To Our New Alumni:

Welcome, a warm welcome, to the ranks of the alumni of The Ohio State University. Back in 1878 there were six alumni—new and untested. This small group has grown in 1970 to an alumni body of tens of thousands who have received degrees here, and our loyal Ohio State University Association has built the second largest organized constituency that exists among universities today.

The modern alumnus is a dedicated servant of education. The fruits of a good education—the critical mind, the discerning spirit, the higher values, the sense of commitment, and the privilege of service—are exemplified in tens of thousands of our products.

In a very real sense, the alumni are members of the family and full-fledged partners in the enterprise—in Ohio, in the nation, and throughout the world.

What can you do for the University? There seems to be general agreement on four major services which alumni can be counted on to render: 1) the ambassadorial service of representing Ohio State well wherever they go; 2) the service of strengthening Ohio State's resources through participation in the Development Fund; 3) the recruiting service of well-qualified students to Ohio State; and 4) the advisory service of strengthening Ohio State's role in society.

A great university is composed of many diverse people and many diverse ideas; so is society as a whole—and our alumni are the people best able to provide the vital link between our campus and its environment. With your assistance, we cannot fail to meet this challenge.

The University extends to you a year's free membership in the Association and with it will come automatically a subscription to THE MONTHLY, a magazine devoted to the task of helping you "keep in touch" with our exciting pursuit of human excellence.

Congratulations to you—and to your families and friends. You are joining a great family, for Ohio State is permanent among so many impermanencies. Your University is something to come back to—growing ever more rich and mellow in spirit.

We invite you to join with all of your fellow alumni in celebrating the Centennial of The Ohio State University throughout 1970!

Sincerely,

C. GORDON JELLIFFE  RICHARD M. MALL

Alma Mater—Carmen Ohio

Led by
Jean Elaine Gress
Member of the Class of 1970

O come let’s sing Ohio’s praise
And songs to Alma Mater raise
While our hearts rebounding thrill
With joy which death alone can still;
Summer’s heat and winter’s cold
The seasons pass, the years will roll;
Time and change will surely show
How firm thy friendship—Ohio.

HENDRIK W. BODE
Doctor of Science

Internationally recognized scientist, administrator, and author, whose pioneering contributions to engineering are used worldwide

So extensive are the accomplishments of Hendrik W. Bode that no student in any part of the world can obtain an electrical engineering education without studying the classical techniques which bear his name. His writings have gained world recognition. Even today nearly all classical control systems textbooks devote large sections specifically to his work. In addition, the vast majority of classical system and network design is still performed using his techniques.

A graduate of The Ohio State University, he joined the Bell Telephone Laboratories in 1926 where he specialized in mathematical methods for electrical network analysis and the application of this analysis to long-distance communication. The next decade saw revolutionary technological developments in this area brought about principally by Dr. Bode and his colleagues at Bell Labs. During this period he earned a Ph.D. degree from Columbia University.

In 1939 Dr. Bode completed a text which presented, for the first time, thoroughly scientific methods for the analysis and synthesis of control systems. This information was disseminated throughout the scientific community during World War II and provided the foundation for truly innovative system developments during that period. For his personal contributions to the defense effort, Dr. Bode was awarded the Presidential Certificate of Merit in 1948.

Following this era of outstanding personal accomplishments, Dr. Bode entered the second phase of his illustrious career, that of engineering management, and advanced rapidly through a series of supervisory positions to Vice President of the Bell Telephone Laboratories. His administrative leadership was instrumental in helping the Bell system achieve a position of world prominence in communication technology. Upon his retirement from Bell in 1967, Dr. Bode became the Gordon McKay Professor of Systems Engineering at Harvard University.

The Ohio State University is proud to honor a man whose extraordinary achievements have exerted a profound influence upon thousands of students and, indeed, upon communications systems for the entire world.

WILLIAM W. COOPER
Doctor of Science

Creative research scholar and teacher of the quantitative and behavioral disciplines, architect of innovative structures for administrative science

The career of William W. Cooper, Dean of the new School of Urban and Public Affairs, Carnegie-Mellon University, exemplifies the genius of American scholars and universities for developing new academic approaches to solve old problems.

Educated at the University of Chicago and Columbia University, he is the distinguished student of a distinguished professor of accounting, Eric Kohler, at one time a faculty member at The Ohio State University. In turn, Dean Cooper has been the inspiration for a group of talented students whose unique investigations have created new accounting and management measures.

A pioneering scholar, he has published more than one hundred articles, as well as several books, which have had a major impact, not only on accounting, but on a wide range of other disciplines, including economics, operations research, statistics, and management science. Despite the administrative demands of his present post, he continues to produce research which is always thoroughly integrated with the actual world.

Dean Cooper has been a moving force in the development and implementation of at least three major structures which seek to contribute an additional dimension to our society through research in the quantitative and behavioral sciences. First, for more than two decades he was a key figure in the development of the Carnegie-Mellon Graduate School of Industrial Management, now the primary model for schools for business and government throughout the world. Second, he was the founder and first president of The Institute of Management Science, now the organizational focal point for a whole new breed of international scholars. Finally, in recent years, much of his discerning but zestful intellect has been devoted to the development of another new school of administrative science, this one concerned with the fundamental quality of our daily life.

The Ohio State University is proud to recognize this remarkable American and creative catalyst who is so effective in getting experience out of his ideas.
HENRY B. HASS
Doctor of Science

Eminent scientist, recognized nationally for his extraordinary achievements in the fields of chemistry, engineering, and education.

The contributions of Henry B. Hass extend far beyond the chemistry laboratory. His life and habits, his very personality reveal a profound understanding of the human condition and have set a contagious example for his students and colleagues.

Dr. Hass received his Ph.D. degree from The Ohio State University in 1925. After three years of industrial research, he joined the faculty of Purdue University where he served for twenty-one years, more than half that period as Chairman of the Department of Chemistry.

While at Purdue Dr. Hass was involved with the creation of the Purdue Research Foundation and was in charge of the foundation's first project which resulted in rules for predicting the products of the chlorination of hydrocarbons. The fundamental work of Dr. Hass and his students on this project led directly to important commercial chemicals as well as to a new line of resins for plastics. Next came the discovery by Dr. Hass and his students that paraffin hydrocarbons could be nitrated in a vapor process to produce high yields of products that soon found applications in industry.

In the early 1940's Dr. Hass became associated with the Manhattan Project where he developed methods for producing essential fluorocarbons needed for gaseous diffusion operations installed at Oak Ridge National Laboratory. He left Purdue in 1949 to become Manager of Research and Development for General Aniline and Film Corporation. From 1952 to 1961 he served as Director of the Sugar Research Foundation, then joined the M. W. Kellogg Company as Manager of Chemical Research and Development and now serves that firm as a full-time consultant.

In 1968 the American Chemical Society honored Dr. Hass by awarding him the prized Perkin Medal. In 1969 his achievements were also recognized when he received the Gold Medal of the American Institute of Chemists.

The Ohio State University is proud to honor a distinguished alumnus for his outstanding contributions to science and his fellow man.

MAYNARD K. HINE
Doctor of Science

Able and respected academic administrator, productive author and scholar, dedicated leader in the field of dentistry.

In the current period of history, when university administrators are often neither liked nor respected by some in the academic community, Maynard K. Hine stands out as a scholar, teacher, and administrator who retains the respect and affection of his colleagues and students.

As Chancellor of the new Indiana University—Purdue University at Indianapolis, he has undertaken the challenging assignment of forging an alliance between the urban campuses of two major universities. The task required an academic statesman, a man of vision and personal distinction as scholar and teacher. All of these qualifications Chancellor Hine had amply demonstrated throughout a distinguished career as one of the nation's leading educators in the field of dentistry.

Dr. Hine received his dental education at the University of Illinois where he taught for a decade before joining the School of Dentistry at Indiana University in 1944. The next year he was named Dean, a position he held until 1969 when he became Chancellor. During his years as Dean, his extraordinary leadership abilities and his scholarly productivity carried him to a position of eminence in his field, as evidenced by his services as president of many professional organizations, including the American Dental Association, the American Association of Dental Schools, and the International Association for Dental Research.

Co-author of five books, contributor of numerous articles to scientific journals, Dr. Hine also serves as editor of the American Journal of Periodontology, a position he has held since 1950. He has served as Chairman of the Council on Dental Research of the American Dental Association, member of the Board of Regents of the National Library of Medicine, and member of the National Advisory Dental Research Council of the Department of Health, Education, and Welfare, to note but a few of many positions of professional service which he has filled.

For his extensive contributions to the dental profession, Dr. Hine has been widely recognized and honored. The Ohio State University adds with pride a new accolade in recognition of scholarly attainments of the highest order.
ALVAH PETERSON

Doctor of Science

Gifted teacher and research entomologist, whose contributions to science and to man span more than half a century

Alvah Peterson has had a significant and lasting influence of major proportions in the fields of entomology and environmental quality. His contributions include studies of the structure of the order of thrips, macrophotography of insect eggs, and techniques for the study of insects in the field and laboratory. He produced the classic work of an identification system for immature insects and pioneered the development of biological control.

Dr. Peterson saw the importance and possibilities of using parasitic and predacious insects to assist in the control of damaging insect pests long before the concept of biological control was generally appreciated in the United States. His investigations were conducted before the significance of ecological balance, or the dangers of persistent insecticides in the environment were recognized by the public, or by most entomologists. Modern procedures for reducing hazardous pesticides in our environment can, in part, be traced to the pioneering efforts of Alvah Peterson.

Alvah Peterson's two-volume work, Larvae of Insects, is a classical contribution to systematics. Until the publication of Dr. Peterson's system of identification based upon insect larvae, there was no satisfactory procedure for obtaining accurate identification of immature insects. These books have guided researchers and insect control specialists around the world and are the basis for courses in insect study at many universities.

Dr. Peterson is a graduate of Knox College and the University of Illinois. He taught at Rutgers University and later was appointed senior entomologist for the U.S.D.A. Bureau of Entomology. In 1928, Dr. Peterson joined the faculty of The Ohio State University and served with distinction until his retirement as Professor Emeritus in 1958.

Possessor of a rare combination of kindness, compassion, vision, and high scholarly ability, Alvah Peterson inspired in students and colleagues at Ohio State a confidence and trust rarely found in men. The Ohio State University is proud to honor a renowned scholar and an outstanding teacher.

Dissertation: High Pressure Synthesis and Influence of  
Pressure on Cation Distribution in 2-3 and 2-4 Spinel  
Field of Specialization: Mineralogy

Leonard Lo-Ho Tsai, Columbus  
B.E.E., M.S.  
Dissertation: Analysis and Measurement of a Dipole  
Antenna Mounted Symmetrically on a Conducting Sphere  
or Cylinder  
Field of Specialization: Electrical Engineering

John David Turnbull, Brooklynville, Pa.  
B.S. (Pennsylvania State University)  
Dissertation: The Inhibition of Hepatic Drug Metabolism  
by Some N,N'-bis(dichloroacetyl) diamines  
Field of Specialization: Physiological Chemistry

Robert Herman Vorsteg, Decatur, Ga.  
B.A. (Florida State University); M.A.  
Dissertation: Philosophical Explications of Meaning  
Field of Specialization: Philosophy

Richard Gary Wettan, New York, N. Y.  
B.A. (Queens College); M.S.Ed. (Brooklyn College)  
Dissertation: The Life and Contributions of George Louis  
Meylan, M.D., to Physical Education and Camping  
Field of Specialization: Physical Education

John Austin White, Jr., Blacksburg, Va.  
B.S.I.E. (University of Arkansas); M.S. (Virginia  
Polytechnic Institute)  
Dissertation: Normative Models for Some Segregated  
Storage and Warehouse Sizing Problems  
Field of Specialization: Industrial Engineering

Tao-hai Wu, Tsoying, Taiwan  
B.S.E.E. (Chinese Naval College of Technology);  
M.S.E.E. (United States Naval Post Graduate School)  
Dissertation: Time Optimal Control with a Fuel  
Constraint for Linear Time-Invariant Second-Order Plants  
Field of Specialization: Electrical Engineering

Ho-ning Yang, Hsinchu, Taiwan  
B.S. (National Taiwan University); M.S. (University of  
Minnesota)  
Dissertation: Phase Equilibria of the Join Akermanite-  
Anorthite-Forsterite in the System CaO-MgO-Al\textsubscript{2}O\textsubscript{3}-SiO\textsubscript{2}  
at Atmospheric Pressure  
Field of Specialization: Mineralogy

Hoh-nien Yih, Taipei, Taiwan  
B.S. (Tunghai University); M.S. (Iowa State University)  
Dissertation: Turbulent Mixing with Chemical Reaction  
Field of Specialization: Chemical Engineering

Myron Michael Zajkowski, Detroit, Mich.  
B.A., M.A. (Bowling Green State University)  
Dissertation: The Role of Reinforcement in Simple  
Monitoring Behavior  
Field of Specialization: Psychology
Certificate of Specialist in Educational Administration
One candidate

Galen Smith Kyro, Marysville
B.A. (Fairmont State College); A.M. (West Virginia University)

Master of Accounting
One candidate

Richard Vaughn Ross, Columbus
A.B. (Milligan College)
Field of Specialization: Accounting

Master of Arts
Ninety candidates

Charles Michael Andrean, Youngstown
B.A. (Youngstown State University)
Field of Specialization: Business Organization

Patricia Jo Anne Bealey, Rassels Point

All listings subject to final deliberations of Faculty Council.
The American Council on Education, through the cooperation of its institutional members, has established the Academic Costume Code, which has been adopted almost completely by institutions of higher learning in this country. The following information is provided for the benefit of visitors to academic ceremonies at The Ohio State University.

THE GOWN

Bachelor
Black, full cut with long pointed sleeves.

Master
Black, long or short sleeves with arc-shaped panel extended for each sleeve.

Doctor
Black, with velvet panels on front of gown and three velvet bars on each sleeve. Color of the velvet may be black or distinctive of the field of study.

THE HOOD

Bachelor
Three feet in length with a two-inch wide velvet.*

Master
Three and one-half feet in length with a three-inch wide velvet.*

Doctor
Four feet in length with a five-inch wide velvet and panel at the sides.

The lining of all hoods, which is folded out, bears the official colors of the institution from which the degree was received. The color of the velvet on all hoods indicates the field of study as follows:
