditional Admission

For unconditional admission as an undergraduate student, applicants who graduate from high school on or after April 1, 1984, and transfer students with less than 45 transferable hours are required to have at least 15 high school college preparatory units distributed as follows: English-four units; Mathematics-three units; Social Sciences-two units; Natural Sciences-two units; Foreign Language-two units; visual or Performing Arts-one unit; and one additional unit from any of the above-mentioned subject areas. At the time students are notified of admission, they are also notified of any deficiencies. Academic advisors are available to help plan course work to remove conditions and answer any questions.

Admission conditions are satisfied by earning college credits in the subject areas of deficiency. Such credits may be earned by satisfactory completion of courses at Ohio State, by satisfactory completion of equivalent course work at other colleges, or by examination for credit. Admission conditions must be satisfied within the first 30 credit hours earned at Ohio State. Credit hours used to remove admission conditions are not counted toward the minimum number of credit hours required for graduation.

Ohio State courses which may be used to fulfill admission conditions in the foreign languages, the natural sciences, the social sciences, and the visual and performing arts are indicated in the following lists. For specific course descriptions, please see the course offerings listing in this book.

Foreign Languages

Students studying foreign languages at the elementary and intermediate levels typically take the sequence of courses numbered 101-102-103-104 (including the decimal subdivisions such as 101.51, etc.) and then move on to advanced courses. Students who need to satisfy the Arts and Sciences foreign language requirement must demonstrate competence at the 104 level.

Completion of 102 or equivalent or placement into 103 is required to fulfill foreign language conditions. Not all of the following languages are offered each quarter.

Curricular Information
At the time of printing of this Bulletin, the University is in the process of implementing a new General Education Curriculum. Course numbers, credit hour values, and course content listed in this Bulletin are subject to change. For more specific information, please direct inquiries to the appropriate college office.

College or School Requirements
Each college or school has certain requirements which must be met by every student seeking to earn a degree in that college or school. The specific course requirements for the curricula administered by a given college or school can be found in the bulletin for that college or school. In addition to these, the University has established certain requirements outlined below.

University Required Courses
General Education Curriculum Requirements (GEC)
In addition to any college or school requirements, every undergraduate student must complete a body of coursework that assures a broad acquaintance with the basic areas of academic study. Courses which may be used to meet the GEC are so designated throughout this bulletin. Not all GEC courses are acceptable in all curricula. Students should consult their specific college or school publications or their advisors before scheduling courses to be applied to this requirement.

The objectives of this part of the curriculum, as set forth by the University faculty, are as follows:
There are certain capacities and understandings, certain qualities, abilities, and characteristics which are part of what we understand as the liberating process a university is particularly suited to develop, nourish, and hone. Primary among these capacities is the ability to write and speak with clarity and precision; to read and listen critically and with comprehension. Of the same order is the ability to engage in careful, logical thinking and critical analysis, including the abilities that permit intelligent responses to problems and arguments which involve quantitative data.

An understanding of and appreciation for the important modes of human thought and inquiry are crucial characteristics of a University education. An understanding of the methods of modern science and social science, the effect of science and technology on the natural and social environment, and the nature of mathematical knowledge constitutes part of this knowledge. The development of a refined historical, artistic, and literary consciousness is a further part. A university education should also develop and sharpen the capacity and confidence to make informed and discriminating ethical and aesthetic judgments.

We believe that an education in a university in our own nation today should foster an understanding of American institutions and the pluralistic nature of American society. It should also promote an understanding of the global interdependence of
the modern world and should ensure facility with at least one language other than English. Finally, we think that an American university should seek to develop a deep appreciation for the cultural traditions that have formed and informed our nation and to develop a sense of the place of other cultures in world history.

University Class Ranking System
Student rank in all the undergraduate colleges is based on total credit hours completed and recorded.

Rank begins anew when the student enrolls in Dentistry, Law, Medicine, Optometry, Pharmacy, Veterinary Medicine, or the Agricultural Technical Institute.

Students enrolled in the Graduate School receive the rank of either M-Master’s (0-50 earned hours) or P-PhD (51 or more earned hours or master’s degree).

Should there be any doubt concerning the correctness of one’s rank, the student should consult with the appropriate enrollment unit.

Retroactive Graduate Credit
Students registered in an undergraduate college, in Continuing Education, or in a professional college cannot receive graduate credit for courses taken when the student is not enrolled in the Graduate School.

Graduate Credit for Undergraduates
An undergraduate may petition to take certain courses for graduate credit provided they:
- the student is a senior;
- the credit for the course is not used to meet baccalaureate degree requirements;
- the student's cumulative point-hour ratio is 3.00 or above;
- the student completes a Senior Petition form and secures permission by the end of the first day of classes from: the secretary of the student's college or school, the instructor in charge of the course, and the Graduate School; and
- the course is offered for graduate credit.

These courses may not be counted toward a graduate degree until the student has been admitted to the Graduate School, and until the Graduate Studies Committee accepts them and notifies the Graduate School. The hours are counted in the student's graduate earned and cumulative credit hours, and the grades are counted in the student's graduate cumulative point-hour ratio. Not more than 15 graduate credit hours may be completed under the Senior Petition.

Degrees and Certificates (Rule 3335-9-29)
Degrees and certificates shall be awarded undergraduate and professional students by the Board of Trustees upon recommendation of the college or school faculties and the University Senate, transmitted to the Board by the President. Degrees and certificates shall be awarded graduate students by the Board of Trustees upon recommendation of the Council on Research and Graduate Studies and the University Senate, transmitted to the Board by the President. (See Rule 3335-5-35 of the Administrative Code.)

Requirements for the Associate of Arts Degree
To obtain the Associate of Arts degree, undergraduate students who have attended, or are attending, the Lima, Mansfield, Marion, or Newark campuses must:
- Successfully complete at least 90 quarter credit hours of university credit.

These 90 hours of credit may include a maximum of 12 quarter hours of technical special credit. Remedial courses (English 060, 100.01, 100.02, and 100.03; Math 040, 050, 052, 053, 075, 076, 100, 102, and 104 and courses listed in the Course Offerings Bulletin as not counting toward the baccalaureate degree) may not be applied.

Credit hours earned to satisfy admission conditions are not counted toward the minimum 90 hours required.

Repeated courses shall be counted only once.

Level III or R placement on the Ohio State Math Placement Exam or the completion of Math 075 or 076 or 102 or above (excluding Math 180) is required.
- Successfully complete a core of 50 hours of requirements (with no overlap between areas) distributed as follows: English 110 or 111 (5), humanities (10-15), foreign language (0-10), social science (10-15), natural science (10-15), and analytical skills/mathematics (0-10).

Courses used to satisfy the humanities, social science, and natural science components must be chosen from the list of courses approved as University GEC requirements. Similarly, courses used to satisfy the analytical/mathematics skills component must be chosen from the list of courses approved for Category II of the Liberal Arts Requirements of the Colleges of the Arts and Sciences, plus Mathematics 105 and 106. If a student should decide to pursue a baccalaureate degree after obtaining the Associate of Arts degree, the student would be required to fulfill the GEC requirements of the degree-granting enrollment unit. In accordance with Faculty Rule 3335-7-21, the Pass/Non-Pass Option may not be used for any of the core courses.
- Maintain a cumulative point-hour ratio of at least 2.00 on all work attempted at Ohio State at the time of, or after the completion of, all other requirements.
- Complete 30 of the last 45 quarter credit hours through regular course enrollment at Ohio State.
- Complete 15 of the required 90 quarter credit hours on a regional campus.
- Complete a minimum of three quarter credit hours in regular course enrollment at Ohio State Summer Quarter 1980 or thereafter.
- Not have received a baccalaureate or a professional degree from an accredited institution.
- Have filed an application for the degree in accordance with rules and procedures prescribed by the Colleges of the Arts and Sciences. Application must be made within four years after the requirements have been completed, assuming no other degrees have been awarded in the interim.

Requirements for an Undergraduate Baccalaureate Degree (Rule 3335-9-30)
To obtain an undergraduate baccalaureate degree from this University, an undergraduate student must:
(A) Have earned a minimum of 45 quarter hours credit through regular course enrollment at this University.
(B) Have been enrolled in the college, the Colleges of the Arts and Sciences, or the school recommending that degree during the last quarter necessary to complete degree requirements. The executive committee of the college, the Colleges of the Arts and Sciences, or the school recommending the degree may, on petition by the student, waive this requirement.
(C) Have satisfactorily completed the number of credit hours required for the curriculum being pursued. The minimum number of credit hours required in each curriculum shall include the credit hours required under Rules 3335-7-06 and 3335-7-07 of the Administrative Code. Credit hours required to satisfy admission conditions shall not be used to satisfy the requirements of Rules 3335-7-06 and 3335-7-07 of the Administrative Code. Credit hours are considered as "satisfactorily completed" only if the student has received, at this university the mark A, A-, B+, B, B-, C+, C, C-, D+, D, D-, or E were given.

(E) Have satisfactorily met all additional college and curricular requirements for the degree involved.

(F) Have filed an application for the degree in accordance with rules prescribed by the college or school.

(G) Except for paragraph (B) of this rule, waiver of any part of this rule in the case of individual students may be made only by the Council on Academic Affairs following prior approval by the appropriate executive committee. The senior vice president for academic affairs and provost shall transmit all affirmative actions of the Council on Academic Affairs under this paragraph to the secretary of the student's college and to the University registrar for notation on the student's permanent record.

Requirements for a Graduate Degree (Rule 3335-9-31)

To obtain a graduate degree from this university, a graduate student must have met the minimum requirements established by the Council on Research and Graduate Studies and approved by the Board of Trustees, and have filed an application for the degree in accordance with rules prescribed by the Council on Research and Graduate Studies.

Requirements for a Professional Degree (Rule 3335-9-32)

To obtain a professional degree from this university, a student must meet the minimum requirements established by the college or school recommending the degree. In establishing such minimum requirements, the college or school shall include or exceed the minimum requirements stipulated by the appropriate accrediting body. Such graduation requirements shall be subject to approval by the Council on Academic Affairs and shall be filed with the secretary of the Board of Trustees.

Waiver of minimum requirements may be made by the faculty of the college or school recommending the degree or by a committee approved by that faculty. Requests for such waiver may be initiated by student petition or by the dean or director. The Council on Academic Affairs shall be notified at least quarterly of each such action.

Requirements for Certificate of Study (Rule 3335-9-321)

A certificate of study may be awarded concurrent with or following the student's receipt of a baccalaureate degree. Award of such certificates shall attest to demonstrated competence in a coherent academic curriculum, program or area of study.

To obtain a certificate a student must:

- Have been or be enrolled in the University during the last quarter of work necessary to complete the certificate requirement. In addition, the student must meet any residency requirement established by the college, the Colleges of the Arts and Sciences, or the school recommending the certificate.

- Have earned through regular course enrollment a minimum of 45 quarter hours credit in an approved certificate program. No certificate program shall require enrollment in and credit for more than 90 quarter hours. At least one-third of all quarter hours credit earned in a certificate program shall be at the 500-level or above. No more than 5 credit hours in the certificate program may be counted toward the student's undergraduate major or minor. Credit hours used to fulfill the requirements for one certificate may not be counted toward any other certificate.

- Have earned the mark of A, A-, B+, B, B-, C+, C, C-, D+, D, or E for all courses counted toward the completion of the certificate requirements.

- Have attained an undergraduate cumulative grade point average of 2.00 (or a graduate cumulative grade point average of 3.00, as appropriate) in courses used to satisfy the certificate program requirements.

- Have satisfactorily met all additional college or school requirements for the certificate involved.

- Have filed an application for the certificate in accordance with rules prescribed by the college, Colleges of the Arts and Sciences, or school.

Waiver of any part of this rule in the case of individual students may be made only by the Council on Academic Affairs upon recommendation of the executive committee of the college, colleges, or school. The senior vice president for academic affairs and provost shall transmit all affirmative actions of the Council under this section to the secretary of the student's enrollment unit and to the University registrar for notation on the student's permanent record.

The colleges of Dentistry, Law, Medicine, Optometry, and Veterinary Medicine, and the Graduate School may establish requirements and conditions, rather than those above, for certificates of study. Such requirements must be approved by the Council on Academic Affairs.

Authority for approval of all certificate programs shall rest with the Council on Academic Affairs. Proposals for graduate certificates must also receive the approval of the Council on Research and Graduate Studies. The president of the University and the University Senate shall be regularly informed of Council actions in this regard.

Standards for Honors at Graduation (Rule 3335-9-33)

Degrees cum laude, magna cum laude, and summa cum laude may be granted for exceptional achievement in the curriculum of each enrollment unit as judged by that unit in terms of its own standards providing that the number of students accorded these honors does not exceed 10 percent, and that the number of students accorded summa cum laude and magna cum laude does not exceed six percent, and the number of students accorded summa cum laude does not exceed three percent, of the graduating classes of the enrollment unit and that eligibility for these honors be based on a minimum of 90 credit hours of course enrollment at this university.

Standards for graduation "with distinction in [special subject(s)]" and "with honors in [ ]" shall be as adopted by the Council on Academic Affairs.

Beyond these minimal requirements the enrollment units may establish additional stipulations for graduation cum laude, magna cum laude, and summa cum laude.

Institutional Transfer

The Ohio Board of Regents, following the directive of the Ohio General Assembly, developed a state wide policy to facilitate students' ability to transfer credits from one Ohio public college or university to another in order to avoid duplication of course requirements. Since independent colleges and universities in Ohio may or may not be participating in the
transfer policy, students interested in transferring to independent institutions are encouraged to check with the college or university of their choice regarding transfer agreements.

Transfer Module

The Ohio Board of Regents' Transfer and Articulation Policy established the Transfer Module, which is a specific subset or entire set of a college or university's general education program. Transfer Module consists of 54 to 80 quarter hours (or 36 to 40 semester hours) of courses in the following areas: English, Mathematics, Arts and Humanities, Social and Behavioral Sciences, Natural and Physical Sciences, and Interdisciplinary Study.

A Transfer Module completed at one college or university will automatically meet the requirements of the Transfer Module at another college or university once the student is admitted. Students may be required; however, to meet additional general education requirements at the institution to which they transfer. For example, a student who completes the Transfer Module at Institution T (sending institution) and then transfers to Institution R (receiving institution) is said to have completed the Transfer Module portion of Institution R's general education program. Institution R, however, may require additional general education courses beyond the Transfer Module.

Since many degree programs require specific courses that may be taken as a part of the general education or Transfer Module program at an institution, students are encouraged to meet with an academic advisor at the institution to which they plan to transfer early in their academic career. For example, students who will be majoring in any of the majors in the College of Business and Administration at the receiving institution should take Economics 201, 202, and 203 (or equivalent course at another institution) rather than the Economics 200 course listed as a part of the Transfer Module. Because of specific major requirements such as these, early identification of a student's intended major is encouraged. Advisors at the institution to which a student wishes to transfer should be consulted regarding Transfer Module and general education courses and any specific program requirements that can be completed before transfer.

Conditions for Transfer Admission

1. The policy encourages receiving institutions to give preferential consideration for admission to students who complete the Associate of Arts or the Associate of Science degrees with a cumulative grade point of 2.0 or better for all previous college level courses.

2. The policy encourages receiving institutions to give preferential treatment to students who have not earned an Associate of Arts or Associate of Science degree but have earned 60 semester hours or 90 quarter hours with a cumulative grade point of 2.0 or better for all previous college level courses.

3. The policy further encourages that students who have not earned an Associate of Arts or Associate of Science degree or who have not earned 60 semester hours or 90 quarter hours with a cumulative grade point of 2.0 or better for all previous college level courses are eligible for admission as transfer students on a competitive basis.

Acceptance of Transfer Credit

1. Students who have completed the Associate of Arts or Associate of Science degree with a cumulative grade point of 2.0 or better will receive transfer credit for all college level courses in which a grade of C or better has been earned.

Admission to a given institution, however, does not guarantee that a transfer student will be automatically admitted to all majors, minors, or fields of concentration at that institution. Once admitted, transfer students shall be subject to the same regulations governing applicability of transfer requirements as all other students. Furthermore, transfer students shall be accorded the same class standing and other privileges as all other students on the basis of the number of credits earned. All residency requirements must be successfully completed at the receiving institution prior to the granting of a degree.

Responsibilities of Students

In order to facilitate transfer with maximum applicability of transfer credit, prospective transfer students should plan a course of study that will meet the requirements of a degree program at the receiving institution. Specifically, students should identify early in their collegiate studies an institution and major to which they desire to transfer. Furthermore, students should determine if there are language requirements or any special course requirements that can be met during the freshman or sophomore years. This will enable students to plan and pursue a course of study that will articulate with the receiving institution's major. Students are encouraged to seek further information regarding transfer with both their advisor and the college or university to which they plan to transfer.

Appeals Process

A student disagreeing with the application of transfer credit by the receiving institution shall be informed of the right to appeal the decision and the process for filing the appeal. Each institution shall make available to students the appeal process for that specific college or university.

If a transfer student's appeal is denied by the institution after all appeal levels within the institution have been exhausted, the institution shall advise the student in writing of the availability and process of appeal to the state level Articulation and Transfer Appeals Review Committee.

The Appeals Review Committee shall review and recommend to institutions the resolutions of individual cases of appeal from transfer students who have exhausted all local appeal mechanisms concerning applicability of transfer credits at receiving institutions.

Qualified students interested in obtaining an officer's commission in the Air Force may enroll in Air Force ROTC classes through contracted agreement between The Ohio State University and the United States Air Force.

The first two years of enrollment (freshman/sophomore), is the General Military Course which includes lessons on aerospace doctrine and history of military aviation. The last two years (junior/senior), is the Professional Officer Course dealing with communicative skills, leadership, and management training, and national defense policy.

Air Force ROTC offers four-, three-, two-, and one-year scholarships. The four-year scholarship is applied for during the senior year in high school. Three- and two-year scholarships are offered to qualified men and women in college in selected Air Force career fields. The benefits provided by scholarships may include full payment of tuition, fees reimbursement for textbooks, and a tax free allowance of $100 per month. Upon entering the Professional Officer Course all cadets (scholarship and non-scholarship) receive the $100 per month tax free allowance.

AFROTC requires General Military Course Scholarship cadets to complete an English composition course. All scholarship cadets must complete one year of a foreign language. In addition, Professional Officer Course cadets must complete a mathematical reasoning course prior to commissioning. AFROTC enrolled cadets pursuing an officer commission will attend a 2-week Leadership Laboratory period each week.

Aerospace Studies courses are open to a limited number of non-cadets with the permission of the instructor. More information on AFROTC classes or scholarships can be obtained by calling the Department of Aerospace Studies at 614-292-5441.

Military Science

Army ROTC

253 Converse Hall, 2121 Tuttle Park Place, 232-6075
The Department of Military Science offers instruction to all Ohio State
students in basic soldier skills, leadership, organization of the Army and
military history. Additionally, those individuals meeting the requirements
as outlined by the Department of Defense may choose to receive a
commission in the United States Army, the United States Army Reserve,
or the Army National Guard.

Military Science 100- and 200-level courses are open to all students.
Military Science 300- and 400-level courses are open to those students
who meet the prerequisites as indicated below or receive the permission
of the professor of military science. Students taking military science
courses for credit and not seeking a commission will attend the classroom
portion only. The Department of Military Science offers two programs of
instruction leading to a commission as a Second Lieutenant.

The four-year program consists of a basic course and an advanced
course. The basic course requires successful completion of Military
Science 100- and 200-level courses during the freshman and sophomore
years. The advanced course requires successful completion of Military
Science 300- and 400-level courses during the junior and senior years.
The courses are three credit hours for the basic program and four credit
hours for the advanced program during the last year of classroom
instruction. There are approximately 20 hours of leadership laboratory, in
addition to the classroom instruction each quarter. Additionally, all advanced
course students choosing to receive a commission in the United States Army,
must attend a six-week summer training camp between their junior and
senior years.

No military obligation is incurred for the first two years of the program.
Following completion of the basic course, students may enter the advanced
course of instruction. Those qualified students wishing to receive a
commission must sign a ROTC contract which obligates the student to
complete the program of instruction and accept a commission in the U.S.
Army, U.S. Army Reserve, or the Army National Guard. Contracted
students receive a subsistence allowance of $150 for each academic
month of enrollment, not to exceed $1,500 per year.

The two-year program is offered for students wishing to receive a commission
who transfer from colleges that did not offer HJTCC, who are
veterans, or students whose academic course load did not permit them to
take military science courses during their first two years. Students may
qualify for the two-year program in one of several ways. The first is by
attending Army ROTC Basic Camp, Camp Challenge. Upon successful
completion of camp, the student may enter the advanced course. Attending
basic camp does not require the student to continue in the program nor
does it incur any military obligation. The second is to receive credit for
honorable prior military service of at least one year, as determined by the
professor of military science. Additionally, a student may receive credit for
two years or more of Junior ROTC at the high school level. After receiving
credit for the basic course, the student proceeds with the advanced course
as previously described.

Nondiscrimination Policy
The policy of The Ohio State University, both traditionally and currently, is that discrimination against any individual for reasons of race, color, creed, national origin, religion, sex, sexual orientation, age, handicap, or Vietnam-era veteran status is specifically prohibited. Accordingly, equal access to employment opportunities, admissions, educational programs, and all other university activities is extended to all persons, and the university promotes equal opportunity through a positive and continuing affirmative action program.
The university’s Office of Human Resources/Affirmative Action, 124 Archer House, 2130 Neil Avenue, Columbus, Ohio 43210-1175; 614-292-4207, is responsible for the coordination of matters relating to equal opportunity and affirmative action. United States Department of Defense regulations prohibit gay men, lesbians, and bisexuals from serving in the armed forces, including Reserve Officers Training Corps. As a result of the prohibition, ROTC programs at Ohio State are in violation of University Policy Number 1.10 (Issued 10/1/73).
