Alma Mater — Carmen Ohio
Graduates and guests led by
Sarah E. Wilson
Oh! come let’s sing Ohio’s praise,
And songs to Alma Mater raise;
While our hearts rebounding thrill,
With joy which death alone can still.
Summer’s heat and Winter’s cold.
The seasons pass, the years will roll;
Time and change will surely show
How firm thy friendship — Ohio.

Excerpts from the Commencement ceremony will be broadcast on WOSU-TV, Channel 34, at 5:30 p.m. today.
Charles A. Csuri

A pioneer in computer animation and graphics, Charles A. Csuri is a professor of art education and of computer and information science at The Ohio State University. Through his position as director of the University’s Computer Graphics Research Group, he has provided a conceptual framework for new directions in art. Csuri has developed an experimental program of graduate study for artists and animators at Ohio State that has attracted worldwide interest.

With support from the National Science Foundation, the Navy, and the Air Force Office of Scientific Research, he has directed basic research in computer graphics for the past 18 years. This work has involved 14 major projects and more than $3 million in external funding. The research results have been applied to flight simulators, computer-aided design, science education, anatomy, education for the deaf, architecture, and special effects for television and films.

Csuri has published widely, and his research has been described in at least 20 books and a number of journals. He is on the editorial board of the IEEE Journal of Computer Graphics and Applications and the editorial advisory board of Computer Graphics Today. He received a Distinguished Research Award from Ohio State in 1983 and the Golden Eagle Award in 1985 from the Visual Communications Congress in New York.

Csuri has appeared on the Today show and Walter Cronkite’s Universe, as well as on Japanese, Belgian, and German television. He founded Cranston/Csuri Productions, which has produced animation for all three major U.S. television networks, commercial clients, and The Living Body, a series of 24 television programs scheduled for worldwide distribution in 1986.

Csuri was awarded a Bronze Star for heroism during the Second World War. The holder of bachelor’s and master of fine arts degrees from Ohio State, he was an All-American tackle and most valuable player on the University’s national championship football team in 1942.
Recipients of Honors

Richard T. Baker
Doctor of Accounting and Business Administration

Richard T. Baker has brought distinction to The Ohio State University in a career that has earned him national prominence in business, education, and community service. Baker earned a bachelor's degree in business administration from Ohio State in 1939, was senior class president, and a member of the Big Ten championship basketball team.

Prior to retiring in 1977 as managing partner of Ernst & Whinney in Cleveland, he had helped the firm earn a reputation as one of the most progressive in the field of accounting and as perhaps the most committed to the importance of higher education. Under Baker’s direction, the firm sponsored a seminar series that brought together educators and professionals to address vital issues in accounting. The firm also provided substantial support for doctoral students, internship opportunities for faculty members, support for research projects, and initiated a program to provide faculty assistance in accounting to predominantly black colleges.

Baker was a charter member of the Ohio Board of Regents and helped formulate its Master Plan for Higher Education in the state. He played an important role in the creation of Cleveland State University and Cuyahoga Community College. Baker has also served several other universities in an advisory capacity. His service to his alma mater has included membership in The Presidents Club, the Peace Setters, and the Business Administration Advisory Council. The Ernst and Whinney Professorship of Accounting was established at Ohio State in his honor upon his retirement. Baker continues to have an impact in the business community through his membership and key committee roles on the boards of directors of several national corporations, including General Electric Company and Anheuser-Busch, Inc.

On the civic scene, Richard Baker has been an ardent volunteer in the promotion of community development and social service in Cleveland. He did much to advance the cause of Cleveland's United Way effort and served on the board of governors of the United Way of America. He was a director and first vice-chairman of the Greater Cleveland Growth Association and has served on the boards of numerous other arts and civic organizations in northern Ohio.

Baker is acclaimed by all who know him for his creativity, integrity, and insightful approach to leadership in business, education, and community service. Ohio State is proud to honor this most distinguished alumnus.

George W. Baughman
Doctor of Engineering

Rarely does one man so profoundly influence the industry or profession that he serves as has George W. Baughman. Throughout a career spanning nearly half a century, Baughman applied new technologies to one of this nation’s vital transportation links—the railway system. His applications have been adopted around the world.

As an engineer in the 1920’s for the Union Switch and Signal Division of the Westinghouse Air Brake Company, Baughman was faced with the challenges of automating the system that railroads used to safely control rail traffic and developing remote control systems for the operation of switches and signals. In response to these challenges, he developed the concept of “centralized traffic control” that provided enhanced rail safety, increased capacity, more economical operations, and vastly improved train systems management. These benefits played an important role in the ability of the nation’s railroads to meet the increased demands placed upon them during World War II. It is a tribute to Baughman’s skill and foresight that his techniques and systems, although updated with new technology, remain fundamentally the same today as when he developed them several decades ago. He is the holder of more than 100 patents.

Baughman received a bachelor of electrical engineering degree from Ohio State in 1920, followed in 1924 by the professional degree of electrical engineer. After a brief stint at Bell Telephone Laboratories, he joined Union Switch and Signal. He later became vice president and was assistant to the president when he retired in 1967. He has consulted widely, both here and abroad. Baughman has been honored for his work by being named a fellow of the American Institute of Electrical and Electronics Engineers, the British Institute of Railway Signal Engineers, and by election to the honoraries Tau Beta Pi, Eta Kappa Nu, and Sigma Xi. He is a recipient of the Elmer A. Sperry Award for distinguished engineering contributions that significantly advanced transportation and received the Benjamin G. Lamme Medal from Ohio State’s College of Engineering for his achievements. Baughman has been active in professional associations, as well as civic and community affairs.

Ohio State is proud to honor this creative and influential alumnus for his decades of achievement.
Recipients of Honors

David Riesman
Doctor of Social and Behavioral Sciences

Colleagues describe sociologist and educator David Riesman as a major force in American sociology and one of the major intellectual leaders in the United States in the past several decades. His writings and teachings have influenced a generation of students across the nation’s campuses.

Riesman earned both the A.B. degree and the L.L.B. from Harvard University in 1931 and 1934 respectively. He then served as a law clerk for Justice Louis Brandeis of the United States Supreme Court from 1935 to 1936. After several years of practicing and teaching law, he joined the social sciences faculty at the University of Chicago. In 1958, Riesman became the Henry Ford II Professor of Social Sciences at Harvard—a position he still holds.

Riesman’s scholarly contributions have been most profound in two areas: post-war American society and the nation’s higher education system. His books, *The Lonely Crowd* and *Faces in the Crowd*, were insightful analyses of post-war America, showing how changing occupations and societal characteristics led to alienation, feelings of powerlessness, and loss of personal identity among Americans in the last half of the 20th century.

His studies of academia have provided insight to the ways in which the growth of the research university has affected the values and behavior of American higher education in general. Riesman has also addressed the characteristics of community colleges, women’s colleges, black colleges, and religious affiliated schools.

Riesman has been a member of the Carnegie Commission for Study of Higher Education from 1967 to 1973 and the Institute for Advanced Study at Princeton University from 1971 to 1972. He also was a fellow at the Center for Advanced Study in the Behavioral Sciences at Stanford from 1968 to 1969.

For his scholarship and contributions to American thought, David Riesman has received honorary degrees from a number of institutions. Ohio State is pleased to offer its own recognition to this distinguished scholar.

D. Ransom Whitney
Distinguished Service Award

D. Ransom Whitney has devoted more than 35 years to the students of Ohio State and the academic discipline of statistics. After earning a bachelor’s degree from Oberlin College, a master’s from Princeton University, and a Ph.D. from Ohio State, Whitney joined the faculty of Ohio State as an assistant professor of mathematics in 1948. He retired as professor emeritus in 1982. In the intervening years, he had a profound influence on mathematics and statistics education at this University.

In 1948, he founded the Statistics Laboratory to provide a source of statistical experience for students and faculty, as well as to offer consulting experience for statistics graduate students. The laboratory has become a local and statewide resource for the business community, and it has been emulated by many other universities. Whitney was also the primary force behind the planning and construction of a new mathematics building. Finally, he led the move to form a separate academic unit for the teaching of statistics, resulting in the creation of a Department of Statistics in 1970. He then served as its chairperson for nine years. While on the faculty, Whitney published three textbooks and numerous articles, advised hundreds of graduate students, and consulted with many faculty members on their research. He also served one term as president of the Faculty Club.

Whitney is a fellow of the American Statistical Association and the American Association for the Advancement of Science and holds memberships in several other professional organizations. Since retirement, he has continued to consult actively, both with business clients and in the Statistics Laboratory. He also accepted the presidency of the recently formed Ohio State University Retirees’ Association.

For his dedication to the University, its people, and his profession, Ohio State is honored to present its Distinguished Service Award to D. Ransom Whitney.
Congratulations on receiving your degree. You may not notice the difference, but today, along with hundreds of your colleagues, you’ve become an alumnus. For you, one era has passed; another is about to begin.

You are a member of the Buckeye family and partner in the enterprise, carrying the reputation of Ohio State through your activities and accomplishments. You exemplify the fruits of a good education: a critical mind, a discerning spirit, higher values, a sense of commitment, and the privilege of service.

You can assist the University in many ways. You can recruit new and highly qualified students. You can represent Ohio State well through personal and occupational achievements. You can participate financially through the Development Fund. And you can work in an advisory capacity with the University to improve itself and its programs to better prepare today’s students for tomorrow’s citizenship.

We extend a year’s complimentary membership in the Alumni Association. Included is a year’s subscription to the OSU/Alumni Magazine, which will keep you informed of the University’s continuing pursuit of excellence and help you keep in touch with your friends and classmates.

To you, your family, friends, and those others who helped you arrive here today go our best wishes. You are joining a great family of Ohio State alumni working together to make a difference around the world.

Cordially,

This program is not an official graduation list

While every effort is made to ensure accuracy in this commencement program, printing deadlines sometimes prevent inclusion of graduates’ names, or may result in use of names of persons not completing graduation requirements. This printed program, therefore, should not be used to determine a student’s academic or degree status. The University’s official registry for conferral of degrees is the student’s permanent academic record, kept by the Office of The University Registrar, 202 Lincoln Tower, 1800 Cannon Drive, Columbus, Ohio 43210.

The Academic Costume

The colorful ceremonies of The Ohio State University Commencements derive from practices originating in the Middle Ages. When European universities were taking form in the 12th and 13th centuries, the scholars were usually clerics, and consequently they adopted costumes similar to those of their monastic orders. Cold halls and drafty buildings called for caps and floor-length capes with attached hoods, and the sobering influence of the church probably influenced the staid character of the caps and gowns.

As the control of the universities gradually passed from the church, some aspects of the costumes took on brighter hues. Old prints and engravings, however, reveal a strong similarity between the regalia worn in early universities and that of the present day.

In light of our nation's English heritage, academic costume has been in use in the United States since colonial times. To establish a standard of uniformity in regard to the practice, an intercollegiate commission was formed to prepare a code for caps, gowns, and hoods that has since been adopted by all academic institutions.

Originally round, the shape of the cap is now the familiar mortarboard square—a shape which, according to ballad folklore, resembles a scholar's book. Legend also has it that the privilege of wearing a cap was the initial right of a freed Roman slave; the academic cap, therefore, has become a sign of the freedom of scholarship. The flowing gown has become symbolic of the democracy of scholarship for it covers any dress that might indicate rank or social status. The hood, reserved at The Ohio State University for those receiving doctoral degrees, not only indicates the type of degree, but also is lined with the official colors of the University.

The Gown

Bachelor. Black, full cut with long pointed sleeves.

Master. Black, long or short sleeves with arc-shaped panel extended for each sleeve.

Doctor. Black with velvet panels on front of gown and three velvet bars on each sleeve. Color of the velvet may be black or distinctive of the field of study.

The Hood

Bachelor. Three feet long with a two-inch-wide velvet edging.

Master. Three and one-half feet long with a three-inch-wide velvet edging.

Doctor. Four feet in length with a five-inch-wide velvet edging and panel at the sides.

The lining of all hoods, which is folded out, bears the official colors of the institution granting the degree. The color of the velvet indicates the field of study:
