Course Offerings Bulletin
2024 - 2025

THE OHIO STATE
UNIVERSITY

2024 – 2025 Course Offerings Bulletin

Course information (title, credit hours, level, description, etc.) begins on page one. The most current information regarding new courses, changes to existing courses, Quarter to Semester conversion information, credit hours, sections, days, times, buildings, rooms, and instructors may be found on the Web at <http://registrar.osu.edu/courses> and <http://registrar.osu.edu/scheduling>.

Explanation of a Course Listing

I. Course Heading Information

1102.01 Beginning French II Classroom U 4

Course Number: 1102.01

Course Title: Beginning French II Classroom

Instructional Level: U

U = Undergraduate
G = Graduate
D = Dentistry
M = Medicine
L = Law
O = Optometry
P = Pharmacy
V = Veterinary Medicine

Credit Hours: 4

II. Main Course Description

Continued study of French; development of listening, reading, speaking, and writing skills; readings based on contemporary French culture and literature. Taught in French.

III. Course Attributes

Prereq: 1101.01, or completion of 4 cr hrs of 1101.51. Not open to students with credit for 102.01. This course is available for EM credit. GE for lang course. FL Admis Cond course.

Semester of offering (not displayed in example): Au, Sp Sems. Su Term.

Au = Autumn Semester
Sp = Spring Semester
Su = Summer Term

Prerequisite(s): 1101.01, or completion of 4 cr hrs of 1101.51.

The course number(s) or other information indicate the preparation or classification required to enroll in the course. If no department name is

listed, the number(s) refers to the specific course within the same department. If a department name is listed, all course numbers following that name belong to that department name until another is listed (e.g., Math 1101, 1102, 1103, Chem 1101, and 1102). Enrollment in a course requires the successful completion of all prerequisites or their equivalents. The department, school, or college office should be consulted with questions of eligibility to take a course.

Exclusionary clause: Not open to students with credit for 102.01.

Students who have taken the listed courses or belong to any other categories listed in the exclusionary clause are not eligible to enroll in the course.

Repeatability clause (not displayed in example): Repeatable to a maximum of 10 cr hrs or 4 completions.

Indicates the maximum number of credit hours and/or the maximum number of completions a course may be repeated for credit (whichever limit is reached first).

Satisfactory/Unsatisfactory grading clause (not displayed in example): This course is graded S/U.

Indicates that a course is graded on an S/U basis rather than the standard letter grading system.

EM credit clause: This course is available for EM credit.

Indicates that a course is available for a type of exam credit.

GE clause: GE for lang course.

Indicates that the course may be used to meet one or many of the University's General Education requirements. Students should consult their specific college or adviser before scheduling courses to be applied to this requirement.

Admissions condition clause: FL Admis Cond course.

Indicates that the course may be used to fulfill an admission condition.

Cross-listing clause (not displayed in example): Cross-listed in English.

Indicates that the course is cross-listed with a course in another subject. The course shares a vast majority of its content with the cross-listed course, and instances of these courses are typically taught by the same instructor, in the same space, and at the same time during a semester. Courses usually share the same course number (in which case only the subject will be present in the clause), but where they do not, the number of the cross-listed course will be given.

University Classification and Course Numbering System

The system of numbering courses offered by the University is as follows:

1000-1099: Undergraduate non-credit courses for orientation, remedial, or other non-college-level experiences. These courses are in addition to a program's graduation requirements.

1100-1999: Introductory, required or elective courses that may be prerequisite to other courses. They provide undergraduate credit, but do not count toward a major or field of specialization.

2000-2999: Intermediate courses providing undergraduate credit and may be counted toward a major or field of specialization.

3000-3999: Upper-level courses providing undergraduate credit that may be counted toward a major or field of specialization.

4000-4999: Advanced undergraduate courses providing undergraduate credit that may be counted toward a major or field of specialization. Graduate students may enroll in and receive graduate credit for 4000-level courses outside their own graduate program.

5000-5999: Courses that are regularly offered for both graduate and undergraduate credit. They are advanced-level undergraduate courses providing undergraduate credit that may be counted toward a major or field of specialization, or are foundational course work and research for graduate and professional credit.

6000-6999: Foundational graduate and professional courses and research providing graduate or professional credit.

7000-7999: Intermediate graduate and professional courses and research providing graduate or professional credit.

8000-8999: Advanced graduate and professional courses and research providing graduate or professional credit.

Academic Affairs

1100.07 Office of Diversity and Inclusion Young Scholars Program Seminar U 2

Workshops and course discussion designed to teach study strategies and engage students in personal development for college success. Instructors will help students incorporate new tools, resources, and strategies for greater academic engagement. Students will also participate in activities to increase confidence, personal awareness, and explore social constructs impacting their college experience. Prereq: Young Scholars Program scholarship recipient.

1101 Personal Financial Health Seminar U 2

Assist students with mastering the fundamental elements of personal finance and to help them make financially responsible decisions. Instructors will help students utilize learned skills to support their ability to manage their savings, scholarship awards and financial aid, and income to become financially independent, and to demonstrate financial success as an undergraduate and beyond. Prereq: Enrollment in an ODI funded or affiliated program (ACCESS, BNRC, JLMIII, LATINX, LSAMP, MSP, or YSP programs).

2021 Diversity, Service and Social Justice: A Blueprint for Dynamic Leadership U 3

This course will expose students to the key elements and character traits that influence dynamic and successful leadership. In specific, students will learn that diversity, service and social justice are inextricably linked and fundamental to the development of an effective leader. Participants will engage in interactive activities and discussions led by the instructor and visiting lecturers.

Accounting and Management Information Systems

1200 Project THRIVE Accounting Gigs U 1 - 3

An examination of the role of accounting in organizations and society, accounting fundamentals, careers in accounting and the professional skills required for success. Prereq: Enrollment in Project THRIVE program, or permission of instructor.

2000 Foundations of Accounting U 3

A survey of accounting for non-business students; financial statements and analysis; accounting for assets, liabilities and owners' equity; and elements of managerial accounting. Prereq: Not open to students with credit for 2200 (211), 2300 (212), or 310.

2200 Introduction to Accounting I U 3

Preparation and use of accounting reports for business entities; focus on uses of accounting for external reporting, emphasizing accounting as a provider of financial information. Prereq: Econ 2001.01 (200), or equiv. Not open to students with credit for 2000 (310) or 211, or equiv. This course is available for EM credit.

2200H Introduction to Accounting I U 3

Structure and use of financial reports; role of accounting and auditing in markets and organizations. Prereq: Honors standing, and Soph standing. Not open to students with credit for 211H.

2300 Introduction to Accounting II U 3

The uses of accounting reports by managers to make business decisions and to control business operations; focus is on the internal use of accounting information. Prereq: 2200 (211) and Econ 2001.01 (200), or equiv. Not open to students with credit for 2000 (310) or 212, or equiv. This course is available for EM credit.

2300H Introduction to Accounting II U 3

Use of accounting information in management control, with ties to the economic theory of the firm. Emphasizes classroom discussion and student presentations. Prereq: Honors standing, and a grade of B or above in 2200H, and Soph standing. Not open to students with credit for 212H.

3100H Quantitative Analysis in Accounting U 3

Accounting information system applications of linear algebra are explored including a subspaces representation of double entry accounting structure, a probability assignment description of a decision maker's uncertain state of knowledge, and Bayesian belief updating description of information processing including projections for the case of linear or Gaussian conditional expectations. Prereq: Honors standing, a grade of B or better in 2200H, and Soph standing. Not open to students with credit for 4780H.

3193 Individual Studies U 1 - 6

Individual study projects in selected areas in Accounting and Information Systems. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is graded S/U.

3194 Group Studies U 1 - 6

Group study projects in selected areas in Accounting and Information Systems. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.

3200 Financial Accounting I U 3

Theory and application of accounting techniques to record and report financial information; asset and liability valuation; income measurement; first of two-course sequence. Prereq: 2300, BusOBA 2320, 2321, BusMHR 2292, and Jr standing; or permission of instructor. Not open to students with credit for 3200.02.

3200H Financial Accounting I U 3

Economic role of financial reporting in markets and how it is influenced by the regulatory environment. Prereq: Honors standing, and a grade of B or above in 2300H. Not open to students with credit for 519H.

3201 Financial Accounting II U 3

Theory and application of accounting techniques to record and report financial information; asset and liability valuation; income measurement; second of two-course sequence. Prereq: 3200, 3200.02, or BusMHR 2292 (BusAdm 499.01); or permission of instructor. Not open to students with credit for 3201.02 or 523.

3201H Financial Accounting II U 3

Study of theory and practice of financial accounting. Prereq: Honors standing, and a grade of B or above in 3200H. Not open to students with credit for 520H.

3300 Cost Accounting U 3

Managerial decision making in organizations with an emphasis on the use of financial data; theory and practice of management control. Prereq: 2300 (212), BusMgt 2320 (330), 2321 (331), and BusMHR 2292 (BusAdm 499.01); or permission of instructor. Not open to students with credit for 525.

3300H Cost Accounting U 3

Theory and practice of management control with an emphasis on performance evaluation and reward. Prereq: Honors standing, and a grade of B or above in 2300H. Not open to students with credit for 525H.

3400 Tax Accounting I U 3

Fundamentals of the federal income tax, and how it influences taxpayer decisions. Emphasis is on the individuals and businesses organized as proprietorships, but rules generally applicable to all taxpayers are covered. Prereq: A grade of B or above in 2300H, or 3200 and BusMHR 2292.

3400H Tax Accounting I U 3

Fundamentals of the federal income tax, and how it influences taxpayer decisions. Emphasis is on individuals and businesses organized as proprietorships, but rules generally applicable to all taxpayers are covered. Prereq: Honors standing, and a grade of B or above in 2300H.

3600 Introduction to Accounting Information Systems U 3

The design of accounting information systems; focus is on business processes and internal control. Prereq: 3200 or 521, and BusMHR 2292 (BusAdm 499.01); or permission of instructor. Not open to students with credit for 631.

3600H Introduction to Accounting Information Systems U 3

The design and control of accounting information systems. Prereq: Honors standing, and 3100H; or permission of instructor.

3601 Introduction to Information Systems U 1½

The role of information systems in capturing and distributing organizational knowledge and enhancing management decision making, process of redesigning organizations utilizing systems analysis and design, quality assurance, and change management techniques, technical foundation of information systems, including hardware, software, telecommunications, networks, and the information architecture. Prereq: Admission to BSBA program and Business Management specialization.

3620 Foundations of Information Systems U 3

Provide a core knowledge base of management information systems; develop an understanding of their impact and operational and strategic use at all levels within and across modern business enterprises. Prereq: 2200, 2300, BusOBA 2320, 2321, BusMHR 2292, and CSE 1223.

4193 Individual Studies U 1 - 6

Individual study projects in selected areas in Accounting and Information Systems. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is graded S/U.

4194 Group Studies U 1 - 6

Group study projects in selected areas in Accounting and Information Systems. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.

4200 Advanced Financial Accounting U 3

Advanced topics in financial reporting; may include accounting for multi-corporate business entities, international operations, and government and not-for-profit organizations. Prereq: 3201 (523) or 3201.02, and BusMHR 2292 (BusAdm 499.01). Not open to students with credit for 624.

4210 Financial Statement Analysis U 3

Methods of fundamental analysis will be examined in detail; improve ability to use financial statements as part of an overall assessment of a firm's strategy and valuation. Prereq: 3201 (523) and BusMHR 2292 (BusAdm 499.01). Repeatable to a maximum of 12 cr hrs.

4220 Governmental and Non-Profit Accounting U 3

Focuses on financial reporting concepts and standards for non-profit and governmental units, evaluation of performance and the analysis and interpretation of financial statements of selected non-profit and governmental organizations. Prereq: 3201 (523) and BusMHR 2291 (BusAdm 499.01).

2 Accounting and Management Information Systems

4230	Topics in Financial Accounting	U	3	4998	Undergraduate Research in Accounting and MIS	U	1 - 3
Advanced topics in accounting for and implications of changes in accounting rules and policies; foundation, applications, and accounting valuation issues tied to blockchains and cryptocurrencies; applying data analytics in accounting contexts, environmental, social, and governance (ESG) accounting, etc. Prereq: 3201 or 3201H. Repeatable to a maximum of 6 cr hrs.				Undergraduate Research in Accounting and MIS for non-honors students. Prereq: Permission of Program Director. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is progress graded.			
4310	Topics in Management Accounting	U	3	4998H	Research	U	1 - 4
Advanced topics in management control, strategic interactions within the firm. Students may not repeat topics. Prereq: 3300 (525) and BusMHR 2292 (BusAdm 499.01). Repeatable to a maximum of 6 cr hrs.				Special topics research in accounting and/or management information systems; research evaluated through papers, thesis, and/or special examinations. Prereq: A grade of B or above in 3201H, or permission of Honors Accounting Director. Not open to students with credit for 783H. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is progress graded.			
4410	Tax Accounting II	U	3	5200H	Honors Advanced Financial Accounting	U G	3
Intensive study of the federal income tax treatment of business corporations and partnerships, with particular attention to tax planning by these businesses and their owners. Prereq: 3400 and BusMHR 2292.				Advanced topics in financial reporting including accounting for multi-corporate business entities, international operations, and other topics. Prereq: Honors standing, and a grade of B or above in 3201H; or permission of Honors Accounting Director. Not open to students with credit for 624H.			
4500	Auditing Principles and Procedures	U	3	5500H	Honors Auditing Principles and Procedures	U G	3
Basic concepts and standards of auditing; audit procedures and working papers, internal and external audit reports; professional responsibilities of auditors. Prereq: 3200, or permission of instructor.				Basic concepts and standards of auditing; audit procedures and working papers, internal and external audit reports. Prereq: A grade of B or above in 3201H (520H), or permission of Honors Accounting Director. Not open to students with credit for 627H.			
4510	Fraud Examination	U	3	6000	Management & Control	G	2½
The course will cover all major methods employees use to commit occupational fraud involving the misappropriation of assets. Prereq: 3201 and 3600, or permission of instructor.				Fundamental role of uncertainty, risk and private information in accounting; emphasis on managerial decisions and control problems in organizations. Prereq: Enrollment in Master of Accounting Program. Not open to students with credit for 803.			
4550	Advanced Assurance Services	U	3	6001	Fundamentals of Accounting Data & Analytics	G	2½
The primary objective is to develop critical thinking skills in assurance engagements by applying auditing and assurance concepts to real-world case studies. The course will emphasize computer-based auditing techniques and focus on procedures that can be used by assurance providers. Prereq: 4500.				Provides an introduction to using large datasets to better understand corporate financial reporting and market behavior. Prereq: Enrollment in Master of Accounting Program.			
4610	Topics in Information Systems	U	3	6200	Financial Reporting	G	2½
This course considers topics of current or relevant importance in the field of information systems. Prereq: 2200, 2300, 3620, BusOBA 2320, 2321, BusMHR 2292, and CSE 2123. Repeatable to a maximum of 6 cr hrs.				Examination of major aspects of corporate financial reporting by management under U.S. GAAP, including: revenue recognition, financial statement presentation, and disclosures and accounting for long-term debt, deferred taxes, and stock-based compensation, along with discussion of accounting standard setting and financial statement analysis. Prereq: Enrollment in Master of Accounting Program. Not open to students with credit for 7200.			
4620	Analysis and Design of Management Information Systems	U	3	6201	Professional Research in Accounting	G	1½
Investigation and application, through real-world projects, of concepts and tools used in the analysis and design of management information systems. Prereq: CSE 3232 (616), BusMgt 2320 (330), 2321 (331), and BusMHR 2291 (BusAdm 499.01). Not open to students with credit for 651.				Research and communication skills in a professional accounting context; learn to use various accounting information resources; enhance communication and teamwork skills through collaborative exercises. Prereq: Enrollment in Master of Accounting Program. Not open to students with credit for 804.			
4630	Business Systems Application Development	U	3	6202	Accounting Policy & Research	G	2½
Technical foundation in programming interactive business information systems. Prereq: 2300, CSE 2123, BusOBA 2320, 2321, and BusMHR 2292. Not open to students with credit for 3610.				Provides students the opportunity to develop their knowledge and appreciation of current debates surrounding the accounting profession. They will be exposed to academic research in accounting and the primary underlying methods involved. Prereq: Enrollment in Master of Accounting Program. Not open to students with credit for AcctMIS 844.			
4650	Decision Support and Expert Systems	U	3	7010	Ethical Challenges in Accounting and Business	G	1½
Study of computer-based systems designed to support decision-making within the organization. Prereq: CSE 3232 (616), BusMgt 2320 (330), and 2321 (331). Not open to students with credit for 657.				Provides students with an understanding of ethical challenges facing accounting and business professionals. Prereq: MBA 6211 (800), or enrollment in MAcc program.			
4660	Electronic Commerce	U	3	7193	Individual Studies	G	½ - 8
Examination of technical, managerial, and strategic issues that surround the emergence of electronic commerce on the internet. Prereq: 3610 (532) or CSE 3241 (670), and BusMgt 2320 (330), 2321 (331), and BusMHR 2292 (BusAdm 499.01). Not open to students with credit for 658.				Individual studies in Accounting and Information Systems. Prereq: Enrollment in the AcctMIS PhD program, or permission of instructor. Repeatable to a maximum of 40 cr hrs or 12 completions. This course is graded S/U.			
4670	Information Systems Planning & Management	U	3	7194	Group Studies	G	½ - 3
Planning and management of the information system function in business organizations with emphasis on the problems involved. Prereq: CSE 2123 (214), BusMgt 2320 (330), 2321 (331), and BusMHR 2292 (BusAdm 499.01); and Sr or Grad standing. Not open to students with credit for 659.				Group studies in Accounting and Information Systems; topics vary. Prereq: MBA 6211 (800), or enrollment in MAcc program. Repeatable to a maximum of 12 cr hrs or 4 completions.			
4680	Information Technology Security, Audit and Controls	U	3	7200	Corporate Financial Reporting I	G	1½
Fundamental concepts and techniques for the IT audit and control functions, including risk assessment frameworks such as COSO, CoBIT, ITIL, disaster recovery and continuity planning, best practices, standards and regulatory requirements governing information systems security, audit and controls. Prereq: 3600, or 3620, or permission of the instructor.				Examination of major aspects of corporate financial reporting. Prereq: 6050 or MBA 6211. Not open to students with credit for 6200 (824).			
4780	Accounting Research and Practice	U	3	7202	Advanced Professional Research in Accounting	G	1½
Researching accounting concepts and standards underlying corporate and non-corporate financial statements including consideration of typical accounting problems. Prereq: 3201 and BusMHR 2292. Not open to students with credit for 628.				This course deals with advanced research issues in accounting, including applying professional research techniques to complex accounting arrangements and discussing insights for professional practice of academic accounting research. Specific topics will be updated periodically based on developments in accounting practice, standard setting, and academic research. Prereq: 6201; and enrollment in the MAcc program, or permission of instructor.			
4780H	Accounting Research and Practice	U	3	7220	Financial Statement Analysis	G	1½
Researching accounting concepts and standards underlying corporate and non-corporate financial statements including consideration of typical accounting problems. Prereq: Permission of Honors Accounting Director. Not open to students with credit for 628H.				Examines the role of financial statement analysis in the evaluation of the firm's financial performance and the prediction of its future economic condition. Prereq: MBA 6211 (800), or enrollment in MAcc program. Not open to students with credit for 842.			
4784	Tax Research Seminar	U	3	7221	Financial Statement Analysis II	G	1½
Case studies requiring an in-depth examination of the tax aspects of situations frequently encountered by businesses and individuals. Prereq: A grade of B- or above in 3400, or permission of instructor.				Examines additional techniques to evaluate the firm's financial performance and the prediction of its future economic condition based on financial statements. Prereq: 7220, or permission of instructor. Not open to students with credit for 842.			

Accounting and Management Information Systems 3

7230 Accounting for Mergers and Acquisitions (and other Complex Transactions) G 1½

Designed for students whose careers will require an expert understanding of advanced accounting and reporting concepts regarding complex financial transactions. Prereq: Not open to students with credit for 841.

7250 Governmental and Non-Profit Accounting G 1½

Focus is on financial reporting concepts and standards for non-profit and governmental units, evaluation of performance and the analysis and interpretation of financial statements of selected non-profit and governmental organizations. Prereq: MBA 6211, or enrollment in MAcc program. Not open to students with credit for 4220.

7310 Managerial Accounting for Decision Making G 1½

Cost systems with emphasis on the appropriate application of system outputs to management decisions. Prereq: MBA 6211, or enrollment in MAcc program.

7400 Tax Planning for Managerial Decision Making G 1½

Examination of the impact of taxes on several important business decisions; recognition of tax problems and planning opportunities. Prereq: MBA 6211 (800), or enrollment in Master of Accounting Program, or permission of instructor. Not open to students with credit for 826.

7410 Tax Accounting II G 1½

Intensive study of the federal income tax treatment of business corporations and partnerships, with particular attention to tax planning by these businesses and their owners. Prereq: 7400 (826), or enrollment in Master of Accounting Program, or permission of instructor. Not open to students with credit for 846.

7420 Tax Accounting III G 1½

Intensive study of the federal income tax treatment of business entities and wealthy individuals, with particular attention to tax planning by these businesses and their owners. Prereq: MBA 6211 (800), or enrollment in Master of Accounting Program, or permission of instructor. Not open to students with credit for 866. Repeatable to a maximum of 12 cr hrs.

7500 Auditing Principles and Procedures G 1½

Basic theory and practice of auditing. Prereq: Enrollment in MAcc program.

7510 Assurance Services and Information Quality G 1½

Examination of the role of assurance services in enhancing the quality of information used for financial decision making, focusing on the perspective of the decision maker. Prereq: 4500 (627), 5500H (627H), or 7500, or equiv, and enrollment in the MAcc program. Not open to students with credit for 822.

7520 Fraud Examination: Misappropriation of Assets G 1½

Students will learn the major methods used by employees to commit fraud, factors that motivate individuals to commit fraud, misappropriation of assets, study of assets, and fraudulent disbursements, with emphasis on mechanisms to prevent and detect such frauds. Prereq: MBA 6211 (800), or enrollment in MAcc program. Not open to students with credit for 861.

7640 Data Mining for Business Intelligence G 1½

A theoretical and practical understanding of core data mining concepts and techniques and hands-on experience in applying these techniques to practical real-world business problems. Prereq: MBA 6211 (800), or enrollment in MAcc program.

7650 Accounting Information Systems: Processes, Technology, and Analytics G 3

This course covers the design and use of accounting information systems. The course emphasizes business processes and internal controls, with a focus on emerging technologies and the use of analytics in their evaluation. Prereq: MBA 6211 (800), or enrollment in MAcc program, or permission of instructor.

7660 Accounting & Data Analytics Internship Experience G 1½

An internship experience affords the student the opportunity to apply in the workplace the knowledge and skills s/he acquired in the classroom. In this course, students will examine the role of data analytics in the daily operations of an organization. Students will gain a better understanding of organizational culture, professional expectations, and his/her career options in the workplace. Prereq: Enrollment in MAcc program.

7716 Accounting and Financial Analysis in Health Sciences G 1½

Examines how managers use accounting and financial reporting information in decision making and performance evaluation. Course focuses on fundamental techniques for financial analysis such as time value money, risk and return, and capital budgeting. Prereq: BusMgt 7701, BusFin 7702, and BusMHR 7703; and enrollment in the Graduate Business Minor in Health Sciences.

7784 Tax Research G 1½

Case studies requiring an in-depth examination of the tax aspects of situations frequently encountered by businesses and individuals. Prereq: 7410, or enrollment in MAcc program. Not open to students with credit for 856.

7810 Advanced Topics in Accounting G 1½ - 3

Advanced Topics in Accounting for students in the MAcc Program. Prereq: Enrollment in MAcc program. Repeatable to a maximum of 15 cr hrs or 7 completions.

7820 Topics in Management Information Systems G 1½ - 3

This course involves advanced study of topics of current or relevant importance in the field of information systems. Prereq: Enrollment in MAcc or MBA program, or permission of instructor.

8780 Doctoral Seminar in Accounting & MIS G 3

Required seminar in Accounting and MIS for first year doctoral students. Prereq: Enrollment in AcctMIS PhD program.

8782 Doctoral Seminar in Financial Accounting G 3

Required doctoral seminar in Financial Accounting. Prereq: Enrollment in AcctMIS PhD program.

8783 Doctoral Seminar in Managerial Accounting G 3

Required doctoral seminar in Managerial Accounting. Prereq: Enrollment in AcctMIS PhD program.

8786 Doctoral Seminar in MIS Research G 3

Required doctoral seminar in MIS Research. Prereq: Enrollment in AcctMIS PhD program.

8890 Doctoral Seminar in Accounting Topics G 3

Doctoral seminar in Selected Accounting Topics. Prereq: Enrollment in AcctMIS PhD program. Repeatable to a maximum of 12 cr hrs.

8999 Dissertation Research G 1 - 9

Doctoral dissertation research. Prereq: Enrollment in AcctMIS PhD program. Repeatable to a maximum of 24 cr hrs or 9 completions. This course is progress graded (S/U).

Advanced Computing Center for the Arts and Design

3350 The History of Animation U 3

An overview of the history and theory of animation including origin of animation forms, Hollywood Studio animation, a sample of World Animation and contemporary animation. Prereq: Not open to students with credit for ArtsCol 350.

5001 Animation Techniques and Practices U G 3

The course introduces the principles of animation as fundamental knowledge in animation filmmaking. Students will learn how to apply these concepts in the creation of their own short animations. The course will provide a practical understanding of various animation techniques while exploring a variety of tools ranging from the traditional to contemporary.

5002 3D Computer Animation: Form, Light and Motion I U G 3

Overview of 3D computer animation components and stages of production. Prereq: 5001 for students enrolled in the MIP (Moving Image Production) program.

5003 3D Computer Animation: Form, Light and Motion II U G 3

Further exploration of 3D computer animation and stages of production. Prereq: 5002, or permission of instructor.

5100 Concept Development for Time-Based Media U G 3

Methods for developing concepts for time-based media through the cultivation of ideas and problem-solving strategies. Storyboarding, composition, editing and sound principles will be explored. Prereq: Not open to students with credit for ArtsCol 730.

5102 Programming Concepts and Applications for Artists and Designers U G 3

Fundamental programming concepts useful to artists and designers for creating algorithmic - based graphics and graphics tools. Prereq: Not open to students with credit for ArtsCol 756.

5140 Interactive Arts Media: Web U G 3

Introduction to the theory and practice of the design of interactive media for the web. Prereq: Not open to students with credit for ArtsCol 740.

5141 Interactive Arts Media: UI/UX U G 3

Practice in methods for designing and crafting user experiences (UX) and user interfaces (UI) for web applications.

5150 Emerging Trends in Data Visualization U G 3

This course enables students to explore existing, new, and emerging approaches to data visualization, topics, and trends in visualization research and their applications. Students will research, analyze, write about, explore, and make data visualizations. This class will be comprised of readings, discussions, conversations with visualization creators, hands-on visualization prototyping activities.

5191 ACCAD Internship U G ½ - 3

A collaborative internship assignment conducted under the supervision of a faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

5193 Independent Study U G ½ - 3

Independent study. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

5194.01 Group Studies in Digital Animation and Interactive Media U G ½ - 3

Group study on various topics related to digital animation and interactive media. Repeatable to a maximum of 15 cr hrs or 5 completions.

4 Advanced Computing Center for the Arts and Design

5200 Motion Capture Production and Experimentation U G 3

A hands-on experience with motion capture technologies, addressing contexts and applications. Students learn to operate within an optical motion capture pipeline for recording, real-time retargeting and post-processing of full body human motion and props, as well as developing their own approaches and processes for experimenting with capturing and remapping motion. Repeatable to a maximum of 6 cr hrs.

5301 Devising Experiential Media Systems U G 3

This course focuses on the creation of interactive and responsive spaces through the design of experiential media systems within the context of their underlying history, methodology, technology, and theory. Using a multidisciplinary and collaborative approach, students create hybrid digital-physical experiences which investigate the application of the technology used in experiential media design.

5500 Integrated Tech Lab U G ½ - 3

Technology exploration using ACCAD's specialized graphics laboratories. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.

6002 Computer Game Art and Design I G 3

Introduction to concepts for design and prototyping of games for entertainment, learning and social good. Prereq: Sr or Grad standing, and permission of instructor. Not open to students with credit for ArtsCol 733.

6003 Computer Game Art and Design II G 3

Advanced topics for design and production of both fun and serious games including networked multi-player and mobile devices. Prereq: Sr or Grad standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs.

6650 The History of Animation G 3

Overview of the history and theory of animation, including the origin of animation forms and Hollywood Studio animation, with a sample of World and contemporary animations. Prereq: Grad standing. Not open to students with credit for ArtsCol 650.

6651 Digital and Physical Lighting G 4

Introduction to the principles and concepts of lighting as used in theatre and computer graphics. Working in collaborative teams, students develop and execute digital and analog lighting schemes. Prereq: Grad standing, or permission of instructor. Not open to students with credit for ArtsCol 754 or Theatre 6651 (754). Cross-listed in Theatre.

7103 Designing Immersive Virtual Environments G 3

Creative and technical concepts for the development of simulations, installations, augmented reality and responsive spaces using 3D computer graphics with gesture-based and alternative input systems combined with immersive display methods. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

7104 Procedural Animation G 3

The investigation of procedural methods for modeling and animating 3D computer graphics. Prereq: Grad standing, or permission of instructor. Not open to students with credit for ArtsCol 763.

7193 Independent Study G ½ - 3

Independent Study. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

7504 Animation Production G 1 - 6

An advanced studio course designed for students who are well versed in animation concepts and technical basics. The course challenges students to embark on collaborative animation projects that are currently in-house at ACCAD. Prereq: 7001, 7002, 7003, 7004, or 7005, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.

7893 Collaborative Interdisciplinary Research Studio Experience G 1 - 3

Creative research by teams integrating information, data, techniques, tools, perspectives, concepts, &/or theories from two or more bodies of specialized knowledge to advance fundamental understanding or solve problems whose solutions are evolving. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.

Aerospace Engineering

2200 Introduction to Aerospace Engineering I U 4

An introduction to fundamental concepts leading to aircraft design, with an emphasis on aerodynamics and aircraft performance. Prereq: Physics 1250 or 1260 (131); and Math 1152 (152), 1161 (161), 1172 (154), or 1181H, or a grade of C- or above in Math 1544. Prereq or concur: Math 2173 (254), 2153 (153), or 2162 (263). Not open to students with credit for 200.

2405 Thermodynamics U 3

Aerospace engineering thermodynamics: Introduction to the concepts of energy and entropy, the First and Second Law analysis of systems and control volumes, and the analysis of power and refrigeration cycles. Prereq: 2200 (200), and AeroEng-BS student (No AAE pre-majors can enroll in this class). Not open to students with credit for 405.

3520 Flight Vehicle Dynamics U 3

Introduction to mathematical modeling of dynamics (equations of motion) for rigid bodies with specific application towards aircraft and spacecraft. Prereq: 2200, and enrollment as AeroEng-BS student (No pre-majors can enroll in this course). Prereq or concur: MechEng 2030.

3521 Fundamentals of Flight Vehicle Control U 3

Linear dynamic systems analysis using Transfer function (Laplace Transformation based) methods and State Space (matrix theory based) methods with emphasis on aircraft and spacecraft models. Prereq: 3520, and enrollment as AeroEng-BS student (No pre-majors can enroll in this class).

3522 Fundamental Astronautics U 3

This course will present a conceptual understanding of different types of orbits in space that arise under the laws of gravitational motion, basics of preliminary orbit determination, design of maneuvers among orbits of different types, a preliminary understanding of perturbations in space, preliminary space propulsion and the patched conics approach for interplanetary mission design. Prereq: 3520. Concur: 2405.

3542 Flight Vehicle Structures I U 3

Introduction to aerospace structures: Basic structural components; fundamental elements of linear elastic boundary value problems; composites; bending, torsion and shear of thin-walled sections; laboratory demonstrations. Prereq: 2200 and MechEng 2030 and 2040, or 2200 and MechEng 2010 and 2020 and 2030; and enrollment as AeroEng-BS student. Not open to AeroEng pre-majors.

3543 Flight Vehicle Structures II U 3

Energy Based Analysis: principles of virtual work and minimum potential energy; rayleigh-ritz & finite element methods; structural stability; thermo-elasticity; structural dynamics; laboratory demonstrations. Prereq: 3542 (342), and enrollment as AeroEng-BS student (No pre-majors can enroll in this class). Not open to students with credit for 543.

3560 Fundamentals of Aerodynamics U 3

Fundamentals of viscous and inviscid flow encountered in aircraft aerodynamics. Prereq: 2200 and 2405; and Math 2174, or 2568 and 2415; and enrollment as AeroEng-BS student. Not open to AeroEng pre-majors.

3570 One Dimensional Gas Dynamics U 3

Continuation of viscous flows and boundary layers. One-dimensional gas dynamics including shocks, waves, supersonic, and transonic flow. Prereq: 3560 (560 and 570), and enrollment as AeroEng-BS student (No pre-majors can enroll in this class). Not open to students with credit for 530.

3580 Heat Transfer U 3

Fundamentals of conduction, convection, and radiation. Prereq: 3560 (560 and 570), and enrollment as AeroEng-BS student (No pre-majors can enroll in this class). Not open to students with credit for 570.

3581 Numerical Methods in Aerospace Engineering U 3

Fundamentals of mathematical and numerical modeling techniques and their applications in solving engineering problems. Prereq: Math 2174, or 2568 (568) and 2415 (415); and enrollment as AeroEng-BS student. Not open to students with credit for 581, or AeroEng pre-majors.

4193 Individual Studies in Aerospace Engineering U 1 - 7

Individual studies project for undergraduates. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.

4194 Group Studies in Aerospace Engineering U 1 - 3

Group studies course for undergraduates. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.

4510 Experimental Projects I U 2

Conceive, plan and design an experiment with a group of students. Emphasis on planning and experiment preparation. Prereq: 3543 (543) and 3570 (530 and 570), and Sr standing, and enrollment as AeroEng-BS student (No pre-majors can enroll in this class).

4511 Experimental Projects II U 3

Execute and report on experiment formulated in Projects I. Emphasis on execution and reporting. Prereq: 4510, and enrollment as AeroEng-BS student (No pre-majors can enroll in this class).

4515 Design of Atmospheric Flight Vehicles I U 3

Conceptual and preliminary design, methodology, case studies, introduction of design software, group planning for subsequent design effort: design of atmospheric flight vehicles and components. Prereq: 3543 (543) and 3570 (530 and 570) and 3521 (521) and 3580 (580), and Sr standing, and enrollment as AeroEng-BS student (No AAE pre-majors can enroll in this class). Prereq or concur: 4550 (550). Not open to students with credit for 515.01 or 516.01.

4516 Design of Atmospheric Flight Vehicles II U 3

Continuation of 4515. Preliminary and detailed design of aerospace vehicle components: design of a vehicle for atmospheric flight. Prereq: 4515 (515 and 516), and enrollment as AeroEng-BS student (No pre-majors can enroll in this class). Not open to students with credit for 516.01 or 517.01.

4517 Design of Space Vehicles and Systems I U 3

Feasibility study of a space mission, elements of mission design and design methodologies of spacecraft subsystems, and preliminary sizing. Prereq: 3521 and 3543 and 3570 and 3580, and Sr standing, and enrollment as AeroEng-BS student (No pre-majors can enroll in this course). Prereq or concur: 4550.

Aerospace Engineering 5

4518	Design of Space Vehicles and Systems II	U	3
Continuation of 4517: Preliminary and detailed design of space vehicle components. Design of a space vehicle/system, and mission scenarios simulation via computer software. Prereq: 4517, and enrollment as AeroEng-BS student (No pre-majors can enroll in this course).			
4550	Principles of Flight Vehicle Propulsion	U	3
Fundamentals of aerospace propulsion, engine cycles and analysis of various air-breathing and rocket engines. Prereq: 3570. Not open to students with credit for 550.			
4998	Aerospace Engineering Research	U	1 - 3
Aerospace Engineering research. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
4999	Aerospace Engineering Thesis Research	U	1 - 3
Aerospace Engineering research for thesis. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions.			
4999H	Aerospace Engineering Honors Thesis Research	U	1 - 3
Aerospace Engineering honors research for thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.			
5610	Helicopter Aerodynamics	U G	3
Basic treatment of helicopter aerodynamics, performance, and design. Prereq: 3570 (530 and 570).			
5612	Aircraft Performance and Flight Test Engineering	U G	3
Determination of the performance, stability, controllability, and handling qualities of general aviation aircraft through analysis and flight tests. Prereq: 3520 (520) and 3570 (530 and 570). Not open to students with credit for 612.			
5615	Introduction to Computational Aerodynamics	U G	3
Introduction to computational methods used in aerodynamics flow problems. Prereq: 3570 and 3581, and AeroEng major; or Grad standing in Mechanical or Aerospace Engineering; or permission of instructor. Not open to AeroEng pre-major students.			
5616	Advanced Flight Vehicle Design	U G	3
The course introduces advanced flight vehicle design techniques applied during the conceptual design phase. The optimum design process and problem formulation is introduced, with an in-depth focus on multivariate graphical optimization techniques for aircraft. We will conduct optimal design based on first principles, and apply best practices to multidisciplinary flight vehicle design. Prereq or concur: 4550, and 4515 or 4517; or Grad standing in AeroEng; or permission of instructor.			
5620	Stability and Control of Flight Vehicles	U G	3
Analysis and design of aircraft, helicopter and missile flight control systems and the associated guidance and navigation systems. Prereq: 3521 (521). Not open to students with credit for 620 or 621.			
5621	Guidance, Navigation, and Control of Aerospace Vehicles	U G	3
Spacecraft (satellite) control systems analysis and design. Prereq: 3521 (521). Not open to students with credit for 620 or 621.			
5626	Orbital Mechanics for Engineers	U G	3
Introduction to orbital mechanics with orbit determination techniques, orbital maneuvers and lunar and interplanetary trajectories. Prereq: 3520 (520) and MechEng 2030 (430). Not open to students with credit for 645 or 745.			
5751	Advanced Air-Breathing Propulsion	U G	3
Fundamental and advanced concepts of gas turbine operation. Prereq: 4550 (550). Not open to students with credit for 751.			
5752	Advanced Space Propulsion	U G	3
Analysis of different propulsion techniques for access to space and inter-planetary flight: liquid, solid, hybrid, nuclear and electric. Emphasizes fundamentals based on physics and mathematics. Prereq: 4550 (550), or permission of instructor. Not open to students with credit for 752.			
5775	Hypersonic Flow	U G	3
Introduction to hypersonic inviscid and viscous flows, Newtonian theory, high-temperature effects and heat transfer. Prereq: 3570, or Grad standing in AeroEng.			
6193	Individual Studies in Aerospace Engineering	G	1 - 7
Individual studies project. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
6194	Group Studies in Aerospace Engineering	G	1 - 3
Group studies course. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
6645	Introduction to Structural Dynamics and Aeroelasticity of Aerospace Vehicles	G	4
Fundamental Concepts of Structural Dynamics, Unsteady Aerodynamics, and Aeroelasticity of Aerospace Vehicles. Prereq: Grad standing, or permission of instructor.			

6771	Viscous Fluid Flow: Laminar and Transitional	G	3
Focus on laminar and transitional flows, beginning with classic analytical solutions to the Navier-Stokes equations and addressing issues of boundary layer stability and compressibility effects. Prereq: 3560 and 3570.			
6860	Experimental Fluid Mechanics	G	3
Introduction to experiment planning, data acquisition and analysis, and advanced measurement techniques commonly employed in fluid dynamics research. Prereq: Grad standing in Mechanical or Aerospace Engineering, or permission of instructor. Not open to students with credit for 860.			
7721	Advanced Flight Mechanics	G	3
Advanced elements of flight mechanics across the entire Mach range including access-to-space and atmospheric reentry. Prereq: Grad standing in Aerospace or Mechanical Engineering, or permission of instructor.			
7774	Aeroacoustics	G	3
Fundamental concepts of classical acoustics; physical mechanisms associated with aerodynamic noise generation; computational aeroacoustic methods. Prereq: 5615 (615) or equiv.			
7844	Optimal Design of Aerospace Structures	G	3
Optimization applied to aircraft and spacecraft structures. Prereq: Grad standing in Mechanical or Aerospace Engineering, or permission of instructor. Not open to students with credit for 844 or MechEng 7761 (761). Cross-listed in MechEng 7761.			
7862	Internal Flows in Turbomachinery	G	3
Detailed study of swirling, rotating, compressible, and unsteady internal flows found in turbomachinery. Prereq: 3560 (560) and 5751 (751), or permission of instructor. Not open to students with credit for 862.			
7875	Introduction to Turbulence	G	3
Introduction to turbulence in fluid mechanics with emphasis on understanding the physical mechanisms involved. Prereq: Grad standing in Mechanical or Aerospace Engineering, or permission of instructor. Not open to students with credit for 875. Cross-listed in MechEng 7513.			
8193	Individual Studies in Aerospace Engineering	G	1 - 7
Topics selected to give the advanced student opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
8194	Group Studies Aerospace Engineering	G	1 - 3
Topics selected to give advanced students an opportunity to pursue special studies as a group not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
8518	Advanced Mathematical Methods in Engineering	G	3
Fourier series, complex differentiation and integration and transform and Green's function for solution of problems arising in heat transfer, solid mechanics, fluid mechanics; linear operators as applied to engineering problems. Prereq: Grad standing in Mechanical, Aerospace, or Nuclear Engineering; or permission of instructor. Cross-listed in MechEng.			
8830	Random Dynamical Systems	G	3
Elements of axiomatic theory of probability, measure theory, stochastic differential equations, and martingales. Study of tools, e.g., sequential Monte Carlo, stochastic linearization, moment closure, Fokker-Planck equations, parameter estimation. Prereq: ECE 6001, or Grad standing in Mechanical or Aerospace Engineering, or permission of instructor.			
8850	Robust Multivariable Control with Applications	G	3
Advanced concepts for robust control of uncertain dynamic systems with applications. Prereq: 5620 or 5621 or ECE 6750, or permission of instructor. Not open to students with credit for ECE 8850. Cross-listed in ECE.			
8873	Advanced Computational Fluid Dynamics	G	3
Fundamentals of most types of numerical approaches employed to solve fluid dynamics and heat transfer problems. Prereq: 5615 (615) or MechEng 6507 (707), or equiv. Not open to students with credit for 873.			
8890	Aerospace Engineering Graduate Seminar	G	1
Lecture and discussion of current topics related to Aerospace Engineering presented by graduate students, staff and guest speakers. Course does not count toward course work required for MS or PhD degrees. Prereq: Grad standing in AeroEng, MechEng or NuclEn. Repeatable to a maximum of 20 cr hrs. This course is graded S/U.			
8998	Aerospace Engineering Research for MS Thesis	G	1 - 15
Aerospace engineering research for thesis. Repeatable. This course is graded S/U.			
8999	Aerospace Engineering Research for Dissertation	G	1 - 16
Aerospace Engineering research for PhD. Repeatable. This course is graded S/U.			

6 African American and African Studies

1101 Introduction to African American and African Studies U 3

Introduction to the scholarly study of the Africana experience, focusing on patterns of resistance, adaptation, diversity, and transnational connections. Prereq: English 1110. GE soc sci indivs and groups course. GE foundation social and behavioral sci and race, ethnicity and gender div course.

1111 Introduction to Africa U 3

This course is a multidisciplinary introduction to the history, peoples, and cultures of Sub Saharan Africa. Via a diverse set of sources and mediums, including films, literature, visual art, human rights reports, etc., students will be introduced to a number of important expressions, ideas, episodes, events, and trends in Africa, past and present. GE foundation historical and cultural studies course.

1112 Introduction to the Black World U 3

This course introduces students to the history & present of the global Black World(s) encompassing Africa & its diasporas. It explores the racial ideologies that shaped Blackness, & looks to its political, cultural, social, & religious expressions. Students discuss Black movements, diversity, & anti-black politics. They learn to look at lived realities of blackness through an intersectional lens. GE foundation race, ethnicity and gender div course.

1121 African Civilizations to 1870 U 3

Exploration of the political, social, and economic history of precolonial African civilizations, using a variety of interdisciplinary approaches and materials. Prereq: English 1110. GE historical study and diversity global studies course. GE foundation historical and cultural studies course.

1122 African Civilizations, 1870 to the Present U 3

Exploration of the political, social, and economic history of colonial and independent African countries, using a variety of interdisciplinary approaches and materials. Prereq: English 1110. GE historical study and diversity global studies course. GE foundation historical and cultural studies course.

2080 African American History to 1877 U 3

The study of the African American experience in America from arrival through the era of Reconstruction, focusing on slavery, resistance movements, and African American culture. Students will analyze the intersection of race, gender, ethnicity, religion, social class, and other categories through the lens of African Americans? lived experiences and how they functioned in Black communities. Prereq: Not open to students with credit for History 2080. GE historical study course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in History.

2081 African American History from 1877 U 3

The study of the African American experience in the United States from the era of Reconstruction through the present, with an emphasis on the intersection of race, gender, ethnicity, religion, and social class. Prereq: Not open to students with credit for History 2081. GE historical study course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in History.

2101 Introduction to African Art and Archaeology U 3

The Art and Archaeology of Africa with emphasis on the historic cultures of Rock Art (8,000 B.C.), Egypt (3,000 B.C.), Nok (900 B.C.), Igbo-Ukwu (695 A.D.), Ife (1200 A.D.), and Benin (1400-1900 A.D.). Prereq: Not open to students with credit for HistArt 2101 (216). GE VPA course and diversity global studies course. GE foundation lit, vis and performing arts course. Cross-listed in HistArt.

2194 Group Studies U 1-3

Groups of students are given an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

2201 Major Readings in African American and African Studies U 3

An introduction to major authors and texts contributing to the discourses that have shaped and defined African American and African Studies from its inception to the present. Prereq: English 1110. GE diversity soc div in the US course. GE foundation race, ethnicity and gender div course.

2218 Black Urban Experience U 3

Examination of contemporary black urban experience focused on the impact of persistent residential segregation, increasing class polarization, and the global force of hip hop culture. GE soc sci indivs and groups course. GE foundation social and behavioral sci and race, ethnicity and gender div course.

2251 Introduction to African Literature U 3

An assessment of the oral prose tradition and written prose of African literature; specific emphasis placed on student reading from primary sources. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2253 Introduction to Caribbean Literature U 3

An introduction to Caribbean literature with a focus on prose, poetry, and drama. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2270 Introduction to Black Popular Culture U 3

A critical analysis of the commodity production and consumption of black popular culture products, such as fashion, film, urban fiction, music, vernacular expression, television and advertising. GE VPA and diversity soc div in the US course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

2275 Blackness and the Politics of Sports U 3

The purpose of this course is to assist students in understanding the historical relationship between African Americans & the professional sports industry. We will explore how the intersections of race, gender, ethnicity, & sexuality function in the world of sports & investigate the cultural tendency to praise athletic achievement over educational or career ambitions. GE foundation race, ethnicity and gender div course.

2281 Introduction to African-American Literature U 3

A study of representative literary works by African-American writers from 1760 to the present. Prereq: English 1110, or equiv. Not open to students with credit for English 2281. GE lit and diversity soc div in the US course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course. Cross-listed in English.

2285 Afropop: Popular Music and Culture in Contemporary Africa U 3

Focuses on the rich variety, aesthetic beauty, and political significance of popular music in modern African cities, as well as contemporary urban locations within the African diaspora. In these social and cultural contexts, students will further explore the intersectionality of race, gender, sexuality, class, ethnicity, and religion, in various constellations, through the lens of popular music. GE cultures and ideas course and diversity global studies course. GE foundation historical and cultural studies and GE foundation race, ethnicity and gender div course.

2288 Bebop to Doowop to Hiphop: The Rhythm and Blues Tradition U 3

Examines the aesthetic and historical evolution of rhythm and blues: black music tradition including bebop, rock and roll, and hiphop, redefining American popular culture post-WWII. Prereq: Not open to students with credit for 288 or Music 2288 (288). GE VPA and diversity soc div in the US course. GE foundation lit, vis and performing arts course. Cross-listed in Music.

2301 African Peoples and Empires in World History U 3

A thematic course focusing on African world history, empire building, and commercial and cultural links across the Atlantic, the Indian Ocean, and the Mediterranean worlds before and during the Atlantic slave trade. Prereq or concur: English 1110.xx, or completion of GE Foundation Writing and Information Literacy Course, or permission of instructor. Not open to students with credit for History 2301. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in History.

2302 History of Modern African, 1800-1960s U 3

Thematic survey of African history from 1800 to the 1960s. Prereq or concur: English 1110.xx, or completion of GE Foundation Writing and Information Literacy Course, or permission of instructor. Not open to students with credit for History 2302. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in History.

2303 History of Contemporary Africa, 1960 - present U 3

Africa from independence to the present. Contemporary African societies, cultures, economics, and politics from independence to the present. Prereq or concur: English 1110.xx, or completion of GE Foundation Writing and Information Literacy Course, or permission of instructor. Not open to students with credit for History 2303. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in History.

2367.01 African-American Voices in U.S. Literature U 3

Discussion, analysis, and writing about issues presented through the diverse voices of African American literature. Prereq: English 1110. GE writing and comm: level 2 and lit and diversity soc div in the US course. GE foundation lit, vis and performing arts course.

2367.04 Black Women Writers: Text and Context U 3

Writing and analysis of black women's literary representations of issues in United States social history. Prereq: English 1110, and Soph standing. Not open to students with credit for WGSST 2367.04. GE writing and comm: level 2 and lit and diversity soc div in the US course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course. Cross-listed in WGSST.

2367.07S Literacy Narratives of Black Columbus U 4

This service-learning course focuses on collecting and preserving literacy narratives of Columbus-area Black communities. Through engagement with community partners, students refine skills in research, analysis, and composition; students synthesize information, create arguments about discursive/visual/cultural artifacts, and reflect on the literacy and life-history narratives of Black Columbus. Prereq: English 1110. Not open to students with credit for English 2367.07S. GE writing and comm: level 2 and diversity soc div in the US course. GE theme lived environments course. Cross-listed in English.

3080 Slavery in the United States U 3

The African American experience in slavery, focusing on the rise of the slave trade, slavery in the colonial and antebellum eras, the Civil War, and abolition. Prereq or concur: English 1110.xx; or permission of instructor. Not open to students with credit for History 3080. GE historical study course. Cross-listed in History.

3081 Free Blacks in Antebellum America U 3

Explores the development of free Black communities in the era before the Civil War, focusing on emancipation, fugitive slaves, resistance movements and suffrage. Prereq or concur: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 3081. GE historical study and diversity soc div in the US course. Cross-listed in History.

African American and African Studies 7

3082	Black Americans During the Progressive Era	U	3
<p>History and experiences of black Americans during the period best known in American History as the Progressive Era. Sometimes this course is offered in a distance-only format. Prereq: English 1110.xx and any History 2000-level course, or permission of instructor. Not open to students with credit for History 3082. GE historical study and diversity soc div in the US course. Cross-listed in History.</p>			
3083	Civil Rights and Black Power Movements	U	3
<p>Examines the origins, evolution, and outcomes of the African American freedom struggle, focusing on the Civil Rights and Black Power movements. Sometimes this course is offered in a distance-only format. Prereq or concur: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 3083. GE historical study and diversity soc div in the US course. GE theme citizenship for div and just wrld course. Cross-listed in History.</p>			
3086	Black Women in Slavery and Freedom	U	3
<p>Traces the experiences and struggles of African American women from slavery through the Civil Rights/Black Power era. Prereq: English 1110.xx, or permission of instructor. Not open to students with credit for History 3086. GE historical study and diversity soc div in the US course. GE theme migration, mobility, and immobility course. Cross-listed in History.</p>			
3089	Studies in African American History	U	3
<p>Selected topics in African American history from the origins of slavery to the present. Prereq or concur: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 3089. Repeatable to a maximum of 12 cr hrs. GE historical study course. Cross-listed in History.</p>			
3110	Social (In)Justice and the Black Experience	U	3
<p>This course will provide an historical grounding/foundation of Black social justice movements in America to help students understand some of the most pressing issues facing African Americans today. In so doing, this course will focus on key events, movements, and ideas that have shaped and informed Black peoples' social justice efforts in the 20th and 21st centuries. GE theme citizenship for div and just wrld course.</p>			
3230	Black Women: Culture and Politics	U	3
<p>Examination of the social, cultural, political, economic, and historical forces, dynamics, and processes affecting women throughout the Africana world. GE diversity soc div in the US course. GE theme traditions, cultures, and transformations course.</p>			
3260	Global Black Cultural Movements	U	3
<p>This course focuses on hemispheric studies in the Americas, examining black cultural movements emerging after emancipation through the present. It considers the ways people of African descent in the Americas have used cultural productions—literature, poetry, film, music, visual art, and performance—to construct identities; agitate for equality; and understand aesthetics as political and beautiful. GE diversity global studies course. GE theme lived environments course.</p>			
3304	History of Islam in Africa	U	3
<p>Africa from the emergence of Islam in the 600s to the Present. African contributions to Islam and the impact of Islam on African societies. Sometimes this course is offered in a distance-only format. Prereq or concur: English 1110.xx, or permission of instructor. Not open to students with credit for History 3304. GE historical study course. Cross-listed in History.</p>			
3310	Global Perspectives on the African Diaspora	U	3
<p>Study of historical processes, key figures and ideas, and cultural expressions of the worldwide dispersion of people of African descent from different times and places. GE theme lived environments course.</p>			
3320	History of African Cinema	U	3
<p>Emergence and development of African cinema as a film genre and part of material culture. European colonial and ethnographic to modern African cinema. Sometimes this course is offered in distance-only format. Prereq: English 1110.xx, or permission of instructor. Not open to students with credit for History 3310. GE historical study and diversity global studies course. Cross-listed in History 3310.</p>			
3370	Being African in America	U	3
<p>We examine the particular experiences of first and second generation Africans in America, for whom today's amplified "us vs. them" rhetoric threatens to fracture what W.E.B. Du Bois called an African American sense of "two-ness." What are the constraints on a doubly conscious "African" and "American" identity in the United States? What are the challenges of sustaining a fragile social pluralism? Prereq: English 1110. GE theme migration, mobility, and immobility course.</p>			
3376	Arts and Cultures of Africa and the Diaspora	U	3
<p>An overview of African and African diaspora cultures from a historical perspective. Cultural media will include art, literature, film, dance, and photography. Prereq: Not open to students with HistArt 3102. GE VPA and diversity global studies course. GE theme migration, mobility, and immobility course. Cross-listed in HistArt 3102.</p>			
3440	Theorizing Race	U	3
<p>Introduction to issues of "race," consideration of the historical emergence and development of ideas of "race" and of racist practices, along with their contemporary formations. Prereq: 3 cr hrs in AfAmASt or Philos or REGD Foundation; or enrollment in Philosophy, Politics, and Economics major, AfAmASt major, or Philos major; or permission of instructor. Not open to students with credit for Philos 3440. GE theme citizenship for div and just wrld course. Cross-listed in Philos.</p>			

3450	The Art and Politics of Hip-Hop	U	3
<p>Explores the world of Hip-Hop, from its birth in the Bronx to its infiltration of music, fashion, television, film, dance, print culture, and politics. It considers critically the intersections of race, class, gender, sexuality, nation, and geography as well as the ways in which Hip-Hop functions simultaneously as aesthetic, analytic, and politic. Prereq: English 1110.xx, or GE foundation writing and info literacy course. Not open to students with credit for Music 3450. GE theme citizenship for div and just wrld course. Cross-listed in Music.</p>			
3956	Black Cultures and Classical Education	U	3
<p>Study the role of classics in African and the African Diaspora (US, Caribbean, Brazil). Major themes include: adaptations of classical literature, impact of classical education, classics as a tool of colonial oppression, classics as a tool of anti-colonial resistance, theories of race, classical and classifying depictions of black bodies. Prereq: Not open to students with credit for Clas 3956. Cross-listed in Clas. GE lit course. GE diversity global studies course.</p>			
4193	Individual Studies	U	1 - 6
<p>Exploration of relevant subject as individually designed by student and professor. Prereq: Permission of instructor, and permission of dept chair. Repeatable to a maximum of 6 cr hrs and 2 completions. This course is graded S/U.</p>			
4250	African Politics	U	3
<p>An introductory survey of Sub-Saharan African politics from the pre-colonial period to the contemporary era. It will examine the common themes, issues, and trends that shape politics and development across forty-nine countries. Students will gain an understanding of how context shapes political behavior and how historical and political forces have influenced African politics. Prereq: Not open to students with credit for PolitSc 4597.02 (Au13, African Politics), 4250, or 4250H. GE soc sci orgs and politics and diversity global studies course. Cross-listed in PolitSc.</p>			
4326	Topics in African Americans and Public Policy	U	3
<p>Examination of the impact of public policies on African American communities in the U.S. from the New Deal's Welfare State policies and programs of the 1930s to the present. Prereq: Not open to students with credit for 326.</p>			
4342	Religion, Meaning, and Knowledge in Africa and its Diaspora	U	3
<p>While the practice of religion in Africa is as diverse as its people, three major belief systems define the practice: African Traditional Religion, Islam, and Christianity. This course will examine classical and contemporary definitions of African Traditional Religion/s and the introduction and adaptations of Islam and Christianity in Africa, as well as religious practices in the African Diaspora. Prereq: Not open to students with credit for RelStds 4342. GE cultures and ideas and diversity global studies course. GE theme traditions, cultures, and transformations course. Cross-listed in RelStds.</p>			
4504	Black Politics	U	3
<p>Economic, political, and social constraints on the development of black political power: the efforts made by black people in recent times to organize for effective political action. Prereq: Not open to students with credit for 504 or PolitSc 4140 (504). Cross-listed in PolitSc 4140.</p>			
4535	Topics in Black Masculinity	U	3
<p>A theoretical analysis of constructions, perceptions, and performances of black masculinity locally and globally.</p>			
4551	Topics in Africana Literature	U	3
<p>Topics selected will relate to varying issues in the literatures of the Africa and the African Diaspora. Prereq: 2251, 2281, or English 2281. Not open to students with credit for 551. GE lit and diversity global studies course.</p>			
4565	Topics in African Diaspora Studies	U	3
<p>Selected topics which examine the origins, dimensions, and dynamics of the African Diaspora; topics vary each term. Prereq: 3310. Not open to students with credit for 565. Repeatable to a maximum of 9 cr hrs.</p>			
4571	Black Visual Culture and Popular Media	U	3
<p>An examination of African Americans in visual culture and the theories of representation in popular media. GE VPA and diversity soc div in the US course. GE theme traditions, cultures, and transformations course.</p>			
4582	Special Topics in African-American Literature	U	3
<p>Focuses on themes in African American Literature. Topic varies. Examples: Neo-slave narratives; the Harlem Renaissance; literature by African-American women. Prereq: English 2367.01 (367.01), or equiv, and 10 qtr cr hrs, or 6 sem cr hrs or hours of English at 2000-3000 level, or permission of instructor. Not open to students with 10 qtr cr hrs or 6 sem cr hrs for 4582 (582) or Eng 4582 (582). Repeatable to a maximum of 6 cr hrs. Cross-listed in English.</p>			
4610	African Americans and the Law	U	3
<p>This is an interdisciplinary course that puts major legal cases affecting African Americans into conversation with their historical underpinnings, as well as the social contexts and how those contexts manifest in African American cultural productions. A central goal of the course is to interrogate the idea of a "colorblind" justice system. GE theme citizenship for div and just wrld course.</p>			

8 African American and African Studies

4921 Intersections: Approaches to Theorizing Difference U 3

Examines intersections of race, ethnicity, and gender diversity in various sites within American culture (e.g., legal system, civil rights discourse, social justice movements). Prereq: One course in CompStd, WGSSt, or AfAmASt. Not open to students with credit for CompStd 4921 or WGSSt 4921. GE theme citizenship for div and just wrld course. Cross-listed in CompStd and WGSSt.

4998 Senior Research Seminar U 3

A seminar designed to provide experience in the creation of a research paper based on appropriate humanities and social science methodologies. Research topic to be announced. Prereq: 2101, 3310, and two 4000- or 5000-level courses; or permission of instructor.

4999 Thesis Research U 1 - 6

A program of individual study for undergraduate students: may include individual conferences and reports; requires presentation and oral defense of a thesis. Prereq: Sr standing. This course is graded S/U.

4999H Honors Thesis Research U 1 - 3

A program of individual study for undergraduate honors students: may include individual conferences and reports; requires presentation and oral defense of an honors thesis. Prereq: Honors standing, and 24 cr hrs taken in the Social and Behavioral Sciences and/or Humanities (including 12 hours in AfAmASt), and Sr standing. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

5189S Community Development: Field Research and Seminar U G 3 - 6

A service-learning course that draws on the principles of experiential learning by immersing students in an organized service activity that meets identified community needs. Prereq: 1101 or 2101, and permission of course coordinator. Repeatable to a maximum of 6 cr hrs or 2 completions.

5193 Individual Studies U G 1 - 3

Individual reading or research projects by special agreement between instructor and student. Prereq: 12 cr hrs in AfAmASt, permission of instructor, and permission of department chair. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

5194 Group Studies U G 1 - 3

Group studies. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.

5240 Race and Public Policy in the United States U G 3

This course explores Race and Public Policy in the United States from Reconstruction to the present. In particular, the class is designed to look at the long list of "hot topics" in the current policy landscape, including policing, housing, wealth gap, immigration, voting, political representation, and others. Prereq: Jr, Sr, or Grad standing; or permission of instructor. Not open to students with credit for CompStd 5240 or PubAfrs 5240. Cross-listed in CompStd and PubAfrs.

5650 Blackness and the Body in Science and Medicine U G 3

This course considers the need for and pursuit of social justice when black bodies are subjected to commodification and systemic subordination. The course focuses on what Frantz Fanon called the "corporeal schema" of blackness as well as the social construction of blackness to think about the relationship between black bodies and social justice pursuits in medicine and science. GE theme health and well-being course.

5681 Black Art in America: Arts and Cultural Policies from Reconstruction to Afrofuturism U G 3

This course takes a unique approach in how arts management, arts entrepreneurship, cultural production, and cultural organizations are studied. This is done by looking at the decisions made, and practices and policies employed, by Black Americans in the arts throughout the complex, and often problematic, history of the United States. Prereq: Not open to students with credit for ArtEduc 5681. Cross-listed in ArtEduc.

5798.03 Study Tour: Brazil U G 3

Consists of a two-week educational Study Trip that combines formal lectures by local scholars with visits to local cultural and historical institutions as well as travel within Brazil, the host Latin American country. Prereq: 5485.03. GE education abroad course.

5798.04 Study Abroad in Africa and the Diaspora U G 3 - 9

A study tour of Africa and the Diaspora. Students will pay all travel and subsistence costs. Successful application to eligible study abroad program required. Repeatable to a maximum of 12 cr hrs or 2 completions.

6194 Graduate Group Studies G 3

Group studies. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.

6757.01 Introduction to Graduate Studies in African American Literature, 1746 to 1900 G 3

A survey of creative texts and critical interpretations representing and reflecting black culture and literary expression in the United States from 1746 to 1900s. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 757.01 or English 6757.01 (757.01). Cross-listed in English.

6757.02 Introduction to Graduate Studies in African American Literature, 1900 to Present G 3

A survey of creative texts and critical interpretations representing and reflecting black culture and literary expression in the United States from 1900 to the present. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 757.02 or English 6757.02 (757.02). Cross-listed in English.

6999 Master's Thesis Research G 1 - 12

Research for master's thesis. Prereq: Permission of instructor. Not open to students with credit for 998. This course is graded S/U.

7086 The Civil Rights and Black Power Movements G 1 - 6

Examines the origins, evolution, and outcomes of the African American freedom struggle, focusing on the Civil Rights and Black Power movements. Prereq: Grad standing. Repeatable to a maximum of 15 cr hrs or 5 completions. Cross-listed in History.

7087 Black Women in the United States G 1 - 6

A study of historical and related scholarship on the history and experience of black women in the United States. Prereq: Grad standing. Repeatable to a maximum of 15 cr hrs or 5 completions. Cross-listed in History.

7303 Comparative History of the African Diaspora and Post-Emancipation, Colonial, & Post-Colonial Reality G 3

Examination of social, political, and cultural developments and realities in the black world, from the period of the emancipation to the beginning of the 21st century. Prereq: Grad standing. Repeatable to a maximum of 15 cr hrs. Cross-listed in History.

7420 African Historiography and Methodology G 3

The study of sources, research methods, interpretations, and research trends in the field of African history. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs. Cross-listed in History.

7507 Black Lives Matter: Law and Culture G 3

This course examines law as a site that has defined both blackness and humanness in relationship to African Americans. It also explores black culture to understand various responses to injustice. Prereq: Not open to students with credit for Law 7507. Cross-listed in Law.

7580 Enslavement, Emancipation, Colonial and Post-Colonial Realities G 3

History and evolution of the African Diaspora worldwide, from ancient times to the present. Examination of social, political and cultural developments and realities in the Black world. Prereq: Grad standing, or permission of instructor.

7730 Black Political Movements and Organizations G 3

Analysis of Black political movements and organizations from slavery to contemporary times. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 730.

7751 Introduction to Graduate Studies and African Literature G 3

A broad survey of the development of African literature, its variations, genres, and themes. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 751.

7753 Graduate Survey in African-American and African Studies G 3

Critical analysis of the development of African-American and African Studies as a discipline and the theoretical approaches to its subject matter. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 753.

7754 Methodological Perspectives in African-American and African Studies G 3

A critical and trans-disciplinary examination of methodological approaches employed in the study of the Black experience in its convergent and divergent manifestations across the world. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 754.

7756 Theorizing Race and Ethnicity G 3

Examination of the ideas and theories of race and its intersection with ethnicity. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 756.

7759 Topics in African Diaspora Studies G 3

A multi-disciplinary and critical examination of the origins dimensions and legacies of the African Diaspora. Topics will vary each term. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 12 cr hrs.

7760 African Pop Culture G 3

Examination and critique of various theories and genres of popular culture as they relate to the African situation. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 760.

7810 Topics in Black Feminist Theory G 3

Theoretical analysis of the politics and perceptions of womanhood in the black community. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 810.

8193 Advanced Individual Studies G 1 - 12

Advanced individual reading or research projects by special agreement between instructor and student. Prereq: Permission of instructor. This course is graded S/U.

8350	Transnational History of the African World	G	3
Starts from the premise that the African world no longer includes only the continent of Africa, but also the spaces and cultures populated by peoples of African descent. Prereq: Grad standing.			
8865	Race, Gender, and Class in the Diaspora	G	3
An examination of the core influences of race, gender, and class on people of African descent. Prereq: 9 cr hrs taken in Social/Behavioral Sciences, or permission of the instructor. Not open to students with credit for 865.			
8998	Research in African-American and African Studies: Candidacy Exams	G	1 - 12
Research for candidacy exams. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
8999	Dissertation Research and Writing	G	1 - 3
Dissertation research and writing. Repeatable to a maximum of 36 cr hrs or 12 completions. This course is graded S/U.			

Agricultural Communication

2130	Visual Media in Agricultural and Natural Resources	U	3
Prepares students to be proficient in photography, photo and video editing, and image composition techniques used in the agricultural and natural resource communications fields. Course includes at least one off-campus field trip.			
2193	Individual Studies	U	1 - 3
Planning, conducting, and reporting a special study appropriate to the needs of the student. Prereq: GPA 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
2194	Group Studies	U	1 - 3
Group studies for students in specialized programs. Prereq: Permission of instructor. This course is graded S/U.			
2330	Public Perceptions of Agricultural and Environmental Issues	U	4
Students will explore vital issues in food, agricultural, and environmental sciences and be exposed to methods to critically evaluate, effectively communicate, and influence decisions made about these issues. They will engage with issue stakeholders and investigate the impacts that their varying perceptions have on the food system, the environment, and society. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme lived environments course.			
2367	Agricultural Issues in Contemporary Society	U	3
This course helps students develop a critical understanding of agricultural, environmental and related issues facing the United States and the world while improving their writing skills. Prereq: English 1100.01. GE writing and comm: level 2 course.			
2531	Introduction to Agricultural Communication Practices	U	3
This course provides an introduction to the field of agricultural communication and examines how agricultural communication fits into the larger U.S. mass media system. This course will introduce the communication process, how media serves as a communication channel, and how agricultural communicators utilize media to reach a variety of audiences.			
3130	Oral Expression in Agriculture	U	3
An introductory public speaking course that will analyze the communication process and prepare students enrolled to write and deliver speeches for various occasions and purposes. Prereq: Not open to students with credit for 390.			
3488	Professional Development In Agricultural Communication	U	1 - 3
Developing Twenty-first Century skills through hands-on, contextual, and authentic, out-of-class experiences. Students, working individually with the instructor, will design and engage in developmental skill activities. An example is the Earl McMunn. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.			
3797	Agricultural Communication Study Abroad	U	3
Engages students in concentrated study of food, agricultural, and environmental issues in a foreign country, mass media practices in communicating and educating the public about these issues, and the impact of those practices.			
4130	Publication Design and Production	U	3
Introduces students to basic practices and techniques used in designing and producing professional-quality publications for agricultural and general audiences. Agricultural communicators will find application for these skills in a variety of ways.			
4191.01	Agricultural Communication Internship	U	2
The Agricultural Communication Internship is designed to give you first-hand experience working in a professional communication setting. Internships may be arranged in publishing, broadcasting, public relations, editing, photojournalism, graphic design or related areas. Regardless of the field, students should be actively involved in the production of information and communication services. Prereq: Permission of instructor. This course is graded S/U.			

4191.02	Agricultural Communication Advanced Internship	U	3
The Ag Comm Advanced Internship is designed to give you in-depth first-hand experience working in a professional communication setting beyond your initial internship experience. Internships may be arranged in publishing, broadcasting, public relations, editing, photojournalism, graphic design or related areas. Regardless of the field, students should be actively involved in comm. production. Prereq: Permission of instructor. This course is graded S/U.			
4194	Group Studies in Agricultural Communication	U	1 - 3
Selected topics in Agricultural Communication. Repeatable to a maximum of 10 cr hrs or 5 completions.			
4530	Communicating Agricultural Issues	U	3
This course is designed to introduce students to the world of communicating agricultural science to a variety of audiences. Many times the topics we are asked to write or speak on are complex science in nature and highly emotional. This course will walk you through the theories and skills needed to craft messages that can reach farmers, consumers, politicians, and the like. Prereq: 2330.			
4998	Undergraduate Research	U	1 - 10
Conducting and reporting an undergraduate research project. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.			
4999	Research with Distinction	U	1 - 3
Conducting and reporting research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the University's Denman Undergraduate Research Forum. Prereq: CPHR 3.00 or above, and GPA 3.00 or above in major, and permission of project supervisor. Not open to students with credit for 683H. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
4999H	Honors Research with Distinction	U	1 - 3
Conducting and reporting research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the University's Denman Undergraduate Research Forum. Prereq: Honors standing, and FAES 4590.01H (590.01H), and CPHR 3.4 or above, and GPA 3.4 or above in major, and permission of honors project supervisor. Not open to students with credit for 683H. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5130	Campaign Design and Management in Agricultural Organization	U G	3
This class is a public relations laboratory class designed to provide students with a how-to, hands-on, problem solving approach to campaign planning for effective public relations. Students will draw on public relations principals and their own experiences to design a real-life, client-centered campaign for a company or organization in Columbus. Prereq: Jr standing or above, and AgrComm major or minor, or ComLdr major; or permission of instructor.			
5135.01	Agricultural Feature Writing	U G	3
This writing-intensive course will introduce AgrComm students to magazine feature writing and provide them with a comprehensive set of skills in feature writing, editing, and style. Students will also assume roles as members of the staff of the AgriNaturalist, the student magazine for the College of Food, Agricultural, and Environmental Sciences. Prereq: 2531 and Comm 2321; or Comm 2221; or Grad standing; or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
5135.02	AgriNaturalist Practicum	U G	3
Provides AgrComm students with a comprehensive set of skills in magazine layout and design, sales, and multimedia journalism by creating print and online versions of the AgriNaturalist magazine. As members of the AgriNaturalist staff, students will gain knowledge of how print and online magazines are created, financed, and disseminated. Prereq: 4130, 5135.01, and 5530; or 5135.01, and Grad standing. Repeatable to a maximum of 6 cr hrs.			
5170	International Development Theory and Practice	U G	3
We will explore varying theoretical perspectives, trace the history and the ideological underpinnings embedded in it; analyze the actors and their internationalities; and review contemporary views on the subject. Prereq: Not open to students with credit for AEE 790.			
5190	Extension Education in Developing Countries	U G	3
What is extension and what are the problems, prospects and challenges facing extension in the developing world? The course provides an opportunity for students to explore issues related to extension in developing countries. Prereq: Not open to students with credit for AEE 790.			
5193	Individual Studies	U G	1 - 3
Students plan, conduct, and report on a special problem in agricultural communication not included in regular course work. Prereq: CPHR 2.50 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5194	Group Studies	U G	1 - 3
Selected topics in agricultural communication. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.			
5530	Advanced Agricultural Communication Technology	U G	3
Course is designed to further introduce students to practices and techniques used in computer-based electronic production when preparing informational and educational messages for public and student audiences in agriculture and natural resources. Prereq: Not open to students with credit for 350 or AEE 532.			

10 Agricultural Communication

5535 Data Visualization and Scientific Storytelling in FAES U G 3

Introduction to design principles and skills needed to clearly and effectively report research results and technical information in both academic and nonacademic communication contexts in food, agricultural, and environmental sciences. Prereq: Honors, Sr, or Grad standing; or permission of instructor.

5797 Study Abroad in Agricultural Communication U G 3

Engages undergraduate and graduate students in an international learning experience to address their academic and professional interests in agricultural communication. Course objectives and topics will vary based on the country explored and the focus of the experience.

Agricultural Communication, Education & Leadership

7000 Graduate Orientation Seminar G 1

Examination of scholarship in the discipline of agricultural and extension education. Discussion of trends and issues that are important in the disciplines and how trends may influence future career roles. Prereq: Not open to student with credit for 795.07. Repeatable to a maximum of 3 or hrs. This course is graded S/U.

7230 Strategic and Program Planning for Visionary Change G 3

Examination of strategic and program planning models in educational and community settings. Learn about the strategic and program planning process. Understand change and innovation processes in organizational settings. Prereq: Not open to students with credit for 723 and 823.

7300 Advanced Methods of Teaching G 3

Designed as advanced preparation for instruction in formal learning environments, this course focuses on skills, strategies and issues common to educators in general. It will introduce learners to literature and research relevant to practicing educators. Delivered online in an asynchronous format via Carmen, will allow for information transfer and connection.

7320 Adult Learning and Professional Development G 3

This course is designed to provide an introduction to adult learning and professional development to ensure effective programs and education with adult audiences. Prereq: Not open to students with credit for 622.

7420 Emerging Trends and Issues in Agricultural Communication, Education and Leadership G 2

Participants in this course will gain an understanding of global issues and trends facing contemporary agricultural and extension organizations, communication and leadership. Repeatable to a maximum of 4 or hrs.

7520 Human Development and Program Planning G 2

Course provide an introductory understanding of human development and why it is essential for planning programs to serve youth and adults in non-formal and formal education.

7700 Documenting Change through Evaluation and Accountability G 3

The key principles and practices used in evaluating the change resulting from educational programs and activities, and how that relates to programming accountability will be covered. Prereq: Not open to students with credit for 770.

7889 Workshop in Agricultural and Extension Education G 1 - 3

Intensive study of selected programs, practices, and skills with an emphasis on applications in agricultural and extension education. Prereq: Teaching or extension experience. Repeatable to a maximum of 18 or hrs or 18 completions.

8000 Leading Through Historical Perspectives G 2

This course will examine the mission, purpose, and historical foundations of Agricultural Communication, Education, and Leadership in America. Furthermore, this course will identify the historical trends and contemporary issues facing these professions in the 21st century.

8100 Applied Communication Theory and Practice G 3

A study of the theories and guiding concepts related to agricultural communication in applied and theoretical settings. Prereq: Grad standing. Not open to students with credit for 840.

8193 Individual Studies G 1 - 5

Planning, conducting, and reporting a special study appropriate to the needs of the individual student. Prereq: Permission of instructor. Repeatable to a maximum of 5 or hrs or 5 completions. This course is progress graded (S/U).

8200 Critical Perspectives in Leadership Development G 3

This course will cover the scholarly discipline of leadership theory, based upon critical social theories which are concerned with the flow of power in society, common sense assumptions of rules that govern our experiences, and the influence of social identities. In addition, students will apply theory to practice to address the real world leadership issues within their field.

8310 Theory of Learning and Cognition G 3

ACEL 8310 provides a framework for the theoretical development of cognitive skills, psychomotor principles, and teaching methods relevant to teaching agricultural content. Prereq: Grad standing, and enrollment in ACEL program; or permission of instructor.

8420 Leadership and Administration in Agricultural and Extension Education G 3

Focuses upon theories, concepts, and principles for leadership, administration, and management in communication, education, extension, and community settings. Prereq: Not open to students with credit for 795.03 or 842.

8855 Research Methods and Design G 3

This course is designed to establish a culture of scholarship among students enrolled in the Agricultural Communication, Education, and Leadership graduate program. This course provides an overview of different types of quantitative research methods and design, qualitative and mixed methods approaches, and the basics of interpreting statistics and rational research.

8877 Data Collection, Analysis & Interpretation G 3

A quantitative methods course in measurement, data collection and analysis related to social and behavioral science research. An applied approach is taken on instrumentation and analyzing data using descriptive and inferential statistics. Practical skills in data manipulation using SPSS are developed. Prereq: 8855 or equiv.

8998 Research in ACEL, PhD Pre-Candidacy G 1 - 12

Research for completed on special projects or as part of the dissertation, pre-candidacy. Research may take place in on or off-campus locations at The Ohio State University in Columbus or other associated research areas as determined by student and instructor. Research may include quantitative, qualitative, mixed methods, experimental, or other social science studies that contributes to ACEL. Prereq: PhD Grad standing in ACEL. Repeatable to a maximum of 20 or hrs or 12 completions. This course is graded S/U.

8999 Research in ACEL, PhD Post-Candidacy G 1 - 12

Research for dissertation purposes only. Research may take place in on or off-campus locations at The Ohio State University in Columbus or other associated research areas as determined by student and instructor. Research may include quantitative, qualitative, mixed methods, experimental, or other social science studies that contributes to the discipline of ACEL. Candidacy exam completion required. Prereq: PhD Grad standing in ACEL. Repeatable to a maximum of 20 or hrs or 12 completions. This course is progress graded (S/U).

Agricultural Systems Management

1100 Exploring Agricultural Systems Management U ½

Basic understanding of the global trends within agricultural systems management, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development.

2193 Individual Studies U 1 - 3

Introductory individual study of problems and topics not included in regular Agricultural Systems Management courses. Prereq: CPHR 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.

2194 Group Studies U 1 - 5

Introductory group study of selected topics in Agricultural Systems Management Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 4 completions.

2240 Basic Metal Fabrication for Agriculture U 3

A study of the principles and practices in basic metal fabrication using the current metallurgical and welding processes required in the agricultural industry. Prereq: AgSysMt 1100 and FAES 1100 (100), or one of the other university survey courses. Not open to students with credit for AgSysMgt 240 or ConSysM 2240 (ConSysMt 240). This course is available for EM credit.

2241 Building Materials and Construction in Agriculture U 3

Principles and techniques used in the fabrication of wood, concrete, and masonry materials used in agri-business and agricultural applications. Prereq: Not open to students with credit for AgSysMgt 241 or ConSysM 2241 (ConSysMt 241).

2305 Professional Development I U 2

Business communications and professional development in agricultural systems management including job search strategies, informative and persuasive writing, academic planning, collaboration, project documentation and reporting, and presentations. Prereq: English 1110. Not open to students with credit for ConSysM 2305. This course is available for EM credit.

2310 Electrical Power for Agricultural and Residential Applications U 2

Concepts of electricity applied to the planning and specification of systems and components essential for generation, distribution and control of electricity for power, heat, motors and illumination in residences and agricultural structures. Prereq: Math 1130, 1148, 1149, 1150, or 1151. Not open to students with ConSysM 2310. This course is available for EM credit.

2370 Environmental Hydrology U 2

Principles of hydrology applied to agricultural and forest watersheds, including applications in drainage, erosion, irrigation, water supply and water quality. Prereq: Not open to students with credit for AgSysMgt 370. This course is available for EM credit.

2371 Land Surveying for Agricultural and Environmental Systems U 2

Principles of land surveying applied to soil and water management on agricultural, forested, and environmentally sensitive areas. Traditional surveying methods, total stations and GPS will be covered. Prereq: Math 1148 (148), or permission of instructor. Concur: Physics 1103 (103), 1200 (111), or 1250 (131). Not open to students with credit for AgSysMgt 371. This course is available for EM credit.

2580 Introduction to Digital Agriculture U 2

An introduction to digital agriculture and the data acquisition and data management systems, analytical tools, machinery systems and crop, animal and environmental models utilized in this rapidly evolving field to enhance the profitability and sustainability of agricultural crop and livestock production systems.

Agricultural Systems Management 11

3191	Internship in Agricultural Systems Management	U	2
A pre-approved internship of planned and supervised work experiences which provide professional and technical growth in the agricultural industry. Prereq: AgSysMt 2305 (AgSysMgt 305), and enrollment in AgSysMt major, and 8 cr hrs in AgSysMgt, and permission of internship coordinator. Not open to students with credit for AgSysMgt 489.			
3232	Engines and Power Transmission	U	3
Principles of engine theory, operation, maintenance, and repair. In addition, alternative fuels, engine design and basic power transmission will be explored. Prereq: Math 1130 (130) or 1148 (148), and Physics 1103 (103), 1200 (111), or 1250 (131); or enrollment in Sustainable Plant Systems major or Landscape Construction minor. Not open to students with credit for AgSysMgt 232. This course is available for EM credit.			
3320	Facilities for Agricultural and Greenhouse Production	U	3
Building and equipment design for livestock, crop and greenhouse production; selection and specification of construction materials and ventilation systems. Prereq: Math 1148 (148), and Physics 1103 (103), 1200 (111), or 1250 (131). Not open to students with credit for AgSysMgt 320.			
3330	Grain Handling, Drying, and Milling	U	3
Principles of handling, drying, storing, and milling grain. Grain handling equipment will include grain pits, conveyors, augers, bucket elevator, and hazard monitoring. Drying and storage will include dryeration, in-bin counterflow drying, batch and continuous flow systems. Dry milling principles will include methods, applications, and parameters such as separation of particle size by sieve. Prereq: Math 1130, 1131, 1148, 1149, 1150, or 1151.			
3360	Agricultural Machinery Management	U	3
Basic principles of operation, selection and management of agricultural machinery, including power requirements, performance evaluation, calibration, adjustment, costs of operation and optimum size. Prereq: Math 1148 (148), or permission of instructor. Not open to students with credit for AgSysMgt 360.			
3400	Food Supply-Chain Equipment Operations	U	2
The focus of this course is description of equipment used throughout the food supply chain from harvest/assembly to preparation for consumption. After completing this course, students will recognize how equipment systems are assembled within a facility and the role of sensing and control systems in operation of facilities for handling, manufacturing, storage, distribution and preparation of foods. Cross-listed in FdScTe.			
3550	Animal and Rural Waste Management	U	2
Management of animal wastes, wastewater and solid waste generated through agricultural practices and rural living to utilize nutrients, recover energy, reuse water, protect public health and abate environmental pollution. Prereq: Not open to students with credit for AgSysMgt 550.			
4193	Individual Studies	U	1 - 3
Advanced individual study of problems and topics not included in regular Agricultural Systems Management courses. Prereq: CPHR 2.5 or above, and permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
4194	Group Studies	U	1 - 5
Advanced group studies of selected topics in Agricultural Systems Management. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
4300	Engineering Applications in Agriculture	U	4
Engineering and technology applications essential to the operation, selection and management of the processes, machinery, structures, soil and water, and materials handling systems in agriculture. Prereq: Math 1130 (130) or 1148 (148). Not open to students with credit for 301 or students enrolled in AgSysMt or Eng.			
4560	Fluid Power and Electronics in Agricultural Machinery	U	3
Principles of operation, maintenance, and selection of basic fluid power, electrohydraulic, electronic and computer controlled systems found on agricultural and construction machinery. Prereq: AgSysMt 2310 (AgSysMgt 310) and 3360 (360). Not open to students with credit for AgSysMgt 560.			
4575	Applied Agricultural Water Management	U	2
Planning and managing the drainage, irrigation, erosion and sediment control, water harvesting and storage systems and agricultural constructed wetlands for the agricultural landscape. Prereq: AgSysMt 2370 (AgSysMgt 370) and 2371 (371), or ConSysM 2440 (ConSysMt 440); and ENR 3000 (300.01); or permission of instructor. Not open to students with credit for AgSysMgt 575.			
4580	Precision Agriculture	U	2
Introduction to the principles and technologies of precision agriculture including: Global Positioning System (GPS), guidance systems, plant and soil sensors, soil sampling, yield mapping and related technologies. Prereq: Not open to students with credit for AgSysMgt 580.			
4605	Professional Development II	U	1
Developing and pursuing career plans; strategies and programs for employment in the agricultural industry, professional development, personal growth, and relationships. Prereq: 2305 (AgSysMgt 305), 3360 (AgSysMgt 360), and AgrComm 3130 (390) or Comm 2110 (321), and any second writing course numbered 2367 (367). Not open to students with credit for AgSysMgt 605.			

4900	Capstone in Agricultural Systems Management I	U	2
The course is designed to prepare students on how to work with customers/sponsors/industry mentors to identify the need (problem), begin the steps to develop plausible solutions, develop a scope of work (action plan), and to assemble their findings into a proposal (Preparation for project implementation that will take place the following spring in AgSysMt 4910). Prereq: Jr or Sr standing, and enrollment in AgSysMt major; or permission of instructor (scheduled to graduate in the next three semesters).			
4910	Capstone II - Project Implementation	U	2
Building upon prior knowledge and experiences gained through the major, students will develop plausible solution(s) to a real-world problem that relates directly to student's interests and general area of study. Prereq: 4900.			
4998	Undergraduate Research	U	1 - 3
Supervised undergraduate research on various topics. Prereq: CPHR 2.5 or above and permission of the instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
4999	Research with Distinction	U	1 - 3
Conducting and reporting research with Distinction. Students are expected to participate in the CFAES Undergraduate Research and the Denman University Undergraduate Research Forums. Prereq: CPHR 3.0 or above, and major GPA 3.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is progress graded (S/U).			
4999H	Honors Research with Distinction	U	1 - 3
Conducting and reporting Honors research with Distinction. Students are expected to participate in the CFAES Undergraduate Research and the Denman University Undergraduate Research Forums. Prereq: Honors standing, and FAES 4590.01H (590H), and GPA 3.4 or above, and major GPA 3.4 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5560	UAS and Remote Sensing in Agriculture	U G	3
Introduction to the fundamentals of remote sensing within the framework of Geographic Information System, and Unmanned Aerial Systems (UAS), and their applications in production agriculture. Topics include remote sensing technologies, FAA regulations and rulemaking, UAS types, mission planning, image collection, processing and interpretation, and their applications in agriculture. Prereq: HCS 2260, AnimSci 2260, ENR 2000, AEDEcon 2005, ComLdr 3537, or Stat 1450; and Sr or Grad standing; or permission of instructor. Not open to students with credit for 3580.			
5580	Data Analytics in Production Agriculture	U G	3
An overview of the principles of data management and analytics in support of field crop production. Lecture topics include: data generation and collection methods, and modeling, actionable spatial and temporal management recommendations at the sub-field level. Laboratory exercises include: broad overview and introduction to R, and its use in common data analyses in production agriculture. Prereq: 3580 or 4580, and ComLdr 3537 or AnimSci 2260 or HCS 2260 or ENR 2000 or AEDEcon 2005; or Grad Standing; or permission of instructor.			
5600	Agricultural Safety and Health	U G	3
Develops the knowledge, awareness and attitude necessary to becoming an effective safety manager in a non-traditional occupational environment. Includes hazard identification and mitigation; safety education, engineering, and enforcement strategies. Prereq: Not open to students with credit for AgSysMgt 600.			
5786	Environmental Issues in East Asia	U G	3
STEM students will study emerging, interdisciplinary environmental issues in China, Korea, Japan, Taiwan and Hong Kong, such as air and water pollution, waste management, habitat destruction, exotic species, and energy. Prereq: Enrollment in a Science, Technology, Engineering or Math (STEM) discipline, and Jr, Sr, or Grad Standing.			
7786	Introduction to Graduate - Level East Asian Studies	G	1
This interdisciplinary course is a combination of student explorations of scholarly work in East Asia and subjects in these cultures. Readings and presentations on the impact of STEM in agriculture and environment on the cultures in East Asia. Students participate in group discussions of student research and professionalism. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			

Agricultural, Environmental, and Dev Economics

1100	Exploring Agribusiness and Applied Economics	U	½
Basic understanding of the global trends within agribusiness and applied economics, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development.			
1200	Exploring Sustainability: SUSTAINS LC Seminar	U	1
Designed for SUSTAINS Learning Community students to explore their interests within sustainability, learn about opportunities to be involved in campus and local community sustainability efforts, and connect with campus partners and faculty working and researching in the field. Students must be a part of the SUSTAINS Learning Community in order to take this seminar. Prereq: Must be in the SUSTAINS Learning Community. This course is graded S/U. Cross-listed in ENR.			

12 Agricultural, Environmental, and Dev Economics

2001	Principles of Food and Resource Economics	U	3		3104	Farm Business Management	U	3
	Microeconomic principles applied to allocation issues in the production, distribution, and consumption of food and natural resource use. Prereq: Not open to students with credit for 2001H or Econ 2001. This course is available for EM credit. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.					Analysis of resource control and detailed application of economic and management principles to the organization, operation, and administration of farm businesses. Prereq: 3101 (401). Not open to students with credit for 410.		
2001H	Principles of Food and Resource Economics	U	3		3105	Principles of Agribusiness and Food Supply Chains	U	3
	Microeconomic principles applied to allocation issues in the production, distribution, and consumption of food and natural resource use. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 2001 (200), Econ 2001 (200), or 2001H (200H). GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course. SS Admis Cond course.					Study of the actors, intrinsic issues and support systems that are essential to make agribusiness, commodity and food supply chains effective. Prereq: 2001 or Econ 2001.		
2005	Data Analysis for Agribusiness and Applied Economics	U	3		3114	Commodity Futures and Options Markets	U	3
	Introductory course in data analysis, stressing computer applications of probability and statistics, problems of data gathering, presentation, and interpretation in economics and business. Prereq: Math 1130 (130) or 1131 (131) or 1148 (148) or 1150 (150) or 1151.01 (151.01) or 1151.02 (151.02) or 1156 (151.03). Not open to students with credit for 2005 (205) or ComLdr 3537 (AgrEduc 387 or AEE 387) or HCS 2260 (260) or AnimSci 2260 (260) or Stat 1430 (133) or 1450 (145). GE data anyl course. GE foundation math and quant reasoning or data anyl course.					This course covers the relevant aspects of the futures and options and underlying cash markets focusing mostly on physical commodities but also on financial instruments such as treasuries and equity securities. Prereq: 2001 or Econ 2001.01 or 2001.03H.		
2105	Managerial Records and Analysis	U	3		3121	Salesmanship in Agribusiness and Agriculture	U	3
	Nature and need for business records, analysis and interpretation of essential records from manager/owner viewpoint; their use in small business practices. Prereq: 2001 or 2001H or Econ 2001.01, 2001.02, or 2001.03H. Not open to students with credit for AcctMIS 2200 or 2300.					Principles and techniques of selling to agribusiness buyers. Prereq: Not open to students with credit for BusTec 2232T.		
2400	Diversity in the Workplace: Challenges and Opportunities	U	3		3124	Grain Merchandising	U	3
	The purpose of this course is to examine how and why diversity affects interpersonal and intergroup interactions in organizations, to develop an understanding of what diversity means, and to explore contemporary organizational strategies for managing workplace diversity while working to better understand what we as individuals bring to the dynamic. GE diversity soc div in the US course.					Students will learn the principles and practices involved in grain and feed marketing and the theory of grain pricing through the economics of agricultural markets. Prereq: Math 1130 or 1148. Prereq or concur: AEEcon 3113 or 3114.		
2500	Introduction to Sustainability	U	3		3131	Advanced Sales Techniques and Practice	U	2
	Introduces students to principles from various disciplines related to social, economic and environmental sustainability. Students will evaluate key concepts and examine tradeoffs that are a part of sustainability action using case studies representing diverse perspectives. Prereq: Soph standing, or permission of instructor. Cross-listed in ENR.					Expands on basic sales principles with additional emphasis on required skills to establish long term customer-client relationships in today's business context. Prereq: 3121.		
2501	Introduction to Sustainability	U	4		3142	Agricultural Cooperatives	U	3
	Introduces students to principles from various disciplines related to social, economic and environmental sustainability. Students will evaluate key concepts and examine tradeoffs that are a part of sustainability action using case studies representing diverse perspectives. Team-taught course with faculty member in ENR. Prereq: Not open to students with credit for 2500, ENR 2500, or ENR 2501. GE theme sustainability course. Cross-listed in ENR.					Cooperatives are jointly owned, democratically controlled enterprises that present an alternative model for doing business compared to investor-owned structures. This course will explore the basic principles and operations of cooperatives compared to other business structures with a focus on cooperatives in food, agriculture, and rural communities. Prereq: 2001 or 2001H or Econ 2001 or Econ 2001H.		
2501E	Introduction to Sustainability	U	4		3160	Human Resource Management in Small Businesses	U	3
	Introduces students to principles from various disciplines related to social, economic and environmental sustainability. Students will evaluate key concepts and examine tradeoffs that are a part of sustainability action using case studies representing diverse perspectives. Team-taught course with faculty member in ENR. Prereq: Honors standing; and Soph standing, or permission of instructor. Not open to students with credit for ENR 2501E, ENR/AEEcon 2501, or ENR/AEEcon 2500. GE theme sustainability course. Cross-listed in ENR.					Students will gain an understanding of the human resource management function in the context of the small business. Emphasis is placed on strategies employed by small business owners to address shifts in workforce demographics, professional expectations, legal requirements, and contemporary workforce issues. Prereq: Jr standing.		
2580	Feast or Famine: The Global Business of Food	U	3		3170	Agribusiness Law	U	3
	Global and regional trends in food consumption and production are surveyed. Trade, technological change, and other responses to food scarcity are analyzed. Prereq: Not open to students with credit for 280 or 335 or IntStds 2580 (280). GE soc sci human, nat, and econ resources and diversity global studies course. Cross-listed in IntStds.					A study of the legal system and selected areas of law that affect agricultural types of businesses, including civil liabilities, property law, business law and regulatory law. Prereq: 2001 (200), 2001H (200H), Econ 2001 (200), or 2001H (201H). Not open to students with credit for 470 or 670.		
3000	Quantitative Methods in Agribusiness and Applied Economics	U	3		3191	Internship in Agribusiness and Applied Economics	U	2
	Solutions to problems in agribusiness and applied economics. Prereq: 2001 or Econ 2001; and Math 1130, 1131, 1148, 1150, or 1151.					Supervised experience with an approved firm or organization; pre-approved proposal and report or presentation are required. Prereq: 3101, 3102, 3103, 4001, or Econ 4001, and enrollment in department major, and permission of instructor. Prereq or concur: FAES 3191. This course is graded S/U.		
3101	Principles of Agribusiness Management	U	3		3300	Emerging Issues in Agribusiness and Applied Economics	U	3
	Introduction to agribusiness management principles and skills in the context of the four functions of management: planning, organizing, directing, and controlling. Prereq: 2001 (200) or 2001H (201H) or Econ 2001 (200) or 2001H (200H). Not open to students with credit for 401.					This course familiarizes students with emerging domestic and international issues relevant to professionals in agribusiness through the lens of applied economics, while improving their teamwork and communications skills. Prereq: Jr standing.		
3102	Principles of Agribusiness Marketing	U	3		3488	Professional Development in Agribusiness and Applied Economics	U	1 - 2
	Study of specific problems of marketing food and fiber products with emphasis on structures and institutions facing agribusinesses in domestic and international markets. Prereq: 2001 (200), 2001H (200H), Econ 2001 (200), or 2001H (201H). Not open to students with credit for 402.					Participation in structured co-curricular programs leading to professional development. Prereq: CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
3103	Principles of Agribusiness Finance	U	3		3680	Regional Economics and Sustainable Growth	U	3
	Financial management of agribusinesses: financial system, time value of money, security valuation, capital budgeting, capital structure, portfolio analysis, financial institutions, futures and options contracts. Prereq: 2001 (200), 2001H (200H), Econ 2001 (200), or 2001H (201H); and AEEcon 2105 (412) or AcctMIS 2200 (211); and AEEcon 2005 (205), AEE 387, AnimSci 2260 (260), ComLdr 3537, HCS 2260 (260), Stat 1430 (133), or 1450 (145). Not open to students with credit for 403.					Designed to study theories and methodologies for analyzing rural and regional economic development, primarily in advanced economies. Prereq: 2001 (200), or equiv course in Microeconomics.		
					4001	Managerial Economics for Agribusiness	U	3
						Application of economic theory and methods to agribusiness decision making. Prereq: 3000, and 2001 or 2001H or Econ 2001 or 2001H.		
					4002.01	Analytics for Agribusiness and Applied Economics	U	3
						Students will be introduced to and gain experience with quantitative statistical models and related analytical methods and their application to food, agricultural, and environmental systems. There is an emphasis on real world application and presentation of the results. Prereq or concur: 4001 or Econ 4001.02.		
					4002.02	Operations Research in Agribusiness and Applied Economics	U	2
						Quantitative models and methods and their application to agricultural, environmental, and development economics and agribusiness. Prereq: 2005 (205), ComLdr 3537 (AEE 387), HCS 2260 (260), AnimSci 2260 (260), Stat 1145 (145), or 1430 (133); and AEEcon 2001 (200) or 2001H (200H) or Econ 2001 (200) or 2001H (201H); and Math 1131 (131 [wi 03 or thereafter]) or 1132 (132) or 1151.01 (151.01) or 1152.01 (152.01). Prereq or concur: 4002.01, or Econ 4001 (500) and 4001.02 (501.02). Not open to students with credit for 502.		

Agricultural, Environmental, and Dev Economics 13

<p>4003 Economics of Public Policy Analysis U 3</p> <p>Understanding of economic tools and concepts for analyzing public policies important to the food industry, agriculture and natural resources. Prereq: 2001 or 2001H or Econ 2001 or 2001H; and AEDEcon 3000. Prereq or concur: 4001 or Econ 4001.02.</p>	<p>4535 International Economic Development U 3</p> <p>Study of the growth and diversification of developing economies and the causes of poverty and inequality. Analyze the impacts of human capital formation, markets, and public policy on development. Prereq: 2001 (200) or Econ 2001 (200). Not open to students with credit for 435 or 535, or IntStds 4535 (535) or 435, or PubAfrs 4535. Cross-listed in IntStds and PubAfrs.</p>
<p>4100 Self-employment and Entrepreneurship in the Food, Agriculture, and Resource Sectors U 3</p> <p>This course analyzes self-employment patterns in the food, agricultural, and resource sectors and considers the role of entrepreneurship in forming and reshaping business and social enterprises in these sectors. Prereq: 2001 or Econ 2001.</p>	<p>4537 Middle Eastern Economic Development U 3</p> <p>Introduction to current economic issues facing and similarities and differences in Middle Eastern countries' growth, inflation, unemployment, fiscal and monetary policy, imports, exports, foreign debt and exchange rate policy. Prereq: 2001 (200) or Econ 2001 (200). Not open to students with credit for 437 or 4537 (537), or Econ 4537 (537), or IntStds 437 or 4537 (537). Cross-listed in Econ and IntStds.</p>
<p>4104 Agribusiness Finance Applications U 3</p> <p>The course covers financial concepts such as financial statements, time value of money, and capital budgeting as they apply to farm businesses and agribusinesses. Real life examples and in-course exercises are used including farm financial statements, farmland valuation, and credit evaluation for farm loans. Prereq: 3103, or permission of instructor.</p>	<p>4540 International Commerce and the World Economy U 3</p> <p>Application of trade theory and policies to world trade that impacts global business. Prereq: 2001 (200) or 2001H (200H), or Econ 2001 (200) or 2001H (200H), or permission of instructor. Not open to students with credit for 540 or IntStds 4540 (540). Cross-listed in IntStds.</p>
<p>4106 Strategic Management U 3</p> <p>Experiential learning and managerial economics applied to strategic management in agribusiness. Formulate managerial strategies in a competitive environment constrained by the firm's products, internal resources, market segments, and supply chains. Prereq: 3101 (401), 3103 (403), and 4001 (500), and a second writing course. Not open to students with credit for 601.</p>	<p>4567 Assessing Sustainability: Project Experience U 3</p> <p>Students gain experience in sustainability assessment by applying concepts and quantitative methods to evaluate environmental, economic, social & technical sustainability of specific projects. EEDS major capstone. Co-taught by ENR/AEDE faculty. Prereq: 2500 or ENR 2500, and Sr standing; or permission of instructor. Not open to students with credit for ENR 4567. Cross-listed in ENR.</p>
<p>4191 EEDS Professional Practice in Agricultural, Environmental, and Development Economics U 2</p> <p>Preparation of a written report and delivery of a presentation based on internship employment in sustainability-based professions. Prereq: Not open to students with 2 completions or 4 credits of ENR 4191 or 689 or AEDEcon 4191. This course is graded S/U.</p>	<p>4597.01 Food, Population, and the Environment U 3</p> <p>Issues related to world-wide population increases, food production, and associated environmental stress; policy options for lessening these concerns, especially in low-income countries. Prereq: Jr or Sr standing. Not open to students with credit for 597.01, 4597.01H (597.01H), IntStds 4597.01 (597.01), or 4597.01H (597.01H). GE cross-disciplinary seminar course. Cross-listed in IntStds.</p>
<p>4193 Individual Studies in Agribusiness and Applied Economics U 2-3</p> <p>Planning, conducting, and reporting a special problem in agricultural economics. Prereq: CPHR 2.50 or above, and permission of instructor. Not open to students with 6 cr hrs in 4193 or 693.01-693.08. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>	<p>4597.01H Food, Population, and the Environment U 3</p> <p>Issues related to world-wide population increases, food production, and associated environmental stress; policy options for lessening these concerns, especially in low-income countries. Prereq: Honors standing, and Sr standing; or permission of department or instructor. Not open to students with credit for 597.01H, 4597.01 (597.01), IntStds 4597.01H (597.01H), or 4597.01 (597.01). GE cross-disciplinary seminar course. Cross-listed in IntStds.</p>
<p>4194 Group Studies in Agribusiness and Applied Economics U 2-5</p> <p>Selected topics in agricultural economics to acquaint students with current economic conditions. Prereq: Permission of instructor. Not open to students with 10 cr hrs of 4194 (694-series). Repeatable to a maximum of 5 cr hrs or 2 completions. This course is graded S/U.</p>	<p>4999 Research With Distinction U 1-3</p> <p>Conducting and reporting research with Distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman University Undergraduate Research Forum. Prereq: CPHR 3.0 overall, and GPA 3.0 or above in major, and permission of project supervisor. Not open to students with credit for 683H. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>
<p>4310 Environmental and Natural Resources Economics U 3</p> <p>This introductory course in environmental and natural resource economics provides an economic perspective to analyze contemporary issues in environmental protection and natural resource management. Prereq: 2001 or Econ 2001.</p>	<p>4999H Honors Research With Distinction U 1-3</p> <p>Conducting and reporting the honors research with distinction. Students are expected to present at the CFAES Undergraduate Research and the Denman University Undergraduate Research Forums. Prereq: Honors standing, and FAES 4590.01H (590.01H), and CPHR 3.4 or above, and GPA 3.4 or above, and permission of honors project supervisor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>
<p>4320 Energy, the Environment, and the Economy U 3</p> <p>Understand the role of energy in the economy and the environment. Explore the economics of clean, renewable energy, and understand the different policies for pollution control. Prereq: 2001 (200) or Econ 2001 (200). Not open to students with credit for 565 or IntStds 4320 (565). Cross-listed in IntStds.</p>	<p>5330 Benefit-Cost Analysis U G 3</p> <p>Benefit-cost analysis theory and methods and their application to projects pertaining to public infrastructure, agriculture, the environment, natural resources, and human health. Prereq: 4310 (531). Not open to students with credit for 6330 or 631.</p>
<p>4320E Energy, the Environment, and the Economy U 3</p> <p>Understand the role of energy in the economy and the environment. Explore the economics of clean, renewable energy, and understand the different policies for pollution control. Prereq: 2001 (200), Econ 2001.01, 2001.02, or 2001.03 (200). Not open to students with credit for 565 or IntStds 4320 (565). Cross-listed in IntStds 4320.</p>	<p>5500 Agribusiness and Applied Economics Project Experience U G 3</p> <p>Field projects with participating organizations that require application of one or more key principles of agribusiness management or applied economics. Prereq: 3101, 3102, 3103, and permission of instructor. Repeatable to a maximum of 6 cr hrs.</p>
<p>4330 The Sustainable Economy: Concepts and Methods U 3</p> <p>Introduces students to core concepts of sustainability in economics and the quantitative methods necessary to understand and evaluate sustainable development. Prereq: 4310 and ENR 3900, or permission of instructor.</p>	<p>5797 Study at a Foreign Institution U G 1-15</p> <p>An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of dept. chairperson. Repeatable to a maximum of 25 cr hrs or 3 completions.</p>
<p>4340 Project Management for Sustainability and Applied Economics U 3</p> <p>An introduction to project management concepts and techniques focusing on how to initiate, plan, manage, control, and close projects related to sustainability and applied economics.</p>	<p>5900 Food System Planning and the Economy U G 3</p> <p>Examines the social, environmental and economic costs and benefits of our food production, distribution, and consumption. Prereq: Not open to students with credit for CRPlan 5900 or PubAfrs 5900. Cross-listed in CRPlan and PubAfrs.</p>
<p>4532 Food Security and Globalization U 3</p> <p>Examination of the causes of and solutions for food insecurity. Global and local factors that affect access to food are also considered. Prereq: 2001 (200) or Econ 2001 (200), or permission of instructor. Not open to students with credit for 434 or 532, or IntStds 4532 or 434. Cross-listed in IntStds.</p>	<p>6110 Applied Quantitative Methods I G 4</p> <p>Application of econometric and time series method to the analysis of problems in agricultural, environmental, and development economics. Prereq: 4001 (500) or Econ 4001 (501), and 2005 (205) or Stat 1430 (133). Not open to students with credit for 701.</p>
<p>4534 Comparative Challenges to Economic Development: Sub-Saharan Africa, Latin America, and China U 3</p> <p>An introductory survey course of issues shaping economic development in Sub-Saharan Africa, Latin America, and China, such as: population growth, agricultural development, industrialization, trade, structural adjustment, and environmental issues. Prereq: 2001 (200), or 2001H (200H), or Econ 2001 (200), or 2001H (200H). Not open for students with credit for 4536 (536), or 4538 (538), or 4539 (539), or IntStds 4536, (536), or 4538 (538), or 4539 (539). Cross-listed in IntStds.</p>	<p>6120 Applied Quantitative Methods II G 4</p> <p>Application of mathematical programming and statistical methods to the analysis of problems in agricultural, environmental, and development economics. Prereq: 4001 (500) or Econ 4001 (501), and 2005 (205) or Stat 1430 (133). Not open to students with credit for 702.</p>

14 Agricultural, Environmental, and Dev Economics

6130 Applied Quantitative Methods III G 4

This course builds upon the applied econometric content in AEDE 6110 by introducing complementary practical methods of data analytics. Topics include data exploration and visualization, model selection and regularization for high dimensional data, supervised and unsupervised machine learning methods. Lectures and labs will feature discussion of technical concepts and computer applications. Prereq: 6110, or permission of instructor.

6194 Group Studies G 1 - 4

Analysis of special problems in agricultural, environmental, and development economics by various students, under the guidance of an instructor. Prereq: Permission of instructor. This course is graded S/U.

6200 International Economics and Policy G 3

Application of economic theory and methods to current problems in international economics, policy and trade. Prereq: 4001 (500) or Econ 4001 (501). Not open to students with credit for 734.

6300 Environmental and Resource Economics G 3

Application of economic theory and methods to current problems in environmental and resource economics. Prereq: 4001 (500) or Econ 4001 (501). Not open to students with credit for 831.

6330 Benefit-Cost Analysis G 3

Calculus-based benefit-cost analysis theory and methods and their application to projects pertaining to public infrastructure, agriculture, the environment, natural resources, and human health. Prereq: Math 1131 (131) or 1151 (151).

6400 Regional and International Development G 3

Application of economic theory and methods to current problems in regional and international economic development. Prereq: 6010 or 4001 (500), or Econ 4001 (501). Not open to students with credit for 833.

6401 International Economic Development G 3

This course is an introduction to international development economics. The goals of this course are to familiarize students with basic theoretical concepts relating to growth and development, the current empirical evidence, and various approaches for policy design and evaluation. Prereq: 4001, 6010, or Econ 4001.02.

6500 Foundations of Data-Driven Sustainable Energy Systems G 3

Introduction to issues impacting sustainable energy systems across technology, law and policy, business models, resilience, data, geospatial, and decision sciences. Prereq: Enrollment in Data-Driven Sustainable Energy Systems Graduate Interdisciplinary Specialization, or permission of instructor. Not open to students with credit for EnvEng 6020, FABEng 6020, Geog 6020, ISE 6020, or PubAfrs 6020. Cross-listed in EnvEng 6020, FABEng 6020, Geog 6020, ISE 6020, and PubAfrs 6020.

7110 Advanced Quantitative Methods I G 3

Application of advanced mathematics and mathematical optimization methods to problems in agricultural, environmental, and development economics. Prereq: 4001 (500) or Econ 4001 (501).

7120 Advanced Quantitative Methods II G 3

Theoretical formulation and numerical analysis of stochastic dynamic models in agricultural, environmental, development and financial economics. Prereq: 4001 (500) or Econ 4001.01 (501.01).

7130 Applied Econometrics I G 3

A rigorous introduction to techniques of econometric analysis with applications to empirical problems in agricultural, environmental, and development economics. Prereq: 4001 (500) or Econ 4001 (501). Not open to students with credit for 801.

7140 Applied Econometrics II G 3

Special topics pertaining to the application of econometric methods to empirical problems in agricultural, environmental, and development economics. Prereq: 7130 and Econ 8712 (804), or equiv.

7425 Advanced Development Economics II G 3

Application of advanced economic theory and methods to problems of international economic development. Continuation of AEDEcon 7421. Prereq: Econ 8712 (804). Not open to students with credit for 840.

7999 Thesis Research G 1 - 18

Individual research for thesis or Plan B paper. Prereq: MS student in AEDEcon. Repeatable to a maximum of 36 cr hrs or 10 completions. This course is graded S/U.

8101 Applied Welfare Economics G 4

This course will explore questions of how we can use welfare analyses to evaluate policy and inform public policy debates. It takes an applied approach to welfare economics and its application to issues of public policy. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8102 Advanced Applied Econometrics G 4

This course is designed to introduce you to advanced applied econometric techniques essential for PhD level applied research. We will focus on the applied econometrics, reading, writing and problem-solving skills necessary for you to begin to do your own research. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8103 Seminal Readings in Applied Economics G 4

This course introduces students to seminal readings in the fields of Agricultural, Environmental, Development and Regional Economics. Students are introduced to a set of seminal readings in each field and are introduced to the critical skills necessary to critically analyze, review, and translate these readings into research proposals. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8193 Individual Studies G 1 - 4

Analysis of special problems in agricultural, environmental, and development economics by an individual student, under the guidance of an instructor. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs. This course is graded S/U.

8194 Group Studies G 1 - 4

Analysis of special problems in agricultural, environmental, and development economics by various students, under the guidance of an instructor. Prereq: Permission of instructor. This course is graded S/U.

8200 Frontiers of AED Economics G 1 - 6

Critical discussion of seminal and innovative scholarly research in agricultural, environmental, and development economics.

8201 Advanced Agricultural Economics G 2

This course provides students with an overview and an understanding of the theory guiding production economics as applied to agricultural problems and of the empirical methodologies used to study agricultural production problems. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8202 Agricultural Finance G 2

This course will focus on the application of financial theories to agricultural economics. Topics include asset pricing, capital structure, capital budgeting, risk, financial stress, and financial institutions. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8203 Frontiers of Agricultural and Food System Economics G 2

This course will provide students with theoretical foundations that are relevant to settings both within and outside the subfield of agricultural economics, practice in contemporary methods of empirical analysis, and exposure to both current topics of interest in agricultural economics. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8204 Advanced Topics in International Economics G 2

This course will focus on careful study of a set of seminal articles in international economics. Topics will include Ricardian model of trade, heterogeneous firms and trade, applied general equilibrium and the gravity model and more. Prereq: 6200 or Econ 8861, or permission of instructor.

8301 Frontiers in Resource Economics G 2

The course will focus on the theory of renewable resource economics, the seminal papers in the field, and will include contemporary issues and advanced topics such as spatial-dynamic problems and coupled human-natural systems. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8302 Nonmarket Valuation G 2

This course is designed to introduce you to the literature and applied econometric methods needed for nonmarket valuation in Environmental and Resource Economics. Specific topics covered include: Hedonic valuation and real estate markets, Rosen-Roback and quality of life, equilibrium models of location choice, and developing software to estimate cutting-edge econometric models. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8303 Climate Change Economics G 2

This course will provide students an in-depth exploration of theoretical concepts, methodological advances, and contemporary issues in climate change economics. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8304 Econometric Methods for Environmental Valuation G 2

This course is designed to introduce you to the econometrics methods needed for stated and revealed nonmarket valuation in Environmental and Resource Economics. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8401 Human Capital G 2

This course covers the key theories and empirical evidence surrounding investments in human capital. Topics include labor markets, nutrition and health, schooling and education, migration, population and fertility, and intra-household allocation. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8402 Econometrics in Development G 2

This class will cover cutting edge topics and econometric methods in the development economics literature, examining new methods around IVs, popular machine learning techniques, and non-classical measurement error. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8403 Finance in Economic Development G 2

This is a doctoral-level course devoted to the microeconomics of risk, saving, credit, and insurance in international economic development, based on critical reading and discussion of seminal and frequently-cited scholarly papers. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.

8404	Program Evaluation	G	2
<p>The course is intended as an introduction to program evaluation methods using examples from the environmental and development economics literature. It will cover the basic concepts and methods underlying research on policy analysis in developed and developing countries, with a particular emphasis on implementing common program evaluation techniques. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8405	Field Research for Policy Evaluation	G	2
<p>This course is intended to familiarize students with experimental and non-experimental research designs and requisite empirical methods for causal impact assessment as well as related issues that arise in the practice of field research in development including sampling, survey development, and ethical considerations. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8501	Frontiers in Regional Economics	G	2
<p>This course is designed to acquaint you to the frontiers in regional, urban, spatial and rural economics as well as historical background of current research. We will gain an understanding of the key models that describe regional and urban economics. We will then explore key empirical approaches that underlie regional and urban economics. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8502	Frontiers in Urban and Spatial Economics	G	2
<p>This course builds on AEDecon 8501 Frontiers in Regional Economics and is designed to further introduce you to topics in urban and spatial economics. The focus will be on applied economic papers on key topics, most of which have a spatial dimension - e.g., they use spatial data, ask interesting questions about space, or seek to account for space in some way. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8601	Applied Economic Dynamics	G	2
<p>The course will focus on the formulation, solution, and analysis of dynamic economic models arising in agricultural, environmental, development, regional and financial economics. Students will be introduced to methods to formulate, solve and analyze dynamic economic models. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8602	Advanced Computational, Mathematical, and Quantitative Methods Applied to Economics	G	2
<p>This course will focus on advanced mathematical, statistical, and computational methods and their application to the formulation, solution, and analysis of economic models arising in agricultural, environmental, development, and regional economics. Prereq: 7140, Econ 8714, and 8732; or permission of instructor</p>			
8603	Survey Methodology	G	2
<p>This course will focus on the theory and practices of survey design and fielding. Emphasis will be given to reducing hypothetical bias, incentive compatibility, as well as sampling error. Prereq: 7140, Econ 8714, and 8732; or permission of instructor.</p>			
8800	Seminar in AED Economics	G	1
<p>Critical discussion of current academic research in agricultural, environmental, and development economics. Prereq: Grad standing in AEDEcon. Repeatable to a maximum of 10 cr hrs. This course is graded S/U.</p>			
8895	PhD Research Seminar	G	1 - 4
<p>PhD Students presenting and discussing research in agricultural, environmental, and development economics under the guidance of an instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.</p>			
8999	Thesis and Dissertation Research	G	1 - 16
<p>Individual research for doctoral dissertation. Prereq: PhD candidate in AEDEcon. Repeatable. This course is graded S/U.</p>			

Agriscience Education

2189	Early Field Experience in Agriscience Education	U	1
<p>The course is designed to help students explore careers and gain experience in Agriscience Education. Students will learn first-hand about the Agriscience Education profession by working in K-12 school settings with a mentor educator (cooperating teacher). This is a licensure requirement for Agriscience Education majors pursuing an initial teaching license.</p>			
2193	Individual Studies	U	1 - 3
<p>Planning, conducting, and reporting a special study appropriate to the needs of the student. Prereq: CPHR 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>			
2194	Group Studies	U	1 - 5
<p>Group studies for students in specialized programs. Repeatable to a maximum of 10 cr hrs or 5 completions.</p>			
3210	Foundations of Youth Development and Experiential Learning within Agriscience Education	U	2
<p>This course provides preservice agriscience teachers with a foundation of the philosophies for engaging youth within a comprehensive agricultural education program. Students will recognize the importance of positive youth development and experiential learning in relation to agricultural education, specifically advising youth organizations and coordinating supervised agricultural experiences.</p>			

3488	Professional Development in Agriscience Education	U	1 - 3
<p>Developing Twenty-first Century skills through hands-on, contextual, and authentic, out-of-class experiences. Students, working individually with the instructor, will design and engage in developmental skill activities. Repeatable to a maximum of 3 cr hrs or 3 completions. This course is graded S/U.</p>			
4189	Context-Based Learning in Agriscience Education	U	1
<p>Agriscience education students will be immersed in advanced field experience, documenting hours toward initial teacher licensure. ASE 4189 will provide students the opportunity to further understand and develop best practices in teaching and learning centered around youth development and experiential learning within authentic agriscience education learning environments. Prereq or concur: 5210.</p>			
4194	Group Studies in Agriscience Education	U	1 - 3
<p>Specialized topics in Agriscience Education. Repeatable to a maximum of 10 cr hrs or 5 completions.</p>			
4220	Methods of Teaching Agriscience I	U	3
<p>An introductory instructional methodology course focused on analyzing the principles of teaching and learning, and designing instruction for teaching agriscience education in a formal classroom environment.</p>			
4998	Undergraduate Research	U	1 - 10
<p>Conducting and reporting an undergraduate research project. Prereq: Permission of instructor. This course is graded S/U.</p>			
4999	Research with Distinction	U	1 - 6
<p>Conducting and reporting research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman University Undergraduate Research Forum. Prereq: CPHR 3.0 or above, and GPA 3.0 or above, and permission of project supervisor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>			
5189	Planned Field Experience	U G	1 - 2
<p>Agriscience education M.Ed. students will be immersed in planned field experience, documenting hours toward initial teacher licensure. ASE 5189 will provide students the opportunity to further understand and develop best practices in teaching and learning centered around youth development and experiential learning within agriscience education. Prereq: Admission to the M.Ed. program. Repeatable to a maximum of 2 cr hrs or 2 completions.</p>			
5193	Individual Studies in Agriscience Education	U G	1 - 3
<p>Planning, conducting, and reporting a special study appropriate to the needs of the student. Prereq: CPHR 2.50 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.</p>			
5194	Group Studies	U G	1 - 3
<p>Group studies for students in specialized programs. Repeatable to a maximum of 10 cr hrs or 5 completions.</p>			
5210	Youth Development and Experiential Learning within Agriscience Education	U G	2
<p>This course provides pre-service agricultural education candidates philosophies and mechanisms for youth engagement within a comprehensive agricultural education program. Through the exploration of Positive Youth Development and Experiential Learning Theory, pre-service candidates will explore youth engagement through individual program components and intracurricular experiences. Prereq: 4220, and Jr standing.</p>			
5215	Curriculum Design in Agriscience Education	U G	3
<p>This course provides preservice agriscience education candidates with the foundation to develop an engaging standards-based curriculum within a comprehensive agriscience education program. Prereq: 4220, and Jr standing in ASE.</p>			
5220	Methods of Teaching Agriscience II	U G	3
<p>ASE 5220 is a methods of teaching course. In ASE 5220 students will further explore the teaching and learning process with an emphasis on planning and delivering agriscience instruction in public schools. Students will demonstrate competence in agricultural literacy and science-based agriculture instruction through the use of a variety of teaching methods. Prereq: 5210, and Sr Standing.</p>			
5255	Program Planning in Agriscience Education	U G	2
<p>Principles and procedures used in planning and conducting programs of career and technical education in the public schools.</p>			
5280	Internship in Agriscience Education	U G	4
<p>Supervised participation in teaching and other professional responsibilities of teachers of agriculture in the public schools. Prereq: 5230 and 5231. Not open to students with credit for AEE 580.01.</p>			
5281	Capstone in Agriscience Education	U G	4
<p>Clinical analysis of teaching agriculture in the public schools, conferences, and seminars. Prereq: 5230 and 5231. Not open to students with credit for AEE 580.02.</p>			
5282	Evaluation in Agriscience Education	U G	4
<p>Lesson plan development, written assignments, and other documentation of teaching agriculture in the public schools, conferences, and seminars. Prereq: 5280 and 5282. Not open to students with credit for AEE 580.03.</p>			

16 Agriscience Education

5797 Study at a Foreign Institution U G 3

The study abroad program will provide undergraduate and graduate students with an opportunity to learn about agriculture and related issues in a foreign country and receive credit for that work. Repeatable to a maximum of 9 cr hrs.

Air Force Aerospace Studies

1101 Heritage and Values of the United States Air Force I U 1

A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.

1102 Heritage and Values of the United States Air Force II U 1

A survey course designed to introduce students to the United States Air Force and provides an overview of the basic characteristics, missions, and organization of the Air Force.

1111 Freshmen Leadership Lab I U 0

An introduction to the practical application of basic leadership principles in the United States Air Force. Prereq: Enrollment in Air Force ROTC program. Concur: 1101. This course is graded S/U.

1112 Freshmen Leadership Lab II U 0

An introduction to the practical application of basic leadership principles in the United States Air Force. Prereq: Enrollment in Air Force ROTC program. Concur: 1102. This course is graded S/U.

2101 Team and Leadership Fundamentals I U 1

Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset.

2102 Team and Leadership Fundamentals II U 1

Focuses on laying the foundation for teams and leadership. The topics include skills that will allow cadets to improve their leadership on a personal level and within a team. The courses will prepare cadets for their field training experience where they will be able to put the concepts learned into practice. The purpose is to instill a leadership mindset.

2111 Sophomore Leadership Lab I U 0

An intensified employment of leadership principles and practices relevant to future Air Force Officers. Prereq: Enrollment in Air Force ROTC program. Concur: 2101. This course is graded S/U.

2112 Sophomore Leadership Lab II U 0

An intensified employment of leadership principles and practices relevant to future Air Force Officers. Prereq: Enrollment in Air Force ROTC program. Concur: 2112. This course is graded S/U.

2121 FTP Leadership Lab I U 0

This course is for Air Force ROTC Cadets who have completed all Freshman and Sophomore Air Science courses but who have not earned and junior enrollment allocation. Prereq: 2102, and enrollment in Air Force ROTC program. This course is graded S/U.

2122 FTP Leadership Lab II U 0

This course is for Air Force ROTC Cadets who have completed all Freshman and Sophomore Air Science courses but who have not earned and junior enrollment allocation. Prereq: 2102, and enrollment in Air Force ROTC program. This course is graded S/U.

3101 Leading People and Effective Communication I U 3

Teaches students advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Students have an opportunity to try out these leadership and management techniques in a supervised environment.

3102 Leading People and Effective Communication II U 3

Teaches students advanced skills and knowledge in management and leadership. Special emphasis is placed on enhancing leadership skills and communication. Students have an opportunity to try out these leadership and management techniques in a supervised environment. Prereq: 3101.

3111 Junior Leadership Lab I U 0

An advanced application of leadership theory, skills, and practices for prospective Air Force Officers. Prereq: Enrollment in Air Force ROTC program. Concur: 3101. This course is graded S/U.

3112 Junior Leadership Lab II U 0

An advanced application of leadership theory, skills, and practices for prospective Air Force Officers. Prereq: Enrollment in Air Force ROTC program. Concur: 3102. This course is graded S/U.

4101 National Security Affairs/Preparation for Active Duty I U 3

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the students for Active Duty. Prereq: 3102.

4102 National Security Affairs/Preparation for Active Duty II U 3

Designed for college seniors and gives them the foundation to understand their role as military officers in American society. It is an overview of the complex social and political issues facing the military profession and requires a measure of sophistication commensurate with the senior college level. The final semester provides information that will prepare the students for Active Duty. Prereq: 4101.

4111 Senior Leadership Lab I U 0

A culmination of the knowledge, skills, theory, and leadership practices acquired in the Air Force ROTC program to ensure that prospective Air Force Officers are ready to receive a commission in the United States Air Force. Prereq: Enrollment in Air Force ROTC program. Concur: 4101. This course is graded S/U.

4112 Senior Leadership Lab II U 0

A culmination of the knowledge, skills, theory, and leadership practices acquired in the Air Force ROTC program to ensure that prospective Air Force Officers are ready to receive a commission in the United States Air Force. Prereq: Enrollment in Air Force ROTC program. Concur: 4102. This course is graded S/U.

4121 Air Science Individual Studies I U 0

This course is for Air Force ROTC Cadets who have completed all Air Science courses required for commissioning but who still need other university courses for graduation. Prereq: 4102, and enrollment in Air Force ROTC program. This course is graded S/U.

4122 Air Science Individual Studies II U 0

This course is for Air Force ROTC Cadets who have completed all Air Science courses required for commissioning but who still need other university courses for graduation. Prereq: 4102, and enrollment in Air Force ROTC program. This course is graded S/U.

American Indian Studies

4998 Undergraduate Research U 1-4

Undergraduate research in variable topics related to American Indian Studies. Student-initiated projects. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4998H Research in American Indian Studies Honors U 1-4

Undergraduate honors student research or creative project in variable topics related to American Indian Studies. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4999 Undergraduate Research: Thesis U 1-4

A program of reading arranged for each student, with individual conferences, reports, paper and/or thesis. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

4999H Honors Thesis Research U 1-4

A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

5191 Internship U G 1-3

Workplace experience requiring writing and/or research. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

5193 Individual Studies U G 1-3

Individual directed study for work not typically offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

5194 Group Studies U G 1-3

Directed group study for a topic not offered in regular courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

5700 American Indian Studies Workshop U G 1-3

Structured participation in seminar or event organized for that semester. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

American Sign Language

1101.01 Elementary American Sign Language I U 4

Students develop elementary ASL skills-receptive (listening) and expressive (speaking). American deaf culture and history introduced with an emphasis on making comparisons and connections to one's own culture. Instruction primarily in ASL. Not open to native users of ASL, or those with EM credit, or to students with 2 or more years of study in high school. Prereq: Not open to students with credit for 1101 or 1101.02. This course is available for EM credit. GE for lang course. GE world languages course.

1101.02 Elementary American Sign Language I U 4

Students develop elementary ASL skills-receptive (listening) and expressive (speaking). American deaf culture and history introduced with an emphasis on making comparisons and connections to one's own culture. Instruction primarily in ASL. Fully online. Not open to native users of ASL, or those with EM credit, or to students with 2 or more years of study in high school. Prereq: Not open to students with credit for 1101 or 1101.01. GE for lang course. GE world languages course.

1102.01 Elementary American Sign Language II U 4

Further development of ASL skills. Focus on talking about others. Continued exploration of American deaf culture and history. Instruction primarily in ASL. Not open to native users of ASL. Prereq: 1101, or 1101.01, or 1101.02. Not open to students with credit for 1102 or 1102.02. This course is available for EM credit. GE for lang course. GE world languages course.

1102.02 Elementary American Sign Language II U 4

Further development of ASL skills. Focus on talking about others. Continued exploration of American deaf culture and history. Instruction primarily in ASL. Not open to native users of ASL. Fully online. Prereq: Prereq: 1101, or 1101.01, or 1101.02. Not open to students with credit for 1102, or 1102.01. GE for lang course. GE world languages course.

1103.01 Intermediate American Sign Language U 4

Advanced development of ASL skills. Focus on talking about community. Continued exploration of American deaf culture and history. Instruction primarily in ASL. Not open to native users of ASL. Prereq: 1102, 1102.01, or 1102.02. Not open to students with credit for 1103, or 1103.02. This course is available for EM credit. GE for lang course. GE world languages course.

1103.02 Intermediate American Sign Language U 4

Advanced development of ASL skills. Focus on talking about community. Continued exploration of American deaf culture and history. Instruction primarily in ASL. Fully online. Not open to native users of ASL. Prereq: Prereq: 1102, 1102.01, or 1102.02. Not open to students with credit for 1103, or 1103.01. GE for lang course. GE world languages course.

2104 American Sign Language Conversational Discourse U 3

This course is designed to develop conversational discourse and personal narrative skills in ASL. Students will continue the development of ASL communication skills both receptively and expressively, by expanding on ASL vocabulary and ASL grammar. These skills will allow students the ability to expand conversations in ASL beyond every day topics. Course instruction is in the target language, ASL. Prereq: A grade of C or better in 1103, or permission of department.

3105 American Sign Language Literature U 3

This course is an introduction to American Sign Language Literature through exploration and analysis of storytelling and poetry of the American Deaf Community. Students will expand their expressive and receptive skills by examining and deciphering ASL Literary works by native ASL users as well as by creating their own works of literature using ASL. Knowledge and use of ASL is required. Prereq: A grade of C- or above in 2104, or permission of department.

3350 American Deaf Arts and Literature U 3

Survey of literary and artistic works about being deaf that are written or created by individuals who are American deaf. Prereq: Not open to students with credit for ArtsSci 350.

4189S Intersection of American Sign Language, Deaf Culture, and the Deaf Community U 3

Designed to increase student awareness of agencies and organizations that serve the central Ohio deaf community. Students will have the opportunity to use American Sign Language with fluent users and apply their understanding of cultural norms and expectations through providing needed services and support at those organizations. Prereq: 1101, and permission of instructor or department.

Anatomy

1300 SuperAnatomy U 3

Today's pop culture includes icons from movies, television shows, and comics superheroes (including metahumans, aliens, & humans with advanced technology). The SuperAnatomy course is a 3-credit hour course that teaches basic systemic human anatomy and physiology with the help of superheroes. Lectures introduce normal human anatomy and physiology, compares superhero powers & modern technology.

2100.01 Introductory Human Anatomy U 3

A regional study of the basic structure and terminology associated with the human body. Prereq: Health Science students in Continuing Education (CED), University Exploration (EXP), and Arts and Sciences (ASC) only. Not open to students with credit for 2300.xx or 3300.xx.

2100.02 Introductory Human Anatomy U 3

Regional study of the basic structure and terminology associated with the human body. Prereq: Biology 1101, 1102, 1113, or 1114, or permission of instructor; and enrollment as a Health Science student in Continuing Education (CED), University Exploration (EXP), or Arts and Sciences (ASC). Not open to students with credit for 2300.xx or 3300.xx.

2100.03 Introductory Human Anatomy U 3

Regional study of the basic structure and terminology associated with the human body. Prereq: Health Science students in Continuing Education (CED), University Exploration (EXP), and Arts and Sciences (ASC) only. Not open to students with credit for 2300.xx or 3300.xx.

2100.04 Introductory Human Anatomy U 3

Regional study of the basic structure and terminology associated with the human body. Prereq: Biology 1101, 1102, 1113, or 1114, or permission of instructor; and enrollment as a Health Science student in Continuing Education (CED), University Exploration (EXP), or Arts and Sciences (ASC). Not open to students with credit for 2300.xx or 3300.xx.

2300 Human Anatomy U 4

Regional study of the basic structure and terminology associated with the human body. Laboratory includes demonstrations on prosected human cadavers. Prereq: Not open to students with credit for 2100.xx or 3300.xx.

3050 Undergraduate Neuroanatomy Laboratory U 2

Exploration of human neuroanatomy through hands-on laboratory experiences that utilize cadaveric materials, histological cross sections, and imaging. Prereq: 2100.01, 2100.02, 2100.03, 2100.04, 2300, or 3300.01; or permission of instructor.

3300.01 Advanced Human Anatomy U 5

Fundamental principles of human anatomy using a regional approach. Instructional format includes lecture, laboratory with prosected human cadavers, and practical examinations. Highly recommended for pre-occupational therapy, pre-physical therapy, pre-physician assistant, pre-dental, and pre-medical students. Prereq: Not open to students with credit for 2100.xx or 2300.xx.

3300.02 Advanced Human Anatomy U 5

Fundamental principles of human anatomy using a regional approach. Instructional format includes lecture, laboratory with prosected human cadavers, and practical examinations. Highly recommended for pre-occupational therapy, pre-physical therapy, pre-physician assistant, pre-dental, and pre-medical students. Prereq: Biology 1101, 1102, 1113, or 1114, or permission of instructor. Not open to students with credit for 2100.xx or 2300.xx.

4200 Human Anatomy Biomechanics U 2

Fundamental mechanical principles of human morphology, function, and interactions with the environment. Prereq: 2300, 3300, BiomedE 2800, or equivalent course in human anatomy.

4300 Human Anatomy with Dissection U 4

Advanced undergraduate study of the structure of the human body through regional dissection of a human cadaver and an introduction to histology, embryology, neuroanatomy, and medical imaging. Prereq: 2300.xx (199.xx) or 3300 (200), and permission of instructor.

4600 Human Embryonic Development and Birth Defects U 3

Systematic study of the basic embryological development of the human correlated with common birth defects. Prereq: 2100, 2300, or 3300, or permission of instructor.

4700 Undergraduate Histology U 4

Systematic study of the basic microscopic structure of mammalian cells, tissues, and organs correlated with function. Prereq: 2100, 2300, or 3300, or permission of instructor.

4900 Clinical Anatomy for Undergraduates U 2

Regional study of the human body emphasizing clinical correlations and physical examination. The course is aimed at integrating previous human anatomy knowledge with clinical anatomy through lectures, lab demonstrations on prosected human donors, and hands-on clinical testing activities. This course can serve as an anatomical foundation for undergraduate students considering health professions. Recommended for students in all pre-health professions. Prereq: 2300, or 3300, or permission of instructor.

5300 Learning Human Anatomy Through Dissection U G 2

Enables students with introductory human gross anatomy experience the opportunity to further investigate the human body through the complete dissection of a human cadaver. Prereq: A grade of B- or better in 2300 or 3300, or equiv; and an application (with selection process); and permission of Course Director.

5440 Advanced Regional Dissection for Undergraduate Students U G 2

Enables students with introductory human gross anatomy experience the opportunity to further investigate the human body through the in-depth independent dissection of one or more regions of the human body. Prereq: A grade of B- or above in 2300 or 3300 or equiv., and an application (with selection process), and permission of Course Director. Repeatable to a maximum of 6 or hrs.

5710 History of Anatomy U G 3

This course examines the history of anatomy as a way categorizing and explaining the relationships of parts to wholes in once living creatures, notably human beings. We focus on the history of anatomical observations, education, modes of communication, and professionalization. Prereq: 2220, 2300, or 3300; or Grad standing; or permission of both instructors. Cross-listed in History.

5999 Research in Anatomy U G 1-4

Designed to give students an introduction to research investigation in an applied anatomical subfield of choice. Prereq: Permission of instructor. This course is graded S/U.

6000 Advanced Musculoskeletal Anatomy G 5

Musculoskeletal anatomy of the human body through an in-depth dissection experience. Prereq: Enrollment in DPT, OTD, or MOT programs, and permission of instructor.

6100 Introduction to 3D Printing for Health Science Students G 1

This course will provide an introduction to 3D printing for health science students. This will include didactic knowledge on the types of printers, types of printing materials, and use cases in the health professions. This course will also provide content and application in extracting tissues from a DICOM file, cleaning the file, and exporting the file for 3D printing. Additional fee applies. Prereq: Grad standing in a Professional Health Program, or permission of instructor. This course is graded S/U.

18 Anatomy

6193	Individual Studies in Anatomy	G	1 - 5
Enables the student to pursue a minor investigation in some anatomical field of choice. Prereq: Grad standing in Anatomy, or permission of instructor. Repeatable to a maximum of 15 or hrs or 5 completions. This course is graded S/U.			
6200	Human Anatomy Biomechanics	G	2
Fundamental mechanical principles of human morphology, function, and interactions with the environment. Prereq: 6900, BiomedE 2800, or equivalent.			
6440	Regional Dissection for Anatomy Non-Majors	G	3 - 4
Guided regional human cadaveric dissection for graduate students outside the Anatomy MS or PhD programs. The course allows for focus on a specific region of human anatomy dissection. Allow for 4-8 hours/week of lab dissection. Instructor permission to enroll. Prereq: Grad standing, and permission of instructor. Not open to students enrolled in the Anatomy MS or PhD program. Repeatable to a maximum of 10 or hrs or 3 completions.			
6511	Human Anatomy for Dental Students I	M	7
Introduces dental students to the basic concepts of human gross anatomy, histology, neuroscience and embryology. Prereq: Enrollment in Dentistry, or permission of instructor.			
6512	Human Anatomy for Dental Students II	M	8
Continues the introduction of dental students to the basic concepts of human gross anatomy, histology, neuroscience and embryology. Prereq: Enrollment in Dentistry, or permission of instructor.			
6540	Regional Dissection for Anatomy Majors	G	2 - 4
Guided regional human cadaveric dissection for Anatomy graduate students in either the Anatomy MS or PhD programs. The course allows for focus on a specific region of human anatomy dissection. Allow for 4-8 hours/week of lab dissection. Instructor permission & Anatomy 6900 are required to enroll. Prereq: 6900, enrollment in the Anatomy MS or PhD program, and permission of instructor. Repeatable to a maximum of 12 or hrs or 6 completions.			
6600	Human Embryology	G	2
Designed to acquaint graduate students with a basic knowledge of human embryology. Prereq: Grad standing in Anatomy, or permission of instructor. Not open to students with credit for 710.			
6700	Human Histology	G	4
The microscopic study of cells, tissues, and organs with particular emphasis on human. The microscopic structure of various organ systems are integrated with their functions. Prereq: Grad standing in Anatomy, or permission of instructor.			
6800	Human Neuroanatomy	G	4
Introduces graduate students to the basic concepts of human neuroanatomy. Prereq: Grad standing in Anatomy, or permission of instructor. Not open to students with credit for NeuroSc 716.			
6900	Human Anatomy for Graduate Students	G	8
Graduate level study of human anatomy by regional dissection. Anatomy 200 or equivalent is recommended. Prereq: Permission of instructor.			
7289	Practicum: Developing Educational Components	G M	1 - 4
Practical experience developing education tool(s) and/or curricular component(s) in Anatomy. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.			
7310	Advanced Anatomy for Dental Residents	G	1
Advanced head and neck anatomy for residents in the dental specialties. Prereq: DDS or equiv, and enrollment as a resident or fellow in dental residency program.			
7500	Imaging in Human Anatomy	G	2
Application of knowledge of the anatomy of the human body to the interpretation and understanding of diagnostic images. Prereq: 6900 or equiv, and permission of instructor.			
7800	History of Anatomy	G M	2 - 3
The primary focus of this seminar course is to introduce students to the chronology, global context, and impact of anatomy, with focuses on education, illustration, research, and ethics. This course will provide students with exposure to the evolution of the science of anatomy, while also developing professional skills through in-class and online discussions, and oral presentations. Prereq: Grad standing in Anatomy or permission of instructor.			
7890	Anatomy Seminar in Education	G M	1
Readings and discussion of topics in anatomical education or biomedical pedagogy and curricular development pertinent to anatomy. Prereq: Grad standing in Anatomy, or permission of instructor. Repeatable to a maximum of 8 or hrs. This course is graded S/U.			
7891	Anatomy Seminar in Research	G	1
Readings and discussion of topics in biomedical or educational research pertinent to anatomy. Prereq: Grad standing in Anatomy, or permission of instructor. Repeatable to a maximum of 8 or hrs with content change. This course is graded S/U.			
7900	Clinically Oriented Anatomy	G	3
Provides a regionally based clinical approach to the study of human anatomy. Basic anatomy and its correlation with clinical concepts will be examined while an emphasis on clinical associations of disease and assessment techniques will be explored. Prereq: 6900, and Grad standing.			

7999	Master Research in Anatomy	G	1 - 8
Designed to enable the student to conduct an in-depth research investigation in some anatomical field of choice. Prereq: Permission of instructor. Repeatable to a maximum of 40 or hrs or 20 completions. This course is graded S/U.			
8110	Advanced Studies in Histology	G M	2
Advanced Histology is a 2-hr course that uses a journal club learning approach to the study and current topics in human histology. Each class will cover and build upon an advanced or applied concept from Human Histology (Anatomy 6700). 8110 will expand command of histology and pathology literature, techniques used in histological research, and extend knowledge already gained. Prereq: Grad standing, 6700 (or equivalent), and permission of instructor.			
8120	Advanced Studies in Embryology	G M	2
Mammalian embryological development using descriptive & experimental studies in variety of vertebrate models to present current information on molecular mechanisms responsible for normal development & birth defect in humans. Anatomy 6600 recommended. Prereq: Anatomy 6600; Grad or professional standing, or medical or dental residency, and permission of instructor.			
8130	Advanced Studies in Neuroanatomy	G M	2
The Advanced Neuroanatomy course is a two hour course that uses short vignettes and journal club learning approaches to the study of human neuroanatomy. Each class meeting will contain an advanced or applied concepts from Human Neuroanatomy (Anatomy 6800). Prereq: 6800 or equiv., and Grad standing; or permission of instructor.			
8140	Advanced Regional Dissection	G	2 - 4
In-depth dissection of one or more regions of the human body, supplemented with literature research. Prereq: 6900 or equiv, and permission of instructor. Repeatable to a maximum of 24 or hrs or 6 completions.			
8289	Anatomy Teaching Practicum	G M	1 - 4
A teaching practicum involving direct participation in classroom teaching under the guidance of a faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.			
8999	Research in Anatomy	G	2 - 8
Designed to enable the student to conduct an in depth research investigation in some anatomical field of choice. Prereq: Permission of instructor. Repeatable to a maximum of 40 or hrs or 20 completions. This course is progress graded (S/U).			

Animal Sciences

1100	Exploring Animal Sciences	U	½
Basic understanding of animal sciences, academic program policies and procedures, and opportunities for undergraduate professional development.			
2000	Animal Handling	U	2
General introduction to domestic animal behavior and hands-on experience handling food animal species.			
2200.01	Introductory Animal Sciences	U	3
A study of the basic principles of genetics, breeding, reproduction, nutrition, behavior, and biotechnology as it applies to the molecular, cellular, and physical underpinnings of domesticated animal form and function. Prereq: Not open to students with credit for 2300H. GE nat sci bio course. GE foundation natural sci course.			
2200.02	Introductory Animal Sciences Laboratory	U	1
Laboratory experience associated with basic principles of genetics, breeding, reproduction, nutrition, behavior, and biotechnology as it applies to the molecular, cellular, and physical underpinnings of domesticated animal form and function. Prereq: or concur: 2200.01 or 2300H, or permission of instructor. GE nat sci bio course. GE foundation natural sci course.			
2200.03	Animal Systems	U	2
Overview of the size and scope of the livestock and companion animal systems, the economic and social impact of the animals and their products, and the structure of the industries.			
2221	Introduction to Equine Studies	U	3
Introduces students to equine studies. Uses of the horse, their economic impact on society, and principles of equine behavior, anatomy, physiology, nutrition, reproduction, and health and disease are emphasized. Prereq: Not open to students with credit for 201.			
2260	Data Analysis and Interpretation for Decision Making	U	3
Introduces students to the use of statistics in data analysis and interpretation. Students develop skills in quantitative literacy and logical reasoning. Prereq: Math 1130, 1148, 1150, or 1151. Not open to students with credit for AEDEcon 2205, ComLdr 3537, ENR 2000, HCS 2260, or Stat 1450. GE data anly course. GE foundation math and quant reasoning or data anly course.			
2300H	Honors Introductory Animal Sciences	U	3
A study of the basic principles of genetics, breeding, reproduction, nutrition, behavior, and biotechnology as it applies to the molecular, cellular, and physical underpinnings of domesticated animal form and function. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 2200.01. GE nat sci bio course.			

2301	Equine Behavior and Training	U	3
<p>Introduces students to principles of equine behavior and training techniques and practical application of that knowledge to safely and effectively modify desirable and undesirable behavior of assigned horses. Must have medical insurance. Prereq: Permission of instructor. Not open to students with credit for 271.01. A maximum of 3 credits between 2301 and 2401 may count in the AnimSci major.</p>			
2367	Animals in Society	U	3
<p>Introduction to the historical, social, cultural, economic and legal frameworks within which current human-animal relationships have evolved. Prereq: English 1110, or equiv. GE writing and comm: level 2 and soc sci indivs and groups course. GE foundation social and behavioral sci course.</p>			
2400.01	Equine Studies in Europe	U	1
<p>First course in a two-course series (2400.01 & 3797.01) designed to give students an appreciation for how world history, government, geography, and infrastructure can impact the equine industry within a society. Prereq: 2200.01 (200), 2221 (201), or 2300H (200H), and permission of instructor. Repeatable to a maximum of 2 cr hrs.</p>			
2400.04	Scotland's Ruminants	U	1
<p>First course in a two-course series (2400.04 & 3797.04) designed to give students an appreciation for how world history, government, geography, and infrastructure can impact the small ruminant production and animal health & welfare within a society. Concur: 3797.04.</p>			
2400.05	Human and Animal Interactions	U	2
<p>Students will expand their understanding of the role that animals play in shaping society, culture, and economics within the US and the non-US destination identified in the 3797.02, 3797.03, or 3797.04. This course has 3 required Saturday field trips. Prereq: Not open to students with credit for 248.</p>			
2400.07	Global Dairy Industries	U	1
<p>An opportunity for students to study the culture; political, economic, and social framework; and dairy industry of another country. This course is offered in conjunction with AnimSci 3797.07 - Dairy Industry Outside the US. Concur: 3797.07.</p>			
2401	Advanced Equine Behavior and Training	U	3
<p>Utilizes principles of equine behavior and advanced training techniques to safely and effectively modify desirable and undesirable behavior of assigned horses. Prereq: Permission of instructor. Must have medical insurance. Maximum of 3 credits between 2301 and 2401 may count in the AnimSci major. Repeatable to a maximum of 6 cr hrs.</p>			
2507	Challenges and Opportunities for the Dairy Industry	U	1
<p>Increase the understanding by students to the challenges and opportunities within the Ohio and US dairy industries. As the economic climate changes and the consumer demands shift, the dairy industry must respond. Prereq: 2200.01 (200) or 2300H (200H). Not open to students with credit for 347.</p>			
2700	Diverse Fields and Opportunities within Animal Sciences	U	1
<p>Basic understanding of the global trends in animal sciences and the diversity of career opportunities within the industry, in addition to opportunities for undergraduate professional development. Students should plan to complete the course within the first year of enrollment within the major. Prereq or concur: 1100 or MeatSci 1100.</p>			
3000	Puppy Love: Understanding Animal Emotions	U	3
<p>Overview of the science behind animal emotions in livestock and companion animals, including basic introduction to the neurological, physiological, and behavioral indicators of animal emotions.</p>			
3046	Poultry Biology	U	3
<p>This course will introduce students to the poultry industry in a manner that highlights distinctive biological characteristics of poultry species. Students will have a base of knowledge of poultry anatomy and physiology that prepares them for more advanced animal science classes that cover in-depth subjects related to biology of agricultural animals, including poultry. Prereq: 2200.01 or 2200.03.</p>			
3100	Animal Growth and Development	U	3
<p>An overview of growth and development on form and function of food animals and its impact on value. Prereq: 2200.01 or 2300H, and Biology 1113, and Soph standing or above; or permission of instructor.</p>			
3101	Equine Facilities, Marketing, and Management	U	3
<p>Aspects of equine business management, marketing and facility design. Prereq: 2200.01 (200), 2221 (201), or 2300H (200H). Not open to students with credit for 341.</p>			
3110	Introductory Meat Science	U	3
<p>Analysis of the principles of meat science as related to meat animal value factors, processing technology, and merchandising systems affecting the producer, processor, and consumer. Prereq: Biology 1101 or 1113. Not open to students with credit for MeatSci 3110. Cross-listed in MeatSci.</p>			
3130	Principles of Animal Nutrition	U	3
<p>A study of the nutrients, their roles and requirements, digestion and metabolism with an emphasis on domesticated animals maintained for human benefit. Prereq: 2200.01, 2300H, Biology 1113 or 1113H, and Soph standing or above; or permission of instructor.</p>			

3131	Equine Feeds and Feeding	U	3
<p>Focuses on the nutrient needs of the horse and the significance of supplements and feeds as they relate to the horse's nutrition and health. Prereq: 2200.01 (200), 2221 (201), or 2300H (200H). Not open to students with credit for 331.</p>			
3140	Principles of Animal Systems Physiology	U	3
<p>An introductory course that surveys organs/systems within the body and relates the functional physiology of those systems to animal production. Prereq: Biology 1101 (101), 1113 (113), or 1113H (115H). Not open to students with credit for 310. GE nat sci bio course.</p>			
3140E	Principles of Animal Systems Physiology	U	3
<p>An introductory course that surveys organs/systems within the body and relates the functional physiology of those systems to animal production. Prereq: Honors standing, and Biology 1101, 1113, or 1113H; or permission of instructor. Not open to students with credit for 3140 or 3140H. GE nat sci bio course.</p>			
3147	Milk Secretion	U	2
<p>Introduction to mammary gland anatomy, milk synthesis, and factors affecting mammary health. Prereq: 2200.01 or 2300H, and Biology 1113 or 1113H.</p>			
3150	Principles of Genetic Improvement	U	3
<p>Introduction to the methods available for bringing about genetic change in animals. Prereq: 2200.01 (200) and 2200.02, or 2300H (200H); and 2260 (260), HCS 2260 (260), Stat 1450 (145), AEDEcon 2005 (205), ComLdr 3537, or AEE 387. Not open to students with credit for 320.</p>			
3160	Reproductive Physiology	U	3
<p>Introduction to anatomy and physiology of reproductive systems of various species with a focus on agricultural species. Prereq: 2200.01 or 2300H, and 3140 or 3140E.</p>			
3170	Animal Health I	U	2
<p>Provides students with an introduction to principles of animal health and emphasizes management practices that influence host-pathogen interactions. 3140 or 3140E is recommended. Prereq: 2200.01 or 2300H, and Soph standing or above.</p>			
3171	Equine Health & Disease	U	2
<p>Introduction to infectious disease affecting horses with emphasis on management practices that influence host-pathogen interactions. Prereq: 2200.01 (200), 2221 (201), or 2300H (200H).</p>			
3180	Introduction to Animal Welfare	U	2
<p>This course promotes an understanding of the historical, philosophical, and scientific developments that have led to our current understanding of animal welfare and its assessment.</p>			
3191	Internship in Animal Sciences	U	2
<p>Supervised preplanned employment experience and/or on-site problem solving study program. Prereq: Permission of academic advisor. Prereq or concur: FAES 3191. This course is graded S/U. Cross-listed in MeatSci.</p>			
3200	Applied Animal Bioscience Laboratory	U	2
<p>Laboratory experience exploring the organs, tissues and cells associated with the physiological systems of domestic animals and the nutrients used to support these systems. Prereq: 3130; and 3140, 3140E, AnmITec 3140T, or EEOB 2520; and 3160. Prereq or concur: 3170 or AnmITec 3170T.</p>			
3270	Animal Health II	U	2
<p>Introduction to principles of immunology and emphasis on management practices that influence host immune responses. Prereq or concur: 3170.</p>			
3300	Livestock Selection and Evaluation	U	3
<p>Laboratory exercises employing current standards of animal excellence including carcass value for the selection and improvement of farm livestock. Prereq: 3100, or Jr standing or above, or permission of instructor. Not open to students with credit for 300.</p>			
3301	Equine Selection and Evaluation	U	2
<p>Emphasis on the relationship of form to function by evaluating conformation and performance and orally defending that evaluation. Prereq: 2200.01 (200), 2221 (201), or 2300H (200H), or permission of instructor. Not open to students with credit for 301.</p>			
3306	Poultry Selection and Evaluation	U	2
<p>This course will provide students the opportunity to learn about the principles of poultry science; the evaluation and ranking of standard breeds of chickens; and the evaluation and grading of poultry meat and egg products. In addition, the course will cover practical and safe handling techniques of live poultry. Prereq: Soph standing or above, or permission of instructor.</p>			
3307	Dairy Cattle Selection and Evaluation	U	2
<p>Use of functional type traits in evaluation and selection of dairy cattle. Prereq: Soph standing or above, or permission of instructor.</p>			
3400	Management Intensive Grazing	U	2
<p>Application of scientific principles of plant growth, animal nutrition and behavior to manage grazing systems for profitable, sustainable livestock enterprises.</p>			

20 Animal Sciences

3420	Animal Laboratory Research Methods	U	½
Laboratory format demonstrating the applications of animal research. Students will perform experiments using common research techniques associated with food animals, including experimental designs, commonly used laboratory techniques including reagent preparation, protein and nucleic acid purification and downstream analysis, including immunochemical assay development and optimization. Prereq: 2200.01 or 2300H, and 2200.02 or AnmlTec 2200.02T. Prereq or concur: 3140 or MeatSci 3110. Not open to students with credit for 3200.			
3430	Animal Nutrition Laboratory	U	½
A study of the chemical composition of feedstuffs and the application toward providing optimal nutrition to managed animals. Prereq: 2200.01 or 2300H, and 2200.02 or AnmlTec 2200.02T. Prereq or concur: 3130. Not open to students with credit for 3200.			
3440	Animal Physiology Laboratory	U	½
Laboratory experience exploring organs, tissues, and cells associated with the physiological systems of domestic animals. Course activities put into practice core concepts in the areas of anatomy, histology, and physiology. Prereq: 2200.01 or 2300H, and 2200.02 or AnmlTec 2200.02T. Prereq or concur: 3140 or AnmlTec 3140T or EEOB 2520. Not open to students with credit for 3200.			
3470	Animal Health Laboratory	U	½
Laboratory experience focused on diagnostic laboratory techniques related to animal health and infectious disease of domestic animals. Course activities provide core concepts primarily in the area of animal health. Prereq: 2200.01 or 2300, and 2200.02 or AnmlTec 2200.02T. Prereq or concur: 3170 or 3270 or AnmlTec 3170T. Not open to students with credit for 3200.			
3480	Animal Welfare Laboratory	U	½
Laboratory experience exploring aspects of animal welfare, including biological functioning, affective state, and natural living. Course activities provide core concepts primarily in the area of applied animal welfare and behavior, with focus on food animal species. Prereq: 2200.01 or 2300H, and 2200.02 or AnmlTec 2200.02T, and 3140 or 3180 or AnmlTec 3140T. Not open to students with credit for 3200.			
3488	Professional Development in Animal Sciences	U	0 - 2
Participation in structured co-curricular programs leading to professional development (e.g. Academic Quadrathlon, Livestock Selection and Evaluation Teams, Dairy Challenge, etc.) or other structured programs providing experience for professional development. Prereq: CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
3500	Professional Networking in Animal Sciences	U	2
Professional networking and exposure to the breadth of the animal industries in Ohio and the potential for career development.			
3600	Global Food and Agriculture	U	3
The integration of food, agriculture, environment, resources, technology, culture, and trade on a global scale. Prereq: Not open to students with credit for 360.			
3600E	Global Food and Agriculture	U	3
The integration of food, agriculture, environment, resources, technology, culture, and trade on a global scale. Prereq: Honors standing. Not open to students with credit for 360 or 360E.			
3700	Animal Research Methods Laboratory	U	2
Exploring research techniques associated with food animal tissues such as quantifying, separating and identifying proteins, fatty acids and carbohydrates. Prereq: 3140 (310), 3140H (310H), or MeatSci 3110 (AnimSci 355.01), or permission of instructor.			
3797.01	Equine Studies in Europe	U	3
The study abroad experience will allow the students to be surrounded with a different culture, geography, community/government infrastructure, and history to directly compare how those aspects shape and impact the equine industry in that society. Prereq: 2200.01, 2221, or 2300H. Prereq or concur: 2400.01. Repeatable to a maximum of 6 cr hrs.			
3797.03	Human and Animal Interactions Study Abroad	U	3
Experience the beliefs and views of the culture in destination countries on the use and involvements of animals as part of their daily lives. Prereq or concur: 2400.05. Repeatable to a maximum of 9 cr hrs. or 3 completions.			
3797.04	Scotland's Ruminants - Education Abroad	U	3
Second course in a two-course series (2400.04 & 3797.04) designed to give students an appreciation for the heritage, production, health and well-being of Scotland's ruminant species and explore how world history, government, geography, and infrastructure can impact the management of animals within the Scottish society. Concur: 2400.04.			
3797.07	Dairy Industry Outside the U.S.	U	3
Increase the understanding of undergraduate students to the global nature of the dairy industry, comparing the demographics, cultural and economic forces, and natural resource availability on dairy farming and milk processing in a global setting.			
4001	Equine Production and Management	U	4
Application of scientific principles and best management practices in the areas of anatomy, physiology, genetics, reproduction, nutrition and health to the production of horses. Prereq: 3130 or 3131. Not open to students with credit for 541.			

4002.01	Beef Cattle Production and Management	U	3
The application of science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of beef cattle. Prereq: 2000; and 3130; and 3140, 3140E, or AnmlTec 3140T; and AnimSci 3150 or AnmlTec 3150T; and AnimSci 3170, AnmlTec 3170T, or 3177T; and AnimSci 3180; and 3420, 3430, 3440, 3470, or 3480.			
4002.02	Beef Cattle Production Lab	U	1
Hands-on application of the science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of beef cattle. Concur: 4002.01.			
4003.01	Swine Production	U	3
The application of scientific and applied principles of nutrition, physiology, genetics, health, economics, meat products, housing, and handling in integrated swine production systems. Prereq: 2000, and 3130; and 3140, or 3140E, or AnmlTec 3140T; and AnimSci I 3150, or AnmlTec 3150T; and AnimSci 3170, or AnmlTec 3170T, or 3177T; and AnimSci 3180; and 3420, or 3430, or 3440, or 3470, or 3480.			
4003.02	Swine Production Lab	U	1
Hands-on application of scientific and basic principles of nutrition, genetics, physiology, health, economics, meat products and housing in integrated management systems for modern swine production. Concur: 4003.01.			
4004.01	Small Ruminant and Pseudo Ruminant (Sheep, Goat, Llama, Alpaca, & Deer) Production and Management	U	3
Application of science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of small ruminants. Prereq: 2000; and 3130; and 3140 or 3140E or AnmlTec 3140T; and AnimSci 3150 or AnmlTec 3150T; and AnimSci 3170, AnmlTec 3170T, or 3177T; and AnimSci 3180; and 3420, 3430, 3440, 3470, or 3480.			
4004.02	Small Ruminant Production Lab	U	1
Hands-on application of the science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of small ruminants. Concur: 4004.01.			
4005	Companion Animal Biology and Anatomy	U	4
Anatomy, genetics, nutrition, physiology and behavior of dogs and cats. Human-animal companion relationships. Prereq: 2000; and 3130; and 3140, 3140E, or AnmlTec 3140T; and AnimSci 3150, or AnmlTec 3150T; and AnimSci 3170, AnmlTec 3170T, or 3177T; and AnimSci 3180; and AnimSci 3420, 3430, 3440, 3470, or 3480.			
4006.01	Poultry and Avian Management	U	3
Describes classes of poultry and game birds, incubation, housing, anatomy, diseases, genetics and nutrition. Prereq: 2000; and 3130; and 3140, 3140E, or AnmlTec 3140T; and AnimSci 3150 or AnmlTec 3150T; and AnimSci 3170, AnmlTec 3170T, or 3177T; and AnimSci 3180; and 3420, 3430, 3440, 3470, or 3480.			
4006.02	Poultry and Avian Management Lab	U	1
Hands-on application of nutrition, genetics, physiology, health, economics, products and housing in integrated management systems for the raising of chickens for market and egg production. Concur: 4006.01.			
4007	Dairy Herd Management	U	4
Application of scientific principles to practical herd management, analyses of alternatives and decision making. Prereq: 2000; and 3130; and 3140, 3140E, or AnmlTec 3140T; and AnimSci 3150, or AnmlTec 3150T; and AnimSci 3170, or AnmlTec 3170T, or 3177T; and AnimSci 3180; and 3420, 3430, 3440, 3470, or 3480.			
4035	Pet Food Production - From Concept to Consumer	U	3
The scientific principles and physical process of producing pet food, from concept through manufacture to reaching the consumer, while building on animal physiology and nutrition foundations. This course provides in person lectures, field trip experience, and peer evaluations to provide exposure to multiple career paths, including veterinary medicine, animal and nutrition industries, and research. Prereq: 3140 or EEOB 2520; and 3130 or HumnNtr 2210; and 3133, FdScTe 2400, or 3400; and AEDEcon 2001 or Econ 2001. Cross-listed in FdScTe.			
4105	Domestication, Form, and Function of Dogs	U	3
A study of the events that have shaped the domestic dog. Includes a focus on the role of domestication, selective breeding, and factors impacting growth and development on form and function of the domestic dog. Prereq: 3140, and Soph standing or above; or permission of instructor.			
4193	Individual Studies	U	0 - 3
Special assignments and advanced research; problems assigned after consultation with the instructor in charge. Prereq: CPHR 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
4194	Group Studies	U	1 - 3
Special topics area group studies finally proposed for a specific semester by an animal science faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
4400	Animal Welfare and Behavior in Livestock Industries	U	3
The study of animal welfare and behavior and resulting influences on livestock production systems. Prereq: 3140 (310) or 3140H (310H), or permission of instructor.			

4597 Contemporary Animal Use Issues U 3
The historical, biological, ethical, nutritional and economic issues of using animals to meet human needs. Prereq: Jr or Sr standing. Not open to students with credit for 597. GE cross-disciplinary seminar course.

4797 Study at a Foreign Institution U 1 - 15
Study at a foreign institution. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 15 completions.

4999 Research with Distinction U 0 - 6
Conducting and reporting research with distinction. Prereq: CPHR 3.0 overall, and GPA 3.0 or above in major, and permission of project supervisor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

4999H Honors Research with Distinction U 0 - 6
Conducting and reporting research with distinction. Prereq: Honors standing, FAES 1100H, CPHR 3.4 or above, major GPA 3.4 or above, and permission of honors project supervisor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

5000 Human Dimension in Animal Sciences U G 3
Examines how humans have and continue to influence the field of Animal Sciences. Students will gain a perspective on both individual and societal actions and reactions to aspects of animal production for human consumption. Topics will include, but will not be limited to: attitudes, beliefs, values, and value orientations.

5031 Ruminant Nutrition U G 3
Principles of ruminant nutrition: nutrients, metabolism and physiology. Includes computer formulations and feeding strategies for nutritional management of ruminants. Prereq: 3130 (330), or Grad standing. Not open to students with credit for 630.01.

5032 Non-Ruminant Nutrition U G 3
Principles of nonruminant nutrition: nutrients, metabolism and physiology. Includes practical feeding strategies for nonruminant animals. Prereq: 3130 (330), or Grad standing. Not open to students with credit for 630.02.

5033 Feeding Management and Records Analysis for Dairy Cattle U G 3
Stimulates student awareness of unique nutrient metabolism systems and strategies that have evolved to meet nutrient requirements to support various animal production situations. Prereq: 3130 (330), or Grad standing, or permission of instructor. Not open to students with credit for 630.03.

5070 Nutritional Immunology in Animal Systems U G 3
Principles of the role of nutrients in modifying the immune responses of animals and nutrient contributions toward animal health and well-being. Prereq: 3130 (330) or HumnNtr 2310 (310), or Grad standing. Not open to students with credit for 638.

5090 Gut Microbiology U G 2
A study of the major microorganisms of the gastrointestinal tract of animals and humans, their microbial metabolism and functions, interactions with each other and with hosts, and impact on host nutrition and health. Prereq: Micrbio 4000.01 or 4000.02 or 4100, and Biochem 4511, and GPA 2.0 or above in Biochem and Micrbio coursework; or permission of instructor.

5100 Advanced Growth and Development U G 3
A molecular developmental approach to the study of tissue growth, structure, and function in animals and humans. Prereq: 9 cr hrs in 3000-level or above AnimSci course, and Jr standing or above, or Grad standing. Not open to students with credit for 400 or 618.

5131 Application of Nutritional Principles to Ruminant Production Systems U G 3
Principles of ruminant production, health, ruminant digestion, metabolism, physiology, nutrient requirements, behavior, growth and lactation in the production of meat and milk from ruminants. Prereq: 4002, 4004, or 4007; or Grad standing; or permission of instructor.

5310 Auditing Animal Production and Processing Facilities U G 2
Introduces multiple types of auditing tools currently used by the industry to evaluate best management practices and animal welfare in the production and processing of various food animal species. Prereq: 3110 or MeatSci 3110. Cross-listed in MeatSci.

5400 Southern African Animals U G 3
This course examines animals native to Southern Africa. Students will examine animal anatomy and physiology, interpret behavior, and analyze the positive and negative human-animal interactions taking place in the geographic region, as well as the effects these interactions have on both humans and animals.

5400.01 Southern African Animals: I U G 2
First in a two part series covering the physiology, behavior, and human interactions with various animals found in Southern Africa, establishing an appreciation of the daily struggles of animals and people in this geographic area.

5400.02 Southern African Animals: II U G 2
Second of a two-part series covering the physiology, behavior, and human interactions with various animals found in Southern Africa, establishing an appreciation of the daily struggles of animals and people in this geographic area.

5410 Food Animal Production and Processing Industry Tour U G 2
Includes travel to food animal production and processing facilities for students to gain first hand knowledge in commercial food animal production and processing. Prereq: 3110 or MeatSci 3110. Cross-listed in MeatSci.

5420 Environmental Impacts of Crop-Livestock Systems U G 3
Understanding of processes underlying environmental impacts in crop-livestock agroecosystems. The focus will be on specific types of environmental impacts, such as climate change and greenhouse gas emissions, nutrient losses (volatilization and leaching), and soil degradation. This course is focused on agroecosystems and agricultural processes. Prereq: Sr or Grad standing. Not open to students with credit for HCS 5420. Cross-listed in HCS.

5530 Comparative Animal Nutrient Metabolism U G 3
Principles of nutrient metabolism as influenced by anatomical evolution and diet selection. Includes comprehensive discussions of nutrient handling in domesticated, captive and wild animal populations. Prereq: 3130 (330) or HumnNtr 2310 (310), and Biochem 4511 (511).

5551 Equine Assisted Activities and Therapies U G 2
A variety of approaches, therapeutic settings and client populations will be addressed with an emphasis on equine behavior and body language. Students will gain experience in the development and practical application of an equine assisted therapy program.

5797.01 Welfare of Agricultural and Recreational Animals U G 3
This course is part of the long-term study abroad program in Australia. It investigates the role of animal welfare in production and recreational animals and how animal welfare issues will impact the future of global food animal agriculture. Prereq: 3130 (330), and 3140 (310) or 3140H (310H), and 3150 (320), and permission of instructor. Not open to students with credit for 697.01.

5797.02 Animal Production Systems in Diverse Environments in Australia U G 3
Part of the long-term study abroad program in Australia. It will investigate animal production systems including: comparing production practices, economic issues and environmental constraints between Australia and the United States. Prereq: 3130 (330), and 3140 (310) or 3140H (310H), and 3150 (320), and permission of instructor. Not open to students with credit for 697.02.

5797.03 History, Culture and Economies of Australia U G 3
Introduces students to key social, political and economic issues that have shaped Australia to its contemporary identity and to investigate issues of exploration, economic development, social and community standards and processes. Prereq: Permission of instructor.

5797.05 Exotic Animal Behavior and Welfare U G 3
Exposes students to behavior, welfare, and health conditions of food production and exotic animals found in South Africa. This is a short-term study abroad course that will include visits to a range of animal systems: intensive production, open-range, semi-contained, sanctuaries, and zoo settings. The class activities take place primarily in field settings. Prereq: 5400.01.

5810 Branded Meat Products U G 4
Integration of multiple factors influencing value-added product development including: raw material quality and procurement, processing, packaging, distribution, and complexity of market development and current consumer trends in niche marketing. Prereq: 3110, 355.01, or MeatSci 3110; and completion of a second writing course. Not open to students with credit for 555.03 or MeatSci 5810. Cross-listed in MeatSci.

6000 Introduction to Graduate Studies in Animal Sciences G 1
An introduction to the Animal Sciences discipline and the scholarly activities required to pursue a graduate studies in the field. Prereq: Grad standing.

6060 Advanced Reproductive Physiology G 3
Recent advances in research in mammalian reproduction. Prereq: 3160 (318), or Grad standing, or permission of instructor. Not open to students with credit for 610 or 710.

6100 Research Methods and Writing in Animal Sciences G 1
Emphasis on the literature of science, design of a problem, methods and techniques for investigation and scientific writing. Prereq: Grad standing.

6193 Individual Studies G 1 - 6
Special assignments and advanced research problems assigned. Repeatable to a maximum of 10 cr hrs or 6 completions. This course is graded S/U.

6194 Group Studies G 1 - 3
Special topics area group studies. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.

7000 Applied Biometrics G 4
Study methods used in the quantification of biological processes and the integration of research results and knowledge into quantitative methods. Prereq: Stat 5301 or equiv, or permission of instructor.

7030 Advanced Topics in Ruminant Nutrition G 3
Advanced aspects of ruminant digestion, microbial fermentation, absorption, metabolism, physiology and the integration of these processes into rationing approaches will be emphasized, building on principles of ruminant nutrition from past courses. Prereq: 5031 or equiv, or Biochem 4511; or permission of instructor.

22 Animal Sciences

7040	Animal Physiology I	G	3	This course will explore the physiology of neuronal, muscular, endocrine, & reproductive tissues at systemic, cellular, & molecular levels with a focus on domestic mammals. Human physiology will be presented at times to expand upon limited information available for animals. Prereq: Grad standing, or permission of instructor.	8801	Macronutrients - Lipids and Energy Balance	G	3	Discussion of lipids as storage molecules used for energy and metabolism modulation as well as how they influence energy balance conditions such as obesity, cachexia, weight loss and weight gain. Prereq: 7761 (761), FdScTe 7761 (761), or HumnNtr 7761 (761). Not open to students with credit for 830.01, FdScTe 8801 (830.01), or HumnNtr 8801 (830.01). Cross-listed in FdScTe and HumnNtr.
7050	Animal Physiology II	G	3	This course will explore the physiology of cardiovascular, respiratory, renal, and digestive tissues at systemic, cellular, and molecular levels with a focus on domestic mammals. Human physiology will be presented at times to expand upon limited information available for animals. Prereq: Grad standing, or permission of instructor.	8802	Advanced Micronutrient Metabolism	G	3	Comparative study of the regulation of micronutrient status and its influence on physiological and molecular events, including nuclear receptor activity and transcription. Prereq: 7762 (762), FdScTe 7762 (762), or HumnNtr 7762 (762). Not open to students with credit for 830.02, FdScTe 8802 (830.02), or HumnNtr 8802 (830.02). Cross-listed in FdScTe and HumnNtr.
7100	Animal Growth and Development	G	3	Addresses the advanced principles of animal growth and development as the food animal industries continue to emphasize more efficient growth rates and acceptable meat quality. Specific information will be focused on the structure and function of muscle, bone, and adipose tissues, and the interaction among nutrition, hormones, exercise, heredity and disease. Prereq: 3100, 3105, or permission of instructor.	8833	Diet, Nutrition and Cancer	G	3	Epidemiological, clinical and basic perspective of how diet and nutrition practices predict for cancer risk. Prereq: 7761 (761), FoodSci 7761 (761), or HumnNtr 7761 (761). Not open to students with credit for 830.12, HumnNtr 8833 (830.12), or FdScTe 8833 (830.12). Cross-listed in FdScTe and HumnNtr.
7640	Food Carbohydrates and Proteins	G	3	Chemical, physical, biological and functional properties of food carbohydrates and proteins and their interactions with other food components. Prereq: FdScTe 5600 (605) and Biochem 4511 (511), or permission of instructor. Not open to students with credit for FdScTe 822 or 823. Cross-listed in FdScTe.	8834	Comprehensive Approach to Food Safety	G	2	A comprehensive overview of food safety challenges and solutions as experienced through the food chain from farm to consumers. Demonstration of food safety system from cellular aspects through public policy. Prereq: Microbiol 509 or equiv. Not open to students with credit for 830.10, FdScTe 8834 (830.10), or HumnNtr 8834 (830.10). Cross-listed in FdScTe and HumnNtr.
7724	Contemporary Issues in Animal Welfare	G	1	Give students the opportunity to explore current issues in animal welfare through reading, presentations and discussion. Prereq: 4400 or VMcoll 6565, or permission of instructor. Cross-listed in VetPrev.	8835	Grantsmanship	G	1	Capstone course for the OSUN PhD program will train students on grantsmanship skills. Prereq: Grad standing. Not open to students with credit for FdScTe 8835 or HumnNtr 8835. Cross-listed in FdScTe and HumnNtr.
7730	Endocrinology	G	4	Functional principles of the major endocrine systems in vertebrates and preparation for research in this area. Prereq: Biochem 4511, or permission of instructor. Not open to students with credit for Kinesio 7730. Cross-listed in Kinesio.	8836	Advanced Nutritional Genomics	G	3	The primary goal of the course is to stimulate critical thinking and discussion among graduate students about current research findings in the areas of genomics, proteomics and metabolomics as they apply to studies in the nutritional sciences. Prereq: 7761 and 7762; or HumnNtr 7761 and 7762. Cross-listed in HumnNtr.
7761	Macronutrient Metabolism	G	4	In-depth treatment of digestion, absorption, transport, and utilization of dietary carbohydrates and fat for energy production and fat deposition in humans and other higher animals. Prereq: 3130 (330), HumnNtr 2310 (310), or Biochem 4511 (511). Not open to students with credit for 761, 762, HumnNtr 7761 (761 and 762), or FdScTe 7761 (761 and 762). Cross-listed in FdScTe and HumnNtr.	8880	Interdisciplinary Seminar	G	1	Discussions of current animal science research. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs. This course is graded S/U.
7762	Vitamin and Mineral Metabolism	G	4	Biochemical functions, absorptions, transport, utilization, interrelationships and nutritional requirements of selective vitamins and minerals in higher vertebrates and humans. Prereq: Coursework in Biochemistry or Vertebrate Physiology. Not open to students with credit for FdScTe 7762 or HumnNtr 7762. Cross-listed in FdScTe or HumnNtr.	8881	General Seminar	G	1	Discussions of current animal science research. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs. This course is graded S/U.
7789	Nutrition Research Ethics	G	1	Exploring critical aspects in conducting research, including ethical considerations, authorship, conflicts of interests, and intellectual property rights. Prereq: Grad standing. Not open to students with credit for HumnNtr 7789. Cross-listed in HumnNtr.	8882	Nutrition Seminar	G	1	Discussions of current nutrition research. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs. This course is progress graded (S/U).
7790	Animal Models and Mechanistic Research Design	G	1	The course will provide fundamental principles in establishing effective research hypotheses, aims, and design strategies for mechanistic and applied research using animals and animal models. A focus on research protocols, outcomes, inferences, and reporting will be developed and reinforced through student evaluation of primary literature and student interactions. Prereq: 7789 or HumnNtr 7789. Not open to students with credit for HumnNtr 7790. Cross-listed in HumnNtr.	8883	Physiology Seminar	G	1	Discussion of current animal physiology research. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs. This course is graded S/U.
7899	Oral Research Communication	G	1	Critical analysis of the scientific literature and demonstration of effective oral presentation skills tailored to the target audience, with use of information technologies as needed. Prereq: Grad standing. Not open to students with credit for FdScTe 7899 or HumnNtr 7899 (895). Cross-listed in FdScTe and HumnNtr.	8886	Food Animal Health Seminar	G	1	This course provides students the opportunity to present and critique scientific research relating to aspects of food animal health including, but not limited to, infectious diseases, zoonosis, disease control, immunology, virology, bacteriology, parasitology, epidemiology, etc. in a public forum setting. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs. This course is graded S/U.
7999	Thesis Research	G	1 - 15	Research for thesis purposes for students pursuing a MS degree. Prereq: MS Grad student standing in Animal Sciences, or permission of instructor. Repeatable. This course is graded S/U.	8888	OSUN Research Seminar	G	1	Recent advances in nutrition science are presented by locally, nationally and internationally recognized scientists. Prereq: Grad standing. Not open to students with credit for FdScTe 8888 or HumnNtr 8888. Repeatable to a maximum of 5 cr hrs. This course is graded S/U. Cross-listed in FdScTe and HumnNtr.
8193	Individual Studies	G	1 - 10	Exploratory research and advanced assignments. Prereq: Grad standing, and permission of instructor. This course is graded S/U.	8997	Graduate Writing Experience in Animal Sciences: Non-Thesis	G	3	Writing for non-thesis MAS students in Animal Sciences. Prereq: Grad standing, and permission of instructor. Only available to students obtaining a non-thesis MAS in Animal Sciences. This course is graded S/U.
8780	Molecular Biology Techniques	G	3	Demonstrates the applications of molecular biology by involving the students in a real time research project. Students will perform experiments using molecular biology techniques in the context of a muscle protein functionality study. Prereq: Grad standing, or permission of instructor.	8998	Pre-Candidacy Dissertation Research	G	1 - 15	Research for dissertation purposes for students having yet to complete the candidacy exam. Prereq: PhD Grad student standing in Animal Sciences prior to completion of candidacy exam, or permission of instructor. Repeatable. This course is graded S/U.
					8999	Dissertation Research	G	1 - 15	Research for dissertation purposes for students having completed the candidacy exam. Prereq: PhD Grad student standing in Animal Sciences and completion of candidacy exam, or permission of instructor. Repeatable. This course is graded S/U.

Animal Sciences Technology

1201.01T	Exploring Equine Careers and Industry	U	½	Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.
-----------------	--	----------	----------	---

Animal Sciences Technology 23

1201.02T Exploring Livestock Careers and Industry U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

1201.07T Exploring Dairy Careers and Industry U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

1201.08T Exploring Animal Biosciences Careers U ½

Provides an overview of the unique requirements of the Animal Biosciences specialization, promotes student success in college, and explores personal and career interests, needs, and goals. Increase student awareness of necessary steps to present a competitive application to professional and graduate schools.

2189.01T Horse Practicum U 1

Practical experience in supervised equine laboratories with emphasis on developing and improving competencies related to classroom objectives and horse industry standards. A grade of C or better required to meet graduation requirements. Repeatable to a maximum of 4 cr hrs.

2189.07T Practicum in Dairy Cattle Production U 1-2

Supervised practical experience in dairy cattle production at the Ohio State ATI dairy farm with emphasis on developing and improving dairy cattle production skills and competencies. A grade of C or better required to meet graduation requirements. Prereq: Permission of instructor. Repeatable to a maximum of 4 cr hrs or 4 completions.

2190.01T Leadership in Equine Operations Management U 1

Practical, supervised leadership experience in equine facility management with emphasis on herd and facility operations and personnel supervision. A grade of C or better required to meet graduation requirements. Prerequisite: Completion of tractor/mobile equipment safety certification process required. Prereq: 2189.01T (289.04T) with a grade of C or above; 2201T (211T). Repeatable to a maximum of 2 cr hrs.

2193T Individual Studies U 1-3

Designed to give an individual student an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

2194T Group Studies U 1-3

Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

2200.02T Introduction to Animal Sciences Laboratory U 1

Laboratory application of basic animal husbandry practices in the various livestock and related industries. Prereq or concur: 2200T or AnimSci 2200.01. This course is available for EM credit.

2201T Introduction to Horse Science U 3

Fundamental survey of the development of domestic horses and breeds, terminology, behavior, uses, conformation, management and safe horse handling. Prereq: Not open to students with credit for 211T. This course is available for EM credit.

2202T Introduction to Beef and Small Ruminant Production U 3

Overview of beef cattle, sheep, goat, and other small ruminant species industries with regard to production and marketing; focus on ruminant livestock needs and the opportunities involved in their production. Prereq: Not open to students with credit for 222.01T. This course is available for EM credit.

2510.02T Food Animal Resource Management I - Beef U 1

Supervised practical experience in beef production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving beef production and management skills and competency. A grade of C or better required to meet graduation requirements. Repeatable to a maximum of 4 cr hrs.

2510.03T Food Animal Resource Management I - Swine U 1

Supervised practical experience in swine production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving swine production and management skills and competency. A grade of C or better required to meet graduation requirements. Repeatable to a maximum of 4 cr hrs.

2510.04T Food Animal Resource Management I - Small Ruminants U 1

Supervised practical experience in small ruminant production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving small ruminant production and management skills and competency. A grade of C or better required to meet graduation requirements. Repeatable to a maximum of 4 cr hrs.

2582.02T Food Animal Resource Management II - Beef U 1

Supervised practical experience in beef production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving leadership characteristics, beef production and management skills and competency. A grade of C or better required to meet graduation requirements. Prereq: 2510.02T. Repeatable to a maximum of 4 cr hrs.

2582.03T Food Animal Resource Management II - Swine U 1

Supervised practical experience in swine production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving leadership characteristics, swine production and management skills and competency. A grade of C or better required to meet graduation requirements. Prereq: 2510.03T. Repeatable to a maximum of 4 cr hrs.

2582.04T Food Animal Resource Management II - Small Ruminants U 1

Supervised practical experience in small ruminant production and management at the Grace Drake Learning Laboratory with emphasis on developing and improving leadership characteristics, small ruminant production and management skills and competency. A grade of C or better required to meet graduation requirements. Prereq: 2510.04T. Repeatable to a maximum of 4 cr hrs.

2603T Swine Production and Management I U 3

A study of the basic principles of production and management for contemporary commercial swine production enterprises. 1 to 3 day field trips, including weekends, may be required. Students will pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition and fees. Prereq: Not open to students with credit for 222.02T. This course is available for EM credit.

2707T Dairy Cattle Presentation U 1

Principles and skills practiced in fitting, presenting, and merchandising dairy cattle. Course offered in even numbered years. Field trips, including weekends, may be required. Students will pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition and fees. Prereq: Not open to students with credit for 206T. This course is available for EM credit.

2787T Applied Dairy Herd Practices and Management U 1

Experience in applying, directing, and evaluating dairy herd management procedures and practices at the Ohio State ATI dairy farm. A grade of C or better required to meet graduation requirements. Completion of the Equipment Training and Certification process and a driver background check required. Prereq: Soph standing; permission of instructor. Repeatable to a maximum of 3 cr hrs.

2797T Dairy Industry Seminar and Experience U 1

Current trends, issues, technology, and developments in the dairy industry; emphasis on developing lifelong learning skills through evaluation of science/trade journals, participation in professional meetings, and visits to innovative businesses. 1 to 3 day field trips, including weekends, may be required. Students pay field trip costs of lodging, meals, etc. above Ohio State tuition and fees. Prereq: Permission of instructor. Prereq or concur: English 1110.01 or 1110.03. Repeatable to a maximum of 3 cr hrs or 3 completions. This course is graded S/U.

2800T Basic Horsemanship U 2

Study of equine behavior, applied safe horse handling techniques, and an introduction into basic training and handling methodologies. Prereq or concur: 2201T. Not open to students with credit for 2801T or 2811T.

2801T Horsemanship and Equitation U 3

Intermediate course in equitation with emphasis on continued development of balanced seat riding skills that incorporate natural horsemanship concepts into mounted work. Students should have riding proficiency at walk, trot, and canter. Prereq: Permission of instructor. Concur: 2189.01T or 2190.01T. Not open to students with credit for 213T. Repeatable to a maximum of 6 cr hrs. This course is available for EM credit.

2811T Schooling and Training the Riding Horse U 3

Applied techniques of schooling and training riding horses with emphasis on producing supple, willing and knowledgeable mounts. Prereq: 2201T (211T), 2801T (267T), permission of instructor. Concur: 2189.01T or 2190.01T. Not open to students with credit for 268.01T.

3101.01T Equine Marketing U 1

Students will gain experience in sale prepping horses and develop an understanding of equine sales industry practices. Students will develop promotional materials including ads and videos. Prereq: 2201T and 2189.01T.

3101.02T Equine Facility Management U 3

This course explores equine facility design, management, and business planning. Students will locate and use resources to develop a business plan and manage an event. The event is typically on a Saturday. Prereq: 2201T and 2189.01T. This course is available for EM credit.

3131T Equine Feeding and Nutrition U 3

A study of the nutritional needs of equids and of the principles and practices involved in providing balanced rations to different nutritional classes of equids. Prereq: 2201T or AnimSci 2200.01; GenMath 1040T or Math 1075 or Math placement level R or higher. This course is available for EM credit.

3132T Ruminant Feeds and Feeding U 3

Principles of beef cattle and small ruminant nutrient requirements and feeding management with emphasis on the critical evaluation and formulation of rations in current management situations. Prereq: 2202T or AnimSci 2200.01; GenMath 1040T or Math 1075 or Math placement level R or higher. This course is available for EM credit.

3133T Practical Swine Feeding U 3

A study of the basic nutritional requirements and feeding management of swine, with an emphasis on evaluation and formulation of common feedstuffs and ration balancing. Prereq: 2603T or AnimSci 2200.01; GenMath 1040T or Math 1075 or Math Placement Level R or higher. This course is available for EM credit.

3137T Dairy Cattle Feeding Management U 3

Principles of dairy cattle feeding management with emphasis on the critical evaluation and formulation of rations in current management situations. Prereq: GenMath 1040T or Math 1075 or Math placement level R or higher. This course is available for EM credit.

24 Animal Sciences Technology

3140T Animal Anatomy and Physiology U 4

This subject will introduce the principles of animal body structure (anatomy) and function (physiology) as relevant for students of animal sciences and technology. This includes an introduction to anatomical nomenclature, cells and tissues and body systems. Prereq or concur: GenBiol 1200T or Biology 1113 or 1114; or permission of instructor. This course is available for EM credit.

3150T Livestock Genetic Improvement U 3

Principles of inheritance and the genetic improvement of livestock through cellular, qualitative, and population genetics; emphasizing breeding values, selection, and mating systems. Prereq: GenBiol 1200T or Biology 1113; GenMath 1040T or Math 1050 or Math placement level R or higher. This course is available for EM credit.

3151T Horse Breeding and Selection U 3

Principles of equine breeding management with emphasis on applied equine reproductive physiology, breeding methods, breeding stock management and basic genetics and selection. Recommended prereq: 3140T (221T) or GenBiol 1200T (120T). Prereq: 2201T (211T). Not open to students with credit for 266T. This course is available for EM credit.

3157T Dairy Cattle Genetic Improvement U 3

Principles of inheritance and the genetic improvement of dairy cattle through cellular, qualitative, and population genetics; emphasizing breeding values, selection, and mating systems. Prereq: GenBiol 1200T, or Biology 1101, or 1113; Math 1050, or GenMath 1141T, or GenMath 1145T, or Math placement level S or higher. This course is available for EM credit.

3161T Applied Equine Reproductive Management U 2

Advanced course in equine reproductive management with emphasis on understanding and improving equine infertility; applications of current research; and development of technical skills. Prereq: 2201T (211T). Prereq or concur: 3151T (266T). Concur: 2189.01T or 2190.01T. Not open to students with credit for 269T.

3167T Dairy Cattle Milking and Reproductive Management U 4

A study of recommended dairy cattle milking and reproductive management practices, based on the anatomy and physiology of the systems. Prereq: Not open to students with credit for 201T and 203T. This course is available for EM credit.

3170T Principles of Livestock Health U 3

A basic introduction to the relationship between animal health and performance. Topics include: immunology, sanitation, disease etiology, and disease prevention, symptoms, and treatment. Prereq: 2202T or 2603T or AnimSci 2200.01. This course is available for EM credit.

3171T Horse Health and Disease U 3

Study of equine disease, lameness, and emergency first aid with emphasis on preventative health care and the manager's role with the veterinary professional. Prereq: 2201T or AnimSci 2200.01. This course is available for EM credit.

3177T Dairy Cattle Health Management U 4

A study of immunology and dairy cattle health management, including disease prevention, identification, and treatment of common diseases influencing the performance of dairy cattle. Prereq: Not open to students with credit for 201T, 203T, and 252T. This course is available for EM credit.

3191.01T Equine Industry Internship Experience U 1-3

Employment in the equine industry structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty; comprehensive report required. A grade of C or better required to meet graduation requirements. Prereq: 2189.01T (289.04T), 2201T (211T), CPHR 2.0 or above, Soph standing, and permission of instructor. Not open to students with credit for 290.04T. Repeatable to a maximum of 4 cr hrs or 3 completions.

3191.02T Beef Industry Internship U 2-3

Employment in the beef industry structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty; comprehensive report required. A grade of C or better is required to meet graduation requirements. Prereq: 2202T, 2510.02T; CPHR 2.0 or above; permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.

3191.03T Swine Industry Internship U 2-3

Employment in swine industry structured to provide varied occupational experiences; supervised by an industry employer & coordinated by faculty; written comprehensive report required. A grade of C or better is required to meet graduation requirements. Prereq: 2603T, 2510.03T; CPHR 2.0 or above; permission of instructor. Not open to students with credit for 290.02T. Repeatable to a maximum of 6 cr hrs or 3 completions.

3191.04T Small Ruminant Industry Internship U 2-3

Employment in a small ruminant industry structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty; comprehensive report required. A grade of C or better required to meet graduation requirements. Prereq: 2202T, 2510.04T; CPHR 2.0 or above; permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.

3191.07T Dairy Industry Internship U 2-3

Employment in the dairy industry structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty; comprehensive report required. A grade of C or better is required to meet graduation requirements. Prereq: 3167T (201T and 203T), 3207T (202T), 3177T (252T); CPHR 2.0 or above; permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions.

3200T Livestock Selection and Evaluation U 2

Principles of live animal selection and carcass evaluation of livestock. Prereq: 2202T or 2603T or 3140T or AnimSci 2200.01.

3201T Horse Judging and Evaluation U 2

Comparative evaluation of horse conformation by breed, assessment of performance in a variety of performance disciplines; development of tools for assessing and placing show horse classes. Prereq: Not open to students with credit for 212T. This course is available for EM credit.

3207T Dairy Cattle Evaluation and Herd Records U 2

Comparative evaluation of dairy cattle conformation and introduction to herd performance records; emphasis on breed characteristics, functional type, lifetime profitability, and record data collection, analysis, and use. Prereq: Not open to students with credit for 201T and 202T. This course is available for EM credit.

3402T Beef Production and Management U 4

The application of science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of beef cattle in breeding and feeding production programs. 1 to 3 day field trips, including weekends, may be required. Students will pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition and fees. Recommended prerequisites: 2582.02T, 3130T, 3132T, 3140T, 3150T, and 3170T. Prereq: 2202T and 2510.02T.

3403T Swine Production and Management II U 4

An advanced study of the principles of managing a commercial swine enterprise. Coordination of production programs, evaluating economic performance, and a survey of contemporary swine housing and equipment options. 1 to 3 day field trips, including weekends, may be required. Students will pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition & fees. Prereq: 2603T, 3140T, 3170T. Prereq or concur: 3133T, 3150T. Not open to students with credit for 2613T. This course is available for EM credit.

3404T Small Ruminant Production and Management U 4

The application of science and basic principles of nutrition, genetics, physiology, and marketing to the production and management of sheep, goats, and other small ruminants. One to 3 day field trips, including weekends, may be required. Students will pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition and fees. Recommended prerequisites: 2582.04T, 3130T, 3132T, 3140T, 3150T, 3170T. Prereq: 2202T and 2510.04T.

3407T Dairy Cattle Facilities, Environment, and Equipment U 3

Design and management of dairy cattle facilities, environment, and associated equipment; emphasizing milking equipment and parlors, animal housing, environmental control, waste management, feeding systems, and utilities. 1 to 3 day field trips, including weekends, may be required. Students pay costs associated with field trips (lodging, transportation, meals, etc.) above Ohio State tuition & fees. Prereq: GenMath 1040T or Math 1050 or Math placement level R or higher. Prereq or concur: 3167T. This course is available for EM credit.

3800T Principles of Farm Business Management U 4

A study of economic and management principles involved in planning, organizing, operating, and administering a farm business; emphasis placed on developing a business plan and problem solving. Prereq: ADEEcon 2105 (BusTec 101T or 102T). Prereq or concur: BusTec 1151T (151T) or ADEEcon 2001 (200). Not open to students with credit for BusTec 240T. This course is available for EM credit. Cross-listed in CrpSoil.

Anthropology

1100 Introduction to Anthropology U 3

Introductory exploration of what it means to be human. Course highlights the anthropological sub disciplines of archaeology, biological anthropology, cultural anthropology, and linguistic anthropology. GE cultures and ideas and soc sci orgs and polities and diversity global studies course. GE foundation historical and cultural studies and social and behavioral sci course.

1101 Archaeology and Human Diversity, Lessons from the Past U 3

Examines how power relations shaped racial, ethnic, and gender identities in ancient societies by examining archaeological sites like Tutankhamen's tomb, Stonehenge, Machu Pichu, and Great Zimbabwe and shows how these and other sites have been misrepresented in the media and misused by governments to promote racism and inequality. GE foundation race, ethnicity and gender div course.

2194 Group Studies U 1-3

Designed to give groups of students an opportunity to pursue special studies in topics not otherwise offered. Repeatable.

2200 Introduction to Biological Anthropology U 4

A scientific examination of humans as a biological and cultural organism based on primate evolution from living and fossil evidence; evolutionary theory and population adaptability. This course includes laboratory activities. GE nat sci bio course. GE foundation natural sci course.

2200H Introduction to Biological Anthropology U 4

A scientific examination of humans as a biological and cultural organism based on primate evolution from living and fossil evidence; evolutionary theory and population adaptability. This course includes laboratory activities. Prereq: Honors standing, or permission of department or instructor. Not open to students with credit for 2200. GE nat sci bio course. GE foundation natural sci course.

Anthropology 25

2201	Introduction to Archaeology	U	3
World prehistory from the origin of human culture through the development of civilization illustrated by selected examples; archaeological field method; concepts of analysis and interpretation. Prereq: Not open to students with credit for 2201H. GE soc sci indivs and groups and diversity global studies course. GE foundation social and behavioral sci course.			
2201H	Introduction to Archaeology	U	3
World prehistory from the origin of human culture through the development of civilization illustrated by selected examples; archaeological field method; concepts of analysis and interpretation. Prereq: Honors standing, or permission of department or instructor. Not open to students with credit for 2201. GE soc sci indivs and groups and diversity global studies course. GE foundation social and behavioral sci course.			
2202	An Introduction to Cultural Anthropology	U	3
Introduction to anthropological perspectives on cross-cultural variation in human behavior and societies. Prereq: Not open to students with credit for 2202H. GE soc sci indivs and groups and diversity global studies course. GE foundation social and behavioral sci course.			
2202H	An Introduction to Cultural Anthropology	U	3
Introduction to anthropological perspectives on cross-cultural variation in human behavior and societies. Prereq: Honors standing, or permission of instructor or department. Not open to students with credit for 2202. GE soc sci indivs and groups and diversity global studies course. GE foundation social and behavioral sci course.			
2210	Race, Ethnicity, Gender Diversity and Human Biology	U	3
Focuses on the history of pseudoscience in the biological study of race, ethnicity, gender diversity, and human sexuality; evaluates modern scientific studies relating to human biological diversity. GE foundation race, ethnicity and gender div course.			
2241	The Middle East Close-Up: People, Cultures, Societies	U	3
Introduction to the culture of the Middle East as lived in its villages, towns, and cities. Prereq: Not open to students with credit for NELC 2241. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in NELC.			
3005	Careers with Anthropology	U	3
This course provides an overview of various career paths for students with degrees in anthropology. It will help students from all sub-fields of anthropology develop professional skills in preparation for life after graduation. Specifically, it focuses on the ways in which they can apply anthropological concepts, research methodologies, and analytical skills in a wide range of careers. Repeatable to a maximum of 6 cr hrs.			
3027	Disasters & Health	U	3
This class will help students understand the causes of disasters, how humans respond, its relationship to health and well-being. Likewise, how we can appropriately prevent and respond to disasters. Students will examine the causes of disasters from hazards such as earthquakes, volcano eruptions and climate change related events such as hurricanes.			
3050	Social and Ecological Systems: From Problems to Prospects	U	4
This high-impact research course surveys the diverse past, present, and future of human-environment relationships. Students will investigate key contemporary issues, discover their cultural and historical causes, and explore how constructive solutions can be achieved. GE theme sustainability course.			
3051	Sustainable and Resilient Social and Ecological Systems Capstone Portfolio	U	1
Students will create the capstone portfolio required for completion of the Sustainable and Resilient Social and Ecological Systems (SARSES) certificate. Aided by group discussions and peer feedback, students will reflect on what they have learned through participation in the certificate program, including both coursework and related learning undertaken outside of the certificate program proper. Prereq: 3050.			
3072	The Newark Earthworks, An Interdisciplinary Course	U	3
This course is designed to give students an opportunity to learn about the indigenous peoples of ancient Ohio, an amazing complex of earthen mounds they created, and the many ways we can know about and further study them. Prereq: Not open to students with credit for History 3072 or CompStd 3072. GE theme lived environments course. Cross-listed in CompStd and History.			
3191	Internship in Anthropology	U	1 - 6
An opportunity for work experience and on-the-job learning in anthropology-related employment. Prereq: 2.5 CPHR or above, and Soph, Jr, or Sr standing, and enrollment in Anthropology major. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			
3211	Introduction to Forensic Science	U	3
This team-taught interdisciplinary course will give students an introduction to the major concepts, issues and techniques used in forensic science. It is designed to expose students to different disciplines and career paths within forensic science. Prereq: Not open to students with credit for ArtsSci 211.			
3300	Human Origins	U	3
The search for human origins through a reconstruction of the human and non-human primate fossil records of the last 60 million years; emphasis on human skeletal, behavioral, and social patterns. GE theme origins and evolution course.			

3301	Human Biological Diversity & Health	U	3
Survey of modern human biological diversity; examination of the underlying evolutionary and adaptive mechanisms responsible; exploration of the interplay between biology and behavior in adaptation.			
3302	Introduction to Medical Anthropology	U	3
Relationship of anthropology to the art and science of medicine. It is recommended that Anthropology 2200 and/or 2202 be taken prior to enrolling in this course. GE theme health and well-being course.			
3304	The Living Primates	U	3
Survey of the behavior, morphology and conservation of living primates; particular emphasis given to field studies and the position of humans within the Order Primates. Prereq: Not open to students with credit for 304. GE nat sci bio course.			
3305	Introduction to Forensic Anthropology	U	3
An introduction to the field of forensic anthropology in which students will be introduced to basic methods used to analyze unidentified human skeletal remains. Prereq: Not open to students with credit for 305.			
3306	Anthropological Perspectives on Indigenous Citizenship: Native North Americans	U	3
An introduction to complex questions about the citizenship and sovereignty of Indigenous Native Americans, including what constitutes indigenous citizenship and how it is attained, ideas about justice amid difference in Native American societies, and some of the ways that changing power relations shaped racial, ethnic, and gender identities of American Indians. GE theme citizenship for div and just wrld course.			
3334	Zombies: The Anthropology of the Undead	U	3
Students will understand how culture and social organization help us define the living, the dead and the undead in the contemporary and archaeological record, and how we create social categories that organize our world and our place.			
3340	The Anthropology of Mental Health	U	3
Provides an introduction to global mental health through the lens of medical anthropology. Students will gain a holistic understanding of prescient concerns in global mental health and the ways in which anthropology can contribute an understanding to the experience, diagnosis, treatment, and management of mental health issues by diverse populations. GE diversity global studies course. GE theme health and well-being course.			
3350	Native Americans of the Ohio Valley from the Ice Age to the Colonial Period	U	3
The archaeology and cultural history of Native Americans in the Ohio Valley from the Ice Age to the Colonial Period. The forgotten story of the Native Americans of our region. Prereq: 2201, or permission of instructor.			
3401	Fundamentals of Archaeology	U	3
Introduction to basic archaeological theory and practice including fundamental field and laboratory, principles of survey, excavation, chronological analysis, typology, and palaeoethnography. Prereq: 2201 (201), or permission of instructor. Not open to students with credit for 401.			
3409	Primate Evolution	U	3
Examination of the origin, radiation, and (in some cases) extinction of each primate clade including prosimians, New World monkeys, Old World monkeys, apes, and humans. GE theme origins and evolution course.			
3411	Human Ecological Adaptations	U	3
A study of the interactive relationships between humans and their environments, past and present, with a focus on human biology. GE theme lived environments and sustainability course.			
3416	Latin American Peoples and Cultures	U	3
Latin American peoples and cultures. Prereq: Not open to students with credit for 416.			
3418	Regional Survey of the Anthropology of Africa	U	3
Overview of anthropological studies of traditional African societies, with themes of European colonialism, kinship, social organization, economics, and politics. Prereq: Not open to students with credit for 421.05.			
3419	Latin American Cultures and Migration in Global Perspective	U	3
An intensive ethnographic investigation of Latin American and Caribbean migration (Mexico, Ecuador, The Dominican Republic) including the history of migration; contemporary movement; and transnationalism. GE soc sci orgs and politics course. GE theme citizenship for div and just wrld and migration, mobility, and immobility course.			
3420	Indians of North America	U	3
Development of culture change in North American Indians. Prereq: Not open to students with credit for 421.08. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.			
3434	Archaeology of the Holy Land	U	3
Challenges students to evaluate the cultural phenomena that are Bible and Qur'an in their historical context by studying a broad range of archaeological cultures in the periods during which the Bible and Qur'an came to be written texts. The course provides an introduction to the archaeology of periods and cultures 3500 BCE-700 CE in the Holy Land and its neighbors. GE cultures and ideas course.			

26 Anthropology

3451	Archaeology of the Ancient Near East	U	3
Archaeology of the Levant, Mesopotamia and Egypt from human origins through the age of pyramids and ziggurats. Prereq: Not open to students with credit for 451.			
3452	Archaeology of the Pacific Islands	U	3
Introduces the prehistory of the Pacific Islands from an archaeological perspective. It emphasizes voyaging, colonization, and the emergence of cultural complexity. GE theme traditions, cultures, and transformations course.			
3500	Primate Sexuality	U	3
An evolutionary approach to the diversity of mating systems, morphologies, processes, and behaviors among prosimians, monkeys, apes, and humans. Prereq: 2200 (200). Not open to students with credit for 500.			
3504	Introduction to Anatomy	U	3 - 4
Introduction to Anatomy. Prereq: Not open to students with credit for 504.			
3553	New World Prehistory: Aztecs and their Predecessors	U	3
Detailed survey of native American prehistory: Examines the ancient civilizations of Mesoamerica, including the Olmecs, Zapotecs, Mixtecs, Aztecs, and Teotihuacan. Prereq: 2201.			
3554	Archaeology of North America	U	3
Detailed survey of native American prehistory: survey of the archaeology and cultural history of North America. Prereq: 2201.			
3555	New World Prehistory: Ancient Maya Civilization	U	3
Detailed survey of native American prehistory: recent archeological and epigraphic discoveries and examines the ancient Maya civilization of Mesoamerica. Prereq: 2201 (201). Not open to students with credit for 553.04.			
3597.01	Crisis! An Anthropological Perspective of Global Issues	U	3
Analysis of cultural conflict in developing nations resulting from rapid and extensive technological and social change. Prereq: Not open to students with credit for 4597.01 or 597.01. GE soc sci indivs and groups and diversity global studies and cross-disciplinary seminar course. GE foundation social and behavioral sci course.			
3597.02	Women, Culture, and Development	U	3
An analysis of the dramatic changes occurring in women's lives in response to development and modernization; developing and developed countries contrasted. Prereq: Not open to students with credit for 4597.02 or 597.02. GE soc sci indivs and groups and diversity global studies and cross-disciplinary seminar course. GE foundation social and behavioral sci course.			
3604	Intro to the Methods of Archaeological Science	U	3
Introduces students to the myriad of interdisciplinary techniques that allow us to understand the human condition. Reviewed methods and case studies include ancient DNA analysis, stable and radiogenic isotopes, zooarchaeology, paleoethnobotany, material science, remote sensing, etc. This course is taught at an introductory level for non-science majors. Anthropol 2201 is suggested.			
3623	Environmental Anthropology	U	3
Theory and ethnographic examples of human-environment interactions, focusing on the role of culture and behavior in environmental adaptation. Prereq: 2202 or equiv, or permission of instructor. Not open to students with credit for 5623. GE theme lived environments and sustainability course.			
4525	History of Anthropological Theory	U	3
Major theoretical viewpoints in anthropology seen in their historical context. Prereq: 2202 (202), or permission of instructor. Not open to students with credit for 525 or 3525.			
4597.03H	Models of Sustainability and Resilience, Lessons from the Past	U	3
Causes and consequences of recent and ancient environmental disasters that affected human societies are studied to illustrate how lessons from the past can be used in modern responses. Prereq: Honors standing, and Jr or Sr standing. GE soc sci human, nat, and econ resources; diversity global studies; cross-disciplinary seminar course. GE theme sustainability course.			
4706	Chronic: Illness, Injury, and Disability in Modern History	U	3
This seminar explores the emergence of "chronic" - the disease category and the illnesses it names - over the course of the 20th century. We consider the political economic, environmental, and techno-social conditions that gave rise to chronic illness in modern history, and consider factors including public health policy, the pharmaceutical industry, activism, pop culture, and more. Prereq or concur: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 4706. GE theme health and well-being course. Cross-listed in History.			
4998	Undergraduate Research in Anthropology	U	1 - 6
Undergraduate research in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
4998H	Undergraduate Research in Anthropology- Honors	U	1 - 6
Undergraduate research in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
4999	Undergraduate Thesis Research	U	1 - 6
Undergraduate thesis research. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 3 completions. This course is graded S/U.			

4999H	Honors Thesis Research	U	1 - 6
Honors Thesis Research. Prereq: Honors standing, and a grade of A in at least half of Anthropol courses taken, and an average of B in the remainder, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5193.01	Individual Studies: Theory	U G	1 - 10
Theory. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.			
5193.05	Individual Studies: Prehistory	U G	1 - 10
Prehistory. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.			
5193.06	Individual Studies: Ethnography	U G	1 - 10
Ethnography. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.			
5193.07	Individual Studies: Physical Anthropology	U G	1 - 10
Physical Anthropology. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.			
5193.08	Individual Studies: Unclassified	U G	1 - 99
Unclassified. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			
5194	Group Studies	U G	1 - 12
Designed to give groups of students an opportunity to pursue special studies in topics not otherwise offered. Prereq: Permission of instructor. Repeatable.			
5505	Wicked Science	U G	3
This course aims to train students to become wicked scientists who are able to tackle the grand challenges of today and tomorrow - what are otherwise known as wicked problems. Prereq: Not open to students with credit for EEOB 5505 or FABEng 5505. Cross-listed in EEOB and FABEng.			
5510	Interdisciplinary Team Science	U G	3
This course aims to teach students the necessary skills to lead or participate in scientific or interdisciplinary teams. Prereq: Sr standing, and permission of instructor; or Grad standing. Not open to students with credit for EEOB 5510, ENR 5510, or VetPrev 5510. Cross-listed in EEOB, ENR, and VetPrev.			
5515	Careers for Wicked Scientists	U G	1
The goal of this workshop is for students to develop their transdisciplinary skills through participation in an ongoing project that tackles wicked problems in the metropolitan area of Columbus. Prereq: 5505 and 5510, or EEOB 5505 and 5510; and PubAfrs 5620. This course is graded S/U.			
5600	Evolutionary Medicine	U G	3
Biomedical and biosocial influences on problems of human health throughout the world, focusing upon the evolutionary implications of those problems. Prereq: Not open to students with credit for 601.01.			
5601	The Anthropology of Sex, Drugs, and HIV	U G	3
Biocultural and sociocultural aspects of health in modern and prehistoric populations. GE theme health and well-being course.			
5602	Women's Health in Global Perspective	U G	3
A cross-cultural comparison of the political, economic, social, and biological issues surrounding women's health. GE diversity global studies course. GE theme health and well-being course.			
5603	Strategy of Archaeological Field Research	U G	3
Detailed examination of select topics concerning the recovery and analysis of archaeological data. Design of archaeological data recovery programs and their implementation through survey, excavation, and other methods. Prereq: 3401 (401). Not open to students with credit for 602.01.			
5604	Archaeological Laboratory Methods	U G	3
Practical experience in the laboratory analysis of archaeological materials with emphasis on stone, bone, and ceramic artifacts; preparation of reports on analytical procedures and results. Prereq: 3401 (401). Not open to students with credit for 602.02.			
5606	Who Owns the Past?	U G	3
Examines key ethical and epistemological issues in archaeology, including changing cultural politics. Prereq: 2201 (201) and 3401 (401). Not open to students with credit for 602.04.			
5607	Human Osteology	U G	3
Study of human skeletal anatomy. Prereq: 2200 (200), or permission of instructor. Not open to students with credit for 603.01.			
5608	Skeletal Biology	U G	3
A survey of bone biology, including histogenesis, histomorphology, and physiology of bone; topics include bone structure, growth and development, physiology, and anthropological applications. Prereq: 2200 and 5607, or permission of instructor. Not open to students with credit for HthRhSc 5608. Cross-listed in HthRhSc.			
5609	Dental Anthropology	U G	3
Evolutionary anthropology of human and non-human primate teeth. GE theme origins and evolution course.			

5610 Bioarchaeology	U G 3
Study of human remains from archaeological settings, with emphasis on relationship between biology, culture, health, and behavior. Prereq: 2200 (200), or permission of instructor. Not open to students with credit for 603.04.	
5614 Ethnobotany	U G 3
Introduction to the anthropological study of human interactions with the plant world. Prereq: A course in Anthropol or PlntBio at the 2000 level or above, or permission of instructor. Not open to students with credit for 610.	
5615 Evolutionary Perspectives on Human Behavior	U G 3
Advanced survey of contemporary evolutionary theories of human behavior and culture and their relevance to the broader discipline. Prereq: 2200 (200) and 2202 (202), and 10 additional cr hrs in Anthropol; or permission of instructor. Not open to students with credit for 611.	
5620 Hunters and Gatherers	U G 3
Overview of anthropological studies of people who subsist primarily by hunting and gathering wild food. Prereq: 2202 (202) or equiv, or permission of instructor. Not open to students with credit for 620.01.	
5621 The Anthropology of Women	U G 3
Anthropology of women. Prereq: 2202 (202) or equiv, or permission of instructor.	
5624 The Anthropology of Food: Culture, Society and Eating	U G 3
Explores food traditions, global expansion of foods and the production/exchange of food in culture and society. GE theme citizenship for div and just wrld course.	
5626 More: Culture and Economic Life	U G 3
An analysis of economic rationality in non-market and market societies; resource allocation, work organization, product disposition, exchange, money, trade, and development. GE theme citizenship for div and just wrld course.	
5627 Migrants and Refugees: The Anthropology of Mobility	U G 3
This course is an anthropological investigation of human mobility with a focus on the movement of migrants and refugees. Credit for 2202 is recommended but not required. GE theme citizenship for div and just wrld and migration, mobility, and immobility course.	
5641 Primate Behavior	U G 3
A broad survey of living primates, major taxonomic groups within the order, diet, group living, mating strategies, predation, intelligence. Prereq: Not open to students with credit for 640.01.	
5642 Growth and Development	U G 3
Growth and development. Prereq: 2200 (200) or equiv, or permission of instructor. Not open to students with credit for 640.02.	
5644 Forensic Anthropology	U G 3
Application of osteological and bioarchaeological methods in forensic science. Prereq: 3504 or 5607.	
5645 Life History Evolution, Aging, and Senescence	U G 3
Biology of human senescence, aging, longevity, and chronic disease; evolutionary theories, mechanistic models, biocultural influences, cellular and physiological processes; biodemography, interventions, hormesis. Prereq: 2200, Biology 1101, or 1113, or permission of instructor.	
5646 Human Evolutionary Anatomy	U G 3
An evolutionary approach to studying the human body through integrative anatomy, focusing on the functional anatomy of fossil and modern hominid skeletal evidence and primate comparative anatomy. Prereq: 2200, and 3300 or equiv; or permission of instructor.	
5650 Research Design and Ethnographic Methods	U G 3
Students learn to study anthropological problems through hands on experience with ethnographic methods, critical discussion of issues in ethnographic research and design of an ethnographic study. Prereq: 2202 (202), or permission of instructor. Not open to students with credit for 650.	
5651 Spatial Analysis for Anthropologists	U G 3
Introduces the analysis of spatial data in anthropological research; data collection; analysis using GIS; theoretical and methodological issues pertaining to research design.	
5684 Summer Field School in Archaeology- Fee	U G 3 - 15
Practical experience in archaeological fieldwork including site survey, excavation, surveying and mapping, preservation, and other related methods and techniques of data recovery. This course has a lab fee for room, board and supplies. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 3 completions.	
5685 Summer Field School in Archaeology	U G 2 - 15
Practical experience in archaeological fieldwork including site survey, excavation, surveying and mapping, preservation, and other related methods and techniques of data recovery. Prereq: Permission of instructor. Repeatable.	
5686 Practical Training in Forensic Anthropology	U G 3
Hands-on Forensic Anthropology course covering crime scene processing, evidence collection, and case development for testimony in court. Students process indoor and outdoor crime scenes where foul play is suspected to have occurred and then learn about expert testimony.	

5700 Anthropology, Public Health, and Human Rights	U G 3
This course provides an introduction to the relationship between medical anthropology and global public health with an emphasis on social justice and health as a human right. Health policy, evidence-based medicine, children's health, HIV, TB, chronic disease, citizenship and deservingness, and other health topics will be discussed and analyzed from a cross-cultural and ethnographic perspective. GE theme health and well-being course.	
5701 Health and Healing in Latin America and the Caribbean	U G 3
A biocultural examination of traditional and western healing practices and health disparities across the Latin American region. This course considers diverse perspectives on disease causality and prevention including shamanism, ethnophysiology, and ethnobotany.	
5702 Anthropology in/of the Clinic	U G 3
Investigates how health systems are products of historical, socio-political, and economic forces. Explores how anthropological perspectives, concepts and ethnography can be practiced in clinical settings to facilitate culturally competent care, inform public policy and programs, and reduce health disparities. An ideal course for students pursuing careers in healthcare related professions. GE theme health and well-being course.	
5797 Study at a Foreign Institution	U G 1 - 18
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of dept chairperson. Repeatable to a maximum of 18 cr hrs or 5 completions.	
7001 Society and Environment	G 3
This course provides an overview of major theoretical paradigms that have shaped anthropological research on humans and their environment. The goal is to train students to think theoretically as anthropologists by critically examining primary and secondary sources for a selection of theoretical paradigms on social-ecological systems.	
7002 Anthropological Approaches to Health	G 3
This course provides an overview of major theories, paradigms and approaches that have shaped anthropological research on the physical, biological, social and cultural factors that shape human health in the past and present. The goal of this course is to provide students with an understanding of how anthropologists define and study health.	
7003 Human Evolutionary History	G 3
This course provides an overview of major theoretical paradigms that have shaped anthropological research on human evolutionary history. The goal is to train students to think theoretically as anthropologists by critically examining primary and secondary sources for a selection of theoretical paradigms in human evolutionary history.	
7004 Social-Ecological Systems	G 3
This course provides an overview of frameworks, theories and methods used in the interdisciplinary study of social-ecological systems, including complexity theory, complex adaptive systems, resilience, institutional analysis, ecosystem services, and coupled human and natural systems. Students will also learn how to effectively collaborate in interdisciplinary studies of social-ecological systems. Prereq: Not open to students with credit for ENR 7004. Cross-listed in ENR.	
7005 Careers with Anthropology	G 3
This course provides an overview of various career paths for students with graduate degrees in anthropology. It will help students from all sub-fields of anthropology develop professional skills in preparation for life after graduation. Specifically, it focuses on the ways in which they can apply anthropological concepts, research methodologies, and analytical skills in a wide range of careers.	
7007 Academic Workshop	G 1
This workshop has as its main goal to offer students of all cohorts a place for research presentations, academic discussions and professional development. The workshop consists of weekly meetings with a diversity of topics arranged by the course coordinator. Repeatable to a maximum of 14 cr hrs.	
7101 Research Design	G 3
In this seminar each student will develop a research design for an anthropological research project. The focus of the seminar is on designing the research project and learning how research results and conclusions are assessed and disseminated. Topics include the relationship between theory and methods, ethics and IRB protocols, data collection methods, analysis of qualitative and quantitative data.	
7194 Group Studies	G 2 - 80
Group Studies. Repeatable.	
7701 Advanced Topics in Physical Anthropology: Modern Human Physical Variation	G 3
Discussion of advanced topics in human variation and hominid evolution; emphasis on critical analysis and evolution of theoretical topics in research design. Survey of modern human biological diversity; underlying evolution and adaptability. Prereq: Not open to students with credit for 701.01.	
7702 Advanced Topics in Physical Anthropology: Hominid Paleanthropology	G 3
Advanced topics in human variation and hominid evolution; emphasis on critical analysis and evolution of theoretical topics in research design. Prereq: Not open to students with credit for 701.02.	

28 Anthropology

7703	Theories in Cultural Anthropology	G	3
Major theoretical orientations in cultural anthropology; the developmental histories of the major theoretical schools and examination of their respective philosophical foundations. Prereq: Not open to students with credit for 702.			
7720	Teaching In Anthropology	G	4
Focuses on skills and pedagogy involved in teaching introductory anthropology. Prereq: Grad standing in Anthro or related discipline.			
7777	Data Collection Workshop	G	1
The workshop has as its main goal to introduce several different data collections techniques that are commonly applied in Anthropology. The workshop consists of lectures by the faculty in the department, who will introduce their research and data collection protocols. The lectures by Faculty will be complemented by discussions with the invited Faculty and readings that cover the methods discussed. Repeatable to a maximum of 4 cr hrs.			
7800	We are what we eat: Applications of biogeochemistry	G	3
Students will study both current and classic geochemical methodological developments and case studies from throughout the globe. Provides an introductory understanding of common methods in archaeochemistry and biogeochemistry, while emphasizing how these studies have pushed the epistemological boundaries of archaeological knowledge.			
7801	Archaeology of Hunter-Gatherer Societies	G	3
Advanced study of hunter-gatherer band society from theoretical, ethnographic, and archaeological perspectives. Prereq: Grad standing. Not open to students with credit for 801.01.			
7802	Origins of Food Production	G	3
Advanced theoretical and comparative study of the origins of food production in the Old and New Worlds. Prereq: Admission to Grad program. Not open to students with credit for 801.02.			
7803	The Archaeology of Complex Societies	G	3
Advanced theoretical and comparative study of the rise and fall of complex societies in antiquity in the Old and New Worlds. Prereq: Admission to Grad program. Not open to students with credit for 801.03.			
7804	Issues in Archaeological Theory	G	3
Examination of the assumptions and concepts underlying analysis of archaeological data; methods of reconstructing cultural history, past lifeways, and explaining cultural change. Prereq: Admission to Grad program. Not open to students with credit for 802.			
7805	Seminars in Ethnology	G	2 - 27
Seminars in Ethnology. Repeatable to a maximum of 27 cr hrs or 14 completions.			
7999	Research in Anthropology: Thesis	G	1 - 18
Research for thesis purposes only. Repeatable to a maximum of 18 cr hrs or 10 completions. This course is graded S/U.			
8193.01	Individual Studies: Theory	G	1 - 10
Theory. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.04	Individual Studies: Research Methods	G	1 - 10
Research methods. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.05	Individual Studies: Prehistory	G	1 - 10
Prehistory. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.06	Individual Studies: Ethnology	G	1 - 10
Ethnology. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.07	Individual Studies: Physical Anthropology	G	1 - 10
Physical anthropology. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.08	Individual Studies: Unclassified	G	1 - 10
Unclassified. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8193.09	Individual Studies: Cultural Anthropology	G	1 - 10
Cultural anthropology. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 15 completions. This course is graded S/U.			
8194	Group Studies	G	1 - 20
Group studies. Repeatable.			
8827	Communicating Anthropology	G	3
This course will walk students through the process of communicating research across several common platforms available to academics nowadays. The main goal is to work with students on the development of their academic narratives and then discuss how such narratives can (and should) be adjusted to different audiences.			

8828	Writing Research Proposals in Anthropology	G	3
The primary focus of this course is on writing competitive grant proposals in anthropology and students should use this course to develop their own research and grant proposals.			
8891.04	Seminars in Cultural Anthropology: Human Ecology	G	2 - 27
Human ecology. Repeatable to a maximum of 27 cr hrs or 14 completions.			
8891.05	Ethnographic Methods	G	3
Study design and data analysis. Repeatable to a maximum of 6 cr hrs.			
8892.01	Seminars in Physical Anthropology: Evolutionary Theory	G	2 - 6
Evolutionary theory. Prereq: Grad standing in Anthro. Repeatable to a maximum of 6 cr hrs or 3 completions.			
8892.09	Seminars in Physical Anthropology: Biocultural Medical Anthropology	G	3
Explores human reproduction from a biocultural and ecological perspective. Repeatable to a maximum of 27 cr hrs.			
8892.11	Seminars in Physical Anthropology: Quantitative Methods	G	2 - 6
Quantitative methods. Repeatable to a maximum of 6 cr hrs or 3 completions.			
8892.12	Seminars in Physical Anthropology: Quantitative Methods II: Advanced	G	2 - 27
Quantitative Methods II: Advanced. Repeatable to a maximum of 27 cr hrs or 14 completions.			
8892.13	Seminars in Physical Anthropology: Bioarchaeology	G	3
Seminar on the study of human remains from archaeological contexts; focus on health, disease, injury, biomechanics, diet, and population history. Repeatable to a maximum of 27 cr hrs.			
8892.14	Seminars in Physical Anthropology.	G	2 - 27
Seminars in physical anthropology. Repeatable to a maximum of 27 cr hrs or 14 completions.			
8893.06	Seminars in Prehistory: Paleodiet	G	3
Advanced survey of current archaeological research on past human diet, with emphasis on methods. Provides graduate-level advanced study of human diet as revealed through the archaeological record. Prereq: Not open to students with credit for 830.06.			
8999	Research in Anthropology: Dissertation	G	1 - 18
Research for dissertation purposes only. Repeatable to a maximum of 40 cr hrs or 18 completions. This course is graded S/U.			

Arabic

1101.01	Elementary Modern Standard Arabic I	U	4
Developing the ability to use Arabic functionally and communicatively in context; intensive oral interaction with instructor and fellow students; the basics of the writing system. Classroom track. Not open to native speakers of Arabic. Prereq: Not open to students with 1101.02 or 4 cr hrs of 1101.51. This course is available for EM credit. GE for lang course. GE world languages course.			
1101.02	Elementary Modern Standard Arabic I: Intensive	U	4
Developing the ability to use Arabic functionally and communicatively in context; intensive oral interaction with instructor and fellow students; the basics of the writing system. Intensive classroom track. Not open to native speakers of Arabic through regular course enrollment, transfer, or EM credit. Prereq: Permission of department. Concur: 1102.02. Not open to students with credit for 1101.01, 1101.02, or 4 credit hours of 1101.51. This course is available for EM credit. GE for lang course. GE world languages course.			
1102.01	Elementary Modern Standard Arabic II	U	4
Developing further language ability through learning how to perform certain functions orally and using them with fellow students; reading and writing passages reflecting their abilities. Classroom track. Not open to native speakers of Arabic. Prereq: 1101.01, or 4 cr hrs of 1101.51, or Arabic Placement Level 8. Not open to students with credit for 1102.02, or 4 cr hrs of 1102.51. This course is available for EM credit. GE for lang course. GE world languages course.			
1102.02	Elementary Modern Standard Arabic II: Intensive	U	4
Developing further language ability through learning how to perform certain functions orally and using them with fellow students; reading and writing passages reflecting their abilities. Intensive classroom track. Not open to native speakers of Arabic through regular course enrollment, transfer, or EM credit. Prereq: Permission of department. Concur: 1101.02. Not open to students with credit for 1102.01 or 4 cr hrs of 1102.51. This course is available for EM credit. GE for lang course. GE world languages course.			
1103.01	Intermediate Modern Standard Arabic I	U	4
Building on previously acquired functional abilities; using Arabic to express opinion and feelings; oral interaction in the classroom; reading authentic texts or various genres. Classroom track. Not open to native speakers of Arabic. Prereq: 1102.01, 1102.02, or 4 cr hrs of 1102.51. Not open to students with credit for 1103.02 or 4 cr hrs of 1103.51. This course is available for EM credit. GE for lang course. GE world languages course.			

1103.02 Intermediate Modern Standard Arabic I: Intensive U 4

Building on previously acquired functional abilities; using Arabic to express opinion and feelings; increased oral interaction in the classroom; reading simplified original texts. Intensive classroom track. Not open to native speakers of Arabic through regular course enrollment, transfer, or EM credit. Prereq: Permission of department. Concur: 2104.02. Not open to students with credit for 1103.01 or 4 cr hrs of 1103.51. This course is available for EM credit. GE for lang course. GE world languages course.

1113 Introductory Arabic for Heritage Learners I U 4

This intensive course is intended for heritage speakers and qualified Arabic speakers. It combines three semesters of Modern Standard Arabic into one semester and focuses on the productive skills (speaking and writing). Prereq: To qualify for this course, students are expected to be able to speak and understand well an Arabic dialect. This prior knowledge of a dialect is essential and will be used as a bridge towards learning Modern Standard Arabic. An interview will be conducted by the course instructor in order to establish a proficiency level. GE for lang course. GE world languages course.

2001 Arabic Pronunciation U 3

The Arabic Pronunciation course is designed to improve and perfect the student's pronunciation of Modern Standard Arabic. Students will learn the articulatory features of speech production and ways in which to correct and enhance their oral production. They will gradually be introduced to some basic linguistic terminology of articulatory phonetics. Students will develop functional intelligibility. Prereq: 1103 or equiv., or permission of instructor.

2101 Arabic Grammar I U 3

Accelerated introduction to the structure of modern standard and classical Arabic: phonology, morphology, and syntax, with emphasis on development of reading comprehension skills. Closed to native speakers of this language. Prereq: 1103.

2104.01 Intermediate Modern Standard Arabic II U 5

Initiating and sustaining communication, reading and understanding short authentic passages, and writing to express many language functions. Regular classroom track. Not open to native speakers of Arabic. Prereq: 1103.01 or 4 credit hours of 1103.51. Not open to students with credit for 2104.02.

2104.02 Intermediate Modern Standard Arabic II: Intensive U 5

Initiating and sustaining communication; reading and understanding short original texts and passages; writing to express many language functions. Intensive classroom track. Not open to native speakers of Arabic. Prereq: Permission of department. Concur: 1103.02. Not open to students with credit for 2104.01.

2111 Colloquial Arabic I U 3

Introduction to the phonology and grammar of the everyday spoken language used in the Eastern Arab World. Prereq or concur: 1103.01 or 1103.02. Not open to students with credit for 4111.

2112 Colloquial Arabic II U 3

Continued study of the phonology and grammar of the everyday spoken language used in the Eastern Arab world. Prereq: 2111 or 4111. Not open to students with credit for 4112.

2193 Individual Studies U 1 - 10

Individual Studies Prereq: Permission of department or instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

2194 Group Studies U 1 - 10

Group Studies Prereq: Permission of department or instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.

2241 Contemporary Arab Cultures: Arts, Mass Media, Society U 3

This course explores the intersecting political, artistic, and intellectual currents and practices that have shaped contemporary Arab cultures. It is organized as a survey of different cultural phenomena in Arab societies and diasporas including: the Arabic language and its varieties, music, poetry, law, television & cinema, and more. GE culture and ideas and diversity global studies course. GE foundation historical and cultural studies and race, ethnicity and gender div course.

2701 Classical and Medieval Arabic Literature in Translation U 3

Reading and analysis of major works of Arabic literature from the 6th to the 17th centuries including classical poetry, the Qur'an, and the Arabian Nights. Prereq: English 1110, or completion of GE Foundation Writing and Information Literacy course. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2702 Gender and Citizenship in Modern Arabic Literature U 3

Reading and analysis of representative works of the 19th and 20th centuries; by contemporary women authors. Prereq: GE foundation writing and info literacy course. Not open to students with credit for 2702H, WGSSt 2702, or WGSSt 2702H. GE lit and diversity global studies course. GE theme citizenship for div and just wrld course. Cross-listed in WGSSt.

2702H Modern Arabic Literature in Translation U 3

Reading and analysis of representative works of the 19th and 20th centuries by contemporary women authors. Prereq: Honors standing, and English 1110 (110) or equiv. Not open to students with credit for 372H, 2702 (372), WGSSt 2702 (372), or 2702H (372H). GE lit and diversity global studies course. Cross-listed in WGSSt.

2798.01 Morocco May Tour: The Arab World Up Close; History, Religion, Culture and Politics U 3

Introduces students to 19th- and 20th-Century as well as contemporary history, politics, literature and culture of Morocco, through conversations with major political, civil, and intellectual figures in visits to such places as the Royal Library, The Royal Academy for Amazighi Studies, Parliament, NGOs premises, as well as to Fez, Meknes, and Marrakesh.

3105 Intermediate Modern Standard Arabic III U 5

Developing reading skills through reading adapted and authentic Arabic texts; selections reflect cultural and literary aspects of Arabic culture. Prereq: 2104.

3601 Philosophy and the Just Society in the Classical Islamic World U 3

Surveying the development and major subjects and thinkers of the most vivid period of Arabic philosophy. Prereq: Not open to students with credit for Philos 3221. GE theme citizenship for div and just wrld course. Cross-listed in Philos 3221.

3702 Place, Space, and Migration in Modern Arabic Literature and Film U 3

This course on modern Arabic literature and culture in translation focuses on questions of belonging, relationship to space, and migration. It examines how Arabic literary narratives, films, documentaries, and other arts have imagined modes of belonging to spaces such as cities and nations, the natural world (and even the universe!) from the early postcolonial period to the present. Prereq: English 1110, or GE foundation writing and info literacy course. GE lit and diversity global studies course. GE theme lived environments course.

3705 A Thousand and One Nights: Storytelling in Arabic and World Literature U 3

In this course, we will read the 14th century collection of tales that constitute the earliest existing version of The Thousand and One Nights and analyze it both in relation to the medieval genres and concerns that shaped it and through contemporary theoretical frameworks. Prereq: English 1110. GE lit course. GE foundation lit, vis and performing arts course.

4106 High Intermediate Modern Standard Arabic U 5

Continued development of language skills through reading and evaluating a variety of authentic Arabic texts and genres; writing compositions on various aspects of Arabic culture. Prereq: 3105.

4108 Advanced Arabic Grammar U 3

Advanced discussion of Arabic morphology and syntax with readings from both modern and classical texts from various genres. Prereq: 4106.

4120 Arabic Media U 3

Reading/Listening to contemporary media in Arabic--youth culture, politics, contemporary issues. Prereq: 2104.01 or 2104.02. Not open to students with credit for 420.

4998 Undergraduate Research in Arabic U 1 - 3

Offers undergraduates with special aptitudes a greater opportunity to do more independent study and research than is possible in normal course work. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

4998H Undergraduate Honors Research in Arabic U 1 - 3

Offers undergraduate honors students a rigorous opportunity to do more independent study and research than is possible in normal coursework. Prereq: Honors standing, and permission of instructor. Not open to students with credit for 783H. This course is graded S/U.

4999 Undergraduate Thesis U 1 - 3

Offers undergraduates with special aptitudes and advanced skills the opportunity to do independent study leading to a thesis. Prereq: Sr standing, B average in Arabic coursework, permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

4999H Undergraduate Honors Thesis U 1 - 3

Offers undergraduates with special aptitudes the opportunity to do independent study leading to an honors thesis. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5193 Individual Studies U G 1 - 10

Individual Studies. Prereq: Permission of department. Repeatable to a maximum of 20 cr hrs or 5 completions. This course is graded S/U.

5194 Group Studies U G 1 - 10

Group Studies Prereq: Permission of department. Repeatable to a maximum of 20 cr hrs or 5 completions.

5401 Translation: Theory and Practice U G 3

Examination of some general guidelines for translating from Arabic to English or from English to Arabic, depending on the first language of the student. Requires advanced reading proficiency. Prereq: Arabic 3105, or permission of instructor. Not open to students with credit for 615.

5611 History of the Arabic Language U G 3

Survey of the evolution of the Arabic language in its cultural and historical setting. Prereq: Not open to students with credit for 611.

30 Arabic

5628	Classical Arabic Prose	U G	3
Selected readings reflecting the evolution of Arabic prose literature from its origins to the late Abbasid period. Prereq: 3105 (401), or permission of instructor. Not open to students with credit for 628.			
5651	Contemporary Arabic Prose Fiction	U G	3
Reading and analysis of short stories and novels representative of major developments and trends of the 20th century. Prereq: 3105 (401), or permission of instructor. Not open to students with credit for 651.			
5797	Study at a Foreign Institution	U G	1 - 10
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Repeatable to a maximum of 30 or hrs or 5 completions. This course is progress graded.			
6701	Major Issues of Arabic Philosophy	G	3
Analyzing important texts dealing with God, man, knowledge, society, religion and politics; discussing modern approaches and interpretations. Prereq: 6 or hrs of Arabic Literature at the 5000 level or equiv. Repeatable to a maximum of 9 or hrs.			
7601	Studies in Arabic Poetry	G	3
Advanced study of specific poetic periods, figures, and/or topics involving extensive reading and discussion of appropriate primary and secondary source materials. Prereq: 6 or hrs of Arabic Literature at the 5000 level or equiv. Repeatable to a maximum of 9 or hrs.			
7602	Studies in Arabic Prose	G	3
Advanced study of specific periods, authors and/or genres of prose writing (literary or non-literary) involving extensive reading and discussion of primary and secondary materials. Prereq: 6 or hrs of Arabic Literature at the 5000 level or equiv. Repeatable to a maximum of 12 or hrs.			
8891	Seminar in Arabic Studies	G	4
Intensive investigation of a selected topic or problem in Arabic linguistics, philology, literature, or literary culture. Prereq: Permission of instructor. Repeatable to a maximum of 16 or hrs.			
8892	Studies in Arabic Philosophy	G	3
Study of important selections of Arabic philosophy in the source language; students will explore a major issue or phenomenon in the larger context of Arabic philosophy.			

Architecture

1100	Architecture Survey	U	1
Introduction to the University, the Knowlton School of Architecture, and the disciplines of architecture, landscape architecture, and city and regional planning. Prereq: Not open to students with credit for 1100E, 100, 100H, CRPlan 1100 (100), 1100E, LArch 1100 (100), 1100E, or any survey course. Cross-listed in LArch and CRPlan.			
2220	Sustainability and the Built Environment	U	3
Introduction to sustainability and the built environment, emphasis on cultural context, including contributing geographic, political, social, and economic factors which influence the form of the constructed world. Prereq: Not open to students with credit for 201 or 3rd and 4th year Arch majors. GE soc sci human, nat, and econ resources course.			
2220E	Sustainability and the Built Environment	U	3
Introduction to sustainability and the built environment, emphasis on cultural context, including contributing geographic, political, social, and economic factors which influence the form of the constructed world. Prereq: Honors standing. Not open to students with credit for 201, or 3rd and 4th year Arch majors. GE soc sci human, nat, and econ resources course.			
2300E	Outlines of the Built Environment	U	3
Introduction to the discipline of architecture and landscape architecture and planning with an emphasis on the physical artifact and its formal and cultural context. Honors section. Prereq: Honors standing. Not open to students with credit for 200, 1210, 2300, LArch 1210 (200), 2300, or 2300E. GE cultures and ideas course. Cross-listed in LArch.			
2310	Seeing and Making	U	4
Introduction to the design of the physical environment through direct experience and practices of making, including urban walks, drawing and physical model making. Prereq: Not open to students with credit for 1410, LArch 1410, or LArch 2310. Cross-listed in LArch.			
2410	Architectural Design I	U	6
Architectural design with an emphasis on technique. Prereq: Acceptance into B.S. Arch program. Concur: 5610. Not open to students with credit for 241 or 242.			
2420	Architectural Design II	U	6
Architectural design with an emphasis on technique. Continuation of Arch 2410. Prereq: 2410, or both 241 and 242. Concur: 5610 (only for students pursuing a B.S. in Arch). Not open to students with credit for 243.			
2610	Introduction to Digital Design Software	U	3
This course introduces students to architectural design strategies as they relate to introductory computer tools. Repeatable to a maximum of 15 or hrs.			
3194	Group Studies in Architecture	U	1 - 15
For group-based special studies in architecture within the frame of an instructor guided course. Prereq: Permission of instructor. Repeatable to a maximum of 15 or hrs or 5 completions.			

3410	Architectural Design III	U	6
Architectural design with an emphasis on materiality. Prereq: 2420 (243). Not open to students with credit for 341 or 342.			
3420	Architectural Design IV	U	6
Architectural design with an emphasis on materiality. Continuation of Arch 3410. Prereq: 3410, or both 341 and 342. Not open to students with credit for 343.			
4193	Independent Studies in Architecture	U	1 - 15
For students who wish to pursue special independent studies in architecture with the guidance of an advisor/instructor. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4194	Group Studies in Architecture	U	1 - 15
For group-based special studies in architecture within the frame of an instructor guided course. Prereq: Permission of instructor. Repeatable to a maximum of 15 or hrs or 5 completions.			
4410	Architectural Design V	U	6
Architectural design with an emphasis on organization. Prereq: 3420 (343). Not open to students with credit for 441 or 442.			
4420	Architectural Design VI	U	6
Architectural design with an emphasis on organization. Continuation of Arch 4410. Prereq: 4410, 4999, or 4999H.			
4596E	Design Agency on Wicked Problems: World Building Your Life	U	3
In an era of rapid change locally and globally, technologically and socially, we are increasingly confronted by complex emergent systems problems, or Wicked Problems. This course will provide a theoretical framework for understanding and working on wicked problems, and uses design methodologies coming from architectural design to work on the wicked problem of designing your life. Prereq: Honors standing. Not open to students with credit for 4596. GE cultures and ideas course and cross-disciplinary seminar course.			
4780	Undergraduate Research Methods	U	3
Focuses on a broad scope of research methods and the development of architectural design and planning research techniques and skills. Prereq: Enrollment in a major within the Knowlton School of Architecture.			
4780H	Undergraduate Research Methods	U	3
Focuses on a broad scope of research methods and the development of architectural design and planning research techniques and skills. Honors section. Prereq: Honors standing, and major within the Knowlton School of Architecture. Not open to students with credit for 783H.			
4798	Study Tour	U	1 - 15
Group international and domestic travel programs. Opportunities tailored to complement the classroom experience. Repeatable to a maximum of 45 or hrs or 3 completions.			
4798E	Study Tour	U	1 - 15
Group international and domestic travel programs. Opportunities tailored to complement the classroom experience. Prereq: Honors standing. Repeatable to a maximum of 45 or hrs or 3 completions.			
4880	Interdepartmental Seminar	U	1 - 15
Interdepartmental seminar; topics to be announced. Repeatable to a maximum of 15 cr hrs or 5 completions. Cross-listed in CRPlan and LArch.			
4999	Design Studio for Thesis	U	6
Topical research/design projects in architecture. Prereq: Permission of instructor.			
4999H	Architecture Honors Design Studio	U	6
Topical research/design projects in architecture. Honors section. Prereq: Honors standing, and major within the Knowlton School of Architecture. Not open to students with credit for 784H.			
5110	History of Architecture I	U G	4
History of architecture from ancient to contemporary: historical inquiry, physical and cultural influences, theories, and analytical techniques. Continues as 5120. Prereq: Not open to students with credit for 600 and 601.			
5110E	History of Architecture I	U G	4
History of architecture from ancient to contemporary: historical inquiry, physical and cultural influences, theories, and analytical techniques. Prereq: Honors standing. Not open to students with credit for 600 and 601.			
5120	History of Architecture II	U G	4
History of architecture from ancient to contemporary: historical inquiry, physical and cultural influences, theories, and analytical techniques. Continuation of 5110. Prereq: Not open to students with credit for 602.			
5120E	History of Architecture II	U G	4
History of architecture from ancient to contemporary: historical inquiry, physical and cultural influences, theories, and analytical techniques. Continuation of 5110. Prereq: Honors standing. Not open to students with credit for 602.			
5130	History of Architecture III	U G	3
This course provides a survey of global architecture and its theoretical underpinnings from the mid-twentieth century to the present.			

Architecture 31

5191	Professional Experience in Architecture	U G	0
Documentation of work experience in the field of architecture or suitable related areas. Prereq: Permission of instructor. Repeatable to a maximum of 6 completions. This course is graded S/U.			
5194	Group Studies in Architecture	U G	1 - 15
For group-based special studies in architecture within the frame of an instructor guided course. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			
5210	Forms of Architectural Theory	U G	3
Survey of architectural theory that reviews the history of architecture while searching for reinterpretations, strategies, structures, and precedents. Prereq: 5110 and 5120 (600, 601, and 602), or permission of instructor. Not open to students with credit for 610.			
5290	Topics in Architectural Theory	U G	3
Investigation of topics in architectural theory. Prereq: Enrollment in Architecture major, or permission of instructor. Repeatable.			
5510	Materials and Envelopes 1	U G	3
Introduction to construction materials and techniques. Continues as 5520.			
5520	Materials and Envelopes 2	U G	3
Introduction to construction materials and techniques. Continuation of 5510.			
5590	Topics in Building Technology	U G	3
Investigation of topics in building technology. Prereq: Enrollment in Architecture major, or permission of instructor. Repeatable.			
5590.01	Topics in Building Technology	U G	1½
Investigation of topics in building technology. Prereq: Enrollment in Knowlton School of Architecture major, or permission of instructor. Repeatable.			
5610	Architectural Representation I	U G	3
Introduction to architectural representation techniques. Continues as 5620. Prereq: Enrollment in a major within the Knowlton School of Architecture. Concur: 2410 (for students pursuing a B.S. in Arch). Not open to students with credit for 271 or 272.			
5620	Architectural Representation II	U G	3
Introductions to architectural representation techniques. Continuation of 5610. Prereq: 5610, or both 271 and 272. Concur: 2420 (for students pursuing a B.S. in Arch). Not open to students with credit for 273.			
5710	Architectural Structures	U G	3
Statics, strength of materials, and structural systems: principles, elements, concepts. Prereq: Math 1118 or 1151 or above, and Physics 1200 or above; or Grad standing in Arch; or permission of instructor.			
5798	Study Tour	U G	1 - 15
Group international and domestic travel programs. Opportunities tailored to complement the classroom experience. Repeatable to a maximum of 45 cr hrs or 3 completions.			
5810	Architectural Environments	U G	3
Introduction to environmental issues and building service systems for architecture. Prereq: Math 1118 or 1151 or above, and Physics 1200; or Grad standing in Arch; or permission of instructor.			
5960	Design Competition	U G	1 - 6
Learn how to work in interdisciplinary teams to develop design proposals to solve problems in the natural or built environment. Prereq: Jr, Sr, or Grad standing. Repeatable to a maximum of 9 cr hrs or 3 completions. Cross-listed in CRPlan and LArch.			
6194	Graduate Group Studies in Architecture	G	1 - 15
For group-based special studies in architecture within the frame of an instructor guided course. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			
6210	Architectural Arguments: Drawing	G	3
This course provides a foundation for the study of drawings within the practice & discipline of architecture. It examines the relations between drawing representation, architecture & the historical, conceptual, & cultural -- including diverse communities- arguments with which they are associated. The architectural arguments of drawings will be developed using representational tools & techniques. Prereq: Enrollment in Master of Architecture Program.			
6410	Accelerated Architectural Design I	G	6
Architectural design with an emphasis on form and technique. Continues as 6420. Prereq: Acceptance in the Master of Architecture Graduate Program. Not open to students with credit for 641 or 642.			
6420	Accelerated Architectural Design II	G	6
Architectural design with an emphasis on form and technique. Continuation of 6410. Prereq: 6410, or 641 and 642. Not open to students with credit for 643.			
6710	Integrated Architectural Structures	G	3
Statics, strength of materials, and structural systems: principles, elements, systems. Prereq: Grad standing.			

6810	Integrated Environmental Systems	G	3
Qualitative and quantitative aspects of environmental issues and building service systems for architecture. Prereq: Grad standing.			
7193	Graduate Independent Studies in Architecture	G	1 - 15
For students who wish to pursue special independent studies in architecture with the guidance of an advisor/instructor. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
7194	Graduate Group Studies in Architecture	G	1 - 15
For group-based special studies in architecture within the frame of an instructor guided course. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
7220	Architectural Arguments : Writing	G	3
This course provides the study of the written word within the practice and discipline of architecture. It examines the relations between written representation, architecture and the historical, conceptual, and cultural arguments with which they are associated. Texts by practitioners and theorists will be discussed for their architectural arguments and used to develop new texts. Prereq: Grad standing. Concur: 7420.			
7310	Practice of the Design Professions	G	3
Legal, financial, technical, and ethical issues in architectural practice. Prereq: Enrollment in Master of Architecture Program. Not open to students with credit for 751 or 752.			
7410	Advanced Architectural Design I	G	6
Architectural design with an emphasis on materiality and organization. Prereq: 6420 (643), or Enrollment in the Master of Architecture Graduate Program with advanced standing. Not open to students with credit for 841 or 842.			
7420	Advanced Architectural Design II	G	6
Architectural design with an emphasis on materiality and organization. Continuation of Arch 7410. Prereq: 7410.			
8210	Master Practitioner Seminar	G	1 - 3
Contemporary strategies in architectural practice and criticism as articulated by contemporary architects, theoreticians, and historians. Prereq: Master of Architecture student in third year of program. Repeatable to a maximum of 3 cr hrs or 2 completions.			
8220	Master Project Seminar	G	3
Articulation of an architectural position that accounts for design production, disciplinary concerns, and cultural forces. Prereq: Enrollment in Master of Architecture Program.			
8410	Advanced Architectural Design III	G	6
Advanced topics in architectural design. Prereq: 7420 or 844.01. Not open to students with credit for 844.02 or 844.03.			
8420	Advanced Architectural Design IV	G	6
Advanced topics in architectural design. Prereq: 8410.			

Art

2000	Encountering Contemporary Art	U	3
In this class, students will explore how and why contemporary artists make the work they do within a globalized art world. Through discussions, readings, virtual or in-person art excursions and related assignments, participants will apply critical written, oral, and visual communication skills as they analyze, interpret and respond to significant works of art, their contexts and histories.			
2100	Beginning Drawing	U	3
Students will explore fundamental freehand drawing techniques with a range of drawing methods, media and concepts; emphasis on drawing from observation and expressive experimentation. Students will apply written, oral and visual communication skills as they evaluate, interpret and respond to significant works of art and their own expressive goals. This course is available for EM credit. GE VPA course. GE foundation lit, vis and performing arts course.			
2100E	Beginning Drawing	U	3
Students will explore fundamental freehand drawing techniques with a range of drawing methods, media and concepts; emphasis on drawing from observation and expressive experimentation. Students will apply written, oral and visual communication skills as they evaluate, interpret and respond to significant works of art and their own expressive goals. GE VPA course. GE foundation lit, vis and performing arts course.			
2200	Real and Recorded Time	U	3
Students will engage in informed observations, explorations and communication through time-based media methods and tools as a practical and theoretical foundation for creating original artworks in video, sound, installation, performance and screen.			
2300	Two-Dimensional Studies	U	3
Students will create aesthetic and interpretive studies exploring organizational elements and principles of 2D composition, visual perception, critical thinking, invention and material experimentation as they pertain to art practice. Students will advance written, oral and visual communication skills as they interpret and respond to significant works of art and their own expressive goals. This course is available for EM credit. GE VPA course. GE foundation lit, vis and performing arts course.			

32 Art

2400	3-Dimensional Art	U	3		
	Basic concepts of three-dimensional art focusing on structure with the organization of space and form, using a variety of materials, processes, tools. This course is available for EM credit.				
2555	Introduction to Digital Photography and Contemporary Issues	U	3		
	Students will learn fundamental digital camera techniques and explore contemporary and historical issues in photography including the relationships between technique, concept, and aesthetics as well as the relationship between images, identity formation, and larger social structures. Prereq: Not open to students with credit for 3555. GE VPA course. GE foundation lit, vis and performing arts course.				
2555H	Introduction to Digital Photography and Contemporary Issues	U	3		
	Students will learn fundamental digital camera techniques and explore contemporary and historical issues in photography including the relationships between technique, concept, and aesthetics as well as the relationship between images, identity formation, and larger social structures. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 3555H. GE VPA course. GE foundation lit, vis and performing arts course.				
2990	BFA Portfolio Review	U	0		
	Successful BFA portfolio review. Prereq: 2000 (200), 2100 (205), 2200 (208), 2300 (206), 2400 (207), and one core course in student's proposed area of concentration. Repeatable to a maximum of 2 completions. This course is graded S/U.				
3000	Digital Image Manipulation	U	3		
	Students learn to use Adobe Photoshop and Illustrator software while creating digital media artwork and gaining knowledge of digital artists. Experiences include image capture, generation, manipulation, interpretation, critique, working with the fair use principle, and professional artistic output. Prereq: Not open to students with credit for 2500.				
3001	Internet Art	U	3		
	Students learn introductory programming skills to integrate image, video, animation, and audio for the creation of internet art. Techniques, concepts, and aesthetics of network culture are practiced, such as tactical media, virality, remixing, and identity construction. Repeatable to a maximum of 6 cr hrs.				
3002	Intro to Ceramics: Structure	U	3		
	Introduction to Ceramic Structures; lab practices with various modeling and potter's wheel techniques with lectures covering a broad survey of structural ceramics from brick to tile to sculpture. Prereq: Not open to students with credit for 2502. GE VPA course. GE foundation lit, vis and performing arts course.				
3003	Introduction to Glass Art	U	3		
	Introduction to skills used in molten glass forming, including: gathering, hot sculpting, and blowing. Studio practice is further expanded by experimentation with glass kiln methods. Emphasis on the development of original artworks. Prereq: Not open to students with credit for 2503. Repeatable to a maximum of 6 cr hrs.				
3004	Life Studio Drawing I	U	3		
	Students use a wide range of materials and processes to make drawings based on all aspects of life: the human figure, plants, animals, landscapes, interior spaces, etc. Students practice, appreciate and interpret drawing in relation to various traditions and as a basis for individual development. Prereq: 2100. Not open to students with credit for 2504. Repeatable to a maximum of 6 cr hrs.				
3005	Photography II: Introduction to Darkroom	U	3		
	Students will explore and learn analogue darkroom processes including manual 35mm camera techniques, black and white film development, and archival silver gelatin printing methods. Students will gain knowledge of historical and contemporary issues in photography and develop verbal and written language skills to critique the construction of images. Limited number of loaner film cameras available. Prereq: 2555 (3555). Not open to students with credit for 4005.				
3006	Introduction to Relief and Intaglio Printmaking	U	3		
	Students use a range of traditional processes in relief and intaglio, exploring the dynamics of their applications in the creation of unique works in print media. Students will apply oral and visual communication skills as they evaluate, interpret and respond to significant works of art, the work of their peers, and their own expressive goals. 14 Weeks AU SP, 7 Weeks SU. Prereq: 2100 or 2300. Not open to students with credit for 2516.				
3008	Artists as Leaders and Engaged Citizens	U	3		
	This course focuses on the role of the artist as a citizen and leader for a just and diverse world. Students will learn about the interface of art and citizenship, including such topics as: art as a social and political practice; the potential for art to advance critical and creative thinking about contemporary social issues; creative/collaborative forms of leadership. GE theme citizenship for div and just wrld course.				
3009	Film/Video I	U	3		
	Students engage fundamental concepts and techniques in video including duration, framing, exposure, and sequence with an introduction to filming and editing. Students develop their videos through explorations of contemporary moving-image artwork. Prereq: Not open to students with credit for 5501.				
3012	Intro to Ceramics: Form and Surface	U	3		
	Introduction to Utilitarian uses of Ceramics; lab practices with various modeling and potter's wheel techniques with lectures covering a broad survey of ceramic form and surface, both historic and contemporary. Prereq: Not open to students with credit for 2602.				
3014	Visual Studies: Color	U	3		
	Students investigate seeing and using color. Students develop projects dealing with color organization, phenomena, and interaction. Students integrate theory and practice to appreciate and interpret color as related to various traditions and as a basis for individual development. Prereq: Not open to students with credit for 2514.				
3017	Introduction to Sculpture	U	3		
	An introduction to the principles of sculpture, emphasizing basic forming processes and materials. Includes traditional and non-traditional sculpture making concepts, processes and materials through additive, subtractive, and assemblage sculpture making processes. Prereq: Not open to students with credit for 2507.				
3024	Painting I	U	3		
	Students explore the dynamics of painting. Students make paintings using a variety of approaches with attention to color, light, form, paint application, space and composition. Students practice, appreciate and interpret painting as related to various traditions and as a basis for individual development. Prereq: Not open to students with credit for 2524.				
3054	Painting II	U	3		
	Students explore a variety of painting mediums emphasizing technical, historical and conceptual fundamentals of constructing paintings or 'picture-objects.' Students manipulate spatial and thematic pictorial relationships through painting on various surfaces with a variety of processes and begin to develop the ability to pursue individualized research, processes, themes, and aspirations. Prereq: 3024.				
3056	Introduction to Lithography and Silkscreen Printmaking	U	3		
	Students use a range of traditional processes in lithography and silkscreen printing, exploring the dynamics of their application in the creation of unique works in print media. Students will apply oral and visual communication skills as they evaluate, interpret and respond to significant works of art, the work of their peers, and their own expressive goals. 14 Weeks AU SP, 7 Weeks SU. Prereq: 2100 or 2300. Not open to students with credit for 2526.				
3101	3D Modeling Sculpture	U	3		
	Students learn, practice, and utilize 3D modeling software for generation of form, character, and environment. Includes conceptualization, development, and creation of digital assets for output to formats such as digital prints, game art assets, 3D rapid prototyping, laser cutters and/or CNC mills. Repeatable to a maximum of 6 cr hrs.				
3104	Expanded Drawing	U	3		
	Students expand their definition of drawing by exploring an array of contemporary, historical and conceptual ideas. Students make drawings using a variety of methods and materials, from archival to ephemeral. Students manipulate spatial and thematic pictorial relationships. Students begin to develop the ability to identify and pursue individualized research, processes, themes and aspirations. Prereq: 3004 or 3024.				
3107	Life Sculpture	U	3		
	Students will gain abilities in modeling the human figure clothed and unclothed in clay with and without an armature. Students practice, research, and interpret sculpture in relation to various traditions and contemporary perspectives as a basis for individual creative development.				
3191	Internship	U	1 - 3		
	A cooperative education or internship assignment conducted under the supervision of a faculty member. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.				
3194	Group Studies	U	3		
	Group studies for students in specialized programs. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.				
3335	Intermediate Digital Photography	U	3		
	Students learn in depth color management and post-production skills for photography including archival digital printing from scanned film negatives, digital capture, post-production software for photography, and fine art printing methods. Students deepen their understanding of photo history and contemporary issues in photography through lectures, readings, discussion. Prereq: 2555; or permission of instructor. Not open to students with credit for 5335.				
4002	Intermediate Ceramics: Architectonics	U	3		
	Intermediate course focusing on the Architectural Ceramics; lab practices with various modeling and construction techniques with lectures covering a broad survey of the range of Architectural Ceramics, from structure to cladding to interior and exterior scale. Prereq: 3002 (2502) or 3012 (2602). Not open to students with credit for 3502.				
4006	Upper Level Printmaking: Intaglio + Relief	U	3		
	Students practice/examine individual development and artistic creation through advanced exploration of intaglio & relief printmaking. They begin to develop the ability to identify/pursue individualized research, processes, themes and aspirations while they interpret/respond to significant works of art, work of their peers, and their own expressive goals through rigorous production and critique. Prereq: 3006. Repeatable to a maximum of 9 cr hrs.				
4007	Sculpture: Topics in Experiential Making: Structure, Space, and Material	U	3		
	Exploration of a range of technical and conceptual concerns of Sculpture using primary materials with a focus on research and experimentation. Metal in AU, Wood in SP. Prereq: 3017. Repeatable to a maximum of 9 cr hrs or 3 completions.				

34 Art

5194.20	Group Studies - Ceramics	U G	3	Advanced ceramic studio work developed in consultation with and under close supervision of the instructor. Prereq: Permission of instructor. Not open to students with credit for 691.03. Repeatable to a maximum of 9 cr hrs or 3 completions.	5903	Advanced Glass Studio Practice	U G	3	Group studio course designed to facilitate independent work using glass as a primary material for expressing conceptual concerns and creating original artworks. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs.
5194.40	Group Studies - Painting	U G	3	Group studies for students in specialized programs. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.	5995	Imagemakers' Seminar	U G	3	Students expand approaches and definitions of photography in relation to the chosen topic for the semester. Topics may range from but are not limited to studies in abstraction, performance for the camera, documentary, conceptual approaches, materials and aesthetics, and the intersections of issues of identity with contemporary photographic practices. Prereq: 3005 (4005), or permission of instructor.
5194.70	Group Studies - Sculpture	U G	3	Group studies for students in specialized programs. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.	6008	Directed Studies in Studio Art	G	1 - 3	Independent advanced studio practice. Prereq: Grad standing in Art. Repeatable to a maximum of 21 cr hrs or 12 completions.
5202	Mold Making	U G	3	Students will design, fabricate, and use of a wide spectrum of mold-making techniques. Exploring the process of prototyping and generating multiples, students will generate functional and expressive artworks analyzing form with the purpose of reproducing it. Repeatable to a maximum of 6 cr hrs.	6018	Interdisciplinary Seminar - Practices in Contemporary Art	G	3	An exploration of a broad range of critical, theoretical and professional models for developing an emergent practice of contemporary visual art. Prereq: Grad standing in Art.
5215	Social/Documentary Photography	U G	3	Student will engage in an advanced production course with emphasis on the conceptual frameworks underpinning the documentary tradition in historical and contemporary photography. Prereq: 3005 (4005).	6108	Graduate Teaching Seminar	G	3	Exercises and discussions exploring techniques used in organizing, presenting, and evaluating materials taught in studio art classes with special focus on the process of developing a teaching portfolio, best teaching practices and pedagogy. Prereq: First year Grad standing in Studio Art, or permission of instructor. Not open to students with credit for 896.
5254	Painting Now	U G	3	Students expand approaches and definitions of painting in relation to the chosen topic for the semester. Topics range from studies in abstraction, figuration, conceptual approaches, materials and techniques, landscape/light/space, installation, etc. Independently and in groups, students challenge themselves to make paintings through rigorous experimentation, research and critical reflection. Prereq: 3054. Repeatable to a maximum of 6 cr hrs.	6691	Foundational Studio Practice - Art and Technology	G	1 - 3	Studio practice in Art and Technology. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5302	Material Science for Artists	U G	3	Advanced studio focused on geologic and chemical earth science as it pertains to art. Safe and efficient testing habits will explore applications such as clay and glaze formulation. Parallels will be drawn in metals, glass, paper, and paint. Prereq: 2502 (340), 2602 (342), and 3502 and 3602, or 440 and 442; or permission of instructor. Not open to students with credit for 640 and 644.	6692	Foundational Studio Practice - Ceramics	G	1 - 3	Advanced studio practice in ceramics. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5445	Alternative Processes in Photography	U G	3	Advanced production and study of antique and alternative processes in photography such as non-silver emulsions, through the creation of a cohesive body of work. Prereq: 5225, 5235, 695.07, or 695.08; or written permission of instructor. Concur: 4995 or 690. Not open to students with credit for 695.06.	6693	Foundational Studio Practice - Glass	G	1 - 3	Advanced studio practice in glass. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5502	Special Projects - Ceramics	U G	3	Students explore ceramics through individualized projects to cultivate, develop and refine ideas, research, experimentation, critical thinking. Students explore and interpret contemporary issues in ceramics and develop a body of ceramics objects as well as a ceramic practice. Prereq: 4002 or 4012, or permission of instructor. Repeatable to a maximum of 9 cr hrs.	6694	Foundational Studio Practice - Painting	G	1 - 3	Advanced studio practice in painting. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5591	Independent Studio - Art and Technology	U G	3	Advanced studio practice in art and technology. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs.	6695	Foundational Studio Practice - Photography	G	1 - 3	Advanced studio practice in photography. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5592	Independent Studio - Ceramics	U G	3	Advanced ceramic studio work developed in consultation with and under close supervision of the instructor. Prereq: Permission of instructor. Not open to students with credit for 691.03. Repeatable to a maximum of 9 cr hrs or 3 completions.	6696	Foundational Studio Practice - Printmaking	G	1 - 3	Advanced studio practice in printmaking. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5593	Independent Studio - Glass	U G	3	Advanced studio practice in glass art making. Prereq: Permission of instructor. Not open to students with max credit for 691.04. Repeatable to a maximum of 12 cr hrs.	6697	Foundational Studio Practice - Sculpture	G	1 - 3	Advanced studio practice in sculpture. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.
5594	Independent Studio - Painting/Drawing	U G	3	Advanced studio practice in painting. Repeatable to a maximum of 12 cr hrs.	6891	MFA Studio Critique: Art and Tech	G	1	Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.
5596	Independent Studio - Printmaking	U G	3	Advanced studio practice in printmaking. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs.	6892	MFA Studio Critique: Ceramics	G	1	Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.
5597	Independent Studio - Sculpture	U G	3	Advanced studio practice in sculpture. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs.	6893	MFA Studio Critique: Glass	G	1	Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.
5797	Study Tour Foreign	U G	3	Specific content, location, semester offering, and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.	6894	MFA Studio Critique: Painting / Drawing	G	1	Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.
5798	Study Tour Domestic	U G	3	Specific content, location, semester offering, and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.	6895	MFA Studio Critique: Photography	G	1	Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.
5890	Special Topics in Art	U G	3	Open topic that takes into consideration the research interests of current faculty or visiting artists. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.					

6896	MFA Studio Critique: Printmaking	G	1
Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.			
6897	MFA Studio Critique: Sculpture	G	1
Interdisciplinary forum where students develop research skills, learn how to best articulate their artistic production, discuss materials related to their research interests, and critique the work of their peers. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.			
7108	Seminar in Studio Art	G	3
Presentations by students, faculty, and visiting artists, with critical discussion emphasizing contemporary issues. Prereq: Grad standing. Repeatable to a maximum of 9 cr hrs.			
7194	Intermediate Group Studies - Art	G	1 - 3
Group studies for students in specialized programs. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.			
7208	Research and Writing for Artists	G	3
A graduate-level seminar emphasizing research and writing strategies for the required MFA thesis as well as other writing that artists may have to undertake.			
7791	Intermediate Studio Practice - Art and Technology	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7792	Intermediate Studio Practice - Ceramics	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7793	Intermediate Studio Practice - Glass	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7794	Intermediate Studio Practice - Painting	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7795	Intermediate Studio Practice - Photography	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7796	Intermediate Studio Practice - Printmaking	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7797	Intermediate Studio Practice - Sculpture	G	1 - 3
Graduate level studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7999.01	Research in Art - Thesis Advising	G	1
Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.			
7999.02	Research in Art - Thesis Exhibition	G	1
Research in preparation for Thesis Exhibition. Prereq: Permission of instructor. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
7999.03	Research in Art - Thesis Writing	G	1
Research and writing for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
8194	Advanced Group Studies - Art	G	1 - 3
Group studies for students in specialized programs. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.			
8891	Advanced Studio Practice Art and Technology	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
8892	Advanced Studio Practice - Ceramics	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Not open to students with 12 cr hrs for 691.03. Repeatable to a maximum of 12 cr hrs or 4 completions.			
8893	Advanced Studio Practice - Glass	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
8894	Advanced Studio Practice - Painting	G	1 - 3
Advanced graduate studio practice. Repeatable to a maximum of 12 cr hrs or 4 completions.			
8895	Advanced Studio Practice - Photography	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			

8896	Advanced Studio Practice - Printmaking	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
8897	Advanced Studio Practice - Sculpture	G	1 - 3
Advanced graduate studio practice. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			

Art Education

1600	Art and Music Since 1945	U	3
A survey of the visual arts and music in the western world since 1945, based on live and recorded performances and exhibitions. GE VPA course. GE foundation lit, vis and performing arts course.			
2100	Introduction to Arts Management	U	3
This Introduction to Arts Management is a survey of non-profit and for profit arts management topics and issues. Students will examine members of the creative sector in various fields within the arts and cultural sector and what their impact is on the global marketplace. Using scholarly articles and various media, students will identify examples of these individuals around the world.			
2250	Introduction to Art Education	U	3
Ideas, issues, and career possibilities in art education explored through readings, dialogue, and site visitation. Prereq: Pre-Art Education major, or student planning to apply to the Art Education Core Program.			
2520	Digital Artmaking	U	3
Introductory study of digital artmaking through interpreting contemporary artists, constructing a language of art critique, and producing images using graphic design software. GE VPA course.			
2550	Introduction to Visual Culture: Seeing and Being Seen	U	3
An introduction to issues of representation, spectacle, surveillance, and voyeurism, explored through a range of visual images and sites. Prereq: Not open to students with credit for 255. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies course.			
2600	Visual Culture: Investigating Diversity & Social Justice	U	3
A study of the artists, the artworks, and art worlds from diverse ethnic cultures in North America. This course will develop students' skills in writing, reading, critical thinking, and oral expression and foster an understanding of the pluralistic nature of institutions, society, and culture(s) of the United States. Prereq: Not open to students with credit for 2367.01, 2367.01H, or 2600H. GE writing and comm course: level 2 and VPA and diversity soc div in the US course. GE foundation writing and info literacy and lit, vis and performing arts and race, ethnicity and gender div course.			
2700	Criticizing Television	U	3
A critical analysis of a wide variety of television programs through viewing, discussing, reading, and writing. Students will focus on the ways in which racial, ethnic, and gender diversity issues are represented on television. Prereq: Not open to students with credit for 2367.03, Theatre 2367.03, or 2700. GE writing and comm course: level 2 and diversity soc div in the US course. GE foundation writing and info literacy and race, ethnicity and gender div course. Cross-listed in Theatre.			
3680	Exploring the Creative Industry: Arts Issues in the 21st Century	U	3
Explores the relationships within the creative sector; Artistic workforce, contemporary art trends, organizational structure and variety within the industries. Prereq: 2100. Not open to students without credit for 2100 who are also enrolled in the Arts Management program.			
3681	Managing Non-profit Arts Organizations: Balancing Continuity & Change	U	3
Introduces the purposes of non-profit organizations and their functions such as governance, program planning, marketing, and fundraising; encourages critical thinking in managerial decision making through practical assignments. Prereq: 2100. Not open to students without credit for 2100 who are also enrolled in the Arts Management program.			
3690	Arts Entrepreneurship	U	3
This course helps students gain skills toward using creativity and artistry to solve problems and identify their personal sites of expertise as they begin to think about their future careers. Identifying opportunities in the arts can take on aspects of using artistic skill to address social problems, create economic value, and bring aesthetic solutions to social, cultural, and business problems.			
3900	Art & Curriculum Concepts for Teachers	U	2
Problems of teaching in terms of personal knowledge about art, insight into children's art work, and understanding of elementary school curriculum. Prereq: Not open to students with credit for 600. Not open to art education teacher-candidates. Admis Cond course.			
4000	Critical Pedagogies in Art Education	U	3
Investigating the interrelationship of social and visual cultural issues and their impact on the curriculum and teaching practice. Prereq: Art Education Licensure students, or permission of instructor.			
4100	Multi-age Visual Art Education Methods	U	3
Interpreting and writing critically about contemporary art, methods, and strategies that enhance student artmaking. Prereq: Art Education Licensure students, or permission of instructor.			

36 Art Education

4189.02	Teaching Practicum: Pre K-12	U	12			
	Field-based teaching practicum at the prekindergarten through Grade 12 levels. Prereq: Art Education Licensure students, or permission of instructor. Not open to students with credit for 786 or 787. Admis Cond course.					
4191	Internship	U	1 - 9			
	Students intern at non-public school sites to synthesize and apply what they have learned in the classroom through concentrated practice in the field. Prereq: Jr standing or above, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.					
4193	Individual Studies	U	1 - 9			
	Individual studies and project work in specified problems in the field of art education. Prereq: Written permission. Not open to students with credit for 493. This course is graded S/U.					
4194	Group Studies	U	1 - 12			
	Group studies and project work in specified problems of the field of art education. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.					
4200	Curriculum and Assessment in Art Education	U	3			
	This course explores self-efficacy in teaching roles, to expose students to curriculum development and planning by examining what curriculum is, how teachers develop ideas for curriculum, how to develop relevant and meaningful curriculum, and how to incorporate the various components and possibilities of art education into curriculum plans. Prereq: Art Education Licensure students, or permission of instructor.					
4300	Professional Practice in Art Education	U	3			
	History of the field with an emphasis on major ideas in philosophy and learning theory that affect current trends. Prereq: Art Education Licensure students, or permission of instructor.					
4400	Disability and Inclusive Practices in Art Education	U	3			
	Strategies that can be used in teaching art to students with special needs and lesson planning for inclusion. Prereq: Art Education Licensure students, or permission of instructor.					
4491	Applied Research	U	1 - 6			
	Studies in empirical, philosophical, curriculum, and studio problems in art education. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions.					
4500	Clinical Experience	U	3			
	Contact with practicum sites and collaborative work with cooperating teachers to plan and deliver instruction. Prereq: Art Education Licensure students, or permission of instructor. Not open to students with credit for 689. Admis Cond course.					
4740	Docent Training	U	3			
	Introduces students to theory and techniques of teaching in museum galleries at the Wexner Center for the Arts. Students are trained to lead tours by studying contemporary art, tour planning strategies and interactive techniques. Prereq: Permission of instructor.					
4797	Foreign Tour	U	1 - 3			
	Foreign travel. Repeatable to a maximum of 3 cr hrs or 3 completions. This course is graded S/U.					
4798	Domestic Tour	U	1 - 6			
	Domestic travel. Prereq: Not open to students with credit for 698.01. This course is graded S/U.					
4900	Teaching Seminar	U	3			
	Concurrent to teaching practicum. Prereq: Art Education Licensure students, or permission of instructor. Admis Cond course.					
4998	Creative Activity in Art Education: Undergraduate Scholarship	U	1 - 9			
	Undergraduate scholarship. Repeatable to a maximum of 9 cr hrs or 2 completions. This course is graded S/U.					
4999	Thesis Research	U	1 - 9			
	A program of reading and research arranged for each student, with individual conferences and reports and thesis. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 2 completions. This course is graded S/U.					
4999H	Honors Thesis Research	U	1 - 9			
	A program of reading and research arranged for each student, with individual conferences and reports and honors thesis. Prereq: Honors standing, and permission of instructor. Not open to students with credit for 783H. Repeatable to a maximum of 9 cr hrs or 2 completions. This course is graded S/U.					
5367	Reel Injuns: Identity and Representation	U G	3			
	Introduces broad range of issues, theories, and practices of visual culture within the gaze of American Indians and how reaction to or rejection shapes indigenous identities, as well as non-Native understandings of American Indians. This course will explore action research practices, historical research methodologies, and critical readings. Prereq: Not open to students with credit for 3367.					
5470.01	Contemporary Art, Learning, and Public Practice	U G	3			
	This course will engage with museum studies frameworks, contemporary application, assorted texts, applied tactics, and techniques of teaching and learning and public practices in contemporary public art spaces. Students will explore the myriad ways programming, teaching, learning, engagement, curating, service, function and intersect in the museum and other public arts and cultural spaces.					
5670	Public Policy and the Arts	U G	3			
	Introduction to the purposes, rationales, interests, issues, political dynamics, and performance of agency/programs in the U.S. cultural policy system. Prereq: Not open to students with credit for 670.					
5671	Organizational Leadership in the Nonprofit Arts	U G	3			
	Students will be assisted in enhancing their knowledge and ability to take responsible leadership roles in non-profit arts organizations and as a major constituent of public arts agencies. Prereq: Not open to students with credit for 671.					
5672	Managing Cultural Policy Change	U G	3			
	Planning and executing strategic change in public arts agencies. Explores implications of shifting from a supply/demand to a value-based cultural policy paradigm. Prereq: Not open to student with credit for 672.					
5674	The Creative Sector and Creative Cities	U G	3			
	Examines policy experiences of U.S. and other countries pertaining to the composition, workforce, and support systems of the creative industries across non-profit, commercial, community, and embedded settings.					
5675	International Cultural Relations	U G	3			
	Explores cultural exchange as a policy tool of international cultural engagement, nation branding, and cultural diplomacy. Also considers international festival and exhibitions, cultural trade, and international collaboration.					
5681	Black Art in America: Arts and Cultural Policies from Reconstruction to Afrofuturism	U G	3			
	This course takes a unique approach in how arts management, arts entrepreneurship, cultural production, and cultural organizations are studied. This is done by looking at the decisions made, and practices and policies employed, by Black Americans in the arts throughout the complex, and often problematic, history of the United States. Prereq: Not open to students with credit for AfAmASt 5681. Cross-listed in AfAmASt.					
5682	Nonprofit Arts Institution Governance and Board Leadership	U G	3			
	Research-based, practical exploration of nonprofit boards critically examines governance policies and practices; specifically focusing on management, board and staff relations and issues of accountability. Prereq: Not open to students with credit for 782.					
5683	Developing Arts Careers: Positioning Passion	U G	3			
	Prepares students as entrepreneurs to enter nonprofit, commercial, public and/or academic careers through independent investigation, dossier development, research proposals, and grant writing. Prereq: Not open to students with credit for 683.					
5684	Arts Participation, Cultural Literacy, and Audience Development	U G	3			
	Building on empirical and theoretical research, this course constructs a framework to understand audience participation, understanding and reception of specific art forms. Prereq: Not open to students with credit for 781.					
5685	Arts/Cultural Organizations: Resource Management & Revenue Streams	U G	3			
	An analysis of current issues in resource management and revenue streams available to arts & cultural organizations, and its application to marketing and development practice.					
5686	Cultural Program Design, Implementation, and Evaluation	U G	3			
	Research of program theory, design, and their application implementation.					
5687	The Social World of the Arts	U G	3			
	We often think about the arts as primarily aesthetic endeavors, but the social world around the creation, production, distribution, and reception of art are key in understanding the role of art and of artists in society. In this class, students will use a sociological lens to examine how individuals and groups create, produce, distribute, and consume art.					
5688	Marketing, Communications, & Social Media in Nonprofit Arts Institutions	U G	3			
	This class focuses on strategies for identifying and developing relationships between audiences/visitors and nonprofit arts institutions through the use of digital technology, specifically social media.					
5795	Seminar on Topical Issues in Art Education.	U G	3			
	Seminar on topical issues in Art Education. Repeatable to a maximum of 30 cr hrs.					
5797.01	Study at a Foreign Institution	U G	1 - 9			
	An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students will pay Ohio State fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Repeatable to a maximum of 15 cr hrs or 5 completions.					

5797.02	Exploring Jamaican Arts and Culture	U G	3
Focuses on arts and cultural practices in schools, colleges, museums, and cultural institutions in Jamaica. Students explore and analyze policies, practices, content, and pedagogies of the arts in Jamaica in comparison and contrast with our understandings of such in the United States.			
5797.03	Ireland: Places, Spaces & Earthworks	U G	3
This course offers students an introduction to Neolithic to historic Christian to contemporary Irish material culture. It is designed to use the resources at University College Dublin to develop knowledge through research, critical reading/analysis, and oral and/or visual expression in fostering an understanding of the pluralistic and historic nature of institutions, society, and Irish cultures.			
5798.01	Study Tour: Domestic	U G	1 - 9
Specific content, location, semesters of offering, and prerequisites vary; contact department office for details. Repeatable for differently titled study tours only. Repeatable to a maximum of 27 cr hrs or 3 completions.			
5798.02	Cultural Equity, Arts Policy & Advocacy in Puerto Rico	U G	3
This course is a special course of study for those interested in the impact & role of cultural arts in engaging issues of social justice within communities. Renowned community experts and scholars culturally grounded in the arts, public policy and advocacy will present and engage with students on best practices that have made positive and significant contributions to diverse communities.			
6000	Reflective Practice, Research, and Portfolio	G	1 - 5
This is a series of 6 credits to supplement students' coursework in the Online MA in Art Education program. Students document their journey in the MA program through the creation of a blog, cultivate reflective practice through exercises that supplement coursework, and develop research skills as practitioner-researchers in an art teacher's classroom, a museum setting, or a community arts space. Prereq: Enrollment in the Online MA Art Education Program. Repeatable to a maximum of 9 cr hrs or 7 completions. This course is graded S/U.			
6998	Research for Non-thesis	G	1 - 9
Research for non-thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs. This course is graded S/U.			
6999	Research for Thesis	G	1 - 9
Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.			
7000.10	Concepts, Theories, and Issues in Art Education	G	2
Review of analytical reading and writing; overview of topics for art education research; graduate faculty research; national and international issues; research resources. Must be taken during the first year of graduate study.			
7000.20	Concepts, Theories, and Issues in Arts/Culture Policy	G	2
Review of analytical reading and writing; overview of topics for arts policy & admin. research; graduate faculty research; national and international issues; research resources. Must be taken during the first year of graduate study.			
7000.30	Issues, Frameworks and Theories for Art Educators	G	3
This course is a required introductory course in Art Education. In this online course, we will critically analyze articles that provide an overview of topics for art education research; graduate faculty research; national and international issues, and research resources.			
7100	Histories and Policies of Arts Education	G	3
Students explore arts/education history while developing skills in researching cultural practices, programs and protocols, and analyzing the impact of arts programs/initiatives and social interventions on citizens and communities. Prereq: Not open to students with credit for 701 or 704.			
7200.10	Introduction to Research Methodologies and Methods	G	3
Introduction to research philosophies, methodologies and methods in arts education, policy, and administration. Prereq: Not open to students with credit for 705.			
7200.20	Overview of Research Planning for Arts Policy & Administration	G	3
Introduction to a range of research resources and methods applicable to APA students including historical, case studies, surveys & interviews. Using the literature to frame research questions, build a conceptual framework and inform research plan. Prereq: Not open to students with credit for 705 or 809.			
7200.30	Overview of Research for Arts Educators	G	3
Introduction to a broad range of qualitative educational research methodologies in the field of art education, mainly in an art teacher's classroom, a museum setting, or community arts space. Includes research terminology and methodologies, data collection methods, and discusses the power of teachers as researchers in their own classrooms. Practices collecting and analyzing data.			
7300	Introduction to Teaching Arts Education at the College Level	G	2
An introduction to theories, methods and issues related to teaching arts education at the college level. Prereq: New or recently reassigned ARTEDUC GTAs, or permission of instructor. Not open to students with credit for 707.			
7604	Teaching of Studio Activities	G	3
Exploration of instructional application of various art materials for educational settings.			

7606	Technology and Digital Texts	G	3
Theory and practice of engaging others in technologies and digital texts relative to art education practice.			
7607	Curriculum Planning and Assessment in Art Education	G	3
Introduction to curriculum development including artmaking practices and assessment strategies.			
7681	Arts/Cultural Institutions, Organizational Theories & Management Practice	G	3
Building on organizational theories, this course examines the purpose and function of arts and cultural institutions and current management practices in the creative sector. Prereq: Not open to students with credit for 681.			
7701	Contemporary Theory and Art Education	G	3
Investigation of contemporary theory from an interdisciplinary perspective and the implications for art education.			
7707	Action Research Theory and Practice	G	3
Exploration of action research theories and practices in school, community, and organizational settings.			
7708	Universal Design for Learning: Disability Studies and Art Education	G	3
This course explores Universal Design for Learning in Art Education for the purposes of enhancing the learning experiences of students with disabilities and all learners and makes practical applications to classroom experiences.			
7709	Arts-Based Education Research Approaches	G	3
Survey a range of arts-based research methods in the multiple arts and education fields. Explore/develop and analyze innovations in data gathering, analyses, performance/presentation and publication.			
7711	Designing and Writing Research Proposals	G	3
This course is designed to assist in understanding the nature and purpose of the dissertation proposal as well as the strategies necessary to conceive of it and construct it.			
7725	Re-imagining Research Writing Through Creative Inquiry	G	3
This trans-disciplinary writing seminar encourages graduate researchers to develop a philosophy and practice of writing that reflects a full range of scholarly expression. Beginning with a review of expository writing, students engage with the theory and practice of shaping new ways to conceive of and write scholarly research in their respective disciplines.			
7735	Art Museum History, Theory, and Practices	G	3
Critical examination of the historic and theoretical foundations of art and other museums as an institution, drawing on multiple disciplinary perspectives. Counts toward Museum Education specialization.			
7736	Teaching and Learning in Art Museums	G	3
A theoretical and practical study of teaching and learning in and through museums. Counts toward Museum Education specialization.			
7740	Docent Training	G	3
Introduces students to theory and techniques of teaching in museum galleries at the Wexner Center for the Arts. Students are trained to lead tours by studying contemporary art, tour planning strategies and interactive techniques. Prereq: Permission of instructor.			
7748	Art Museum Education & Administration Practicum	G	3
An examination of the role of education in art museums through an in-depth experience in a museum setting. Counts toward Museum Education specialization.			
7767	Critical Analysis of Multicultural Art Education	G	3
Investigation and analysis of multicultural theories, issues, and practices for art education. Prereq: Not open to students with credit for 767.			
7775	Social and Cultural Theories in Art and Art Education	G	3
Critical investigation of theoretical, artistic, and pedagogical concepts related to diversity.			
7777	Research to Advocacy	G	3
This course engages practicing arts educators in developing effective advocacy strategies, arguments and approaches grounded in reliable research and assessment measures. Educators clearly communicating these measures can effectively leverage them in persuading administrators, parents and policy makers to energetically support and advance the critical work of arts education.			
7795	Seminar on Topical Issues in Art Education	G	3
Seminar on Topical Issues in Art Education. Repeatable to a maximum of 30 cr hrs.			
8191.01	Internship in Arts Management	G	1 - 9
Supervised professional experience in performing arts, visual arts, literary arts, or museum/historical organization. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.			

38 Art Education

8191.02	Art and Cultural Policy Internship	G	1 - 9
Supervised professional experience in government arts or a cultural agency at any level - local, state, regional, national, or international - or within a trade or professional association engaged in arts advocacy. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.			
8191.03	Internship: Engaging with Art Museums & Communities	G	1 - 9
Supervised professional experience within a museum or public gallery that provides educational services. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.			
8191.04	Community Arts Internship	G	1 - 9
Supervised professional experience in a community setting that provides programs addressing arts education. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.			
8193	Individual Studies	G	1 - 5
Individual Studies. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 3 completions. This course is graded S/U.			
8194	Group Studies	G	3
Group studies for students in specialized programs. Repeatable to a maximum of 9 cr hrs or 3 completions.			
8798.02	Study Tour Foreign	G	1 - 9
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Foreign. Repeatable for different study tours only. Repeatable to a maximum of 12 cr hrs.			
8998	Research for Candidacy Examination	G	1 - 9
Research for candidacy examination. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.			
8999	Research for Dissertation	G	1 - 9
Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.			

Arts and Sciences

1100.01	Arts and Sciences Survey: General	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.01H	Arts and Sciences Survey: General (Honors)	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Honors standing, or permission of instructor or department. Not open to students with credit for any College Survey 100.XX course. This course is graded S/U.			
1100.04	Arts and Sciences Survey: Transfer	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.05	Arts and Sciences Survey: Art	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.06	Arts and Sciences Survey: Arts and Humanities	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.07	Arts and Sciences Survey: Biological Sciences	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.09	Arts and Sciences Survey: Design	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.10	Arts and Sciences Survey: Mathematical and Physical Sciences	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.11	Arts and Sciences Survey: Music	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			

1100.14	Arts and Sciences Survey: Social and Behavioral Sciences BA	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1100.15	Arts and Sciences Survey: Social and Behavioral Sciences BA/BS	U	1
Academic requirements; University procedures, grading system, resources; student rights and responsibilities; overview of Arts and Sciences academic areas of study and services. Prereq: Permission of department or instructor. This course is graded S/U.			
1101	First or Second Year Seminar	U	1
Seminars on varying topics taught by University faculty. Prereq: Fresh or Soph standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			
1102H	Regional Honors Seminar	U	1
Seminars on varying topics taught by University faculty on regional campuses and intended to provide a common experience for Honors students. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			
1120.01	Arts Scholars Seminar	U	1
This seminar course is designed for first year arts scholars students and explores arts interests, interdisciplinary opportunities, campus and local community arts connections. Prereq: Enrollment in Arts Scholars Program.			
1120.02	Biological Sciences Scholars Seminar	U	1
Scholars Program academic and co-curricular requirements and expectations; University procedures relative to the BIO SCI Scholars experience; resources and opportunities related to the BIO SCI Scholars program theme. Students will explore involvement related to service, research, and preparation for graduate/professional school and careers in the biological sciences. Prereq: Enrollment in Biological Sciences Scholars Program.			
1120.03	Humanities Scholars Seminar	U	1
Designed for the first year Humanities Scholars to explore personal humanities interests, interdisciplinary opportunities, campus and local humanities resources, and cultural topics in the humanities. Prereq: Enrollment in Humanities Scholars Program.			
1120.04	International Affairs Scholars Seminar	U	1
Introduction to major topics and themes in International Affairs; introduction to expectations and guidelines of the IA Scholars Program; overview of university resources and services related to the IA Scholars theme; overview of professional development and potential career paths; connections to and awareness of campus, city, and national resources related to IA Scholars theme. Prereq: Enrollment in International Affairs Scholars Program.			
1120.05	Law and Society Scholars	U	1
This seminar course is designed to explore interdisciplinary opportunities, campus and community resources, personal and professional development, and themes specific to the Law and Society Scholars Program. Thematic topics will include but are not limited to those related to Ohio's judicial system, free speech, communication, and conflict. Prereq: Enrollment in Law and Society Scholars Program.			
1120.06	STEM Exploration & Engagement Scholars Seminar	U	1
This seminar course is designed for first year Scholars students to explore personal interests, interdisciplinary opportunities, campus and local community resources, and specific theme activities related to STEM Exploration and Engagement Scholars. Prereq: Enrollment in STEM Exploration and Engagement Scholars Program.			
1137.01	First-Year Seminar	U	1
Affords first-year students opportunities for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs.			
1137.02	First-Year Seminar	U	1
Affords first-year students opportunities for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs.			
1137.03	First-Year Seminar	U	1
Affords first-year students opportunities for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs.			
1137.04	First-Year Seminar	U	1
Affords first-year students opportunities for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs.			
1137.05	First-Year Seminar	U	1
Affords first-year students opportunities for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs.			

1138.22 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.23 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.24 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.25 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.26 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.27 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.28 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.29 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.30 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.31 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.32 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.33 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.34 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.35 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.36 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.37 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.38 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.39 First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1138.40S First-Year Seminar U 1
 Affords first-year students the opportunity for contact with faculty in small group settings; introduction to academic areas, research, and frontier areas of scholarly pursuit. Prereq: Fresh standing, or permission of instructor. Only one First-Year Seminar per semester allowed. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.

1191 Non-Credit Internship U 0
 Internship conducted under the supervision of the employer; enrollment and evaluation coordinated by ASC Career Services. Student is responsible for finding the internship prior to the start of the term. Requires permission to enroll. Prereq: GPA 2.0 or above. Repeatable to a maximum of 4 completions. This course is graded S/U.

1411 Information Formats U 1
 This course gives students an overview of the variety of information formats that are available and how they are used in different disciplines. After an overview of research in broad disciplines, students will examine different information formats from different disciplines to gain a better understanding of these formats' elements, how those resources are used, and their importance to disciplines.

1900 Career Readiness for Arts & Sciences Majors U 1
 Broaden understanding of career fields and learn about how to increase readiness for obtaining work related to career goals. Also covers writing resumes, obtaining internships, and effective strategies for finding employment for after graduation. Prereq: Not open to students with credit for 400.01 or ESCE 2271 (EduPAES 270.01). This course is graded S/U.

2001 Personal Wellness and Mental Health U 1
 Personal wellness and mental health are important determinants of success. We introduce evidence-based strategies for managing stress, warding off / combating anxiety and depression, and promoting wellness. We aim to provide students a psychological toolkit that they can rely on in facing a variety of challenges as they progress through the university experience and the following years.

2120 Information Search, Evaluation and Use U 2
 This seven-week course will help you develop skills and habits that will allow you to responsibly find, consume, create, and share information online. Among these habits is the creation of a search strategy, critical evaluation of online sources, and the use of copyrighted materials. We hope you leave this course as an intentional, reflective, and critical consumer of information.

2121 Academic Online Research U 2
 The purpose of this course is to help you develop skills and habits that will help you to be successful on research assignments in college, as well as situations that require you to use information in your professional, personal, and civic lives. In other words, we hope you leave this course as an intentional, reflective, and critical consumer of information.

2193 Individual Studies U 1-3
 Individual Studies for undergraduate students. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

2194 Interdisciplinary Group Studies U 1-3
 Study of special or interdisciplinary topics at an introductory level. 2194H (honors) may be available. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

2194H Interdisciplinary Group Studies U 1-3
 Study of special or interdisciplinary topics at an introductory level. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

2400 Conversations on Morality, Politics, and Society U 3
 Students will explore the topic of the COMPAS program from a variety of disciplinary perspectives and be required to attend or to view recordings of the various COMPAS events. GE culture and ideas course. GE foundation historical and cultural studies course.

42 Arts and Sciences

2400E	Conversations on Morality, Politics, and Society	U	3
Students explore the COMPAS program topic from a variety of perspectives and attend or view recordings of various COMPAS events. They also complete additional readings, have 5-6 hours of meetings with the instructor, and write a term paper. Prereq: Honors standing, or permission of instructor. GE cultures and ideas course. GE foundation historical and cultural studies course.			
2797.02	Contemporary India	U	3
This interdisciplinary course introduces students to contemporary India, with a focus on the foundational diversities of Indian society, culture, religion, politics, and economy. Students will also critically reflect on how their study abroad has impacted their understanding of India and our contemporary world. GE education abroad course.			
2798.02	Study Tour: Foreign	U	1 - 10
Specific content, location, semesters of offering, and prerequisites vary; contact department office for details. Repeatable for differently titled study tours only. Non GE. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions.			
2798.03	Study Tour: Introduction to the History, Politics, and Culture of Great Britain	U	3
This interdisciplinary study tour introduces students to the History, Politics, and Culture of Great Britain. An examination of certain core British institutions, traditions, and problems mainly through the lens of imaginative literature - especially poetry and short stories - but will also incorporate other kinds of sources. GE education abroad course.			
2798.04	Introduction to Quebec	U	3
This interdisciplinary course introduces students to the history and culture of Quebec with time spent in Montreal, Ottawa, and Quebec City. The course examines core institutions and traditions through lecture, discussion and experiential learning of the region's history, politics, literature, geography and science. Prereq: Permission of instructor. GE education abroad course.			
2798.05	Cuba: Race, Revolution, and Culture	U	3
This course analyzes the role of race and culture in the formation of contemporary Cuban politics and national identity, with emphasis on Cuba's African roots and attention to the role of the arts as a means of resistance to social injustice. Instruction is at the Newark campus (3 weeks) and in Cuba (10 days in Havana and Varadero). Prereq: Permission of instructor. GE education abroad course.			
2798.06	The Past, Present, and Future of Liverpool	U	3
This interdisciplinary study tour introduces students to the history, literature, and culture of Liverpool, England. The course examines core institutions, traditions, and issues through lecture, discussion, and experiential learning of government, literature, history, culture, and other relevant materials. Prereq: Permission of instructor. GE education abroad course.			
3142.01	Online Research and the Science Literature	U	2
Searching techniques, information resource types, and evaluation of online science information resources. Designed for life/physical sciences and engineering students.			
3191.01	For-Credit Internship	U	1 - 12
Internship conducted under the supervision of the employer; grade determined by ASC faculty member. Student must obtain the internship before the start of the term, and a signed learning agreement approved by faculty member and employer by first day. Enrollment in an academic department internship course is not permitted during the same term. Prereq: GPA 2.50 or above, and Soph standing or above. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
3191.02	Internship & Career Exploration	U	1 - 2
Internship under the supervision of the employer, and enrollment and evaluation coordinated by ASC Career Services. Student must obtain the position, and signed agreements by employer and instructor, prior to the start of the term. Assignments vary. Prereq: GPA 2.50 or above, and Soph standing or above. Enrollment in an academic department internship course is not permitted during the same term. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
4194	Interdisciplinary Group Studies	U	1 - 3
Study of special or interdisciplinary topics at the upper-division level. 4194H (Honors) may be available. Prereq: Jr or Sr standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			
4194H	Interdisciplinary Group Studies	U	1 - 3
Study of special or interdisciplinary topics at the upper division level. Prereq: Honors standing, and Jr or Sr standing; or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4870	The Ohio State University: Its History and Its World	U	3
An introduction to the past and present of OSU, its importance, its disciplines, the interrelations of the academic and other components of the institution, and the contributions over the years of OSU to the wider world. Prereq: Not open to students with credit for History 4870. GE cultures and ideas course. GE foundation historical and cultural studies course. Cross-listed in History.			
4998	Undergraduate Research in the Arts and Sciences	U	0 - 10
Undergraduate research or creative activities in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.			

5194	Group Studies	U G	1 - 3
Study of special or interdisciplinary studies. 5194H (honors) may be available. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
5194H	Group Studies	U G	1 - 3
Study of special or interdisciplinary studies. Prereq: Honors standing, or permission of department or instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			
5797	Study at a Foreign Institution	U G	1 - 12
An opportunity for students to study at a foreign institution and receive OSU credit for work completed there. Students will pay OSU fees and any fees in excess of OSU tuition, as well as all travel and subsistence costs. Prereq: Permission of department chairperson. Repeatable to a maximum of 48 cr hrs or 4 completions.			
5798	Study Tour: Foreign	U G	1 - 10
Specific content, location, semesters of offering, and prerequisites vary; contact college office for details. Repeatable for differently titled study tours only. Non GE. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions.			
6000	Career Exploration for Graduate Students	G	1
This 7-week course introduces skills for discovering a variety of career paths; assessing fit; cultivating necessary skills and networks; and entering a profession. Each student learns to use tools to research possible career paths; practices informational interviewing; identifies any skills they need to develop for the chosen path; and plans next steps to achieving their goals. Prereq: Grad standing. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
6001	Holistic Professional/Life Planning: Creating a Strategy That is Tailored to You	G	1
In this class, students reflect on various aspects of their lived experience, strengths, values, professional/life, and research interests to create a personal strategic plan. Through a series of exercises, students map their life through the lens of intersectionality and consider how the work they want to do in the world aligns with the way they are currently living. This class is geared towards graduate students in the College of Arts and Sciences who have completed at least one year of graduate school. (Enrollment Cap: 15 students). Prereq: Grad standing, and permission of instructor.			
6191	Experiential Learning -- Graduate	G	½ - 3
This course supports experiential learning that furthers graduate students' professional development. Experiences may include, for example, community-engaged blends of research and service; job-shadowing; internships; or other projects that expand beyond the boundaries and spaces of academic programs. A member of the graduate faculty must supervise the experiential learning. Prereq: Grad standing and permission of instructor. Repeatable to a maximum of 6 cr hrs or 26 completions. This course is graded S/U.			
6750	Multidisciplinary Seminar for Artists	G	3
A multidisciplinary seminar for graduate students in the arts throughout the university, in which we will look at the process of art-making through the lens of each medium as well as the wider lens we can provide as a group. Prereq: Not open to students with credit for 750.			
8194	Group Studies	G	1 - 3
Study of special or interdisciplinary topics at the graduate level. Repeatable to a maximum of 9 cr hrs or 3 completions.			

Asian American Studies

4998	Undergraduate Research	U	1 - 4
Undergraduate research in variable topics related to Asian American Studies. Student-initiated projects. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4998H	Undergraduate Honors Research	U	1 - 4
Undergraduate honors research in variable topics related to Asian American Studies. Student-initiated projects. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4999	Undergraduate Research: Thesis	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and thesis. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
4999H	Honors Thesis Research	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
5191	Internship	U G	1 - 3
Workplace experience requiring writing and/or research. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
5193	Individual Studies	U G	1 - 3
Individual directed study for work not typically offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			

5194 Group Studies U G 1 - 3
Directed study of an Asian American topic not regularly offered in classes. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions.

5700 Asian American Studies Workshop U G 1 - 3
Structured participation in seminar or event organized for that semester. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.

Astronomy

1101 From Planets to the Cosmos (With Lab) U 4
Overview of the Copernican revolution, the discovery of the nature of our solar system, light, gravity, and planets around other stars; the nature and evolution of stars and origin of the chemical elements; the history of galaxies and the expanding universe. Weekly laboratory. Not recommended for students who plan to major in astronomy or physics. Prereq: Math 1050 (075) or 102, or an ACT math subscore of 22 or higher that is less than two years old, or Math Placement R or higher; or permission of instructor. Not open to students with credit for 1140, 1144, 1161H (H161), 1162H (H162), 2161H, 2162H, 2291 (291), or 2292 (292). GE nat sci phys course. GE foundation natural sci course.

1102 From Planets to the Cosmos (No Lab) U 3
Overview of the Copernican revolution, the discovery of the nature of our solar system, light, gravity, and planets around other stars; the nature and evolution of stars and origin of the chemical elements; the history of galaxies and the expanding universe. Not recommended for students who plan to major in astronomy or physics. Prereq: Math 1050 (075) or 102, or an ACT math subscore of 22 or higher that is less than two years old, or Math Placement R or higher; or permission of instructor. Not open to students with credit for 1101, 1140, 1144, 1161H (H161), 1162H (H162), 2161H, 2162H, 2291 (291), or 2292 (292). GE nat sci phys course.

1142 Black Holes U 3
The nature, formation, and discovery of black holes in the universe. Prereq: ACT Math Subscore of 22 or higher, or Math Placement Level R or better, or Math 1050 (075), or permission of instructor. Not open to students with credit for 142. This course is available for EM credit. GE nat sci phys course. NS Admis Cond course.

1143 Cosmology: History of the Universe U 3
Description of the history of the universe from Big Bang to present; how observations led to discovery of this history. Prereq: Not open to students with credit for 2292 (292) or 1162 (162) or 143 or 172. This course is available for EM credit. GE nat sci phys course. NS Admis Cond course.

1144 Stars, Galaxies, and the Universe U 3
Structure, motions, and evolution of stars, interstellar material, galaxies, and the universe as a whole. Not recommended for students who plan to continue in astronomy or physics. Prereq: ACT Math Subscore of 22 or higher, or Math Placement Level R or better, or Math 1050 (075), 102, or permission of instructor. Not open to students with credit for 2292 (292), 1162 (162), 1162H (162H), or 172. This course is available for EM credit. GE nat sci phys course. NS Admis Cond course.

1221 Astronomy Data Analysis U 3
Overview of data analysis in astronomy. The course will combine select topics in modern astronomy with contemporary data analysis methods implemented in the Python programming language, illustrating how astronomical data lead to scientific conclusions. It is intended for students with interest in astronomy and analysis of large data sets; prior astronomy experience not required. Prereq: or concur: Math 1141, 1151, or 1161. GE nat sci phys course.

2140 Planets and The Solar System U 3
We study the formation, current properties, and evolution of the Sun, planets and minor bodies of the Solar System; how they compare with planetary systems around other stars; and how people, over millennia, inferred that the Earth was not at the center of the Universe. The GE foundation pre-requisite is waived for students taking this course to satisfy the legacy GEL requirement (formerly Astronomy 1140). However, students should be aware that the material will be presented at a higher level than foundations courses, and they should consult with their advisor or the instructor to ensure adequate preparation for the material. Prereq: Completion of the Natural Science GE Foundation and Math at the level of 1050 or higher, or permission of instructor. Not open to students with credit for 1140, 1161, 1161H, or 2291. GE nat sci phys course. GE theme origins and evolution course.

2141 Life in the Universe U 3
We will learn about scientists' ongoing quest for answers to some of the most fundamental human questions: How did life originate on Earth? Is there life on other worlds? Are we alone in the universe? What is the long-term future of life in the universe? The GE foundation pre-requisite is waived for students taking this course to satisfy the legacy GEL requirement (formerly Astronomy 1141). However, students should be aware that the material will be presented at a higher level than foundations courses, and they should consult with their advisor or the course instructor to ensure adequate preparation. Prereq: Completion of the Natural Science GE Foundation, Math at the level of 1050 or higher, or permission of instructor. Not open to students with credit for 1141. GE nat sci phys course. GE theme origins and evolution course.

2193 Individual Studies U 1 - 10
Independent library or laboratory work on a special problem or topic in observational or theoretical astronomy. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 3 completions. This course is graded S/U.

2194 Group Studies U 1 - 10
Special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U.

2291 Basic Astrophysics and Planetary Astronomy U 3
Motions and physical nature of objects in the solar system; electromagnetic radiation, telescopes, and astronomical detectors. Prereq: Physics 1251 (133), or permission of instructor. Not open to students with credit for 291. This course is available for EM credit. GE nat sci phys course.

2292 Stellar, Galactic, and Extragalactic Astronomy and Astrophysics U 3
Observational and physical properties of the sun and stars; stellar structure and evolution; interstellar medium; galaxies and cosmology. Prereq: 2291 (291), or permission of instructor. Not open to students with credit for 292. This course is available for EM credit. GE nat sci phys course.

2895 Topics in Astrophysics U 1
Prospective astronomy majors will meet weekly with different astronomy faculty to learn about current research topics, facilities, and opportunities available in the undergraduate astronomy program. Prereq: Not open to students with credit for two sections of 295. This course is graded S/U.

3350 Methods of Astronomical Observation and Data Analysis U 3
Astronomical observational techniques and quantitative analysis of astronomical data; practical experience with modern astronomical instrumentation and computer-based reduction, analysis, and interpretation of astronomical data. Prereq: 1162 (162), 1162H (162H), or 2292 (292), and Math 1152 (153), and Physics 1251 (133). Not open to students with credit for 350. GE data anyl course. GE foundation math and quant reasoning or data anyl course.

4193 Individual Studies U 1 - 10
Independent library or laboratory work on a special problem or topic in observational or theoretical astronomy. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 3 completions. This course is graded S/U.

4194 Group Studies U 1 - 10
Special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U.

4998 Non-Thesis Research U 1 - 10
Directed undergraduate research (non-thesis). Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.

4998H Honors Non-Thesis Research U 1 - 10
Directed undergraduate research (non-thesis). Prereq: Honors standing; and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.

4999 Thesis Research U 1 - 10
Directed undergraduate research for thesis. Prereq: Permission of department and instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.

4999H Honors Thesis Research U 1 - 10
Directed undergraduate research (thesis). Prereq: Permission of department and instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.

5205 Planetary Science U G 3
A multidisciplinary approach to planetary science, integrating modern methods with the Earth and Astrophysical Sciences. Team-taught with faculty in Earth Sciences. Prereq: Math 1152 and a GE Data Analysis course, or permission of instructor. Not open to students with credit for EarthSc 5205. Cross-listed in EarthSc.

5550 Advanced Astronomical Data Analysis U G 3
Overview of advanced astronomy data analysis methods with applications to the large datasets produced by modern surveys. Students will learn to apply these methods to reproduce several major astronomical results in collaborative research projects. The goal of the course is to better prepare students for graduate-level research in astronomy and other careers that use these methods. Prereq: 3350 or Physics 3700, and Math 2568; or permission of instructor.

5681 Principles of Stellar Evolution and Nucleosynthesis U G 3
Physics of stellar structure, evolution, and nucleosynthesis. Prereq: Math 2174, 2255 (255), or 2415 (415); and Physics 5500 (631); or permission of instructor. Not open to students with credit for 681 or Physics 681.

5682 Introduction to Cosmology U G 3
Structure and evolution of the Universe. Prereq: Math 2174 or 2255 (255) or 2415 (415); and Physics 2301 (263); or permission of instructor. Not open to students with credit for 682 or Physics 682.

5830 Observed Properties of Astronomical Systems U G 5
Observed properties of planets (including extrasolar planets), the solar system, stars, and both active and quiescent galaxies. Prereq: Permission of instructor. Not open to students with credit for 830.

6891 Astronomy Seminar I G 2
First and second year graduate students will participate in weekly departmental colloquia and journal club. Prereq: Grad standing in Astron. Not open to students with 4 qtr cr hrs for 801. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.

44 Astronomy

6892	Astronomy Seminar II	G	2
First and second year graduate students will participate in weekly departmental colloquia and journal club. Prereq: Grad standing in Astron. Not open to students with 8 qtr cr hrs in Astron 802 and/or 803. Students with no more than 4 qtr cr hrs in Astron 802 and/or Astron 803 may take this course only once. This course is graded S/U.			
7193	Individual Studies	G	1 - 10
Independent library or laboratory work on a special problem or topic in observational or theoretical astronomy. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 3 completions. This course is graded S/U.			
7810	Order of Magnitude Astrophysics	G	2
Methods for solution of a wide range of astrophysical problems, building on basic physical principles. Prereq: Grad standing in Astron, or permission of instructor. Not open to students with 8 qtr cr hrs in Astron 810. Students with no more than 4 qtr cr hrs in 810 may enroll only once. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.			
8194	Group Studies	G	1 - 5
Special topics not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 20 completions. This course is graded S/U.			
8823	Atomic and Radiative Processes in Astrophysics	G	3
Continuum and discrete radiative processes relevant to astrophysics. Prereq: Grad standing in Astron; or permission of instructor. Not open to students with credit for 822 and 823.			
8824	Numerical and Statistical Methods in Astrophysics	G	2
Practical applications of numerical and statistical methods used in modern astrophysics. Prereq: Grad standing in Astron; or permission of instructor.			
8831	Stellar Structure and Evolution	G	3
Theoretical aspects of the structure and evolution of single stars. Prereq: Grad standing in Astron; or permission of instructor. Not open to students with credit for 831.			
8870	Dynamics	G	3
Planetary dynamics, stellar dynamics, and astrophysical gas dynamics. Prereq: Grad standing in Astron; or permission of instructor. Not open to students with credit for 825 and 870.			
8871	The Interstellar Medium and the Intergalactic Medium	G	3
The physics of low-density gases, with application to the interstellar medium and the intergalactic medium. Prereq: Grad standing in Astron; or permission of instructor. Not open to students with credit for 871.			
8873	Cosmology	G	3
Structure and evolution of the universe, physical processes in the early universe, formation of cosmic structure. Prereq: Grad standing in Astron; or permission of instructor. Not open to students with credit for 873.			
8998	Directed Research in Astronomy and Astrophysics	G	1 - 12
Directed laboratory or library research under the direction of a faculty member that is not leading directly to a dissertation or thesis. Prereq: Grad standing in Astronomy, or permission of instructor. Repeatable to a maximum of 60 cr hrs or 20 completions. This course is graded S/U.			
8999	Research in Astronomy and Astrophysics	G	1 - 12
Research for dissertation or thesis. Prereq: Grad standing in Astronomy, and permission of instructor. Repeatable to a maximum of 20 completions. This course is graded S/U.			

Athletic Training

2000	Basic Athletic Training	U	3
Introduction to profession of Athletic Training, its governing organizations and basic knowledge and skills in prevention, recognition, management and rehabilitation of injuries and illnesses. Prereq: Enrolled in School of Health and Rehabilitation Sciences, or permission of instructor. Not open to students with credit for 303. Admis Cond course.			
2010	Athletic Training Pre-Clinical Skills	U	1
Instruction and assessment of foundational athletic training skills. Course also includes directed observations in selected athletic training facilities. Prereq or concur: 2000.			
2100	Athletic Training Skills Assessment I	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 2300.			
2189	Introduction to Clinical Care in Athletic Training	U	3
Introduction to clinical field experience in Athletic Training. Includes limited supervised clinical experience in selected Athletic Training facilities. Concur: 2300.			
2200	Foundations of Athletic Training Diagnosis	U	3
In depth exploration of the morphological and functional changes that are influenced by and result from sport participation, injury, and illness and that are foundational for making accurate diagnoses. Prereq: Anatomy 2300 or 3300, and admission to the Athletic Training Program.			
2289	Athletic Training Clinical Experience First Year Multisite	U	3
Supervised clinical field experience in Athletic Training rotating through multiple selected facilities. Prereq: 2189.			

2300	Athletic Training Diagnosis and Acute Management I	U	3
Pathology, evaluation, diagnosis, on-field care, and management of lower extremity & axial skeleton pathologies by athletic trainers. Special emphasis on management of acute trauma and return to play determinations. Prereq: 2200.			
2310	Athletic Training Diagnosis and Acute Management II	U	3
Pathology, evaluation, diagnosis, on-field care, and management of upper extremity & head pathologies by athletic trainers. Special emphasis on management of acute trauma and return to play determinations. Prereq: 2300.			
3100	Athletic Training Skills Assessment II	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 2100.			
3110	Athletic Training Skills Assessment III	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 3100.			
3189	Athletic Training Clinical Experience: Collegiate I	U	5
Supervised Athletic Training clinical experience in the intercollegiate athletics setting. First of three course sequence. Prereq: 2289.			
3289	Athletic Training Clinical Experience: Collegiate II	U	5
Supervised Athletic Training clinical experience in the intercollegiate athletics setting. Second of three course sequence. Prereq: 3189.			
3389	Athletic Training Clinical Experience: Collegiate III	U	1
Supervised Athletic Training clinical experience in the intercollegiate athletics setting. Third of three course sequence. Prereq: 3289.			
3500	Athletic Training Therapeutic Modalities	U	3
Theory and clinical application of physical agents including heat, cold, light, sound, electromagnetic and mechanical energy in treatment and rehabilitation performed by Athletic Trainers. Prereq: 2310.			
3600	Athletic Training Biomechanics	U	3
Theory and clinical application of biomechanics, kinetics, and kinematics by Athletic Trainers in the prevention, diagnosis, management, and rehabilitation of injuries. Prereq: 2310.			
3700	Athletic Training Therapeutic Exercise	U	3
Theory and clinical application of therapeutic exercise in rehabilitation by Athletic Trainers. Prereq: 3500, 3600, and KnHES 5500.			
3750	Musculoskeletal Screening and Corrective Techniques	U	1
Use of musculoskeletal screening to identify injury risks and development and implementation of specific strengthening programs to minimize those risks. Prereq: 3600.			
3800	Care of Medical Emergencies, Trauma, and Disease	U	4
Diagnosis, on-field care, and ongoing management of disease and non-orthopedic trauma by athletic trainers. Special emphasis on management of catastrophic injury and on inflammation and repair. Prereq or concur: 2310.			
4100	Athletic Training Skills Assessment IV	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 3110.			
4110	Athletic Training Skills Assessment V	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 4100.			
4120	Athletic Training Skills Assessment VI	U	1
Assessment of student mastery in selected Athletic Training Clinical Skills. Prereq: 4100.			
4189	Athletic Training Clinical Experience: High School	U	5
Supervised Athletic Training clinical experience in the high school athletics setting. Prereq: 2189.			
4289	Athletic Training Clinical Experience: General Medicine	U	1
Supervised Athletic Training clinical experience in the physician extender/general medical setting. Recommended prereq: 3389. Prereq: 3289.			
4389	Athletic Training Clinical Experience: Elective	U	1 - 12
Elective supervised Athletic Training clinical experience. Intended to provide interested students with additional, non-required clinical practice experiences. Requires pre-approval by AT Division's Director of Clinical Education. Prereq: Permission of Director of Clinical Education. Repeatable to a maximum of 36 cr hrs or 4 completions.			
4500	Administration in Athletic Training	U	3
Administration of Athletic Training programs. Includes management of personnel, budget, facilities, medical records, insurance, legal liability, emergency plans, public relations, and other topics. Prereq: 3700.			
4600	Psychosocial Issues, Identification and Mediation in Physically Active Patients	U	3
Psychosocial theory and facilitation of development. Disorders are outlined to help athletic trainers identify poor coping mechanisms, psychological disorders, mediation and referral strategies and processes. Concur: 4500.			
6000	Emergency Care in Athletic Training	G	1
Preparing for, recognizing, triage, acute care and referral for life threatening and emergent conditions in children, adolescents and adults within the practice of Athletic Training. This course is open only to students in the Master of Athletic Training program or by permission.			

6110	Introduction to Athletic Training Diagnosis	G	2		
	Introduction of differential diagnosis and in depth exploration of the morphological and functional changes that are influenced by and result from sport participation, injury, and illness and that are foundational for making accurate diagnoses.				
6120	Examination, Diagnosis, and Care of Lower Extremity Conditions	G	5		
	Pathology, evaluation, diagnosis, on-field care, and management of lower extremity pathologies by athletic trainers. Special emphasis on management of acute trauma and return to play determinations. Prereq: 6110.				
6130	Examination, Diagnosis, and Care of Upper Extremity Conditions	G	5		
	Pathology, evaluation, diagnosis, on-field care, and management of upper extremity pathologies by athletic trainers. Special emphasis on management of acute trauma and return to play determinations. Prereq: 6110.				
6140	Examination, Diagnosis, and Care of Head and Spine Conditions	G	3		
	Pathology, evaluation, diagnosis, on-field care, and management of head and spine conditions by athletic trainers. Special emphasis on management of acute trauma and return to play determinations. Prereq: 6130.				
6150	Examination, Diagnosis, and Care of Primary Care Conditions	G	5		
	Examination, Diagnosis, acute care, ongoing management, and referral of disease and non-orthopedic trauma by athletic trainers in pediatric, adolescent, adult, geriatric, and comorbid/complex patients. Prereq: 6000 and 6110.				
6189	Clinical Experience: Coordinating Patient Care	G	1		
	Intro of students to clinical care through patient-provider interactions with a focus on privacy considerations, documentation of patient encounters, communication with the healthcare team, and patient education. The pop. associated with this course includes patients across the lifespan (adult, elderly) who participate in non-sport activities, and have varying levels of activity/athletic ability. Prereq: Enrollment in the MAT program or by permission of the instructor. Concur: 6110. This course is graded S/U.				
6210	Athletic Training Clinical Skills I: Foundational AT Skills	G	1		
	The first course of a two course series instructing clinical skills in athletic training. This is a laboratory based course instructing foundational clinical skills used by athletic trainers in the care of their patients.				
6220	Athletic Training Clinical Skills II: Advanced AT Skills	G	1		
	The second course of a two course series instructing clinical skills in athletic training. This is a laboratory based course instructing advanced clinical skills used by athletic trainers in the care of their patients. Prereq: 6210.				
6289	Clinical Experience: Prevention and Risk	G	1		
	Introduction of students to clinical care in athletics setting during the pre-season. Course will focus on clinical experiences related to prevention and risk management through limited directed care. The population associated with this course includes adult who participate in competitive, high-intensity, team activities. Prereq: 6189 and enrollment in the MAT program, or by permission of the instructor. This course is graded S/U.				
6310	Rehabilitative Methods I: Physical Agents & Therapeutic Exercise - Lower Extremity	G	2		
	The first of a two course series on rehabilitation strategies and techniques in athletic training practice. This course includes the foundations of rehabilitation and a specific focus on lower extremity rehabilitation.				
6320	Rehabilitative Methods II: Physical Agents & Therapeutic Exercise - Upper Extremity	G	2		
	The second of a two course series on rehabilitation strategies and techniques in athletic training practice. This course includes advanced rehabilitation and a specific focus on upper extremity and spine rehabilitation. Prereq: 6310.				
6389	Clinical Experience: Introduction to Diagnosis & Acute Care - High School	G	2		
	Provide students with clinical care experiences in a high school athletics during the autumn semester. Course will focus on clinical experiences related to diagnosis and management of acute conditions. The population associated with this course includes the pediatric patients with different socioeconomic statuses who participate in competitive, low- and high-intensity, team activities. Prereq: Enrollment in the MAT program or by permission of the instructor. Concur: 6289. This course is graded S/U.				
6489	Clinical Experience: Introduction to Diagnosis & Acute Care - Collegiate	G	2		
	Provide students with clinical care experiences in a collegiate athletics setting during the autumn semester. Course will focus on clinical experiences related to diagnosis and management of acute conditions. The population associated with this course includes the adult patients who participate in competitive, low- and high-intensity, team activities. Concur: 6289, 6389, and enrollment in the MAT program, or permission of instructor. This course is graded S/U.				
6510	Practicum I Clinical Integration: Problems and Goals	G	1		
	The first of a 4 course clinical skills practicum series assessing student competence in select clinical care skills. This course focuses on conceptual problem solving and goal development skills related to applying a patient centered approach to diagnose, manage, and treating acute and chronic illnesses and diseases and act professionally. Prereq: 6210.				
6520	Practicum II Clinical Integration: Lower Extremity	G	1		
	This is the second of four practicum courses, which focus on assessment of clinical knowledge and skills related to applying a patient centered approach to diagnose, manage, and treating acute and chronic lower extremity conditions. The course will include interactive discussions, hands-on practice, and objective structured clinical examinations. Prereq: 6120 and 6510.				
6530	Practicum III Clinical Integration: Upper Extremity	G	1		
	This is the third of four practicum courses, which focus on assessment of clinical knowledge and skills related to applying a patient centered approach to diagnose, manage, and treating acute and chronic upper extremity conditions. The course will include interactive discussions, hands-on practice, and objective structured clinical examinations. Prereq: 6130 and 6520.				
6540	Practicum IV Clinical Integration: Primary Care	G	1		
	The last of a 4 course clinical skills practicum series assessing student competence in select clinical care skills. Course will focus on assessment of clinical knowledge and skills related to applying a patient centered approach to diagnose, manage, and treating acute and chronic illnesses and diseases. Assess students' ability to work in collaboration with physicians and other providers. Prereq: 6150 and 6530.				
6589	Clinical Experience: Diagnosis & Management	G	4		
	Provide students with a full semester of clinical care experiences. Course will focus on clinical experiences related to diagnosis and management of acute and chronic conditions. The population associated with this course includes the patients who participate in competitive, low- and high-intensity, team activities. Prereq: 6489, and enrollment in the MAT program, or permission of instructor. This course is graded S/U.				
6600	Administration & Leadership in Athletic Training	G	2		
	Administration of Athletic Training programs. Includes management of personnel, budget, facilities, medical records, insurance, legal liability, ethics, public relations, and other topics.				
6689	Clinical Experience: Rehabilitation	G	1		
	Provide students with clinical education experiences in settings that provide rehabilitative care. Course will focus on rehabilitation of patients with surgical, pre-op and post-op, and nonsurgical injuries, conditions, or diseases. The population associated with this course includes patients of all ages and activity levels. Prereq: 6589, and enrollment in the MAT program, or permission of instructor. This course is graded S/U.				
6700	Sports Science Assessment and Monitoring	G	2		
	Monitoring, assessing, interpreting and making decisions based on health and performance status. This course incorporates technology-based human performance and health monitoring and how information gathered is used in promoting both health and performance of the physically active.				
6789	Clinical Experience: Elective	G	1 - 8		
	Provide students with variable credit course to allow for supplemental clinical experience. The duration and site will depend on student needs and goals (i.e., extend a previous clinical experience or explore a new clinical experience). Prereq: 6589, and enrollment in the MAT program, or permission of instructor. Repeatable to a maximum of 24 cr hrs or 4 completions. This course is graded S/U.				
6800	Behavioral Health in Athletic Training Practice	G	2		
	Identification, triage, helping skills and referral of behavioral health conditions in patients seen by athletic trainers and overview of the psychology of athletic performance. There will be three areas of emphasis: Frameworks for understanding important psychological issues for athletic trainers; Overview of common mental health disorders; Helping skills, decision making, referral strategies.				
7089	Intermediate Clinical Experience: Immersive	G	2		
	Immersive clinical care experience that aligns with a comprehensive care full semester clinical experience course. The course will focus on collaborative patient care with a preceptor to communicate and implement client/patient care plans focused on the following areas: critical incident policies, physiological workload monitoring, quality improvements, and daily athletic training clinic operation. Prereq: 6689 and enrollment in the MAT program. Concur: 7189 or 7289. Repeatable to a maximum of 8 cr hrs. This course is graded S/U.				
7189	Intermediate Clinical Experience: Comprehensive Care 1	G	4		
	Provide students with a full semester of clinical care experiences that aligns with the immersive clinical experience course (ATHTRNG 7089). The course will focus on collaborative patient care with a preceptor to develop patient/client care plans, assess prevention, health promotion, and wellness approaches, and health care administration. The population associated with this course will vary. Prereq: 6689 and enrollment in the MAT program, or permission of instructor. This course is graded S/U.				
7289	Intermediate Clinical Experience: Comprehensive Care 2	G	3		
	Provide students with a full semester of clinical care experiences that aligns with the immersive clinical experience course. The course will focus on developing competency to achieve professionalism, patient/client care, prevention, health promotion, and wellness, and health care administration standards required for independent practice. The population associated with this course will vary. Prereq: 7189 and enrollment in the MAT program, or permission of instructor. This course is graded S/U.				
7990	Capstone Project in Athletic Training	G	2		
	Provides a mentored evidence-based practice experience to fulfill the requirements of the capstone project as a final graduation requirement for the Master of Athletic Training. Prereq: Enrollment in the Master of Athletic Training program. This course is graded S/U.				

46 Atmospheric Sciences

Atmospheric Sciences

2193	Individual Studies in Atmospheric Sciences	U	1 - 9
Independent studies on selected atmospheric sciences related topics. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
2194	Group Studies in Atmospheric Sciences	U	1 - 3
Special studies on topics directly related to the atmospheric sciences. Repeatable to a maximum of 15 cr hrs or 5 completions.			
2940	Basic Meteorology	U	3
Introduction to the underlying physics of the atmosphere; basic equations of thermodynamics, radiation, and dynamics are presented and used to explain selected atmospheric phenomena. Prereq: Math 1151 and Physics 1250. Not open to students with credit for 230 or 5900 (520).			
4191	Internship in Atmospheric Sciences	U	1 - 6
An opportunity for practical experience and on-the-job learning in an atmospheric sciences related work place. Prereq: 12 cr hrs in major program, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4193	Individual Studies in Atmospheric Sciences	U	1 - 9
Independent studies on selected atmospheric science-related topics. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4194	Group Studies in Atmospheric Sciences	U	1 - 3
Special studies on topics directly related to the atmospheric sciences. Repeatable to a maximum of 15 cr hrs or 5 completions.			
4998	Undergraduate Research in Atmospheric Sciences	U	1 - 9
Undergraduate research on topics in Atmospheric Sciences. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4998H	Honors Undergraduate Research in Atmospheric Sciences	U	1 - 9
Undergraduate research on topics in Atmospheric Sciences. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4999	Thesis Research	U	1 - 9
A program of research that includes individual conferences and culminates in a thesis. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4999H	Thesis Research	U	1 - 9
A program of research which includes individual conferences and which culminates in an honors thesis and an oral defense. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
5193	Individual Studies in Atmospheric Sciences	U G	1 - 15
Independent studies on selected atmospheric sciences related topics. Prereq: Permission of instructor. Repeatable to a maximum of 5 completions. This course is graded S/U.			
5194	Group Studies in Atmospheric Sciences	U G	1 - 3
Special studies on selected atmospheric sciences related topics. Repeatable to a maximum of 15 cr hrs or 5 completions.			
5797	Study at a Foreign Institution	U G	1 - 9
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			
5901	Climate System Modeling: Basics and Applications	U G	3
An examination of climate system modeling, including their component atmospheric, oceanic, sea ice and land surface models, and their coupling, and their applications. Prereq: A grade of C- or above 2940 or Geog 5900, or permission of instructor.			
5940	Synoptic Meteorology Laboratory	U G	2
Introduction to reading and interpretation of synoptic weather maps and diagram- and data-communication systems. Prereq: 2940 (230) or Geog 5900 (520). Not open to students with credit for 620 or Geog 5940 (620). Cross-listed in Geog.			
5950	Atmospheric Thermodynamics	U G	3
An analysis of the fundamentals of atmospheric thermodynamics and their application to meteorological problems. Prereq: Math 1152 (153). Not open to students with credit for 631.			
5951	Dynamic Meteorology I	U G	3
Fundamental problems in dynamic meteorology; components of the equations of atmospheric motion are derived, and vorticity and divergence in the development of meteorological systems. Prereq: Math 2153. Prereq or concur: AtmosSc 5950.			
5952	Dynamic Meteorology II	U G	3
Advanced problems in dynamic meteorology; use of the equations of motion in numerical models of the atmosphere, especially those used by the National Weather Service. Prereq: Math 2255, and a grade of C- or above in AtmosSc 5951 or AeroEng 2405.			

7193	Individual Studies in Atmospheric Sciences	G	1 - 15
Independent studies on selected atmospheric sciences related topics. Prereq: Permission of instructor. Repeatable to a maximum of 5 completions. This course is graded S/U.			
7194	Group Studies in Atmospheric Sciences	G	1 - 3
Special studies on topics directly related to the atmospheric sciences. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			
8900	Atmospheric Sciences Seminar	G	3
A multidisciplinary seminar reviewing selected topics in atmospheric sciences and related fields. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs.			
8999	Research in Atmospheric Sciences	G	1 - 9
Research for thesis or dissertation purpose only. Repeatable to a maximum of 5 completions. This course is graded S/U.			

Aviation

2000	Introduction to the Aviation Industry	U	3
Introduction to the aviation industry, including its elements, components, and structures. Topics include: aircraft, airports, airspace, a survey of industry segments and purposes, and careers and career paths.			
2100	Private Pilot Fundamentals	U	5
Study of flight fundamentals, aircraft operations, weather, and regulations required for Private Pilot certification. This course is conducted under Federal Aviation Administration Regulations Part 141. This course is available for EM credit.			
2101	Private Pilot Flight Lab I	U	2
The first course in a series of two courses that culminate in the attainment of a private pilot certificate with airplane single engine land privileges. An application and orientation process is required before enrollment. Prereq: A grade of B- or above in 2100, and CPHR 2.0 or above. Not open to students with credit for Aviation 341.			
2102	Private Pilot Flight Lab II	U	2
The second course in a series of two courses that culminate in the attainment of a private pilot certificate with airplane single engine land privileges. Prereq: 2101, and CPHR 2.0 or above. Not open to students with credit for Aviation 342.			
2200	Aviation Organization Analysis and Writing	U	3
This course critically examines aviation organizations, how they manage communication with various stakeholder groups, and implement new policy. Through reading, writing, and critical reflection, students will have a greater understanding of how communication affects the operations of an aviation organization. Prereq: 2000 and 2100.			
2300	Aircraft Performance and Weather	U	3
Weather theory, patterns, data, and analysis. Data formats and sources. Consideration of weather conditions as they relate to aircraft and flight performance. Prereq: Aviatn 2000 and 2100. Not open to students with credit for Aviation 410 or 411.			
2400	Fundamentals in Unmanned Aircraft Systems	U	3
This course introduces the student to Unmanned Aircraft Systems, aircraft aerodynamics and aircraft performance, meteorology, operating within the National Airspace System, regulations, and use-cases of UAS (unmanned aerial systems). This course also provides exposure on UAS career paths, an overview of the various hardware and software that are important to the UAS landscape, and human factors.			
2401	UAS Ground and Flight Operations	U	3
In this course we will go beyond the FAA requirements to be able to fly commercially and start learning about mission planning and flight operations. This course will cover two additional certifications with Unmanned Safety Institute, Visual Line of Sight (VSO) Ground and Flight, and will culminate in both simulated and hands-on flight on a number of different platforms. Prereq: Permission of instructor.			
2501	Commercial Cross Country Flight Lab	U	2
Course country flights designed to meet the requirements of the commercial pilot certificate. Prereq: 2100, 2101, and 2102; and CPHR 2.0 or above; and permission of instructor.			
2900	Air Traffic Control Fundamentals	U	3
This course is an in-depth examination of the role and function of the Air Traffic Control environment as it relates to operations and pilot communications within the National Airspace System (NAS). Prereq: 2300, or permission of instructor.			
3000	Aviation Management and Marketing	U	3
Consideration of management and marketing concepts and models. Analysis of management and marketing strategies and practices in the aviation industry. Prereq: 2000 and 2100. Concur: 2200, or a second-level writing course. Not open to students with credit for Aviation 550 or 654.			
3100	Instrument Flight Fundamentals	U	3
Study of flight by reference to instruments, IFR regulations, and procedures in the National Airspace System. Prereq: A grade of B- or above in Aviatn 2100, 2101, and 2102. Not open to students with credit for Aviation 415.			

3101	Instrument Flight Lab	U	3
Instrument flight operations, navigation, patterns, maneuvers, regulations, approach protocols, and cross country flight planning and execution. Prereq: 2100 and 2102; and CPHR 2.0 or above. Concur: 3100. Not open to students with credit for Aviation 441 or 442.			
3193	Individual Studies in Aviation	U	2 - 5
Research, project(s), and/or investigation into aviation topics that are not treated in existing classes. Prereq: Permission of instructor. Repeatable to a maximum of 7 cr hrs or 2 completions. This course is graded S/U.			
3194	Group Studies in Aviation	U	2 - 5
Research, project(s), and/or investigation into comprehensive and larger aviation topics that are not treated in existing classes and are best served by a team. Prereq: Permission of instructor. Repeatable to a maximum of 7 cr hrs or 2 completions.			
3200	Aviation Regulations and Policy	U	3
Consideration and analysis of aviation regulatory environments and processes, such as regulatory certifications, rulemaking, and legislation. Maintenance, airports, aircraft, and operations. Law, environment, safety, security, and operations. Prereq or concur: 3000.			
3300	Aviation Human Factors and Safety	U	3
Consideration of Human Factors including all sensory, perceptive, cognitive and decision making dynamics as they are expressed in aviation. Consideration of aviation safety including incidents, accidents, crew resource management, and performance. Prereq or concur: 3000. Not open to students with credit for Aviation 540 or 560.			
3340.01	Aviation Human Factors Transition	U	2
First half of the curriculum of the new semester course AVN 3300 - "Aviation Human Factors" which is the combination of AVN 540 - Aviation Human Factors, and AVN 560 - Aviation Safety, under the quarter system. This course will focus solely on the aviation human factors component of the combined course curriculum. The course will be offered for 2 semester units. Prereq: Aviation 560. Not open to students with credit for Aviation 540.			
3400	Aviation Accident Investigation	U	3
Review of accident investigation techniques and methodologies that will be reinforced with case examples. Prereq: 2000 and 2100.			
3600	Business and Corporate Aviation Management	U	3
Analysis and review of the principles and challenges of operating an on-demand air transportation system. Consideration of decision making strategies and sound operating practices that are needed to define and manage a corporate flight department. Presentation of information via textbook, assigned readings, videos, lecture and guest speakers. Prereq: 3000.			
3700	Building a Diverse Workforce in Aviation	U	3
This course is an analysis of what it takes to create and sustain a diverse and inclusive workforce in the aviation industry. Students will engage with guest speakers and readings to understand how diversity, inclusion, and equity are defined. Readings will cover the historical significance of diversity and inclusion efforts. Prereq: 2000, 2100, and 2200; or permission of instructor.			
3900	Air Traffic Management Systems and Environment	U	3
This course is the second in a two-course sequence examining the role and function of the Air Traffic Control environment as it relates to operations and pilot communications within the National Airspace System (NAS). Prereq: 2900.			
4000	Air Transportation Analysis I	U	3
Analysis of domestic and international air transportation systems and models. Particular focus on supply and demand components. Consideration of major industry segments, such as commercial, business, cargo, and general aviation. Prereq: Aviatn 3000. Not open to students with credit for Aviation 650 or 652.			
4100	Commercial Flight Fundamentals	U	3
Study of regulations, aerodynamics, systems, performance profiles, navigation, weather, and operations for the commercial pilot certificate. Prereq: A grade of B- or above in Aviatn 2100, 2102, and 3101; or permission of instructor. Not open to students with credit for Aviation 413.			
4101	Commercial Flight Lab	U	2
Second course toward Commercial Pilot certificate single engine land. Prereq: 2102 and 3101, and a CPHR 2.0 or above.			
4102	Commercial Pilot ASEL Flight Laboratory	U	2
Aviation 4102 is the third course in a series of three courses that culminate into the attainment of a Commercial Pilot Certificate with a Single Engine Land Class Rating. Prereq: 4101.			
4200	Aircraft Dispatch Fundamentals	U	3
Aircraft Dispatch Fundamentals is the first in a two course sequence of Aircraft Dispatch oriented courses that lead to FAA Aircraft Dispatch Certification. This course provides an overview of aerodynamics, navigation, weather theory and forecasting, and flight planning. Small general aviation aircraft are used as examples in the course. Note: Age Requirements: All students must be 21 years of age upon completion of AVN 4201-Applied Aircraft Dispatch in order to receive a graduation certificate that allows students to sit for the FAA Aircraft Dispatch Practical Exam. This is to ensure compliance with the requirements found in FAR 65.53. Prereq: 2100, 2300, and permission of instructor.			

4201	Applied Dispatching	U	3
Study of dispatch fundamentals, aircraft systems, performance, ATC requirements, and the practical application of dispatching an aircraft. Note: Age Requirements: All students will be required to be 21 years of age upon completion of AVN 4201-Applied Aircraft Dispatch in order to receive a graduate certificate that allows you to sit for the FAA Aircraft Dispatch Practical Exam. This is to ensure compliance with the requirements found in FAR 65.53. Prereq: 4200.			
4300	Advanced Multi-Engine Operations	U	2
Introduction and consideration of Part 121 and 135 operations with a comprehensive study of the principles of advanced aircraft operations. Prereq: Aviatn 4100. Not open to students with credit for Aviation 417.			
4301	Commercial Multi Engine Flight Lab	U	2
Aeronautical knowledge and flight training required to attain an airplane multi engine rating in addition to the Commercial Pilot certificate. Prereq: A grade of B- or above in 3100 and 4100; 2501 and 3101; and a CPHR 2.0 or above.			
4400	Airport Management	U	3
Comprehensive study of airport operations and management; role of the airport manager in planning, finance, administration, public relations, socio-political and environmental considerations, and operational requirements and maintenance. Prereq: Aviatn 3000. Not open to students with credit for Aviation 552.			
4500	Aviation Capstone	U	3
Directed research, preparation, and presentation of relevant and coordinated information that summarizes current or predicted significant aviation topics, issues, and developments. Partnership with industry is encouraged. Prereq: Aviatn major, and completion of the Aviatn major core.			
4520	Aviation Capstone: Aviation Engineering	U	3
The Aviation Capstone course is required of undergraduate students who are nearing completion of their studies. The course is designed to assess and build on skills acquired in earlier courses and emphasize situations and challenges that exist in industry. Capstone provides an opportunity to demonstrate and refine many professional competencies and communication skills. Prereq: 3200, Sr standing, and aviation engineering major.			
4800	Professional Practices in Industry	U	2 - 5
Application of academic skills, knowledge, and training to identify issues, problems, or research in the student's aviation industry workplace. Employment and faculty sponsorship, problem identification, analysis, and solution proposals. Prereq: Approval of faculty sponsor and/or industry employer/sponsor. Not open to students with credit for Aviation 489. Repeatable to a maximum of 7 cr hrs or 2 completions. This course is graded S/U.			
4999H	Aviation Engineering Research for Honors Thesis	U	1 - 3
Supervised research and project work arranged individually for honors students resulting in a written Honors thesis. Prereq: Honors standing in the College of Engineering, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 4 completions.			
5000	Air Transportation Analysis II	U G	3
Consideration of commercial air transportation systems with emphasis on performance measurement, productivity, optimization, and network analysis. Prereq: Aviatn 4000. Not open to students with credit for Aviation 591 or 750.			
5100	Flight Instructor Methodology	U G	2
Study of learning theories, communication techniques, the teaching process, teaching methods, and evaluation. Application of these concepts to develop lesson plans and course(s) of study. Prereq: A grade of B- or above in Aviatn 2300, 3100, and 4100. Not open to students with credit for Aviation 421.			
5101	Flight Instructor ASE Flight Lab	U G	2
Aeronautical knowledge, experience and skills necessary to meet or exceed FAR Part 61 requirements for a flight instructor certificate with airplane single engine land privileges. Prereq: A grade of B- or above in 5100, and CPHR 2.0 or above. Not open to students with credit for Aviation 461.			
5102	Flight Instructor AME Lab	U G	1
Aeronautical knowledge and flight training necessary to attain an airplane multi-engine rating in addition to the Flight Instructor ASEL certificate. Prereq: 4301 and 5101.			
5193	Individual Studies in Aviation	U G	2 - 5
Research, projects, and/or investigations into aviation topics that are not treated in existing classes. Prereq: Permission of instructor. Repeatable to a maximum of 7 cr hrs or 2 completions.			
5194	Group Studies in Aviation	U G	2 - 5
Team research, projects, and/or investigation into comprehensive and larger aviation topics that are not treated in existing classes. Prereq: Permission of instructor. Repeatable to a maximum of 7 cr hrs or 2 completions.			
5200	Instrument Flight Instructor Methodology	U G	2
Teaching methods and evaluation procedures for a course of study leading to an Instrument Instructor rating. Prereq: A grade of B- or above in 3100 and 5100.			
5201	Flight Instructor Instrument Flight Lab	U G	1
Necessary aeronautical knowledge, experience, and skills to meet or exceed FAR Part 61 requirements for instrument flight instructor certification. Prereq: 5101, or Flight Instructor Certificate.			

48 Aviation

5300 Airport Planning, Design, and Development U G 3
A comprehensive study of airport planning, design and development, the role of the airport and its components as part of the overall air transportation system, the issues related to the planning, design, and development of the airport and its system. Prereq: Aviatn 3000, CRPlan 3100, or Sr standing in CivilEn major, or Grad standing, or permission of instructor. Cross-listed in CRPlan and CivilEn.

5998H Honors Research in Aviation U G 1 - 6
Designed to give the student an opportunity to pursue special studies in Aviation at an honors level on topics not otherwise offered. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

Biochemistry

2194 Group Studies U 1 - 4
Group Studies. Prereq: Permission of instructor. Repeatable to a maximum of 16 cr hrs or 4 completions. This course is graded S/U.

2210 Elements of Biochemistry U 4
A survey of biochemistry stressing the qualitative rather than the quantitative approach. Credit does not count toward a major in biochemistry. Prereq: Chem 1110 (102) or 1210 (122), or equiv. Not open to students with credit for 211 and 212. This course is available for EM credit.

2900H Early Experience in Research in Biochemistry: Seminar U 1
Introduction to biochemical research through seminars and laboratory tours by faculty in the department. Biology 1113 (113) recommended but not required. Prereq: Honors standing, and Chem 1220 (123), 1620 (163), or 1920H (203H); or permission of instructor. Not open to students with credit for 1900H or 200H. This course is graded S/U.

2998H Early Experience in Research in Biochemistry: Laboratory U 1 - 3
A laboratory sequel to Biochem 2900H to introduce undergraduates to biochemical research. Prereq: Honors standing, and 2900H; or permission of instructor. Not open to students with credit for 1998H or 201H. This course is graded S/U.

3798.01 Study Tour: Domestic U 1 - 10
Study Tour, specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Domestic only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

3798.02 Study Tour: Foreign U 1 - 10
Study Tour. Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Foreign locations only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

4193 Individual Studies U 1 - 5
Individual Studies. Prereq: Permission of instructor. Repeatable to a maximum of 25 cr hrs or 8 completions. This course is graded S/U.

4194 Group Studies U 1 - 4
Group Studies. Prereq: Permission of instructor. Repeatable to a maximum of 16 cr hrs or 4 completions. This course is graded S/U.

4511 Introduction to Biological Chemistry U 4
An introductory course in biochemistry dealing with the molecular basis of structure, metabolism, genetic replication, transcription, and translation in plants, animals, and microorganisms. Prereq: Chem 1220, 1250, 1620, or 1920H, and 2510, 2310, 2610, or 2910H and one semester of Biological Sciences. This course is available for EM credit.

4998 Undergraduate Research in Biochemistry U 1 - 5
Undergraduate research in biochemistry, structural and molecular biology. Prereq: Permission of instructor under whose supervision the work is to be completed. Repeatable to a maximum of 20 cr hrs or 5 completions.

4998H Undergraduate Honors Research in Biochemistry U 1 - 5
Undergraduate research in biochemistry, structural and molecular biology. Prereq: Honors standing, and permission of instructor under whose supervision the work is to be completed. Repeatable to a maximum of 20 cr hrs or 5 completions.

4999 Thesis Research in Biochemistry U 1 - 5
A program of reading and research for each student with individual conferences and reports, culminating in the preparation of a thesis. Prereq: Permission of instructor under whose supervision the work is to be completed. Repeatable to a maximum of 20 cr hrs or 5 completions.

4999H Honors Thesis Research in Biochemistry U 1 - 5
A program of reading and research for each student with individual conferences and reports, culminating in the preparation of an honors thesis. Prereq: Honors, and Jr or Sr standing, and permission of instructor under whose supervision the work is to be completed. Repeatable to a maximum of 20 cr hrs or 5 completions.

5193 Individual Studies U G 1 - 5
A program of supervised independent study for each student with individual conferences and reports. Prereq: Permission of instructor under whose supervision the study is to be completed. Repeatable to a maximum of 25 cr hrs or 8 completions. This course is graded S/U.

5194 Group Studies U G 1 - 3
Group Studies. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.

5613 Biochemistry and Molecular Biology I U G 3
An introductory course in biochemistry and molecular biology developing in three semesters the molecular basis of structure and function of living cells. Prereq: Chem 2510 (252), 2610, or 2910H. Prereq or concur: Chem 2520 (253), 2620, or 2920H, and one semester in Biological Sciences. Not open to students with credit for 613 or 4511 (511).

5614 Biochemistry and Molecular Biology II U G 3
Continuation of Biochem 5613. Prereq: A grade of C- or above in 5613.

5615 Biochemistry and Molecular Biology III U G 3
Continuation of Biochem 5614. Prereq: A grade of C- or above in 5614.

5621 Biochemistry and Molecular Biology Laboratory U G 4
Laboratory course covering the principles and application of basic lab techniques, protein purification, enzyme assays, and recombinant DNA technologies. Prereq: A grade of C- or above in 4511 or 5613, or equiv.

5701 DNA Transactions and Gene Regulation U G 3
Understanding mechanisms of DNA replication, DNA repair and recombination, transcription, translation, regulation of gene expression, and the experimental approaches to these topics. Prereq: 4511 or equiv., and MolGen 4500 or 5606; and Sr or Grad standing, or permission of instructor. Not open to students with credit for MolGen 5701. Cross-listed in MolGen.

5721 Physical Biochemistry I U G 3
Introduction to physical chemistry with emphasis on biological applications; designed for students in the life sciences. Prereq: Biology 1113; Math 1152 (153), 1172, 1181H, or 2162 (162); and Physics 1201 (113) or 1251 (133). Prereq or concur: Chem 2520 (253), 2620, or 2920H. Not open to students with credit for 721.01 or Chem 4200 or 4300.

5722 Physical Biochemistry II U G 3
Continuation of Biochem 5721. Prereq: 5721, or Chem 4200 or 4300. Not open to students with credit for 721.02 and 721.03.

6701 Advanced Biochemistry: Molecular Biology G 3
An advanced treatment of the biochemical principles of gene and genome function. Prereq: 5615 and MolGen 4500, or equivs. Concur: 6761 or BioPhrm 6761, or permission of instructor. Not open to students with credit for BioPhrm 6701, Micrbio 6080, 6010, or MolGen 5701. Cross-listed in BioPhrm.

6761 Advanced Biochemistry: Macromolecular Structure and Function G 3
An advanced treatment of the physical and chemical properties, biological function, and structural biology of proteins and nucleic acids. Prereq: 5615 (615), Chem 2520 (253), 2550 (255), and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 761 and 766, or Chem 761 and 766, or BioPhrm 6761 (761 and 766). Cross-listed in BioPhrm.

6762 Advanced Biochemistry: Enzymes G 1½
An advanced treatment of enzymology and enzyme mechanisms. Prereq: 5615 (615), and Chem 2520 (253) or 2550 (255), and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 762, Chem 762, or MolBioc 6762 (762). Cross-listed in MolBioc.

6763 Advanced Biochemistry: Membranes and Lipids G 1½
An advanced treatment of membranes structure, function, and lipids. Prereq: 5615 (615), Chem 2520 (253), 2550 (255), and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 763, Chem 763, or MolBioc 6763 (763). Cross-listed in MolBioc.

6765.01 Advanced Biochemistry: Physical Biochemistry G 1½
An advanced treatment of physical biochemistry including topics in spectroscopy. Prereq: 5615 (615), Chem 2520 (253), 2550 (255), and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 6765.02 (765), Chem 765, or MolBioc 765.

6765.02 Advanced Biochemistry: Physical Biochemistry G 3
An advanced treatment of physical biochemistry including topics in spectroscopy. Prereq: 5615 (615), Chem 2520 (253), 2550 (255), and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 6765.01 (765), Chem 765, or Molbioc 765.

6785 Research Principles and Techniques G 1 - 5
Research Principles and Techniques. Prereq: Permission of instructor. Repeatable to a maximum of 25 cr hrs or 5 completions. This course is graded S/U.

6998 Graduate Research in Biochemistry G 1 - 12
Research in biochemistry, structural and molecular biology. Repeatable. This course is graded S/U.

6999 Research for Masters Thesis G 1 - 12
Research for Masters thesis only. Repeatable. This course is graded S/U.

7766.01 Advanced Biochemistry: Nucleic Acids G 1½
Advanced understanding of the structure and function of nucleic acids, their interactions with other biological molecules, and of the techniques for detailed mechanistic investigation of nucleic acid structure and function. Prereq: 6701 or 6761, or permission of instructor. Not open to students with credit for 7766.02.

7770.01 Advanced Biochemistry: Protein Engineering G 1½

Current research on genetic and protein engineering of proteins for biotechnological and theoretical studies. Prereq: 6761 (761), Chem 6761 (761), or MolBioC 6761 (761), or equiv, or permission of instructor. Not open to students with credit for 7770.02 (770).

8900.01 Advanced Biochemistry: Biomolecular NMR G 1½

Application of NMR spectroscopy to the study of biological macromolecules. Heteronuclear NMR, product operators, multidimensional spectra, proteins, nucleic acids, structure determination, dynamics, ligand complexes. Prereq: Grad standing in Biochemistry, Biophysics or Chemistry, or permission of instructor. Not open to students with credit for 8900.02 (905).

8990 Advanced Topics in Biochemistry G 1 - 4

Advanced treatment of areas of current interest in biochemistry; topics will be announced each semester. Prereq: 5615 (615) or equiv, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 4 completions.

8999 Research for Dissertation G 1 - 12

Research for doctoral dissertation only. Repeatable. This course is graded S/U.

Bioenergy and Water Treatment Management

1201T Exploring Bioenergy and Water Treatment Management U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

2010T Introduction to Bioenergy and Water Treatment Management U 3

An Introduction to conventional and alternative energy (with emphasis on bioenergy and bioproducts), including conservation, economic and environmental issues. Water Consumption, scarcity, pollution, and water resource recovery will be emphasized. Fermentation technology and biochemistry of microbial breakdown of carbohydrates, proteins, and lipids will be introduced. This course is available for EM credit.

2020T Bioenergy and Wastewater Technologies U 4

A detailed description of technologies employed in bioenergy-generating processes and wastewater treatment. Scientific and technical backgrounds of fermentation technology will be introduced. A critical evaluation of the environmental impacts of organic wastes. Bioreactor design; management of industrial, agricultural, and municipal solid wastes and wastewater will be covered. Prereq: 2010T; Chem 1110 or 1210. This course is available for EM credit.

2030T Feedstock Evaluation and Analysis U 3

An Introduction to feedstocks used in the bioenergy/bio-products industry, including analytical tools for feedstock evaluation and handling, and logistical and economic aspects of industrial biomass feedstocks. Prereq: 2010T. This course is available for EM credit.

2035T Sustainable Bio-Based Technologies U 3

The science and economics of composting, recycling, bioremediation, and phytoremediation will be introduced. Biocoveration of organic wastes and plant-derived sugars to value-added non-fuel products (platform chemicals and other bio-products) will be explored through classroom sessions and laboratory experiments. Prereq: 2010T; Chem 1210. This course is available for EM credit.

2040T Bioenergy and Water Management Projects U 3

This capstone course provides a general overview of bioenergy-generating and wastewater treatment systems with emphasis on planning and logistics, project management, economics, and operations in a real-world setting. Practical applications for managing waste-to-energy projects and wastewater treatment will be emphasized through hands-on and on-site experience. Prereq: 2020T; 2030T.

2189T Bioenergy and Water Management Practicum U 1 - 2

Supervised practical experience in a relevant work environment-bioenergy laboratory, wastewater treatment plant, biogas plant-with emphasis on developing competencies related to classroom and career activities. A grade of C or better required to meet graduation requirements. Repeatable to a maximum of 4 cr hrs or 2 completions.

2193T Individual Studies U 1 - 3

Designed to give an individual student an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

2194T Group Studies U 1 - 3

Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

Bioethics

2000 Theory and Foundations of Bioethics U 3

Explores moral concerns and ethical decision-making in medicine and health care. Topics include health care reform informed consent, quality of life decisions, decisions to allow to die, rationing, futility, and scarcity of resources. In particular, we will analyze concerns regarding equality, justice, and individual rights to health care. GE cultures and ideas course. GE foundation historical and cultural studies course.

2010 Ethics of Biomedical Science Research U 3

Provides a foundation in traditional ethics, a consideration of the subcategories of bioethics, neuroethics, and eugenics and instructs students in how to apply ethics to contemporary issues in research and technology. This course also satisfies the basic components of Responsible Conduct of Research (RCR) education. GE cultures and ideas course. GE foundation historical and cultural studies course.

2020 Bioethics in Film, Media & Society: Explorations in Culture and Biopolitics U 3

This course is designed as a forum for identifying and discussing moral, societal, and political issues in bioethics as represented through various forms of moving-image culture, primarily in film but also including still photography, television, and digital media.

3000 Case Studies in Medical and Healthcare Ethics U 3

The field of medical ethics has been and is continually shaped by major cases, both famous and infamous. This course surveys the causes and contexts, as well as the philosophical and ethical issues embedded within these cases. GE theme health and well-being course.

4000 Readings in Bioethics U 3

Readings in Bioethics entails a close reading of classic bioethics texts from Hippocrates through the beginning of the modern bioethics period (i.e., Fletcher, Ramsey, and Singer) and through the contemporary era. Religious and secular writings from diverse perspectives will be included. This course combines lecture presentation, class discussion, and student presentations.

5030 Neuroethics U G 3

This course serves to introduce students to the study of neuroethics, which concerns itself with ethical problems arising at the interface between philosophy and neuroscience. Reading broadly, it explores both how philosophy animates ethical discussion within neuroscience as well as how neuroscience has much to say to philosophers. Prereq: 2 courses in BioEthc, or Grad standing, or permission of instructor.

5040 Disability Bioethics U G 3

This course offers an advanced introduction to disability bioethics. Students will become familiar with some of the central debates in contemporary disability bioethics. Topics may include: competing models of disability; whether, all things equal, having a disability make one's life worse; if it is permissible to try and "treat" or "cure" disabilities. Prereq: Grad standing, or permission of instructor.

6000 Bioethics Theory and Foundations G 3

Offers a philosophical survey of the moral foundations of contemporary bioethical theories and health care policies.

6010 Biomedical Research Ethics G 3

The broad intent of this course is to highlight the importance of ethics in biomedical research and to explore how critical ethical thinking can be used to analyze personal decision-making, public regulation, and the law concerning advanced biomedical sciences/technologies and their clinical applications.

6020 Clinical Bioethics I G 3

Explore the major clinical ethical issues confronting the practices of medicine and biomedical science.

6030 Bioethics, Law, & Public Policy G 3

Instructs students in rudimentary legal research skills, constitutional foundations of health care law applicable to some classical and contemporary legal issues, and an overview of the structures of the legal system of the United States.

6040 Bioethics Symposium I G 1½

This unique course follows a longitudinal format with monthly 3-hour lectures, presentations, panel discussions, and/or debates led by various OSU faculty and guest lecturers. The intent of the course is to present to students a wide exposure to the most relevant, contemporary, and controversial topics in bioethics presented from a wide array of experts in the disciplines intersecting bioethics. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

6050 Bioethics Symposium 2 G 1½

This unique Symposium II course follows a longitudinal format with monthly 3-hour lectures, presentations, panel discussions, and/or debates led by various OSU faculty and guest lecturers. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

7000 Advanced Clinical Bioethics G 3

Building upon Clinical Bioethics (BIOETHIC 6020), this course will engage students in the more advanced processes and procedures of clinical ethical analysis, focusing on ethical reflection, negotiation, and decision making in clinical ethical scenarios. Theoretical frameworks, concepts, and applied analytical strategies will be examined in light of their usefulness for practice.

7010 End of Life Ethics G 3

Over 2/3rds of clinical ethics dilemmas involve end-of-life decision-making. End-of-life care and palliative care are growing fields. This course will engage the essential ethics issues involved in end-of-life care. Clinical cases and medical knowledge will be explored. The prevailing procedural ethics of our time will be utilized to discuss ethical dilemmas.

50 Bioethics

7030 History of Medical Ethics and Bioethics G 3

The main goal of this course is to explore the historical roots of the field of bioethics. The course will be divided into a few main parts: the first is a broad survey of key figures and movements in medical history from antiquity to modernity, including the Hippocratics, Galenic medicine, the birth of dissection, Christian hospitality, Medieval medicine, modern surgery, the age of antibiotics, etc.

7040 Bioethics and the Holocaust G 3

This course is designed to allow students an in-depth study of one of the most troubling periods in the history of medicine: the active participation of physicians in the Holocaust. We will attempt to understand the distorted rational behind this genocide by ordinary men and women. We will also discuss, in depth, analogies to today's medical practice.

7050 Pediatric and Perinatal Bioethics G 3

This course focuses on key ethical issues surrounding women's health and the pre, peri, and post natal care of the mother and the newborn, including but not limited to ethics of: pre-implantation genetic diagnosis, prenatal diagnosis, maternal decision making, in vitro fertilization, prenatal diagnosis, fetal treatment/surgery, neonatal care, genetic counseling, gene therapy, and genetic testing.

7060 Religious and Theological Perspectives in Bioethics G 3

This course addresses the discourses and interplay of secular, religious, and theological perspectives in the field of bioethics. One central goal of this course is to identify the thought and language of secular, immanent bioethics in comparison/contrast with religious, transcendent bioethics without glossing the thick plurality of religious differences and perspectives in the major religions.

7070 President's Bioethics Councils G 1½

This course will survey the writings of the various president's bioethics councils beginning in 1974 to the most recent bioethics commission established by President Obama.

7080 Belmont Report G 1½

This course will delve deeply into the text of the Belmont Report, including reading essays in the appendices of the report and additional outside material.

7800 Research Methods in Bioethics G 3

Students will explore the variety of methods used to address ethical concerns surrounding clinical care, biomedical research, and health care policy. The course will equip students with analytic and practical skills to engage in research of their own.

7880 Bioethics for Disasters and Humanitarian Crises G 3

Disasters and humanitarian crises raise a host of ethical issues that are often distinct from those in clinical settings. This course will examine some of these issues as they arise during pandemics, natural disasters and humanitarian crises.

7890 Clinical Bioethics, Healthcare Mediation, and Conflict Resolution G 3

This course emphasizes learn-by-doing approach to conflict resolution through online and on-site elements. The course familiarizes participants with a 'toolbox' of skills essential to conflict resolution applicable to bioethics consultations. Prereq: 6020, or permission of instructor. This course is graded S/U.

7895 Bioethical Issues in Genetic Counseling G 3

The course aims to give students the ethical background to lead in an ongoing national dialogue about the ethical, legal, and social implications of advances in genomic technology, reproductive health and the professional responsibility of counseling.

8000 Directed Readings in Bioethics G 3

This course of directed readings provides additional research preparation for a particularly high-level MA Thesis. Admission to this course requires a sponsoring faculty member and approval from the Director of the MA program. The Syllabus for this course will be written in conjunction between the student and sponsoring faculty member and approved by the Director of the MA program. Prereq: 6000-level BioEthc course, or approval of Program Director. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

8010 Bioethics Non-Thesis G 3

Alongside the MA Thesis Project, the MA Non-Thesis Project is one of two possible capstone projects in the MA program. Having selected the Non-Thesis option, students develop their project in collaboration with a faculty supervisor. Projects contain a substantial writing component and are presented for oral defense. Prereq: BioEthc 6000-level course. This course is graded S/U.

8020 Bioethics Masters Thesis G 3

The master's thesis is a carefully argued scholarly paper of approximately 12,000 to 13,000 words (roughly 50 pages). Students will under the supervision of a faculty adviser to craft and write an original argument with sources. The thesis must have a substantial research component and a focus on a suitable topic within the field of bioethics as a final element in the master's degree. Prereq: BioEthc 6000-level course. This course is graded S/U.

Biological Chemistry and Pharmacology

3311 Fundamentals of Medical Biochemistry I U 3

Includes organic chemistry necessary for biochemistry. Basic structures and interactions of biomolecules in health and disease. Topics essential to human nutrition, dietetics, clinical chemistry, & paramedical fields. Proteins, enzymes, and vitamins. Prereq: Chem 1110, 1210, or 1220.

3312 Fundamentals of Medical Biochemistry and Molecular Biology II U 3

A continuation of 3311. Biochemical Energy production; the chemistry and metabolism of carbohydrates, lipids and proteins; nucleic acids and protein biosynthesis; integration and control of metabolic pathways, and genomics. Prereq: Chem 1110, 1210, or 1220.

4250 Undergraduate Independent Study in Pharmacology/Pharmacogenomics U 1-10

Offers undergraduate students the opportunity to gain research experience in laboratories in Pharmacology/Pharmacogenomics and learn the latest techniques and approaches. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 20 completions. This course is graded S/U.

4998 Undergraduate Research U 1-5

Undergraduate research or study in an area of biological chemistry and pharmacology under the direction of a department faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 8 completions.

4998H Undergraduate Research for an Honors Program U 1-5

Undergraduate research or study in an area of biological chemistry and pharmacology under the direction of a departmental faculty member. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 20 cr hrs or 8 completions.

4999 Thesis Research in Biological Chemistry and Pharmacology U 1-5

A program of reading and research for each student with individual conferences and reports, culminating in the preparation of an honors thesis. Prereq: GPA 3.0 and above, and permission of the instructor under whose supervision the work is to be completed. Repeatable to a maximum of 10 cr hrs or 2 completions.

4999H Honors Thesis Research in Biological Chemistry and Pharmacology U 1-5

A program of reading and research for each student with individual conferences and reports, culminating in the preparation of an honors thesis. Prereq: Honors status, GPA of 3.4 or higher, Junior or Senior standing, and permission of the instructor under whose supervision the work is to be completed. Repeatable to a maximum of 10 cr hrs or 2 completions.

5050 Molecular Basis of Oxidative Stress U G M 3

The inter-relationships between reactive species and development of human diseases will be the highlight of lectures and discussions. Prereq: Chem 2520, 2620, or 2920H.

5193 Individual Studies U G M 1-10

Qualified students can conduct a minor investigation under the direction of a faculty member. Au, Sp, or Su Sems. Prereq: Course work in Biochemistry, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.

5300 Molecular Pharmacology U G 2

Identification of drug receptor genes and their second messenger pathways provides information unavailable from traditional approaches. We will examine how this information is used to develop new medications to treat a wide range of disorders with improving efficacy and safety. Prereq: Permission of instructor.

5400 Chemotherapeutic Drugs for Cancer and Infectious Diseases U G 2

Over the course of the last century a wide variety of drugs have been developed for chemotherapy of cancer and infectious disease. The mechanisms of action of these drugs involves diverse biological processes. In this course we will examine the molecular components targeted by anticancer, antimycobacterial, antifungal, antiprotozoal, anthelmintic and antiviral drugs. Prereq: Prior coursework in biochemistry or physiology or equiv., or permission of instructor.

5500 Cardiovascular Pharmacology U G 2

Covers basic principles of drug action for specific drug classes; including chemical properties, mechanisms of drug action, clinical uses, disposition, contraindications, adverse reactions, clinically significant drug interactions, and drug-disease interactions. Prereq: Prior coursework in biochemistry or physiology or equiv., or permission of instructor.

5510 Responsible Conduct in Biomedical Research U G M 1-2

The broad intent of this course is to highlight the importance of responsible conduct in biomedical research and to explore how critical ethical thinking can be used to analyze personal decision-making, public regulation, and the law concerning advanced biomedical sciences/technologies and their clinical applications. This course will introduce students to professional and ethical issues.

5555 Epigenetics U G M 3

This course will provide an in depth understanding of the molecular mechanisms underlying epigenetic inheritance, which is the inheritance of traits not encoded in the sequence of a genome. In addition, the course will provide students an opportunity to demonstrate command of the subject matter through a presentation from the current scientific literature. Prereq: MolGen 4606; or Biochem 5613, 5614, and 5615; or Grad standing; or permission of instructor.

5600 Introduction to General Pharmacology U G 3

Introductory course emphasizing the general principles of pharmacology using a systems-based and mechanism-based approach. The course provides a simple overview of the subject. Prereq: Prior coursework in physiology, or permission of instructor. Not open to students with credit for Pharmacol 600.

Biological Chemistry and Pharmacology 51

5800 Stem Cell Biology and Applications for Human Regenerative Medicine U G M 3

Basics of stem cell biology, as applied to multiple disease models of the brain and other organs, cancer research and aging. Practical examples and models from patients with neurodevelopmental and neurodegenerative diseases. Demonstration of laboratory strategies and techniques will be presented. Prereq: One year of basic biology, or permission of instructor.

5824 Pharmacology of the Nervous System U G 3

Pharmacological agents are valuable tools with which to probe the molecular and cellular basis of brain function. The scientific rationale underlying the use of drugs to treat a wide range of neurologic and psychiatric disorders will be examined. Prereq: Undergraduate Biochemistry or Physiology (or equivalent), or permission of instructor. Cross-listed in Psych.

5852 Biology of Aging U G 2

Covers molecular, cellular and organismal aspects of aging. Experimental evidence as well as current and historically important theories of aging will be discussed. The course will rely on analysis of original peer-reviewed publications. Prereq: Not open to students with credit for 5852 (852). CT Admis Cond course.

6701 Advanced Biochemistry: Molecular Biology G 3

An advanced treatment of the biochemical principles of gene and genome function. Prereq: Biochem 5615 and MolGen 4500, or equivs. Concur: BioPhrm 6761 or Biochem 6761; or permission of instructor. Not open to students with credit for Biochem 6701, Micrbio 6080, 6010, or MolGen 5701. Cross-listed in Biochem.

6761 Advanced Biochemistry: Macromolecular Structure and Function G 3

An advanced treatment of the physical and chemical properties, biological function, and structural biology of proteins and nucleic acids. Prereq: Biochem 5615 (615), and Chem 2520 (253), 2550 (255) and 4210 (521), or equiv; or permission of instructor. Not open to students with credit for 6761 (761 and 766), Chem 761 and 766, or Biochem 6761 (761 and 766). Cross-listed in Biochem.

6785 DNA Microarray Technology G M 1

Covers the major areas of microarray technology, including theory, target preparation and labeling, manufacturing methods, imaging, and analysis and mining of data. Offered every other year. Prereq: BioChem 511 or equiv. Not open to students with credit for 785.

6850 Research in Progress Seminars G 1

Seminar presentations from faculty laboratories of ongoing research. Prereq: Grad standing. Repeatable to a maximum of 8 or hrs. This course is graded S/U.

7193.01 Individual Studies in Pharmacology G 1 - 30

Digitalis pharmacodynamics; neuropharmacology; endocrine pharmacology; cardiovascular pharmacology, autonomic pharmacology, clinical pharmacology; biochemical pharmacology; pharmacogenomics; toxicology. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

7510 Professional and Ethical Issues in Biomedical Sciences G 2

A discussion course based on case scenarios dealing with ethical issues facing biomedical researchers, such as publishing practices, confidentiality, mentoring. Prereq: Grad standing, and enrollment in Biomedical Sciences program. This course is graded S/U. Cross-listed in VetBios 751.

7560 Clinical Trials I: Design and Regulation G 3

This course provides a fundamental overview of clinical trial design, methods, and regulation with an emphasis on medical product development, clinical trial protocols, preclinical research requirements, and the appraisal of published clinical trials. Prereq: Enrollment in the MS Pharmacology program, or permission of instructor. Not open to students with credit for Nursing 7770, Phr 7770, or MCR 7770. Cross-listed in Nursing and Phr.

7561 Clinical Trials II: Site Management and Study Leadership G 3

This course provides a fundamental overview of best practices of clinical trial study and site management, including an emphasis on data, safety, and quality management, and study team leadership. Prereq: 7560, Nursing 7560, or Phr 7560, or permission of instructor. Not open to students with credit for Nursing 7405 or Phr 7405. Cross-listed in Nursing and Phr.

7781 Animal Models of Human Disease G M 1

Transgenic and knockout mouse technology and examples of models for genetic disease with each pattern of inheritance. Examples are collagen diseases (osteogenesis imperfecta), Huntington diseases, muscular dystrophy, and Friedreich ataxia. Prereq: MolGen 5701 (701) or Biochem 5701 (702). Not open to students with credit for MolBioch 781.

7807 Gene Expression: Post-Transcriptional Control G 3

Intensive study of problems in the general area of post-transcriptional control of gene expression. The course consists of student presentations and class evaluations of recently published results in these fields. Prereq: 6 or hrs at the Grad level, or permission of instructor. Not open to students with credit for MolGen 7807 (880.07) or VetBios 7807 (880.07). Cross-listed in MolGen and VetBios.

7823 Selected Topics in Molecular Medicine G M 2

The focus of this course is to understand the molecular bases of selective diseases. The disease focus may vary each year, and can include cancer, neurological disorders, and the roles of stem cells and metabolism in aging. Students are encouraged to check the syllabus for the selective topics each year. Prereq: 1 yr of Grad Biochem, or permission of instructor.

8999 Research in Biological Chemistry and Pharmacology G 1 - 12

Research for thesis or dissertation purposes only. Offered all semesters. Prereq: Grad standing. Repeatable to a maximum of 72 cr hrs or 15 completions. This course is graded S/U.

Biology

1101 Introductory Biology U 4

Basic principles of biology; topics include the nature of science, organismal diversity, evolution, ecology, genetics, reproduction, and cellular structure and function. Not intended students majoring in one of the biological sciences. Prereq: Not open to students with credit for 1101E, 1113 (113), 1113H (115H), 101, Entmly 1101 (101), or MolGen 1101 (PlntBio101). This course is available for EM credit. GE nat sci bio course. GE foundation natural sci course.

1102 Human Biology U 4

Exploration of human biology; topics include structure and physiological function, reproduction and development, genetics and disease, ecology, and evolution. Not intended for students majoring in one of the biological sciences. Prereq: Not open to students with credit for 102. This course is available for EM credit. GE nat sci bio course.

1110 Biology for the Health Sciences U 4

A survey of biological topics including evolution; structure and function; information flow, exchange and storage; pathways and transformations of energy and matter; and systems. Intended for students needing a more advanced single course in the biological sciences such as those in Pre-Nursing, Pre-Dental Hygiene, or HRS Programs. Not intended for students in Life Science Majors. Prereq or concur: Chem 1110 or 1210. Not open to students with credit for 1113 or 1114, or majoring in the Biological Sciences. GE nat sci bio course. GE foundation natural sci course.

1113.01 Biological Sciences: Energy Transfer and Development U 4

Exploration of biology and biological principles; evolution and the origin of life, cellular structure and function, bioenergetics, and genetics. A broad introduction to biology comprises both Biology 1113 and 1114. Prereq: Math 1120, 1130, 1148, 1150, or above, or Math Placement Level L or M. Prereq or concur: Chem 1110, 1208, 1210, 1610, or 1910H, or permission of course coordinator. Not open to students with credit for 1113 or 1113.02. This course is available for EM credit. GE nat sci bio course. GE foundation natural sci course.

1113.02 Biological Sciences: Energy Transfer and Development PLTL U 5

Exploration of biology and biological principles; evolution and the origin of life, cellular structure and function, bioenergetics, and genetics. This course includes a required Peer-Led Team Learning (PLTL) component. Prereq: Math 1120, 1130, 1148, 1150, or above, or Math Placement Level L or M. Prereq or concur: Chem 1110, 1208, 1210, 1610, or 1910H, or permission of course coordinator. Not open to students with credit for 1113 or 1113.01. GE nat sci bio course. GE foundation natural sci course.

1113E Biological Sciences: Energy Transfer and Development U 4

Exploration of biology and biological principles; evolution and the origin of life, cellular structure and function, bioenergetics, and genetics. A broad introduction to biology comprises both Biology 1113E and 1114E. Prereq: Honors standing; and Math 1149, or 1150 or above, or Math Placement Level L. Prereq or concur: Chem 1208, 1210, 1610, or 1910H, or permission of course coordinator. GE nat sci bio course. GE foundation natural sci course.

1113H Biological Sciences: Energy Transfer and Development U 4

Exploration of biology and biological principles; evolution and the origin of life, cellular structure and function, bioenergetics, and genetics. A broad introduction to biology comprises both Biology 1113H and 1114H. Prereq: Honors standing; and Math 1149 or 1150 or above, or Math Placement Level L. Prereq or concur: Chem 1208, 1210, 1610, or 1910H, or permission of course coordinator. GE nat sci bio course. GE foundation natural sci course.

1114.01 Biological Sciences: Form, Function, Diversity, and Ecology U 4

Exploration of biology and biological principles; evolution and speciation, diversity in structure, function, behavior, and ecology among prokaryotes and eukaryotes. A broad introduction to biology comprises both Biology 1113 and 1114. Prereq: Math 1120, 1130, 1148, or 1150 or above, or Math Placement Level L or M. Prereq or concur: Chem 1110, 1208, 1210, 1610, or 1910H, or permission of course coordinator. Not open to students with credit for 1114 or 1114.02. This course is available for EM credit. GE nat sci bio course. GE foundation natural sci course.

1114.02 Biological Sciences: Form, Function, Diversity, and Ecology PLTL U 5

Exploration of biology and biological principles; evolution and speciation, diversity in structure, function, behavior, and ecology among prokaryotes and eukaryotes. This course includes a required Peer-Led Team Learning (PLTL) component. Prereq: Math 1120, 1130, 1148, or 1150 or above, or Math Placement Level L or M. Prereq or concur: Chem 1110, 1208, 1210, 1610, or 1910H, or permission of course coordinator. Not open to students with credit for 1114 or 1114.01. GE nat sci bio course. GE foundation natural sci course.

1114E Biological Sciences: Form, Function, Diversity, and Ecology U 4

Exploration of biology and biological principles; evolution and speciation, diversity in structure, function, behavior, and ecology among prokaryotes and eukaryotes. A broad introduction to biology comprises both Biology 1113E and 1114E. Prereq: Honors standing; and Math 1149, 1150, or above, or Math Placement Level L. Prereq or concur: Chem 1208, 1210, 1610, or 1910H, or permission of course coordinator. GE nat sci bio course. GE foundation natural sci course.

52 Biology

1114H	Biological Sciences: Form, Function, Diversity, and Ecology	U	4
Exploration of biology and biological principles; evolution and speciation, diversity in structure, function, behavior, and ecology among prokaryotes and eukaryotes. A broad introduction to biology comprises both Biology 1113H and 1114. Prereq: Honors standing; and Math 1149, 1150, or above, or Math Placement Level L. Prereq or concur: Chem 1208, 1210, 1610, or 1910H, or permission of course coordinator. GE nat sci bio course. GE foundation natural sci course.			
1131	Peer Led Team Learning for Biology 1113 Students	U	1
Peer-led team learning (PLTL) provides a structure within which students will actively work together in groups to complete a series of activities and deepen their understanding of concepts associated with Biology 1113. A peer leader will work with the group on challenging and relevant activities to prepare biology students to apply scientific reasoning to authentic problems. Concur: Biology 1113. This course is graded S/U.			
1141	Peer Led Team Learning for Biology 1114 Students	U	1
Peer-led team learning (PLTL) provides a structure within which students will actively work together in groups to complete a series of activities and deepen their understanding of concepts associated with Biology 1114. A peer leader will work with the group on challenging and relevant activities to prepare biology students to apply scientific reasoning to authentic problems. Concur: 1114. This course is graded S/U.			
2105	Human Biology in Cinema	U	3
Human Biology in Cinema will explore biological insights related to human health and well-being through the lens of mainstream films. These biological insights will enhance comprehension and appreciation of films and in turn the films will provide a narrative structure that make the information more accessible and memorable. Films will serve as a starting point for a class discussion each week. High School Biology recommended. Prereq: Soph standing, or permission of instructor. Not open to students with credit for 1105. GE nat sci bio course. GE theme health and well-being course.			
2194	Group Studies	U	1 - 4
Group study of a selected topic in biology not provided by other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.			
2200	Genome Biology	U	1
DNA sequencing and analysis of bacteriophage genomes. Special emphasis on mycobacteriophage as part of the Howard Hughes Medical Institute National Genomics Research Initiative. Prereq: 1113 (with participation in the Howard Hughes Medical Institute National Genomics Research Initiative), or permission of instructor. Cross-listed in MicrBio.			
2797	Study at a Foreign Institution	U	1 - 10
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of advisor. Repeatable to a maximum of 30 cr hrs or 8 completions.			
3401	Integrated Biology	U	4
A case studies approach is used to gain a better understanding of biological concepts and principles. This course is designed for biology majors. Prereq: 1113, 1114, Chem 1220, and Math 1140, or 1148 and 1149, or 1150 or above; or permission of instructor.			
4191	Internship in Biology	U	1 - 5
A cooperative education or internship assignment conducted under the supervision of a faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 8 completions. This course is graded S/U.			
4193	Individual Studies	U	1 - 5
A program of individual study in the biological sciences appropriate for the student's needs. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
4194	Group Studies	U	2 - 4
Group studies of topics not otherwise offered in Biology. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 7 completions.			
4797	Study at a Foreign Institution	U	1 - 15
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of advisor. Repeatable to a maximum of 30 cr hrs or 8 completions.			
4798	Biological Roots in England	U	3
A short-term study-abroad course on the history of science in England, with emphasis on biology. Prereq: 6 cr hrs taken in Biological Sciences. Not open to students with credit for 500.			
4998	Research	U	1 - 5
Undergraduate research in biology. Prereq: Permission of advisor. Repeatable to a maximum of 30 cr hrs or 8 completions. This course is graded S/U.			
4998H	Honors Undergraduate Research	U	1 - 5
Undergraduate research in biology. Prereq: Honors standing, and permission of advisor. This course is graded S/U.			
4999	Thesis Research	U	1 - 5
A program of individual research in the biological sciences appropriate for the student's needs and culminating in a thesis and oral examination. Prereq: 1113 (113) or 1113H (115H), and 1114 (114) or 1114H (116H), and permission of advisor. Repeatable to a maximum of 12 cr hrs or 8 completions. This course is graded S/U.			

4999H Honors Thesis Research **U** **1 - 5**

A program of individual research in the biological sciences appropriate for the student's needs and culminating in an honors thesis and oral examination. Prereq: Honors standing, and 1113 (113) or 1114 (114), and permission of advisor. Repeatable to a maximum of 12 cr hrs or 8 completions. This course is graded S/U.

5001.01 Topics in Biology Teaching **U G** **1**

Students actively participate in workshops and other activities, including the development of new instructional materials and SOTL projects, that enhance their preparedness for college teaching. Repeatable to a maximum of 15 cr hrs. This course is graded S/U.

5001.02 Topics in Biology Teaching **U G** **1**

Students actively participate in workshops and other activities, including the development of new instructional materials and SOTL projects, that enhance their preparedness for college teaching. Students will complete a portfolio assignment. Students in the Graduate Interdisciplinary Specialization will be able to apply each instance of this course as an elective up to a maximum of 3 credits. Repeatable to a maximum of 3 cr hrs.

6001 Biology College Teaching **G** **2**

Students take a scholarly approach to studying theory-based methods to help undergraduates learn biology. Students consider methods as an instructor, peer reviewer, and student. Prereq: Grad standing in BioSci. Not open to students with credit for Biology 701.

6193 Graduate Independent Studies **G** **1 - 4**

Graduate independent studies. Repeatable to a maximum of 4 cr hrs or 4 completions. This course is graded S/U.

Biomedical Education

1985 ASPIRE Medical Research Program - Seminar **U** **1**

ASPIRE Scholars will meet once a week. These weekly seminars will serve to increase exposure to issues related to Health Equity, Community-based population care, health care advocacy, and research methodology. The mode of delivery will be a mixture of presentations from guest speakers, round table discussions, and peer-reviewed journal reviews. Prereq: Enrollment as ASPIRE 2022 Scholar. This course is graded S/U.

7050 Introduction to Translational Vision Research **G** **2**

This course is designed as an introduction to ocular research. It provides an overview of pathophysiology, clinical findings, and current treatments/therapeutics of common ocular diseases. Basics of ophthalmic imaging used for disease detection are explained, and through discussion of research articles, students will learn about scientific methods, and animal models used to research eye diseases. Prereq: Good standing in the Graduate school or College of Medicine, or permission of instructor.

Biomedical Engineering

2000 Introduction to Biomedical Engineering **U** **3**

Fundamentals in biomedical engineering with emphasis on problem-solving, design process, and societal/ethical impact. Prereq: Math 1172, Engr 1182 or equiv., Chem 1220, Physics 1250, and enrollment in the BiomedE major or pre-major. Concur: Biology 1113, MechEng 2040, and Math 2173 or equiv.

2001 Professional Development **U** **1**

Development of professional skills; engineering economy; project planning; ethics, best business practices. Prereq: Enrollment in BIOMEDE major.

2193 Individual Studies in Biomedical Engineering **U** **1 - 12**

Provides the opportunity to pursue special studies or research in biomedical engineering not otherwise covered. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 10 completions. This course is graded S/U.

2194 Group Studies in Biomedical Engineering **U** **1 - 6**

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

2200 Quantitative Principles of Cellular and Molecular Systems **U** **3**

An introduction to quantitative principles in molecular and cellular biology in the context of potential biomedical engineering applications. Topics covered: molecular structure and function; receptor-ligand and antigen-antibody specificity; cell energetics; enzyme catalysis, genetic information, disease state; Cell-surface interaction. Prereq: Biology 1113. Concur: 2000.

2700 Numerical Simulations in BME **U** **2**

Focuses on the application of computer-based numerical and graphical display skills for solving problems relevant to biomedical engineering. Prereq: 2000, and enrollment in BiomedE major, or permission of instructor. Concur: Math 2174, or permission of instructor.

2800 Anatomy for Engineers **U** **3**

This course investigates the basic anatomical structure and physiological function of the human body with a biomechanical emphasis. Prereq: Enrollment in BiomedE pre-major or major; or permission of instructor. Concur: Physics 1250, or permission of instructor. Not open to students with credit for Anatomy 2220.

3701 Biomedical Engineering Domain Lab U 2
 Laboratory course for Biomedical Engineering majors. Biomedical laboratory skills, as well as designing, performing and analyzing experiments, documentation, and technical communication skills are developed in this course. Prereq: 2000, Stat 3450, and enrollment in BiomedE major; or permission of instructor. Not open to students with credit for 4711, 4712, 4713, 4714, 4715, or 4716.

3702 Measurements and Instrumentation Lab U 3
 Engineering fundamentals and hands-on experiments for measuring and interpreting data from living systems; Analysis of signals generated by bioelectrical potentials; Interpretation of bioelectrical signals to human physiology and functions. Prereq: 2000, 2800, and Stat 3450, and enrollment in BiomedE major; or permission of instructor. Concur: 2700.

3703 Quantitative Physiology U 3
 Introduces students to the mathematical and numerical techniques used to develop, solve and analyze quantitative models of physiological systems. Prereq: 2700, 2800, and Math 2174; or permission of instructor.

4001 Clinical Preceptorship in BME U 3
 Introduction to the integration of biomedical engineering in clinical medicine through lectures and a preceptorship with clinical faculty. Students are introduced to real-life problems and opportunities in clinical medicine through lectures and a preceptorship in a clinical setting. Prereq: Jr or Sr standing in BME.

4110 Bioimaging U 3
 Introduction to medical imaging techniques like x-ray, computed tomography, magnetic resonance and ultrasound. Prereq: 2000, Physics 1251, Math 2174, and BiomedE 2800 or EEOB 2520; or permission of instructor.

4193 Individual Studies in Biomedical Engineering U 1 - 12
 Provides the opportunity to pursue special studies or research in biomedical engineering not otherwise covered. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 10 completions. This course is graded S/U.

4194 Group Studies in Biomedical Engineering U 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

4210 Biotransport U 3
 Covers key transport concepts in biomedical engineering. Emphasis is put on mass and momentum transport with applications related to biology, medical science and biotechnology. Prereq: 2000 and Math 2174, or permission of instructor. Concur: MechEng 3500 or FABEng 3120.

4310 Biomaterials U 3
 Principles of materials science; biocompatibility and biological reactions to implanted materials; natural biomaterials and synthetic materials used in biological applications. Prereq: 2000, MatScEn 2010, and Math 2174; or permission of instructor.

4410 Biomechanics U 3
 Mechanical characterization of biological tissues at the cellular, organ, and system level; exploration of biomechanical factors of physiological and pathological conditions. Prereq: 2000, Math 2174, and MechEng 2040; or permission of instructor.

4510 Cell, Molecular, and Tissue Engineering U 3
 Application of engineering methods to study, measure, repair, or replace biological functions and the molecular cellular or tissue-level length scales. Prereq: 2000 and Math 2174, or permission of instructor. Concur: 2200 or Biochem 4511.

4610 Biomedical Micro/Nanotechnology U 3
 Introduction to micro/nanotechnology in biomedical settings, including micro/nanotechnologies used to investigate biological systems, physiological responses to nanotherapeutics, and first principles of microfluidics and microfabrication. Prereq: 2000, MatScEn 2010, and Biochem 4511 or BiomedE 2200; or permission of instructor.

4711 Bioimaging Lab U ½
 Hands-on lab that teaches students technical skills associated with Bioimaging. Lab components include hypothesis testing and analysis, computer simulation, lab safety and instrument training, and technical communication. Concur: 4110, or permission of instructor.

4713 Biomaterials Lab U ½
 Hands-on lab that teaches students technical skills associated with Biomaterials. Lab components include hypothesis testing and analysis, computer simulation, lab safety and instrument training, and technical communication. Concur: 4310, or permission of instructor.

4714 Biomechanics Lab U ½
 Hands-on lab that teaches students technical skills associated with Biomechanics. Lab components include hypothesis testing and analysis, computer simulation, lab safety and instrument training, and technical communication. Concur: 4410, or permission of instructor.

4901 Biomedical Engineering Capstone Design I U 3
 First course in a two-course BME capstone sequence. Introduction to design principles; challenges of biomedical device design; projects focus on helping persons with disabilities. Prereq: Sr standing in BiomedE. Not open to students with credit for 501 or 565.01.

4902 Biomedical Engineering Capstone Design II U 3
 Second course in a two-course BME capstone sequence. Applying design principles; challenges of biomedical device design; engineering and testing devices that focus on helping persons with disabilities. Prereq: 4901, or permission of instructor. Not open to students with credit for 502 or 565.02.

4998.01 Undergraduate Research in Biomedical Engineering U 1 - 6
 Individual Studies in Biomedical Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

4998.02 Undergraduate Research in Biomedical Engineering U 1 - 12
 Individual Studies in Biomedical Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 10 completions. This course is graded S/U.

4999 Biomedical Engineering Undergraduate Thesis Research U 1 - 6
 Students are offered the opportunity to pursue an independent distinction project/research. Student presentations and thesis writing included. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

4999H Biomedical Engineering Undergraduate Honors Thesis Research U 1 - 6
 Honors program students are offered the opportunity to pursue an independent distinction project/research. Student presentations and thesis writing included. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5001 Cardiovascular Bioengineering U G 3
 Overview of biomedical engineering approaches in imaging and intervention in cardiovascular medicine. Prereq: Sr or Grad standing in Engineering or Medicine, or permission of instructor. Not open to students with credit for 701.

5120 Biomedical Optics U G 3
 Introduction of light-tissue interaction, optical imaging, and spectroscopy. Prereq: 4110 or equiv, and Sr standing; or Grad standing; or permission of instructor. Not open to students with credit for 612.

5177 Biomedical Atomic Force Microscopy U G 3
 Applications of Atomic Force Microscopy (AFM) in bio-imaging, biomechanics, and nano-manipulation. Prereq: 5110 (611) or equiv, and Sr or Grad standing; or permission of instructor.

5193 Individual Studies in Biomedical Engineering U G 1 - 12
 Provides the opportunity to pursue special studies or research in biomedical engineering not otherwise covered. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 10 completions. This course is graded S/U.

5194.01 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.02 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.03 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.04 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Not open to students with credit for 510. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.05 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.06 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.07 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.08 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5194.09 Group Studies in Biomedical Engineering U G 1 - 6
 Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5310 Advanced Biomaterials U G 3
 Basic and advanced concepts of materials science; biocompatibility and biological reactions to implanted materials; natural biomaterials and synthetic materials used in biomedical applications. Prereq: 4310 or equiv, and Sr standing; or Grad standing; or permission of instructor. Not open to students with credit for 631.

54 Biomedical Engineering

5420	Mechanobiology	U G	3	6000	Scientific Methods in Biomedical Engineering	G	1
Introduction to the incorporation of living components and compatible biomaterials to study, repair, or replace biological functions. Prereq: 4410, and Sr standing; or Grad standing; or permission of instructor. Not open to students with credit for 642.				Instruction on basic concepts and skills necessary for graduate students in Biomedical Engineering including literature search, proposal preparation, critical evaluation, and research presentation. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 600.			
5421	Tissue Mechanics	U G	3	6113	Magnetic Resonance Spectroscopy and Imaging I	G	3
Mechanical characteristics and behavior of tissues at the organ and system level and how these properties relate to physiological and pathological function. Prereq: 4410 or equiv, and Sr standing; or Grad standing; or permission of instructor. Not open to students with credit for 641 or 741.				Presentation of the basic principles of MRI/MRS, including basic MR physics, pulse sequences, adiabatic excitation, coil design, MR hardware, image formation, localized spectroscopy. Prereq: Grad standing, or permission of instructor. Not open to students with credit for Radiol 6813.			
5510	Advanced Tissue Engineering	U G	3	6130	Biomedical Ultrasound	G	3
The incorporation of living components and compatible biomaterials to study, repair, or replace biological functions. Prereq: 4510 or equiv, and Sr standing; or Grad standing; or permission of instructor. Not open to students with credit for 651.				Introduction to use of ultrasound in biomedical applications, including interaction of ultrasound with tissue; generation, reception and interpretation of ultrasonic signals; and clinical instrumentation. Prereq: Grad standing in BiomedE, or permission of instructor.			
5550	Engineering Principles in Cancer	U G	3	6170	Microscopy in Biomechanics	G	3
The purpose of this course is to introduce engineering principles in the context of cancer progression and therapy. Prereq: MechEng 3500, 3503, or CBE 2420; or permission of instructor. Not open to students with credit for CBE 5550 or MechEng 5550. Cross-listed in CBE and MechEng.				Physical principles and modes of light microscopy and atomic force microscopy and their applications for probing biomechanical properties. Prereq: Grad standing in Engr. Not open to students with credit for MechEng 6711. Cross-listed in MechEng 6711.			
5560	Biomedical Engineering Applications in Cancer Biology	U G	3	6430	Mechanobiology of the Musculoskeletal System in Development and Disease	G	3
Introduction to cancer biology and the application of biomedical engineering disciplines, such as biomaterials, biomechanics, bioimaging, cell and tissue engineering, to fundamental and applied cancer research. Prereq: Biology 1113; and BiomedE 4110, or 4310, or 4410, or 4510; or permission of instructor.				Provides a general overview of mechanobiology in development and disease followed by a more in-depth assessment of the specific mechanical signals and pathways that are involved in shaping development of the intervertebral disc, cartilage, and bone. Prereq: Grad standing in Engineering, or permission of instructor.			
5580	Excitable Cell Engineering	U G	3	6480	Ocular Biomechanics	G	3
Quantitative approaches to understanding excitable cell function. Advanced engineering methods applied to study these specialized cells will be addressed. Prereq: Math 415 or equiv, and EEOB 3510 (415) or equiv; or Grad standing in BiomedE; or permission of instructor.				Application of biomechanics to ocular physiology, aging, and pathophysiology. In this course, we will evaluate the utility of biomechanics in prevention, diagnosis, and treatment of age-related and pathological loss of ocular function. Prereq: 4410 or equiv., or Grad standing in BiomedE.			
5610	Advanced Biomedical Micro/Nanotechnologies	U G	3	6530	Engineering Cell Plasticity	G	3
Examinations of micro- and nano- technologies for biomedical applications, including review of micro/nanofabrication and biophysical chemistry. Critiques of the Micro-Electro-Mechanical-Systems (MEMS) and nanotechnology as tools for detecting signals or performing functions for biomedical research and clinical purposes. Discussion and analysis of current research. Prereq: 4610 or equiv, or Grad standing, or permission of instructor.				Exploration of underlying mechanisms of inherent and/or induced cell and tissue plasticity within the context of disease and therapy, as well as a number of engineering approaches (e.g., cellular, molecular) towards modulating cellular plasticity for therapy. Prereq: Grad standing in Engineering, or permission of instructor.			
5635	Cellular Nanotechnology	U G	3	6700	Advanced Numerical Methods and Modeling in BME	G	3
Application of nanotechnology to cells for sensing and subcellular manipulation. Synthesis and biological modification of quantum dots and magnetic nanostructures, their unique material properties, and their application. Prereq: Sr or Grad standing in Engineering, or permission of instructor. Not open to students with credit for 765 or ChBE 735. Cross-listed in CBE 5735.				Focuses on advanced numerical methods and computational modeling applications related to biomedical engineering. Prereq: Grad standing in Engineering.			
5639	Medical Device Development and Regulation	U G	3	6983	Research Ethics	G	2
Basic principles and essential steps for medical device design and commercialization. Prereq: Sr or Grad standing in Engineering, or permission of instructor.				Introduction to professional and ethical issues confronting biomedical research and researchers and approaches to dealing with such issues. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 883.			
5663	Introduction to Microfluidics and Nanofluidics	U G	3	6999	Biomedical Engineering Research for Thesis	G	1 - 16
Principles of incompressible fluid mechanics and electrokinetic phenomena at the micro and nanoscale; biomedical applications with a laboratory illustrating fabrication techniques and experimental methods. Prereq: MechEng 3503 or equiv, or Grad standing, or permission of instructor. Not open to students with credit for 763 or MechEng 715. Cross-listed in MechEng 6515.				Research for thesis purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			
5668	Biomedical Microtransducers	U G	3	7000	Communicating Science in BME	G	3
Examination of the Micro-Electro-Mechanical-Systems (MEMS) as a tool for detecting signals or performing functions for biomedical research and clinical purposes. Prereq: Sr or Grad standing in Engineering, or permission of instructor. Not open to students with credit for 768.				This course introduces students to the basic principles of several skills that are not only critical for the success in graduate school but also transferrable to future careers. Topics include planning for scientific research, proposal writing, journal article writing, oral and poster presentations. Prereq: Grad standing in BiomedE, or permission of instructor.			
5710	Machine Learning in Biomedical Engineering	U G	3	8193	Individual Studies in Biomedical Engineering	G	1 - 16
The goal of this course is to introduce ML and apply basic ML techniques to biomedical engineering applications. This course is intended for BME undergraduates and graduate students with limited exposure to ML basics. Prereq: Sr or Grad standing in BME, or College of Medicine; or permission of instructor.				Provides the opportunity to pursue special studies or research in biomedical engineering not otherwise covered. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			
5810	Biomedical Industry and Professionalism Seminar	U G	1	8194	Group Studies in Biomedical Engineering	G	1 - 6
Seminar series for medical product industry. Speakers will be invited from companies relevant to medical product development and industry. Students will also gain skills in professional etiquette, and creating a design portfolio and resume for internships and careers in medical product development. Prereq: Sr or Grad standing in Engr, or permission of instructor. Repeatable to a maximum of 2 or hrs. This course is graded S/U.				Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
5901	Medical Product Development I	U G	3	8810	Biomedical Engineering Seminars I	G	0
First course in a two-course sequence, focused on taking a medical product or device from concept/prototype to commercialization. Topics include medical product or device testing, IP protection, business models, manufacturability, FDA approvals, and commercialization. Prereq: 4902, Engr 5902.02H, or equiv.; and permission of instructor.				First course in two course sequence. Seminar series for introducing the state-of-the-arts development of biomedical engineering. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 881.01, 881.02, or 881.03. This course is progress graded (S/U).			
5902	Medical Product Development II	U G	3	8811	Biomedical Engineering Seminars II	G	1
Second course in a two-course sequence, focused on taking a medical product or device from concept/prototype to commercialization. Topics include medical product or device testing, IP protection, business models, manufacturability, FDA approvals, and commercialization. Prereq: 5901, or permission of instructor.				Second course in two course sequence. This is a seminar series for introducing the state-of-the-arts development of biomedical engineering. Prereq: 8810 (881.01 or 881.02), or permission of instructor. Not open to students with credit for 881.03. This course is graded S/U.			
				8812	Biomedical Engineering Seminars III	G	0
				Seminar series for introducing the state-of-the-arts development of biomedical engineering. Prereq: 8811 or 881.03, or permission of instructor. Not open to students with credit for 881.04 or 881.05. This course is progress graded (S/U).			
				8813	Biomedical Engineering Seminars IV	G	1
				Second course in two course sequence. This is a Seminar series for introducing the state-of-the-arts development of biomedical engineering. Prereq: 8812 (881.04 or 881.05), or permission of instructor. Not open to students with credit for 881.06. This course is graded S/U.			

8999 Biomedical Engineering Research for Dissertation G 1 - 16
 Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Biomedical Informatics

5551 Survey of Artificial Intelligence and Machine Learning in Digital Health U G 3

The purpose of this course, AI/ML Overview in Digital Health is to introduce the concepts of AI/ML to enrollees. It will cover some introductions to EHR predictive analytics, clinical NLP, bioinformatics, and biomedical imaging. Students will apply ML/AI tools, analyze biomedical data, and answer biomedical research questions using the data and ML/AI tools.

5552 Artificial Intelligence in Medical Imaging U G 3

AI has increasingly been used for a variety of complex segmentation and classification problems in medical imaging. These methods have shown great promise over traditional image processing methods, but still require image pre-processing and a rigorous post-validation approach required for medical imaging processing applications.

5553 Predictive Analytics in Electronic Health Records U G 3

As EHR databases are becoming more standardized and integrated across multiple hospital systems, they are gaining increasing attention from the informatics community as a resource to be mined, for example, to assess quality of patient care, develop early prediction models for disease, and define disease phenotypes.

5554 Natural Language Processing in Biomedical Research U G 3

This course introduces trainees to the natural language processing and text mining on biomedical data, including clinical notes from electronic medical records and biomedical literature.

5710 Introduction to Biomedical Informatics U G 3

A survey of biomedical informatics theories and methods employed in the design, implementation and management of information systems supporting basic science, clinical and translational research, clinical care, and public health. Recommended course work in computer science, statistics, anatomy, physiology, and medical terminology.

5730 Introduction to Bioinformatics U G 3

Introduces students to basic topics of bioinformatics including sequence analyses, proteomics, microarrays, regulatory networks, sequence and protein databases. Recommended background in molecular biology and computer science.

5740 Introduction to Research Informatics U G 3

A survey of biomedical informatics theories and methods employed in the design, implementation and management of clinical and translational research programs. Recommended experience with computer science, statistics, anatomy, medical terminology, and molecular biology.

5750 Methods in Biomedical Informatics U G 3

An intensive, application-oriented survey of methods used during the course of the design, implementation and evaluation of BMI platforms, including clinical info systems, decision support systems, databases, elec, data capture instruments, data visualization tools and other analytical "pipelines". These methods span a broad spectrum from information needs assessments to systems evaluation. Prereq: Basic knowledge of the following areas - basic computer science principles (logic, procedural and/or object oriented programming, data structures and algorithms), statistical methods, and medical terminology.

5760 Public Health Informatics U G 3

Introduction to the emerging and critical field of Public Health informatics. This course will highlight the history, current and future use of informatics in the public health settings, and give students an understanding of the role and broad application of informatics to promoting health and preventing disease. Cross-listed in PubHlth.

5770 Health Analytics: Data to Discovery to Dissemination U G 3

Health Analytics is the science of analyzing health data for knowledge discovery and decision making. The sheer diversity of data types in health care settings results in what scholars call a DRIP environment: Data Rich-Information Poor. Data has become ubiquitous in healthcare settings from clinical decision making to operational/business planning; health decisions are now being made similarly. No programming experience is required, but students are expected to vigorously engage in their own learning and parts of courses will require that students use and adapt to tools demonstrated during class.

5780 Programming for Biomedical Informatics U G 3

This course will offer the foundational and working knowledge, skills and tools for programming for Biomedical informatics. Biomedical informatics is a field that leverages complex and heterogeneous data. Working with these data requires knowledge of multiple programming languages and software in order to take advantage of existing tools and eventually build new tools.

5793 Individual Studies in Biomedical Informatics U G 1 - 15

Enables graduate students to do research projects with faculty other than their adviser. Prereq: Permission of instructor. Repeatable to a maximum of 60 or hrs or 4 completions. This course is graded S/U.

7030 Analysis of Transcriptomic Data G 3

The goal of this course is to introduce students to the fundamental algorithms needed to understand and analyze genome-scale transcriptomics data sets, of the kind produced by (older) microarrays or (newer) RNA-Sequencing. The course will cover three major kinds of applications: Class Comparison, Class Discovery, Class Prediction. Students should have a broad overview of the field of bioinformatics, such as that provided in BMI 5730; a basic familiarity with statistical methods, such as those presented in BMI 5750; and a basic familiarity with the R statistical software environment, such as that presented in BMI 5750 (or should be willing to learn that material on their own).

7031 Analysis of Genomics Data G 3

The goal of this course is to introduce trainees to the fundamental algorithms and data analysis skills needed to understand and analyze genome-scale data sets, including genomics and epigenetics data. Students should have a broad overview of the field of bioinformatics, an introductory familiarity with high performance computing and the Linux environment, a basic familiarity with statistical methods, and a basic familiarity with the R statistical software environment, such as that presented in BMI 5750 (or should be willing to learn that material on their own).

7040 Clinical Informatics G 3

This course provides training in the theories, methods, and application of clinical informatics (CI). CI is the field concerned with the use of data and information technology applied to the delivery of healthcare services. CI has a wide array of healthcare delivery application areas in the clinical domain, including: pharmacy, nursing, and patient care operational areas. There are no formal prerequisite course requirements, but a familiarity with United States healthcare delivery and medical terminology is strongly encouraged.

7050 Meta-Analysis in Health Science Research G M 3

This course provides students with a comprehensive understanding of meta-analysis principles and methods, practical skills and tools for conducting and evaluating meta-analyses in health research, and the ability to apply meta-analytic techniques to their research.

7230 Single-Cell Technologies and Data Analysis G 3

Recent technological advances have made it possible to obtain genome-wide sequencing data from single cells using high-throughput sequencing, including scRNA-seq, scATAC-seq, scChIP-seq, scHi-C, scDNA-seq, spatial transcriptomics, and scMulti-omics. This course will introduce trainees to the fundamental algorithms and data analysis skills for single-cell omics data modeling and analyses. Students should have a broad overview of the field of bioinformatics; have familiarity with methods to assay gene expression, as well as statistical methods to handle transcriptomics data; familiarity with methods and applications of genome-wide data; and be proficient with the R statistical software environment, as presented in BMI 5750, and applied in BMI 7030 and BMI 7031 (or should be willing to learn that material on their own).

7231 Long Read Sequencing G 3

The goal of this course is to introduce trainees to the fundamental algorithms and data analysis skills needed to understand and analyze long read sequencing data sets, including genomics, transcriptomics, epitranscriptomics and epigenetics data. This course is intended to be taken after BMI 7031 Analysis of Genomics Data. Students will be expected to have a broad overview of the field of bioinformatics, an introductory familiarity with high performance computing and the Linux environment, a basic familiarity with statistics, and basic familiarity with the R statistical software environment.

7235 Machine Learning for Bioinformatics G 3

This course will present the primary machine learning algorithms used in bioinformatics. We will cover the theoretical underpinnings of the methodology along with how to use practical implementations (in R and Python) in order to apply the methods to real bioinformatics data sets. An important goal of the course is to introduce students to more advanced algorithms not covered in other classes.

7530 Proteomics Data Analysis G M 3

This course will introduce trainees to the algorithms and software used in analyzing proteomics datasets. This course will also show how algorithms used in proteomics are applicable to neighboring omics-based fields, such as transcriptomics and metabolomics.

7600 Metabolomics, Principles and Practice G 3

Introduces students to the principles and practice of metabolomics. Metabolomics is the study of the totality of small molecules existing within a system. We will focus here on the application of metabolomics to plant, food, nutrition and health-related research, although concepts are applicable to other disciplines. Prereq: Permission of instructor. Cross-listed in FdScTe, HCS, and HumnNtr.

7810 Research Design & Grant Preparation in Biomedical Informatics G 3

An introduction to research design and methods in Biomedical Informatics. It is organized around elements of proposal writing, grant writing, and study design. We will be surveying aspects of research, including the formulation of research questions, testable hypotheses, the selection of appropriate research designs and methods, data collection and analysis.

7891 Seminar in Biomedical Informatics G 1

Faculty, trainees, and outside speakers will give presentations on current biomedical informatics (BMI) and BMI-related research and theory. Alternate classes will consist of journal-club style discussions moderated by faculty. Repeatable to a maximum of 10 or hrs. This course is graded S/U.

56 Biomedical Informatics

7999	Thesis Research in Biomedical Informatics	G	1 - 15
Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 99 cr hrs or 20 completions. This course is graded S/U.			
8030.01	Special Topics in BMI: Computational Biology and Bioinformatics	G	1 - 5
This is an advanced discussion-based seminar exploring new methods, technologies, and research in computational biology and bioinformatics. Prereq: Grad standing in a graduate program of study and permission of the instructor. Repeatable to a maximum of 27 ch hrs or 9 completions.			
8040.01	Special Topics in BMI: Clinical and Translational Informatics	G	1 - 5
This is an advanced discussion-based seminar exploring new methods, technologies, and research in clinical and translational informatics. Prereq: Grad standing in a master, doctoral, or professional program; and permission of the instructor. Repeatable to a maximum of 27 ch hrs or 9 completions.			
8050.01	Special Topics in BMI: Data Science	G	1 - 5
This is an advanced discussion-based seminar exploring new methods, technologies, and research in biomedical data analytics and data science. Prereq: Graduate standing in a master, doctoral, or professional program; and permission of the instructor. Repeatable to a maximum of 27 cr hrs or 9 completions.			
8130	Analysis and Applications of Genome-Scale Data	G	3
This course introduces trainees to the fundamental algorithms needed to understand and analyze genome-scale expression data sets. The course will cover three major kinds of applications: Class Comparison, Class Discovery, and Class Prediction. We will also discuss methods for cross-validation and independent validation of predictive models. R software environment will be introduced and utilized.			
8140	Measuring patient experience and preferences	G	3
This course will cover theory and concepts of empirical tools to describe disease burden, health state utilities, patient reported outcomes, patient experience, and patient preferences, important policy contexts that govern the study of patient preferences (e.g. regulatory, pricing/reimbursement) and good research practice documents that guide empirical studies of the patient experience.			
8150	Rigorous and Reproducible Design and Data Analysis	G	3
Students will learn to: computationally analyze datasets using best practices in experimental design and analysis; use the R language to analyze datasets from transcriptome, genome, and clinical studies; use examples from experimental design literature that are rigorous and with built-in flaws; identify sources of bias and the impact these have on results/conclusions. This course is graded S/U.			
8193	Individual Studies in Biomedical Informatics	G	1 - 5
Graduate study of a selected topic. Prereq: Grad standing and permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.			
8999	Research in Biomedical Informatics	G	1 - 15
Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 99 cr hrs or 20 completions. This course is graded S/U.			

Biomedical Science

1100	Biomedical Science Survey	U	1
Introduction to the Biomedical Science major and College of Medicine. Emphasis on academic requirements and resources, career exploration, university policies, and student rights and responsibilities. Prereq: Enrollment in Biomedical Sciences major, or permission of instructor. Not open to students with credit for 100.			
2891H	Mastering the Biomedical Literature I	U	2
First course in a two semester series. Includes searching for, organizing, and analyzing the biomedical literature for applications in biomedical research and scholarly communication. Prereq: Honors standing, and Biomedical Science Major; or permission of instructor. Not open to students with credit for 220.01H or 220.02H.			
2892H	Mastering the Biomedical Literature II	U	2
Second course in a two semester series analyzing the biomedical literature. Designed in two week blocks to read an original paper in depth, and then to meet and discuss the work with the author. Prereq: Honors standing, 2891H, and a Biomedical Science Major; or permission of instructor.			
2900H	Biomedical Science Laboratory Techniques	U	2
Lab exercises to teach the theory and practice of basic techniques in cell and molecular biology: including tissue isolation, protein analysis, microscopy, DNA isolation, PCR, bacterial and mammalian cell transfections, and product analysis. Prereq: Honors standing, Biology 1113 & 1114 or equivalent, General Chemistry or equivalent, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 480H.			
3193	Individual Studies	U	1 - 4
An individualized program of study or research experience for BMS students. Prereq: A Biomedical Science Major, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 5 completions. This course is graded S/U.			

3194	Group Studies	U	1 - 4
A specially designed program of study for BMS students. Prereq: A Biomedical Science Major, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 5 completions. This course is graded S/U.			
3891H	Biomedical Science Research Experience I	U	5
An intensive research experience for BMS students. Students spend 20-25 hrs/wk in a research lab. Class meetings for three oral presentations and written reports of 1) the lab, 2) an experimental technique, and 3) a formal research proposal. Prereq: Honors standing, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 720.01, 720.02, or 720.03.			
3892H	Biomedical Science Research Experience II	U	5
An intensive research experience for BMS students. Students spend 20-25 hrs/wk in a research lab. Class meetings for three oral presentations and written reports of 1) Journal Club article, 2) a poster presentation, and 3) a final report. Prereq: Honors standing. Not open to students with credit for 720.01, 720.02, or 720.03.			
3998	BMS Undergraduate Research	U	1 - 4
Undergraduate research in Biomedical Science Laboratory. Prereq: A Biomedical Science Major, or permission of instructor. Repeatable to a maximum of 50 cr hrs or 5 completions. This course is graded S/U.			
4200H	Concepts in Healthcare I: Humanistic and Social Issues in Medicine & Biomedical Science	U	3
Experiential initiation into the humanistic aspects of patient centered medicine for seniors in the Biomedical Science major. Communication process between patient and professional, between professionals, team work & leadership in medicine examined. Prereq: Honors standing, and a Biomedical Science Major, or permission of instructor. Not open to students with credit for 521, 522, or 523.			
4210H	Concepts in Healthcare II: Introduction to Health Policy and Leadership in Healthcare	U	3
Students will examine the political, social, and economic forces that have shaped health policy in the U.S. and the basic concepts of leadership in preparation for a career in a health care profession, biomedical research, or other careers. Prereq: Honors standing, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 521, 522, or 523.			
4810H	Special Topics in Biomedical Science I: Immunology & Infectious Disease	U	3
Integrative research and application experience for seniors in the Biomedical Science major. Special topics in biomedical science combine basic science research and clinical applications to human disease processes. Prereq: Honors standing, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 581, 582, or 583.			
4820H	Special Topics in Biomedical Science II: Genetics & Neurological Disease	U	1½
Integrative research and application experience for seniors in the Biomedical Science major. Special topics in biomedical science combine basic science research and clinical applications to human disease processes. Prereq: Honors standing, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 581, 582, or 583.			
4830H	Special Topics in Biomedical Science III: Cancer Research; Bench to Bedside and Back	U	1½
Integrative research and application experience for seniors in the Biomedical Science major. Special topics in biomedical science combine basic science research and clinical applications to human disease processes. Prereq: Honors standing, and a Biomedical Science Major; or permission of instructor. Not open to students with credit for 581, 582, or 583.			
4998H	BMS Undergraduate Thesis Research	U	1 - 4
Undergraduate research in a Biomedical Science Laboratory culminating in an honors thesis and defense. Prereq: Honors standing, and enrollment in Biomedical Sciences major, or permission of instructor. Repeatable to a maximum of 14 cr hrs or 14 completions. This course is graded S/U.			

Biomedical Sciences Graduate Program

5194	Introduction to Agent-Based Modeling Using NetLogo	U G	3
Teaches agent-based modeling techniques using NetLogo software. Students will develop agent-based models of complex systems drawn from Ecology, Biology, Sociology, Engineering, and Business. Computer literacy is recommended. A course in deductive logic or programming recommended. Students should download NetLogo and look over documentation before class begins.			
6700	Patient-Centered Research	G	2
Lectures and small group discussions will cover an introduction to humanistic aspects of medical research and human experimentation, including historical, socio-political, economic, and ethical aspects. Prereq: Enrollment in College of Medicine, and permission of instructor. Repeatable to a maximum of 8 cr hrs. This course is progress graded (S/U).			
7000	Concepts in Biomedical Science	G	6
An exploration of selected topics in biomedical sciences, ranging from molecular and cellular to systems. An emphasis is placed on fundamental concepts and critical reading of the primary literature. The course combines traditional lectures within student presentations and weekly in-class discussions of published papers. Prereq: Enrollment in IBGP/Biomedical Sciences PhD program, or permission of instructor.			

Biomedical Sciences Graduate Program 57

7030 Introduction to Data Science for Biological Sciences G 2

This course provides an introduction to data science practices in the area of Biological and Biomedical Research. Course covers how to develop scripts in R, Python & Bash and the fundamental of reproducible and transparent programming.

7040 Research Problem Solving in Biomedical Science G 4

Students in small groups will analyze current and classic research papers and learn how to identify the hypothesis, test the hypothesis, and whether the results support the conclusions. Prereq: 7000, or equiv, or permission of instructor. Not open to students with credit for 704.

7060 Faculty Research in Biomedical Science G 1

IBGP faculty members will present current research in their laboratories that could provide the basis for student laboratory rotations and dissertation research. Prereq: Enrollment in IBGP, or permission of program director. Not open to students with credit for 706. This course is graded S/U.

7070 Fundamentals of Grant Writing G 4

Introduce students to the basics principles of grant writing. Student must have a dissertation project about which they can write a proposal in order to enroll. Prereq: Not open to students with credit for 7070 and 7080.

7800 Vaccine Immunology G 1

This course explores the theory and practice of developing viral vaccines by discussion of the relevant virology and immunology. It is a combination seminar and work in progress course in which trainees present relevant recent papers as well as their own work. Discussion is encouraged led by the presenter and by the 4-8 Center faculty members who attend each presentation. Prereq: 7000. This course is graded S/U.

7894 Mechanisms of Lung Disease Seminar Series G 1

Provides graduate students with a forum to discuss primary research and/or journal articles pertinent to pulmonary diseases. Prereq: 7000 or equivalent to be determined by course director. Repeatable to a maximum of 8 or hrs or 12 completions. This course is graded S/U.

7900 Cancer Immunology: Critical Journal Readings G 1

Faculty, students and postdoctoral fellows will give critical interpretations of research and journal readings on cancer immunology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 8 or hrs. This course is graded S/U.

7930 Individual Studies in Integrated Biomedical Science G 1 - 15

A research project will be assigned by a faculty member to meet the individual student's educational goals. Prereq: Enrollment in IBGP, or permission of instructor. Repeatable to a maximum of 60 or hrs or 10 completions. This course is graded S/U.

7950 Host-Pathogen Interactions: Research Seminar G 1

Faculty, students and outside speakers will give research presentations on microbial-host interactions. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 8 or hrs. This course is graded S/U.

7960 Research Seminars in Heart and Lung Disease G 1

Faculty and outside speakers will give basic and clinical science research seminars on mechanisms of heart and lung disease. Prereq: Enrollment in IBGP, or permission of instructor. Repeatable to a maximum of 8 or hrs. This course is graded S/U.

7972 Integrated Biomedical Science Senior Seminar G 1

Senior IBGP graduate students will present research work and be advised and critiqued by other senior students and a faculty advisor. Prereq: Enrollment in IBGP, and Grad standing. Repeatable to a maximum of 3 or hrs.

7975 Medical Scientist Training Program Seminar G 1

The Medical Scientist Training Program Seminar is a twice monthly forum for MSTP trainees to present research-in-progress, clinical cases, or journal club to their peers. Programmatic sessions (recruitment, new initiatives, etc.) and professional development (F30/F31, career path, vertical mentoring) sessions will be integrated into the schedule each semester. Prereq: Enrollment in the Medical Scientist Training Program. Repeatable to a maximum of 10 or hrs. This course is progress graded (S/U).

8050 Research Techniques and Resources G 4

Survey of research techniques used to solve problems in modern cell and molecular biology, immunology, biochemistry, microbiology, microscopy, laboratory safety, and related available resources. Prereq: Enrollment in IBGP, or permission of course director. Not open to students with credit for 805.01.

8520 Career Discovery in the Biomedical Sciences G 1

Seminar topics related to career opportunities available in the biomedical sciences, as well as topics on career development tools such as CV preparation, interview strategies, networking and prioritizing commitments. Prereq: Enrollment in BSGP, or permission of instructor. Repeatable to a maximum of 6 or hrs. This course is graded S/U.

8800.01 Signature Program Translational Science Curriculum "Immunology and Inflammation" G 2

Translational Science to understand inflammatory diseases, viral diseases, cancer, and wound healing. Prereq: Enrollment in MD or DO degree program, or permission of instructor.

8800.02 Signature Program Translational Science Curriculum "Infection & Host/Pathogen Science" G 2

Translational Science to understand inflammatory diseases, viral diseases, cancer, and wound healing. Prereq: Enrollment in MD or DO program, or permission of instructor. Cross-listed in IntMed.

8800.03 Signature Program Translational Science Curriculum "Regenerative Medicine & Wound Healing" G 2

Translational Science to understand inflammatory diseases, viral diseases, cancer, and wound healing. Sum Sem. Prereq: Enrollment in MD or DO program, or permission of instructor.

8800.04 Signature Program Translational Science Curriculum "Cancer Biology & Therapeutics" G 2

Translational Science to understand the cancer pathogenesis and the rational development of targeted therapies. Prereq: Enrollment in MD or DO degree program, or permission of instructor.

8999 Research in Integrated Biomedical Science G 1 - 12

Research for dissertation purposes only. Prereq: Enrollment in IBGP, or permission of instructor. Repeatable to a maximum of 60 or hrs or 10 completions. This course is graded S/U.

Biophysics

6000 Topics in Research Proposal Writing G 1

Course is designed to be a "writing lab" where students produce and critique research writing. Primarily, the focus will be proposal writing with NIH/NSF grant-writing strategies. Additional time will be devoted to developing manuscripts and poster presentations. Repeatable to a maximum of 2 or hrs.

6697 Study at a Foreign Institution G 1 - 15

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of program director. Repeatable to a maximum of 45 or hrs or 45 completions. This course is progress graded (S/U).

6702 Advanced Experimental Methods in Biophysics G 1 - 3

Advanced Experimental Methods in Biophysics. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions.

6789 Free Radicals in Biomedicine G 2

Background in free radical biology and medicine focused on biologically relevant radicals, their physiological and pathophysiological roles and underlying physico-chemical processes. Grad credit in Biochem, Phys Chem, or Biophys recommended. Sp Sem. Prereq: Permission of instructor (Ugrad only). Cross-listed in IntMed.

7600 First-Year Student Orientation G 1

Orientation for first-year students in Biophysics and partner graduate programs; lectures on topics important for successful graduate experience; training in presenting scientific work; training in research ethics. Prereq: Not open to students with credit for MCDBio 7600, MolGen 7600, OSBP 7600 (760), or Micrbio 7600. This course is graded S/U. Cross-listed in MCDBio, MolGen, OSBP, and Micrbio.

7998 Biophysics Research G 1 - 15

Research for pre-candidacy students in Biophysics. Prereq: Enrollment in a Ph.D. Program. Repeatable. This course is graded S/U.

8193 Individual Studies G 1 - 5

Any particular subject that is not part of the regular curriculum. Prereq: Permission of instructor and program director. Repeatable. This course is graded S/U.

8998 Research in Biophysics G 1 - 15

Research for thesis and dissertation purposes. Prereq: Enrollment in a Ph.D. program. Repeatable. This course is graded S/U.

8999 Research in Biophysics G 1 - 3

Research credit for students who are post candidacy exam. Repeatable. This course is graded S/U.

Biotechnology

1201T Exploring Biochemical Sciences and Biotechnology U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

2194T Group Studies U 1 - 3

Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions.

2218T General and Applied Entomology U 3

Classification, identification, life cycles, external/internal structures, and functions of insects; common insect pests and their damage; methods of control and their applications. Prereq: Not open to students with credit for 218T or LabBioSc 218T. This course is available for EM credit.

Bosnian/Croatian/Serbian

58 Bosnian/Croatian/Serbian

1101 Elementary Bosnian/Croatian/Serbian I U 4

Introduction to Bosnian/Croatian/Serbian; development of speaking, listening, reading, and writing skills in cultural context. Not open to native speakers of these languages through regular course enrollment or EM credit, or to students with 2 or more years of study in these languages in high school, except by permission of department. Prereq: Not open to students with credit for SrbCroa 101. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1102 Elementary Bosnian/Croatian/Serbian II U 4

Continued development of speaking, listening, reading, and writing skills in cultural context. Not open to native speakers of these languages through regular course enrollment or EM credit. Prereq: BCS 1101 (SrbCroa 101.01). Not open to students with credit for SrbCroa 102 or 103. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1103 Intermediate Bosnian/Croatian/Serbian I U 4

Continued development of speaking, listening, reading, and writing skills in cultural context. Not open to native speakers of these languages through regular course enrollment or EM credit. Prereq: BCS 1102 (SrbCroa 102.01). Not open to students with credit for SrbCroa 104. This course is available for EM credit. GE for lang course. GE world languages course.

2104 Intermediate Bosnian/Croatian/Serbian II U 4

Increasing functional ability in speaking, listening, reading, and writing practice, vocabulary-building; new grammar structures; start developing higher-level language skills in Bosnian/Croatian/Serbian. Not open to native speakers of this language through regular course enrollment or EM credit. Prereq: BCS 1103 (SrbCroa 104.01). Not open to students with credit for SrbCroa 407.01, or for 5 qtr or hrs of 407.51.

3101 Advanced BCS I U 3

Further develop speaking, listening, reading, and writing skills and grammar competence. Prereq: 2104. Not open to students with credit for Slavic 5194 (Au13, Mihalicek).

3102 Advanced BCS II U 3

Advanced BCS; second semester. Prereq: 3101.

Business Admin

1100 College of Business Survey U 1

Academic requirements; policies procedures and resources; student rights and responsibilities; academic areas of specialization; careers in accounting and business administration. Prereq: NFYS, or a transfer student in direct enrollment program in BUS; and permission of instructor or department. Not open to students with credit for any OSU survey course.

1100H College of Business Survey U 1

Academic requirements; policies procedures and resources; student rights and responsibilities; academic areas of specialization; careers in accounting and business administration. Prereq: Honors standing, and NFYS standing in direct enrollment program in BUS and permission of instructor or department. Not open to students with credit for any OSU survey course.

1101.01 Business Administration Seminar: Scholars U 1

Seminar for first-year business scholars students to explore personal interests, interdisciplinary opportunities, campus and local community resources and activities related to business scholars program. Prereq: Admission to Business scholars program, and permission of instructor.

1101.02 Business Administration Seminar: Campus Change U 1

Develop successful strategies to transition from a regional campus to Fisher College and the BSBA major program on the Columbus campus. Emphasis placed on self-initiative, effective decision making and personal responsibility. Prereq: Permission of instructor.

1101.03 Business Administration Seminar: E&I Scholars U 1

Seminar for first-year Entrepreneurship & Innovation scholars students to explore personal interests, interdisciplinary opportunities, campus and local community resources and activities related to E&I scholars program. Prereq: Admission to E&I Scholars program, or permission of instructor.

1101.04 Fisher First Seminar U 1

For students admitted into the Fisher College of Business and part of the Fisher F.I.R.S.T. Program. Designed to help students reflect on their self and leadership development, foster community building and enhance skills development that are necessary for academic success and career success of students in Business. Prereq: Admission to Fisher F.I.R.S.T. program.

1200 College of Business Survey II U 1

Students will develop a comprehensive academic, professional/career, and personal plan for success that incorporates: self-knowledge and individual interests, exploring a specialization, a 4-year graduation plan, short term and long term goals for gaining leadership and work experience, and identifying opportunities to enhance the college experience. Prereq: Fresh standing, or transfer student survey course.

2191.01 Professional Experience Field Study U 1

For students completing a full semester internship requiring credit; internship is supervised by the employer, three assignments related to the internship are evaluated by the Director, Undergraduate Internship Services. Prereq: Admission to College of Business major program and specialization, and permission of instructor. Not open to students with more than 3 credit hours of 2191 or 2191.02. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.

2191.02 Professional Experience Field Study U ½

For students completing a session long internship requiring credit; internship is supervised by the employer, three assignments related to the internship are evaluated by the Director, Undergraduate Internship Services. Prereq: Admission to College of Business major program and specialization, and permission of instructor. Not open to students with more than 3.5 credit hours of 2191 or 2191.01. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.

2292H Business Skills & Environment U 3

Introduction to the role of business in the lives of individuals, consumers, employees, and citizens. Focus on the concept of ethical leadership with emphasis on both oral and written communication skills for the business environment. Prereq: Honors standing, and admission to BSBA program. Not open to students with credit for BusMHR 2291, 2292 or BusAdm 499 or 499H.

2600 Undergraduate Speaker Series U 1

Alumni from the Fisher College of Business will discuss their specializations, and companies to assist students in making career decisions. Emphasis on networking and business communications. Prereq: Enrollment in College of Business. Not open to students with credit for 503. This course is graded S/U.

2601 Job Search Preparation and Transition to Work for Business Students U ½ - 1

Practical techniques and skill development in conducting a job/internship search, researching career information, evaluating career decisions and beginning a successful career. Prereq: Enrollment in the Fisher College of Business Major Program and Specialization. Repeatable to a maximum of 3 cr hrs or 4 completions.

2798 Study Tour: International U ½ - 3

Designed to provide an orientation to students who will embark on an international experience and once there, will enable students across countries to learn from each other. Prereq: Permission of instructor. Not open to students with credit for 498.02. Repeatable to a maximum of 9 credit hours or 3 completions.

3520 Entrepreneurship and Innovation: Fundamentals of New Product Development U 3

Provide an understanding of the entire product development process, from the first stages of problem definition to the finished product. Prereq: BusMHR 3510.01.

3531 Entrepreneurship and Innovation: General, Startup-Based Entrepreneurship U 3

Transformation of knowledge captured through creative, person-centered design into conceptual, viable, commercial concepts in the area of product/service based general entrepreneurship and entrepreneurial start-ups. Examination of a variety of business models appropriate for commercializing product/service based conceptualizations. Prereq: 3510, and Design 2700 and MechEng or ISE 5682.

3532 Entrepreneurship and Innovation: Corporate Entrepreneurship U 3

Develop skills and understanding of theories and their application to develop new ideas and viable new businesses within an established firm. Address the development of an internal culture of innovation, processes for reviewing ideas and developing concepts, strategic analysis, positioning for competitive advantage, forms of corporate ventures, and the qualities of corporate entrepreneurs. Prereq: 3510, and Design 2700 and MechEng or ISE 5682.

3533 Entrepreneurship and Innovation: Technology Entrepreneurship U 3

Examine the innovative transformation of knowledge captured in scientific discoveries into conceptual, viable, commercial products and services. Prereq: 3510, and Design 2700 and MechEng or ISE 5682.

3630.01 Business Industry Cluster U 3

Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Previous enrollment in 3630.01, or admission to Business Industry Cluster Program, or permission of instructor. Not open to students with credit for 505.01.

3630.02 Business Industry Cluster U 3

Exploration of current interdisciplinary best business practices in industry. Students will work across business majors to learn strategy and implementation details from current industry professionals. Prereq: Previous enrollment in 3630.02, or enrollment in Business Industry Cluster Program, or permission of instructor. Not open to students with credit for 505.02.

3630.03 Business Industry Cluster U 3

Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Previous enrollment in 3630.03, or admission to Business Industry Cluster Program, or permission of instructor. Not open to students with credit for 505.03.

3630.04 Business Industry Cluster U 3

Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Previous enrollment in 3630.04, or admission to Business Industry Cluster Program, or permission of instructor. Not open to students with credit for 505.04.

3630.05 Business Industry Cluster	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Previous enrollment in 3630.05, or admission to Business Industry Cluster Program, or permission of instructor. Not open to students with credit for 505.05.		
3630.06 Business Industry Cluster	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Admission to Business Industry Cluster Program, or permission of instructor.		
3630.07 Business Industry Cluster	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Admission to Business Industry Cluster Program, or permission of instructor.		
3630.08 Business Industry Cluster	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Admission to Business Industry Cluster Program.		
3630.09 Business Industry Immersion	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Admission to Business Industry Immersion Program, or permission of instructor.		
3630.10 Business Industry Immersion	U	3
Exploration of current interdisciplinary best business practices in industry. Students will work across business specializations to learn strategy and implementation details from current industry professionals. Prereq: Admission to Business Industry Immersion Program, or permission of instructor.		
3632.01 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: Enrollment in Business Industry Cluster Program, or permission of instructor. Prereq or concur: 3630.01. Not open to students with credit for 506.01.		
3632.02 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: Enrollment in Business Industry Cluster Program, or permission of instructor. Prereq or concur: 3630.02. Not open to students with credit for 506.02.		
3632.03 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: Enrollment in Business Industry Cluster Program, or permission of instructor. Prereq or concur: 3630.03. Not open to students with credit for 506.03.		
3632.04 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: Enrollment in Business Industry Cluster Program, or permission of instructor. Prereq or concur: 3630.04. Not open to students with credit for 506.04.		
3632.05 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: Enrollment in Business Industry Cluster Program, or permission of instructor. Prereq or concur: 3630.05. Not open to students with credit for 506.05.		
3632.06 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq 3630.06, and enrollment in Business Industry Cluster Program; or permission of instructor.		
3632.07 Business Industry Cluster Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq 3630.07, and enrollment in Business Industry Cluster Program; or permission of instructor.		
3632.08 Business Industry Immersion Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: 3630.08, or permission of instructor.		
3632.09 Business Industry Immersion Project Experience	U	3
Hands-on experience in the execution of industry business practices to fill a need articulated by an operating public or private organization. Prereq: 3630.09, or permission of instructor.		
3640.01 Introduction to Sustainability in Business I: Principles and Concepts	U	3
An introduction to the topic of sustainability in business. Prereq: Must be in Business Industry Cluster Program.		

3640.02 Introduction to Sustainability in Business I: Principles and Concepts	U	3
An introduction to the topic of sustainability in business. Prereq: ENR 2500, or 2501, or AEDEcon 2500, or 2501, and enrollment in EEDS major. Not open to students with credit for BusAdm 3640.01.		
3642.01 Introduction to Sustainability in Business II: Applications, Solutions and Project Experience	U	3
Field projects on sustainable business issues. Prereq: 3640.01, or permission of instructor.		
3642.02 Introduction to Sustainability in Business II: Applications, Solutions and Project Experience	U	3
Field projects on sustainable business issues. Prereq: 3640.02, or permission of instructor. Not open to students with credit for BusMHR 504.03 or 694.13.		
3760 Exploring Culture in International Environments	U	1
Through individual reflections, activities, and discussions, students participating in Fisher's International Student Exchange Program will be challenged to view knowledge and experiences from multiple perspectives. Prereq: Accepted into a Fisher International Exchange Program. Repeatable to a maximum of 2 cr hrs.		
3890H Honors Seminar	U	1 - 3
Seminar on current business topics for students enrolled in the Business Administration Honors Programs. Topics may vary. Prereq: Admission to a Business Administration Honors Program. Repeatable to a maximum of 6 cr hrs of 4 completions.		
4189 Advanced Field Study: Doing Business in a Global Region	U	1
Required pre-departure component of Fisher College of Business Global Internship Program for Undergraduates. Prereq: Admission to Fisher College of Business Global Internship Program, and permission of instructor. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.		
4191 Professional Experience in Business	U	0
Students complete a co-op or internship assignment in private industry or for a government agency; assignment is supervised by the employer and monitored and evaluated by the course coordinator. Prereq: Permission of the Course Coordinator. Repeatable to a maximum of 4 completions. This course is graded S/U.		
4510 Entrepreneurship and Innovation: Practicum	U	3
Last required course in the Entrepreneurship and Innovation Minor. Application of tools and resources to real-world projects. Prereq: 3510 and 3531, 3532, 3533 or BusMHR 5530, and Design 2700, and MechEng or ISE 5682.		
4798 Study Tour: International	U	1 - 10
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Repeatable for different titled study tours only. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 3 completions.		
4890H Honors Seminar	U	1 - 3
Seminar on current business topics for students enrolled in the Business Administration Honors Programs. Topics may vary. Prereq: 3890H. Repeatable to a maximum of 6 cr hrs or 2 completions.		
4998 Undergraduate Research in Business	U	1 - 3
Undergraduate Research in Business for non-honors students. Prereq: BusMHR 2291 (499), and Jr standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is progress graded.		
5797 Study at a Foreign Institution	U G	½ - 18
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of Undergraduate BSBA Program Director of Student Services. Repeatable to a maximum of 36 cr hrs or 10 completions.		
7191 Professional Experience in Business	G	0
International students complete a co-op or internship assignment in private industry or for a government agency; assignment is supervised by the employer and monitored and evaluated by the course coordinator. Prereq: Permission of the Course Coordinator. Repeatable to a maximum of 4 completions. This course is graded S/U.		

Business Admin: Finance

1200 Personal Finance	U	3
Introduction to the field of personal financial management and planning, focusing on the tools individuals and families employ to manage their financial affairs. Prereq: Not open to students with credit for 220, or enrolled in Accounting or Finance majors.		
1250 FINIGS	U	2
There is a broad range of opportunities, in a broad range of industries available to students with a Finance degree. This course is designed to explore these opportunities, in an in-depth manner. The goal of this course is to give the student a 'real world' perspective. Prereq: Soph standing, and Finance specialization. This course is graded S/U.		
1300 Project Thrive Fin Gigs	U	1 - 3
In this course, you will examine the role of finance and accounting in organizations and society, learn accounting/finance fundamentals, explore accounting/finance career choices, and study the hard and soft skills required to be successful in business. Prereq: Permission of instructor.		

60 Business Admin: Finance

3120	Foundations of Finance	U	3		
	Develops skills related to Time Value of Money, Risk and Return with applications in business and personal finance. Prereq: AcctMIS 2000, Math 1116 or above, Econ 2001.01, and CSE 1110 or equiv. Not open to students with credit for 3220. Not open to students enrolled in the BSBA program.				
3194	Group Studies	U	1 - 6		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 494.				
3220	Business Finance	U	3		
	Introductory finance class which allows students develop the skills to understand how financial managers make value-maximizing decisions for their firms. Prereq: Econ 2001.01 (200), and 2002.01 (201), and AcctMIS 2200 (211). Prereq or concur: AcctMIS 2300. Not open to students with credit for 620, or to students enrolled in UUSS, UExp or PreBSBA-PR.				
3222	Foundations of Investments	U	3		
	Basic principles and methods of investment for non-Business majors. Prereq: 3120 (420) and AcctMIS 2000. Not open to students with credit for 4221 (722) or 522. Not open to students enrolled in the BSBA program.				
3250	Foundations of International Finance	U	3		
	Management of financial risk inherent with international business; problems of implementing corporate finance principles; International Capital Markets, for non-Business majors. Prereq: 2200, 3220 (620), or 420. Not open to students with credit for 4250 or 725.				
3300	Principles of Insurance	U	3		
	Basic principles and main characteristics of the Insurance Industry and the fundamentals of risk identification, insurance contracts, and annuities. Prereq: Econ 2001.01, 2002.01, and BusMHR 2292.				
3400	Introduction to Real Estate	U	3		
	Examine the economics of property rights, the fundamental theories in urban economics, and selected applications. Prereq: Econ 2001.01 (200) or 2002.01 (201), and BusMhr 2292 (BusAdm 499.01). Not open to students with credit for 670.				
3500	Legal Environment of Business	U	1½		
	An introduction to American legal institutions, sources of law, and an analysis of basic concepts of public and private law related to business decisions. Prereq: Soph standing. Not open to students with credit for 510, or to students enrolled in UUSS, UExp or PreBSBA-PR.				
4193	Individual Studies	U	1 - 4		
	Individual study projects in selected areas of finance. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 3 completions. This course is graded S/U.				
4194.21	Group Studies	U	1 - 4		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 694.21.				
4194.22	Group Studies	U	1 - 4		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 694.22.				
4194.23	Group Studies	U	1 - 4		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 694.23.				
4194.24	Group Studies	U	1 - 4		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 694.24.				
4194.25	Group Studies	U	1 - 4		
	Group study projects in selected areas of finance. Prereq: Permission of instructor. Not open to students with credit for 694.25.				
4200	Applications in Finance	U	3		
	Applications in Finance with a discussion of Investment alternatives such as Money Market instruments, Stocks and Bonds and Corporate Finance issues such as Corporate Governance, Cost of Capital and Capital Budgeting. Prereq: 3220 (620), BusMgt 2320 (330), and 2321 (331). Not open to students with credit for 4210, 4211, 4212 (721), 4220, 4221, or 4222 (722).				
4201	Financial Data	U	1½		
	How to use relevant accounting information for various applications in finance such as estimating stock and bond prices and free cash flows. Prereq: 3220 (620), AcctMIS 2200 (211), AcctMIS 2300 (212), BusMgt 2320 (330), and 2321 (331); and BusMHR 2291 or 2292 (BusAdm 499.01).				
4202H	Honors Financial Data	U	3		
	This hands-on course covers the application of financial software tools and financial modeling. You will be exposed to real world applications used in corporate finance, investment banking, private equity, and asset management. Prereq: A CPHR of 3.5 or above, and admission to the Finance Honors Program.				
4211	Corporate Finance	U	3

	The roles of business plans, Angel Investors, and venture capital in private firms. Prereq: 4211 and 4221. Not open to students with credit for 590.				
4216	Private Equity	U	1½		
	Private equity funds are responsible for a large percentage of merger activity both inside and outside the U.S. The venture capital portion of the private equity industry has provided financing for most of the prominent new companies that have gone public in recent years. Prereq: 4211, 4221, and 4229.				
4217	Private Financing (i.e. VC & PE)	U	3		
	This course provides a comprehensive look into the inner workings of Venture Capital along with the various skill sets required of first year analysts. The class will include case studies and class discussions augmented by lectures from industry experts. Prereq: 4211 and 4221.				
4218	Fixed Income Securities	U	1½		
	An introduction to the mathematics and evaluation of US Dollar denominated fixed income instruments. Students will learn the underlying terms and conditions used in the fixed income markets and apply Excel based mathematical models to evaluate the pricing, yield, risk, and return attributes in the market. Prereq: 4211 and 4221.				
4219	Advanced Corporate Finance	U	3		
	This course is a capstone undergraduate elective in the area of Corporate Finance. The course helps students bridge the gap between the theory of finance, covered in other courses, and the reality of decision-making as a financial manager through the use of real-world case studies. Students learn to analyze real-world problems and provide recommendations to a best course of action. Prereq: 4211, 4221, and BusMHR 2291 or 2292. Not open to students with credit for or currently enrolled in 4229 or 4239.				
4221	Investments	U	3		
	Skills for valuation and theories and applications of CAPM, APT, and efficient markets; investment options, forwards and futures, interest rate parity, and relevant market regulation. Prereq: 3220, BusMgt 2320, 2321, and BusMHR 2292. Not open to students with credit for 722, 4220 or 4222.				
4221H	Honors Investments	U	3		
	Designed to teach the principles of financial decision making and the investment process. The course will cover current market moving events, multiple asset classes, asset allocation, diversification, security valuation, key player types, efficient market hypothesis, adaptive market hypothesis, behavioral finance, pricing models, active investment management, investment funds, and fin. reg. Prereq: Admission to the Finance Honors Program, and a CPHR of 3.5 or above.				
4223	Fixed Income	U	1½		
	The basics of fixed-income securities, bond valuation skill development, and the measurement and management of credit and interest-rate risk. Prereq: 4211 and 4221. Not open to students with credit for 731.				
4224	Behavioral Finance	U	1½		
	Theories and implications of behavioral finance, CAPM Anomalies, and advanced Investment strategies. Prereq: 4211 (721), 4221 (722) and BusMHR 2292 (BusAdm 499.01). Not open to students with credit for 722.				
4225	Investment Strategies and Philosophies	U	3		
	This course is designed to teach different investment strategies, reveal the beliefs that underlie each one, provide evidence on whether the strategies actually produce results, and what an investor needs to understand in order to implement a philosophy. The strategies covered include value investing, growth investing, technical analysis, market timing, arbitrage, fixed income. Prereq: 4211 and 4221.				
4226	Finance Consulting and Business	U	3		
	In a discussion-based classroom environment, students learn and apply financial consulting techniques to business operations. The discussions will involve detailed activities and cases from multiple industries and current consulting trends in finance happening in global firms and corporations. Students will then successfully leverage these finance skills/tools at future companies. Prereq: 4211 and 4221.				

4227	Trading & Markets	U	1½
Action-based course on market design and trading cost analysis, including interactive trading simulation. Prereq: 4211, 4221 and BUSMHR 2292. Not open to students with credit for 730.			
4228	Stock Market: Student Investment Management	U	3
Action-based course applying valuation techniques and investment strategies to portfolio management and valuation. Prereq: 4211, 4221, and BusMHR 2292, and GPA 3.2 or above.			
4229	Options and Futures	U	3
This course explores the valuation of forwards, options, forward-based, and option-based financial instruments. While a student may have studied options and/or forwards in other courses, this course examines in detail the analytical methods used to price these securities, and the analytical analysis of arbitrage, hedging, and speculation using these securities. Prereq: 4211, 4221, and BusMHR 2291 or 2292. Not open to students with credit for or currently enrolled in 4219 or 4239.			
4234	FinTech	U	1½ - 3
'FinTech' refers to financial sector innovations involving technology-enabled business models that can facilitate disintermediation, revolutionize how existing firms create and deliver products and services, address privacy, regulatory and law-enforcement challenges, provide new gateways for entrepreneurship, and seed opportunities for inclusive growth. Prereq: 4211 and 4221.			
4235	Applied Fundamental Investing	U	3
Theories and applications in asset management including the roles of investment strategies. Prereq: 4211, or 4211H; and 4221, or 4221H.			
4236	Capital Markets	U	3
This course focuses on the U.S. financial system and its major participants, including discussions regarding objectives and procedures for evaluating opportunities and pricing risk. Topics include the role and functions of the Federal Reserve System and related parties. This will include Investment Banking, Merchant Banking, Private Equity, Venture Capital, and newly evolving sources of capital. Prereq: 4211 and 4221.			
4237	Short Selling	U	3
In this course we will explore the art of short selling. Key course objectives include how to: - Explain the history and mechanics of short selling - Identify late cycle market dynamics - Research potential short sale candidates - Analyze and articulate the risks and benefits to potential short sale investments Prereq: 4211, and 4221.			
4239	Risk Management	U	3
Extends the skills developed in Corporate Finance and Investments classes to the role of risk management within the firm. Increasingly, managers are required to understand the many risks facing their organizations, undertaking those risks which represent value-enhancing opportunities, while mitigating unwanted risks. Prereq: 4211 and 4221, and BusMHR 2291 or 2292. Not open to students with credit for or currently enrolled in 4219 or 4229.			
4250	Global Finance	U	1½
Implications for financial managers of global economic policy. Prereq: 3220 (620), AcctMIS 2200 (211), 2300 (212), BusMgt 2320 (330), 2321 (331), and BusMHR 2291 or 2292 (BusAdm 499.01). Not open to students with credit for Econ 520.			
4250H	Honors Global Finance	U	1½ - 3
In this class, we are going to look at the interconnections that link international financial markets and their implications for firms. We will develop a simple model that will help you understand the relationship between the financial markets and macroeconomic policies and the business environment in which firms operate. Prereq: A CPHR of 3.5 or above, and admission to the Finance Honors Program.			
4251	Booms and Busts	U	3
In this course we examine various financial booms, busts and how the field of finance evolved along the way. The purpose of the course is to understand the causes of past financial crises and booms as well as develop a deeper understanding of how the field of finance has progressed. Prereq: 4211, 4221, and 4201. Prereq or concur: 4250.			
4255	International Finance	U	3
The goal is to provide a framework for making financial decisions in an international context. The course is divided into three sections: 1) the international financial environment, 2) international investment analysis, and 3) international corporate finance. Students will be exposed to a broad range of topics, including some of the latest developments in global financial markets. Prereq: 4250. Prereq or concur: 4211 and 4221.			
4265	Financial Institutions	U	3
Financial Institutions play an extremely important role in the functioning of the global economy and in the operation of our firms. When financial institutions fail to act properly the results can be catastrophic, both for financial markets and greater society as a whole. Prereq or concur: 4211 and 4221. Not open to students with credit for 726.			
4310	Property and Liability Insurance	U	3
Fundamentals of commercial property and liability insurance, including commercial property and liability contracts, and the regulation and financial analysis of property and liability insurers. Prereq: 3300, BusOBA 2320, 2321, and BusMHR 2292.			
4311	Personal Insurance	U	3
Topics on the basics of life insurance, health insurance, disability and long term care insurance, homeowners and renters insurance, auto insurance. Prereq: 3300, BusOBA 2320, 2321, and BusMHR 2292.			

4312	Employee Benefits Plans	U	3
Fundamentals of insurance topics related to the human resource function such as health and retirement benefits, and COBRA. Prereq: 3300, BusOBA 2320, 2321, and BusMHR 2292.			
4313	Captive Insurance Company: Development, Structure and Operations	U	3
This course provides an introduction to the formation, characteristics, and functions of Captive Insurance Companies. Captive is a subsidiary insurance company that covers the loss exposures of its parent. In the 50 years since their introduction, captives have evolved to cover multiple owners or members. Prereq: 3300, BusMgt 2320, and BusMHR 2292.			
4315	Insurance Operations	U	3
This course examines the major operations of property and casualty insurers, and the issues facing managers of such operations. Students will review the core insurance functions of marketing, underwriting, and claims, as well as key staff roles, including actuarial, loss control, reinsurance and investment management. Prereq: 3300, BusMgt 2320, and BusMHR 2292.			
4410	Real Estate Finance	U	3
Basics of the mortgage markets and related finance investments and models of real estate valuation. Prereq: 3400 (670), or in Finance-BS plan. Not open to students with credit for 772.			
4411	Property Management	U	3
Basic topics related to property management such as acquisition, construction, and supporting business functions. Prereq: 3220 (620), 3400 (670), 3500 (510), BusMgt 2320 (330), 2321 (331), and BusMHR 2292 (BusAdm 499.01). Not open to students with credit for 776.			
4412	Real Estate Law	U	3
Basic legal aspects of property contracts, transactions, and environmental law. Prereq: 3220 (620), 3400 (670), 3500 (510), BusMgt 2320 (330), 2321 (331), and BusMHR 2292 (BusAdm 499.01). Not open to students with credit for 775.			
4413	Planning and Development	U	3
In this action-based class, students engage in site-based development case studies. Prereq: 3220 (620), 3400 (670), 3500 (510), BusMgt 2320 (330), 2321 (331), and BusMHR 2291 (BusAdm 499.01).			
4415	Real Estate Asset Management	U	1½
Real Estate Asset Management, is designed to give students a solid grasp of the skills required in analyzing a commercial real estate investment, and formulating and implementing the strategy for optimizing the investment returns. Prereq: 3220, 3400, 3500, BusMgt 2320, 2321, and BusMHR 2292.			
4416	Real Estate Equity Investment	U	1½
Real Estate Equity Investment, is designed to give students a solid understanding of equity investment in commercial real estate through a vehicle called a Real Estate Investment Trust (REIT). Prereq: 3220, 3400, 3500, BusMgt 2320, 2321, and BusMHR 2292.			
4510	Legal Business Issues	U	1½
Fundamentals of contracts and other legal aspects of business. Prereq or concur: 3500 and BusMHR 2291 (BusAdm 499.01). Not open to students with credit for 510.			
4630H	Finance Honors Seminar-Capstone	U	3
This course is a current event and capstone project with leadership service experience. The Capstone project will introduce you to the world of non-profit organizations. The non-profit sector serves a vital role in our society and covers range of institutions and organizations. Prereq: Admission to the Finance Honors Program.			
4998	Undergraduate Research in Finance	U	1 - 3
Undergraduate research in finance for non-honors students. Prereq: BusAdm 2291 (499), and Jr standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is progress graded.			
4998H	Honors Research	U	1 - 3
Special topics research in finance, business law, insurance and risk, and/or real estate; research evaluated through papers, thesis, and/or special examination. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
5402	Real Estate Valuation	U G	3
This real estate valuation and financial modeling course will cover existing income producing property as well as ground up construction. Topics include market analysis, comparable valuation, income valuation, cost valuation, real estate finance, expense reimbursements, budget development, and pro-forma modeling. Prereq: 3400, and enrollment in RealEst major or minor; or 4211, 4221, and enrollment in Finance major; or 7240; or permission of instructor.			
6211	Finance I	G	1½
Covers topics of time value of money, concepts of risk and return, and investment criteria. Prereq: Enrollment in MAcc program. Not open to students with credit for 811.			
6212	Finance II	G	1½
Covers capital budgeting, market efficiency, derivatives, interest rate parity. Prereq: Enrollment in MAcc program. Not open to students with credit for 811.			
6220	Financial Analysis and Valuation	G	3
Fundamental techniques for financial analysis such as time value of money, risk and return, capital budgeting and investment criteria, financial accounting, and an introduction to financial derivatives. Prereq: Enrollment in SMB-Finance program. Not open to students with credit for 860.			

62 Business Admin: Finance

6221	Economics for Financial Analysts	G	1½	7221	Financial Modeling	G	1½
Principles of how individuals and firms make financial decisions, how financial markets work, and how financial managers make decisions under different forms of industry structure. Prereq: Enrollment in SMB-Finance program. Not open to students with credit for 861.				Basic financial modeling techniques in EXCEL. Prereq: MBA 6223, or BusFin 6211, 6212, or 6220.			
6225	Core Capstone Projects - SMF	G	1½	7222	Fixed Income Analysis	G	1½
This is a capstone, action-based course for students in the Specialized Masters - Finance (SMF) program offered in the first semester of the program. The course aims at providing SMF students with a structured environment to practice analytical and soft skills acquired throughout the program's core courses. Prereq: Enrollment in SMB-Finance program.				Valuation of fixed income securities as well as measures of their interest rate and credit risk. Prereq: MBA 6223. Prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
6226	Finance Consulting Practicum	G	1½	7223	Quantitative Portfolio Management	G	1½
Action-based course providing students in the Specialized Masters Finance the opportunity to practice analytical and soft skills through working with professionals on finance projects. Prereq: Enrollment in SMB-Finance program. Not open to students with credit for 865.				Advanced investment strategies need for asset management and portfolio allocation. Prereq: MBA 6223. Prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
6230	Accounting & Finance for Analytics	G	3	7224	Trading & Markets	G	1½
Students will understand the fundamentals of accounting (managerial and financial) and finance. The course will cover defining financial data, transforming data into information and leveraging financial information to make financial decisions. Students will have hands-on experience with various types of real-world financial data and build a detailed discounted cash flow model. Prereq: Enrollment in SMB-Analytics program.				Advanced theories of market design applied in an interactive trading simulation, Action-Based. Prereq: MBA 6223; or prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
7193	Individual Studies	G	½ - 9	7225	Student Stock Market Investment Management	G	3
Individual study projects in related areas of finance. Prereq: Permission of instructor. Repeatable to a maximum of 12 hrs or 3 completions. This course is graded S/U.				Advanced topics with industry analysis and stock valuation applied to portfolio management. Prereq: MBA 6223, BusFin 7210, and 7220; or enrollment in SMB-Finance program.			
7194.21	Group Studies	G	1 - 4	7226	Behavioral Finance	G	1½
Group study projects in selected areas of finance. Prereq: Permission of instructor.				Theories of behavioral finance, such as Prospect Theory, and their implications for investor behavior and markets. Prereq: MBA 6223; or prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
7194.22	Group Studies	G	1 - 4	7230	Derivatives Markets	G	1½
Group study projects in selected areas of finance. Prereq: Permission of instructor.				Advanced investments class studying how to value options and related instruments using binomial pricing models and how to value and implement strategies using futures. Prereq or concur: MBA 6223. Not open to students with credit for 823.			
7200	Financial Software Applications	G	1½	7232	Derivatives Valuation and Application	G	1½
This hands-on course covers the application of financial software tools and financial modeling. Exposure to real world applications used in corporate finance, investment banking, private equity, and asset management. Apply models relating to project analysis, capital budgeting, financial statement analysis, equity intrinsic values, capital structure, portfolio mgmt, leveraged buyouts, and M&A. Prereq: MBA 6223, or enrollment in SMB-Finance program.				Advanced derivatives course covering the Black-Scholes valuation model with applications to financial instruments and other areas of financial engineering. Prereq: MBA 6223; or prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
7210	Corporate Financing	G	1½	7234	FinTech	G	1½
Advanced valuation skills and theories and applications in capital structure and security issuance. Prereq or concur: MBA 6223, or enrollment in SMB-Finance program.				Financial technology (FinTech) is revolutionary and rapidly changing the financial services industries. This graduate course provides an introduction to FinTech such as blockchain, cryptocurrencies (e.g., Bitcoin and Ethereum), alternative lending, machine learning, and robo-advising. Prereq: MBA 6223, or concur BusFin 7210 or 7220 or 7230, or enrollment in SMB-Finance program.			
7211	Financial Budgeting and Management in an MNC	G	1½	7238	Valuation Analysis	G	1½
The course focuses on key financial forecasting and budgeting processes in a multi-national company. The audience is Finance professionals, and other disciplines who aspire to be in commercial facing roles. Prereq: MBA 6223. Prereq or concur: BusFin 7210, or enrollment in SMB-Finance program.				This is a customized course for students in the MBA program and is an extension of the MBA 6223 course taken in the autumn semester. The course will review standard methodologies for valuing firms and equity. These techniques are widely used by analysts in investment banking and equity research. Prereq: MBA 6223.			
7212	Mergers and Acquisitions	G	1½	7240	Principles of Real Estate	G	1½
Advanced theories of and applications in the areas of corporate control and governance and mergers and acquisitions. Prereq: MBA 6223, and BusFin 7210, concur: 7220 or 7230; or enrollment in SMB-Finance program.				Topics in Real Estate planning and development, property management, and related property laws. Prereq: MBA 6223, or BusFin 6211, 6212, or enrollment in SMB-Finance program.			
7213	Corporate Restructuring and Bankruptcy	G	1½	7241	Real Estate Finance	G	1½
Advanced corporate finance theories and applications in the areas of spinoffs, restructuring, and bankruptcy. Prereq: MBA 6223, and BusFin 7210, concur: 7220 or 7230; or enrollment in SMB-Finance program.				Advanced topics in real estate valuations with applications to mortgage-related instruments and REITs. Prereq: MBA 6223, BusFin 6211, 6212, or enrollment in SMB-Finance program.			
7214	Capital Markets	G	1½	7250	International Finance	G	1½
Capital Markets course covers the broad background of debt capital raising from various perspectives (Corporate Treasury; Money Center Financial Institutions; Private Equity; Institutional Investors; etc.). Prereq or concur: 7212 and 7213.				Theories of FOREX, international capital markets, cross-border investments, and their implications for firms. Prereq or concur: MBA 6221 (810) or 6222. Not open to students with credit for 825.			
7215	Entrepreneurial Finance	G	1½	7252	Investment Strategies and Philosophies	G	1½
Advanced study of the roles of Angel investing, business plans, and venture capital in entrepreneurial finance. Prereq: MBA 6223, concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.				This course is designed to teach different investment strategies, reveal the beliefs that underlie each one, provide evidence on whether the strategies actually produce results, and what an investor needs to understand in order to implement a philosophy. The strategies covered include value investing, growth investing, technical analysis, market timing, arbitrage, fixed income. Prereq: MBA 6223; or prereq or concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.			
7216	Private Equity	G	1½	7260	Financial Institutions	G	1½
Theories of and applications in buyouts and private equity transactions. Prereq: MBA 6223, concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.				Main roles of financial institutions used by firms such as commercial banks, investment banks, and insurance companies. Prereq: MBA 6223, BusFin 6211, 6212, or enrollment in SMB-Finance program.			
7218	Fixed Income Securities	G	1½	7290	Enterprise Risk Management I	G	1½
An introduction to the mathematics and evaluation of US Dollar denominated fixed income instruments. Students will learn the underlying terms and conditions used in the fixed income markets and apply Excel based mathematical models to evaluate the pricing, yield, risk, and return attributes in the market. Prereq: MBA 6223, concur: BusFin 7210, 7220, or 7230; or enrollment in SMB-Finance program.				Advanced theories of Corporate Risk Management, hedging strategies, and how to measure apply Value at Risk. Prereq: MBA 6223; or BusFin 7210, 7220, and 7230; or enrollment in SMB-Finance program.			
7220	Investment Theory and Practice	G	1½	7291	Enterprise Risk Management II	G	1½
Advanced skills needed for securities valuation, theories and applications related to the CAPM, APT, and efficient markets. Prereq or concur: MBA 6223, or 810. Not open to students with credit for 822.				An Action-based Graduate level course. Students apply theories of risk management, hedging strategies, and value at risk to cases. Prereq or concur: 7290.			

7500	Recent Advances in Financial Markets	G	3
Presentations to Korean Advanced Institute of Science and Technology (KAIST) students by faculty on current research topics. Prereq: Enrollment in KAIST program. Repeatable to a maximum of 6 cr hrs.			
7521	Building Financial Models	G	1½
Advanced topics in financial modeling in EXCEL. Prereq: Enrollment in KAIST program. Not open to students with credit for 849.			
7650	Personal Finance for the Health, Law and Public Policy Professionals	G	3
This course is designed for the graduate student that wants to learn more about personal finance. Describe various behavioral biases and how they may impact their financial plan, and describe how credit is calculated and how it impacts one's financial plan. Prereq: Grad or Professional standing in Law, Pharmacy, or Veterinary Medicine. This course is graded S/U. Cross-listed in Phr.			
7702	Applied Managerial Economics for Health Sciences	G	2
To provide an economics-oriented framework for analyzing managerial and organizational problems, and to further the understanding of how a health science firm's internal rules of the game affect behavior and performance. Prereq: Admission into the Business Minor in Health Sciences.			
7800	Advanced Topics in Finance for EMBA	G	½ - 3
Advanced topics in finance for students in the Executive MBA Program. Prereq: Enrollment in EMBA program. Repeatable to a maximum of 15 cr hrs or 10 completions. This course is progress graded.			
7999	Research in Finance: Thesis	G	1 - 12
Research for thesis purposes only. Repeatable to a maximum of 24 cr hrs or 6 completions. This course is graded S/U.			
8200	Asset Pricing Foundations	G	3
This course is designed to teach PhD students theoretical, empirical asset models and foundations necessary for asset pricing research. Prereq: Permission of instructor.			
8210	Seminar: Asset Pricing Theory	G	1½
PhD level class covers the theoretical models related to contingent Claims, CAPM, APT, and Black Scholes. Prereq: Permission of instructor. Not open to students with credit for 920.			
8220	Seminar: Empirical Asset Pricing	G	1½
Covers empirical asset methods such as the Fama-McBeth techniques and GMM estimation. Prereq: Permission of instructor. Not open to students with credit for 921.			
8230	Seminar: Corporate Finance Theory	G	1½
Covers seminal theories of corporate finance such as those related to capital structures, contracting, and security design. Prereq: Permission of instructor. Not open to students with credit for 922.			
8240	Seminar: Empirical Corporate Finance	G	1½
Covers empirical research and mythologies in areas related to capital structure, investment, financial distress and governance. Prereq: Permission of instructor. Not open to students with credit for 922.			
8250	Seminar: Advanced Asset Pricing	G	1½
Covers advanced topics in empirical and theoretical asset pricing. Prereq: Permission of instructor. Not open to students with credit for 922.			
8255	Advanced Asset Pricing 2	G	1½
The course will present a detailed look at the state of the anomaly and factor pricing literature as it stands today. The goal is to acquaint you with the major themes and important questions that are the subjects of on-going investigations, and to equip you with a solid understanding of the primary quantitative tools to enable you to participate in and to contribute to these investigations. Prereq: Permission of instructor.			
8260	Seminar: Advanced Corporate Finance	G	1½
Covers advanced topics in empirical and theoretical corporate finance. Prereq: Permission of instructor. Not open to students with credit for 924.			
8265	Advanced Corporate Finance II	G	1½
This course covers advanced topics in corporate finance that are not covered in earlier courses in the Ph.D. program.			
8280	Seminar: Research in Finance	G	1½
Faculty lead introduction to research areas in Finance to first year finance PhD students. Prereq: Permission of instructor. Not open to students with credit for 880. Repeatable to a maximum of 9 cr hrs.			
8290	Seminar: Finance Research Topics	G	1½
Advanced PhD student presentations of research in Finance. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 6 completions.			
8999	Research in Finance: Dissertation	G	1 - 12
Research for dissertation purposes only. Repeatable to a maximum of 24 cr hrs or 6 completions. This course is graded S/U.			

2000	Introduction to International Business	U	1½
Basic coverage of world trade and investment problems, and introduction to multinational corporation strategies and the various types of environments in which they do business. Prereq: Econ 2002.01 (201), and Econ 2001.01 (200) or AEDEcon 2001 (200). Not open to students with credit for BusAdm 555. Not open to students enrolled in UUSS, UExp or PreBSBA-PR.			
2210	Personal Leadership and Team Effectiveness	U	3
Effective management practices and how leadership practices lead to effective team and organizational performance.			
2210H	Personal Leadership and Team Effectiveness	U	3
Effective management practices and how leadership practices lead to effective team and organizational performance.			
2292	Business Skills & Environment	U	3
Introduce the role of business in the lives of individuals, consumers, employees, and citizens. Focus on the concept of ethical leadership with emphasis on both oral and written communication skills for the business environment. Prereq: English 1110.01 or equivalent; and admission to the Business Administration major. Not open to students with credit for 2291. Not open to pre-business students.			
2292H	Business Skills & Environment	U	3
Introduce the role of business in the lives of individuals, consumers, employees, and citizens. Focus on the concept of ethical leadership with emphasis on both oral and written communication skills for the business environment. Prereq: English 1110.01 (110) or equivalent, honors standing, and admission to the Business Administration major program. Not open to students with credit for 2291, 2292, or BusAdm 499(H).			
2400	IBE Competitive Analysis Seminar	U	1
Students will develop and apply a series of conceptual models that illustrate interactions between competitive strategy and patterns of technological, market and competitive change. Models will provide means to consider which firms benefit from market change, why existing firms fail to incorporate innovation in a timely manner and the types of markets in which a given firm should invest. Prereq: Admission to the Integrated Business and Engineering major.			
2500	Entrepreneurship	U	3
Assesses economical, sociological, and psychological foundations of entrepreneurship and its impact on society. Prereq: Not open to students with credit for BusMHR 290. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.			
3000	Advanced Topics in International Business	U	3
Advanced topics in international business including strategy, alliances, and exchange. Prereq: 2000, 2292, AcctMIS 2300, BusOBA 2320, and 2321. Not open to students with credit for 4010 or International Business Minor students.			
3100	Foundations of Management and Human Resources	U	3
The study of human behavior in organizational settings. Prereq: Math 1130 and Econ 2001.01. Not open to students enrolled in the Fisher College of Business.			
3193	Individual Studies	U	1 - 5
Individual study projects in selected areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for BusAdm 493. Repeatable to a maximum of 15 cr hrs or 3 completions. This course is graded S/U.			
3194	Group Studies	U	1 - 5
Group study projects in selected areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for 494.			
3200	Managing Individuals in Organizations: Organizational Behavior and Human Resources	U	3
Principles for managing the performance of individuals and groups in organizations; introduction to organizational behavior theory and its application to staffing, training, compensation, and appraisal. Prereq: Econ 2001.01 (200) and 2002.01 (201), or equivalent. Not open to students with credit for 3100 (400) or 701. Not open to students enrolled in UUSS, UExp or PreBSBA-PR.			
3200H	Managing Individuals in Organizations: Organizational Behavior and Human Resources	U	3
Principles for managing the performance of individuals and groups in organizations; introduction to organizational behavior theory and its application to staffing, training, compensation, and appraisal. Prereq: Econ 2001.01 (200) and 2002.01 (201); or equivalents; and enrollment in the Business Administration Honors Cohort Program. Not open to students with credit for BusMHR 701 or 701H.			
3211	Leadership and Character	U	3
Issues of leadership as related to value-based decision making, character, and personal integrity.			
3220	Leadership Legacy	U	3
Exposes students to practical applications of good organizational management and leadership practices. Prereq: English 1110.01 or equiv. Not open to students with credit for 542.			
3303	HR Analytics	U	3
This course is intended to prepare students with the necessary tools for using data analysis to inform HR decision-making and to analyze issues and problems in HRM. Prereq: English 1110.01 or equiv.			

64 Business Admin: Management & Human Rsrcls

3400	IBE Innovation Management Seminar	U	1	4194.65	Group Studies	U	1 - 5
Provides students the opportunity to apply basic competitive analysis theories/tools to analyze "real-world" firms. Prereq: 2400.				Group study projects in related areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for 694.55.			
3500	High Stakes Leadership	U	3	4221	Concepts and Competencies for Managing People	U	3
Considers the unique challenges involved in high stakes leadership - situations when leadership can mean the difference between life & death. Students will learn skills that will prepare them for an outdoor, team-based, high stakes experience. Topics: self-leadership, managing emotions, risk assessment, leadership emergence, decision-making, trust, communication, teamwork, & active followership. Repeatable. 3501.01	Buckeye Leaders Expedition	U	1	4228	Introduction to Organizational Business Coaching	U	3
Skill-building exercises specifically designed to extend and test the concepts introduced in MHR 3500. This class involves journeys and exploration, where we actually practice the techniques in unique, challenging, and beautiful environments. In this particular expedition, we expand our scope by first visiting a local climbing venue, and then several climbing areas throughout Ohio. Prereq: 3500. Repeatable to a maximum of 99 cr hrs.				For students interested in building their own organizational and leadership coaching skills; class will explore the various roots and perspectives of modern coaching while building the skills of coaching which center upon but are not limited to deep listening, coaching presence, business acumen, cultural dynamics, and powerful questioning. Prereq: English 1110.01 or equiv.			
3501.02	Seneca Leaders Expedition	U	1	4235	Developing Leaders through Practical Exercises	U	3
This course applies a model of leadership we have developed and to which students are introduced to in MHR 3500. The expedition is a blend of climbing activities, whitewater rafting, biking. The climbing portion of the expedition involves locations at the New River Gorge National River and Seneca Rocks National Park. Prereq: 3500. Repeatable to a maximum of 99 cr hrs.				This course is taught in a layered effect starting with basic leadership principles and ends with complex practical exercises challenging students to become better leaders. The leader development program incorporates leadership principles, practical exercises, case studies, and assessment to train and develop future leaders. Prereq: English 1110.01 or equiv.			
3501.03	Rocky Mountains Leaders Expedition	U	1	4235H	Developing Leaders through Practical Exercises	U	3
Skill-building exercises designed to extend & test the concepts introduced in MHR 3500. This class is a blend of mountaineering and technical climbing. The mountaineering portion involves climbing 4 of Colorado's highest peaks including Long's Peak. The technical climbing portion involves climbing 3 of the most iconic climbing venues in the US. Prereq: 3500. Repeatable to a maximum of 99 cr hrs.				This course is designed to create experiences and help students from those opportunities. DLPE is a highly interactive course focused on practice and hands-on activities. Leadership is a hands-on activity and so is this class. This will lead to self-discovery and help students establish their personal leadership style. Prereq: Honors standing.			
3501.04	High Stakes Leadership Virtual Expedition	U	1½	4236	Crucial Conversations	U	3
This course builds off the High Stakes Leadership Model (HSLM), which is introduced in BusMHR 3500. Students will apply the skills reflected in the HSLM to activities that simulate settings found on high stakes expeditions. A central objective of the course is to prepare students for expedition scenarios & build quality relationships with fellow team members prior to the expedition. Prereq: 3500. Repeatable to a maximum of 4.5 cr hrs.				Building skills for handling tough conversations; practical ways to manage disagreement and disappointment in a constructive manner. Provides method for straight talk that moves people and positions forward. Principles further build a capacity to hold people accountable while increasing commitment & performance. Drives impact and competitive advantage at the leader, team, and organizational level. Prereq: English 1110.01 or equiv.			
3510	Innovation and Entrepreneurship	U	3	4244	Negotiations	U	3
Examines the many dimensions of new business creation and the fostering of innovation. Prereq: Not open to students with credit for 490, 490.01, 3510.01 or 3510.02.				This course will explore the major concepts and theories of negotiation and the dynamics of interpersonal and inter-group negotiation and problem-solving strategies. Prereq: English 1110.01 or equiv. Not open to students with credit for 4220.			
4010	International Business Strategies	U	1½	4320	Human Resource Management in a Market Economy	U	3
This course highlights how firms make decisions to go abroad, select among foreign markets, and develop international strategies to enhance their profitability and long-term competitive advantage. It will also highlight economic and political risks of international business and discuss ways that firms can mitigate these risks. Prereq: 2000. Not open to students with credit for 3000, or International Business Major students.				Application of economic theory to organizations and labor markets; emphasis on the role of labor market analysis in human resource decision-making. Prereq: 2291 or 2292 (BusAdm 499.01); and 3200 (701), and AcctMIS 2200 (211), 2300 (212), and BusMgt 2320 (330), 2321 (331). Not open to students with credit for 651.			
4011	International Business Strategies II	U	1½	4321	International Labor and Human Resource Management	U	3
This course follows BusMHR 4010 International Business Strategies, and is designed for students who are majoring or minoring in international business, but open to anyone who wishes to gain a better understanding of the strategies firms use to compete overseas. This course stresses how firms can structure investments to mitigate unique economic and competitive risks encountered in emerging markets. Prereq: 2000 and 4010.				Examination of the human resource challenges that emerge in multinational organizations, and emphasis on issues to be considered when preparing oneself and others for international assignments. Prereq: 2000 and 3200.			
4020	Cross Cultural Management	U	3	4322	Human Resource Learning: Training and Development	U	3
Basic elements of culture and its impact upon business. Prereq: 2000.				Introduction to concepts and organization practices associated with designing, implementing, and evaluating different types of employee training and development programs. Prereq: 2291 or 2292 (BusAdm 499.01); and 3200 (701), and AcctMIS 2200 (211), 2300 (212), and BusMgt 2320 (330), 2321 (331). Not open to students with credit for 703.			
4021	Institutions of the International Business Environment	U	3	4323	Human Resource Practices and the Law	U	3
Major international institutions and the role they play in international business and commerce. Prereq: 2000.				Review of federal laws and administrative bodies regulating employee management in the workplace; emphasis on gaining practical skills for managing human resource issues legally. Prereq: 2291 or 2292 (BusAdm 499.01); and 3200 (701), and AcctMIS 2200 (211), 2300 (212), and BusMgt 2320 (330), 2321 (331). Not open to students with credit for 653.			
4193	Individual Studies	U	1 - 5	4324	Staffing: Concepts and Competencies for Acquiring Talent	U	3
Individual study projects in related areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for 693. Repeatable to a maximum of 15 cr hrs or 3 completions. This course is graded S/U.				Introduction to the scientific, legal, and administrative issues associated with the recruitment, hiring, and placement of individuals by organizations. Prereq: 2291 or 2292 (BusAdm 499.01); and 3200 (701), 4323 (653), and AcctMIS 2200 (211), 2300 (212), BusMgt 2320 (330), 2321 (331); or enrollment regional Business Management program. Not open to students with credit for 756.			
4194.61	Group Studies	U	1 - 5	4325	Labor Relations and Collective Bargaining	U	3
Group study projects in related areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for 694.51.				Examination of basic aspects of labor relations and collective bargaining including labor history, labor law, union structure and governance, labor-management bargaining, and contract administration. Prereq: 2291 or 2292 (BusAdm 499.01); and 3200 (701), AcctMIS 2200 (211), 2300 (212), and BusMgt 2320 (330), 2321 (331). Not open to students with credit for 761.			
4194.62	Group Studies	U	1 - 5	4326	Compensation and Benefits Administration	U	3
Group study projects in related areas in management and human resources. Prereq: Permission of instructor. Not open to students with credit for 694.52.				Provides a comprehensive framework and state-of-the-art tools for designing compensation systems via assessment of organizational needs, internal and external equity, and compensation administration. 7321	Fundamentals of Business Excellence II	G	3				
<p>Focus on developing specialized knowledge of functional areas and process in modern organizations. Prereq: 7320 (863), or permission of instructor.</p>							

Business Admin: Management & Human Rsrcs 67

7629	Prof Business Communication Skills	G	1½ - 3
The purpose of this course is to create and build a baseline of communication skills used in business and industry. In addition to foundation skills, the course focuses on key elements of style and "polishing up techniques" in the presentations arena. Prereq: MBA 6281.01. Not open to students with credit for 7268.			
7640	Strategies for Business Sustainability: Principles and Concepts	G	1½
Examination of the principles and concepts involved in developing sustainable businesses. Prereq: Not open to students with credit for 841.			
7660	Innovation Practice	G	1½
Theory and application of innovation practices as well as a framework for commercial application.			
7689	Washington Campus	G	1½ - 3
Week-long program in Washington DC on public policy. Presentations by policy-makers, trips to agencies, and participation in congressional simulation. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
7703	Leadership, Talent Management, and Organizational Behavior in Health Sciences	G	2
Provides an overview of factors that influence individual and team performance and techniques to improve it with an emphasis on the businesses in the life sciences and healthcare for managerial decision making. Prereq: Enrollment in the Graduate Business Minor in Health Sciences.			
7704	Contemporary Topics in HR & Professional Development	G	1
Intended to be primarily discussion based & academically challenging. Increase problem solving & written/oral communication skills. Challenge students to think in ways they may have never thought before whilst the objectives are to further develop the student's critical thinking skills, grit, perseverance, resourcefulness, confidence, cognitive skills and the ability to collaborate and innovate. Prereq: Enrollment in MHRM program. Repeatable to a maximum of 3 cr hrs.			
7714	Strategy and Competitive Analysis for Health Sciences	G	1½
Course focuses on creation of long term value for organizations in the health sciences industry and provides practical tools for strategic analysis of industries and individual practices for competitive strategies. Prereq: 7264 or 7703, BusMgt 7256 or 7701, and BusFin 7400 or 7702; and enrollment in the Graduate Business Minor in Health Sciences.			
7800	Advanced Topics in Management and Human Resources for EMBA	G	1 - 3
Advanced Topics in Management and HR for students in the Executive MBA Program. Prereq: Enrollment in EMBA program. Repeatable to a maximum of 15 cr hrs or 7 completions.			
7999	Research in Management and Human Resources: Thesis	G	3
Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 4 completions. This course is progress graded (S/U).			
8001	Seminar: Seminar in International Business	G	1½
A critical study of current theories and research methodologies and findings in the field in international business. Prereq: Enrollment in the Fisher College of Business Ph.D program, or permission of instructor. Not open to students with credit for 925.01.			
8002.02	Advanced Seminar: Selected Issues in International Business II	G	1½
Additional current and key issues in international management analyzed from an interdisciplinary perspective. Prereq: Enrollment in Fisher College of Business PhD program, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
8202.01	Advanced Seminar: Selected Issues in Organizational Behavior I	G	1½
Advanced discussions of theory and research on organizational behavior. Prereq: Enrollment in Fisher College of Business PhD program, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
8202.02	Advanced Seminar: Selected Issues in Organizational Behavior II	G	1½
Additional advanced discussions of theory and research on organizational behavior. Prereq: Enrollment in Fisher College of Business PhD program, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
8203	Seminar: Seminar in Organizational Theory	G	1½
Theory, research on environmental and structural characteristics of formal organizations and their correlates with particular emphasis on management of the organization in dynamic, global environment. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor.			
8302.01	Advanced Seminar: Selected issues in Human Resources Management I	G	1½
Advanced discussions of theory and research on human resource management. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			

8302.02	Advanced Seminar: Selected issues in Human Resources Management II	G	1½
Additional advanced discussions of theory and research on human resource management. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 3 cr hrs.			
8401	Management Seminar: Seminar in Strategic Management	G	1½
An examination of the concepts, models, theories, and research underlying contemporary thinking on strategic management. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
8402.02	Advanced Seminar: Selected Issues in Strategic Management II	G	1½
Additional advanced discussions of current theoretical developments and research in the business policy and strategic management field. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 3 cr hrs.			
8611	Professional Development	G	1½
This is a PhD seminar on Professional Development designed to be taken over the regular 14-week sessions and made up of two parts, part one to be offered Autumn and part two during Spring semester; primarily for MHR PhD candidates. Prereq: Enrollment in the Fisher College of Business Ph.D program, or permission of instructor.			
8780	Introduction to Micro Research Methods in Management	G	1½
Introduction to research design and methodology as it relates to the study of micro organizational phenomena. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 3 cr hrs.			
8781	Introduction to Macro Research Methods in Management	G	1½
Introduction to research design and methodology as it relates to the study of macro organizational phenomena. Prereq: Enrollment in Fisher College of Business Ph.D program, or permission of instructor. Repeatable to a maximum of 3 cr hrs.			
8999	Research in Management and Human Resources: Dissertation	G	1 - 12
Research for dissertation purposes only. Repeatable. This course is graded S/U.			

Business Admin: Marketing & Logistics

2223	Introduction to Professional Selling	U	1½
Intro to Pro Selling covers the basics of B2B pro selling and sales skills needed to succeed in a sales career. It emphasizes the importance of building relationships and adding substantial value to business customers by combining theory and actual practice, via role plays. Students will learn the selling and buying process, sales tools, and ethical concerns faced by professional salespeople.			
3150	Foundations of Marketing	U	3
Presents the concepts, framework and tools of market-based management. Topics include the marketing concept and the role that product, price, promotion and distribution play in marketing strategy and implementation. Prereq: Math 1116, 1130, 1148, or equiv, and Econ 2001.01, or equiv. Not open to students with credit for 3250. Not open to students in BSBA.			
3194	Group Studies	U	1 - 6
Topics in Marketing and Logistics Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 6 completions.			
3250	Principles of Marketing	U	3
Presents the concepts, framework and tools of market-based management to deliver superior customer satisfaction, value and profitability. The focus of the course is on identifying, creating, delivering and measuring value creation. Prereq: Econ 2001.01 and 2002.01. Not open to students with credit for 3150 (650) or 450 or to students enrolled in UUSS, UExp or PreBSBA-PR.			
3250H	Principles of Marketing	U	3
Presents the concepts, framework and tools of market-based management to deliver superior customer satisfaction, value and profitability. The focus of the course is on identifying, creating, delivering and measuring value creation. Prereq: Honors standing, and Econ 2001.01 or equiv. Not open to students with credit for 3150 or 3250.			
3380	Logistics Management	U	1½
Concepts and methods used to plan and manage logistics activities in a business environment. Understanding of the components of logistics management and tradeoffs required to manage the integrated flow of goods through the supply chain. Prereq: Econ 2001.01, or equiv.; and 2002.01, or equiv. Not open to students enrolled in UUSS, UExp, or PreBSBA-PR.			
4193	Individual Studies	U	1 - 4
Topics in Marketing and Logistics. Prereq: Permission of instructor. This course is graded S/U.			
4194.51	Group Studies	U	1 - 4
Topics in Marketing and Logistics. Prereq: Permission of instructor.			
4194.52	Group Studies	U	1 - 4
Topics in Marketing and Logistics. Prereq: Permission of instructor.			

68 Business Admin: Marketing & Logistics

4194.53	Group Studies	U	1 - 4		
Topics in Marketing and Logistics. Prereq: Permission of instructor.					
4201	Consumer Behavior	U	3		
Examines how and why people behave as consumers. Its goals are to provide an understanding of consumer behavior and to provide experience in the application of this knowledge to marketing management and social policy decision making. Prereq: 3250, AcctMIS 2200, 2300, BusOBA 2320, and 2321; and BusMHR 2291 or 2292.					
4202	Marketing Research	U	3		
Course examines the role of marketing research in the formulation and solution of marketing problems. Emphasis is placed on problem formulation, research design, data collection methods (instruments, sampling, operations) and analysis techniques. Prereq: 3250, AcctMIS 2200, 2300, BusOBA 2320, and 2321; and BusMHR 2291 or 2292.					
4203	Marketing Strategy	U	1½		
This case course focuses on strategic planning examining how environmental factors affect long-term marketing strategies, how firms adapt to opportunities and threats in dynamic environments and how to assess development of competitive advantages. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01), or equiv. Not open to students with credit for 752.					
4204	Marketing Projects	U	3		
In this advanced marketing course students will act as a consulting team and work with a client firm on a marketing problem, produce a report and present their work. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01), or equiv; or enrollment in regional campus General Business Program.					
4210	Advanced Market Research and Analytics	U	1½ - 3		
Applications of modern marketing research procedures to variety of marketing problems. Emphasis placed on survey design and sampling, attitude measurement, perceptual mapping, market segmentation, conjoint analysis, and measurement of customer satisfaction. Prereq: 4201, 4202, and BusMHR 2292, or equiv. Not open to students with credit for BusMgt 3333.					
4211	Market Analysis, Development & Forecasting	U	1½		
Before a new product can be launched, or new customers targeted a firm must assess the size and demand for an offering. Methods used to forecast consumer behavior, market share, and sales (for production and inventory control) will be examined. Prereq: 4201 (750) or 4202 (758), or equiv, and BusMHR 2292 (BusAdm 499.01).					
4212	Customer Relationship Management	U	1½		
Examines the theories of methods used to identify profitable customers, understand their needs and wants, and how to build a bond with them by developing customer-centric products and services directed toward providing customer value. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01), or equiv.					
4222	Services Marketing	U	1½		
Examines customer touch point analysis, brand consistency and integrating customer information across the organization. Issues addressed: understanding service failure and recovery, management of service employees and the establishment of a service culture. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01), or equiv. Not open to students with credit for 760.					
4223	Foundations of Sales and Sales Management	U	3		
Examines the basics of business-to-business professional selling and provides core sales management building blocks. Emphasizes the importance of building relationships and adding substantial value to business customers while providing a theoretical and practical overview of the selling and buying process, salesforce structure, and sales tools. Prereq: 4201, 4202, and BusMHR 2292, or equiv. Not open to students with credit for 4220 and 4221.					
4224	Strategic Sales Leadership	U	3		
This course provides an overview of sales management and its managerial hierarchy using real-world Fortune 100 company examples as well as practical, experiential application through case work and guest panelists. Principles covered include enterprise BSB sales strategy and structure, sales leadership, value-based sales methodology and practice, sales force design, development, and management, sales forecasting, CRM and sales technologies, salesperson performance, behavior, motivation, exploration of career-pathing in sales and sales leadership, recruitment and selection of salespeople, training salespeople, compensation. Prereq: 4223, and BusMHR 2292, or equiv. Not open to students with credit for 4220 or 4221.					
4232	Digital Marketing	U	3		
Examines the how marketers can utilize emerging media (electronic, online, social and mobile) to promote customer engagement, enhance their traditional marketing mix, and measure the effectiveness of marketing efforts. Prereq: 4201, 4202, and BusMHR 2292, or equiv.					
4233	Advertising and Promotional Strategy	U	3		
Provides the tools needed to develop, manage and evaluate an integrated marketing communication campaign. Examines how marketers utilize advertising and promotional programs to enhance marketing efforts. Communication fundamentals, goal setting, creative and media strategy, campaign development and measurement issues, and pricing implications are explored. Prereq: 4201, 4202, and BusMHR 2292, or equiv. Not open to students with credit for 4230 and 4231.					
4240	New Product Management	U	1½		
Examines strategies for development of successful new products. The five modules of the process (i.e., opportunity identification, concept generation, concept evaluation, product design and development, and launch) will be covered. Prereq: 4201, 4202, and BusMHR 2292, or equiv.					
4241	Entrepreneurial Marketing	U	1½		
Examines best practices in Entrepreneurial Marketing including analysis of marketing opportunities, identification of target audience, development of marketing strategy, brand positioning and an integrated marketing plan. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01).					
4251	Retail Management	U	3		
Examines contemporary distribution channels; focus on strategic decisions for successful retail practices; examine industry trends to highlight how companies design and manage retail and e-tail environments. Prereq: 4201, 4202, and BusMHR 2292, or equiv.					
4252	Social Marketing & Public Policy	U	1½		
Examines social marketing, which seeks to benefit a targeted population and the general society rather than a marketer or firm. Non-profit, cause marketing, corporate social responsibility, and sustainability issues are explored. Prereq: 4201 (750), 4202 (758), and BusMHR 2292 (BusAdm 499.01), or equiv.					
4253	Global Marketing	U	½ - 1½		
Examines the theory of marketing across national borders, as well as marketing and market research within different foreign environments, including the development of marketing strategies by the international company. Prereq: 3250 and BusMHR 2292 or equiv.					
4254	International Marketing	U	3		
Examines theory and practice of marketing across national borders, marketing and market research within different foreign environments, and development of marketing strategies by the international company. Prereq: 3250 and BusMHR 2292.					
4255	Sustainability Marketing for Consumers, Firms & Society	U	3		
This course is designed to provide students with the knowledge to enhance sustainable behaviors in firms, among consumers and in society at large. In doing so, this course will include frameworks for understanding how to influence sustainable practices, consumer response to sustainability, and sustainability and marketing communication in the marketplace. Prereq: 3250 or AEDEcon 3102.					
4256	Brand Management	U	3		
This course is designed to explore the important role of branding in the marketing process. It will cover key elements that go into developing, managing and maintaining a powerful brand. Prereq: 4201, 4202, and BusMHR 2292, or equiv.					
4258	eCommerce Digital Advertising	U	1½		
Students will learn about retailer advertising networks such as those of Wal-Mart, Target, and Lowe's via Amazon's retail business platform including sponsored ads, display ads, OTT, and audio ads. They will apply this knowledge to a 'real-life' client project and deliver a recommendation presentation. Students will also complete analysis-based assignments and Amazon's certification in advertising. Prereq: 3250. Prereq or concur: 4232 or 4233.					
4380	Advanced Logistics Management	U	1½		
Advanced coverage of the concepts and methods used to plan and manage logistics activities in a business environment; in-depth understanding of the components of logistics management and tradeoffs required to manage the integrated flow of goods. Prereq: 3380, and AcctMIS 2200, 2300, and BusOBA 2320, 2321; and BusMHR 2291 or 2292.					
4381	Logistics Execution I	U	3		
Issues and strategies in transportation and warehouse management and policy, including modes of transportation, capacity management and carrier management. Emphasis also on warehouse productivity and operations. Prereq: 3380, and AcctMIS 2200, 2300, and BusOBA 2320, 2321; and BusMHR 2291 or 2292. Not open to students with credit for 5381.					
4382	Logistics and Supply Chain Analytics	U	3		
Will equip student with the tools and skills necessary to recognize, analyze and solve significant problems in the operation of supply chains and logistics systems through the application of techniques using spreadsheet analysis, optimization and simulation. Prereq: 3380, and AcctMIS 2200 and 2300, and BusOBA 2320 and 2321, and BusMHR 2292.					
4383	Supply Chain Management	U	1½		
Focuses on distinction between logistics and supply chain management; cross-functional integration of key business processes within the firm and across network of firms that comprise supply-chain; framework for supply chain management. Prereq: 3380, and AcctMIS 2200, 2300, and BusMgt 2320, 2321; and BusMHR 2291 or 2292.					
4385	Building a Sustainable Supply Chain	U	1½		
Focuses on understanding how to measure and impact the long-term sustainability of a company's supply chain operations; learn practices for reducing carbon footprints and creating a more resilient supply chain, while meeting financial goals. Prereq: 3380 or 3381; and AcctMIS 2200, 2300, and BusMGT 2320, 2321; and BusMHR 2291 or 2292.					
4386	Logistics Supply Chain Technology	U	1½		
Focus on the operational use of logistics software technologies such as transportation management systems, warehouse management systems, and inventory management systems. Course taught in a lab environment with tools for lectures, exercises and HW. Prereq: 3380, and AcctMIS 2200 and 2300, and BusOBA 2320 and 2321; and BusMHR 2291 or 2292.					

Business Admin: Marketing & Logistics 69

4387	Lean Logistics	U	1½
Examines using Lean tools and insights to remove bottlenecks and impediments to efficient, effective logistics, resulting in reduced logistics costs and improved service. Prereq: 3380, and AcctMIS 2200 and 2300, and BusOBA 2320 and 2321, and BusMHR 2292.			
4388	Logistics Execution II	U	1½
This course will equip students with warehouse management skills, including facility layout, financial analysis, and labor relations. There will also be an additional focus on carrier operations, transportation pricing, and third-party service providers. Prereq: 4381 or 5381.			
4389	Logistics Technology - ERP Systems	U	1½
Introduction to enterprise resource planning (ERP) systems with emphasis on understanding the differences between the major ERP systems on the market and using an ERP system to complete exercises for common business functions.			
4998	Undergraduate Research in Marketing & Logistics	U	1 - 3
Undergraduate Research in Marketing & Logistics for non-honors students. Prereq: BusAdm 2291 or 499, and Jr standing, and permission of instructor. Repeatable to a maximum of 12 or hrs or 4 completions. This course is progress graded.			
4998H	Honors Research	U	½ - 4
Special Topics Research in Marketing and/or Logistics. Research evaluated through papers, thesis, and/or special examinations. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is progress graded.			
5389	Logistics and Supply Chain Decision Making	U G	3
Analysis of logistics decision making in the context of the business environment; application of the solution methods needed to meet business goals. Capstone designed to expand on previous courses and prepare students to implement concepts in logistics and supply chain management. Prereq or concur: 4380.			
6243	Managerial Economics	G	3
Provides a framework for analyzing managerial decisions and problems using selected topics from fundamental microeconomic theory. This framework will be used in conjunction with strategy, case studies, ethical considerations, and combined professional experience to improve managerial decision-making. Prereq: Enrollment in the SMB-A program, or permission of instructor.			
7193	Individual Studies	G	½ - 4
Topics in Marketing and Logistics. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 6 completions. This course is graded S/U.			
7194.51	Group Studies	G	1 - 4
Topics in Marketing and Logistics. Prereq: Permission of instructor.			
7194.52	Group Studies	G	1 - 4
Topics in Marketing and Logistics. Prereq: Enrollment in MBA program, WP MBA program, or permission of instructor. Repeatable to a maximum of 9 or hrs or 6 completions.			
7201	Marketing Research and Analytics	G	1½
Exploration of issues related to data analysis for marketing decisions: costs/benefits of analysis in aggregate; difference between descriptive and structural models; complexities of imperfect information. Prereq: MBA 6252 or 6253. Not open to students with credit for 847.			
7202	Consumer Behavior	G	1½
Development of the consumer decision process and its application to marketing strategy decisions. Prereq: 6250 or MBA 6252 or 6253.			
7203	Advertising Strategy and Management	G	1½
The advertising process, partnership with an ad agency, uncovering consumer insight to drive advertising strategy, formulating and guiding advertising strategy, media planning concepts, and measuring advertising effectiveness. Prereq: 6250 or MBA 6252 (840). Not open to students with credit for 846.			
7204.02	Product and Pricing Analytics	G	1½
Tools for predicting the effects of product reformulation. A choice simulator is constructed to investigate the source of volume and effect of targeted marketing actions. A comparison to, and the integration of, marketplace data is examined. Prereq: MBA 6250, 6252, or 6253. Not open to students with credit for 7204.01.			
7205	Services Marketing	G	1½
Focus on equipping students to become more effective leaders of service organizations as well as more enlightened customers of service firms. Prereq: MBA 6252 (840).			
7206	Brand Management	G	1½
The brand management process, strategic targeting, constructing compelling brand platforms, brand portfolio management, building and sustaining brand equity, brand equity metrics and strategic brand communications. Prereq: 6250 or MBA 6252 or 6253.			
7207	Pricing Strategy	G	1½
Focus on microeconomic theory, statistics and psych to shed light on pricing. Explore foundation of sound pricing decisions: costs, customer and competition, and then move on to current pricing strategies, tactics and their application. Prereq: MBA 6250 or 6252 (840). Not open to students with credit for 851.			

7208	Digital Marketing	G	1½
Management of digital marketing assets in order to develop strategies and execute tactics associated with cross-channel marketing in the digital era. Prereq: 6250 or MBA 6252.			
7209	Strategic Sales Force Management	G	1½
Focuses on management of the sales function and its coordination with other components of marketing strategy including pricing, product development, promotion, and distribution. Prereq: MBA 6252 or 6253.			
7211	Consumer Psychology	G	1½
Course delves into consumer psych, and the means by which consumer behavior can be influenced or altered. Course will explore the psychological underpinnings of consumer information processing, attitude formation and persuasion, learning and memory. Prereq: 6250 or MBA 6252 or 6253.			
7214	Cross Channel Marketing	G	1½
Examines the unique challenges of bringing a service brand to life across multiple channels. Understanding the methods, processes and approaches to creating holistic experiences that resonate with the target audience is covered. Prereq: MBA 6252 or 6253.			
7215	Marketing and Sustainability	G	1½
Review core concepts of global marketing including, pricing, research, positioning, strategy, social responsibility, communicating with world consumers, and management team development from a sustainability viewpoint. Prereq: 6250 or MBA 6252 or 6253.			
7216	Social Marketing & Public Policy	G	1½
Examination of social marketing, which seeks to benefit a targeted population and the general society rather than a marketer or firm. Non-profit, cause marketing, corporate social responsibility, and sustainability issues are explored. Prereq: MBA 6252 or 6253.			
7218	New Product Management	G	1½
Strategies and tools for the development of successful new products. Emphasis is placed on opportunity identification, concept generation and testing, product design, and development and launch. Prereq: MBA 6252 (840).			
7230	Customer Analytics	G	1½
Tools for the analysis of survey and marketplace data. Topics include design of the surveys, scale development, analysis of the recency, frequency and monetary value of transactions, web-based 'click-stream' data and others. Prereq: MBA 6250, 6252, or 6253.			
7243	Prescriptive Analytics	G	3
Focus on prescriptive analytics to determine causal effects and identify optimal decisions in business. Emphasis on programming data analysis using the R statistical language. Prereq: Enrollment in the SMB-A program, or permission of instructor.			
7244	Bayesian Analysis	G	1½
Overview of recent developments and applications of Bayesian statistical methods in business analytics. Emphasis on developing a conceptual understanding of quantitative models, and their operational translation into methods for data analysis. Prereq: Enrollment in the SMB-A program, or permission of instructor.			
7245	Analytics of Micro Marketing Data	G	1½
Focus on the analytics of disaggregate marketing data including appropriate measurement scales and techniques for specific data types. Emphasis on modeling techniques and tools, such as textual analysis, utility-based analysis, and attribution models, to solve marketing problems in corporate setting. Prereq: Enrollment in the SMB-Analytics program, or permission of instructor.			
7247	Analytics for Macro Marketing Data	G	1½
A 'macro' approach to understanding the marketing decision process with implications stretching beyond the firm: i.e., consumers privacy, search and recommendation. Emphasis on data structures arising from online platforms and marketplaces as well as the prevalent technological and regulatory landscape in the industry. Prereq: Enrollment in SMB-Analytics program.			
7249	SMB-A Capstone Projects	G	3
The course provides students with an opportunity to apply, showcase, fine-tune and expand the skills and knowledge acquired in courses in the program by working through substantive real-world analytics projects from initial conception to the production of useful insights and improved decisions. Prereq: BusOBA 7248, and enrollment in SMB-Analytics program. Cross-listed in BusOBA.			
7250	Time Series and Forecasting	G	1½
This course is designed to familiarize students with various methods for analyzing time series market data, and how these methods can be used to reduce uncertainty in managerial decisions. The course will be a mixture of lecture, lab work, an exam, and a student-lead project, all focused on developing hands-on experience in business forecasting using the R software package. Prereq: Enrollment in SMB-Analytics program, or permission of instructor.			
7252	Data Driven Marketing	G	1½
We will study the impact of analytics on successful marketing decisions with different data set. The course covers a spectrum of topics that include marketing metrics, digital analytics, marketing response models, experimentation, and big data. It is designed for students with some background in quantitative methods and exposure to basic marketing research concepts. Prereq: Enrollment in the Specialized Master in Business Analytics (SMB-A) program, or permission of instructor.			

70 Business Admin: Marketing & Logistics

7380	Strategic Logistics Management	G	1½
Develop an understanding of key drivers of logistics performance and their inter-relationships with strategy and other functional areas. Focus on developing analytic, problem-solving, and cost trade-off management skills. Prereq: Enrollment in MBA, MBL, or MAcc.			
7382	Logistics Analytics	G	1½
Focuses on the application of quantitative techniques. Problems addressed include demand forecasting, inventory control, and network design using spreadsheet analysis, optimization and simulation. Prereq or concur: 7380.			
7383	Supply Chain Management	G	1½
Students learn the distinction between logistics and supply chain management (SCM) and develop SCM skills with a focus on cross-functional integration of key processes within the firm and across the network of firms that comprise the supply chain. Prereq: Enrollment in MBA, Online MBA, WP MBA, or MAcc program.			
7386	Supply Chain Technology	G	1½
Focuses on the strategic and operational use of supply chain technologies and software, and the opportunities and challenges of digital transformations (including blockchain, artificial intelligence, and robotics). The objective of the class is to provide a strong knowledge and understanding of the technology used in supply chain management.			
7387	Lean Logistics	G	1½
Examines using Lean tools and insights to remove bottlenecks and impediments to efficient, effective logistics, resulting in reduced logistics costs and improved service.			
7388	Field Problems in Logistics	G	3
Advanced graduate studies course where students work in groups as consultants to solve actual business problems for clients. Objectives include developing problem solving skills and gaining practical experience. Prereq: 7380.			
7390	MSCM Kickoff Experience	G	1
This 2.5-day on-campus experience will include a mini-course (8 instructional hours) on Finance and Accounting, and two company visits (8 instructional hours) to include facility tours and executive presentations. It will also provide an orientation for the program and an opportunity for the students to meet each other, the faculty and the staff involved in the program.			
7391	Introduction to Supply Chain Management	G	3
Overview of the key components of managing and operating a supply chain, including the strategic role of supply chain management in determining both the firm's financial performance and the customer experience.			
7394	Strategic Logistics Management	G	3
Strategic Logistics Management is the introductory graduate logistics course. The objective is to give students a working knowledge of strategic and managerial issues in logistics and supply chain management. The course is intended to provide broad support for careers in management, regardless of major.			
7396	Consumer Centric Supply Chain	G	3
In this course, we will explore the "ultimate customer" of supply chains, by highlighting consumer trends, consumer expectations, and consumer-facing supply chain contexts, such as retail and last mile logistics.			
7399	MSCM Capstone	G	3
The MSCM Capstone course represents (1) the opportunity to exhibit a broad understanding of the concepts taught and discussed across the MSCM program, (2) apply those concepts to a well-structured problem with associated data, and (3) offer a real and implementable supply chain solution to your organization (or a partner organization), that has the potential to yield measurable performance results.			
7715	Attracting and Retaining Customers in Health Sciences	G	1½
This class focuses on the process of attracting and retaining customers in the health sciences industry. Students will explore how to drive growth through new patient acquisition and retention as well as by understanding the practice's ability to provide value, and the patient's needs in relation to that value. Prereq: BusMgt 7701, BusFin 7400, and BusMHR 7264; and enrollment in the Graduate Business Minor in Health Sciences.			
7800	Advanced Topics in Marketing and Logistics for EMBA	G	1 - 3
Advanced Topics in Marketing and Logistics for students in the Executive MBA Program. Prereq: Enrollment in Executive MBA program. Repeatable to a maximum of 15 cr hrs or 7 completions.			
7999	Research in Marketing and Logistics: Thesis	G	1 - 12
Topics in Marketing and Logistics. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is progress graded (S/U).			
8250	Consumer Behavior	G	4
Study of the academic literature on consumer behavior with emphasis on the theoretical and empirical contributions of consumer research. Prereq: Doct standing in BusAdm, or permission of instructor. Repeatable to a maximum of 8 cr hrs.			

8252	Marketing Models	G	2 - 4
A study of recent model-based research in the marketing literature; emphasis on the strengths and weaknesses of various modeling approaches in specific problem areas and evaluation of model-based research. Prereq: Doct standing in BusAdm, or permission of instructor. Not open to students with credit for 951. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is progress graded.			
8253	Recent Advancements in Marketing Research	G	1½ - 4
Provide students with exposure to leading marketing scholars and their most current research and give them an opportunity to critically evaluate it. Prereq: Doct standing in BusAdm, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 6 completions.			
8254	Selective topics in Quantitative Marketing	G	4
This course is required for all marketing PhD students. In this course, students will delve into understanding consumer and firm behaviors, enabling them to provide insights to support managerial decision-making in various areas like market structure, market demand, pricing, advertising, product design, and distribution. Prereq: Doct standing in BusAdm, or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is progress graded.			
8255	Marketing Research Methods	G	1½ - 4
Provide students with exposure to leading marketing scholars and their most current research and methods used and give them an opportunity to critically evaluate it. Prereq: Doct standing in BusAdm, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 6 completions. This course is graded S/U.			
8380	Research Seminar in Logistics	G	1½
Research issues in logistics. For each topic, key literature will be reviewed and discussed to understand the current state of research in the area, evaluate the research methodologies employed, and identify gaps in the academic literature. Prereq: 7380 and 7381, and enrollment in Fisher College of Business PhD program. Repeatable to a maximum of 9 cr hrs.			
8381	Research Seminar in Supply Chain Management	G	1½
Focuses on research issues in supply chain management. Prereq: 7380 (880) and 7383 (885). Repeatable to a maximum of 9 cr hrs.			
8383	Optimization Modeling in Logistics	G	1½
Focus on the application of optimization modeling techniques to logistics problems. The goal is to familiarize students with advanced modeling techniques and learn how they have been applied to solve logistics problems in the academic literature. Prereq: 7380 and 7381. Repeatable to a maximum of 9 cr hrs.			
8385	Empirical Methods in Logistics & Supply Chain Management Research	G	1½
Overview of empirical research in Logistics and Supply Chain Management, with a focus on appropriate topics, literature review, and hypothesis development in empirical papers. Additional focus on data analysis through statistical and econometric methods. Prereq: Enrollment in Fisher College of Business PhD program, or permission of instructor. Repeatable to a maximum of 9 cr hrs.			
8386	Theory & Qualitative Methods in Logistics & Supply Chain Management Research	G	1½
Introduction to multiple theoretical perspectives used in Logistics and Supply Chain Management research, as well as the qualitative methods utilized to explore theoretical concepts. Prereq: Enrollment in Fisher College of Business PhD program, or permission of instructor. Repeatable to a maximum of 9 cr hrs.			
8999	Research in Marketing and Logistics: Dissertation	G	1 - 12
Topics in Marketing and Logistics. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is progress graded (S/U).			

Business Admin: Operations and Business Analytics

2320	Decision Sciences: Statistical Techniques	U	3
Examination of the use of statistical techniques in managerial decision-making processes; statistical inference, simple and multiple regression, time series. Prereq: Math 1131 or 1151, and Stat 1430, and CSE 1113 or 2111, and Econ 2001.01. Prereq or concur: Econ 2002.01. This course is available for EM credit.			
2321	Business Analytics	U	1½
Examination of the use of business analytic models used in managerial decision making processes. Emphasis on formulation and interpretation of models; supported by spreadsheet based software. Prereq: Math 1131 or 1151 or equiv., and CSE 1113 or 2111, and Econ 2001.01 or equiv., and Econ 2002.01 or equiv.			
3130	Foundations of Operations Management	U	3
Introduction to operations & supply chain management to improve organizations; specifically analyzing, controlling & improving resources & processes to increase productivity, generate value-added output & meet business strategic & tactical goals. Prereq: Math 1116, 1130, 1148, or equiv., and Econ 2001.01, or equiv. Not open to students with credit for 3230. Not open to students enrolled in the BSBA degree program.			
3194	Group Studies	U	1 - 6
Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.			

Business Admin: Operations and Business Analytics 71

<p>3230 Introduction to Operations Management: Improving Competitiveness in Organizations U 3</p> <p>Introduction to operations and supply chain management to improve manufacturing and service organizations; analyzing, controlling and improving resources and processes to increase productivity, generate value-added output and meet business goals. Prereq: Econ 2001.01, and 2002.01, and Stat 1430, or equiv.; or Math 1151 or 1154, and enrollment in BSET program. Not open to students with credit for 3130, or to students enrolled in UExp or PreBSBA-PR.</p>	<p>4242 Business Sports Analytics U 3</p> <p>Analytical techniques and quantitative methods are on the rise in many areas of industry, and, of late, have made their way into the sports realm. Skills such as critical thinking, mathematical modeling, statistical analysis, predictive analytics and optimization are crucial in the data-centric realm. The class seeks to develop and refine these skills in the business application area of sports. Prereq: Stat 3202, or permission of instructor.</p>
<p>3230H Introduction to Operations Management: Improving Competitiveness in Organizations U 3</p> <p>Introduction to operations and supply chain management to improve manufacturing and service organizations; analyzing, controlling and improving resources and processes to increase productivity, generate value-added output and meet business goals. Prereq: Honors standing in BusAdm Honors Cohort program. Not open to students with credit for 630H.</p>	<p>4250 Six Sigma Principles U 3</p> <p>Designed to familiarize students with the Six Sigma process improvement methodology and to provide them an opportunity to practice using Six Sigma Black Belt tools. Prereq: 2320, 2321, 3230, and AcctMIS 2200, 2300, and BusMHR 2292; or 3230, ISE 2040, and Stat 3440 or equiv., and enrollment in BSET program.</p>
<p>3331 Business Analytics: Data Management and Descriptive Analysis U 3</p> <p>Understand how organizations can successfully collect, organize, manipulate, use and present data. Prereq: Econ 2001.01 and 2002.01 or equiv.; and Math 1152 or 1161.01 or equiv.; and CSE 2111 or equiv.</p>	<p>4251 Six Sigma Projects U 3</p> <p>Six Sigma Projects class. Prereq: 4250 (710). Not open to students with credit for 711.</p>
<p>3332 Business Analytics: Application of Predictive Analytics to Business Data U 3</p> <p>Build and test predictive models that move from data to parameter estimation. Prereq: Econ 2001.01 and 2002.01 or equiv.; and Stat 3202, or BusOBA 2320 and 2321; and CSE 2111 or equiv.</p>	<p>4253 Sustainable Operations U 3</p> <p>There is increasing pressure on businesses to pay more attention to the environmental consequences of the raw materials they source, processes they deploy, and the products and services they offer. Recognizing that operations are at the core of any sustainable enterprise, this course addresses issues related to sustainable operations in three modules. Prereq: 2320, 2321, 3230, AcctMIS 2200, 2300, and BusMHR 2292.</p>
<p>3333 Business Analytics: Applied Prescriptive Analytics U 3</p> <p>Moving from estimating model parameters, to making data-informed business decisions. Prereq: Econ 2001.01 or AEDEcon 2001; and Econ 2002.01; and Stat 3202, or BusOBA 2320 and 2321; and CSE 2111.</p>	<p>4254 Projects in Sustainable Supply Chains U 3</p> <p>This course seeks to examine and build awareness regarding more sustainable business processes through a combination of two methods: Student reading of several current published works in various areas of sustainability, coupled with in-class debate and discussion and student experiential learning. Students will be working in teams of 3 to 5 students on a project with a sponsoring company. Prereq or concur: AEDEcon 3105 or BusOBA 3230 or BusML 3380.</p>
<p>4193 Individual Studies U 1 - 6</p> <p>Individual study projects in selected areas in Management Sciences. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is progress graded (S/U).</p>	<p>4261 Purchasing and Supply Chain Management U 3</p> <p>Designed to explore the industrial-institutional purchasing cycle for operating supplies, raw materials, components and capital equipment within the context of the Integrated Supply Chain Management Organizational Concept. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212); and BusMHR 2291 or 2292 (BusADM 499.01). Not open to students with credit for 735.</p>
<p>4194.31 Group Studies U 1 - 6</p> <p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>	<p>4262 Purchasing Strategy U 3</p> <p>Strategic purchasing is a methodology used in many businesses to realize the greatest amount of benefit to the company while still effectively managing the costs associated with the acquisition of raw materials and operational components. Prereq: 2320 (330), 2321 (331), 3230 (630), AcctMIS 2200 (211), 2300 (212) and BusMHR 2291 or 2292 (BudAdm 499.01). Not open to students with credit for 736.</p>
<p>4194.32 Group Studies U 1 - 6</p> <p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>	<p>4263 Strategic Global Sourcing U 3</p> <p>This course focuses on the strategic design and management of the global supply base. The course focuses on identifying and understanding risks and uncertainties related to make-buy, location, and on-going supplier management. Beyond that, it focuses on cross-functional decision-making under risk and uncertainty in this context. Prereq: 2320 (330), 2321 (331), 3230 (630), AcctMIS 2200 (211), and 2300 (212); and BusMHR 2291, 2292, or BusADM 499.01.</p>
<p>4194.33 Group Studies U 1 - 6</p> <p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>	<p>4331 Data Management and Descriptive Analysis U 3</p> <p>Understand how organizations can successfully collect, organize, manipulate, use and present data. Prereq: Econ 2001.01 and 2002.01 or equiv.; and Math 1152 or 1161.01 or equiv.; and CSE 2111 or equiv.; and enrollment in Information Systems major.</p>
<p>4232 Operations Planning and Control U 3</p> <p>Review of a Planning and Control System. Theoretical frameworks and utilization of techniques to execute strategic and tactical goals to increase productivity and effectiveness of forecasting, scheduling, and inventory and capacity resources. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212); and BusMHR 2291 or 2292 (BusADM 499.01). Not open to students with credit for 732.</p>	<p>4998 Undergraduate Research in Management Sciences U 1 - 3</p> <p>Undergraduate Research in Management Sciences for non-honors students. Prereq: BusAdm 2291 (499), and Jr standing, and permission of instructor. This course is progress graded.</p>
<p>4233 Operations Management Analytics U 3</p> <p>A study of data and modeling tools used in operations management. Emphasis is spreadsheets and database applications. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212), and BusMHR 2291 or 2292 (BusADM 499.01). Not open to students with credit for 733.</p>	<p>4998H Honors Research U 1 - 6</p> <p>Special topics research in Management Sciences: Research evaluated through papers, thesis, and/or special examinations. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is progress graded.</p>
<p>4234 Service Operations U 3</p> <p>Surveys a broad framework of key operations management challenges, while also focusing on a broad variety of different services via in-depth case studies. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212); and BusMHR 2291 or 2292 (BusADM 499.01).</p>	<p>6220 Data Analysis for Managers G 3</p> <p>Introduction to data analysis and statistics for business. Emphasis on achieving an application-oriented understanding of statistical inference and regression analysis and their use in decision making. Prereq: Enrollment in MHRM or SMB-Marketing Program. Not open to students with credit for 870.</p>
<p>4237 International Operations Management U 3</p> <p>Current influences, practices and standards for structural and infrastructural decision making across national boundaries. Explores complexity of managing geographically dispersed operations with relationships between multiple entities. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212); and BusMHR 2291 or 2292 (BusADM 499.01). Not open to students with credit for 737.</p>	<p>6221 Data Analysis for Financial Management Part I G 1½</p> <p>Introduction to data analysis and statistics for business. Emphasis on achieving an application-oriented understanding of statistical inference and regression analysis and their use in decision making. Part I of 2 course sequence. Prereq: Enrollment in MBOE or SMB-Finance Program Course. Not open to students with credit for 870. This course is progress graded.</p>
<p>4239 Managing Process Improvement U 3</p> <p>Describes the basics of establishing and managing a Lean process in service, office and manufacturing operations. We will look at how we can add value in delivery of goods or services to the customer. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212), and BusMHR 2291 or 2292 (BusADM 499.01). Not open to students with credit for 739.</p>	<p>6222 Data Analysis for Financial Management Part II G 1½</p> <p>Introduction to data analysis and statistics for business. Emphasis on achieving an application-oriented understanding of statistical inference and regression analysis and their use in decision making. Part 2 of 2 course sequence. Prereq: Enrollment in MBOE or SMB-Finance Program Course. Concur: 6221. Not open to students with credit for 870.</p>
<p>4240 Management of Technology U 3</p> <p>Intended for a broad range of business careers in which management of technological operations is critical for an organization's competitive advantage. Topics include methods to design, measure and improve technologies. Prereq: 2320 (330), 2321 (331), 3230 (630), and AcctMIS 2200 (211), 2300 (212); and BusMHR 2291 or 2292 (BusADM 499.01).</p>	

72 Business Admin: Operations and Business Analytics

6400	Statistics and Data Analysis for Managers	G	3	7241	Lean Enterprise Leadership	G	1½
<p>Students will learn how to work with data, formulate questions, and most importantly, learn comprehensive problem solving techniques to extract and explain pertinent information from data. The course will track the problem solving process from problem formulation to data acquisition/cleaning to data analysis and conclusion to communication of the results. Prereq: Enrollment in the SMB-A program, or permission of instructor.</p>				<p>Introduces the skills and discipline needed to lead and learn in a continuous improvement environment in a hands-on, participative manner. Students who complete the class can immediately contribute to an organization's efforts in continuous improvement, whose principles are used by many leading organizations in all sectors to outpace competitors year after year. Prereq: Enrollment in MBA, WPMBA, MBLE, MHA, MPA, or MCRP program.</p>			
7193	Individual Studies	G	½ - 6	7242	Six Sigma Principles	G	3
<p>Individual study projects in selected areas in Management Sciences. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is progress graded (S/U).</p>				<p>Familiarizes students with the Six Sigma process improvement methodology by practicing with its tools. Supplemented with an online textbook from Moresteam.com, project simulation that runs throughout the semester and Minitab statistical software. Prereq: MBA 6273.</p>			
7194.31	Group Studies	G	1 - 6	7244	Six Sigma Projects	G	3
<p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>				<p>Teams of students apply the Six Sigma body of knowledge through a real-world project at an area company. Projects will follow the DMAIC body of knowledge as students and coaches work through its tollgates to achieve process improvement. Prereq: 7242 or 7243. Not open to students with credit for 811.</p>			
7194.32	Group Studies	G	1 - 6	7247	Artificial Intelligence and Machine Learning for Business: Decisions from Data	G	3
<p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>				<p>Provides business students with an overview of artificial intelligence, focusing on modern machine learning methods and applications. We study and implement supervised and unsupervised machine learning systems using software and data from practical, business contexts. Upon completion, participants will be able to identify and capitalize on opportunities to create value with artificial intelligence. Prereq: MBA 6273 or equivalent.</p>			
7194.33	Group Studies	G	1 - 6	7248	SMB-A Capstone Development	G	1½
<p>Group studies projects. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions.</p>				<p>While the SMB-A coursework is designed to develop the skill sets of students in Management Analytics topics, equally valuable for managers is experience in managing analytics teams. For that reason, the pre-cursor instruction of the Analytics Management capstone is designed to allow students to demonstrate skills gained in coursework, while also exposing them to challenge of managing a small team. Prereq: Enrollment in SMB-Analytics program.</p>			
7201	Operational Excellence in a Service Environment	G	3	7249	SMB-A Capstone Projects	G	3
<p>Surveys a broad framework of key principles of service operations, detailing how they can be leveraged to devise a successful service strategy. Starts by covering building blocks of service operations and examines the application of these tools across various offline and online services. Prereq: MBA 6233, or permission of instructor.</p>				<p>The course provides students with an opportunity to apply, showcase, fine-tune and expand the skills and knowledge acquired in courses in the program by working through substantive real-world analytics projects from initial conception to the production of useful insights and improved decisions. Prereq: BusOBA 7248, and enrollment in SMB-Analytics program. Cross-listed in BusML.</p>			
7223	Project Management	G	1½ - 3	7250	Data Management for Analytics Professionals	G	3
<p>Introduces challenges senior managers face in companies that run multiple projects with a focus on overall project portfolio management, project selection, resource allocation between projects & organizational team design. Students identify their strengths & weaknesses in projects with a creative problem-solving exercise & experience real-life applications with visits from local project managers. Prereq: Enrollment in Fisher College of Business Grad program, or permission of instructor. Repeatable to a maximum of 3 cr hrs.</p>				<p>Business Analytics is the process of transforming raw data into insights and predictions. This course is on the fundamentals of data management-the art and science of collecting, organizing, cleaning, and manipulating raw data in a variety of formats and from multiple sources, and being able to do it efficiently and at scale using R. Prereq: Enrollment in the SMB-A program, or permission of instructor.</p>			
7232	Supply Chain Analytics: Matching Supply with Demand	G	1½	7251	Managing Product and Process Innovation	G	1½
<p>Explores how firms can better organize their operations so they more effectively align supply with demand for products and services. Students will learn how to assess supply flexibility and manage demand for a fixed supply and explore topics including flexible capacity management, short-life-cycle forecasting, quick response, revenue management, buy-back contracts and revenue-sharing contracts. Prereq: MBA 6231 and 6232, or 6233; and enrollment in MBA or WPMBA. Not open to students with credit for 832.</p>				<p>An essential element of any business model is the design and the delivery of services and goods. Many organizations are able to perform this function effectively in the short-term. But only a few organizations demonstrate sustained performance over an extended period of time. We refer to these organizations as pioneers in business model innovation. Prereq: Enrollment in MBA, WPMBA, or MAcc program. Not open to students with credit for 834.</p>			
7232.01	Supply Chain Analytics: Matching Supply with Demand	G	1½	7253	Sustainable Operations	G	1½
<p>Explores how firms can better organize their operations so they more effectively align supply with demand for products and services. Students will learn how to assess supply flexibility and manage demand for a fixed supply and explore topics including flexible capacity management, short-life-cycle forecasting, quick response, revenue management, buy-back contracts and revenue-sharing contracts. Prereq: MBA (6231 and 6232) or 6233, and enrollment in MBA or WPMBA. Not open to students with credit for 832.</p>				<p>Reviews several sustainable operations strategy models and examines different ways of adopting eco-efficiency principles into business operations through waste reduction and design for recovery. Highlights factors that promote these efforts, such as environmental laws and product returns. Prereq: MBA 6233.</p>			
7232.02	Supply Chain Analytics: Matching Supply with Demand	G	1½	7256	Tools for Data Analysis	G	1½
<p>Explores how firms can better organize their operations so they more effectively align supply with demand for products and services. Students will learn how to assess supply flexibility and manage demand for a fixed supply and explore topics including flexible capacity management, short-life-cycle forecasting, quick response, revenue management, buy-back contracts and revenue-sharing contracts. Prereq: MBA (6231 and 6232) or 6233, enrollment in MBA or WPMBA. Concur: BusFin 7215.02. Not open to students with credit for 7232 or 7232.01.</p>				<p>This course is designed to introduce students to commonly used software programs in data science and improve students' problem solving skills and logical thought processes. Students will be exposed to R, SAS, and SPSS. Prereq: MBA 6271 or 6273.</p>			
7233	Strategic Global Sourcing	G	3	7257	Data Analysis and Visualization	G	3
<p>Focuses on major decisions related to global sourcing, starting with ownership (make-buy) and location (offshore-onshore). Among other topics, students explore fundamental trade-offs in sourcing organization, such as centralizing or decentralizing. Prereq: MBA 6231 and 6232, and enrollment in MBA, WPMBA, or MBLE program. Not open to students with credit for 837.</p>				<p>Designed to equip students with competencies in translating real-world problems into forms that such technologies can assist with, to portray/visualize these translations in ways that enhance the understanding of the dynamics of these problems, to structure mechanisms that derive suggested solutions, to clearly convey the justification and practicality of final solutions to others. Prereq: Enrollment in the MBA or WPMBA program; or permission of instructor.</p>			
7234	Purchasing Strategy	G	3	7258	Sports Analytics for Business	G	3
<p>As organizations look to develop a more effective and efficient purchasing function, purchasing managers are integral to the design and execution of purchasing, in accordance with business strategy. This course will focus on the key purchasing management strategies, objectives, processes, tools, and techniques required to address certain purchasing challenges and opportunities. Prereq: Enrollment in Fisher College of Business Grad program, or permission of instructor.</p>				<p>Analytics has become highly influential in business over the last 25 years. More recently, it has come to influence aspects of sports, including tournament and team management, real time strategy, and betting. The class demonstrates how skills such as critical thinking, mathematical modeling, statistical analysis, predictive analytics, prescriptive analytics and optimization are valuable in sports. Prereq: Enrollment in Fisher College of Business Grad program, or permission of instructor.</p>			
7235	Health Care Operations Management	G	3	7259	Operations and Technology Strategy	G	1½
<p>As healthcare organizations face challenges such as rising costs & complexity, as well as increasing demand for limited resources, significant opportunity exists to better manage their operations. This course applies operations management tools to examine the healthcare value chain & analyze healthcare organizations using qualitative & quantitative principles & develop solutions to common problems. Prereq: Enrollment in MBA or WPMBA program.</p>				<p>Develop a unifying framework for analyzing strategic issues in operations. Use theory and cases to illustrate and explore the concept of operations and technology strategy. Covers strategic decisions on technology, facilities, vertical integration, human resources, global operations and social issues. Prereq: Enrollment in Fisher College of Business Grad program; or permission of instructor.</p>			

Business Admin: Operations and Business Analytics 73

<p>7260 Applied Data Analytics Projects G 3</p> <p>Successful applications of data analysis in an organizational context require technical and managerial capabilities. The course provides the opportunity to develop your abilities in these areas through an analytics consulting project with a local firm or non-profit organization. Prereq: 7256 or MBA 6273, and enrollment in MBA, WP MBA, or SMB-A; or permission of instructor.</p>	<p>7334 Sports Analytics G 1½</p> <p>Analytical techniques and quantitative methods are on the rise in many areas of industry, and, of late, have entered the sports realm. Students will expand their critical thinking skills, explore the current state of sports analytics, summarize data creatively, improve data-based decision making, and optimize output in real-world situations as well as improve presentation skills to the non-quant. Prereq: Enrollment in SMB-Analytics program, or permission of instructor.</p>
<p>7261 MBOE Lean Enterprise Leadership G 3</p> <p>Introduces three important methods: Hoshin Kanri (or policy deployment); Value Stream Mapping, and A3 storyboards. We will also begin defining projects and use the methods covered to analyze and document the value streams. Prereq: Enrollment in MBOE. Not open to students with credit for 840.02.</p>	<p>7392 Contemporary Issues In Supply Chain Management G 1½</p> <p>This course will expose students to cutting-edge topics in supply chain, taught by research-active faculty. There will be six class sessions. Each session will include approximately 1.5-2 hours of asynchronous content and approximately 1.5-2 hours of synchronous content. Each session will cover a topic.</p>
<p>7262 MBOE Capstone/Cornerstone Project G 1½</p> <p>Capstone Project is a supervised practical project executed by the student with the help of a team in the student's own workplace. A faculty coach supervises and guides the effort and a company sponsor supports the effort of the student team. Prereq: Enrollment in MBOE. Not open to students with credit for 841. Repeatable to a maximum of 6 cr hrs.</p>	<p>7393 Supply Chain Analytics G 3</p> <p>In any organization, the quantitative analysis of information to improve decision making ("Analytics") is exploding in all functional areas. The primary objective of this course is to study several applications of analytics in operations/supply chain management through a hands on approach. Topics include Data Analysis and Visualization, Simulation, Optimization and Time Series Forecasting.</p>
<p>7263 MBOE Value Stream Management G 3</p> <p>Presents students with the state-of-the-art strategic and operational approaches to planning and implementing effective change across an enterprise. Students will be taught to identify and analyze concerns and implement solutions. Prereq: Enrollment in MBOE. Not open to students with credit for 842.</p>	<p>7395 Supply Chain Sustainability and Resilience G 1½</p> <p>This course provides students with an understanding of the concepts, strategies, and tools needed to build sustainable & resilient supply chains in a dynamic business environment. The topics covered include the triple bottom line of environmental sustainability, social responsibility, and economic performance as well as and risk management across supply chain functions.</p>
<p>7264 MBOE Stabilizing Operations G 3</p> <p>The objective of this course is to present students with the state-of-the-art tools for stabilizing operations and maintaining stability. Students will be taught to identify and analyze strategic core enterprise-wide concerns and implement solutions. Prereq: Enrollment in MBOE. Not open to students with credit for 843.</p>	<p>7397 MSCM Mid-Program Experience G 1</p> <p>2-day on-campus experience will include a mini-course (8 instructional hours) on negotiations, a company visit (4 hours) to include a facility tour and executive presentation discussion of the program's capstone project (2 hours) and an executive panel (2 hours). It will also provide an opportunity for the students to interact and network with each other, the faculty and the staff involved.</p>
<p>7265 MBOE Creating and Managing Flow G 3</p> <p>This class will cover flow in both service and manufacturing environments. We will consider questions such as how to achieve patient flow in a hospital; and whether Materials Requirements Planning systems and flow processes can co-exist. Prereq: Enrollment in MBOE. Not open to students with credit for 845.</p>	<p>7398 MSCM Final-Program Experience G 1</p> <p>This 2-day on-campus experience will include a mini-course (8 instructional hours) on leadership, a company visit to include a facility tour and executive presentation (4 hours), Capstone presentations (2 hours) and an executive panel (2 hours). It will also provide an opportunity for the students to interact and network with each other, the faculty and the staff involved in the program.</p>
<p>7266 MBOE Leading Operations G 3</p> <p>The explicit link between problem solving and lean activities such as policy management, standardized work, visual management, human resources management and "go see" (gemba) activities are explained. Prereq: Enrollment in MBOE. Not open to students with credit for 844.</p>	<p>7701 Managing Business Operations for Health Sciences G 1½ - 3½</p> <p>Many firms have demonstrated that operations management can be an effective competitive weapon. In conjunction with well-conceived marketing and financial plans, these firms have made major penetrations into markets worldwide. This course is designed to address the key operations issues in service and manufacturing organizations that have strategic as well as tactical implications. Prereq: Enrollment in the Graduate Business Minor in Health Sciences.</p>
<p>7267 MBOE Six Sigma G 3</p> <p>Designed to familiarize students with the Six Sigma process improvement methodology and to provide them an opportunity to practice using Six Sigma Black Belt tools. Prereq: Enrollment in MBOE. Not open to students with credit for 810. This course is progress graded.</p>	<p>7717 Capstone: Healthcare Business Solution Teams G 1½ - 3½</p> <p>This class focuses on diagnosing and solving real-world problems in life science and healthcare business practices. Prereq: 7701, BusFin 7702, and BusMHR 7703.</p>
<p>7268 MBOE Supply Chain Excellence G 3</p> <p>The course familiarizes students with operational excellence beyond the organizational boundaries with a specific focus on supply chain strategy, supply chain design, managing buyer-supplier relationships, and understanding psychological behaviors in supply chain relationships. Prereq: Enrollment in MBOE.</p>	<p>7800 Advanced Topics in Management Sciences for EMBA G 1½ - 3</p> <p>Advanced Topics in Management Sciences for students in the Executive MBA Program. Prereq: Enrollment in EMBA program. Repeatable to a maximum of 15 cr hrs or 7 completions.</p>
<p>7269 MBOE Change & Innovation for Ops Excellence G 3</p> <p>Course is designed to familiarize students with the application of lean principles in three additional key areas of the organization. The total lean transformation requires a change in the way we lead throughout the organization. Prereq: Enrollment in MBOE. Not open to students with credit for 847.</p>	<p>7999 Research in Management Sciences: Thesis G 1 - 12</p> <p>Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 4 completions. This course is progress graded (S/U).</p>
<p>7270 MBOE Managing the Extended Value Stream G 3</p> <p>A focus on working across functions, companies and cultures and managing the Extended Value Stream. Prereq: Enrollment in MBOE. Not open to students with credit for 848.</p>	<p>8230 Strategic Management of Operations I G 1½</p> <p>Doctoral research seminar: critical analysis of research studies in different areas of operations management; linking operations to the corporate strategy, dimensions of operations strategy. Prereq: Enrollment in BusAdm PhD program.</p>
<p>7331 Descriptive Analytics and Visualization G 3</p> <p>Visualization is an effective way to communicate the underlying patterns of data. Students will learn different types of visualization and how to compose and combine them using R. This course covers a wide range of visualization from simple to complex, static to interactive, and familiar to exotic. Students will also be exposed to how to describe and visualize unstructured data such as texts. Prereq: 6400, 7250, enrollment in SMB-Analytics program, or permission of instructor.</p>	<p>8231 Strategic Management of Operations II G 1½</p> <p>Doctoral research seminar: critical analysis of research in vertical integration decisions, and measuring operational effectiveness, interorganizational collaboration. Prereq: Enrollment in BusAdm PhD program.</p>
<p>7332.01 Predictive Analytics G 3</p> <p>Business Analytics is the process of transforming raw data into insights and predictions. This course provides an introduction to core predictive analytics concepts and techniques as well as hands-on experience in applying these techniques to practical real-world business problems. Prereq: Enrollment in SMB-Analytics program, or 7250, or permission of instructor. Not open to students with credit for BusOBA 7332.02.</p>	<p>8232 Operations Planning & Control I G 1½</p> <p>Doctoral research seminar: critical analysis of research in fundamental and classical operations management and operations research topics. Prereq: Enrollment in BusAdm PhD program.</p>
<p>7332.02 Predictive Analytics G 1½</p> <p>Business Analytics is the process of transforming raw data into insights and predictions. This course provides an introduction to core predictive analytics concepts and techniques as well as hands-on experience in applying these techniques to practical real-world business problems. Prereq: Enrollment in Fisher College of Business, or permission of instructor. Not open to students with credit for BusOBA 7332.01.</p>	<p>8233 Operations Planning & Control II G 1½</p> <p>Doctoral research seminar: Critical analysis of research studies in inventory management, warehouse and facility location, vehicle routing, MRP and forecasting. Prereq: Enrollment in BusAdm PhD program.</p>
	<p>8234 Innovation Management G 1½</p> <p>Doctoral research seminar: Critical analysis of research in portfolio management, NPD, managing NPD teams, distributed and platform innovation, and innovation implementation. Prereq: Enrollment in BusAdm PhD program.</p>

74 Business Admin: Operations and Business Analytics

8235 Fundamentals of Operational Excellence G 1½

Doctoral research seminar: Critical analysis of research in quality management, lean, six sigma, designing operations to support and sustain innovation, integrating technology into operations. Prereq: Enrollment in BusAdm PhD program.

8236 Service Operations I G 1½

Doctoral research seminar: critical analysis of research in designing effective service delivery models, service quality, measuring service performance, service profit chains. Prereq: Enrollment in BusAdm PhD program.

8237 Service Operations II G 1½

Doctoral research seminar: Critical analysis of research in healthcare operations, retail operations, and IT service operations, sharing economies. Prereq: Enrollment in BusAdm PhD program.

8238 Supply Chain Management I G 1½

Doctoral research seminar: Critical analysis of research in supply chain essentials, design, and management. Prereq: Enrollment in BusAdm PhD program.

8239 Supply Chain Management II G 1½

Doctoral research seminar: critical analysis of research in buyer-supplier contracts, matching supply and demand, behavioral issues in supply chain. Prereq: Enrollment in BusAdm PhD program.

8240 Operations Method I G 3

Doctoral research seminar: critical analysis of philosophy of science, qualitative/case study research, survey-based research, research employing secondary data sources. Prereq: Enrollment in BusAdm PhD program.

8241 Operations Method II G 3

Doctoral research seminar: critical analysis of analytical research methods and dynamic programming. Prereq: Enrollment in BusAdm PhD program.

8242 Operations Management Seminar Speaker Series G 1½

Doctoral research seminar: Critical analysis of research in different areas of behavioral operations; practice in developing research questions and formulating hypotheses; presentation of original research of publishable quality. Prereq: Enrollment in BusAdm PhD program. Repeatable to a maximum of 3 or hrs.

8999 Research in Management Sciences: Dissertation G 1 - 12

Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 48 cr hrs or 8 completions. This course is progress graded (S/U).

Business Technology

1201T Exploring Business U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

1202T Software Applications U 1

An overview of basic computer skills and study of the features and capabilities of presentations, word processing, spreadsheet and database software as decision management aids. Prereq: Not open to students with credit for 202T. This course is available for EM credit.

2191T Business Internship U 3

Experience of employment in a business to provide varied occupational experience, supervised by an employer, and coordinated by faculty. A grade of C or better required to meet graduation requirements. Prereq: GPA 2.00 or above, and permission of instructor. Not open to students with credit for 290.02T or 290.03T. Repeatable to a maximum of 6 cr hrs.

2193T Individual Studies U 1 - 3

Designed to give an individual student an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

2194T Group Studies U 1 - 3

Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

2207T Problem Solving with Spreadsheets and Databases U 2

A problem-solving approach to managing typical business scenarios utilizing spreadsheets and databases. Prereq: 1202T (202T). Not open to students with credit for 204T and 205T. This course is available for EM credit.

2231T Fundamentals of Marketing U 3

A survey of the field of marketing including functions, policies, problems, structure, strategies, and opportunities. Prereq or Concur: AEDEcon 2001. This course is available for EM credit.

2232T Personal Selling U 3

A study of the basic principles and concepts of personal selling with emphasis on practical application and personal interaction. Prereq: Not open to students with credit for 232T. This course is available for EM credit.

2240T Introduction to Project Management U 3

An introduction to project management concepts and techniques focusing on how to initiate, plan, manage, control, and close a project. This course is available for EM credit.

2241T Small Business Management U 3

A general study of the field of small business focusing on policies, strategies, organization, operation, and problems associated with the operation of an entrepreneurial enterprise. Recommended prerequisite: AEDEcon 2105. Prereq: AEDEcon 2001. This course is available for EM credit.

2244T Human Resource Management and Leadership U 3

A study of human resource, supervisory, and leadership principles and practices that focus on recruitment, training, evaluating, and compensating employees for improved productivity. This course is available for EM credit.

2247T Business Law U 3

A study of legal principles, contracts, negotiable instruments, leases, sales, product liability, and consumer protection. Prereq: Not open to students with credit for 247T. This course is available for EM credit.

2249T Fundamentals of Business Finance U 3

A study of basic finance principles, such as financial institutions, time value of money, financial analysis, risk and return, budgeting, and investments. Prereq: AEDEcon 2001 and 2105. This course is available for EM credit.

2250T Fundamentals of International Business U 3

An overview of international business including the environment, strategies, issues, decisions, and challenges that global businesses encounter. Prereq: 1151T or AEDEcon 2001. This course is available for EM credit.

Cancer Biology and Genetics

4998 CBG Undergraduate Research U 1 - 10

Individual minor investigation in the field of virology, immunology, microbial pathogenesis, or cancer genetics. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

5700 Introduction to Personalized Therapeutics and Pharmacogenomics U G 3

Exploration of the trend to therapy tailored to the individual patient rather than "one drug fits all;" inter-individual differences in drug responses, with emphasis on genetic and genomic factors; ethical, regulatory and economic issues that impact drug therapies. Cross-listed in BioPhm and Phr.

5745 Cell signaling Enzymes and Cancer Biology U G 3

An overview of signaling pathways activated intrinsically or extrinsically by signals from other cells in their microenvironment, and to address the role of these pathways in the regulation of basic biological functions and the overall biology of normal and cancer cells. Prereq: Grad standing in the Biomedical Sciences Graduate Program, the Ohio State Biochemistry Program, the Molecular Genetics Graduate Program, or the Medical Scientist Training Program; or Sr standing in a biological sciences major, MolGen 4606, and 4500; or permission of instructor.

7741 Molecular Virology and Pathogenesis of Viruses G 5

An integrated study of the molecular mechanisms of virus replication and host-virus relationships that control virus pathogenesis or use as a therapeutic agent. Prereq: Grad standing, or permission of instructor. Cross-listed in MolGen and VetBios.

7931 Scientific Communication and Research Presentation Skills G 1

Student and post-doctoral presentations of research. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

8080 Current Topics in Cancer Biology and Cancer Genetics G 3

This advanced course provides an extensive exploration into the latest developments in cancer biology, genetics, and biotechnology. Students will learn how advances are transforming our approach to diagnosing, treating, and understanding cancer, particularly through the lens of personalized medicine.

8270 Biochemical Mechanisms of Carcinogenesis G 2

Provide students with an overview of fundamental mechanisms leading to cancer. This will be done through review of current and classic literature. Prereq: Course work in one year of Grad level Biochem, or permission of instructor. Cross-listed in MCDBio 8270.

8999 Research in Cancer Biology and Genetics G 1 - 18

Research for thesis or dissertation purposes only. Prereq: Grad standing in CBG. Repeatable to a maximum of 18 cr hrs or 18 completions. This course is graded S/U.

Catalan

5501 Catalan for Spanish Speakers I U G 3

Rapid introduction to Catalan language. Intended for students with at least High Intermediate-level Spanish skills. Prereq or concur: Spanish 3401, 3403, or 3404, or equiv; or permission of instructor.

5502 Catalan for Spanish Speakers II U G 3

Continuation of Catalan 5501. Intended for students with at least High Intermediate-level Spanish skills. Prereq: 5501.

Center for Languages, Literatures and Cultures

3301.01S Intercultural Competence for Global Citizenship U 2

This course is preparation for teaching in the one-week summer camp for middle school students. Students will learn the theories, skills and techniques involved in teaching their area of expertise as it relates to intercultural competence and will prepare the teaching materials that they will use in the summer camp. Students are also required to enroll in 3301.02S. Prereq: A grade of B or above in a 2000-level world language course. Not open to students with credit for 2302S or 3302S. This course is progress graded. GE service learning course.

3301.02S Intercultural Competence for Global Citizenship Summer Camp U 1

Students will participate as assistants and instructors in a one-week summer camp for middle school students. Students will assist with the running of the camp, teach their area of expertise as it relates to intercultural competence and organize and teach an international game. Prereq: 3301.01S. Not open to students with credit for 2302S or 3302S. GE service learning course.

3302S Intercultural Competence for Global Citizenship After School Program U 3

Students will learn theories, skills and techniques involved in teaching their area of expertise as it relates to intercultural competence and will prepare the teaching materials that they will use at a local elementary and/or middle school. Prereq: A grade of B or above in a 2000-level world language course. Not open to students with credit for 2301.02S or 3301.02S. GE service learning course.

5100 Introduction to Community Interpreting U G 3

CLLC 5100 is an advanced course designed to introduce students to the foundational aspects of community interpreting. Students will explore the profession of community interpreting with special emphasis on its core ethical principles, protocols and skills, strategies for strategic mediation within the interpreted encounter, the professional identity and role of the community interpreter. Prereq: 15 cr hrs in the same language.

5101 Introduction to Professional Translation U G 3

This course introduces students to the field, ethics, and methodologies of professional translation, as well as provides basic professionalization for a career in the field. Students will learn about the principles of translation, how to research for a translation, and develop the skills and tools to become professional translators. Prereq: 15 cr hrs in the same language.

5102 Introduction to Literary Translation U G 3

This course will give students who want to practice literary translation in one or more of their language pairs an opportunity to develop their own translation projects through a variety of approaches. Prereq: 15 cr hrs in the same language.

5103 Translation and Interpretation Practicum U G 3

The purpose of this course is to offer students an opportunity to consolidate translation/interpretation skills in their working languages in real life settings that are meaningful to them and relevant to their career aspirations. The precise configuration of the practicum experience will vary from student to student and should be agreed upon between the student and the course instructor. Prereq: 5100, 5101, or 5102. This course is graded S/U.

Center for the Study and Teaching of Writing

3467S Issues and Methods in Tutoring Writing U 3

Theories and practices in tutoring and writing; explores the writing-learning connections; prepares students to work as writing consultants/tutors for small writing groups. Prereq: English 1110.01 (110.01), or equiv. Not open to students with credit for HumCol 467 or English 3467S (467). Cross-listed in English.

Chemical and Biomolecular Engineering

2100 Chemical Engineering Seminar U 1

A general introduction to the chemical engineering curriculum, academic pathways, educational resources, career options, engineering ethics, and leadership skills. Prereq or concur: 2200.

2194 Group Studies in Chemical and Biomolecular Engineering U 1-6

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

2200 Process Fundamentals U 3

Application of physicochemical principles to problems of the chemical industry; stoichiometry and material balance. Prereq: Chem 1210, and Engr 1181 or 1281.xxH. Prereq or concur: Math 1172, and CPHR 2.0 or above; and permission of department.

2345 Computational Methods for Chemical Engineering U 3

Chemical engineering problems are often described by a complex set of mathematical equations that cannot be solved analytically. The main goal of this course is to introduce students to a variety of computational methods/algorithms to develop solutions to such challenging problems as well as how to implement these solutions on a computer using a relevant programming environment (e.g., Python). Prereq: 2200.

2420 Transport Phenomena I U 3

The transport of energy, mass and momentum is essential to the function of all non-living and living systems. This course will serve as an introduction to momentum transport (i.e., fluid mechanics), and will primarily focus on the basic mechanisms of momentum transport and its application to the analysis of real world flows. Prereq: 2200, and Math 2173 or 2177 or 2415, and enrollment in CBE, FABEng, or EngPhysics major; or Grad standing; or permission of instructor.

2523 Separation Processes U 3

The application of mass and energy balances and transport phenomena such as fluid, heat, and mass transfer to chemical engineering separation operations of distillation, absorption, evaporation, extraction, drying, etc. Prereq: 2200 (201), and enrollment in CBE major. Prereq or concur: 2420 (420), or permission of instructor or Grad standing. Not open to students with credit for 523.

3421 Transport Phenomena II - Heat Transfer U 3

The transport of energy, mass and momentum is essential to the function of all non-living and living systems. This course will serve as an introduction to heat transport (i.e., convection and conduction), and will primarily focus on the basic mechanisms of heat transport and its application to the analysis of real world heat transfer problems. Prereq: 2420, or permission of instructor. Not open to students with credit for 3521.

3422 Transport Phenomena III - Mass Transfer U 3

The transport processes involved in mass transfer will be outlined and governing equations derived. Modes of mass transfer (e.g., diffusion); Steady-state and unsteady-state mass transfer. The concept and use of mass transfer coefficients and the use of dimensionless numbers; mathematical analysis for the different mass transfer modes; analogies between heat, mass, and momentum transfer. Prereq: 3421, or permission of instructor. Not open to students with credit for 3521.

3508 Chemical Engineering Thermodynamics I U 3

Development of the conceptual basis for thermodynamics: energy conservation in open and closed systems (first thermodynamic law), temperature, entropy and reversibility (second thermodynamic law), fundamental equations, and criteria of equilibrium and stability. Prereq: 2200, and enrollment in CBE, FABEng, or EngPhysics major; or permission of instructor.

3509 Chemical Engineering Thermodynamics II U 3

Focus on the use of thermodynamics concepts to analyze systems or processes including energy conversion processes, reactions, and properties of mixtures, e.g., obtaining the equilibrium composition of coexisting phases. Prereq: 3508, and enrollment in CBE, FABEng, or EngPhysics major; or permission of instructor.

3521 Transport Phenomena II U 4

Emphasis on conduction, convective and radiation heat transfer, mass transfer and stagewise operations with applied computational problems. Prereq: 2420 (420), and enrollment in CBE, FABEng, or EngPhysics major; or permission of instructor or Grad standing. Not open to students with credit for 522.

3610 Kinetics and Reactor Design U 3

Chemical and engineering principles for the design and operation of chemical reactors; kinetics of simple homogeneous systems and introduction to heterogeneous catalysis. Prereq or concur: 3508 or FABEng 3120, and enrollment in CBE, FABEng, or EngPhysics major; or Grad standing; or permission of instructor.

3631 Chemical and Biomolecular Engineering Unit Operations Laboratory I U 2

Laboratory investigation of the operating characteristics and efficiency of chemical engineering equipment such as distillation, absorption, heat exchangers, and three phase mixing dynamics with mass transfer. Prereq or concur: 2523 (523) and 3610 (610), and enrollment in CBE major. Not open to students with credit for 630 or 4630.

3632 Chemical and Biomolecular Engineering Unit Operations Laboratory II U 2

Laboratory investigation of the operating characteristics and efficiency of chemical engineering equipment such as distillation, absorption, heat exchangers, and three phase mixing dynamics with mass transfer. Prereq or concur: 2523 (523) and 3610 (610); and enrollment in CBE major. Not open to students with credit for 630 or 4630.

3730 Unit Operations I U 1

The fundamental laboratory course in chemical engineering: laboratory investigation of the operating characteristics of chemical engineering equipment. Prereq: 2200, or permission of instructor.

3731 Unit Operations II U 1

The fundamental laboratory course in chemical engineering: laboratory investigation of the operating characteristics of chemical engineering equipment. Prereq: 3730, or permission of instructor.

3732 Unit Operations III U 2

The fundamental laboratory course in chemical engineering: laboratory investigation of the operating characteristics of chemical engineering equipment. Prereq: 3731, or permission of instructor.

4193 Individual Studies in Chemical and Biomolecular Engineering U 1-12

Provides the opportunity to pursue special studies or research in biomedical engineering not otherwise covered. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 10 completions. This course is graded S/U.

4194 Group Studies in Chemical and Biomolecular Engineering U 1-6

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

76 Chemical and Biomolecular Engineering

4624	Chemical Process Dynamics and Control	U	3		
	Study of the dynamics and control of chemical processes; mathematical models of simple processes, including feedback control, are derived, analyzed, and simulated. Prereq: 2523 (523) or 3610 (610), and enrollment in CBE major; or Grad standing, or permission of instructor. Not open to students with credit for 624.				
4755	Chemical Process Safety	U	2		
	Consideration of process safety concepts and application in the chemical process industry. Prereq: 3422 or 3521, and enrollment in CBE or EngPhysics major; or Grad standing; or permission of instructor.				
4760	Chemical Engineering Economy and Strategy	U	3		
	Economic and strategy considerations in research, development, design, and manufacturing in the chemical process industry. Prereq: 3610, and enrollment in CBE or EngPhysics major; or Grad standing; or permission of instructor.				
4764	Chemical and Biomolecular Engineering Process Design and Development	U	3		
	Culminating design experience in Chemical Engineering. Systematic formulation, analysis, and solution of chemical product and process design and related problems. Prereq or concur: 4624, 4755, 4760, and enrollment in CBE or EngPhysics major.				
4998	Undergraduate Research in Chemical and Biomolecular Engineering	U	1 - 6		
	Supervised research in Chemical and Biomolecular Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4998H	Honors Undergraduate Research in Chemical and Biomolecular Engineering	U	1 - 6		
	Supervised Honors level research in Chemical and Biomolecular Engineering. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4999	Chemical and Biomolecular Engineering Research for Thesis	U	1 - 5		
	Supervised research and project work arranged individually for students resulting in written thesis. Prereq: GPA 3.0 or above, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
4999H	Chemical and Biomolecular Engineering Research for Honors Thesis	U	1 - 5		
	Supervised research and project work arranged individually for honors students resulting in written Honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
5194	Group Studies in Chemical and Biomolecular Engineering	U G	1 - 6		
	Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
5200	Introduction to Petroleum Engineering	U G	3		
	Introduction to petroleum engineering, including fundamental petroleum engineering concepts, quantities and unit systems, petroleum geology, exploration, drilling, reservoir engineering, fluids and rock properties, production, well testing, enhanced/improved oil recovery. Prereq: Jr standing or above in Engineering, Earth Sciences, or Business. Concur: EarthSc 5661.				
5210	Petroleum Reservoir Engineering	U G	3		
	Determination of reserves; material balance methods; aquifer models; fractional flow and frontal advance; displacement, pattern, and vertical sweep efficiencies in waterfloods; enhanced oil recovery processes; design of optimal recovery processes. Systematic theoretical and laboratory study of physical properties of petroleum reservoir rocks. Undergrad Prereq: Junior standing or above in Engineering or Earth Sciences. Grad Prereq: graduate standing.				
5230	Petroleum Drilling and Production Engineering	U G	3		
	The design and evaluation of well drilling systems; identification and solution of drilling problems; wellbore hydraulics, well control, casing design; well cementing directional drilling, offshore drilling. Introduction to production operations and oil field equipment including onshore and offshore production systems. Prereq: 5200 and EarthSc 5661; or Grad standing; or permission of instructor.				
5260	Petroleum Project Evaluation	U G	3		
	Economic analysis and investment decision methods in the petroleum industry; reserves estimation, depletion, petroleum taxation and market regulations, and projects of the type found in the industry; project evaluation case studies. Prereq: 5200 and EarthSc 5661.				
5550	Engineering Principles in Cancer	U G	3		
	The purpose of this course is to introduce engineering principles in the context of cancer progression and therapy. Prereq: MechEng 3500, 3503, or CBE 2420; or permission of instructor. Not open to students with credit for BioMedE 5550 or MechEng 5550. Cross-listed in BioMedE and MechEng.				
5710	Computational Catalysis	U G	3		
	Methods used to model catalyst reactivity at the atomic-scale; application of quantum methods, primarily density functional theory (DFT); kinetic Monte Carlo and microkinetic modeling; using DFT to simulate surface science and catalysis spectroscopy methods. Prereq: 3610 and Chem 4300; or Grad standing; or permission of instructor.				
5712	Catalysis and Catalytic Processes	U G	3		
	Kinetics of catalytic processes, mass transfer in catalysis, catalyst preparation and characterization, deactivation of catalysts, catalytic reactors, and application of catalytic phenomena in industrial processes. Prereq: 3521 (522) and 3610 (610), or Grad standing. Not open to students with credit for 712.				
5713	Fuel Cells and Catalysis	U G	3		
	An introduction to fuel cells and related concepts with an emphasis on the catalytic phenomena involved in fuel cells. Prereq: ChBE 3508, 3610 (610), 509, Chem 4310, or 531, or Grad standing, or permission of instructor. Not open to students with credit for 713.				
5715	Particle Technology	U G	3		
	Engineering processes involving particulates and powders. Multiphase transport phenomena and fluidization are emphasized. Prereq: 2523 (523), and Math 2177 or Math 415.01; or Grad standing; or permission of instructor. Not open to students with credit for 715.				
5734	Molecular Informatics	U G	3		
	Overview of molecular informatics, with emphasis on its use in modern drug discovery and exploration of chemical structure-property relationships. Prereq: Sr or Grad standing in Engineering, or permission of instructor. Not open to students with credit for 734.				
5735	Cellular Nanotechnology	U G	3		
	Application of nanotechnology to cells for sensing and subcellular manipulation. Synthesis and biological modification of quantum dots and magnetic nanostructures, their unique material properties, and their application. Prereq: Sr or Grad standing in Engineering, or permission of instructor. Not open to students with credit for 735 or BiomedE 765. Cross-listed in BiomedE 5635.				
5765	Principles of Biochemical Engineering	U G	3		
	The application of biochemical engineering principles for modern bioprocesses and in the area of industrial biotechnology. Prereq: 2523 (523) or 3610 (610), or Grad standing, or permission of instructor. Not open to students with credit for 765.				
5766	Biotechnology and Bioprocess Engineering	U G	3		
	Fundamentals of biotechnology and their applications to bioprocessing with emphasis on fermentation and bioseparation. Completion of Bio 1113 or 2100 is recommended. Prereq: Jr standing in CBE, or permission of instructor. Not open to students with credit for 766.				
5772	Principles of Sustainable Engineering	U G	3		
	Introduces the principles, techniques, and challenges of environmentally conscious decision making in chemical engineering. A study of systematic methods for the analysis and development of sustainable industrial products and processes. Prereq: 3508 or equivalent, Grad standing, or permission of instructor. Not open to students with credit for 772.				
5773	Introduction to High Polymer Engineering	U G	3		
	Introduction to polymeric materials, polymerization methods and kinetics, polymer solution properties, molecular weight determination and polymer physical/mechanical properties. Prereq: 3610 (610) or Chem 2510 (251), or permission of instructor. Not open to students with credit for 773.				
5774	Polymer Membranes	U G	3		
	Membrane separation mechanisms, transport models, permeability computations/measurements, membrane materials/types/modules, membrane contactors/reactors, and applications. Prereq: 3508 (509), or Grad standing; or permission of instructor. Not open to students with credit for 774 or MatScEn 774. Cross-listed in MatScEn 5774.				
5775	Rheology of Fluids	U G	3		
	Principles of rheology, including the characterization of non-Newtonian materials, rheological equations of state, viscometric flows, measurements, and applications to the flow of industrial materials. Prereq: 2420 (420), or permission of instructor. Not open to students with credit for 775.				
5777	Introduction to Polymer Engineering at Macro-, Micro-, and Nanoscale	U G	3		
	An introduction to nanomaterials and nanotechnology. Important polymeric micro/nanomaterials and structures, and their manufacturing techniques. Prereq: 3521 (521), MechEng 3500 (500), 4510 (510), MatScEn 2251 (401), or 3151 (526), or permission of instructor. Not open to students with credit for 777.				
5779	Design and Analysis of Experiments	U G	3		
	Design and analysis of experiments with emphasis on applications in engineering. Prereq: Jr or Sr standing in CBE. Not open to students with credit for 779.				
5780	Molecular Dynamics Simulations	U G	3		
	Molecular dynamics simulations, especially as used in chemical engineering and soft materials science, from a practical perspective. Prior undergraduate courses in thermodynamics or statistical mechanics are recommended. Prereq: Jr standing or above in Engineering, Chemistry, or Physics; or Grad standing; or permission of instructor.				
5790	Modeling and Simulation	U G	3		
	Application of chemical and biomolecular engineering principles to construct mathematical models of processes and perform simulations. Prereq: Jr, Sr, or Grad standing in CBE. Not open to students with credit for 790.				
6999	Thesis Research in Chemical and Biomolecular Engineering	G	1 - 15		
	Research for thesis. Prereq: Grad standing. Repeatable. This course is graded S/U.				

Chemical and Biomolecular Engineering 77

8194	Group Studies in Chemical and Biomolecular Engineering	G	1 - 6
Designed to give the student an opportunity to pursue special studies and topics not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 18 cr hrs or 18 completions.			
8781	Research Communications in Chemical and Biomolecular Engineering	G	2
Analysis and critique of chemical and biomolecular engineering research literature. Training and practice in written and oral communication of research ideas. Prereq: Grad standing. Not open to students with credit for 881.			
8801	Analysis of Chemical and Biomolecular Engineering Problems	G	3
Modern techniques for the theoretical analysis of chemical and biomolecular engineering problems. Prereq: Grad standing. Not open to students with credit for 801.			
8808	Advanced Thermodynamics I	G	3
Detailed discussion of the thermodynamic properties of pure compounds and mixtures; computational problem work emphasizes the application of thermodynamics in industrial problems. Prereq: 3508 (508), and Grad standing; or permission of instructor. Not open to students with credit for 808.			
8812	Advanced Kinetics I	G	3
Chemical engineering kinetics from the viewpoint of industrial chemical processes. Prereq: 2523 (523) and 3610 (610), and Grad standing; or permission of instructor. Not open to students with credit for 812.			
8815	Advanced Transport	G	3
Momentum and mass transfer theory at both the macroscopic and microscopic levels utilizing integral and differential conservation equations. Prereq: Grad standing in ChemEng, or permission of instructor. Not open to students with credit for 815.01 or 815.08.			
8895	Seminar in Chemical and Biomolecular Engineering	G	1
Formal lectures and discussion of state of the art research and development in chemical and biomolecular engineering. Prereq: Grad standing. Repeatable to a maximum of 18 cr hrs. This course is graded S/U.			
8999	Dissertation Research in Chemical and Biomolecular Engineering	G	1 - 15
Research for dissertation purposes only. Prereq: Grad standing. Repeatable. This course is graded S/U.			

Chemical Physics

7998	Graduate Research	G	1 - 10
Laboratory and/or theoretical research on an individual basis on topics of current interest. Prereq: Permission of instructor. Repeatable to a maximum of 36 cr hrs or 6 completions. This course is progress graded (S/U).			
7999	Masters Degree Research in Chemical Physics	G	1 - 12
Research for Masters thesis purposes only. Prereq: Permission of instructor. Repeatable. This course is progress graded (S/U).			
8880.01	Frontiers in Spectroscopy	G	1 - 3
An overview of both fundamental and applied topics on the frontier of spectroscopy. Prereq: Physics 7501, Chem 6510, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 6 completions. This course is graded S/U.			
8880.02	Frontiers in Spectroscopy	G	1 - 3
An overview of both fundamental and applied topics on the frontier of spectroscopy. Prereq: Physics 7501, Chem 6510, or permission of instructor.			
8999	Research in Chemical Physics	G	1 - 12
Research for doctoral dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is progress graded (S/U).			

Chemistry

1100	Chemistry and Society	U	3
Terminology, methods, and principles of chemistry; examination of the roles of chemistry in our modern technological society. Prereq: Math 1050 (075 or 076) or an ACT math subscore of 22 or higher that is less than two years old, or satisfactory score on Ohio State Math Placement Test. Not open to students with credit for 1110 (101), 1210 (121), 1910H (201H), or 100, or any Chem course that uses these courses as prerequisites. GE nat sci phys course (BA in ASC only).			
1101	Chemistry and Society	U	4
The course will examine the dilemma that we face in our modern world of attempting to balance the great benefits of modern chemical sciences and technology with the risks that accompany those benefits, through the lens of chemicals that have changed the world around us. This course includes a laboratory experience. Prereq: Math 1050, or an ACT math subscore of 22 or higher that is less than two years old, or satisfactory score on Ohio State Math Placement Test. Not open to students with credit for 1100, 1110, 1210, 1610, 1910H, or any Chem course that uses these courses as prerequisites. GE nat sci phys course. GE foundation natural sci course.			

1110	Elementary Chemistry	U	5
Introductory chemistry for non-science majors, including dimensional analysis, atomic structure, bonding, chemical reactions, states of matter, solutions, chemical equilibrium, acids and bases, along with topics in organic and biological chemistry. Prereq: Math 1073, 1074, 1075 or above; Math Placement Level L, M, N, or R; or ACT Math subscore of 22 or higher that is less than 2 years old. Not open to students with credit for 1210, 1250, 1610, or 1910H. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.			
1205	Foundations of General Chemistry	U	2
Chemistry 1205 is a preparatory course for under-prepared students previously enrolled in Chemistry 1210/1610. Chemistry 1205 will prepare students to continue on and complete Chemistry 1210/1610 in a subsequent semester. The textbook for Chem 1205 will be the same textbook used in Chem 1210/1610. Prereq: Failed or withdrew from Chem 1210 or 1610, or Math 1075 or Math placement N. Prereq or concur: Math 1120.			
1206	Foundations 1 of General Chemistry	U	3
Chem 1206 is the first course in a two-course series, for science majors, covering units & measurement, atomic structure, electron configuration, periodic trends, bonding, and molecular structure. The chemistry content is covered in the same depth and rigor as in Chem 1210, and is about 1/2 of the Chem 1210 content. Additionally, metacognitive learning strategies are taught in the course. Prereq or concur: Math Placement Level L or M, Math 1120, 1130, 1131, 1140, 1148, 1150, or above. Not open to students with credit for 1210, 1220, 1610, 1620, 1910H, 1920H, 1250.			
1208	Foundations 2 of General Chemistry	U	4
CHEM 1208 is second course in a two-course series, for science majors, covering the mole, stoichiometry, chemical reactions, thermochemistry, gases, liquids, and solids, paired with metacognitive learning strategies. CHEM 1208 also includes a laboratory experience, that covers labs from both CHEM 1206 and CHEM 1208 content. Credit for CHEM 1206 and CHEM 1208 is equivalent to CHEM 1210. Prereq: Chem 1206, and a grade of C- or above in Math 1120, 1130, 1131, 1140, 1148, 1150, or above. Not open to students with credit for 1210, 1220, 1610, 1620, 1910H, 1920H, 1250. GE foundation natural sci course.			
1210	General Chemistry I	U	5
First course for science majors, covering dimensional analysis, atomic structure, the mole, stoichiometry, chemical reactions, thermochemistry, electron configuration, bonding, molecular structure, gases, liquids, and solids. Prereq: One unit of high school chemistry, and Math Placement Level L or M; or a grade of C- or above in Math 1120, 1130, 1131, 1148, 1150, or above. Not open to students with credit for 1220, 1620, 1920H, 1250, 1610, or 1910H. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.			
1220	General Chemistry II	U	5
Continuation of 1210 for science majors, covering solutions, kinetics, chemical equilibrium, solubility and ionic equilibria, qualitative analysis, thermodynamics, electrochemistry, descriptive chemistry, coordination compounds, and nuclear chemistry. Prereq: 1210, 1215, 1250, 1610, or 1910H, and Math Placement Level L or M; or a grade of C- or above in Math 1120, 1130, 1131, 1148, or 1150, or above; or credit for both Chem 1206 and 1208. Not open to students with credit for 1620, 1920H, 2310, 2510, 2610, or 2910H. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.			
1250	General Chemistry for Engineers	U	4
First course for engineering majors, covering dimensional analysis, atomic and molecular structure, the mole, stoichiometry, chemical reactions, states of matter, solutions, kinetics, equilibrium, acids and bases, thermodynamics, and electrochemistry. Prereq: One unit of high school chemistry; and Math Placement Level L or M, or a grade of C- or above in Math 1120, 1130, 1131, 1148, or 1150, or above. Not open to students with credit for 1210, 1610, 1910H, 2310, 2510, 2610, or 2910H. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.			
1610	General Chemistry for Majors I	U	5
First course for chemistry and biochemistry majors, covering dimensional analysis, atomic structure, the mole, stoichiometry, chemical reactions, thermochemistry, electron configuration, bonding, molecular structure, gases, liquids, and solids. Prereq: One unit of high school chemistry, and Math Placement Level L or M; or a grade of C- or above in Math 1120, 1130, 1131, 1148, or 1150, or above, and enrolled in Chemistry or Biochemistry major; or permission of department. Not open to students with credit for 1210, 1220, 1250, 1620, 1910H, or 1920H. GE nat sci phys course. GE foundation natural sci course.			
1612	Peer-led Team Learning for Chemistry 1610 Students	U	1
Provides a structure with which students can work actively in groups of 6 to 8 peers on challenging chemistry problems. This course will integrate with topics covered in Chemistry 1610. The activities will be challenging and relevant to course material and groups will work to discuss, collaborate, and answer questions in the activity. Concur: 1610. Not open to students with credit for 1220 (123), 1620 (162), 1920H (202H), or 1250 (125). This course is graded S/U.			
1620	General Chemistry for Majors II	U	5
Continuation of 1610 for science majors, covering solutions, kinetics, chemical equilibrium, solubility and ionic equilibria, qualitative analysis, thermodynamics, electrochemistry, descriptive chemistry, coordination compounds, and nuclear chemistry. Prereq: 1210, 1215, 1250, 1610, or 1910H; and a grade of C- or above in Math 1120, 1130, 1131, 1148, or 1150, or above, or Math Placement Level L or M; and enrollment in Chemistry or Biochemistry major; or permission of department. Not open to students with credit for 1220, 1920H, 2310, 2510, 2610, or 2910H. GE nat sci phys course. GE foundation natural sci course.			

78 Chemistry

1622	Peer-led Team Learning for Chemistry 1620 students	U	1		
	Provides a structure with which students can work actively in groups of 6 to 8 peers on challenging chemistry problems. This course will integrate with topics covered in Chemistry 1620. The activities will be challenging and relevant to course material and groups will work to discuss, collaborate, and answer questions in the activity. Concur: 1620. Not open to students with credit for 2510, 2610, or 2910H. This course is graded S/U.				
1910H	Honors General Chemistry I	U	5		
	Fundamental chemical principles and the chemistry of nonmetals for selected students. Prereq: ACT composite score of 30 or above, and ACT mathematics score of 30 or above, and ACT science reasoning score of 28 or above. Prereq or concur: Math 1141 or 1151 or above, or permission of instructor. Not open to students with credit for 1210 or 1610. GE nat sci phys course. GE foundation natural sci course.				
1920H	Honors General Chemistry II	U	5		
	Continuation of Chem 1910H for selected students covering fundamental principles and the chemistry of metals. Prereq: 1910H (202H). Not open to students with credit for 203H, 1220 or 1620. GE nat sci phys course. GE foundation natural sci course. NS Admis Cond course.				
2193	Individual Studies	U	1 - 5		
	A qualified student may conduct a minor investigation in chemistry. Prereq: Satisfactory courses in field of the problem and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.				
2194	Group Studies	U	1 - 6		
	Designed for students to pursue special studies in chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.				
2210	Analytical Chemistry I: Quantitative Analysis	U	5		
	Quantitative chemical analysis for chemistry majors; quantitative analysis of the elemental and molecular composition of complex systems. Prereq: 1220 (123), 1620 (163), or 1920H (203H), and Math Placement Level L, or a grade of C- or above in Math 1148 and 1149, or 1130 (130), 1131 (131), or 1150 (150), or above. Not open to students with credit for 2210H (221H). GE data only course. GE foundation math and quant reasoning or data anyl course.				
2210H	Honors Analytical Chemistry I: Quantitative Analysis	U	5		
	Honors version of quantitative chemical analysis for chemistry majors; quantitative analysis of the elemental and molecular composition of complex systems. Prereq: Honors standing, or permission of department or instructor; and 1220 (123), 1620 (163), or 1920H (203H), and Math Placement Level L, or a grade of C- or above in Math 1148 and 1149, or 1130 (130), 1131 (131), or 1150 (150), or above. Not open to students with credit for 2210 (221). GE data anyl course. GE foundation math and quant reasoning or data anyl course.				
2310	Introductory Organic Chemistry	U	4		
	A condensed presentation of organic chemistry organized by functional groups with an emphasis on practical applications. Prereq: 1110, 1220 (122), 1250 (125), 1620, or 1920H. Not open to students with credit for 2510 (251), 2610, or 2910H.				
2510	Organic Chemistry I	U	4		
	Introduction to structure, nomenclature, physical properties, preparation and reactions of alkanes, alkenes, alkynes, alcohols, ethers, epoxides, aldehydes and ketones. Other topics include stereochemistry, acids, bases, and reaction mechanisms. Prereq: 1220 (123), 1620 or 1920H (203H). Not open to students with credit for 252.				
2520	Organic Chemistry II	U	4		
	Continuation from 2510, including aromatic systems, carboxylic acids, carboxylic acid derivatives, amines, carbon-carbon bond-forming reactions, polymers, carbohydrates and amino acids. Prereq: 2510, 2610 (252) or 2910H (252H). Not open to students with credit for 2620 (253) or 2920H.				
2540	Organic Chemistry Laboratory I	U	2		
	Introduction to spectroscopic characterization, scientific writing, computational chemistry, and the laboratory techniques of organic chemistry, including synthesis, isolation, purification, and identification of organic compounds. Prereq or concur: 2510, 2610 or 2910H.				
2550	Organic Chemistry Laboratory II	U	2		
	Introduction to spectroscopic characterization, scientific writing, computational chemistry, and the laboratory techniques of organic chemistry, including synthesis, isolation, purification, and identification of organic compounds. Prereq: 2540 or 2940H. Prereq or concur: 2520, 2620, or 2920H.				
2610	Organic Chemistry for Majors I	U	4		
	Introduction to structure, nomenclature, physical properties, preparation and reactions of alkanes, alkenes, alkynes, alcohols, ethers, epoxides, aldehydes and ketones. Other topics include stereochemistry, acids, bases, and reaction mechanisms. Prereq: 1220 (123), 1620 (163), or 1920H (203H); and Chemistry or Biochemistry major, or permission of Department. Not open to students with credit for 252.				
2620	Organic Chemistry for Majors II	U	4		
	Continuation from 2610, including aromatic systems, carboxylic acids, carboxylic acid derivatives, amines, carbon-carbon bond-forming reactions, polymers, carbohydrates and amino acids. Prereq: 2510 (252), 2610, or 2910H; and Chemistry or Biochemistry major, or permission of Department. Not open to students with credit for 2520 (253), or 2920H.				
2910H	Honors Organic Chemistry I	U	4		
	Honors introduction to structure, nomenclature, physical properties, preparation and reactions of alkanes, alkenes, alkynes, alcohols, ethers, epoxides, aldehydes and ketones, including stereochemistry, acids, bases, and reaction mechanisms. Prereq: 1220 (123), 1620 (163), or 1920H (203H); Honors program or permission of department or instructor. Not open to students with credit for 2510, 2610, or 252H.				
2920H	Honors Organic Chemistry II	U	4		
	Continuation from 2910H, including aromatic systems, carboxylic acids, carboxylic acid derivatives, amines, carbon-carbon bond-forming reactions, polymers, carbohydrates and amino acids. Prereq: Honors standing, and 2910H (252H) or 252; or permission of department or instructor. Not open to students with credit for 2520, 2620, or 253H.				
2990	Intro to Chemical Research	U	1		
	A seminar course targeting chemistry majors focusing on the development of professional skills, conducting literature searches, writing research papers, and exploring careers and research options. Prereq: 1220, 1620, or 1920H, and English 1110.				
3510	Inorganic Chemistry	U	3		
	Introduction to the principles of inorganic structure and bonding, including molecular symmetry, atomic structure, ionic bonding, coordination complexes, magnetic properties, thermodynamics and reactivity, bioinorganic chemistry, and nanoparticles. Prereq: 2520 (253), 2620 (253), or 2920H (253H), or permission of instructor. Not open to students with credit for 652.				
4193	Individual Studies	U	1 - 5		
	A qualified student may conduct a minor investigation in chemistry. Prereq: Satisfactory courses in field of the problem and permission of instructor. Repeatable to a maximum of 15 cr hours or 5 completions. This course is graded S/U.				
4194	Group Studies	U	1 - 6		
	Designed for students to pursue advanced special studies in chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.				
4300	Physical Chemistry I	U	3		
	Quantum mechanics, spectroscopy, and statistical mechanics. Prereq: 2210, 2510, 2610, 2910H, or equiv, and Math 2153, and Physics 1200 or 1250. Prereq or concur: Math 2255.				
4310	Physical Chemistry II	U	3		
	Statistical thermodynamics, thermodynamic equilibrium, and chemical kinetics. Prereq: 4300.				
4410	Physical Chemistry Laboratory	U	3		
	Quantitative measurements of chemical phenomena and the application of chemical principles to their interpretation. It is recommended that students complete 1 physical chemistry course before taking this course. Prereq or concur: 4200 (520) or 4300 (530). Not open to students with credit for 541.				
4550	Inorganic Chemistry Laboratory	U	2		
	Preparation and characterization of inorganic compounds employing a variety of synthetic techniques. Prereq: 3510, or an undergraduate degree with Chem major, or permission of instructor.				
4870	Analytical Chemistry II: Instrumental Analysis	U	3		
	Applications of physico-chemical principles to problems in qualitative and quantitative chemical analysis. Prereq or concur: 4200 or 4300; or 520 or 530, and 541.				
4880	Instrumental Analysis Laboratory	U	2		
	Laboratory applications of physico-chemical principles to instrumental analysis. Prereq or concur: 4870 (587), or permission of instructor. Not open to students with credit for 588.				
4998	Undergraduate Research	U	1 - 10		
	Undergraduate research or creative activities in various topics. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 15 completions.				
4998H	Honors Undergraduate Research	U	1 - 10		
	Honors undergraduate research or creative activities in various topics. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 20 cr hrs or 15 completions.				
4999	Undergraduate Thesis Research	U	1 - 10		
	Undergraduate research or creative activities in various topics, culminating in a research thesis and oral defense. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions.				
4999H	Honors Undergraduate Thesis Research	U	1 - 10		
	Honors undergraduate research or creative activities in various topics, culminating in a research thesis and oral defense. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions.				
5193	Individual Studies	U G	1 - 10		
	Individual Studies. Prereq: Permission of instructor. Repeatable.				
5194	Group Studies	U G	1 - 10		
	Group Studies. Prereq: Permission of instructor. Repeatable.				

5230	Neurotransmitter Chemistry	U G	3		
	Come and explore the natural and unnatural organic molecules involved in neurotransmission. Through the study of synthetic strategies, mechanistic principles, and the structural requirements for biological activity, students will investigate the chemical world of endogenous molecules, pharmaceuticals, and drugs of abuse. Recommended prereqs: Chem 2550, and Biochem 4511 or 5613. Prereq: 2520, 2620, or 2920H, and 2540; or Grad standing; or permission of instructor.				
5240	Introduction to Protein Modeling	U G	3		
	This course provides a practical introduction to the theory and methods of molecular modeling and computational chemistry as it pertains to modeling large biological molecules such as proteins. Hands-on experience will be obtained by all attendees in doing molecular mechanics and modeling dynamic systems (molecular dynamics). Recommended prereq: Biochem 4511. Prereq: 2310, 2510, 2610, or 2910H; or Grad standing; or permission of instructor.				
5420	Spectroscopy of Organic Compounds	U G	1½		
	Exploration of the use of spectroscopy techniques for the determination of the structure of organic molecules, including UV/vis, IR, NMR, and MS. Prereq: 2520 (253), 2620 (253), or 2920H (253H), or equiv. Not open to students with credit for 632.				
5430	Carbohydrate Chemistry	U G	3		
	Introduction to synthesis, conformation, and biological importance of carbohydrates and oligosaccharides, including nomenclature, protecting groups, glycoside synthesis, biosynthesis and biology, and NMR methods. Prereq: 2520 (253), 2620, or 2920H (253H), or equiv.				
5440	Introduction to Computational Chemistry	U G	3		
	Introduction to fundamental concepts in computational chemistry, including molecular modeling, molecular dynamics, and semi-empirical and ab initio calculations. Prereq: 2520 (253), 2620 (253), or 2920H (253H), or equiv. Not open to students with credit for 644.				
5450	Practical NMR Spectroscopy	U G	1		
	This course focuses on the application of NMR Spectroscopy to the structure determination and dynamics of primarily synthetic organic and organometallic products. The practical aspects of acquiring optimized, high-quality data are still beneficial for analysis of these spectra and will be presented as lectures and demonstrations. Prereq: 5420, or permission of instructor.				
5520	Nanochemistry	U G	3		
	Introduction to fundamental concepts of nanoscience, exploring strategies for complex assemblies of molecules and developing computational techniques for the investigation of nanotech structures. Prereq: 1220 (123), 1620 (163), or 1920H (203H), and permission of instructor. Not open to students with credit for 611.				
6086	Advanced Chemistry Knowledge for Educators: Atomic Structure, Energy and Quantum Mechanics	G	5		
	For professionals and educators seeking an advanced understanding of General Chemistry content knowledge with consideration of how this understanding informs teaching and learning in College Credit Plus Chemistry courses. Topics typically found in the first semester of General Chemistry will be investigated. Prereq: Enrollment in Advanced Chemistry Knowledge for Educators certificate program, or permission of instructor.				
6087	Advanced Chemistry Knowledge for Educators: Bonding Models and States of Matter	G	4		
	For professionals and educators seeking an advanced foundational and historical understanding of General Chemistry content knowledge with consideration of how this understanding informs teaching and learning in College Credit Plus Chemistry courses. Prereq: Enrollment in Advanced Chemistry Knowledge for Educators certificate program, or permission of instructor.				
6088	Advanced Chemistry Knowledge for Educators: Kinetics, Thermodynamics, and Equilibrium	G	4		
	For professionals and educators seeking an advanced foundational and historical understanding of General Chemistry content knowledge with consideration of how this understanding informs teaching and learning in College Credit Plus Chemistry courses. Prereq: Enrollment in Advanced Chemistry Knowledge for Educators certificate program, or permission of instructor.				
6089	Advanced Chemistry Knowledge for Educators: Modern Applications & Instrumental Analysis	G	5		
	For professionals and educators seeking an advanced understanding of General Chemistry content knowledge with consideration of how this understanding informs teaching and learning in College Credit Plus Chemistry courses. Prereq: Enrollment in Advanced Chemistry Knowledge for Educators certificate program, or permission of instructor.				
6110	Survey of Instrumental Methods	G	1½		
	Introduction to instrumental analytical methods, including optical spectroscopy, mass spectrometry, surface spectrometry, microprobe methods, and separation science concepts relevant to chemical analysis. Not available for undergraduate credit.				
6120	Analytical Data Treatment - Statistical and Numerical Analysis	G	1½		
	Principles and practice of data acquisition, processing, and analysis in chemical research. Prereq: 4870 (587) or equiv. Not open to students with credit for 720.				
6310	Fundamentals of Coordination Chemistry	G	1½		
	Fundamental concepts of coordination chemistry, including properties, coordination number & isomerism, complex stability & the chelate effect, ligand substitution reactions, electron transfer, coordination chemistry & catalysis, magnetic phenomena.				
6320	Synthetic Principles in Inorganic Chemistry	G	1½		
	Synthesis, structure, and application of electron counting rules to organometallic clusters. Synthesis and structure of main group and transition metal hydrides. Applications in catalysis. Prereq: 3510 or equiv, or permission of instructor. Not open to students with credit for 753.				
6330	Group Theory and Bonding	G	1½		
	Introduction to groups and group representations, application to pi-bonding in organic molecules, molecular orbital theory, bonding in transition metal complexes, molecular vibrations, and electronic spectroscopy. Prereq: 3510 or equiv, or permission of instructor. Not open to students with credit for 851.				
6340	Physical Methods in Inorganic Chemistry	G	1½		
	Exploration of techniques for measuring structure and properties of small inorganic molecules and assemblies, including elemental composition, structural characterization, and physical properties. Prereq: 3510 or equiv, or permission of instructor. Not open to students with credit for 752.				
6410	Basic Organic Reaction Mechanisms	G	1½		
	Fundamental aspects of organic reaction mechanisms, including substitution & elimination reactions, alkene addition reactions, aromatic substitution, radical reactions, carbonyl chemistry, & pericyclic reactions. Not available for undergrad credit.				
6420	Stereochemistry and Conformational Analysis	G	1½		
	Fundamental principles of stereochemistry, including stereoisomerism, enantiomer resolution, conformational analysis of C-C and C-heteroatom bonds, cyclic stereochemistry, the stereochemistry of dynamic processes, and stereoelectronic effects. Prereq: 2520 (253), 2620 (253), 2920H, or equiv. Not open to students with credit for 730.				
6430	Introduction to Organic Synthesis	G	1½		
	Principles and reactions in the synthesis of organic molecules, acidity and basicity, chemistry of carbonyl groups, oxidation and reduction, electrophilic and nucleophilic reagents, functional group interconversions, and protecting group chemistry. Prereq: 2520, 2620, 2920H, or equiv. Not open to students with credit for both 832 and 833.				
6440	Introduction to Physical Organic Chemistry	G	1½		
	Fundamental principles and concepts in physical organic chemistry, including structure and bonding, strain and stability, solvation and non-covalent interactions, acid-base chemistry, and methods for studying reaction mechanisms. Prereq: 2520 (253), 2620 (253), 2920H, or equiv, and 4210 (521), 4310 (531), or equiv; or permission of instructor. Not open to students with credit for both 731 and 831.				
6510	Quantum Mechanics and Spectroscopy	G	1½		
	Introduction to the fundamentals of quantum mechanics with applications to chemical dynamics and spectroscopy, suitable for graduate students and advanced undergraduates from all areas of chemistry. Not available for undergraduate credit.				
6520	Thermodynamics	G	1½		
	Fundamental aspects of chemical thermodynamics, including spontaneous change, 1st, 2nd, and 3rd laws of thermodynamics, free energy, and thermochemical calculations. Prereq: 4310 (532) or equiv. Not open to students with credit for 775.				
6530	Kinetics	G	1½		
	Description of the rate of chemical reactions, including rate equations, mechanism, and transition state theory. Prereq: 4310 (532) or equiv. Not open to students with credit for 775.				
6540	Introduction to Electronic Structure	G	1½		
	Introduction to electronic structure of atoms and molecules, and quantum-chemical calculations, including self-consistent field methods, molecular orbital theory, density functional theory, and other methods for describing electron correlation. Prereq: 4310 or equiv. Not open to students with credit for 866.				
6550	Atmospheric Chemistry	G	3		
	Chemistry of the lower atmosphere, including air pollution and climate change, chemistry and kinetics of atmospheric oxidants, heterogeneous chemical mechanisms, tropospheric and stratospheric gas and particulate phases relative to ozone depletion. 231 or 251 recommended. Prereq: 1220 (123), 1620, 1920H, or equiv, and 4200, 4300, or equiv. Not open to students with credit for 641.				
6780	Faculty Research Presentations	G	1		
	Presentation of faculty research programs and projects to incoming doctoral students. Not available for undergraduate credit. This course is graded S/U.				
6781	Laboratory Safety	G	1		
	Principles of safety in the chemical laboratory. Prereq: Not open to students with credit for 685. This course is graded S/U.				
6782	Ethics in Scientific Research	G	1		
	An examination of the ethical principles operative in modern scientific research. This course is graded S/U.				
6790	Scientific Writing	G	2		
	A successful researcher is someone who knows both how to do their science, and also how to effectively communicate their findings through the written and spoken word. The purpose of this course is to introduce students to the processes involved in professional or scholarly publication. Prereq: Permission of instructor. Not open to students with credit for Micrbio 6790. Cross-listed in Microbio.				

80 Chemistry

7120	Electrochemistry	G	3
Electrochemical methods for trace analysis of species, including current/voltage relationships based on activation and diffusion control, electrode kinetics, and reaction mechanisms. Prereq: Not open to students with credit for 821.			
7130	Fundamentals and Techniques of Separation Science	G	3
Introductory course in analytical separation science: principles of chromatographic and electrophoretic processes. Prereq: Not open to students with credit for 822.			
7140	Analytical Spectroscopy	G	3
Principles for measurement of interactions of electromagnetic radiation with matter, including classical & quantum mechanical principles, group theory, and principles and applications of atomic and molecular spectroscopy. Prereq: Not open to students with credit for 823.			
7150	Mass Spectrometry	G	3
Advanced course on modern mass spectrometric methods and applications to chemical and biological sciences. Prereq: Not open to students with credit for 825.			
7160	Nuclear Magnetic Resonance Spectroscopy	G	3
Introduction to NMR spectroscopy for structural studies including nuclear magnetic resonance spectroscopy in the context of chemical and biochemical structural studies. Prereq: Not open to students with credit for 824.			
7170	Surface and Interface Science	G	3
Introduction to basic concepts, instrumentation, and techniques for the chemical and physical analysis of surfaces and interfaces.			
7230	Chemical Biology	G	1½
Graduate-level treatment of the fundamentals of chemical biology, including enzymes, drug and probe design, diversification methodology, and proteomics.			
7310	The Inorganic Chemistry of Bioinspired Energy Conversion	G	1½
This course will give an overview of important energy conversion reactions in nature as well as those modeled chemically and discuss the implications of these processes in the context of environmental concerns. Fundamentals and applications of spectroscopic techniques that have been of particular utility for understanding the natural and model systems will also be covered.			
7320	Organometallic Chemistry	G	1½
Chemistry of organometallic compounds, main group elements (Li, Mg, Al, Sn, Pb), comparisons of Zn, Hg, & Mg, multiple bonding, transition metals, classification of ligands, pi-bonding, metallocenes, carbenes, carbynes, H ₂ , and agostic complexes. Prereq: Not open to students with credit for 751.			
7330	Solid State Chemistry	G	1½
Structures of extended solids, including defects and phase diagrams and phase transitions. Prereq: Not open to students with credit for 754.			
7340	Diffraction Methods	G	1½
Exploration of techniques and application for determination of solid state structures, including X-ray absorption and diffraction methods, neutron diffraction methods, single crystal structure determination, and powder diffraction.			
7350	Inorganic Photochemistry	G	1½
Fundamental aspects of molecular photophysical processes, including energy and electron transfer, photochemistry of inorganic complexes, and applications.			
7360	Bioinorganic Chemistry	G	1½
Study of the role of metals in biological systems, including iron and copper proteins, other metals including Zn, Co, Ni, Mg, and Ca, metal ion homeostasis, metals and nucleic acids, and cellular toxicity and medical applications of heavy metals. Prereq: Not open to students with credit for 752.			
7380	Inorganic Materials	G	1½
Study of the electronic and magnetic properties of extended solids, including organic and metal-organic arrays. Prereq: Not open to students with credit for 754.			
7450	Metals in Organic Synthesis	G	1½
This course presents the elementary reactions of organotransition metal complexes and their applications as catalysts in organic synthesis. Discussed reactions include: olefin functionalization, carbonylative reactions, C-H functionalization, C-C and C-X cross coupling, photoredox catalysis, allylic substitution, alkene metathesis.			
7460	Advanced Organic Reaction Mechanisms	G	1½
Advanced study of physical aspects of reactions of organic compounds, including addition and elimination reactions, substitution reactions, photochemical reactions, and quantum mechanical approaches to chemical bonding. Prereq or concur: 7440. Not open to students with credit for 831.			
7470	Computational Chemistry	G	1½
A practical and theoretical treatment of advanced computational chemistry, from molecular mechanics to electronic structure methods and with an examination of the application of computational methods for providing guidance to experimental studies. Prereq: Permission of instructor. Not open to students with credit for 944.			

7520	Advanced Quantum Mechanics	G	3
Advanced study of the quantum mechanics of atoms and molecules, including quantum postulates and operators, time evolution, perturbation theory and variational methods, calculation of matrix elements, representations, and multiplet theory.			
7530	Advanced Molecular Spectroscopy	G	3
Application of quantum mechanics to the description and interpretation of molecular spectroscopic data, with an emphasis on the spectra of polyatomic molecules.			
7540	Chemical Dynamics	G	3
Advanced chemical dynamics in the gas and condensed phase, including the fundamental theory of chemical reactions, molecular energy transfer, and electron and proton transfer reactions. Prereq: Not open to students with credit for 876.			
7550	Statistical Thermodynamics	G	3
Treatment of equilibrium & non-equilibrium stat mech, including fundamentals, statistical basis of thermodynamics, partition functions, thermal behavior of atoms & molecules, free energy, time-dependent stat mech, and linear response theory. Prereq: Not open to students with credit for 880.			
7580	Lasers, Optics, and Optical Instrumentation	G	3
Fundamentals of lasers, optics, and optical instrumentation used in modern experimental research in chemistry and physics including: lasing and gain, pulse generation, geometric and Gaussian optics, spatial modes, and detection.			
7590	Molecular Simulation of Materials	G	3
Advanced theoretical foundation and techniques for molecular dynamics and Monte Carlo simulation of condensed phases, including interaction models, dynamical foundations, equilibrium properties, biological systems, and transport coefficients. Prereq: Permission of instructor. Not open to students with credit for 996.			
8199	Advanced Topics in Analytical Chemistry	G	1½ - 3
Advanced, specialized topics in Analytical Chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions.			
8399	Advanced Topics in Inorganic Chemistry	G	1½ - 3
Advanced, specialized topics in Inorganic Chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions.			
8499	Advanced Topics in Organic Chemistry	G	1½ - 3
Advanced, specialized topics in Organic Chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions.			
8599	Advanced topics in Physical Chemistry	G	1½ - 3
Advanced, specialized topics in Physical Chemistry. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions.			
8699	Advanced Topics in Chemical Education	G	1½ - 3
Advanced, specialized topics in Chemical Education. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions.			
8891	Analytical Chemistry Seminar	G	1
Seminar in Analytical Chemistry. Repeatable to a maximum of 14 cr hrs. This course is graded S/U.			
8892	Biochemistry Seminar	G	1
Seminar in Biochemistry. Repeatable to a maximum of 14 cr hrs. This course is graded S/U.			
8893	Inorganic Chemistry Seminar	G	1
Seminar in Inorganic Chemistry. Repeatable to a maximum of 14 cr hrs. This course is graded S/U.			
8894	Organic Chemistry Seminar	G	1
Seminar in Organic Chemistry. Repeatable to a maximum of 14 cr hrs. This course is graded S/U.			
8895	Physical Chemistry Seminar	G	1
Seminar in Physical Chemistry. Repeatable to a maximum of 14 cr hrs. This course is graded S/U.			
8998	Non-thesis Research	G	1 - 15
Non-thesis graduate research. Repeatable. This course is graded S/U.			
8999	Thesis/Dissertation Research	G	1 - 15
Graduate research for thesis or dissertation. Repeatable. This course is graded S/U.			

Chinese

1101.01	Level One Chinese I: Classroom Track	U	4
Mandarin Chinese spoken communication and writing system. Classroom Track. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Au Sem. Prereq: Not open to students with credit for 101 and 102. This course is available for EM credit. GE for lang course. GE world languages course.			

1101.51 Level One Chinese I: Individualized Track U 1 - 4

Mandarin Chinese spoken communication and writing system. Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Au, Sp, Su Sem. Prereq: Not open to students with credit for 101 and 102. Repeatable to a maximum of 4 cr hrs or 4 completions. This course is available for EM credit. GE for lang course. GE world languages course.

1101.61 Level One Chinese I: Individualized Track Online U 1 - 4

Mandarin Chinese spoken communication and writing system. Online individualized track. Progress is sequential from one credit hour to the next with a demonstrated proficiency at the level of 80% required for advancement. Course closed to native speakers of this language. Prereq: Not open to students with credit for 1101.01, 1101.02, or 4 cr hrs of 1101.51 or 1101.61. Credits from 1101.51 and 1101.61 may be combined for this restriction. Repeatable to a maximum of 4 cr hrs. GE for lang course.

1102.01 Level One Chinese II: Classroom Track U 4

Continuation of 1101.01. Classroom Track. Closed to native speakers of this language, or students with 3 or more years of study in this language in high school. Prereq: 1101.01, or 1101.02, or 4 cr hrs of 1101.51, or permission of instructor, or Chinese Placement Level 8. This course is available for EM credit. GE for lang course. GE world languages course.

1102.51 Level One Chinese II: Individualized Track U 1 - 4

Continuation of 1101.51. Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Prereq: 1101.01 or 1101.02, or 4 cr hrs of 1101.51, or permission of instructor. Not open to students with credit for 1102 (102). Repeatable to a maximum of 4 cr hrs or 4 completions. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1102.61 Level One Chinese II: Individualized Track Online U 1 - 4

Prereq: 1101.01 or 1101.02 or 4 cr hrs of 1101.51 or 1101.61, or permission of instructor. Credits from 1101.51 and 1101.61 may be combined to meet this requirement. Not open to students with credit for 1102.01, 1102.02, or 4 cr hrs of 1102.51 or 1102.61. Credits from 1102.51 and 1102.61 may be combined for this restriction. Repeatable to a maximum of 4 cr hrs. GE for lang course.

1103.01 Level Two Chinese I: Classroom Track U 4

Mandarin Chinese second level spoken communication, development of reading skills, and written composition. Classroom Track. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Prereq: 1102.01 or 1102.02, or 4 sem cr hrs of 1102.51, or permission of instructor, or Chinese Placement Level 7. Not open to students with credit for 1103. This course is available for EM credit. GE for lang course. GE world languages course.

1103.51 Level Two Chinese I: Individualized Track U 1 - 4

Mandarin Chinese second level spoken communication, development of reading skills, and written composition. Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Prereq: 1102.01 or 1102.02, or 4 cr hrs of 1102.51, or permission of instructor. Not open to students with credit for 1103 or 104. Repeatable to a maximum of 4 cr hrs or 4 completions. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1103.61 Level Two Chinese I: Individualized Track Online U 1 - 4

Mandarin Chinese second level spoken communication, development of reading skills, and written composition. Online individualized track. Progress is sequential from one credit hour to the next with a demonstrated proficiency of 80% required for advancement. Course not open to native speakers of this language. Prereq: 1102.01 or 1102.02 or 4 cr hrs of 1102.51 or 1102.61, or permission of instructor. Credits from 1102.51 and 1102.61 may be combined to meet this requirement. Not open to students with credit for 1103.01, 4 cr hrs of 1103.51 or 1103.61. Credits from 1103.51 and 1103.61 may be combined for this restriction. Repeatable to a maximum of 4 cr hrs. GE for lang course.

2102 Level Two Chinese II: Classroom Track U 5

Continuation of 1103. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Sp Sem. Prereq: 1103. Not open to students with credit for 2102 (205 and 206). This course is available for EM credit. FL Admis Cond course.

2141.01 Intensive Level Two Chinese-Oral: Classroom Track U 4

First course in the sequence of intensive intermediate Chinese language courses focusing on speaking and listening. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Au Sem. Prereq: 1102.01, or 1102.02, or 4 cr hrs in 1102.51, or permission of instructor, or Chinese Placement Level 6. Not open to students with credit for 1103.xx or 2141.02. This course is available for EM credit. GE for lang course. GE world languages course.

2141.02 Intensive Level Two Chinese-Oral: Summer Intensive Track U 4

First course in the sequence of intensive intermediate Chinese language courses focusing on speaking and listening. Admission to SPEAC is required for registration. Students must complete 4 credits during first 3.5 weeks of the summer session. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Prereq: 1102.01, or 1102.02, or 4 cr hrs for 1102.51, or permission of instructor, or Chinese Placement Level 6. Not open to students with credit for 1103, or 2141.01. This course is available for EM credit. GE for lang course. GE world languages course.

2151.01 Intensive Level Two Chinese-Written: Classroom Track U 5

First in the sequence of intensive intermediate Chinese language courses focusing on written Chinese. Classroom track. Au sem. Prereq: 1102.01, or 1102.02, or 4 cr hrs for 1102.51, or permission of instructor, or Chinese Placement Level 6. Not open to students with credit for 1103, or 2151. This course is available for EM credit.

2151.51 Intensive Level Two Chinese-Written: Individualized Track U 1 - 5

First in the sequence of intensive intermediate Chinese language courses focusing on written Chinese. Individualized track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Closed to native speakers of this language, or to students with 3 or more years of study in this language in high school. Au, Sp, Su. Prereq: 1102.01 or 1102.02, or 4 cr hrs for 1102.51, or permission of instructor. Not open to students with credit for 1103 (211) or 2151 (311). Repeatable to a maximum of 5 cr hrs or 5 completions. This course is available for EM credit. FL Admis Cond course.

2151.61 Online Intensive Second Level - Written Chinese: Individualized U 1 - 5

First in the sequence of intensive intermediate Chinese language courses focusing on written Chinese. Online individualized track. Course not open to native speakers of this language. Au, Sp, Su. Prereq: 1102.01, or 1102.02, or 4 cr hrs of 1102.51, or 1102.61, or permission of instructor, or Chinese Placement Level 6. Credits from 1102.51 and 1102.61 may be combined to meet this requirement. Not open to students with credit for 1103.01, or 2151.01, or 5 cr hrs of 2151.51 or 2151.61, or 4 cr hrs of 1103.51 or 1103.61. Credits from 1103.51 and 1103.61 may be combined for this restriction, as can credits from 2151.51 and 2151.61. Repeatable to a maximum of 5 cr hrs or 5 completions.

2231 Traditional Chinese Culture U 3

Chinese institutions, philosophical trends, religion, literature, and visual and performing arts prior to the 20th century. Prereq: Not open to students with credit for 231. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.

2232 Modern Chinese Culture U 3

Modern Chinese culture as reflected in family life, language, literature, art, and film viewed from the perspective of modern Chinese history. Taught in English. Prereq: Not open to students with credit for 232. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.

2283 Chinese Calligraphy U 3

Techniques of writing Chinese characters with a brush; practice in different styles from oracle bone to grass; introduction to its importance in the Chinese culture, and its relationship with Chinese philosophy, poetry, and painting. Prereq: Not open to students with credit for 283.

2451 Chinese Literature in Translation U 3

Representative masterpieces of pre-modern Chinese literature in English translation, including poetry, prose, fiction, and/or drama. Prereq: Not open to students with credit for 251. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

	Examination of the Chinese script, covering its origin, classification, composition, and development, as well as such topics as standardization, script reform, romanization, and internet language; taught in English. Prereq: 1102 or equiv, or permission of instructor.				
4402	Traditional Chinese Fiction in Translation	U	3		
	Examines novels and short stories from the Ming and Qing dynasties. Taught in English. Prereq: Not open to students with credit for 502. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.				
4403	Modern Chinese Literature in Translation	U	3		
	Chinese fiction and/or drama from the late 19th century to the present. Taught in English. Prereq: Not open to students with credit for 503. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.				
4404	Chinese Drama	U	3		
	Representative works of Chinese drama in translation, taught with a focus either on premodern drama or on modern drama, depending on the instructor's area of interest and expertise. Taught in English. Prereq: Not open to students with credit for 504. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.				
4405	China in Chinese Film	U	3		
	An overview of Chinese cinema, with a focus on how film represents issues of nationhood, national identity, and national trauma. Taught in English, no Chinese required. Prereq: English 1110 or equiv. Not open to students with credit for 505. GE VPA and diversity global studies course. GE foundation lit, vis and performing arts course.				
4406	China Pop: Contemporary Popular Culture and Media in Greater China	U	3		
	Introduces students to contemporary popular culture and media from Greater China, encouraging independent research and critical discussion of topics covered. Prereq: Not open to students with credit for 506.				
4407	Eco-literature in China	U	3		
	Addresses changing conceptions of the environment in China as expressed in oral and written literature.				
4998	Undergraduate Research Project	U	3		
	Focused research toward completion of an original project. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.				
4998H	Honors Undergraduate Research Project	U	3		
	Focused research toward completion of an original project. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.				
4999	Undergraduate Research Thesis	U	3		
	Focused research toward completion of an original thesis. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.				
4999H	Honors Undergraduate Research Thesis	U	3		
	Focused research toward completion of an original thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.				
5101.01	Level Four Chinese I: Classroom Track	U G	3		
	Level Four Chinese; continuation of 4102, or 4142 and 4152. Classroom Track. Au Sem. Prereq: 4152.01; and 4102 or 4142.01 or 4142.02 or 4 cr hrs for 4152.51, or permission of instructor. Not open to students with credit for 610 and 611.01. This course is available for EM credit. FL Admis Cond course.				
5101.51	Level Four Chinese I: Individualized Track	U G	1 - 3		
	Level Four Chinese; continuation of 4102, or 4142 and 4152. Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Prereq: 4152.01; and 4102 or 4142.01 or 4142.02 or 4 cr hrs for 4152.51, or written permission of instructor. Not open to students with credit for 610 or 611.51. Repeatable to a maximum of 3 cr hrs or 3 completions. This course is available for EM credit. FL Admis Cond course.				
5101.61	Online Level 4 Chinese I: Individualized Instruction	U G	1 - 3		
	Level Four Chinese; continuation of 4102, or 4142 and 4152. Online Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Course closed to native speakers of this language. Prereq: One of the following: 4102; or both 4142.01 and 4152.01; or 4142.01 and 5 cr hrs of 4152.51 or 4152.61; or concur registration in 4152.51 or 4152.61 for the number of credits to complete 4152.51 or 4152.61 within the same semester; or permission of instructor. Not open to students with credit for 5101.01, or 3 cr hrs of 5101.51 or 5101.61. Repeatable to a maximum of 3 cr hrs.				
5102.01	Level Four Chinese II: Classroom Track	U G	3		
	Level Four Chinese; continuation of 5101.01. Sp Sem. Prereq: 5101.01, or 3 cr hrs for 5101.51, or permission of instructor. Not open to students with credit for 611 or 612.01. This course is available for EM credit. FL Admis Cond course.				
5102.51	Level Four Chinese II: Individualized Track	U G	1 - 3		
	Level Four Chinese; continuation of 5101.51. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Au, Sp, Su Sems. Prereq: 5101.01, or 3 cr hrs for 5101.51, or permission of instructor. Not open to students with credit for 611 and 612. Repeatable to a maximum of 3 cr hrs or 3 completions. This course is available for EM credit. FL Admis Cond course.				
5102.61	Online Level 4 Chinese II: Individualized Instruction	U G	1 - 3		
	Level Four Chinese; continuation of 5101. Online Individualized Track. Progress is sequential from one cr hr to the next with a demonstrated proficiency at the level of 80% required for advancement. Course closed to native speakers of this language. Prereq: One of the following: 5101.01; or 3 cr hrs of either 5101.51 or 5101.61; or concur registration in 5101.51 or 5101.61 for the number of credits to complete 5101.51 or 5101.61 within the same semester; or permission of instructor. Not open to students with credit for 5102.01, or 3 cr hrs of 5102.51 or 5102.61. Repeatable to a maximum of 3 cr hrs.				
5103	Level Five Chinese I	U G	3		
	Level five Chinese first semester. Immersion in all four skills using the novel and TV series "Spring Grass" by Qiu Shanshan. Covers 1st half of book and TV series. Focuses on oral narration skills. Chinese only. Prereq: 5102 or equiv. This course is available for EM credit.				
5104	Level Five Chinese II	U G	3		
	Level five Chinese second semester. Completing the novel and TV series "Spring Grass"; focus on written composition skills. Chinese only. Completion of this class (or equivalent) required for taking master's level Chinese language classes. Prereq: 5103 or equiv. This course is available for EM credit.				
5105.51	Selected Readings in Scholarly Chinese Texts I: Individualized Track	U G	1 - 3		
	Academic writings by modern Chinese scholars in both Wenyan and Baihua styles. Prereq: 5102.01 or 5102.51, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 4 completions.				
5105.61	Selected Readings in Scholarly Chinese Texts I: Individualized Track Online	U G	1 - 3		
	Academic writings by modern Chinese scholars in both wenyan and baihua styles. Individualized online. Prereq: 5102.01 or 5102.51 or 5102.61, or permission of instructor. Not open to students with credit for 5105.01 or 3 credits of 5105.51 or 5105.61. Repeatable to a maximum of 3 cr hrs.				

5106.51	Selected Readings in Scholarly Chinese Texts II: Individualized Track	U G	1 - 3
Continuation of 5105.01 or 5105.51. Academic writings by modern Chinese scholars in both Wenyan and Baihua styles. Prereq: 5105.01 or 5105.51, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 4 completions.			
5106.61	Selected Readings in Scholarly Chinese Texts II: Individualized Track Online	U G	1 - 3
Continuation of 5105. Academic writings by modern Chinese scholars in both wenyan and baihua styles. Individualized instruction online. Prereq: 5105.01, or 3 cr hrs of 5105.51 or 5105.61; or permission of instructor. Not open students with credit for 5106.01 or 3 cr hrs of 5106.51 or 5106.61. Repeatable to a maximum of 3 cr hrs.			
5111	Classical Chinese I	U G	3
Analysis of selected texts in classical Chinese from pre-Qin times. Prereq: Level Two Chinese or equiv, or permission of instructor. Not open to students with credit for 601 and 602.			
5112	Classical Chinese II	U G	3
Continuation of 5111. Close reading of selected texts from pre-Qin and later times. Prereq: 5111, or equiv and permission of instructor. Not open to students with credit for 602 and 603.			
5194	Und/Grad Group Studies	U G	1 - 3
Group investigation of issues in Chinese studies designed for a mix of undergraduate and graduate students. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
5380	Introduction to Chinese Linguistics	U G	3
Investigation of the phonology, morphology, syntax, semantics, lexicon, and writing system of the Chinese language; and exploration of some topics relating language to cognition, society, and gender. Prereq: Permission of instructor. Not open to students with credit for 680.			
5381	History of the Chinese Language	U G	3
Investigation of the history of the Chinese language from its early stages to modern forms. Prereq: 6380, or permission of instructor. Not open to students with credit for 681.			
5383	The Chinese Writing System	U G	3
Origin, classification, composition, and development of the Chinese writing system; exploration of related topics such as language reform, reading and processing of Chinese characters. Prereq: 6380, or permission of instructor. Not open to students with credit for 683.			
5389	Topics on the Chinese Language	U G	3
Exploration of topics and issues concerning the Chinese language -- language and society, language and politics, language and gender, language and identity, bilingualism, languages of China; taught in English. Prereq: 1102 or equiv, or permission of instructor. Repeatable to a maximum of 3 cr hrs.			
5400	Performance Traditions of China	U G	3
Introduction to the panorama of oral and orally-connected performance traditions of China; explores local traditions of professional storytelling, epic singing, folksongs, and local drama. Prereq: 2231, 2232, 2451, 2452, EALL 1231, Japanese 2231, 2451, 2452, Korean 2231, 2451, or permission of instructor. Not open to students with credit for 600.			
5474	Chinese Opera	U G	3
Introduction to Chinese opera as traditional culture, dramatic literature, and performing art; selected opera scripts and stage performances from Beijing opera, Kunqu, and regional operas; illustrated discussions of various aspects of the theater. Prereq: Not open to students with credit for 674.			
5490	Chinese Translation Workshop	U G	1 - 4
Investigation of problems and techniques of translating Chinese into English. Prereq: 4102 or 5112, or permission of instructor. Repeatable to a maximum of 8 cr hrs or 2 completions.			
5670	Literary Language in Modern Mandarin	U G	3
Level seven Chinese. Use of literary Chinese in modern speech and writing. Chinese only. Prereq: Permission of Instructor. This course is available for EM credit.			
5798.02	Study Tour: Foreign	U G	8 - 24
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Repeatable for different titled study tours only. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 3 completions.			
6193	Individual Studies	G	1 - 3
Directed study to meet individual research needs of students in Chinese studies. Not a substitute for regular language courses. Prereq: 4102 or 5112, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
6194	Group Studies	G	1 - 3
Group investigation of issues in Chinese studies. Varying topics. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			
6451	History of Chinese Literature I	G	3
Chinese literature from antiquity to the end of the Tang dynasty; various aspects of the classical tradition and new developments in the Age of Disunity. Taught in English. Partial texts in Chinese optional. Prereq: Written permission of instructor for undergrads. Not open to students with credit for 651.			

6452	History of Chinese Literature II	G	3
Chinese literature from the Five Dynasties to the Qing; poetry, prose, drama, and the rise of vernacular writings. Taught in English. Partial texts in Chinese optional. Prereq: Written permission of instructor for undergrads. Not open to students with credit for 652.			
6453	Classical Chinese Literature in Modern China	G	3
Examines adaptations and uses of classical Chinese literature (novels, plays, poems, prose) in the modern Chinese-speaking world. Prereq: Written permission of instructor for undergrads. Not open to students with credit for 653.			
6998	Research in Chinese: Project	G	1 - 3
Research leading to the completion of a project other than a conventional MA thesis. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.			
6999	Research in Chinese: Thesis	G	1 - 3
Research leading to the completion of an MA thesis. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
7382	Chinese Phonology	G	3
The phonetics and phonology of modern (Mandarin) Chinese; study of other Chinese dialects for comparative purposes. Prereq: 6380; or permission of instructor.			
7384	Chinese Syntax	G	3
The syntactic structure of modern (Mandarin) Chinese; related topics such as syntax-semantics interface. Prereq: 6380; or permission of instructor.			
7385	Chinese Dialects	G	3
Investigation of the linguistic structures of major Chinese dialects from a cross-dialectal, comparative approach; related topics in multilingualism, language planning, language contact, code-switching, vernacular literacy and dialect-writing. Prereq: 6380; or permission of instructor.			
7386	Chinese Semantics	G	3
Introduction to the semantic description and analysis of the Chinese language, including related topics such as Chinese pragmatics and syntax-semantics interface. Prereq: 5380, or permission of instructor.			
7463	Modern Chinese Fiction	G	3
Introduction to the history of Chinese fiction from the late Qing to 1949. Prereq: 6451, 6452; or permission of instructor. Not open to students with credit for 763.			
7466	Lu Xun	G	3
Readings in the essays, prose poetry, and fiction of Lu Xun. Prereq: 7463; or permission of instructor.			
7467	Taiwan Literature	G	3
Introduction to the literature of Taiwan from 1900 to the present. Prereq: 6451, 6452, 7463; or permission of instructor.			
7470	Ethnic Literature and Culture in China	G	3
Examines poetry, prose, and other cultural expressions related to ethnic minority groups in China. Prereq: 6451, 6452, or 7463, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
7615	Chinese Perspectives on Chinese Civilization	G	3
Level seven Chinese. Mainstream Chinese perspectives on major issues in Chinese civilization. Commonly recognized ways to presenting viewpoints and arguments on relevant topics. Chinese only. Prereq: 5104 or equiv. Repeatable to a maximum of 6 cr hrs. This course is available for EM credit.			
7617	Analysis of Contemporary Chinese Media	G	3
Level six Chinese. Developing familiarity with major contemporary Chinese media and the ability to analyze chosen topics from a specific medium. Chinese only. Prereq: 5104 or equiv. Repeatable to a maximum of 6 cr hrs. This course is available for EM credit.			
7650	Negotiating in Chinese Culture	G	3
Level Seven Chinese. Chinese in spontaneous professional discourse, emphasizing oral presentation based on readings in Chinese business practices and professional negotiation. Prereq: 5104, or permission of instructor. Not open to students with credit for 750. This course is available for EM credit.			
7655	Language in China	G	3
Level six Chinese. Language issues in China, including language variation, writing systems, minority languages, and Chinese language issues in the information age. Chinese only. Prereq: 5104 or equiv. Repeatable to a maximum of 6 cr hrs. This course is available for EM credit.			
7660	Interpersonal Relations and Professional Networking	G	3
Level six Chinese. Exploration of assumptions and expectations motivating behaviors in Chinese and American cultures when developing interpersonal relations and professional networks. Prereq: 5104 or equiv. Repeatable to a maximum of 6 cr hrs. This course is available for EM credit.			
7671.51	Familiarity with Domain Resources and Research	G	5
Level five Chinese. Individualize research with mentor. Development of research topic. Chinese only. Prereq: 5106 or equiv. Not open to students with credit for 771.51. This course is available for EM credit. This course is progress graded.			

84 Chinese

7672.51	Domain Research and Presentation of a Project	G	5
Level six Chinese. Individualize research with mentor. Development of research project. Chinese only. Prereq: 5104 or equiv. Not open to students with credit for 772.51. This course is available for EM credit. This course is progress graded.			
8500	Chinese Bibliography and Research Methods	G	3
An introduction to bibliographies and reference works in Chinese Studies; general and specific problems for research. Prereq: Not open to students with credit for 800.			
8897	Departmental Seminar	G	1 - 3
Seminar in Chinese literature, linguistics, or pedagogy; topic varies. Prereq: 5111 or 5112; or 6451 or 6452; or permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions.			
8998	Research in Chinese: Project	G	1 - 3
Research leading to the completion of a project other than a conventional dissertation. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
8999	Research in Chinese: Dissertation	G	1 - 3
Research leading to the completion of a dissertation. Prereq: Permission of instructor. Repeatable to a maximum of 20 or hrs or 8 completions. This course is graded S/U.			

City and Regional Planning

1100	CRP Survey	U	1
Introduction to the University, the Knowlton School of Architecture and the professions of architecture, city and regional planning, and landscape architecture. Prereq: Not open to students with credit for 1100, 100, Arch 1100 (100), 1100E, 100H, LArch 1100 (100), 1100E, or any survey course. Cross-listed in Arch and LArch.			
2000	Introduction to City and Regional Planning	U	3
How transportation, housing, and land use work together to create vibrant cities and regions.			
2100	Reading the City through History and Law	U	3
An intensive investigation of cities' complex cultures and societal rules and the role of history and law in shaping their development.			
2110	Creating Innovative Cities and Regions	U	3
Successful cities rely on innovation to keep them forward-moving. Emerging trends and unmet market needs are studied to generate innovative planning solutions.			
2210	Sustainable Urbanism	U	3
Globalization is changing cities, economies, social networks, and the environment. Technological innovation, entrepreneurship, and policy making guides the future of sustainable cities. Prereq: Not open to students with credit for 2210E.			
2210E	Sustainable Urbanism	U	3
Globalization is changing cities, economies, social networks and the environment. Technological innovation, entrepreneurship and policy making guides the future of sustainable cities. Prereq: Honors standing. Not open to students with credit for 2210.			
2600	Designing Communication for Planning	U	4
Graphic tools and techniques used for effective visual communication in planning. Projects focus on creative problem solving to communicate planning to a mass audience.			
2630	Planning for Future Cities	U	3
Cities are constantly evolving over time as new forms of technology, governance, and other factors occur. Students will explore Utopian concepts, learn how to help cities develop in a positive way, be familiar with current and emerging technology trends that affect cities, and gain inspiration from the many variations of futuristic cities envisioned in the science fiction genre.			
2798	Comparative Studies in Planning	U	3
Planning issues are global in context. Through direct experience studying globalization, migration, sustainability, and public participation, critically understand planning on a global and community scale. Repeatable to a maximum of 9 or hrs.			
3000	Planning Resilient Environments	U	3
Environmental resilience requires a comprehensive planning approach. Through planning techniques and practices, identify practical applications for creating resilient environments.			
3100	Analyzing the City	U	3
Spatial, economic, and demographic tools aid in forecasting the future of cities and regions. These tools serve as a foundation for imagining the future. Prereq: CSE 1111, and Econ 2001.01; or permission of instructor.			
3150	Digital Design and Analysis for Planners	U	2
Basic principles of computer drafting and Geographic Information Systems (GIS) and their application in the professional planning office for the purpose of design, analysis, and representation of the built environment.			
3194	Group Studies in City and Regional Planning	U	1 - 15
Group-based study of city and regional planning topics within the frame of an instructor guided course. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			

3200	Place Making	U	4
Vibrant public places and sustainable communities are realized when planners visualize and understand spatial relationships at the site, neighborhood and community level.			
3200E	Place Making	U	4
Vibrant public places and sustainable communities are realized when planners visualize and understand spatial relationships at the site, neighborhood and community level.			
3210	Sustainable Urban Planning Policy and Practice	U	3
This is an undergraduate course on sustainable urban planning policy and practice. The course has been designed to provide theory and practice based experiences regarding the concept of sustainable development as it relates to planning. The focus of the course will be on the relationship between land use planning and sustainable development, although other planning subjects will be addressed. GE theme sustainability course.			
3300	Planning for and with People	U	3
Application of skills and techniques of community participation, emphasizing education, group formation and dynamics, consultation, engagement, and creative change within groups. Prereq: 2000, 2110, or permission of instructor.			
3310	Participation, Inclusion and Dispute Resolution in Planning	U	3
Participatory planning processes often take place in communities that are socially, economically and culturally diverse. This course advances students' understanding of, and ability to implement, inclusive and engaging planning processes in contexts of diversity and (deep) difference. This course builds on the process design skills students developed in CRP 3300. Prereq: 3300 or permission of instructor.			
3400	Planning for Sustainable Economic Development	U	3
Understand the intersection of economics, the environment, and development in order to use planning tools to promote sustainable economic development. Prereq: Econ 2001.01, 2001.02 (200), 2001.03H, or ADEcon 2001.			
3500	The Socially Just City	U	3
Too many cities are split between the haves and the have-nots. Explore how to reduce poverty, increase access to public services, and create a high quality of life for all residents. GE soc sci orgs and politics and diversity soc div in the US course. GE foundation social and behavioral sci course.			
3510	Crime, Safety and the Urban Environment	U	3
Crime and public safety are critical issues which are essential to the health and vitality of neighborhoods. CRP 3510 explores the intersection of the built environment, neighborhood design, city planning, structural discrimination and identity in influencing exposure to crime or violence and perceptions of safety. GE foundation race, ethnicity and gender div course.			
3550	Environmental Planning and Policy for a Sustainable Future	U	3
This course has been designed to incorporate environmental considerations into land use planning and policy making. Upon completion of this course students should be able to analyze environmentally related planning problems not requiring in-depth environmental expertise and recognize when such expertise is necessary. Strongly recommend 2000 or 2110.			
3600	Land Development Planning	U	3
Planners shape cities. The land development process requires understanding the impacts of new development and redevelopment in order to reimagine more vibrant sites.			
3610	Sex and the City	U	3
Explores sex in the city, examining spaces, institutions, and policies that influence sex as a land use.			
3620	The Underground City	U	3
If the surface of the Earth became uninhabitable, people could be forced to live underground to survive. A plan will be conceived and developed in order to perpetuate the human race. Strongly recommend 2000, 2110, or 3000.			
4110	Transportation and Land Use Planning	U	3
Communities integrate transportation while promoting economic development and land-use policies to manage growth. Improve the efficiency of travel and contain infrastructure costs. Prereq: 2000, 2110, or permission of instructor.			
4191S	Planning Internship	U	1
Internship seminar providing students with an opportunity to reflect and learn about career opportunities in city and regional planning. Prereq: Permission of instructor. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
4193	Independent Studies in City and Regional Planning	U	1 - 15
Study a specialized topic in city and regional planning with an instructor based on mutual interests. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
4194	Group Studies in City and Regional Planning	U	1 - 15
Group-based study of city and regional planning topics within the frame of an instructor guided course. Prereq: Jr or Sr standing. Repeatable to a maximum of 15 cr hrs or 4 completions.			
4597	The Global Environment in Planning	U	3
A review of challenges in developed and developing countries, examining planning issues associated with economic development, social equity, growth and rural development. GE cross-disciplinary seminar course. GE theme citizenship for div and just wrld course.			

City and Regional Planning 85

<p>4674 The City as Art U 3</p> <p>This course will examine the ways that cities throughout the world integrate arts and culture into their planning, as well as whether being a cultural city can build the brand, draw new residents and attract visitors. We will investigate cultural tourism, urban cultural policy and temporary built culture such as festivals and fairs. Team-taught with faculty in ArtEduc. Cross-listed in ArtEduc.</p> <p>4780 Undergraduate Research Methods U 3</p> <p>Quantitative, qualitative and design methods for undergraduate level city and regional planning research.</p> <p>4780H Undergraduate Research Methods U 3</p> <p>Quantitative, qualitative and design methods for undergraduate level city and regional planning research. Honors section. Prereq: Honors standing.</p> <p>4798 Planning Study Abroad U 1 - 15</p> <p>Rapid globalization of cities creates new opportunities to explore, investigate and analyze urban development internationally. Repeatable to a maximum of 15 cr hrs or 2 completions.</p> <p>4798E Study Tour U 1 - 15</p> <p>Group international and domestic travel programs opportunities tailored to complement the classroom experience. Prereq: Honors standing. Repeatable to a maximum of 45 cr hrs or 3 completions.</p> <p>4900S Plan Making U 6</p> <p>Plan creation focuses on working with real-world clients. Planning knowledge and skills will be applied to generate creative, innovative, and practical solutions. Strongly recommended 2600, 3100, 3150, 3200, 3300, 3600. Prereq or concur: 3300, and acceptance into CRPlan BS major; or permission of instructor.</p> <p>4910S Realizing the Plan U 6</p> <p>Apply knowledge and skills to an implementation challenge. Work in consultation with professionals to produce a regulation, policy, or tool for use by the client. Prereq: 3300, and acceptance into CRPlan BS major; or permission of instructor.</p> <p>4950 Professional Planning Skills Development U 3</p> <p>Professional skills including technical writing, public speaking, portfolio development, conflict resolution, and contracts as essential preparation for practice. Strongly recommended 2600, 3100, 3150, 3200, 3300, 3600. Prereq: 3300, and acceptance into CRPlan BS major; or permission of instructor. Repeatable to a maximum of 15 cr hrs.</p> <p>4998 Research in Planning U 1 - 15</p> <p>Research on city and regional planning issues. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.</p> <p>4999 Undergraduate Thesis in City and Regional Planning U 6</p> <p>Development of topical research/design projects with an interdisciplinary perspective. Prereq: Permission of instructor.</p> <p>4999H Undergraduate Thesis in City and Regional Planning U 6</p> <p>Course allows for development of topical research/design projects with an interdisciplinary perspective. Prereq: Honors standing, and 4780H.</p> <p>5001 Introduction to GIS for Planning U G 4</p> <p>The course introduces basic principles and techniques of Geographic Information System (GIS) in city and regional planning. The course focuses on developing hands-on experience of GIS applications in planning. It is also designed to cultivate spatial thinking and help students to gain an understanding of cutting-edge geospatial technologies, their capabilities, uses, and limitations for planning. Prereq: Not open to students with credit for CivilEn 5400 or Geog 5210.</p> <p>5010 Historic Preservation Planning U G 3</p> <p>Cities are rich in history. Policies, incentives and planning aid in preserving unique historic character and heritage of cities.</p> <p>5160 Green Building Methods for Planning U G 1</p> <p>This course focuses on green building methods, techniques and practices and how they can be applied to city planning practice. Particular attention is paid to LEED-certification, a program that recognizes building practices that save money, reduce water consumption, make better material choices, have higher property values, and overall have fewer negative impacts on the environment. This course is graded S/U.</p> <p>5170 Planning & Zoning in Local Government U G 1</p> <p>The purpose of this course is to learn about how city planning and zoning are used as practical tools for municipal governance. This course will explore topics from the perspective of what local elected and appointed leaders need to know to effectively guide a municipality, navigate codes and laws, and promote public engagement and civil discourse. This course is graded S/U.</p> <p>5180 TechniCity U G 3</p> <p>The way we understand cities is undergoing sweeping transformation, right along with the analytical tools we use to design our cities and the communication tools we use to engage people. Absorbing, studying and understanding the role of technology from a critical viewpoint allows us to generate creative ideas for improving our cities. Prereq: Jr, Sr, or Grad standing.</p>	<p>5191 Professional Experience in City and Regional Planning U G 0</p> <p>Professional practice in the field of city and regional planning or suitable related areas. Prereq: Permission of instructor. Repeatable to a maximum of 6 completions. This course is graded S/U.</p> <p>5193 Independent Studies in City and Regional Planning U G 1 - 15</p> <p>Study a specialized topic in City and Regional Planning with an instructor based on mutual interests. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.</p> <p>5194 Group Studies in City and Regional Planning U G 1 - 15</p> <p>Group-based study of City and Regional Planning topics within the frame of an instructor guided course. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 4 completions.</p> <p>5200 Metropolitan and Regional Planning U G 3</p> <p>Cities and towns are becoming increasingly dependent on each other. Progressive approaches to regional planning directly influence the economy and quality of life.</p> <p>5250 Regional Economic Development Theory and Policy U G 3</p> <p>Economy is a fundamental dimension of cities and urban planning, and we need to understand what causes economic growth or development. This course will introduce some major theories of regional economic development. How the public sector can facilitate this economic development is another important question, and we will assess some policy tools and their effectiveness. Econ 2001 credit recommended.</p> <p>5300 Airport Planning, Design and Development U G 3</p> <p>A comprehensive study of airport planning, design and development, the role of the airport and its components as part of the overall air transportation system, the issues related to the planning, design, and development of the airport and its system. Prereq: Aviatn 3000 or CRPlan 3100; or Sr standing in CivilEn major; or Grad standing; or permission of instructor. Cross-listed in Aviatn and CivilEn.</p> <p>5320 Transportation Data Analytics for Planners U G 3</p> <p>In this course, students will analyze data for the purpose of planning transportation infrastructure. Students will build expertise in innovative transportation data collection (such as drones), improve familiarity with publicly available transportation data sources, develop basic R coding skills to visualize transportation data, and consider careers as transportation planning analysts.</p> <p>5400 Planning for Housing U G 3</p> <p>Housing - including its uses, meaning, design, and role. The creation of a range of housing to support growth and revitalization of cities and regions. Prereq: Not open to students with credit for 320, 752, or PubAfrs 5400. Cross-listed in PubAfrs.</p> <p>5461 Latino Urbanism and the Reinvention of the American City U G 3</p> <p>Interdisciplinary course that examines a new trend of urbanism based on the urban experiences of Latinos and the study of this group's social, economic, and cultural impact on cities across the US. Taught in English. Team-taught course. Prereq: Completion of 2nd GE Writing course, and Jr or Sr standing; or permission of instructor. Not open to students with credit for 4461 or Spanish 4461 or 5461. Cross-listed in Spanish.</p> <p>5500 Energy Planning U G 3</p> <p>Energy makes cities run, from renewable and non-renewable sources. Energy is a driving opportunity and constraint in urban development. Completion of CRPlan 3000 is strongly recommended.</p> <p>5550 Financing Sustainability U G 3</p> <p>This course examines sustainability through the lens of financing. The primary foci are two important elements of green infrastructure - food systems and clean energy. Students will explore the systems and industry behind food and energy and develop comprehensive road maps that communities can use to build robust and financially supported supported sustainability systems for food and energy. Prereq: CRPlan 3400, Grad standing, or permission of instructor.</p> <p>5600 Advanced Urban Planning Survey Collection, Management, and Analysis Methods U G 3</p> <p>Collection, management, and analysis of survey data fundamental to urban planning and transportation research and practice. Design of survey questionnaires and fielding of surveys in diverse urban areas. Structuring and linking data pertaining to various units of measure in a database. Introduction to analysis techniques for data types commonly collected in surveys and multi-wave survey data. Prereq: 3100 or CivilEn 3700, or equiv.; or Grad standing; or permission of instructor.</p> <p>5700 Urban Transportation Demand Forecasting U G 3</p> <p>Introduction and applications for quantitative demand forecasting in urban transportation. Prereq: Math 1118 or equiv, or Grad standing. Not open to students with credit for 775 or CivilEn 5700 (775). Cross-listed in CivilEn.</p> <p>5798 Planning Study Abroad U G 1 - 15</p> <p>Rapid globalization of cities creates new opportunities to explore, investigate and analyze urban development internationally. Repeatable to a maximum of 15 cr hrs or 2 completions.</p> <p>5880 Interdepartmental Seminar U G 1 - 15</p> <p>Interdepartmental seminar; topics to be announced. Repeatable to a maximum of 15 cr hrs or 5 completions. Cross-listed in Arch and LArch.</p>
---	--

86 City and Regional Planning

5890 Workshop in City and Regional Planning U G 1 - 15

Workshop on city and regional planning issues. Repeatable to a maximum of 15 or hrs or 5 completions.

5900 Food System Planning and the Economy U G 3

Examines the social, environmental and economic costs and benefits of our food production, distribution, and consumption. Prereq: Not open to students with credit for AEDEcon 5900 or PubAfrs 5900. Cross-listed in AEDEcon and PubAfrs.

5960 Design Competition U G 1 - 6

Interdisciplinary teams develop design proposals to solve problems in the natural or built environment. Prereq: Jr, Sr, or Grad standing. Repeatable to a maximum of 9 or hrs or 3 completions. Cross-listed in Arch and LArch.

5997 Planning in the Developing World U G 3

What changes when we take our plans to the developing world? This course will lead you from Brazil to Nigeria to India to find out - with lots of stops in between. It combines historical and global perspectives on international development theory with real-world case studies that will force you to consider difficult tradeoffs and make tough choices.

6000 Historical Foundations of Planning G 3

The people, movements, and principles which have shaped contemporary planning practice. Historical successes and failures mean for the future of planning. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 643.

6080 Advanced GIS for Professional Planning Practice G 4

In-depth and hands-on training in GIS applications for city and regional planning. Prereq: 5001 and Grad standing, or permission of the instructor. Not open to students with credit for 608 or 609.

6100 Participation and Advocacy in Planning G 3

Planning theories that support the planner's role in engaging and advocating for the public. Skills in public engagement techniques and tools. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 712.

6191S Professional Development G 1

Provides successful candidates with a broad but intensive learning experience in various areas of city and regional planning. The program is designed to prepare individuals for professional planning positions. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.

6193 Independent Studies in City and Regional Planning G 1 - 12

Study a specialized topic in City and Regional Planning with an instructor based on mutual interests. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.

6194 Group Studies in City and Regional Planning G 1 - 15

Group-based study of City and Regional Planning topics within the frame of an instructor guided course. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.

6200 Graphic Visualization G 4

Fundamental skills in graphics and graphic technology commonly used in planning, including on-line, print, document, poster, and video layout and design. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 702.

6300 Law and Planning I: Land Use G 3

The impact of law on planning, with an emphasis on the regulation of land use. Prereq: Grad standing, or permission of the instructor. Not open to students with credit for 761.

6310 Law and Planning II: Environment and Society G 3

The role of social and environmental justice and other societal considerations in the establishment of a legal framework in planning. Prereq: 6300 (761), and Grad standing; or permission of instructor. Not open to students with credit for 765 or 766.

6350 The Socially Just City G 3

Poverty reduction, access to public services and improving quality of life are goals to achieving the socially just city. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 3500.

6400 Site Planning and Development G 4

Effective site planning can lead to the development of a strong community. Learn the design, environmental and infrastructure elements that are needed to generate a feasible development project. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 745.

6410 Planning for Sustainable Development G 3

Sustainable development is a broad concept; translated into reality through relevant theory and the implementation of key design, policy and project based solutions. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 724.

6420 Infrastructure Planning G 3

Infrastructure development plans address the planning, budgeting and programming challenges of making cities run. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 783.

6425 Measuring Resilience to Disasters for Planning G 3

This course focuses on concepts, elements, theory, and applications for resilience to disasters in urban and regional planning. Students will develop quantitative analytical skills in resilience assessment through various methods, including resilience indicators, cost-benefit analysis, econometric analysis, and simulation analysis. Prereq: Grad standing, or permission of instructor.

6430 Urban Design G 3

Vibrant cities contribute to quality of life, through urban design and urban form. Site analysis, context sensitive design and impacts of design choices are explored. Prereq: Grad standing, or permission of the instructor. Not open to students with credit for 731.

6440 Research Methods for Urban Design and Planning G 3

Behavioral research and evaluation (research design, validity, reliability, data gathering techniques) methods for urban design and planning questions. Prereq: Grad standing, or permission of the instructor. Not open to students with credit for 734.

6460 Real Estate Finance for Planners G 3

Realize plans by understanding the financial mechanisms to fund projects. Explore how public-private partnerships create opportunities for affordable housing, downtown revitalization, and neighborhood improvement. Prereq: Grad standing, or permission of instructor. Cross-listed in PubAfrs.

6500 Plan Making and Analysis Techniques G 3

Collection and analysis of information used to make plans, including population projections and economic activity. Prereq: Grad standing, or permission of instructor.

6500.02 Data and Forecasting for Planning G 2

Models and methods used in the analysis and projection of population and employment, and the major data sources for such analyses, including data shortcomings and problems of comparability. The use of data and projection methodologies by planners, with an emphasis on translating results into policy implications that are understandable by the non-technical reader. Prereq: Permission of instructor.

6600 Evaluation Methods in City and Regional Planning G 3

City and regional planners routinely plan and evaluate public sector interventions which generally take the form of physical infrastructure projects or public policies and programs. This course offers an overview of the concepts, methods, and metrics used to anticipate the impact and evaluate the trade offs of proposed projects, policies, and programs. Prereq: Grad standing, or permission of instructor.

6610 Grant Writing in the Public Sector G 3

Public officials rely on grants to help fund their grand plans. Planners find grants, prepare proposals, and manage grants to effectively support public projects. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 837 or PubPolM/PubAfrs 880.06. Cross-listed in PubAfrs 7501.

6620 Project Management in the Public Sector G 3

Public officials recognize the importance of project management in organization success. Management of complex, high-risk, high-visibility public projects is examined. Prereq: Grad standing, or permission of instructor. Cross-listed in PubAfrs 7555.

6750 Resolving Social Conflict G 3

Multidisciplinary examination of social conflict, its dynamics and negotiated and consensual resolution; offers broad-based framework for diagnosing and managing conflict; applied to legal, environmental, organizational, and geopolitical conflicts. Prereq: Grad standing, or permission of instructor.

6798 Planning Study Abroad G 1 - 15

The world is rapidly globalizing. Exploring global cities provides a rich perspective that can be used to evaluate domestic and international planning challenges. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.

6910 Comprehensive Planning Studio G 6

Application of knowledge and skills to a comprehensive planning process in consultation with professionals to produce a plan for use by a real world client. Prereq: 6400 (745) and 6500 (762), or permission of instructor. Not open to students with credit for 853.

6950 Transportation Studio G 6

Planning for transportation requires an examination of environmental, social, and economic factors, as well as active engagement of decision makers and transportation users alike. Course cannot be taken concurrently with other studio courses (6920, 6930, 6960, or 6970). Prereq: 6400 (745) and 6500 (762), or permission of instructor. Not open to students with credit for 852.

6960 Sustainability Studio G 6

Planning for sustainability requires systems thinking, strategic solutions and collaborative governance. Sustainability plans will be generated through active engagement with a client community. Course cannot be taken concurrently with other studio courses (6920, 6930, 6950, or 6970).

6970 International Development Studio G 6

Cities and regions across the globe are rapidly urbanizing and are facing planning challenges. Plan development focuses on developing context-sensitive solutions. Course cannot be taken concurrently with other studio courses (6920, 6930, 6950, or 6960). Prereq: 6400 and 6500, or permission of instructor.

6999	Research for Thesis in City and Regional Planning	G	1 - 12
Research for Thesis in City and Regional Planning. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is progress graded (S/U).			
7000	Contemporary Planning Research	G	3
Introduction and overview of topics and techniques in planning research. Prereq: Grad standing. Not open to students with credit for 871.01.			
7100	City & Regional Planning Theory	G	3
Critical inquiry into the dominant theories related to city and regional planning research and practice. Prereq: Grad standing. Not open to students with credit for 864.01.			
7110	Development Theory	G	3
Critical inquiry into the classic debates and critiques of development theory related to planning research and practice in developing countries. Prereq: Grad standing.			
7194	Group Studies in City and Regional Planning	G	1 - 15
For group-based study of city and regional planning topics within the frame of an instructor guided course. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions.			
7300	Planning Dissertations and Theses from Start to Finish	G	3
Covers the full dissertation/thesis process: topic selection, refinement, proposal development, literature review, methods, data collection/analysis, presenting and publishing, getting a job, life on the job. Prereq: Enrollment in the City and Regional Planning PhD program, or permission of instructor.			
7509	Disasters: Preparedness and Response	G	3
Introduction to planning, policy, and management issues that arise when disaster strikes, and the roles of government, non-profits, communities, and individuals in emergency preparedness by examining a variety of recent natural and human-made disasters, both in the U.S. and abroad. Cross-listed in PubAfrs.			
7531	Economic Development Policy	G	3
Takes a practical approach to the legal, policy, and business issues related to urban redevelopment. Students gain a legal perspective as they investigate business and public policy issues surrounding redevelopment in our urban core. Prereq: Not open to students with credit for PubAfrs 880.02. Cross-listed in PubAfrs.			
7890	City and Regional Planning Colloquium	G	1
The CRP Colloquium provides a forum for learning about recent changes in urban planning practice and the emergence of alternative models intended to spur and manage growth and change in cities and regions. Prereq: Enrollment in Master of City and Regional Planning or City and Regional Planning PhD program. This course is graded S/U.			
8193	Independent Studies in City and Regional Planning	G	1 - 15
Study a specialized topic in City and Regional Planning with an instructor based on mutual interests. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.			
8194	Group Studies in City and Regional Planning	G	1 - 15
Group-based study of City and Regional Planning topics within the frame of an instructor guided course. Prereq: Grad standing. Repeatable to a maximum of 15 cr hrs or 5 completions.			
8200	Teaching Practicum in City and Regional Planning	G	0 - 9
A hands on teaching experience in conjunction with a city and regional planning faculty member. Includes syllabus development, course preparation, lecture, discussion experience, and grading review. Prereq: Grad standing. Not open to students with credit for 990.			
8300	General Practicum in City and Regional Planning	G	0 - 9
Supervised field experience in city and regional planning; analysis and critique of field experience. Prereq: Grad standing. Not open to students with credit for 990.			
8999	Research for Dissertation in City and Regional Planning	G	1 - 15
Research for Doctoral Dissertation Purposes. Prereq: Enrollment in the City and Regional Planning PhD program. Repeatable to a maximum of 32 cr hrs or 10 completions. This course is graded S/U.			

Civil Engineering

2050	Probabilistic Applications and Data Interpretation in Civil and Environmental Engineering	U	3
Fundamentals of probability and statistical analysis for applications and data interpretation in Civil and Environmental Engineering design and analysis. Prereq: Enrollment in CivilEn or EnvEng major.			
2060	Numerical Analysis Methods for Civil and Environmental Engineering Applications	U	4
Implement numerical solution techniques using computer programming in MATLAB and apply them to a variety of problems related to Civil Engineering. Prereq: 2050 or Stat 3450, 3460, or 3470; and Math 2173, 2177, 2255, or 2415; and enrollment in CivilEn or EnvEng major.			

2090	Professional Aspects of Civil and Environmental Engineering	U	1
Topics in Civil and Environmental Engineering ethics and practice. Must be taken as soon as possible upon entering the major. Prereq: Enrollment in CivilEn or EnvEng major. Not open to students with credit for 460 or EnvEng 460. Cross-listed in EnvEng.			
2193	Individual Studies in Civil Engineering	U	1 - 5
Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
2194	Group Studies in Civil Engineering	U	1 - 5
Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
2405	Computer Graphics for Civil Engineers	U	1
An introductory course in graphics with emphasis on the application on computer generated graphics to the solution of civil engineering problems. AutoCAD and Civil 3D or similar software to be used. Prereq: Enrollment in pre-CivilEn program, or permission of instructor. Not open to students with credit for Engr 4410.01 or FABEng 3171.			
2410	Introduction to Surveying	U	3
An introduction to surveying and geomatics, with an emphasis on basic spatial data collection and construction layout using ground-based measurement techniques. Must be taken as soon as possible upon entering the major. Prereq or concur: 2050 or Stat 3450, 3460, or 3470; and enrollment in CivilEn or EnvEng major.			
2810	Construction Engineering and Management: An Introduction	U	3
Basic engineering and management concepts of construction operations of various foundations, concrete, and steel buildings and bridges. Prereq: Enrollment in CivilEn major. Not open to students with credit for 682.			
3080	Economic Evaluation and Optimization in Civil and Environmental Engineering	U	3
Fundamentals of engineering economics and optimization for civil and environmental engineering planning and design. Prereq or concur: 2060 (406), and enrollment in CivilEn or EnvEng major. Not open to students with credit for 576 or EnvEng 576. Cross-listed in EnvEng.			
3130	Fluid Mechanics	U	3
An introduction to fluid mechanics; topics include: fluid properties; fluid statics; flow concepts; continuity, energy, and momentum equations; dimensional analysis; basic pipe flow; lab experiments. Prereq: MechEng 2010 or 2040, and enrollment in CivilEn, EnvEng, or FABEng major; or permission of instructor.			
3160	Water Resources Engineering	U	3
Pipe systems, introduction to open channel flow, basic hydrology, demographic studies, water supply, and wastewater flows. Prereq: 3130 (413) or EnvEng 413; and CSE 1221 (205) or 1222 (202) or EnGraph 167 or Engr 1221 or 1222 or 1281H or Engineer; and enrollment in CivilEn or EnvEng major. Not open to students with credit for 516 or EnvEng 516.			
3310	Structural Engineering Principles	U	3
Structural forms and loads, statically determinate structures, and trusses, internal loadings developed, influence lines for statically determinate structures, cables and arches, elastics beam deflections, energy methods. Prereq: MechEng 2020, and enrollment in CivilEn major. Prereq or concur: 2050 or Stat 3450, 3460, or 3470; or permission of instructor.			
3510	Civil Engineering Materials	U	3
Composition and Characterization of civil engineering materials - concretes, asphalts, plastics, fiber-reinforced composites; elastic, plastic, visco-elastic, and failure characterization under various environmental and mechanical loading conditions. Prereq or concur: 2050 or Stat 3450 or 3460 or 3470, and MechEng 2020, and enrollment in CivilEn major; or permission of instructor.			
3530	Learning From Disasters: Extreme Events and Their Impact on Infrastructure, Engineering and Society	U	4
Introduction to six dimensions of sustainability while learning the main impacts and threats caused by various extreme events through the study of academic publications and reports covering six major extreme events. Long term impacts and recovery from extreme events, how historical decisions in planning, engineering and/or urban development, legislation play important roles. Prereq: Not open to students with credit for EarthSc 3530. GE theme sustainability course. Cross-listed in EarthSc.			
3540	Geotechnical Engineering	U	2
The properties of soils as construction materials (e.g., for earth dams) and as foundations for building are introduced and state-of-the-art numerical techniques for the prediction of seepage and settlement are presented. Contemporary issues such as the impact of soil failure mechanisms and sustainability are covered. Prereq: MechEng 2020 or 2040, and enrollment in CivilEn or EnvEng or FABEng major. Concur: CivilEn 3541. Prereq or concur: CivilEn 2050 or Stat 3450, 3460, or 3470; or permission of instructor.			
3541	Geotechnical Engineering Laboratory	U	1
Laboratory determination of soil properties including grain size distribution, plasticity, permeability, compaction and shear strength (both drained and undrained). Course must be taken concurrently with 3540, 5561, or 5571. The 3541 course requirement may be waived in 5561 and 5571 by the instructor, if the student demonstrates previous completion of a similar lab program. Concur: 3540, 5561, or 5571.			

88 Civil Engineering

3700	Transportation Engineering and Analysis	U	3		
	Introduction to mathematical analysis and design of various transportation engineering topics: scheduled services, sight distance, geometric design, freeway capacity, traffic flow and queuing, signalized intersections. Prereq: 2050 or Stat 3450, 3460, or 3470, and enrollment in CivilEn major; or permission of instructor.				
4001	Civil Engineering Capstone I	U	2		
	Part 1 of the two semester course sequence for the culminating design component in the curriculum for students in Civil Engineering. Must be taken in semester preceding 4002, with sequence completed as close to graduation as possible. Prereq: 2050 or Stat 3450, 3460, or 3470; and CivilEn 2060, 2405, 2410, 2810, 3080, 3130, 3160, 3310, 3510, 3541, 3700, and 4320 or 4350, and EnvEng 3200; and enrollment in CivilEn major. Not open to students with credit for 4000.01.				
4002	Civil Engineering Capstone II	U	2		
	Part 2 of the two semester course sequence for the culminating design component in the curriculum for students in Civil Engineering. Must be taken in semester immediately following 4001, with sequence completed as close to graduation as possible. Prereq: 4000.01 or 4001. Not open to students with credit for 4000.02.				
4011	Civil Engineering Global Capstone I	U	2		
	Part 1 of a two semester course sequence satisfying the culminating design component in the curriculum for students in Civil Engineering set in a global development context. Must be taken in sequence with CivilEn 4012, taken as close to graduation as possible. Prereq: 2410, 2810, 3080, 3130, 3160, 3310, 3510, 3540, 3541, 3700, 4320 or 4350, and EnvEng 3200; or permission of instructor.				
4012	Civil Engineering Global Capstone II	U	2		
	Part 2 of a two semester course sequence satisfying the culminating design component in the curriculum for students in Civil Engineering set in a global development context. Must be taken in semester immediately following CivilEn 4011 with sequence taken as close to graduation as possible. Prereq: 4011, and Sr standing; or permission of instructor.				
4191.01	Civil Engineering Internship I	U	1		
	An engineering work experience with an approved employer for minimum of 10 hours per week for approximately 15 weeks. Typically taken during the autumn or spring academic terms. To earn credit students must demonstrate satisfactory work performance, complete monthly reporting requirements and submit a final report. Prereq: Enrollment in the Civil Engineering major, and permission of instructor. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.				
4191.02	Civil Engineering Internship II	U	2		
	An engineering work experience with an approved employer for minimum of 30 hours per week for approximately 15 weeks. Typically taken during the summer academic term. To earn credit students must demonstrate satisfactory work performance, complete monthly reporting requirements and submit a final report. Prereq: Enrollment in the Civil Engineering major, and approval of the Civil Engineering Internship Advisor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.				
4193	Individual Studies in Civil Engineering	U	1 - 5		
	Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4194	Group Studies in Civil Engineering	U	1 - 5		
	Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
4210	The Physics of Sustainable Buildings	U	3		
	Equips students to understand and properly model the drivers of energy consumption and human exposure to airborne pollutants in buildings. Overview of the physical laws governing transport processes in buildings. Methods of modeling these processes that are specific to buildings, including energy balances, mass balances and their constituents. Prereq: 3130 and Math 2174, 2177, or 2415; or permission of instructor.				
4310	Structural Analysis	U	3		
	Deflection in trusses, beams, and frames. Solution of Indeterminate Structures by methods of consistent deformations and moment distribution. Beam and truss analysis using stiffness method. Prereq: 3310 (431). Not open to students with credit for 531.				
4320	Structural Steel Design	U	3		
	Design of steel tensile members, compression members, beams, beam-columns, and bolted and welded connections based on AISC Specifications. Design problem solving. Introduction to computer-aided design. Prereq: 3310 (431), and enrollment in CivilEn major. Not open to students with credit for 532.				
4350	Reinforced Concrete Design	U	3		
	Analysis and design of reinforced concrete beams, one-way slabs and columns under flexure, shear and axial loads. Prereq: 3310 (431), and enrollment in CivilEn major. Not open to students with credit for 535.				
4552	Design and Construction of Flexible Pavements	U	3		
	The design, manufacturing, placement, compaction and maintenance of hot mix asphalt for roadways with coverage on how to determine and specify which mixture to use for a given application. Sustainable roadway design is also covered. Prereq: 3510 (451); and Math 2250 (255), 2415 (415) or 2177. Not open to students with credit for 552.				
4800	Project Management in Civil Engineering	U	3		
	Comprehensive guide to project management methods, tools, and techniques. Prereq: Jr standing, and enrollment in CivilEn major.				
4998	Undergraduate Research in Civil Engineering	U	1 - 5		
	Opportunity for undergraduate students to conduct research in Civil and Environmental Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4998H	Undergraduate Research in Civil Engineering	U	1 - 5		
	Opportunity for undergraduate honors students to conduct research in Civil and Environmental Engineering. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4999	Civil Engineering Research for Thesis	U	1 - 5		
	Supervised research and project work. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4999H	Civil Engineering Research for Thesis	U	1 - 5		
	Supervised research and project work arranged individually for honors students. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
5162	Introduction to Laminated Composite Materials	U G	3		
	Introduction to anisotropic material behavior and failure assessment of laminated composite materials. Classical lamination theory, beams, plates and shells. Prereq: MechEng 2020 (420) or 2040; or Grad standing in Engineering; or permission of instructor. Not open to students with credit for 662, 762, MechEng 5162, 662, or 762. Cross-listed in MechEng.				
5168	Introduction to the Finite Element Method	U G	3		
	Basic concepts, formulation, and application of finite element techniques for numerical solution of problems of engineering and scientific interest. Prereq: 2060, Math 2568, 2174, or 2177, or equiv., or Grad standing in Engr or Math. Not open to students with credit for MechEng 5168 or Math 5168. Cross-listed in Math.				
5194	Group Studies in Civil Engineering	U G	1 - 5		
	Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
5220	Open Channel Hydraulics	U G	3		
	Flow classifications, channel properties, energy and momentum principles, critical flow, uniform flow formulas, erodible and nonerodible channel design, and gradually-varied profile computations. Prereq: 3160 (516) or EnvEng 516; and Math 2177, or 2415 and 2568. Not open to student with credit for 722.				
5230	Transport Phenomena in Water Resources Engineering	U G	3		
	Study of the mechanisms by which momentum, heat, and mass are transported in fluid systems of interest to water resources engineers. Prereq: 3160 (516) or EnvEng 516, and Math 2173, 2177, 2255 (255), or 2415 (415). Not open to students with credit for 723.				
5240	Groundwater Engineering	U G	3		
	The role of groundwater in the hydrologic cycle, water supply, construction, and contamination. Includes principles describing subsurface water movement (seepage, saturated, and unsaturated flow). Emphasis on gaining a working knowledge of techniques used in applied engineering practice to estimate groundwater parameters for design purposes. Applications include well design, pumping, and drains. Prereq: 3130, or Grad standing; or permission of instructor. Not open to students with credit for 750.				
5300	Airport Planning, Design, and Development	U G	3		
	A comprehensive study of airport planning, design & development, the role of the airport and its components as part of the overall Air Transportation System, and the issues related to the planning, design, and development of the airport and its systems. Prereq: Aviatn 3000 or CRPlan 3100, or Sr standing in CivilEn major, or Grad standing, or permission of instructor. Cross-listed in Aviatn and CRPlan.				
5320	Intermediate Structural Steel Design	U G	3		
	Design of bolted and welded building connections; structural behavior in the nonlinear range; plastic analysis and design of steel structures. Prereq: 4320.				
5350	Intermediate Reinforced Concrete Design	U G	3		
	Analysis and design of reinforced concrete systems and components. Prereq: 4350, or Grad standing in Civil Engineering, or permission of instructor.				
5360	Bridge Engineering	U G	3		
	Types of bridges; aesthetics in bridge design; loads on bridges; selection of bridge type; AASHTO specifications for bridge design; design of steel bridges. Prereq: 4310 (531) and 4320 (532). Not open to students with credit for 736.				
5370	Prestressed Concrete Design	U G	3		
	Design applications for prestressed concrete members and structures. Basic concepts to be covered include flexural and shear design, stress analysis, deflections, and prestress losses. Prereq: 4350.				
5400	Introduction to Geographic Information Systems	U G	4		
	Introduction to the basic principles of geographic information systems and their use in spatial analysis and information management. Prereq: 2050, Stat 3450, 3460, or 3470, and Sr standing; or Grad standing in CivilEn or EnvEng; or permission of instructor.				

5410 Engineering Surveying U G 3

Surveying applications for engineering, construction, mining and transportation work. Route surveying and geometric design; topographic site surveys and mapping; earthwork computations. Prereq: 2410, GeodSciE 410, or 450, and enrollment in CivilEn major, or permission of instructor. Not open to students with credit for GeodSciE 502.

5411 Legal Aspects of Surveying U G 3

History of measurement; development of land survey systems; milestones in technology; Land Surveyor's role; types of land surveys; retracement principles; laws on surveying practices. Prereqs: 2410, and enrollment in CivilEn major; or enrollment in the Surveying and Mapping minor; or permission of instructor.

5412 Land Boundary & Development Principles U G 3

Analysis of evidence and procedures for boundary location; preparing land boundary descriptions; process of subdividing and platting land. Prereq: 5411, or permission of instructor.

5420 Remote Sensing of Environment U G 3

The energies of the natural and cultural environment, current remote sensing systems and case histories of applications in measuring the environment. Prereq: 2410 (400), or permission of instructor. Not open to students with credit for 603 or 606.

5441 Introduction to GPS: Theory and Applications U G 3

Introduction to reference systems; fundamentals of GPS design and operation; GPS observables, error analysis and handling; data collection and data processing; interdisciplinary applications of GPS. Prereq: Math 1172 or 1544 (154) or 2153 (254), and Jr standing or above; or Grad standing; or permission of instructor. Not open to students with credit for GeodSciE 608.

5461 Geospatial Numerical Analysis U G 4

Application of adjustment techniques to geo-spatial information including but not limited to GPS, Photogrammetry GIS and remote sensing. Prereq: 2410 (400), or Grad standing. Not open to students with credit for GeodSci 650 or 651.

5510 Durability and Condition Assessment of Reinforced Concrete Structures U G 3

In-depth review of the most common processes affecting durability of portland cement concrete durability, and presents methods of assessing the quality of in-place concrete construction for vertical construction, roads and bridges, and geotechnical elements. Laboratory durability testing, on-site non-destructive evaluation techniques, and procedures for repair and rehabilitation will be discussed. Prereq: 3510, or Grad standing in Civil Engineering.

5561 Rock Mechanics, Slope Stability and Retaining Structures U G 3

Stress-strain properties of soil and rock. Strength of cohesive and non-cohesive materials under a variety of loads. Settlement and stability analyses of soil and rock slopes in for both in-situ and reconstituted materials. Prereq: 3540, or Grad standing.

5571 Principles of Foundation Analysis and Design U G 3

Design methods (classical and numerical) will be presented for the analysis of excavations, earth structures, shallow and deep foundations. The course introduces: site investigation techniques, failure mechanisms and design techniques of footings, drilled shafts, sheet piles, driven piles, anchors, tiebacks, and MSE walls, as well as, stability and settlement calculations. Prereq or concur: 3540 and 3541; Grad standing; or permission of instructor.

5581 Numerical Methods in Geotechnical Engineering U G 3

Introduction to Geomechanical Numerical modeling of soils and development of Soil-Structure Interaction (SSI) solutions using the Finite Difference and Element Methods, and to the constitutive modeling of soils based on elasticity and plasticity deformation theories. Multiple numerical techniques that are widely used in Geotechnical engineering and Soil-Structure Interaction problems. Prereq: 3540; and 5561 or 5571; or permission of instructor.

5610.01 Sustainable WaSH Infrastructure for Developing Rural Communities U G 3

Working effectively with developing rural communities to identify and acquire their basic infrastructure needs demands a combination of community development and engineering expertise. This series of courses will, at an introductory level, bridge the gap between these two disciplines. It will provide the engineer with the knowledge of how to design sustainable infrastructure systems. Prereq: Permission of instructor. Not open to students with credit for FABEng 5260.01. Cross-listed in FABEng 5260.01.

5610.02 Safe Water on Tap U G 3

Problem-centered design course focuses on major water quality challenges both nationally and internationally. Human and context driven design principles are applied to drinking water contaminants with global public health impact. Develop design algorithms from first principles whenever possible, explore novel solutions. Design water treatment systems using Python and open source design tools. Prereq: 3130, FABEng 2110, CBE 2420, or MechEng 3503; and Engr 1221 or CSE 1222; or permission of instructor. Not open to students with credit for FABEng 5260.02. Cross-listed in FABEng 5260.02.

5700 Urban Transportation Demand Forecasting U G 3

Introduction and applications of quantitative demand forecasting in urban transportation. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 775 or CRPlan 5700 (775). Cross-listed in CRPlan.

5720 Transportation Engineering Data Collection Studies U G 3

Methods of collecting and analyzing transportation data with empirical applications. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 672.

5730 Highway Location and Design U G 3

Methods of route location; design standards for highways, intersections, freeways, and interchanges; discussion of computer methods for highway design. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 673.

5740 Design and Operation of Road Traffic Facilities U G 3

Traffic laws and ordinances; operational design of streets, intersections, parking, and terminal facilities, design and operation of traffic control devices. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 774.

5750 Instrumentation, Signals, and Control in Transportation Applications U G 3

An interdisciplinary course bringing together electrical engineering tools and transportation applications. Students gain valuable experience working in teams while learning traffic flow, surveillance and control. Prereq: 3700, or Grad standing in Engineering or Science, or permission of instructor. Not open to students with credit for ECE 5400.

5760 Network Metrics and Control in Transportation Systems U G 3

Course covers fundamental analysis tools including: time space diagram, queuing theory, traffic flow theory, and further network theory. Includes application to intersection control (signal timing). Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 776.

5770 Urban Public Transportation U G 3

This course focuses on the analysis, planning, and design of bus and rail urban public transportation services and operations. Fundamental knowledge and methods for network and route planning, service planning, design, performance monitoring, and operations control. Analytical tools including probability, statics, and optimization are extensively used in this course. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Not open to students with credit for 670. Cross-listed in CRPlan.

5780 Seminar in Transportation Engineering and Planning U G 1

Speakers from and site visits to transportation agencies, organizations, and companies. Prereq: 3700 (570), or Grad standing in CivilEn, or permission of instructor. Repeatable to a maximum of 3 or hrs.

5810 Construction Safety and Forensics U G 3

Practical aspects of identifying construction and structural problems, construction accidents, mechanisms of failures and accidents, methods of avoidance and forensic engineering. Prereq: 2810 (682), or permission of instructor. Not open to students with credit for both 683 and 688.

5820 Construction Estimating U G 3

Practical aspect in estimating real construction projects encompassing highway, foundation, buildings, and bridges. Prereq: 2810 (682), or permission of instructor. Not open to students with credit for 685.

5830 Construction Scheduling U G 3

Practical aspects in identifying construction activities and their relations, establishing visual representation of a project schedule, and computing the completion date of the project. Prereq: 2810 (682), or permission of instructor. Not open to students with credit for 684.

5840 Construction Contracts and Claims U G 3

Practical aspects of the development and interpretation of contracts and claims focusing on the construction industry. Prereq: 2810 (682), or permission of instructor. Not open to students with credit for 686.

6001 Structural Design Studio I G 3

Part 1 of the two semester course sequence for the culminating design component in the Professional Masters in Structural Engineering (PMSE) program. Must be taken in semester preceding 6002, with sequence completed as close to graduation as possible. Prereq: Enrollment in the Professional Masters in Structural Engineering (PMSE) program.

6002 Structural Design Studio II G 3

Part 2 of the two semester course sequence for the culminating design component in the Professional Masters in Structural Engineering (PMSE) program. Prereq: Enrollment in the Professional Masters in Structural Engineering (PMSE) program.

6193 Individual Studies in Civil Engineering G 1 - 5

Individual conferences, assigned readings, and reports on minor investigations. Topics selected to give the advanced student opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.

6210 The Physics of Sustainable Buildings G 3

Equips students to understand and properly model the drivers of energy consumption and human exposure to airborne pollutants in buildings. Overview of the physical laws governing transport processes in buildings. Methods of modeling these processes that are specific to buildings, including energy balances, mass balances and their constituents. Prereq: Grad standing in CivilEn, or permission of instructor.

6211 Simulation of Building Energy Performance G 3

Simulation of building energy consumption under various design or retrofit scenarios. Prediction of the impact of design decisions and energy conservation measures on building energy consumption. Employment of EnergyPlus and OpenStudio, free but sophisticated and open source building energy modeling tools, to develop and simulate a model of a real building. Prereq: Grad standing in the College of Engineering, or permission of instructor.

90 Civil Engineering

6212 Connected Energy Communities G 3

This course explores connected energy communities consisting of multiple buildings and distributed energy resources such as solar photovoltaics and electric vehicle charging stations interacting with electricity grids from multiple perspectives. For students and working professionals who bring diverse perspectives from engineering, business and public policy. Prereq: Grad standing in Engineering, Business, or Public Affairs, or enrollment in online Master's program in Translational Data Analytics, or permission of instructor.

6220 Water Resources Systems Analysis G 3

This course provides the fundamental concepts needed to design and optimize water resources systems in order to address complex water supply challenges. This includes the simulation of water supply risk through time series analysis and stochastic hydrology. Trend analysis are introduced to identify long-term trends in hydrologic risk due to climate variability or human interference. Prereq: 3160, or Grad standing in Engineering, or permission of instructor.

6230 Numerical Models in Water Resources Engineering G 3

Lake, river, and coastal contaminant or heat numerical transport model formulation; averaging; finite difference and finite volume methods; errors, stability; data requirements, verification procedures. Prereq: 5230. Not open to students with credit for 823.

6300 Dynamics of Structures G 3

Concepts in structural dynamics and their applications in civil engineering type structures. Methods to determine dynamic response of single degree of freedom systems with free and forced vibrations, similar concepts in discrete and continuous multi-degree of freedom systems. Numerical methods to determine response over time, industry standard analysis software. Prereq: Grad standing, or permission of instructor.

6435 Global Navigation Satellite Systems (GNSS) Data Processing G 3

Theories and practices in GNSS data processing for high-precision (centimeter-level) static and kinematic applications. In-depth aspects of GNSS code and phase data, observation models, estimation strategy, and some physical phenomenon that affects the data. Data processing routines to estimate various parameters, hand-on experience in analyzing real GNSS data. Prereq: 5441, Grad standing in CivilEn, or permission of instructor.

6451 Introduction to Photogrammetry G 4

Analytical and digital photogrammetry, bundle block adjustment, analytical camera calibration, aerotriangulation, image acquisition systems, GPS controlled aerotriangulation, quality control and network design, DEMs and orthophotography. Prereq: Not open to students with credit for 725 and 728.

6510 Advanced Concrete Materials G 3

This course takes a materials science-based approach to understanding the materials and processes involved in hydration and property development of cementitious materials. Students will then apply that learning to understand how to design systems which will prevent, and/or mitigate durability concerns common in concrete infrastructure. Prereq: Grad standing in CivilEn, or permission of instructor.

6880 Civil Engineering Graduate Seminar G 1

This seminar will strengthen presentation skills, engender professional development, and broaden understanding of current engineering research essential for graduate students and professional engineers. Components of this seminar will include: presentations of research work conducted within the department, workshops on professional skills, and talks by invited speakers. Prereq: Grad standing in CivilEn, or permission of instructor. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

6999 Civil Engineering Research for Thesis G 1 - 15

Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

7320 Structural Reliability G 3

Fundamental concepts, theoretical developments, and simulation strategies for the assessment of the reliability of structures with applications in design and performance evaluation of new and existing structures and other engineered systems. Prereq: 2050, and 4320 or 4350; or Grad standing in CivilEn; or permission of instructor.

7330 Earthquake Engineering G 3

Analysis and design of structures subject to seismic loading; case studies of behavior of structures during earthquakes; design of structures to minimize earthquake damage; earthquake-resistant systems for highrise buildings; vibration control. Prereq: A course in structural dynamics or vibrations, or permission of instructor. Not open to students with credit for 830.

7350 Advanced Reinforced Concrete G 3

Advanced topics in reinforced concrete structural modeling, analysis, design and detailing. Prereq: 5350. Not open to students with credit for 831.

7421 Advanced Machine Learning for Remote Sensing Image Interpretation G 3

Introduces basic high-resolution remote sensing concepts with focus on optical remote sensing, and computational solutions for typical remote sensing problems. Students are assumed to know basic knowledge in statistical estimation, linear algebra and numerical methods for engineering. Students with prior experiences on remote sensing/machine learning/computer vision will find this easier to follow. Prereq: Grad standing, or permission of instructor. Not open for students with credit for ECE 7402. Cross-listed in ECE 7402.

7453 Photogrammetric Computer Vision G 3

Fundamental processes of digital photogrammetry. Advanced DEM and orthophoto methods. Extraction of high level features such as lines curves and segments; Matching high level features. Prereq: 6451.

7730 Transportation Demand Modeling G 4

Various applications of demand modeling in transportation, with emphasis on discrete choice demand modeling. Prereq: 5700, CRPlan 5700, or permission of instructor. Not open to students with credit for 873.

7740 Urban Transportation Network Analysis G 4

Various networks concepts and applications in transportation, with emphasis on equilibrium-based traffic assignment. Prereq: 5700, CRPlan 5700, or permission of instructor. Not open to students with credit for 874.

7760 Transportation Management Systems G 3

Concepts and methods for the management of unscheduled and scheduled urban transportation systems. Emphasizes network performance and travel demand interactions, and real-time applications. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 878.

7780 Graduate Student Seminar in Transportation Engineering and Planning G 1

Students will present their research to one another to gain experience presenting, learn what other students are doing, and provide feedback to one another. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7790 Transportation Practicum G 4

Practical experience and perspective on practice of transportation engineering and planning. Prereq: Grad standing in CivilEn and CRPlan Dual M.S. Degree Program, and permission of instructor. Not open to students with credit for 990. This course is graded S/U.

8193 Individual Studies in Civil Engineering G 1 - 5

Individual conferences, assigned readings, and reports on minor investigations. Topics selected to give the advanced student opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

8194 Group Studies in Civil Engineering G 1 - 5

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

8454 Videogrammetry G 3

Optical flow; neuronal processing; measuring motion field; geometry of motion field; camera motion; rigid and nonrigid body motion; measurements from motion; block adjustment using motion. Prereq: 6451 and 7442.

8998 Graduate Research in Civil Engineering G 1 - 15

Graduate level research in Civil Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8999 Civil Engineering Research for Dissertation G 1 - 15

Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

Classics

1101 Introduction to Classical Literature U 3

Introductory survey of the Greek and Roman achievement in literature and its contribution to Western thought; selected readings in English translation in major authors from Homer to Boethius. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

1101H Introduction to Classical Literature U 3

Introductory survey of the Greek and Roman achievement in literature and its contribution to Western thought; selected readings in English translation in major authors from Homer to Boethius. Prereq: Honors standing, or permission of instructor. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2010 Classical Background of Scientific Terminology U 3

An introduction to the Greek and Latin roots of modern scientific terminology, especially medical and pharmaceutical terminology. This is an online-based course. In-person sessions include first-day orientation, midterm, and the final exam. Prereq: Not open to students with credit for Classics 210.

2194 Group Studies U 1 - 9

Topics in classical studies. Au, Sp, Su Sems. Prereq: Permission of instructor. Repeatable to a maximum of 36 cr hrs or 12 completions. This course is graded S/U.

2194H Group Studies U 1 - 9

Topics in classical studies. Au, Sp, Su Sems. Prereq: Honors standing, or permission of department or instructor. Repeatable to a maximum of 36 cr hrs or 12 completions. This course is graded S/U.

2201	Classical Civilization: Greece	U	3	
	A survey of ancient Greek civilization, concentrating upon important facets of literature, history, art, and archaeology. Prereq: Not open to students with credit for Classics 224. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
2201H	Classical Civilization: Greece	U	3	
	A survey of ancient Greek civilization, concentrating upon important facets of literature, history, art, and archaeology. Prereq: Honors standing, or permission of department or instructor. Not open to students with credit for Classics 224H. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
2202	Classical Civilization: Rome	U	3	
	A survey of the civilization of ancient Rome, concentrating upon important facets of literature, history, art, and archaeology. Prereq: Not open to students with credit for Classics 225. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
2202H	Classical Civilization: Rome	U	3	
	A survey of the civilization of ancient Rome, concentrating upon important facets of literature, history, art, and archaeology. Prereq: Honors standing, or permission of department or instructor. Not open to students with credit for Clas 2202 (Classics 225) or 225H. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
2204	Medicine in the Ancient World	U	3	
	An introduction to the theory and practice of medicine in ancient Greece and Rome. Prereq: Not open to students with credit for Classics 230. GE cultures and ideas and diversity global studies course.			
2205	Sports and Spectacles in the Ancient World	U	3	
	The history and social role of gymnastic and athletic competition in Greece and Rome. The evolution of their modern revivals. Prereq: Not open to students with credit for Classics 250. GE cultures and ideas course. GE foundation historical and cultural studies course.			
2220	Classical Mythology	U	3	
	Personalities and attributes of the Greek and Roman gods and goddesses, their mythology and its influence on Western culture. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.			
2220H	Classical Mythology	U	3	
	Personalities and attributes of the Greek and Roman gods and goddesses, their mythology and its influence on Western culture. Prereq: Honors standing, or permission of department or instructor. Not open to students with credit for 2220. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.			
2221	Introduction to the New Testament: History and Literature	U	3	
	Introductory survey of the New Testament writings in translation, including non-canonical sources of the early Christian movement. Prereq or concur: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for 2401, 2401E, 2221E, History 2221, or 2221E. GE lit and historical study course. GE foundation lit, vis and performing arts and historical and cultural studies course. Cross-listed in History.			
2221E	Introduction to the New Testament: History and Literature	U	3	
	Introductory survey of the New Testament writings in translation, including non-canonical sources of the early Christian movement. Prereq or concur: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for 2221, 2401, 2401E, History 2221, or 2221E. GE lit and historical study course. GE foundation lit, vis and performing arts and historical and cultural studies course. Cross-listed in History.			
2222	From Ishtar to Christ: The History of Mediterranean Religions	U	3	
	This course introduces students to the historical facts of 10 ancient Mediterranean religions in a context that trains them to study religions more generally. It also teaches them how two of the most prominent religions today--Judaism and Christianity--succeeded within a richly diverse religious marketplace, and how religions respond to their political, economic, and social environments. Prereq: Not open to students with credit for RelStds 2222. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in RelStds.			
2301	Classical Archaeology	U	3	
	Introduction to the principles, methods, and history of archaeological investigation in the ancient Greek and Roman world, illustrated through a selection of major classical sites. Prereq or concur: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 2210 or HistArt 2301. GE cultures and ideas and historical study and diversity global studies course. GE foundation historical and cultural studies course. Cross-listed in History 2210 and HistArt 2301.			
2500H	Greek Identities: Ancient and Modern	U	3	
	Explores how Greeks defined themselves by comparing ethnic and national identity in ancient and modern Greece. What does it mean to be Greek? Prereq: Not open to students with credit for MdmGrk 2500H (250H). GE lit course.			
2798.01	Study Tour	U	3-9	
	Specific content, location, semester(s) of offering, and prerequisites vary. Contact department for details. Prereq: Permission of instructor. Repeatable to a maximum of 27 cr hrs or 3 completions.			
2798.02	Byzantium - Constantinople - Istanbul: Crossroads of East and West	U	3	
	Traces the evolution of culture, religion, and power in the eastern Mediterranean, focusing on the reception of classical culture by the Byzantine and Ottoman empires and the modern nations of Turkey and Greece. The class will examine how places endowed with cultural and religious meaning have been appropriated or rejected by their successive owners throughout history. GE cultures and ideas course and diversity global studies course. GE foundation historical and cultural studies course.			
3000	From Rome to Europe and Beyond	U	3	
	Survey of the influence Latin as a literary language had on Western cultures from the Middle Ages to the present day. GE cultures and ideas and historical study course. GE foundation historical and cultural studies course.			
3100	Topics in Ancient Literature and Culture	U	3	
	In depth analysis of selected topics in ancient literature and culture. Varies. Repeatable to a maximum of 6 or hrs.			
3101	Greek and Roman Epic	U	3	
	Study of Greek and Roman epic based on extensive readings in English translation of works by authors such as Homer, Apollonius, Vergil and Ovid. Prereq: Not open to students with credit for Classics 301.			
3102	Greek and Roman Drama	U	3	
	Study of Greek and Roman drama based on extensive readings in English translation of the plays of such authors as Sophocles, Euripides, Menander, Plautus, or Seneca. Prereq: Not open to students with credit for Classics 302.			
3103	Comic Spirit in Antiquity	U	3	
	Study of the comic literature of the Greco-Roman world based on extensive readings in English translation drawn from epic, drama, satire, and the novel. Prereq: Not open to students with credit for Classics 303.			
3203	War and Displacement in Ancient Greek and Roman Literature	U	3	
	This courses focuses on 1) war and displacement in ancient Greek and Roman literature and 2) current scholarship on migration, mobility, and immobility in the ancient world. We investigate whether and how ancient literary texts (typically produced by elite men) can be used to study broader phenomena in the experience of ancient peoples, such as displacement, exile, and captivity. Prereq: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. GE theme migration, mobility, and immobility course.			
3205	What is Race? Perspectives from Antiquity to the Present	U	3	
	This course introduces students to ancient Greek and Roman ideas of race, ethnicity, and gender, to the intersections between these ideas in the thought and lived experience of ancient peoples, to how these ideas were used, remade, and redeployed in early modernity and afterward, and to the key role of the ancient Mediterranean in modern racist ideologies. Prereq: English 1110.xx, or completion of GE Foundation Writing and Information Literacy Course, or permission of instructor. GE foundation race, ethnicity and gender div course.			
3210	Classics and African American Political Thought	U	3	
	This course focuses on citizenship, leadership, and political change in ancient Greek and Roman and modern African American thought. We examine how African American thinkers have 1) interpreted, made use of, and revised the Classics in their own work and 2) contributed to and developed traditions of political inquiry and debate traced to ancient Greece and Rome. Prereq: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. GE theme citizenship for div and just wrld course.			
3212	Greece and the Mediterranean from Alexander to Cleopatra	U	3	
	This class explores the rhythms of the Hellenistic period from the decades that preceded Alexander's campaign against Persia to the absorption of the last of the successor kingdoms by the Romans in 30 BCE. Prereq: English 1110.xx, or completion of GE Foundation Writing and Information Literacy course, or permission of instructor. Not open to students with credit for History 3212. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in History.			
3215	Sex and Gender in the Ancient World	U	3	
	Introductory survey of women, gender, and sexual relations in the ancient Mediterranean world, especially Greece and Rome. Prereq or concur: English 1110.xx, or permission of instructor. Not open to students with credit for History 3215. GE historical study and diversity global studies course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in History.			
3217	Family, household, and kinship in the Ancient World	U	3	
	This upper-level course focuses on the family as a foundational unit of ancient Mediterranean societies. Through a survey of primary and secondary literature, the students will engage with the evolution of familial networks from the Bronze Age to Late Antiquity, with a focus on the Greco-Roman world. Prereq: English 1110.xx, GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 3217. GE theme traditions, cultures, and transformations course. Cross-listed in History.			

92 Classics

3220	The Rise of the Roman Republic	U	3
An advanced survey of Rome's history from the foundation of the city to the establishment of the Republic's Mediterranean Empire, ca 150 BC. Prereq or concur: English 1110.xx, or GE Foundation Writing and Information Literacy course, or permission of instructor. Not open to students with credit for History 3220. GE historical study course. GE foundation historical and cultural studies course. Cross-listed in History.			
3221	History of Rome: Republic to Empire	U	3
An advanced survey of Rome's history from the late Republic to the early Empire under Augustus and his successors. Prereq or concur: English 1110.xx, or completion of GE Foundation Writing and Information Literacy course, or permission of instructor. Not open to students with credit for History 3221 or 2212. GE historical study and diversity global studies course. Cross-listed in History.			
3222	The Roman Empire, 69-337 CE	U	3
An advanced survey of Rome's imperial history from the end of the Julio-Claudian dynasty to the death of Constantine. Prereq or concur: English 1110.xx, or completion of GE Foundation Writing and Information Literacy Course, or permission of instructor. Not open to students with credit for History 3222. GE historical study course. GE theme citizenship for div and just wrld course. Cross-listed in History.			
3223	The Later Roman Empire	U	3
An advanced survey of Rome's history in the fourth, fifth, and sixth centuries with focus on themes of decline, fall, and transformation. Prereq or concur: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for History 3223. GE historical study course. GE theme traditions, cultures, and transformations course. Cross-listed in History.			
3401	Ancient Greek Religion	U	3
Study of ancient Greek religions, including the beginnings of Christianity. Prereq: Not open to students with credit for Classics 323. GE historical study course. GE foundation historical and cultural studies course.			
3403	The Hero in Classical Mythology	U	3
The development and interpretation of the major cycles of classical saga based on extensive readings in Greek and Roman epic and drama. Prereq: Not open to students with credit for Classics 322.			
3404	Magic in the Ancient World	U	3
An introduction to the theory and practice of magic in the ancient Mediterranean, how people viewed it, and how it survived in later epochs. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
3405	Christians in the Greco-Roman World	U	3
The origins and development of Christianity in its historical, social, and cultural context. Prereq: Not open to students with credit for Classics 325.			
3408	Ancient Roman Religion	U	3
Study of religious life and institutions in the Roman Republic and Empire, with due attention to the primary sources, in translation, and their difficulties. GE cultures and ideas and historical study course. GE foundation historical and cultural studies course.			
3700	Pompeii	U	3
This course investigates the cities and sites destroyed by Vesuvius, including the urban fabric of Pompeii and Herculaneum. We will look at Pompeii's urban design, public and private spheres and their decoration, and at the wider cultural, geographical and historical contexts of the art produced by and for its residents. Prereq: English 1110.xx, or GE foundation writing and info literacy course, or permission of instructor. GE theme lived environments course.			
3720	The Corrupting Sea: The Environmental History of the Ancient Mediterranean	U	3
A historical examination of interactions between the environment and human activity in the ancient Mediterranean. Prereq or concur: English 1110.xx, or GE Foundation Writing and Information Literacy course, or permission of instructor. Not open to students with credit for History 3720. GE historical study and diversity global studies course. GE foundation historical and cultural studies course. Cross-listed in History.			
3956	Black Cultures and Classical Education	U	3
Study the role of classics in African and the African Diaspora (US, Caribbean, Brazil). Major themes include: adaptations of classical literature, impact of classical education, classics as a tool of colonial oppression, classics as a tool of anti-colonial resistance, theories of race, classical and classicizing depictions of black bodies. Prereq: Not open to students with credit for AfAmASi 3956. Cross-listed in AfAmASi. GE lit course. GE diversity global studies course.			
4031	Sacred Texts of the Ancient World	U	3
Study of sacred texts from Greece and Rome.			
4101	Classical Receptions: Ancient Greece and Rome in the Modern World	U	3
Explorations of the reception of ancient culture in the modern world, from creative cultural engagements to comparative political and social topics.			
4201	Political Thought and Institutions in the Greco-Roman World	U	3
Selected topics concerning the development of ancient political theory. Prereq: Not open to students with credit for Classics 505.			

4501	The Good Life: Ancient Ethical Philosophy	U	3
Explorations of ancient ethical philosophy, from Socrates to the Hellenistic schools of Epicureanism and Stoicism, including their legacy in later periods.			
4998	Research	U	1-3
A program of study arranged for each student. Prereq: Sr standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4998H	Honors Research	U	1-3
A program of study arranged for each student. Prereq: Honors standing, and Sr standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4999	Thesis Research	U	1-6
A program of study leading to the writing of a thesis and an oral defense that will integrate the experience of earlier courses in classics. Prereq: Jr standing or above, and enrollment in Classics major; or permission of instructor or department. Repeatable to a maximum of 18 cr hrs or 3 completions. This course is graded S/U.			
4999H	Honors Thesis Research	U	1-6
A program of study leading to the writing of a thesis and an oral defense that will integrate the experience of earlier courses in classics. Prereq: Honors standing, Jr standing or above, and Enrollment in Classics Major; or permission of instructor or department. Repeatable to a maximum of 18 cr hrs or 3 completions. This course is graded S/U.			
5101	Classical Literature: Theoretical Perspectives and Critical Readings	U G	3
Introduction to central debates and influential approaches to the study of Classical literature, from ancient literary criticism to modern literary theory.			
5194	Group Studies	U G	1-9
Topics in classical studies at the upper undergraduate and introductory/intermediate graduate levels. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.			
5302	Studies in Greek or Roman Topography	U G	3
The topography and archaeology of ancient Athens, Rome, or other sites important to Greco-Roman literature and civilization. Prereq: Not open to students with credit for Classics 656.			
5401	Methodologies for the Study of Ancient Religions	U G	3
Introduction to the methodologies and the scholars who have significantly influenced the study of ancient religion. Prereq: Not open to students with credit for NELC 5401. Cross-listed in NELC.			
5797	Study at a Foreign Institution	U G	1-9
Study at a foreign institution for which the student receives credit from OSU. Prereq: Permission of department chairperson. Repeatable to a maximum of 27 cr hrs or 3 completions. This course is progress graded.			
5798.02	Study Tour: Foreign	U G	3-9
Specific content, location, semester(s) of offering, and prerequisites vary. Contact department for details. Prereq: Clas 3201.01, 3201.02, or 5302, or permission of department chairperson. Repeatable to a maximum of 27 cr hrs or 3 completions.			
6780	History of Philology	G	3
A seminar introducing first-year graduate students to methods, instrument and history of research in ancient studies.			
7890	Seminar on Classical Literatures and Cultures	G	3
Graduate research seminar on topics that span across Greek and Latin (and occasionally other ancient Mediterranean) texts and cultures. Prereq: Grad standing. Repeatable to a maximum of 9 cr hrs.			
7891	Graduate Seminar on Epigraphy	G	3
Graduate research seminar on Greek and/or Latin epigraphy. Prereq: Not open to students with credit for Classics 811.			
7892	Graduate Seminar on Greek and Latin Palaeography and Textual Criticism	G	3
Research seminar on Greek and Latin palaeography and textual criticism. Prereq: Not open to students with credit for Classics 812.			
7893	Graduate Seminar on Religion and Mythology of the Ancient World	G	3
Graduate research seminar on Greek and/or Roman religion and mythology. Reading knowledge of Greek and/or Latin preferred; special arrangements can be made for exceptional students without reading knowledge. Prereq: Not open to students with credit for Classics 870. Repeatable to a maximum of 9 cr hrs.			
7894	Graduate Seminar on Late Antiquity and Byzantium	G	3
Research Seminar on select topics in the history, cultures, and literatures of Late Antiquity and Byzantium. Prereq: Not open to students with credit for Classics 890.			

7895 Graduate Seminar on New Testament and Early Christian Literature G 3

Graduate research seminar on the exegetical problems and current methodologies in the academic study of the New Testament and other early Christian literature. Reading knowledge of Greek preferred; special arrangements can be made for exceptional students without reading knowledge. Prereq: Grad standing. Repeatable to a maximum of 9 or hrs.

8301 Studies in Ancient Greek and Roman Art G 4

Advanced study and specialized research on major topical problems in ancient art. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs. Cross-listed in HistArt.

Clinical Research

4460 Clinical Trials Data Management and Monitoring U 4

In this course, students will develop skillsets in applying good clinical practice guidelines for data management, quality monitoring and adverse event tracking for ongoing clinical trials. Prereq: 4480, or permission of instructor.

4480 Clinical Trials from Concept to Launch U 3

This course will provide an overview of clinical trials for medical product development from development of a study protocol, regulatory approvals, planning and launch. Students will learn project management approaches to various study launch activities including site qualification, site initiation, product management and participant recruitment planning. Prereq: HthRhSc 2500 and PHR 2500, or permission of instructor.

7402 Economic Evaluation of Healthcare Interventions G 3

Introduction to economic evaluation of healthcare interventions and services, including evaluating costs and health outcomes, using results to inform resource allocation, interpretation and evaluation of economic evaluations in the literature, and decision analysis in healthcare. Prereq: Grad standing.

7404 Project Management for Healthcare and Clinical Research G 3

Principles of project management and strategic planning in healthcare, clinical research, and regulatory settings. Prereq: 7782, or enrollment in Clinical Research Management certificate, or permission of instructor.

7405 Clinical Research Study and Site Management G 3

Fundamental principles of clinical research operations from study site selection to study closure from the perspective of sponsors and clinical research sites including an introduction to database design, management, quality assurance, and reporting for site and sponsor operations. Prereq: 7770, or enrollment in Clinical Research Management certificate, or permission of instructor.

7481 Data Management and Informatics in Clinical Research G 3

Introduction to fundamental principles of clinical research data management and informatics to include the acquisition and management of data during clinical research studies, including source data, data entry, data quality assurance, reporting, and security. Prereq: 7782, or enrollment in Clinical Research Management certificate, or permission of instructor.

7482 Principles of Quality Management for Medical Product Development G 3

Concepts and application of total quality management for federal regulation of medical product development including drugs and medical devices. Prereq: 7405, or enrollment in Clinical Research Management certificate, or permission of instructor.

7599 Culminating Project in Clinical Research G 3

The culminating project is an independent scholarly project that allows students to apply skills and competencies acquired across the master's program in clinical research. During the course, students will also complete their professional ePortfolio. Prereq: Enrollment in Master of Clinical Research program.

7770 Fundamentals of Medical Product Development and Regulation G 3

Function of clinical research in medical product development and the regulatory process of new medical products. Laws and regulations concerning the development, testing, commercialization, and total product life cycle for medical products. Regulations governing the conduct of clinical research, including study sponsors, investigators, and Institutional Review Boards. Prereq: Enrollment in Master of Clinical Research program, or enrollment in Clinical Research Management certificate, or permission of instructor.

7782 Clinical Research Design and Methods G 3

Study of research design and methods used in clinical research. Measurement issues, bias and confounding, statistical considerations, evaluation of published clinical research designs, and protocol and proposal development. Prereq: Enrollment in Master of Clinical Research program, or permission of instructor.

Communication

1100 Communication in Society U 3

Role of communication in society; forms, strategies, theories and issues; interpersonal, group, organizations, public and mass communication. Prereq: Not open to students with credit for 200. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.

1101 History of Communication U 3

History of human communication from the beginning of spoken and written communication to modern mediated and mass communication. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.

2110 Principles of Effective Public Speaking U 3

A course in critical thinking and public speaking; how to analyze and organize information for oral presentations; basics of public speaking for majors and non-majors.

2131 Business and Professional Speaking U 3

Train students in public speaking and developing interpersonal skills for business and the professions.

2221 Media Writing and Editing U 4

Designed to help students develop the fundamentals of news reporting, writing, and editing across news platforms. Prereq: C- or higher in 1100 and 1101, English 1110.xx or equivalent, and enrollment in Comm or Journal; or enrollment in AgrComm major; or permission of instructor.

2223 Lantern Practicum U 4

The practice of journalism as a member of the staff of the Lantern student newspaper and Web news site. Prereq: 2221 (421 and 422), or permission of instructor. Repeatable to a maximum of 8 or hrs.

2321 Writing for Strategic Communication U 3

Introduction to, and instruction and practice in writing, reporting, and editing for the strategic communication industries. Prereq: English 1110 or equiv., and enrollment in AgrComm or Comm or Journal major; or permission of instructor.

2331 Strategic Communication Principles U 3

The role of strategic communication in business, including basic principles of integrated marketing, theory, and ethical standards. GE soc sci indivs and groups course. GE theme lived environments course.

2367 Persuasive Communication U 3

This course is designed to increase your understanding of persuasive communication as it relates to citizenship and the American experience. As an advanced level writing course, the course is specifically designed to improve your persuasive writing, speaking, and critical thinking skills as specific citizenship behaviors. Prereq: Completion of GE Foundation Writing and Information Literacy course. Not open to students with credit for 2367H. GE writing and comm course: level 2. GE theme citizenship for div and just wrld course.

2367H Persuasive Communication U 3

This course is designed to increase your understanding of persuasive communication as it relates to citizenship and the American experience. As an advanced level writing course, the course is specifically designed to improve your persuasive writing, speaking, and critical thinking skills as specific citizenship behaviors. Prereq: Honors standing, GE foundation writing and info literacy course, and sophomore standing. Not open to students with credit for Comm 2367. GE writing and comm course: level 2. GE theme citizenship for div and just wrld course.

2511 Visual Communication Design U 3

The examination of visual symbols, graphics, photographs, art, movies and video, and their impact on society. Prereq: Enrollment in Comm, Journal or AgrComm major/minor. Not open to students with credit for 311.

2540 Introduction to Communication Technology U 3

This course is designed as an introduction to major communication technologies. The course will consider a range of older media and contemporary new media, with a focus on societal, relational, and psychological effects. Prereq: Not open to students with credit for 240.

2596 Communicating Science, Health, Environment, & Risk U 3

This course provides a general introduction to the fields of science, risk, environmental and health communication from multiple perspectives including psychological, social, cultural, and sustainability sciences. Students will apply theories and research covered in class to address real-world challenges of communicating science, health, environment, and risk to wide audiences. GE theme sustainability course.

2704 Language, Culture & Communication in Latino Health U 3

Examines how language, culture & communication shape the healthcare experiences of Latinos in the US. Considers the individual & social factors contributing to health inequalities and key theories & techniques for developing health communication interventions. Team-taught with a faculty member in the Department of Spanish & Portuguese. Prereq: Not open to students with credit for Spanish 2504. GE diversity soc div in the US course. Cross-listed in Spanish 2504.

2850 Media and Citizenship U 3

This course provides an overview of media's role in citizenship by learning about media industry operations, how media influence us, critical evaluation of media, media responsibility and literacy, and how our experiences and biases affect the current relationship between mass media and democracy. We will learn how to engage with media to promote informed, active, and responsible citizenship. GE theme citizenship for div and just wrld course.

3160 Communication Research Methods U 4

This course provides an overview of quantitative research methods as they apply to communication research. Students will gain an understanding of how to conduct research, as well as hands-on experience with data collection and data analysis. Prereq: Stat 1350, 1450, or equiv. Not open to students with credit for 2160H or 2163.

3628	Contemporary Persuasion Theory	U	3
Persuasion theories and issues in mass audience settings; persuasion in interpersonal contexts, including organizations, communities, family, and personal relationships.			
3629	Language and Social Interaction	U	3
Examination of perspectives on and ways to analyze language use in everyday contexts, discourse in society, implications for communication theory, practice, and competencies. Prereq: Not open to students with credit for 629.			
3662	Communication and Gender	U	3
Examination of contemporary communication theory, method, and practice relevant to gender issues. Prereq: Not open to students with credit for 662.			
3667	Nonverbal Communication	U	3
Theory and research on communication that does not use words. Prereq: Not open to students with credit for 435.			
3668	Intercultural Communication	U	3
An examination of the role of intercultural communication in organizational contexts and the attendant effects on the creation and transmission of cultural consciousness, knowledge, tradition, and practices. Prereq: Not open to students with credit for 368.			
3800	Career Development in Communication	U	3
This course overviews various career paths for students pursuing degrees in Journalism and Communication by using career development theories to develop their career planning skills. Strategies and ethical practices for career planning are applied to each major specialization for business and non-profit occupations.			
4190	Journalism and Communication Co-Operative Learning Experience	U	0 - 12
Allows students to participate in a full immersion professional experience in a career-related position. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			
4191	Internship	U	1 - 3
On-the-job internships in communication practice or research conducted under supervision of internship coordinator through the undergraduate advising office. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
4193	Individual Studies	U	1 - 3
Students make extensive and significant studies in the field of journalism or communication. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
4194	Group Studies	U	1 - 12
Regular class meetings and group discussion of specified problems. Repeatable.			
4202	Feature Writing	U	3
This hands-on, active-learning course will teach students how to identify, research, report and write non-fiction feature articles that combine fact-based journalistic writing with non-fiction writing techniques, including characters development, description and narrative arc.			
4221	Data Journalism in Enterprise Reporting	U	4
A capstone experience devoted to enterprise journalism that springs from computer assisted reporting techniques and presented through the use of traditional print and multimedia journalism. Prereq: 2221 (421 and 422), and enrollment in Comm, Journal, or AgrComm major. Not open to students with credit for 621.			
4240	Science Communication	U	3
Explores the structure, meanings and implications of "science communication" with an emphasis on how values, attitudes, social structure, and communication affect public perceptions of science and technology. Prereq: Not open to students with credit for 4240H (640H), 3240H, or 640.			
4337	Public Communication Campaigns	U	4
Application of management techniques to public relations; public relations strategy; campaign development. Prereq: 2331 (431), and enrollment in Comm or Journal major; or permission of instructor. Not open to students with credit for 637.			
4401	Mass Communication and Youth	U	3
Introduction to theories and research on the uses and effects of media on children and adolescents, including discussion of interventions. Prereq: Not open to students with credit for 501.			
4445	Stereotypes in Media	U	3
Expose students to the existence and impact of stereotypes in various forms of media. Prereq: Not open to students with credit for 645.			
4511	User-Centered Communication Design	U	3
Concepts and principles of user-centered design and application of skills to multimedia design. Prereq: Comm 2511 (311), or Design 320, 570, 571, or 573, or permission of instructor. Not open to students with credit for 611.			
4555	Computer Interface and Human Identity	U	3
Surveys computer phenomena such as artificial intelligence, agents, avatars, virtual worlds, and humanoid robots, and identities such as humanness, race, gender and sexuality. Prereq: Not open to students with credit for 655.			

4556	Information Technology and Organizational Communication	U	3
Focus on the role of various technologies within organizations and for work team members. Prereq: Not open to students with credit for 656.			
4557	Communication Network Infrastructure	U	3
Introduction to the concepts and principles that underlie contemporary telecommunication networks with the opportunity to apply these concepts to the analysis of novel systems. Prereq: 2540 (240). Not open to students with credit for 657.			
4558	Social Media Analytics	U	3
This course is an introduction to analyzing social media data. Students will learn how to operate an established analytics platform and complete a novel research project using real world social media data. Students will learn how to tackle industry and academic research problems using social media logs and metrics. Prereq: 3160, 3163, or 3165.			
4600	Communication and Emotion	U	3
Introduction to research about emotion in mediated communication. Applications in domains of students' choice (e.g. sports communication, entertainment, advertising, online communication, news, public affairs communication, etc.).			
4635	Communication Dynamics in Groups	U	3
This class examines how communication dynamics affect group performance in organizations through topics such as: communication roles and norms, effective communication in teamwork and decision-making, leadership, group cohesion, managing conflict and using communication technologies.			
4665	Human Communication in Social Networks	U	3
Communication creates a relationship between individuals in various ways, and the large set of these relationships form networks. In this class, our task will be to observe and understand the various ways in which communication may be directly observed or inferred and the consequences that such communication has for humans who are embedded in networks.			
4736	Health Communication in Interpersonal Contexts	U	3
Study of communication relevant to health care in various face-to-face contexts. GE theme health and well-being course.			
4737	Health Communication in Mass Mediated Contexts	U	3
Overview of theory and research related to the role of mass media as they affect the public's health behavior. GE theme health and well-being course.			
4738	Health Communication and New Media	U	3
Focuses on the current and future uses of technology in health communication with an emphasis on technology in both patient-provider relationships and health campaigns. Prereq: Not open to students with credit for 638.			
4797	Study at a Foreign Institution	U	1 - 12
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Permission of department chair. Repeatable to a maximum of 36 cr hrs or 36 completions. This course is progress graded.			
4798.01	Domestic Study Tour	U	1 - 12
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions.			
4798.02	Foreign Study Tour	U	6 - 12
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 4 completions.			
4814	Political Communication	U	3
Analysis of the roles played by the mass media, public leaders, and accidental circumstances in the development of issues and images in contemporary American political communication. Prereq: Enrollment in Comm or Journal major, or permission of instructor. Not open to students with credit for 614.			
4820	Public Opinion and Communication	U	3
Investigation of public opinion from social, political, and psychological perspectives, and study of the role communication (including the media) plays in the process. Prereq: Not open to students with credit for 620 or 620H.			
4998	Undergraduate Research	U	1 - 15
Supervised collaborative research in Communication. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 8 completions. This course is graded S/U.			
4999	Thesis Research	U	1 - 12
Individualized instruction in an independent research project. Prereq: A grade of A in at least half of all Comm courses taken and an average of B in the remainder, and Jr or Sr standing in Journalism or Communication, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
4999H	Honors Thesis Research	U	1 - 12
Individual advising for an honors thesis project. Prereq: Honors and Sr. standing in Comm or Journal and permission of instructor. Not open to students with credit for 783H. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			

96 Communication

6500 Introduction to Graduate Study G 1

An overview of graduate study in Communication. Research and teaching resources, procedures, and expectations, areas of study and faculty interests. Prereq: Grad standing, or instructor permission and Grad School approval for undergrad credit. This course is graded S/U.

6661 Statistical Applications in Communication I G 3

Fundamental principles of statistics commonly used in communication research. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 661.

6701 Working with Communication Data G 3

Techniques for coding, entering and maintaining data sets in preparation for thesis or other research activities. Includes logical coding, documentation, mapping responses to numerical representations, assessing reliability, merging files, maintaining confidentiality via ID codes and other topics. Prereq: Grad standing.

6760 Communication Research Methods G 3

An overview of empirical research methods in communication. Prereq: Grad standing. Not open to students with credit for 760.

6806 Contemporary Theories of Communication G 3

Overview of contemporary approaches to the study of communication. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 806.

6807 Foundations of Communication Theory G 3

A historical overview of the major theories and research that led to the development of the field of communication. Prereq: 6806 (806) and Grad standing; or permission of instructor. Not open to students with credit for 807.

7710 Introduction to Social Networks G 3

Focuses on the theoretical and methodological bases of social network analysis. Prereq: Grad standing, and enrollment in Comm or Social program; or permission of instructor. Not open to students with credit for Social 7710. Cross-listed in Sociol.

7712 Seminar in Social Networks G 3

The theory, substance, and methods for understanding patterns, causes, and consequences of relationships among populations of actors. Sociol 6649 and 6581 recommended. Prereq: Grad standing, and enrollment in Comm or Social program; or permission of instructor. Not open to students with credit for Social 7712. Cross-listed in Sociol.

7713 Political Communication G 3

A graduate-level examination of the role of communication in American politics, acquainting the student with the literature on political communication and stimulating ideas for original research in the field of political communication. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 713. Cross-listed in PolitSc 7168.

7715 Meta-Analysis G 3

Meta-analysis means analysis of analyses. This course provides a hands on approach to conducting a meta-analysis that involves seven steps: (1) Formulating the problem, (2) Searching the literature, (3) Gathering information from studies, (4) Evaluating the quality of studies, (5) Analyzing and integrating the outcomes of studies, (6) Interpreting the evidence, and (7) Presenting the results.

7789 Survey Research Practicum G 3

Hands-on applications for students interested in the planning, implementation and analysis of a scientific sample survey. Prereq: Admission to grad survey research, or permission of instructor. Not open to students with credit for 7789 or 789 in Econ, PolitSc, Stat, AEDEcon, AgrEduc, BusML, EduPL, Geog, Psych, PubHlth, or PubAfrs. Cross-listed in PolitSc, Econ, and Stat.

7790 Statistical Applications in Communication II G 3

Survey of research methods and practical experience in conducting a research project. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 790.

7813 Public Opinion and Communication G 3

Discusses the central role of communication in the concept of public opinion. Reviews research on the influence of communication on public opinion direction and quality. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 813.

7840 Mass Communication and the Individual G 3

Survey of theory and research in mass communication dealing with psychological aspects of mass communication. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 840.

7841 Mass Communication and the Social System G 3

Survey of mass communication theory at the macro or sociological level. Seminar covers social theories shaping media content and theories of media influence or effects. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 841.

7850 Communication Technology G 3

Theory and research on the uses and effects of communication technology. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 850.

7851 Human-Computer Interaction G 3

This course is one of two seminars offered as part of the communication technology focus area of the School of Communication graduate program. The focus of this course is on experiences with technology, including technological adoption and use; affordances across digital platforms; usability; and elements of interface design and their psychological, interpersonal, social and cultural implications.

7870 Media, Campaigns and Health G 3

How mediated communication can influence human behavior and public policy in ways that can improve (or can negatively impact) human health and well-being. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 870.

7871 Health Communication in Interpersonal Settings G 3

Introduce students to the research and theories comprising contemporary literature in health communication in interpersonal settings. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 871.

7890 Colloquium G 1

Colloquium. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

7927 Theory Construction G 3

The formal principles of theory and model construction function as criteria for examining the strengths and weaknesses of communication research models. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 927.

7998 Directed Research G 1-3

Directed research. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 27 cr hrs or 9 completions. This course is graded S/U.

7999 Thesis Research G 1-12

Thesis research. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 3 completions. This course is graded S/U.

8193 Directed Reading G 1-3

Directed reading. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

8801 Special Topics in Communication Research Methods G 3

In-depth study of particular methods in the field of communication. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 15 cr hrs.

8940 Special Topics in Mass Communication G 3

Advanced seminar on current research in mass communication. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 12 cr hrs.

8970 Special Topics in Communication G 3

Advanced seminar on current research cutting across sub-fields of communication. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 18 cr hrs.

8999 Dissertation Research G 1-6

Dissertation research. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 30 cr hrs or 10 completions. This course is graded S/U.

Community Leadership

1100 Exploring Agricultural Communication, Education, and Leadership U ½

Basic understanding of global trends within agricultural communication, agricultural education, and community leadership, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development.

2100.01 Foundations of Leadership I U 1

This course focuses on the foundations of leadership. Topics include introductory leadership theories and concepts with a focus on personal development, leadership style, and self-discovery. This CCP course is offered as a part of an off-campus, community-embedded program in cooperation with the Department of Agricultural Communication, Education, and Leadership. Selection into an approved partner program with the Department of Agricultural Communication, Education, and Leadership (such as OSUE's LOOK to Ohio) required for enrollment.

2100.02 Foundations of Leadership II U 2

This course focuses on the foundations of leadership. Topics include introductory leadership theories and concepts with a focus on developing relationships with others. Topics include diversity, communication, and teamwork. This CCP course is offered as a part of an off-campus, community-embedded program in cooperation with the Department of Agricultural Communication, Education, and Leadership. Selection into an approved partner program with the Department of Agricultural Communication, Education, and Leadership (such as OSUE's LOOK to Ohio) required for enrollment.

2189 Early Experience in Community and Extension Education U 1

The early experience program is designed to help students explore careers and gain experience in Community and Extension Education. Prereq: Permission of instructor. Not open to students with credit for AEE 280.

2193	Individual Studies	U	1 - 3
Planning, conducting, and reporting a special study appropriate to the needs of the student. Prereq: CPHR 2.50 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is progress graded (S/U).			
2194	Group Studies	U	1 - 5
Group studies for students in specialized programs. Repeatable to a maximum of 10 cr hrs or 5 completions.			
2530	Introduction to Agricultural Communication, Education, and Leadership	U	2
Creating an awareness and understanding of the agricultural communication, education and leadership profession. The class will provide a basis for educating, communicating, and leading by synthesizing theoretical knowledge with practical application. Prereq: Not open to students with credit for AEE 230 or AgrComm 200.			
2530E	Introduction to Agricultural Communication, Education, and Leadership	U	2
Creation of an awareness and understanding of the agricultural communication, education and leadership profession. Provides a basis for educating, communicating, and leading by synthesizing theoretical knowledge and practical application. Prereq: Honors standing.			
3330	Program Development and Evaluation	U	3
Introductory skills necessary to develop, deliver, and evaluate educational programs. Students will examine the principles, methods, and models of program development and evaluation.			
3530	Foundations of Personal and Professional Leadership	U	3
Leadership theories, principles, and concepts. Research-based theories, methods of social scientific inquiry, individual strengths, personal leadership philosophy and vision, concepts of diversity and ethics, and professional development plan. Prereq: Not open to students with credit for AEE 342.			
3530E	Foundations of Personal and Professional Leadership	U	3
Leadership theories, principles, and concepts. Research-based theories, methods of social scientific inquiry, individual strengths, personal leadership philosophy and vision, concepts of diversity and ethics, and professional development plan. Prereq: Honors standing. Not open to students with credit for AEE 342.			
3535	Toward Cultural Proficiency	U	3
Learner effectiveness in multicultural, multiracial learning environments. Strategies for obtaining insight into learners from varied cultures. Theory will connect practice through service-learning using cognitive, affective and psychomotor domains. Prereq: Not open to students with credit for AEE 594. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies course.			
3537	Data Analysis in the Applied Sciences	U	3
A general education course focused on developing quantitative literacy and logical reasoning through analysis and interpretation of descriptive and inferential statistics. Students will be able to utilize SPSS to perform statistical data analysis, organize and summarize quantitative data, formulate conclusions, and critically evaluate research reports. Prereq: Math 1130 or 1148. GE data anyl course. GE foundation math and quant reasoning or data anyl course.			
3797	Exploring Leadership and Systems Thinking	U	4
This course will focus on the impact of leadership and systems thinking in the fields of agriculture and the environment. This course spans a domestic experience in Washington, D.C. where students will meet with government groups and other practitioners working in agriculture and the environment; and an international experience to a host country to learn more about culture and agriculture. Prereq: Admission to the Costa Rica AZP Education Abroad program, and permission of instructor.			
4191	Internship in Community Leadership	U	1 - 2
Provides students in the Community Leadership program with an experiential learning opportunity to practice and apply knowledge and skills learned in an authentic setting. Open to Community Leadership Majors with a Leadership Specialization. Prereq: Enrollment in ComLdr major with Leadership Specialization, and permission of instructor. Not open to students with credit for AEE 489. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
4194	Group Studies in Community Leadership	U	1 - 3
Specialized topics in leadership or community and extension education. Repeatable to a maximum of 10 cr hrs or 5 completions.			
4430	Leadership in Teams and Community Organizations	U	3
Principles and strategies involved in leading teams and community organizations. Students will examine leadership dynamics in small groups and reflect on applications in various settings. Team service project with student or community organization. Prereq: Not open to students with credit for AEE 442.			
4480	Capstone in Leadership	U	3 - 4
Application of leadership theories, principles, concepts, and skills in a setting aligned with the student's academic and/or career interests. Students will plan, conduct, reflect, and report the project in conjunction with a faculty supervisor. Prereq: Permission of instructor. This course is graded S/U.			
4530	Senior Transition from College	U	3
Designed to serve as a "transition" course for seniors at The Ohio State University, preparing them for their first professional position. Students will synthesize their knowledge and skills developed while at OSU and learn how transition those talents into practical application. Prereq: Sr standing.			

4797.01	Trinidad & Tobago: Culture and Leadership in Complex Systems	U	4
Complex community issues related to food, agriculture and the environment require more than subject matter expertise; they also require a holistic understanding of the human dimension. This course will support students' growth in understanding culture, leadership, and systems thinking to then explore their area of interest in Trinidad and Tobago, a small island developing state. Prereq: Admission to CFAES Trinidad & Tobago: Culture and Leadership in Complex Systems Education Abroad program, and permission of instructor.			
4998	Undergraduate Research	U	1 - 10
Conducting and reporting an undergraduate research project. Prereq: Permission of instructor. This course is graded S/U.			
4999	Research with Distinction	U	1 - 6
Conducting and reporting research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman University Undergraduate Research Forum. Prereq: GPA 3.0 or above, and GPA 3.0 or above in major, and permission of project supervisor. Not open to students with credit for 683H. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
4999H	Research with Distinction - Honors	U	1 - 6
Conducting and reporting research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the University's Denman Undergraduate Research Forum. Prereq: Honors standing, and FAES 4590.01H (590.01H), and CPHR 3.4 or above, and GPA 3.4 or above in major, and permission of honors project supervisor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5000	Leadership for Community Change	U G	3
Leading change in a community setting is important to addressing complex, adaptive community challenges. This course will teach students how to work with a community (of place, interest, etc.) through the difficult process of change by engaging them in leadership development. This course is meant to serve as an advanced course for students learning about leadership. Prereq: ENR 3500, or permission of instructor.			
5193	Individual Studies in Community Leadership	U G	1 - 3
Planning, conducting and reporting a special study appropriate to the needs of the student. Prereq: CPHR 2.50 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			
5194	Group Studies in Community Leadership	U G	1 - 3
Group studies for student in specialized programs. Repeatable to a maximum of 10 cr hrs or 5 completions.			
5330	Methods of Teaching in Nonformal Learning Environments	U G	3
Examining the teaching and learning process with emphasis on planning and delivering agricultural instruction for agribusiness, extension, and non-formal learning environments.			
5335	Volunteer and Human Resource Management	U G	3
Introductory skills in volunteer and human resource management for working in educational and non-profit organizations with paid and unpaid staff. Examination of principles, methods, and models and application with case studies. Prereq: Not open to students with credit for AEE 795.02.			
5350	Youth Organizations and Program Management	U G	4
Introduction to and analysis of youth organizations and youth program management. Theories, principles, and key concepts important for assuming leadership roles in contemporary youth organizations. Prereq: Not open to students with credit for both AEE 642 and 643.			
5380	Internship in Community and Extension Education	U G	4
Under the supervision of a Departmental faculty instructor and daily leadership of an experienced Extension educator at the county level, students will enhance their professional and technical competencies in Extension education. Concur: 5381 and 5382.			
5381	Capstone in Community and Extension Education	U G	4
The capstone brings together a student's theory and programmatic work during their undergraduate career and applies it to a cohesive pattern that related to applied professional Extension work settings. Concur: 5380 and 5382.			
5382	Issues in Community and Extension Education	U G	4
Explore past, current, and potential trends and issues related to Extension programming and apply them to professional settings. Students will learn about contemporary issues and how to use futuring and strategic planning tools to address the issues. Concur: 5380 and 5381.			
5430	Professional Leadership Ethics	U G	3
This course is designed to prepare students to meet the ethical challenges facing employees and other members of education, nonprofit organizations and business. The class will address moral issues at every organizational level - personal, interpersonal, group and system wide.			

Comparative Studies

98 Comparative Studies

1100 Intro to the Humanities: Cross-Cultural Perspectives U 3

This introductory course is designed to survey some of the current preoccupations in the Humanities, especially as they relate to culture, power, and identity. Instructors of 1100 seek to present relevant issues in comparative cultural study, employing a mix of cultural theory, current events, and literature, visual, and performing arts with a focus on race, ethnicity, and gender. Prereq: Not open to students with credit for 1100H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

1100H Intro to the Humanities: Cross-Cultural Perspectives U 3

This introductory course is designed to survey some of the current preoccupations in the Humanities, especially as they relate to culture, power, and identity. Instructors of 1100 seek to present relevant issues in comparative cultural study, employing a mix of cultural theory, current events, and literature, visual, and performing arts with a focus on race, ethnicity, and gender. Prereq: Honors standing. Not open to students with credit for 1100. GE lit and diversity global studies course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

2099 The Question of Comparative Studies U 1

This course offers an introduction to the Comparative Studies major. It is designed to help students to take advantage of curricular, research, and advising opportunities; to manage the particular challenges of independent and interdisciplinary work; to link classroom work to social and political engagement with relevant communities; and to prepare for life after graduation. This course is graded S/U.

2101 Literature and Society U 3

This course analyzes social and political elements of literature and film from diverse cultures and historical periods, through an intersectional study of race, ethnicity, and gender. Prereq: GE foundation writing and info literacy course, or English 1110, or equiv. Not open to students with credit for 2101H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

2101H Literature and Society U 3

Study of relationships among politics, society, and literature; analysis of social and political elements of literature and film from diverse cultures and historical periods. Prereq: Honors standing, and English 1110 (110) or equiv. Not open to students with credit for 2101 (201, 201H). GE lit and diversity global studies. GE foundation lit, vis and performing arts course.

2103 Literature and the Self U 3

Study of relationships between psychology and literature; analysis of psychological concepts and processes as represented in literature and film of diverse cultures and historical periods. Prereq: English 1110 (110) or equiv. Not open to students with credit for 2103H (203H) or 203. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2103H Literature and the Self U 3

Study of relationships between psychology and literature; analysis of psychological concepts and processes as represented in literature and film of diverse cultures and historical periods. Prereq: Honors standing, and English 1110 or equiv. Not open to students with credit for 2103. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2104 Literature, Science, and Technology U 3

Study of relationships among literature, science, and technology; analysis of representations of science and technology in literature and film of diverse cultures and historical periods. Prereq: English 1110 or equiv. Not open to students with credit for 2104H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2104H Literature, Science, and Technology U 3

Study of relationships among literature, science, and technology; analysis of representations of science and technology in literature and film of diverse cultures and historical periods. Prereq: Honors standing, and English 1110 or equiv. Not open to students with credit for 2104. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2105 Literature and Ethnicity U 3

This course examines literary representations of ethnicity refracted through experiences of racialization and gender in an American cultural context. Prereq: English 1110.xx, or GE foundation writing and info literacy course. GE lit and diversity soc div in the US course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

2193 Individual Studies U 1-3

Designed to give students an opportunity for personal study with a member of the faculty. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

2194 Group Studies U 1-3

Designed to give groups of students an opportunity to pursue special studies not otherwise offered. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

2194H Group Studies U 1-3

Designed to give groups of students an opportunity to pursue special studies not otherwise offered. Prereq: Honors standing or permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

2220 Introduction to South Asia Studies U 3

A multi-disciplinary introduction to South Asia's geographical, political, cultural, and religious contexts and connections. Prereq: English 1110, or completion of GE foundation writing and info literacy course. Not open to students with credit for NELC 2220, or SAsia 2220. GE diversity global studies course. GE foundation historical and cultural studies course. Cross-listed in SAsia.

2242 Introduction to Latinx Studies U 3

Introduction to Latinx studies; history, politics, and cultural production of Latinx communities in the U.S. and its borderlands. Prereq: GE foundation writing and info literacy course, or permission of instructor. Not open to students with credit for Spanish 2242, or EthnStd 2242. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in Spanish and EthnStd.

2264 Introduction to Popular Cultures U 3

This course introduces students to the interdisciplinary field of Popular Culture Studies through a variety of methods and case studies. The specific focus will be on the entanglement of race, ethnicity, and gender in popular cultures. Prereq: English 1110 or one GE Foundation Writing and Information Literacy course. Not open to students with credit for English 2264. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in English.

2281 American Icons U 3

Interdisciplinary methods in American studies, with an emphasis on plurality and the intersectional study of identities (including but not limited to race, gender, and ethnicity) in American culture. Prereq: English 1110.xx, or equiv. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course.

2301 Introduction to World Literature U 3

Analysis of oral and written literatures of diverse cultures and historical periods. Prereq: English 1110, or equiv. GE lit and diversity global studies course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

2321 Introduction to Asian American Studies U 3

Introduction to how Asian Americans as a whole and as specific ethnic groups have been racialized throughout U.S. history; examination of diverse Asian American experiences, cultural practices, and political viewpoints through gender, sexuality, class, immigrant status, dis/ability, and other social differences. Prereq: English 1110.XX, or GE foundation writing and info literacy course. Not open to students with credit for EthnStd 2321. GE cultures and ideas course and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course course. Cross-listed with Ethnic Studies.

2323 Introduction to American Indian Studies U 3

This course explores the legal, cultural, historic, and political foundations, experiences, and perspectives and futures of American Indians in the U.S., with an emphasis on race, ethnicity, and gender diversity. Prereq: English 1110.XX or equiv; or GE foundation writing and info literacy course; or permission of instructor. Not open to students with credit for EthnStd 2323. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed with EthnStd.

2340 Introduction to Cultures of Science and Technology U 3

This course offers a critical analysis of the multiple relations of science to society, with an emphasis on knowledge, power, authority, values, and ethics. We will sharpen our analytical skills by discussing a broad range of historical and contemporary examples as they relate to race, ethnicity, gender, global capitalism, and politics. Prereq: English 1110, or GE foundation writing and info literacy course. Not open to students with credit for 2341. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies and race, ethnicity and gender div course.

2341 Technology, Science, and Society U 3

Critical analysis of the relations among science, technology, and culture, with particular emphasis on ethical issues in technology and engineering. Prereq: English 1110.01 (110.01) or equiv. Not open to students with credit for 2340 (272). GE cultures and ideas and diversity global studies course.

2343 Slavery, Gender, and Race in the Atlantic World U 3

An examination of slavery in Atlantic Africa and the Western Hemisphere with particular focus on how conceptions of race and gender shaped patterns of forced labor, the slave trade, and the development of European colonial societies in the Americas. Prereq: English 1110 (110), or equiv. Not open to students with credit for 243 or AfAmAst 243.

2350 Introduction to Folklore U 3

A general study of the field of folklore including basic approaches and a survey of primary folk materials: folktales, legends, folksongs, ballads, and folk beliefs. Prereq: English 1110 or equiv. Not open to students with credit for 2350H, English 2270, or 2270H. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in English 2270.

2350H Introduction to Folklore U 3

A general study of the field of folklore including basic approaches and a survey of primary folk materials: folktales, legends, folksongs, ballads, and folk beliefs. Prereq: Honors standing, and English 1110 or equiv. Not open to students with credit for 2350, English 2270, or 2270H. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in English 2270H.

2360 Introduction to Comparative Cultural Studies U 3

Introduction to interdisciplinary field of cultural studies; emphasis on relation of cultural production to power, knowledge, and authority, globally and locally. Prereq: English 1110 (110) or equiv. Not open to students with credit for 274. GE cultures and ideas course. GE foundation historical and cultural studies course.

2367.02 U.S. Latino Identity U 3
 Latino/a identity in the U.S.; emphasis on Latino/a cultural history and expression and on role of race, class, gender, and sexuality in identity construction. Prereq: English 1110 or equiv, and Soph standing. GE writing and comm: level 2 and diversity soc div in the US course. GE foundation writing and info literacy course.

2367.04 Science and Technology in American Culture U 3
 Role of science and technology in contemporary American society; their relationship to human values; sources of concern about their impact; evaluation of selected issues. Prereq: English 1110 or equiv, and Soph standing. Not open to students with credit for 2367.04H. GE writing and comm: level 2 and cultures and ideas and diversity soc div in the US course. GE foundation writing and info literacy and historical and cultural studies course.

2367.04H Science and Technology in American Culture U 3
 Role of science and technology in contemporary American society; their relationship to human values; sources of concern about their impact; evaluation of selected issues. Prereq: Honors and Soph standing, and English 1110 or equiv. Not open to students with credit for 2367.04. GE writing and comm: level 2 and cultures and ideas and diversity soc div in the US course. GE foundation writing and info literacy and historical and cultural studies course.

2367.07 Religious Diversity in America U 3
 Exploration of the concept of religious freedom and the position of minority religious groups in American society. Prereq: English 1110 or equiv, and Soph standing. GE writing and comm: level 2 and cultures and ideas and diversity soc div in the US course. GE foundation writing and info literacy and historical and cultural studies course.

2367.08 American Identity in the World U 3
 American culture viewed from inside and from the perspective of foreign cultures, as seen in literature, film, art, music, journalism, folklore, and popular culture. Prereq: English 1110 or equiv, and Soph standing. Not open to students with credit for 2367.08H. GE writing and comm: level 2 and cultures and ideas and diversity soc div in the US course. GE foundation writing and info literacy and historical and cultural studies course.

2367.08H American Identity in the World U 3
 American culture viewed from inside and from the perspective of foreign cultures, as seen in literature, film, art, music, journalism, folklore, and popular culture. Prereq: Honors and Soph standing, and English 1110 or equiv. Not open to students with credit for 2367.08. GE writing and comm: level 2 and cultures and ideas and diversity soc div in the US course. GE foundation writing and info literacy and historical and cultural studies course.

2381 Race, Ethnicity and Gender in Spanish-Speaking Film and TV U 3
 This course will examine how cinema and television in Latin America, the US, and Spain reflect issues of race, ethnicity, and gender and reveal social attitudes and prejudices. Not open to students with credit for Spanish 2381 or WGSST 2381. GE foundation race, ethnicity and gender div course. Cross-listed in Spanish and WGSST.

2420 American Food Cultures U 3
 Historical perspective on the development of the American food system, including associated discourses and cultures, leading to exploration of contemporary concerns about industrial food, the American diet, and the politics surrounding these issues. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies course.

2797 Introductory Study at a Foreign Institution U 1-30
 An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Prereq: Permission of Department. Repeatable to a maximum of 30 cr hrs.

2798.01 Study Tour: Domestic U 1-9
 Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

2798.02 Study Tour: Foreign U 1-9
 Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

2864H Modernity and Postmodernity: Issues and Ideas U 3
 Examination of some of the defining ideas of modern thought and how those ideas have problematically affected modern life in both developed and developing countries. Prereq: Honors standing and English 1110 (110) or equiv. Not open to students with credit for 240H or 240. GE lit and diversity global studies course.

2995 Race and Gender in Eastern Europe and the US: A Transatlantic Comparison U 3
 By studying how identities (racial, ethnic, gender, and religious) exist as cultural constructs, this course will examine and compare the experiences of Russian and East European ethnic and racial minorities in their respective countries and African Americans in the US regarding racialization and marginalization through cultural and social constructs. Prereq: Not open to students with credit for Slavic 2995.99. Cross-listed in Slavic 2995.99. GE foundation race, ethnicity and gender div course.

3072 The Newark Earthworks, An Interdisciplinary Course U 3
 This course is designed to give students an opportunity to learn about the indigenous peoples of ancient Ohio, an amazing complex of earthen mounds they created, and the many ways we can know about and further study them. Prereq: Not open to students with credit for Anthrop 3072 or History 3072. GE theme lived environments course. Cross-listed in Anthrop and History.

3302 Translating Literatures and Cultures U 3
 Introduction to issues and problems inherent to translating literatures and cultures. Prereq: English 1110 (110), or equiv. Not open to students with credit for 3302E (373E) or 373. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.

3302E Translating Literatures and Cultures U 3
 Introduction to issues and problems inherent to translating literatures and cultures. Prereq: Honors standing, and English 1110 (110), or equiv. Not open to students with credit for 3302 (373) or 373E. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.

3360 Introduction to Globalization and Culture U 3
 History and contemporary dimensions of globalization, focusing on period preceding European hegemony, era of European colonialism, period of decolonization, and contemporary contexts. Prereq: Soph standing, or permission of instructor. Not open to students with credit for 357.

3501 Humanitarianism in Question U 3
 This course addresses questions related to the history, practices, institutional dimensions, impact, criticism, and function of humanitarian and philanthropic work. Students learn about relationships between donors and targeted communities, both domestically and abroad. Discussions reflect upon reasons for giving, the goals of the supported initiatives, and mechanisms for evaluating success. Repeatable to a maximum of 6 cr hrs. GE cultures and ideas course.

3603 Love in World Literature U 3
 Representations of love in world literature; emphasis on mythological, psychological, and ideological aspects of selected representations in different cultures and time periods. Prereq: English 1110 (110), or equiv. Not open to students with credit for 3603H (301H) or 301. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

3606 The Quest in World Literature U 3
 Motif of the quest in world literature; physical and mental journeys as metaphors of personal transformation and salvation. Prereq: English 1110 (110) or equiv. Not open to students with credit for 306. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

3607 Film and Literature as Narrative Art U 3
 Relationships between film and literature; emergence of cinematic art as a form of representation with emphasis on diverse cultural traditions. Prereq: English 1110 or equiv. Not open to students with credit for 3607H. GE VPA and diversity global studies course. GE foundation lit, vis and performing arts course.

3608 Representations of the Experience of War U 3
 Representations of war in works of literature, religious texts, and film from diverse cultures and time periods. Prereq: English 1110 (110) or equiv. Not open to students with credit for 308. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

3645 Cultures of Medicine U 3
 Humanistic, scientific, and clinical perspectives on medical issues; literary uses of medical themes; medicine as art and science. Prereq: English 1110 (110) or equiv. Not open to students with credit for 3645H (305). GE cultures and ideas and diversity global studies course.

3645H Cultures of Medicine U 3
 Humanistic, scientific, and clinical perspectives on medical issues; literary uses of medical themes; medicine as art and science. Prereq: Honors standing, and English 1110 (110) or equiv. Not open to students with credit for 3645 (305). GE cultures and ideas and diversity global studies course.

3646 Cultures, Natures, Technologies U 3
 Cultural perspectives on issues related to technology, nature, and culture; examines cultural approaches to uses of technology and their relation to natural and human worlds. Prereq: English 1110 (110), or equiv. GE cultures and ideas course.

3658 Folklore of the Americas U 3
 Comparative study of folklore and folk groups of the Americas; topic varies: folk narratives, beliefs, customs, practices of Latino/a, Asian, African, Native, and Anglo cultures. Prereq: English 1110 (110) or equiv. Not open to students with credit for 4658. Repeatable to a maximum of 9 cr hrs.

3661 The City and Culture U 3
 Introduction to the comparative and cross-cultural study of cities, urban culture, and urbanism. Prereq: One course in CompStd or IntStd, or permission of instructor. Not open to students with credit for 4661 (531) or IntStd 4661 (531) or IntStd 3661. Cross-listed in IntStd.

3686 Cultural Studies of American Musics U 3
 Investigation of the social, political, and cultural contexts of the development of popular musics in the U.S. Prereq: English 1110 or equiv. GE VPA and diversity soc div in the US course. GE foundation lit, vis and performing arts course.

100 Comparative Studies

3797 Topical Study at Foreign Institution U 1 - 30

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Prereq: Permission of Department. Repeatable to a maximum of 30 ch hrs.

3798 Japanese Popular Culture U 3

This course takes up Japanese popular culture in order to get at big questions about nationalism and cosmopolitanism, appropriation and authenticity, and being human in a world of commodities. This is an intensive summer course: two weeks in Columbus and two weeks in Japan, where we will be based in Tsukuba and make trips to Tokyo, Kyoto, Osaka, and Uji. Knowledge of Japanese is not required. Prereq: English 1110. GE diversity global studies and education abroad course.

3903 World Literature: Theory and Practice U 3

Discussion of world literatures in theoretical, historical, and cultural contexts, with particular attention to translation, language, nationalism, globalization, and internationalism. Prereq: 2301 (273), 3302 (373), or 3302E (373E). Not open to students with credit for 4903 (573), 4903E (573E), or 3903E.

3903E World Literature: Theory and Practice U 3

Discussion of world literatures in theoretical, historical, and cultural contexts, with particular attention to translation, language, nationalism, globalization, and internationalism. Prereq: Honors standing, and 2301, 3302, or 3302E; or permission of instructor. Not open to students with credit for 3903, 4903, or 4903E.

3990 Approaches to Comparative Studies U 3

Introduces comparative studies majors to theoretical tools, methods of investigation, and key concepts in comparative studies research and scholarship. Prereq: English 1110 (110) or equiv. CompStd major, or permission of instructor. Not open to students with credit for 398.

4191 Research Internship in Comparative Studies U 1 - 3

Intensive research experience in Comparative Studies; individualized research training; students collaborate closely with faculty member on research project; projects either student-initiated or faculty research. Prereq: English 1110 (110) or equiv. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

4193 Individual Studies U 1 - 3

Designed to give students an opportunity for personal study with a member of the faculty. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

4420 Cultural Food Systems and Sustainability U 3

Considering food as both a material good and marker of individual or collective identity, this interdisciplinary course asks students to think reflexively of how food and foodways (i.e., socio-cultural practices related to food production and consumption) are being transformed amid changing lived environments at various scales. This course includes a required agricultural experiential component. Prereq: English 1110.xx or equiv, or GE foundation writing and info literacy course; and Soph, Jr, or Sr standing; or permission of instructor. GE theme sustainability course.

4597.01 Global Studies of Science and Technology U 3

Explores relations among culture, science, and technology in changing global contexts. Previous completion of 2367.02 or 367.02 recommended. Prereq: Completion of a Second Writing course and Natural Science sequence, or permission of instructor. Not open to students with credit for 597.01. GE diversity global studies and cross-disciplinary seminar course.

4597.02 Global Culture U 3

Examines contemporary global cultural flows, the concepts useful in analyzing them, and the questions they raise about power and cultural change. Prereq: Completion of Second Writing course. Not open to students with credit for 597.02. GE diversity global studies and cross-disciplinary seminar course.

4597.03 Global Folklore U 3

Examines contemporary folklore around the world; introduces students to key concepts in folklore scholarship; focuses on transmission and transformation of cultural knowledge and practice, particularly in situations of conflict or upheaval. Prereq: Jr standing, or permission of the instructor. GE diversity global studies and cross-disciplinary seminar course. GE theme migration, mobility, and immobility course.

4798.01 Study Tour: Domestic U 1 - 9

Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Domestic. Repeatable to a maximum of 9 cr hrs or 3 completions.

4798.02 Study Tour: Foreign U 1 - 9

Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Foreign. Repeatable to a maximum of 9 cr hrs or 3 completions.

4803 Studies in Asian American Literature and Culture U 3

Focused study of a topic in Asian American literary and cultural studies. Prereq: English 1110 (110), or equiv. Not open to students with 10 qtr cr hrs in 543 or English 587 or with 6 sem cr hrs in English 4587. Repeatable to a maximum of 6 cr hrs. Cross-listed in English 4587.

4804 Studies in Latino Literature and Culture U 3

Focused study of a topic in Latino/a literary and cultural studies. Prereq: English 1110 (110), or equiv. Not open to students with 10 qtr cr hrs in 544 or 588 or 6 sem cr hrs in English 4588. Repeatable to a maximum of 6 cr hrs. Cross-listed in English 4588.

4822 Native American Identity U 3

Historical and contemporary issues of American Indian identity, primarily in U.S.; focus on American Indian authors, artists, and scholars. Prereq: English 1110 or equiv., or GE foundation writing and info literacy course. GE cultures and ideas and diversity soc div in the US course. GE theme citizenship for div and just wrld course.

4845 Gender, Sexuality, and Science U 3

Examination of relations between gender and science; topics include gendering of "science" and "nature," biological theories of sexual inequality, feminist critiques of science and technology. Prereq: One course in CompStd or WGSSt, or Grad standing, or permission of instructor. Not open to students with credit for 535 or WGSSt 4845 (535). Cross-listed with WGSSt.

4921 Intersections: Approaches to Theorizing Difference U 3

Examines intersections of race, ethnicity, and gender diversity in various sites within American culture (e.g., legal system, civil rights discourse, social justice movements). Prereq: One course in CompStd, WGSSt, or AfAmAST. Not open to students with credit for AfAmAst 4921 or WGSSt 4921. GE theme citizenship for div and just wrld course. Cross-listed in AfAmAST and WGSSt.

4990 Senior Seminar in Comparative Studies U 3

Writing seminar based on students' independent research. Prereq: 3990 (398), and 500 or a 4000-level course in CompStd, and Sr standing; or permission of instructor. Not open to students with credit for 598.

4998 Undergraduate Research in Comparative Studies U 1 - 9

Undergraduate research in variable topics; independent study. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4998H Honors Undergraduate Research in Comparative Studies U 1 - 9

Undergraduate research in variable topics; independent study. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4999 Undergraduate Thesis U 1 - 6

Independent study for 4th-year students wishing to complete a senior thesis. Prereq: Sr standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

4999H Honors Thesis U 1 - 6

Senior honors course leading to graduation with distinction and a thesis; independent study for the student with special aptitude. Honors thesis credits must be completed in addition to coursework requirements for all major and minor programs. Prereq: Honors standing, and a grade of A in at least half of the CompStd courses taken, and an average of B in the remainder, and Sr standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

5061 The Global Mediterranean U G 3

This course examines the governments, societies, and cultures of the littoral states (empires/nations) of the Mediterranean Sea. We will pay attention to the "East/West" paradigm as a prism through which to examine past and present events. Prereq: Not open to students with credit for Italian 5061 or NELC 5061. Cross-listed in Italian and NELC.

5189S Comparative Studies Field School U G 3

Introduction to ethnographic field methods (participant-observation, writing field notes, photography, interviewing), archiving, and public humanities. An introduction to fieldwork is followed by a field experience (where students will reside together in local housing) followed by accessioning, exhibition planning, and reflection. Maximum credit hours include those for English 5189S. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs. Cross-listed in English.

5194 Group Studies U G 1 - 3

Special topics. Open to both undergraduates and graduate students. Repeatable to a maximum of 9 cr hrs.

5240 Race and Public Policy in the United States U G 3

This course explores Race and Public Policy in the United States from Reconstruction to the present. In particular, the class is designed to look at the long list of "hot topics" in the current policy landscape, including policing, housing, wealth gap, immigration, voting, political representation, and others. Prereq: Jr, Sr, or Grad standing; or permission of instructor. Not open to students with credit for AfAmAST 5240 or PubAfrs 5240. Cross-listed in AfAmAST and PubAfrs.

5668 Studies in Orality and Literacy U G 3

Examination of major theories of writing and of oral composition and transmission, in juxtaposition to case material deriving from a variety of Middle Eastern cultures. Prereq: Not open to students with credit for 648, or NELC 5568 (648). Cross-listed in NELC 5568.

5691	Topics in Comparative Studies	U G	3
Critical study of selected themes and topics in a comparative and cross-cultural perspective; emphasis on issues of method, critical theory, representation, power, knowledge, and authority. Prereq: Not open to students with maximum qtr cr hrs for 651. Repeatable to a maximum of 12 cr hrs.			
5797	Study at a Foreign Institution	U G	1 - 30
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Prereq: Permission of department. Repeatable to a maximum of 30 cr hrs.			
5957.01	Comparative Folklore	U G	3
Comparative study of folklore. Topics vary, e.g., folklore and gender politics; theories of myth; folklore, memory, and history. Prereq: 2350, 2350H, English 2270, or 2270H (270). Not open to students with maximum qtr cr hrs for 677.01 and 677.02. Repeatable to a maximum of 6 cr hrs.			
5957.02	Folklore in Circulation	U G	3
Study of transmission of culture. Topics vary, e.g., tourists, travelers, tricksters; cultures of waste and recycling; orality and literacy. Prereq: 2350, 2350H, English 2270 (270), or 2270H. Not open to students with maximum qtr cr hrs for 677.03 and 677.04. Repeatable to a maximum of 6 cr hrs.			
6100	Critical Foundations: Comparative Analysis	G	3
This course prepares students to begin to approach their research interests and questions from a comparative perspective. The function of comparison is not to discover differences and similarities, but to understand more comprehensively the political, social, economic, and aesthetic dimensions of the various discourses and practices that constitute social and individual life.			
6200	Critical Foundations: Interdisciplinarity & Methods	G	3
This course introduces interdisciplinarity as an approach to knowledge production that is problem and question driven and that therefore draws from varied approaches and methodologies. It considers a range of tools that scholars across humanities and social sciences disciplines use to critically analyze the pressing global issues.			
6300	Critical Foundations: Cultural and Social Theory	G	3
This course offers an introduction to comparative cultural studies and social theory. It introduces students to a wide range of well-known thinkers, critical movements, and widely cited texts. Attention will be paid to the ways in which these thinkers, movements, and texts are situated within disciplinary and inter-disciplinary contexts.			
6400	Critical Foundations: The Humanities and Collaborative Practices	G	3
The course introduces students to different forms of collaborative practices and participatory research in the humanities, recognizing the opportunities and possibilities it affords, as well as the challenges and limitations it entails. The course will also offer a space for critical reflection on how we engage other people's ideas, both in terms of our research and within the seminar community.			
6425	Introduction to Latino Studies	G	4
Introduces graduate students to the broad themes, concepts, and questions raised in the interdisciplinary field of Latina/Latino studies. Prereq: Grad standing, or permission of instructor and approved petition to the Graduate School. Not open to students with credit for 705, ArtsSci 705, or Spanish 6705 (705). Cross-listed in Spanish 6705.			
6500	Teaching Seminar in Interdisciplinary Studies	G	3
The seminar will also teach students to develop strategies to support students in questioning and challenging normative discourses while also developing teaching practices that problematize social reality and knowledge. The course topics focus on three areas: course content, methods of delivery, and issues related to in-class 'compartment.'			
6750.01	Introduction to Graduate Study in Folklore I: The Philology of the Vernacular	G	3
Introduction to the canonical folklore genres and the history of folklore as a discipline. Why and how should we study the vernacular? Prereq: Grad standing, or permission of instructor. Not open to students with credit for 770.01, English 6751.01 (770.01), or 6751.11. Cross-listed in English 6751.01.			
6750.02	Introduction to Graduate Study in Folklore II: Fieldwork and Ethnography of Communication	G	3
Introduction to fieldwork and ethnographic writing in the humanities - interviewing, participant observation, and research ethics. Focus on the ethnography of communication and community representations. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 770.02, 770.03, English 6751.02, 6751.22, 770.02, or 770.03. Cross-listed in English 6751.02.			
7193	Individual Studies	G	1 - 9
Designed to give able students an opportunity to pursue special studies not otherwise offered. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
7301	Theorizing Literature	G	3
Provides an accelerated introduction to literary theory and criticism, surveying significant developments in modern and contemporary literary and cultural studies in global perspective. Prereq: Cross-listed in NELC.			

7320	Theorizing Race and Ethnicity	G	3
Advanced introduction to field of critical race theory; critical analysis of concepts of law in relation to race and ethnicity. Prereq: Grad standing or permission of instructor. Not open to students with credit for 752.			
7350.01	Theorizing Folklore I: Tradition and Transmission	G	3
The transmission of cultural forms through time and space across social networks, with special attention to the dynamics of conservation and innovation, reflexivity and habit. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 792 or English 870. Cross-listed in English.			
7350.02	Theorizing Folklore II: Ethnography of Performance	G	3
Performance as a heightened mode of communication characteristic of vernacular cultural process, studied in the context of ongoing social interaction. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 792 or English 870. Cross-listed in English.			
7350.03	Theorizing Folklore III: Differentiation, Identification, and The Folk	G	3
Cultural form as social marker. "Folklore" and other metacultural concepts in the history of modernity. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 792 or English 870. Cross-listed in English.			
7360	Theorizing Culture	G	3
The concept of culture as it has developed over time; emphasis on tension between descriptive and normative approaches. Prereq: Grad standing or permission of instructor. Not open to students with credit for 716.			
7999	Research in Comparative Studies: Thesis	G	1 - 12
Research for Master's thesis. Repeatable to a maximum of 24 cr hrs. This course is graded S/U.			
8100	Interdisciplinary Learning Laboratory I	G	3
The Comparative Studies Interdisciplinary Learning Laboratories are two-part courses that seek to give participants opportunities to engage in sustained interdisciplinary research, to workshop their research projects in conversation with one another, and to share their projects with broader publics. Expect to enroll in CompStd 8200 subsequent to this course. Repeatable to a maximum of 18 cr hrs.			
8193	Individual Studies	G	1 - 9
Designed to give able students an opportunity to pursue special studies not otherwise offered. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
8200	Interdisciplinary Learning Laboratory II	G	3
The Comparative Studies Interdisciplinary Learning Laboratories are two-part year-long courses that seek to give participants opportunities to engage in sustained interdisciplinary research, to workshop their research projects in conversation with one another, and to share their projects with broader publics. Taken in conjunction with CompStd 8100. Prereq or concur: 8100. Repeatable to a maximum of 18 cr hrs.			
8791	Seminar in Interdisciplinary Theory	G	3
Discussion of interdisciplinary cultural theory. Repeatable to a maximum of 9 cr hrs.			
8842	Seminar in Science and Medicine	G	3
Explores relationships between science, technology and the health sciences and medical practices; topic varies. Repeatable to a maximum of 15 cr hrs.			
8858	Seminar in Folklore	G	3
Advanced seminar on current or specialized topics in folklore studies. Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with 9 sem cr hrs of English 8858.01 (can include equiv qtr cr hrs for 870), English 8858.02, or CompStd 8858. Repeatable to a maximum of 9 cr hrs. Cross-listed in English 8858.01.			
8872	Seminar in Religious Studies	G	3
Explores relationships between religious institutions and practices and other areas, including politics, gender and sexuality, technology, popular culture; topics vary. Repeatable to a maximum of 15 cr hrs.			
8990	Dissertation Writing Workshop	G	2
Since the dissertation is often your first effort to construct a complex, original, and extended argument, interpretation and/or analysis, this writing workshop will assist you in developing concrete strategies for tackling this major task, hold you accountable for making progress on the dissertation, and contribute to the creation of an intellectual community among Comp Studies graduate students. This course is graded S/U.			
8998	Research in Comparative Studies: Candidacy Examination	G	1 - 12
Research in preparation for Ph.D. exams. Repeatable to a maximum of 27 cr hrs or 12 completions. This course is graded S/U.			
8999	Research in Comparative Studies: Dissertation	G	1 - 12
Research for dissertation. Repeatable. This course is graded S/U.			

102 Computer Science and Engineering

1110 Introduction to Computing Technology U 3

A course of general interest giving experience with personal computer software, e.g., word processors and spreadsheets; provides fundamental computer literacy; neither teaches nor requires programming. Prereq: Not open to students with credit for 1111 or 1113.

1111 Introduction to Computer-Assisted Problem Solving U 3

Problem solving techniques using productivity software; spreadsheets, formulas, conditional logic; relational databases, relational algebra; word processing; data presentation; graphics. Prereq: Not open to students with credit for 1112 (105), 1113 (101), or 200. GE quant reason math and logical any course. GE foundation math and quant reasoning or data anyl course.

1114 Introduction to Databases Using MS Access U 1½

Database concepts and techniques for efficient/effective data handling, computational analysis and decision support. Prereq: Not open to students with credit for 1111, 1112, or 2111.

1211 Computational Thinking in Context: Images, Animation, and Games U 3

Introduction to computational thinking, focusing on problem solving and programming concepts and skills needed to manipulate digital images and to create interactive graphics, animations, and games; creativity and imagination encouraged.

1213 Computational Thinking in Context: Game Development U 4

Introduction to computational thinking, focusing on problem solving and programming concepts and skills needed to develop video games.

1222 Introduction to Computer Programming in C++ for Engineers and Scientists U 3

Introduction to computer programming and to problem solving techniques using computer programs with applications in engineering and the physical sciences; algorithm development; programming lab experience. Concur: Math 1151, 1154, or 1161. Not open to students with credit for Engr 1281.01 or 1281.02. This course is available for EM credit.

1223 Introduction to Computer Programming in Java U 3

Introduction to computer programming and to problem solving techniques using computer programs; programming lab experience. Prereq: Math 1130, 1140, 1149, 1150, or 1151, or Math Placement Level L. This course is available for EM credit.

1224 Introduction to Computer Programming in Python U 3

Introduction to computer programming and to problem solving techniques using computer programs; programming lab experience. Prereq: Math 1130, 1140, 1149, 1150, or 1151, or Math Placement Level L.

2021 Introduction to Modeling and Simulation U 3

Concepts of modeling and simulation; develop MATLAB skills to explore modeling concepts; project: design, implementation, verification/validation of model; oral and written project report. Prereq: Math 1151 (152) or equivalent, and Physics 1250 (131). Not open to students with credit for 1221 or Engr 1221.

2111 Modeling and Problem Solving with Spreadsheets and Databases U 3

Spreadsheet and database modeling/programming concepts and techniques to solve business related problems; efficient/effective data handling, computational analysis and decision support. Additional topics: computer concepts, networking, project integration. Prereq: Math 1130 or above, or Math Placement Level L. Not open to students with credit for 1111 or 1112. This course is available for EM credit. GE quant reason math and logical any course. GE foundation math and quant reasoning or data anyl course.

2112 Modeling and Problem Solving with Spreadsheets and Databases for Engineers U 3

Spreadsheet and database modeling/programming concepts and techniques to solve business and engineering related problems; efficient/effective data handling, computational analysis and decision support. Prereq: 1222, 1223, 1224, Engr 1281.01H, or 1281.02H. Prereq or concur: Math 1151, 1161.01, or 1161.02. Not open to students with credit for 1111, 1112, 1113, or 2111.

2122 Data Structures Using C++ U 3

Introduction to programming in C++ and object-oriented programming; encapsulation using classes, inheritance, etc. Prereq: 1222 (202). Not open to students with credit for 230.

2123 Data Structures Using Java U 3

Subroutines and modular programming; searching; basic data structures; recursion; introduction to sequential files. Prereq: 1223.

2133 Business Programming with File Processing U 3

Business data processing principles and programming; sequential file processing algorithms, sorting, data validation; COBOL is taught. Prereq: 2123, and enrollment in Business Info Sys major or CIS minor.

2193 Individual Studies in Computer Science and Engineering U 1 - 10

Planning, conducting, and reporting a special study appropriate to the needs of the students. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.

2194 Group Studies in Computer Science and Engineering U 1 - 10

Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions.

2194H Group Studies in Computer Science and Engineering U 1 - 10

Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions.

2221 Software I: Software Components U 4

Intellectual foundations of software engineering; design-by-contract principles; mathematical modeling of software functionality; component-based software from client perspective; layered data representation. Prereq: 1212, 1221, 1222, 1223, 1224, Engr 1221, 1281.01H, 1281.02H, or CSE Placement Level A. Prereq or concur: Math 1151, 1161.01, or 1161.02. Not open to students with credit for 5022. This course is available for EM credit.

2231 Software II: Software Development and Design U 4

Data representation using hashing, search trees, and linked data structures; algorithms for sorting; using trees for language processing; component interface design; best practices in Java. Prereq: 2221. Concur: 2321. Not open to students with credit for 2231.01.

2321 Foundations I: Discrete Structures U 3

Propositional and first-order logic; basic proof techniques; graphs, trees; analysis of algorithms; asymptotic analysis; recurrence relations. Prereq: 2122, 2123, or 2221; and Math 1151, or 1161. Concur (for students with credit for 2221): 2231.

2331 Foundations II: Data Structures and Algorithms U 3

Design/analysis of algorithms and data structures; divide-and-conquer; sorting and selection, search trees, hashing, graph algorithms, string matching; probabilistic analysis; randomized algorithms; NP-completeness. Prereq: 2231, 2321, and Stat 3460 or 3470, and enrollment in CSE, CIS, ECE, Data Analytics, or Math major, or CIS minor. Concur: Math 3345. Not open to students with credit for 5331.

2371 Quantum Circuits and Algorithms U 3

Designed to provide students with a broad introduction to quantum computing, the future of computing. Using tools such as Qbraid, students from diverse backgrounds will visualize quantum computing concepts and compare them with classical computing models. This will enable the comparison of quantum algorithms and their advantages over corresponding classical algorithms. Prereq: Soph, Jr, or Sr standing.

2421 Systems I: Introduction to Low-Level Programming and Computer Organization U 4

Introduction to computer architecture at machine and assembly language level; pointers and addressing; C programming at machine level; computer organization. Prereq: 2122, 2123, or 2231; and 2321 or Math 2566; and enrollment in CSE, CIS, Data Analytics, Music (BS), Eng Physics, or Math major.

2431 Systems II: Introduction to Operating Systems U 3

Introduction to operating system concepts: process, CPU scheduling, memory management, file system and storage, and multi-threaded programming. Prereq: 2421, or 2451 and ECE 2560; and enrollment in CSE, CIS, Data Analytics, Engr Physics, or ECE major. Not open to students with credit for 5431.

2451 Advanced C Programming U 2

Advanced C features for students with significant programming experience in another language. Prereq: 2221 or 222. Concur: 2231 or 321. Not open to students with credit for 2421.

2501 Social, Ethical, and Professional Issues in Computing U 1

Social, ethical, and professional issues facing computing professionals; ethical principles; discussion of case studies. Prereq: 2122, 2123, or 2231; and Gen Ed Writing: Level 2; and enrollment in CSE or CIS major, or Information Security minor. Not open to students with credit for 5501.

3231 Software Engineering Techniques U 3

Software engineering issues, techniques, methodologies and technologies; software lifecycle activities: requirements analysis, architecture, design, testing, deployment, maintenance; project management; enterprise software systems; frameworks. Prereq: 3901 or 3902 or 3903. Not open to students with credit for 5231 (757).

3232 Software Requirements Analysis U 3

Information systems analysis; object-oriented analysis models and tools; use cases, system modeling using UML; requirements specification development; term project. Prereq: 3241, 3901, 3902, 3903, or 5241; and enrollment in CIS, CSE, ECE, or Business Info Sys major. Not open to students with credit for 5232.

3241 Introduction to Database Systems U 3

Database systems use, logical design, entity-relationship model, normalization, query languages and SQL, relational algebra and calculus, object relational databases, XML, active databases; database design project. Prereq: 2123 or 2231; and 2321, or 2111 and Math 2366; and enrollment in CSE, CIS, ISE, Data Analytics, ECE, Engr Physics, or Business Info Sys majors, or CIS minor. Not open to students with credit for 5241.

3244 Data Management in the Cloud U 3

Systematic organization of data on cloud computing architectures; basic indexing techniques, including B-tree and hash-based indexing; fundamentals of query optimization, including access path selection and cardinality estimation; full and partial replication; data partitioning and distributed task scheduling. Prereq: 3241 or 5241; and 2421 or 3430; and enrollment in CSE, CIS, or Data Analytics major.

Computer Science and Engineering 103

3321 Automata and Formal Languages	U 3
Machine-based and grammatical models of computation; finite automata and regular languages, pushdown automata and context-free languages, Turing machines; non-determinism; Church's Thesis. Prereq: 2231, 2421, 2331, and Math 3345; and enrollment in CSE, CIS, ECE, or Math major. Not open to students with credit for 5321.	
3341 Principles of Programming Languages	U 3
Formal languages and grammars; recursive descent parsing; data types, expressions, control structures, parameter passing; compilers and interpreters; memory management; functional programming principles. Prereq: 2231, 2331 (680), and 2421, and 3901 (560), 3902, or 3903. Not open to students with credit for 5341 (655).	
3421 Introduction to Computer Architecture	U 3
Organization of hardware and software in modern computer systems, including instruction set design, processor control, ALU design, pipelining, multicores and accelerators, and memory subsystem design. Prereq: 2231, and 2421 or ECE 2560, and 2060; and enrollment in CSE, CIS, or ECE majors. Not open to students with credit for 5421.	
3430 Overview of Computer Systems For Non-Majors	U 4
Introduction to computer architecture and organization at machine and assembly level; pointers and addressing using C programming; introduction to operating system concepts: process, memory management, file system and storage, and multi-threaded programming. Prereq: 2122, 2123, or 2231; and 2321; and enrollment in Data Analytics major or CIS minor. Not open to students with credit for 2421 or 2431. Not open to CSE/CIS majors.	
3461 Computer Networking and Internet Technologies	U 3
Computer networks, communication protocols, Internet TCP/IP and applications, wireless communications and network security. Prereq: 2421; or 3430; or 2451 and ECE 2560; and enrollment in CIS, CSE, ECE, Engr Physics, or Data Analytics major. Prereq or concur: 2431 or 3430. Not open to students with credit for 5461.	
3521 Survey of Artificial Intelligence I: Basic Techniques	U 3
Survey of basic concepts and techniques in artificial intelligence, including problem solving, knowledge representation, and machine learning. Prereq: 2331 or 5331; and Math 2174 or 2568 or 4568 or 5520H; and Stat 3201 or 3450 or 3460 or 3470 or 4201 or Math 4530 or 5530H; and enrollment in CSE, CIS, ECE or Data Analytics major. Not open to students with credit for 5521.	
3541 Computer Game and Animation Techniques	U 3
Fundamental algorithms and mathematics in production of computer animation and video games, emphasizing control and rendering of animated characters. Prereq: 3901, 3902, or 3903; and enrollment in CSE, CIS, Music (BS), or ECE major. Not open to students with credit for 5541.	
3901 Project: Design, Development, and Documentation of Web Applications	U 4
Intensive group project involving design, development, and documentation of a web application; client-side and server-side scripting; communication skills emphasized; builds programming maturity. Prereq: 2231; and 2321; and 2421 or 3430, or 2451 and ECE 2560; and enrollment in CSE, CIS, ECE, or Data Analytics major.	
3902 Project: Design, Development, and Documentation of Interactive Systems	U 4
Intensive group project involving design, development, and documentation of an interactive software system, a 2D interactive game; communication skills emphasized; builds programming maturity. Prereq: 2231; and 2321; and 2421 or 3430, or 2451 and ECE 2560; and enrollment in CSE, CIS, ECE, Music (BS), or Data Analytics major.	
3903 Project: Design, Development, and Documentation of System Software	U 4
Intensive group project involving design, development, and documentation of system software including an assembler and a linking loader; communication skills emphasized; builds programming maturity. Prereq: 2231; and 2321; and 2421 or 3430, or 2451 and ECE 2560; and enrollment in CSE, CIS, ECE, or Data Analytics major.	
4191 Professional Practice in Industry	U 0
Preparation and submission of a comprehensive report based on actual employment experience in a co-op job in industry. Prereq: Permission of the CSE Advising Office. Repeatable to a maximum of 8 completions. This course is progress graded (S/U).	
4193 Individual Studies in Computer Science and Engineering	U 1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.	
4194 Group Studies in Computer Science and Engineering	U 1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions.	
4194H Group Studies in Computer Science and Engineering	U 1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions.	

4251 The UNIX Programming Environment	U 1
Introduction to the UNIX programming environment including: shell programming (csh); regular expressions; makefiles; grep, sed, and awk programming languages. Prereq: 2122, 2123, or 2231; and 2321; and enrollment in CSE, CIS, ECE, Engr Physics, or Data Analytics major, or CIS minor. This course is graded S/U.	
4252 Programming in C++	U 1
Syntax and pragmatics of C++ programming; C++ types, arrays, classes, pointers; objects and classes; compile-time vs. run-time picture; inheritance; template classes. Prereq: 2123 or 2231; and 2321; and enrollment in CSE, CIS, ECE, Engr Physics, or Data Analytics major, or CIS minor. Not open to students with credit for 2122. This course is graded S/U.	
4253 Programming in C#	U 1
C# programming for students well-versed in programming with another object-oriented language. Prereq: 2122, 2123, or 2231; and 2321; and enrollment in CSE, CIS, ECE, Engr Physics, or Data Analytics major, or CIS minor. This course is graded S/U.	
4256 Programming in Python	U 1
Python programming for students well-versed in programming with another imperative language. Prereq: 2122, 2123, or 2231; and 2321; and enrollment in CSE, CIS, ECE, Engr Physics, or Data Analytics major, or CIS minor. This course is graded S/U.	
4471 Information Security	U 3
Introduction to security of digital information; threats and attacks; regulations; risk management; attack detection and response; cryptography; forensics; technical training and certifications. Prereq: 2231 and 2321; and enrollment in CSE, CIS, ECE, or Data Analytics major, or Information Security or CIS minor.	
4998 Undergraduate Research in Computer Science and Engineering	U 1 - 10
Opportunity for undergraduate student to conduct research in Computer Science and Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.	
4998H Undergraduate Research in Computer Science and Engineering	U 1 - 10
Opportunity for undergraduate student to conduct research in Computer Science and Engineering. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.	
4999 Computer Science and Engineering Research for Thesis	U 1 - 10
Supervised research and project work arranged individually. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.	
4999H Computer Science and Engineering Research for Thesis	U 1 - 10
Supervised research and project work arranged individually for honors students. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.	
5022 Software I: Software Components	U G 3
Intellectual foundations of software engineering; design-by-contract principles; mathematical modeling of software functionality; component-based software from client perspective; layered data representation. Previous programming experience in any language required. Prereq: At least one term of Calculus. Not open to students with credit for 2221, 2231, 4221, 321, or 502. Not open to students enrolled in a CSE or CIS major.	
5023 Software II: Software Development and Design	U G 3
Data representation using hashing, search trees, and linked data structures; algorithms for sorting; using trees for language processing; component interface design; best practices in Java. Prereq: 2221 or 5022. Not open to students with credit for 2231, 2231.01, 321, or 421.	
5032 Foundations I: Discrete Structures	U G 2
Propositional and first-order logic; basic proof techniques; graphs, trees; analysis of algorithms; asymptotic analysis; recurrence relations. Prereq: 5022 or equiv. Not open to students with credit for 2321, 625, or 680.	
5042 Systems I: Introduction to Low-Level Programming and Computer Organization	U G 3
Introduction to computer architecture at machine and assembly language level; pointers and addressing; C programming at machine level; computer organization. Prereq: 2122, 2123, or 2231; and 2321 or Math 2566; or Grad standing. Not open to students with credit for 2421.	
5043 Overview of Computer Systems For Non-Majors	U G 3
Introduction to computer architecture and organization at machine and assembly level; pointers and addressing using C programming; introduction to operating system concepts: process, memory management, file system and storage, and multi-threaded programming. Prereq: 5022 or equiv, and 5032 or equiv. Not open to students with credit for 2421, 5042, 2431, 3430, 360, or 660. Not open to CSE/CIS majors.	
5052 Survey of Artificial Intelligence for Non-Majors	U G 3
Survey of the basic concepts and techniques in artificial intelligence, including problem solving, knowledge representation, and machine learning. Prereq: 1211, 1221, 1222, 1223, or 2221, or Grad standing. Not open to students with credit for 3521 (630), 4521, or 5521, or students enrolled in a CSE or CIS major.	

104 Computer Science and Engineering

5231	Software Engineering Techniques	U G	2
Software engineering issues, techniques, methodologies and technologies; software lifecycle activities: requirements analysis, architecture, design, testing, deployment, maintenance; project management; enterprise software systems; frameworks. Prereq: 3901 or 3902 or 3903 (560). Not open to students with credit for 3231 (757).			
5232	Software Requirements Analysis	U G	2
Information systems analysis; object-oriented analysis models and tools; use cases, system modeling using UML; requirements specification development; term project. Prereq: 3241 or 3901 or 3902 or 3903 (560) or 5241 (670). Not open to students with credit for 3232 (616).			
5234	Distributed Enterprise Computing	U G	3
Current application and middleware frameworks for distributed enterprise computing; XML; Enterprise Java; SOAP and REST web services; AJAX and JSON; enterprise service bus; Hadoop; mobile computing. Prereq: 2431 or 5431 (660). Not open to students with credit for 769.			
5235	Applied Enterprise Architectures and Services	U G	3
Modeling/analysis of complex enterprise architectures; enterprise patterns (workflow, broker, warehousing); methods for service performance (lean, ontologies, data mining, etc.); emerging topics in semantic cyber-infrastructure, social computation. Prereq: 5911 (758 and 762), 5912 (786), 5913 (682), 5914 (731), 5915 (772), or 778.			
5236	Mobile Application Development	U G	3
Mobile application development frameworks; Architecture, design and engineering issues, techniques, methodologies for mobile application development. Prereq: 3901 or 3902 or 3903 (560).			
5239	Intermediate Studies in Software Engineering	U G	2 - 3
Intermediate-level topics in software engineering. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5241	Introduction to Database Systems	U G	2
Database systems use; logical design; entity-relationship model; normalization; query languages and SQL; relational algebra and calculus; object relational databases; XML; active databases; database design project. Prereq: 2133 or 2231 or 2233 (314) or 321, and 2321 or Math 2366 (366). Not open to students with credit for 3241 (670).			
5242	Advanced Database Management Systems	U G	3
Transaction management; query processing and optimization; organization of database systems, advanced indexing, multi-dimensional data, similarity-based analysis, performance evaluation, new database applications. Prereq: 3241 or 5241, and 2421 or 5042.			
5243	Introduction to Data Mining	U G	3
Knowledge discovery, data mining, data preprocessing, data transformations; clustering, classification, frequent pattern mining, anomaly detection, graph and network analysis; applications. Prereq: 3241 or 5241; and 2331, 5331, Stat 3301, or ISE 3200; and enrollment in CSE, CIS, ECE, Data Analytics, or ISE major.			
5245	Introduction to Network Science	U G	3
Introduction to Network Science; Global and Local Network Measures; PageRank; Community Discovery Algorithms; Network Models; Understanding the role of network analysis in Web and Social network applications. Prereq: 2331.			
5249	Intermediate Studies in Databases	U G	2 - 3
Intermediate-level topics in databases. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5321	Automata and Formal Languages	U G	2
Machine-based and grammatical models of computation; finite automata and regular languages, pushdown automata and context-free languages, Turing machines; non-determinism; Church's Thesis; halting problem. Prereq: 2231 or 321, and 2421 or 360, and 2331 or Math 566. Not open to students with credit for 3321 (625).			
5329	Intermediate Studies in Computation Theory	U G	2 - 3
Intermediate-level topics in computation theory. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5331	Foundations II: Data Structures and Algorithms	U G	2
Design/analysis of algorithms and data structures; divide-and-conquer; sorting and selection, search trees, hashing, graph algorithms, string matching; probabilistic analysis; randomized algorithms; NP-completeness. Prereq: 2231 or 321, and 2321 or Math 366, and 2566 (566), and Stat 3470 (427). Not open to students with credit for 2331 (680).			
5339	Intermediate Studies in Algorithms	U G	2 - 3
Intermediate-level topics in algorithms. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5341	Principles of Programming Languages	U G	2
Formal languages and grammars; recursive descent parsing; data types, expressions, control structures, parameter passing; compilers and interpreters; memory management; functional programming principles. Prereq: 2231, 2331 (680) and 2421, and 3901 (560), 3902, or 3903. Not open to students with credit for 3341 (655).			

5343	Compiler Design and Implementation	U G	3
Lexical and syntax analysis using compiler generation tools; type checking; intermediate code; control-flow analysis; dataflow analysis; code optimizations; code generation; compiler project. Prereq: 3901 (560), 3902, or 3903, and 3341 (655). Not open to students with credit for 756.			
5349	Intermediate Studies in Programming Languages	U G	2 - 3
Intermediate-level topics in programming languages. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5351	Introduction to Cryptography	U G	3
Foundations of cryptography; mathematical formulations/proofs of security goals; theory and practical constructions of encryption schemes, MACs, digital signatures; zero-knowledge proof systems; cryptographic protocols. Prereq: 2331 (680), 5331, Math 4573 (573), or 4580 (580), and Stat 3460 (427) or 3470. Not open to students with credit for 723 or 794Q.			
5359	Intermediate Studies in Cryptography	U G	2 - 3
Intermediate-level topics in cryptography. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5361	Numerical Methods	U G	3
Numerical methods for scientific computation: computer arithmetic, rounding errors, machine precision, machine representation, root-finding, interpolation, integration, linear systems, splines, smoothing, curve-fitting, linear programming. Prereq: 2231, and Math 2568 (268) or 571, and 1151 (151). Not open to students with credit for 541.			
5421	Introduction to Computer Architecture	U G	2
Organization of hardware and software in modern computer systems, including instruction set design, processor control, ALU design, pipelining, multicores and accelerators, and memory subsystem design. Prereq: 2231, and 2421 or ECE 2560, and enrollment in CSE, CIS, or ECE majors; or Grad standing. Not open to students with credit for 3421.			
5429	Intermediate Studies in Computer Architecture	U G	2 - 3
Intermediate-level topics in computer architecture. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5431	Systems II: Introduction to Operating Systems	U G	2
Introduction to operating system concepts: process, CPU scheduling, memory management, file system and storage, and multi-threaded programming. Prereq: 5042 or equiv. Not open to students with credit for 2431 or 660.			
5432	Mobile Handset Systems and Networking	U G	3
Mobile handset architecture: processors, memory, I/O devices, sensors, virtual machine and power management; different ranges of wireless communication technologies; TCP/IP over wireless; mobile social networking. Prereq: 2421, 3430, or 2451 and ECE 2560; or Grad standing.			
5433	Operating Systems Laboratory	U G	3
Introduction to the internals of operating systems; designing and implementing components within commercial operating systems: system calls, CPU scheduling, context switching, process management, memory management, file systems. Prereq: 2431 or 5431. Not open to students with credit for 662.			
5434	Comparative Operating Systems	U G	3
A careful examination of a number of representative computer operating systems. Prereq: 2431 (660) or 5431. Not open to students with credit for 741.			
5439	Intermediate Studies in Operating Systems	U G	2 - 3
Intermediate-level topics in operating systems. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5441	Introduction to Parallel Computing	U G	3
Parallel programming models; sequential and parallel performance issues; high-performance computer architecture; design, analysis, implementation and performance evaluation of parallel algorithms. Prereq: 2231, 2321, and 2421; or 2231, 2321, and 3430; or 2231, 2321, 2451, and ECE 2560; or Grad standing.			
5442	High-Performance Deep/Machine Learning	U G	3
This course combines high performance computing (HPC) and artificial intelligence (AI). This emerging trend combines the principles and practices of distributed training, which is critical for the success of both deep learning and machine learning disciplines. Prereq: 2431, or 3430; and 3521, or 5521; or Grad standing.			
5449	Intermediate Studies in Parallel Computing	U G	2 - 3
Intermediate-level topics in parallel computing. Repeatable to a maximum of 12 cr hrs or 6 completions.			
5461	Computer Networking and Internet Technologies	U G	2
Computer networks, communication protocols, Internet TCP/IP and applications, wireless communications and network security. Prereq: 2451, and 2421 or ECE 2560 (265). Concur: 2431. Not open to students with credit for 3461 (677).			
5462	Network Programming	U G	3
IP-based socket programming in C/C++, TinyOS programming in NesC. Prereq: 3461, 5461, or ECE 3561.			

Computer Science and Engineering 105

<p>5463 Introduction to Wireless Networking U G 3</p> <p>Fundamental concepts in cellular design, Wireless-LANs, MANETs, and sensor networks will be explored. Specific topics will include propagation, fading, cellular-design, power-management, routing, scheduling, and control. Prereq: 3461, 5461, or ECE 3561; or Grad standing in Engineering or Math and Physical Sciences. Cross-listed in ECE 5101.</p> <p>5469 Intermediate Studies in Computer Networking U G 2 - 3</p> <p>Intermediate-level topics in computer networking. Repeatable to a maximum of 12 cr hrs or 6 completions.</p> <p>5471 Introduction to Cybersecurity U G 3</p> <p>Introduction to cybersecurity. Technical fundamentals of data, software, component, network, and system security. Cybersecurity from an organizational and societal view point, including human factors. Prereq: Jr, Sr, or Grad standing, or permission of instructor. Not open to students with credit for ECE 5561. Cross-listed in ECE 5561.</p> <p>5472 Information Security Projects U G 3</p> <p>Team-based projects: solve information security problems (mobile/static host/network hardening, intrusion detection and vulnerability scanning, forensics); results communicated through report writing and presentation. Prereq: 3901, 3902, or 3903, and 3461, 5461, or 4471; or Grad standing.</p> <p>5473 Network Security U G 3</p> <p>Security threats and services, elements of cryptography, protocols for security services, network and internet security, advanced security issues and technologies. Prereq: 3461 (677) or 5461. Not open to students with credit for 651.</p> <p>5474 Software Security U G 3</p> <p>Software security fundamentals, secure coding principles and practices, common software vulnerabilities, memory exploits (shell code), vulnerability analysis (e.g., reverse engineering, fuzzing and symbolic execution), and defenses against common vulnerability exploitation. Prereq: 2431, or Grad standing.</p> <p>5477.01 Offensive Security U G 3</p> <p>This course will give students an overview of existing offensive computing techniques, which include well known attacks that break confidentiality, integrity and availability of computing resources. Attacks targeting on human weaknesses without taking special care to security will also be discussed. Prereq: 2431, 5431, or Grad standing. Not open to students with credit for ECE 5567.01. Cross-listed in ECE 5567.01.</p> <p>5477.02 Reverse Engineering and Malware Analysis U G 3</p> <p>This course will give students an overview of cutting edge reverse engineering techniques as well as software security and defense practices. Programming experience in C required. Prereq: 2431, 5431, or Grad standing. Prereq or concur: 5471 or ECE 5561. Not open to students with credit for ECE 5567.02. Cross-listed in ECE 5567.02.</p> <p>5479 Intermediate Studies in Computer Security U G 2 - 3</p> <p>Intermediate-level topics in computer security. Repeatable to a maximum of 12 cr hrs or 6 completions.</p> <p>5501 Social, Ethical, and Professional Issues in Computing U G 1</p> <p>Social, ethical, and professional issues facing computing professionals; ethical principles; discussion of case studies. Prereq: 1222, or 1223, or 2231; and 2321; or graduate standing. Not open to students with credit for 2501.</p> <p>5521 Survey of Artificial Intelligence I: Basic Techniques U G 2</p> <p>Survey of the basic concepts and techniques in artificial Intelligence, including problem solving, knowledge representation, and machine learning. Prereq: 2331 or 5331, or Grad standing. Not open to students with credit for 3521.</p> <p>5522 Survey of Artificial Intelligence II: Advanced Techniques U G 3</p> <p>Survey of advanced concepts, techniques, and applications of artificial intelligence, including knowledge representation, learning, natural language understanding, and vision. Prereq: 3521 or 5521, and enrollment in CSE, CIS, ECE, or Data Analytics major; or Grad standing.</p> <p>5523 Machine Learning and Statistical Pattern Recognition U G 3</p> <p>Introduction to basic concepts of machine learning and statistical pattern recognition; techniques for classification, clustering and data representation and their theoretical analysis. Prereq: 3521, 5521, or 5243; and 5522, Stat 3460, or 3470; and Math 2568, 2174, 4568, or 5520H; or Grad standing.</p> <p>5524 Computer Vision for Human-Computer Interaction U G 3</p> <p>Computer vision algorithms for use in human-computer interactive systems; image formation, image features, segmentation, shape analysis, object tracking, motion calculation, and applications. Prereq: 2331, or Sr or Grad standing. Not open to students with credit for 634.</p> <p>5525 Foundations of Speech and Language Processing U G 3</p> <p>Fundamentals of natural language processing, automatic speech recognition and speech synthesis; lab projects concentrating on building systems to process written and/or spoken language. Prereq: 3521 or 5521, and 5522, Stat 3460, or 3470. Not open to students with credit for 733.</p> <p>5526 Introduction to Neural Networks U G 3</p> <p>Survey of fundamental methods and techniques of neural networks; single- and multi-layer perceptrons; radial-basis function networks; support vector machines; recurrent networks; supervised and unsupervised learning. Prereq: 3521 or 5521. Not open to students with credit for 779.</p>	<p>5531 Introduction to Cognitive Science U G 3</p> <p>Interdisciplinary survey of the fields of artificial intelligence, linguistics, neuroscience, philosophy of mind, and psychology; various aspects of cognitive perception, representation, and computation. Prereq: At least 12 cr hrs in at least two of these four subjects (only 6 cr hrs from any one subject): CSE, Ling, Philos, Psych. Not open to students with credit for 612, Linguist 612, Philos 612, or Psych 612. Cross-listed in Ling, Philos, or Psych.</p> <p>5539 Intermediate Studies in Artificial Intelligence U G 2 - 3</p> <p>Intermediate-level topics in artificial intelligence. Repeatable to a maximum of 12 cr hrs or 6 completions.</p> <p>5541 Computer Game and Animation Techniques U G 2</p> <p>Fundamental algorithms and mathematics in the production of computer animation and video games, emphasizing the control and rendering of animated characters. Prereq: 3901 or 3902 or 3903 (560). Not open to students with credit for 3541 (683).</p> <p>5542 Real-Time Rendering U G 3</p> <p>Comprehensive list of topics in real-time rendering using OpenGL and GLSL, including coordinate systems, transformations, viewing, illumination, texture mapping, and shader-based algorithms. Prereq: 3901 (560) or 3902 or 3903, and Math 2568 (568) or 571. Not open to students with credit for 781.</p> <p>5543 Geometric Modeling U G 3</p> <p>Common algorithmic and mathematical techniques for modeling geometric objects in computer graphics and CAD applications; sample based modeling, mesh generation, and hierarchical representations. Prereq: Math 2568 (568) or 571. Not open to students with credit for 784.</p> <p>5544 Introduction to Data Visualization U G 3</p> <p>Principles and methods for visualizing data from measurements and calculations in physical and life sciences, and transactional and social disciplines; information visualization; scientific visualization. Prereq: 5361, Stat 3301, 3541, or 5541. Not open to students with credit for 694L.</p> <p>5545 Advanced Computer Graphics U G 3</p> <p>Advanced topics in computer graphics; image synthesis, lighting and rendering, sampling and material properties, volume rendering. Prereq: 3541 or 5541.</p> <p>5546 Virtual Reality U G 3</p> <p>Principles and methods for the design, development, and evaluation of three-dimensional interfaces in virtual environments and their applications in data science, medicine, and engineering. Prereq: 3541, 5541, 5542, or 5544, or permission of instructor.</p> <p>5559 Intermediate Studies in Computer Graphics U G 2 - 3</p> <p>Intermediate-level topics in computer graphics. Repeatable to a maximum of 12 cr hrs or 6 completions.</p> <p>5821 Legal Topics for Computer Engineers U G 3</p> <p>This course introduces students to areas of law that govern computer engineering and design. The goals of the course include mastery of a set of legal doctrines, as well as immersion in the legal method used by lawyers to analyze problems and by judges to decide cases. Students can expect to learn how to evaluate computer engineering methods and projects through the lens of legal analysis. Prereq: Philos 1338 or CSE 2501, and 3901 or 3902 or 3903; or Grad standing; or permission of instructor.</p> <p>5889 Intermediate Studies in Multidisciplinary Computing U G 2 - 3</p> <p>Intermediate-level topics in multidisciplinary computing techniques Repeatable to a maximum of 8 cr hrs or 4 completions.</p> <p>5891 Proseminar in Cognitive Science U G 3</p> <p>Provides an in-depth examination of cognitive science from an interdisciplinary perspective. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs. Cross-listed in Ling, Philos, Psych, and SphHrng.</p> <p>5911 Capstone Design: Software Applications U G 4</p> <p>Capstone design project: application of software engineering techniques, methodologies and technologies in software lifecycle activities using enterprise software frameworks; teamwork, written and oral communication. Prereq: 3231 or 5231, and 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.</p> <p>5912 Capstone Design: Game Design and Development U G 4</p> <p>Capstone design project; conceptual and technical design and implementation of interactive game, integrating custom code and toolkits; teamwork, written and oral communication skills. Prereq: 3541 or 5541, and 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.</p> <p>5913 Capstone Design: Computer Animation U G 4</p> <p>Capstone design project: conceptual and technical design and implementation of computer animation incorporating animation elements; teamwork, written and oral communication skills. Prereq: 3541 or 5541, and 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.</p> <p>5914 Capstone Design: Knowledge-Based Systems U G 4</p> <p>Capstone design project; conceptual and technical design; theory and practice of knowledge-based systems; teamwork, written and oral communication skills. Prereq: 3521 or 5521, and 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.</p>
---	--

106 Computer Science and Engineering

5915	Capstone Design: Information Systems	U G	4
Capstone design project; information system principles: database design methods and tools, indexing, searching, application development, testing, evaluation; teamwork, written and oral communication skills. Prereq: 3241 or 5241, and 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.			
5916	Capstone Design: Research-Focused Projects	U G	4
Capstone design project; convergent and scalable research formulation and development, computational solutions to open-ended research problems, teamwork, written and oral communication skills. Prereq: 2501 or Philos 1338, and CSE 3901 or 3902 or 3903, and second writing course; or Grad standing.			
6011	Computational Thinking in Context	G	3
Introduction to computational thinking, focusing on problem solving and programming concepts such as abstraction; Use of computing to discover new insights from data; How computers and the internet work; Societal impacts of computing innovations. Prereq: Permission of instructor.			
6012	Introduction to Computer Programming in Java	G	3
Introduction to computer programming and to problem solving techniques using computer programs; programming lab experience. Prereq: Permission of instructor.			
6193	Individual Studies in Computer Science and Engineering	G	1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
6194	Group Studies in Computer Science and Engineering	G	1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
6239	Advanced Studies in Software Engineering	G	1 - 3
Advanced-level topics in software engineering. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6249	Advanced Studies in Databases	G	1 - 3
Advanced-level topics in databases. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6321	Computability and Complexity	G	3
Turing machines, decidability, recursive enumerability; many-to-one and polynomial-time reductions; NP-completeness, Cook-Levin Theorem; Recursion Theorem. Prereq: 3321 (625) or 5321. Not open to students with credit for 725.			
6329	Advanced Studies in Computation Theory	G	1 - 3
Advanced-level topics in computation theory. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6331	Algorithms	G	3
Algorithm design paradigms; mathematical analysis of algorithms. Prereq: 2331 (680) or 5331. Not open to students with credit for 780.			
6332	Advanced Algorithms	G	3
Advanced graph algorithms, string algorithms, linear programming, matrix operations, Fourier transforms, randomized algorithms, approximation algorithms, geometric algorithms. Prereq: 6331 (780). Not open to students with credit for 790 or 794A.			
6333	Distributed Algorithms	G	3
Fundamental concepts in distributed computing; algorithms for distributed control and data; impossibility and limits; algorithms for fault-tolerance; specification, design and verification of distributed programs. Prereq: 6431 (760). Not open to students with credit for 763.			
6339	Advanced Studies in Algorithms	G	1 - 3
Advanced-level topics in algorithms. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6341	Foundations of Programming Languages	G	3
Conceptual foundations of programming languages: attribute grammars; types; functional languages; language semantics; abstract interpretation. Prereq: 3341 (655) or 5341. Not open to students with credit for 755.			
6349	Advanced Studies in Programming Languages	G	1 - 3
Advanced-level topics in programming languages. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6359	Advanced Studies in Cryptography	G	1 - 3
Advanced-level topics in cryptography. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6421	Computer Architecture	G	3
Principles and tradeoffs behind the design of modern computer architectures, including instruction-level parallelism, memory system design, advanced cache architectures, cache coherence, multiprocessors, energy-efficient and embedded architectures. Prereq: 3431 (660) or 5431, and 3421 (675), 5421, or ECE 5362 (662). Not open to students with credit for 775.			

6422	Advanced Computer Architecture	G	3
Fundamental design issues in parallel architectures, design of scalable shared memory and distributed memory systems, interconnection networks (on-chip and off-chip), multi-core architectures, accelerators, embedded systems, and exascale systems. Prereq: 6421 (775) and 6441 (721). Not open to students with credit for 875.			
6429	Advanced Studies in Computer Architecture	G	1 - 3
Advanced-level topics in computer architecture. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6431	Advanced Operating Systems	G	3
Advanced topics in operating systems and concurrency; introduction to distributed systems. Prereq: 2431 (660) or 5431. Not open to students with credit for 760.			
6439	Advanced Studies in Operating Systems	G	1 - 3
Advanced-level topics in operating systems. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6441	Parallel Computing	G	3
Principles and practice of parallel computing; design, implementation, and performance evaluation of parallel programs for shared-memory, distributed-memory and heterogeneous parallel systems. Prereq: 5441 (621). Not open to students with credit for 721.			
6449	Advanced Studies in Parallel Computing	G	1 - 3
Advanced-level topics in parallel computing. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6461	Computer Communication Networks	G	3
Foundational understanding of network analysis, error-control, routing, congestion-control, multi-access, and their examples in the context of the existing communication networks. A previous course in statistics is recommended for students taking this course. Prereq: Grad standing in Engr. Not open to students with credit for ECE 6101. Cross-listed in ECE 6101.			
6469	Advanced Studies in Computer Networking	G	1 - 3
Advanced-level topics in computer networking. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6479	Advanced Studies in Computer Security	G	1 - 3
Advanced-level topics in computer security. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6520	Foundations of Applied Artificial Intelligence for Non-Majors	G	3
Introduction to computer programming, to problem solving techniques using computer programs, and to the mathematical foundations of Artificial Intelligence. Specifically geared towards graduate students from non-Computer Science backgrounds with examples drawn from Artificial Intelligence. Prereq: Not open to students enrolled in CSE major.			
6521	Artificial Intelligence	G	3
Survey of advanced concepts, techniques, and applications of artificial intelligence, including knowledge representation, learning, natural language understanding, and vision. Prereq: 4256 or equiv., Math 4568 or equiv., and Stat 3470 or equiv. Not open to students with credit for 5521 or 5522.			
6539	Advanced Studies in Artificial Intelligence	G	1 - 3
Advanced-level topics in artificial intelligence. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6559	Advanced Studies in Computer Graphics	G	1 - 3
Advanced-level topics in computer graphics. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.			
6891	Departmental Research Seminar	G	1
This course consists of lectures and classroom activities on frontier research by faculty members in the Department. The objectives include introducing the students to the research areas being conducted by the graduate faculty in the Department; and encouraging students to become actively involved in one of the research areas. Prereq: Grad standing in CSE, or permission of instructor. This course is graded S/U.			
6998	MS Research in Computer Science and Engineering	G	½ - 10
MS research in Computer Science and Engineering. Repeatable to a maximum of 10 completions. This course is graded S/U.			
6999	MS Thesis Research in Computer Science and Engineering	G	1 - 10
MS research in Computer Science and Engineering, leading to a thesis. Repeatable to a maximum of 10 completions. This course is graded S/U.			
8194	Group Studies in Computer Science and Engineering	G	1 - 10
Designed to give the student an opportunity to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 completions.			
8998	PhD Research in Computer Science and Engineering	G	½ - 10
PhD research in Computer Science and Engineering. Repeatable to a maximum of 10 completions. This course is graded S/U.			

8999 PhD Dissertation Research in Computer Science and Engineering G 1 - 10
 PhD research in Computer Science and Engineering, leading to a dissertation. Repeatable to a maximum of 10 completions. This course is graded S/U.

Construction Systems Management

1100 Exploring Construction Systems Management U ½
 Basic understanding of the global trends within construction systems management, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development

2193 Individual Studies U 1 - 3
 Introductory individual study of problems and topics not included in regular Construction Systems Management courses. Prereq: CPHR 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

2194 Group Studies U 1 - 5
 Introductory group studies of selected topics in Construction Systems Management Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.

2205 Introduction to Construction Systems Management U 3
 Overview of commercial, industrial, institutional, transportation and residential sectors of the construction industry and the role of the construction manager. Introduction to planning, scheduling, estimating, safety and ethics in construction. Prereq or concur: Math 1148, 1149, 1150, or 1151. Not open to students with credit for 1205 or 3450. This course is available for EM credit.

2210 Graphic Presentation U 2
 Presentation of three-dimensional objects by precise graphics: orthographic, sectional, pictorial, and introduction to computer graphics.

2220 Information Technology for Construction Management U 3
 An introduction to information technology used in the construction process for collaboration, visualization, information modeling, and simulation. The application of current collaborative software packages for the construction process is explored. Spreadsheets are used to illustrate data collection and information modeling. Emerging trends in software and hardware are discussed. Prereq: Math 1148, 1149, 1150, or 1151.

2240 Construction Materials and Methods I U 3
 A study of the principles and practices in basic metal fabrication using the current joining, metallurgical and welding processes required in the construction industry. Prereq or concur: Math 1130, 1148, 1149, 1150 or 1151. Not open to students with credit for AgSysMt 2240. This course is available for EM credit.

2241 Construction Materials and Methods II U 3
 Material selection and construction methods for residential and commercial construction with an emphasis on wood, masonry, and concrete. Prereq or concur: 2205. Not open to students with credit for AgSysMt 2241. This course is available for EM credit.

2305 Professional Development I U 2
 Business communications and professional development in construction systems management including informative and persuasive writing, academic planning, project management, research techniques, teaming, report writing and presentations. Prereq: English 1110. Not open to students with credit for AgSysMt 2305. This course is available for EM credit.

2310 Electrical and Lighting Systems for Buildings U 3
 Concepts of electricity and illumination applied to the design and installation of electrical and lighting systems in buildings including safety, code requirements, installation methods, electrical schematics, and construction blueprints. Prereq: Math 1148, 1149, 1150, or 1151. Prereq or concur: Physics 1200 or 1250. This course is available for EM credit.

2345 Mechanical Systems for Buildings U 3
 Fundamentals of HVAC, plumbing, fire protection and noise and vibration control and their impact on building design and construction. Prereq: Math 1148, 1149, 1150, or 1151. Prereq or concur: Physics 1200 or 1250. This course is available for EM credit.

2440 Construction Surveying and Site Development U 4
 Principles of soil mechanics, erosion control, layout, and surveying as applied to site development for residential and commercial construction. Prereq: 2210 or Engr 1182.01 or 1182.02 or 1182.03, and 2220 or Engr 1181.01 or 1181.02 or HCS 2401. Prereq or concur: ENR 3000.

2600 Construction Safety and Health U 3
 Construction safety and health practices, strategies and methods for the development and management of safety and health programs in the construction industry. Prereq: 2205. This course is available for EM credit.

3191 Internship in Construction Systems Management U 2
 A pre-approved internship of planned and supervised work experiences which provide professional and technical growth in the construction industry. Prereq: ConSysM 2305 (ConSysMt 305), and 8 sem cr hrs in ConSysM or 11 qtr cr hrs in ConSysMt courses, or some combination thereof, and permission of internship coordinator. Not open to students with credit for ConSysMt 489 or AgSysMt 3191 (AgSysMgt 489).

3450 Estimating for Construction U 4
 Reading and interpretation of construction drawings and specifications for construction projects. Estimating the material requirements and costs of building construction projects using commercially available estimating tools. Prereq: 2240, 2241, 2310, 2345, and Physics 1200 or 1250. Prereq or concur: ConSysM 2440.

3451 Scheduling Construction Projects U 4
 Planning, scheduling and tracking of construction project elements including management of time, resources, cost and safety. Prereq: 2440 and 3450.

3545 Structures for Construction Mgrs I U 3
 Principles of statics, material properties, structural analysis and design theory useful in understanding the design, and managing the construction, of steel and wood structures. Overview of structural loads on buildings and bridges, types of structural systems, and accurate construction drawing interpretation. Prereq: 2240, 2241, and Physics 1200 or 1250. Prereq or concur: ConSysM 2440.

3546 Structures for Construction Mgrs II U 3
 A continuation of CSM 3545 to include steel, concrete and masonry structures and design methodologies, including foundation design and building systems integration of structural components. Further review of construction drawings, submittals and actual project observations will be utilized as opportunities are available throughout the course. Prereq: 3545.

4193 Individual Studies U 1 - 3
 Intermediate individual study of problems and topics not included in regular Construction Systems Management courses. Prereq: GPA 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

4194 Group Studies U 1 - 5
 Intermediate group studies of selected topics in Construction Systems Management. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.

4605 Professional Development II U 1
 Development and pursuing career plans; strategies and programs for employment in the construction industry, professional development, personal growth, and relationships. Prereq: 2305 (ConSysMt 305), 3451 (ConSysMt 541), and AgrComm 3130 (390) or Comm 2110 (321), and any second writing course numbered 2367 (367). Not open to students with credit for ConSysMt 605 or AgSysMt 4605 (AgSysMgt 605).

4641 Construction Project Management U 2
 The management of standard commercial/residential construction projects, including planning, scheduling, materials management, resource procurement, codes and standards, construction funding, personnel management and labor unions. Prereq: 3451.

4642 Construction Control - Contracts and Documents U 3
 Documents used in the construction industry will be discussed and applied; including types of contracts, bidding and negotiating, administration and quality control of construction contracts. Prereq: 3451.

4660 Heavy Construction Management U 3
 Methods, materials, equipment, and planning of heavy construction projects. Economics of equipment acquisition and operation. Equipment selection, performance characteristics, and production rates. Prereq or concur: 3451.

4900 Construction Management Capstone U 3
 Skills in estimating, scheduling, blueprint reading, teamwork, oral written communication, management principles, and contracts/documents used to develop solutions to industry provided construction related problems. Prereq or concur: 3546, 4641, 4642, and 4660.

4998 Undergraduate Research U 1 - 3
 Supervised undergraduate research on various topics. Prereq: CPHR 2.5 or above, and permission of the instructor. Repeatable to a maximum of 6 cr hrs or 4 completions. This course is graded S/U.

4999 Research with Distinction U 1 - 3
 Conducting and reporting research with Distinction. Students are expected to present at the CFAES Undergraduate Research and the Denman University Undergraduate Research forums. Prereq: GPA 3.0 or above, GPA 3.0 or above in ConSysM, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.

4999H Honors Research with Distinction U 1 - 3
 Conducting and reporting honors research with distinction. Students are expected to present at the CFAES Undergraduate Research and the Denman University Undergraduate Research forums. Prereq: Honors standing, and FAES 4590.01H (590H), and CPHR 3.4 or above, and GPA 3.4 or above in ConSysM, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.

5670 Green Building and Sustainable Construction U G 3
 Introduction to LEED rating systems, major components of sustainable building design and construction as well as other environmental and economic issues of sustainable built environments. Prereq: Jr, Sr, or Grad standing. Not open to students with credit for ConSysMt 670.

5680 Construction Renovation and Demolition U G 3
 The practices, procedures and management strategies employed by construction managers in renovating and demolishing buildings and other structures. Prereq or concur: ConSysM 4642 (ConSysMt 642), or permission of instructor.

108 Construction Systems Management

6193 Individual Studies G 1 - 3
Advanced individual study of problems and topics not included in regular Construction Systems Management courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

6194 Group Studies G 1 - 5
Advanced group studies of selected topics in Construction Systems Management. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions.

Consumer Sciences

2910 Consumer Problems and Perspectives U 3
Study of common imperfections in the market which manifest themselves in safety, fairness, quality, information and education concerns for consumers. Prereq: Not open to students with credit for CSCFMFNS 243. GE soc sci orgs and politics course. GE foundation social and behavioral sci course.

3930 Consumer Decision-Making I U 3
Contemporary consumer behavior theories and decision-making processes with implications for consumers, marketers, policy makers and managers in a global economy. Prereq: 2910, and Econ 2001.01.

3940 Consumer Information: Methods of Data Analysis U 3
Application of marketing research and statistical analysis using spreadsheet applications to examine consumers, consumption patterns, workforce behavior, and retailer/marketplace responses. Prereq: Stat 1350, 1430, or 1450, and CSE 1111 or 2111. Not open to students with credit for 340.

4990 Practicum in Consumer Sciences U 1 - 3
Practical applications of fashion and retail studies, hospitality management, or consumer and family financial services; students work individually with a faculty member on a project. Prereq: Permission of instructor. Not open to students with credit for CSFsnRtS 590 or CSTxtCI 590. Repeatable to a maximum of 8 cr hrs or 8 completions. This course is graded S/U.

4998 Undergraduate Research in Consumer Sciences U 1 - 3
Supervised undergraduate research in various phases of consumer sciences under the guidance of a faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

4998H Undergraduate Honors Research in Consumer Sciences U 1 - 3
Supervised undergraduate honors research in various phases of consumer sciences under the guidance of a faculty member. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.

5193 Individual Studies in Consumer Sciences U G 1 - 4
Problems in various phases of consumer sciences chosen for individual study under the guidance of a faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 8 completions. This course is graded S/U.

5194 Group Studies in Consumer Sciences U G 1 - 4
Problems in various phases of consumer sciences chosen for group study under the guidance of a faculty member. Prereq: Permission of instructor. Repeatable to a maximum of 16 cr hrs or 4 completions.

5333 Finding Happiness in the Classroom, Workplace, and Beyond U G 3
This course discusses and applies the key concepts and strategies - intellectual and practical - to achieve a greater sense of workplace satisfaction, happiness and well-being among service employees.

5798 Study Tour U G 1 - 12
Specific content, location, term(s) of offering and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 2 completions.

6000 Introduction to Research in Consumer Sciences G 3
Research literature in consumer sciences; development of the principles of scholarly research. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 700 or CSCFmFnS 738 or CSFsnRtS 777.01.

6010 Individual and Family Behavior in the Market Place G 3
Study of consumer behavior in purchase of goods and services, with emphasis on applications to effective marketing management decisions from the consumer perspective. Prereq: Grad standing, or permission of instructor.

7193 Individual Studies in Consumer Sciences G 1 - 4
Problems in various phases of consumer sciences chosen for individual study under the guidance of a faculty member. Prereq: 6000 (700), and Grad standing; or permission of instructor. Repeatable to a maximum of 16 cr hrs or 16 completions. This course is graded S/U.

7194 Group Studies in Consumer Sciences G 1 - 4
Problems in various phases of consumer sciences chosen for group study under the guidance of a faculty member. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 16 completions.

7240 Theories and Models in Consumer Sciences II G 3
Aspects of consumers' family life are analyzed from the perspective of economic theories. Emphasis is placed on implications of the theories for design and interpretation of empirical studies. Prereq: Intermediate Microeconomics. Not open to students with credit for 740.

7900 Graduate Seminar in Consumer Sciences G 1
Scholarly presentations of current research by students, faculty and invited speakers to stimulate critical thinking and discussion of implications for consumers. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 800. Repeatable to a maximum of 5 cr hrs. This course is graded S/U.

7991 Research Practicum in Consumer Sciences G 1 - 4
Supervised participation in empirical research inclusive of research design selection, and/or data collection, and/or data analysis, and/or manuscript preparation. Prereq: 6000 (700), and Grad standing; or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions.

7992 Teaching Practicum in Consumer Sciences G 1 - 4
Supervised participation in college teaching inclusive of pedagogy selection, and/or development of teaching techniques, and/or development of course content, and/or development of assessment pieces, and/or classroom instruction. Prereq: 6000 (700), and grad standing; or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions.

7993 Industry Practicum in Consumer Sciences G 1 - 4
The purpose of this course is to provide graduate students with the opportunity for an immersive industry experience in fashion and retail studies where they can observe industry in action, apply their theoretical and foundational knowledge and skills in a real-life industry setting, and work with one or more industry mentors who can guide their hands-on activities. Prereq: Grad standing. Repeatable to a maximum of 16 cr hrs. or 8 completions.

7999 Research for Thesis G 1 - 12
Research for Masters Thesis. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

8193 Individual Studies in Consumer Sciences G 1 - 4
Problems in various phases of consumer sciences chosen for individual study under the guidance of a faculty member. Prereq: 6000 (700), and grad standing; or permission of instructor. Repeatable to a maximum of 16 cr hrs or 16 completions. This course is graded S/U.

8250 Normative Approaches to Consumer Sciences G 3
Focuses on derivation of normative guidelines for household financial decisions, but normative guidelines related to other aspects of consumer sciences will also be covered. Prereq: Intermediate microeconomics, introductory statistics, and introductory differential calculus. Not open to students with credit for 741 or CsFmScM 741.

8260 Behavioral Approaches to Consumer Sciences G 3
Economic behaviors are analyzed from psychological perspectives to understand factors that motivate consumption, saving, and related economic behaviors. Prereq: Grad standing, and permission of instructor.

8270 Managing Consumer Risk G 3
An examination of challenges involved in managing consumer risk. Topics include the economics of risk, methods of risk management, and quantitative risk analysis. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 872.

8891 Special Topic Seminar: Family Finance G 3
Survey of literature on specific family finance topics with emphasis on identifying research problems, assessing significance, reviewing literature, conducting research, and preparing professional presentations. Prereq: 6000 (700), and Grad standing; or permission of instructor. Repeatable to a maximum of 6 cr hrs.

8999 Research for Dissertation G 1 - 12
Research for dissertation. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 24 cr hrs or 8 completions. This course is graded S/U.

Consumer Sciences: Consumer&Family Financial Servs

2260 Healthy Finances and Economic Wellbeing for Individuals and Families U 3
The management of family financial resources; topics include financial planning and budgeting, insurance, credit, and savings and investments. GE foundation social and behavioral sci course.

2990 Professional Development U 1
The professional: Overview of the internship and job search process, networking, involvement in professional organizations and continued development. Prereq: Soph standing or above, and enrollment in CSCFFS major. Not open to students with credit for 595. This course is graded S/U.

Consumer Sciences: Consumer&Family Financial Servs 109

3191 Internship U 3

Supervised practical experience at a department approved internship site related to the student's selected major. Includes an investigation and analysis of assigned problems and documentation of experience. Prereq: 2990 (595), 2.0 CPHR or above, and Jr standing; and CSCFFS major. Not open to students with credit for 589.02. This course is graded S/U.

3260 Fundamentals of Financial Planning U 3

This course provides an introduction to personal financial planning from the perspective of the financial planning professional. It is a required course in the seven-course Certified Financial Planner (CFP) sequence that qualifies students to sit for the CFP Exam after obtaining their Bachelors degree. Prereq: 2260 or 9 credit hours of BusFin courses at the 3000-level or higher.

3270 Families in Business U 3

Students explore family business topics such as family dynamics, conflict, gender, ethnicity, and relative to the business formation: growth, strategic management, professionalization and succession. Prereq: Soph standing or above. Not open to students with credit for CSFmFnS 567.

3910 Customer Experience Management U 3

Provides students with an intellectual and hands-on understanding of the key consumer service management and consumer satisfaction theories and practices that are relevant in service sectors. Cross-listed with CSHspMg and CSFRSt.

4150 Quantitative Methods in Consumer Sciences U 3

Application of data analysis to facilitate decision making with respect to consumer sciences. Prereq: ConSci 3940 (340), and Stat 1430 (133), 1350 (135), or 1450 (145), and CSE 1111 (101), 2111 (200), or 1223 (201). Not open to students with credit for CSCFmFnS 644.

4260 Family Tax Planning U 3

Analyze and evaluate financial decisions by families at various points in family life cycle, apply economic principles and understanding of basic tax policy to family financial decisions. Prereq or concur: 3260.

4270 Retirement Planning and Employee Benefits U 2

Evaluation of retirement plans and employee benefits with consideration of the interwoven factors of Social Security, pension, private savings, and health insurance. Prereq or concur: 3260.

4280 Estate Planning for Individuals and Families U 2

Key topics in planning for transfer of family estate, focusing on strategies that conserve family wealth while being consistent with family financial goals. Prereq or concur: 3260.

5120 Consumers in the Health Marketplace U G 3

This course is designed to introduce students to the role of the consumer in health markets. We will focus on topics including healthcare providers and markets in the United States and abroad, health insurance systems in the United States and abroad, racial/ethnic, geographic, and socioeconomic health inequality, pandemics, and the development of health technologies like vaccines. Prereq: ConSci 2910, and Econ 2001.01 or 2001.02 or 2001.03, and Stat 1350 or 1430 or 1450; or permission of instructor.

5130 Solutions to Consumer Problems U G 3

Consumer problems are defined and characterized using an economics approach. Private and public solutions to consumer problems are then examined and evaluated. Prereq: ConSci 2910 and Econ 2001.01. Not open to students with credit for CSCFmFnS 443 or CSFmRsM 443.

5140 Topics in Consumer Sciences U G 3

Timely topics in consumer sciences are examined in depth. Prereq: Econ 2001.01 and Stat 1350, 1430, or 1450, or permission of instructor. Repeatable to a maximum of 6 or hrs.

5150 FINRA Securities Industry Essentials Exam Preparation U G 1

This course prepares students for the FINRA Security Industry Essentials (SIE) Exam. Prereq: Jr or Sr standing; or Grad Standing. This course is graded S/U.

5250 Retirement Planning and Employee Benefits U G 3

This course covers advanced concepts in retirement planning, procedures and issues, with particular attention to designing retirement strategies to meet diverse client needs. Students will read journal articles covering the latest developments in planning for retirement and maintaining household well-being during retirement. Special attention will be given to qualified plans, tax-advantaged plans. Prereq or concur: 3260. Not open to students with credit for 4270.

5260 Financial Planning Applications U G 4

Family financial management concepts are applied to evaluate financial goals and prepare a comprehensive financial plan for a household. Prereq: B- or above in 3260, and 4260; and BusFin 3120 or 3220. Prereq or concur: 4270 or 5250, 4280, BusFin 3300, and 3222 or 4221.

Consumer Sciences: Fashion and Retail Studies

2100 Profit-Centered Merchandising and Hospitality U 3

An examination and application of managerial and financial accounting principles for the hospitality and fashion industry operations will be the focus. Students will apply the corresponding lectures to practical assignments to form a foundation of understanding concepts, procedures, and ultimately the analysis of various documents and data. Cross-listed in CSHspMg.

2300 Branding in Fashion, Hospitality and Sport Industries U 3

Examine branding as a business strategy in fashion, hospitality, sport and special events industries, including luxury, mass market, and boutique fashion, hotel and restaurant brands. Cross-listed in CSHspMg.

2370 Design Aesthetics of Fashion & Retail U 3

The perception and presentation of self and its surrounding environment through use of aesthetics with consideration of foundations of design, physical characteristics, environment, personal expression, and context. GE foundation lit, vis and performing arts course.

2371 Textiles U 3

Fiber, yarn, and fabric characteristics, textile coloration and finishes; textile selection for specific end uses; laundering and care; new textile products and industry trends.

2372 Appearance, Dress, and Cultural Diversity U 3

A cross-cultural study of the diversity and meaning of appearance and dress as manifestations of individual and group behavior, social organizations, and cultural norms. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.

2373 Business of Fashion & Retailing U 3

Survey of fashion industry supply chain, business structure, design, manufacture, sourcing, distribution, and retail functions along with industry terminology, current topic analysis, and career options.

2374 Twentieth Century Fashion and Beyond U 3

Relationship between culture, society and fashion in the 20th century, the influence of historic dress on contemporary fashion, and industry developments leading to mass fashion. Prereq: English 1110. Not open to students with credit for CSFsnRtS 674. GE historical study course. GE foundation social and behavioral sci course.

2375 From Folk to Funk to Festivals: The Interplay Between Music and Dress U 3

This interdisciplinary course will critically analyze the interplay between various genres of music and the fashion trends made significant by artists in each genre. Moreover, it examines how human behavior is influenced by the use of dress and music as mediums of communication used by individuals, human societies, and cultures through the lens of related fashion and social/psychological theories. GE foundation social and behavioral sci course.

2990 Professional Development U 3

Preparation for internship experience in the fashion and retail industry by providing skills for success on the job and providing job seekers the tools applicable to an individual who is transitioning from the classroom to the work environment. This course is a prerequisite for CSFRSt 3191. Prereq: Soph standing or above, and enrollment in CSFRSt major.

3191 Internship U 3

Supervised practical experience at a department approved internship site related to the student's selected major. Includes an investigation and analysis of assigned problems and documentation of experience. Prereq: 2.0 CPHR or above, and Jr or Sr standing, and CSFRSt major. Prereq or concur: 2990 (595) or ConSci 2990. Not open to students with credit for 589.02. This course is graded S/U.

3330 Corporate Social Responsibility, Sustainability & Entrepreneurship in Fashion & Hospitality Indus U 3

Examination of corporate socially responsible and sustainable decision-making and regulatory processes used in advertising and promoting fashion retail and hospitality products and services. Prereq: Jr or Sr standing, or enrolled in HRL certificate program. Cross-listed in CSHspMg.

3470 Apparel Product Development I U 3

This course focuses on the study and creation of apparel and accessory design using a variety of hand and computer media technology with a concentration on apparel product brand development. Prereq: A grade of C- or above in 2370.

3471 Apparel Manufacturing Decisions U 3

View of the fashion supply chain that examines the life of a garment from farm to textile, garment to shelf. Investigate parameters of textile apparel quality, standards and evaluation, and assurance of quality throughout the factory garment construction phases. Learn about retailers' involvement throughout the process and logistical decision making needed to avoid quality issues. Recommended prereq: Chem 1110 (102). Prereq: C- or higher in 2373 (CSFsnRtS 275) and 2371 (371). Not open to students with credit for CSFsnRtS 571.

3474 Fashion Forecasting U 3

Analysis and application of trend forecasting practices in all aspects of the fashion industry. Prereq: C- or higher in 2370 (CSFsnRtS 270), and 2373 (275). Not open to students with credit for CSFsnRtS 200 or 374.

3585 Retail Merchandising I U 3

Retail buyer's role in merchandise management: decision making, planning, control process, negotiating, buying, pricing, and selecting merchandise for sale. Understanding retail math applications to optimize merchandise assortment and profit. Analysis and synthesis of merchandising management practices and problems. Use of industry practices for decision making, planning, and merchandise control. Prereq: Math 1116 or equiv.

3910 Customer Experience Management U 3

Provides students with an intellectual and hands-on understanding of the key consumer service management and consumer satisfaction theories and practices that are relevant in service sectors. Cross-list in CSHspMg and CSCFFS.

110 Consumer Sciences: Fashion and Retail Studies

3950 Use of Social Media and IT in Fashion, Hospitality, and Sport Industries U 3

An application and discussion of social media and information technology strategies in fashion, sport, and hospitality industries. Prereq: Jr or Sr standing, and a major, pre-major, or minor in CSFRSt, CSHspMg, or KnSISM. Cross-listed in CSHspMg.

4570 Apparel Product Development II U 3

Study of computer-aided design software programs, and creative and technical apparel brand development. Recommended prereq: 3471 and 3474. Prereq: A grade of C- or above in 3470.

4571 Technologies for Fashion Product Management U 3

The course will also focus on the use of industry-specific terminology, practice real life scenario problem-solving skills, utilize product lifecycle planning processes, and ultimately will produce complete technical packages ensuring that quality products are delivered at the proper cost and timing to the consumer. Prereq: A grade of C- or above in 2370 and 3470.

4575 Retail Environments U 3

Analysis of the influence of store environment characteristics on consumer behavior in various retail formats. Prereq: 2370 (CSFsnRtS 270) with C- or higher. Not open to students with credit for CSFscRtS 525.

4576 Global Sourcing and Trade in Textile Products U 3

International factors affecting the textiles and textile products industries and their impact on the economy and consumers. Prereq: A grade of C- or above in 2373. Cross-listed in 6576.

4577 Fashion & Retail Promotion U 3

Contemporary models, concepts and practice of image management, integrating marketing communications, media, and promotions from fashion industry perspectives. Prereq: A grade of C- or above in 3474, and BusML 3150 or 3250.

4585 Retail Merchandising II U 3

Retail buyer's role in merchandise management. Gain understanding of financial acumen within retail industry. Analysis and synthesis of merchandising management practices/problems. Use of industry practices for decision making, planning, and control of merchandise. Development of Seasonal Buying plan, decision making based on buying plan performance. Prereq: A grade of C- or above in 3585; and AcctMIS 2000, or CSFRSt 2100, or CSHspMg 2100; and Jr standing; or permission of instructor. Cross-listed in 6585.

4680 Strategic Management in Fashion & Hospitality Industries U 3

Discussion, development and application of strategic management in fashion and hospitality industries. Prereq: Sr standing, or enrolled in HRL certificate program. Cross-listed in CSHspMg.

5575 Social, Psychological, and Cultural Aspects of Fashion and Dress U G 3

This course is an in-depth study of research and social science theories applied to appearance and dress as manifestations of individual and group consumer behavior. Prereq: 2372, or Grad standing.

5701 Readings and Theories in Fashion and Retail Studies U G 1 - 4

This is a foundational course for students in the fashion & retail studies program who are engaged in advanced senior/graduate level academic work. Students will explore areas of interest in the discipline, compile annotated bibliographies reflecting the content of peer-reviewed work (with an emphasis on exploring theoretical frameworks supporting the research), and lead/participate in discussions. Prereq: Sr or Grad standing. Repeatable to a maximum of 4 or hrs or 2 completions.

5710 Ethical Decision-Making in Consumer Sciences U G 3

In-depth study of research/theories applied to corporate social responsibility & ethics related to service industries. We will examine corporate-social-responsibility & sustainable decision-making. We will consider the role ethics plays in these decisions considering advertising, promotion, labor issues, and current sustainable & responsible practices within the retail and hospitality industries. Prereq: 3330, and Sr or Grad standing.

5720 Economic History of Power in Fashion U G 3

A global investigation of multicultural influences in fashion/dress using a critical race lens to study the way fashions have developed, the diaspora of fashion trends, the economic systems that fashions support, and the power structures that both enable and prevent participation in - and democratization of - fashion. Prereq: Econ 2001.01, and Sr or Grad standing.

5730 Fashion, Textiles, and the Environment U G 3

This course examines the challenges to environmental stewardship in the sourcing, production, design, and distribution of apparel, textiles, and footwear. It will explore innovative practices and solutions, the role of visionary leaders and organizations, and strategies for social change. Prereq: 2371; or ENR 2500 and EEDS major or minor; or ENR 2501 and EEDS major or minor; or Grad standing.

5780 Leadership for the Service Industry U G 3

This course introduces leadership theory at two levels - the individual level (people as leaders) and the organizational level (companies as leaders). This course provides both an in-depth presentation of leadership theory and a discussion of how it applies to real-life business situations. Prereq: Sr or Grad standing, or permission of instructor. Cross-listed in CSHspMg.

6576 Global Sourcing and Trade in Textile Products G 3

This course is an introduction to the global textile and apparel complex, particularly the importance of international trade, global sourcing, strategic management of global brands, sustainability, and corporate social responsibility. Prereq: Grad standing. Cross-listed in 4576.

6585 Retail Merchandising II G 3

Retail buyer's role in merchandise management. Gain understanding of financial acumen within retail industry. Analysis and synthesis of merchandising management practices/problems. Use of industry practices for decision making, planning, and control of merchandise. Development of Seasonal Buying plan, decision making based on buying plan performance. Prereq: Grad standing. Cross-listed in 4585.

Consumer Sciences: Hospitality Management

2100 Profit-Centered Merchandising and Hospitality U 3

An examination and application of managerial and financial accounting principles for the hospitality and fashion industry operations will be the focus. Students will apply the corresponding lectures to practical assignments to form a foundation of understanding concepts, procedures, and ultimately the analysis of various documents and data. Cross-listed in CSFRSt.

2200 Introduction to Healthcare Environmental and Hospitality Services U 3

An application and discussion of healthcare business and analysis of critical healthcare areas in relation to hospitality business.

2300 Branding in Fashion, Hospitality, and Sport Industries U 3

Examine branding as a business strategy in fashion, hospitality, sport and special events industries, including luxury, mass market, and boutique fashion, hotel and restaurant brands. Cross-listed in CSFRSt.

2600 Introduction to Hospitality Management U 3

Overview of the hospitality-tourism industry. Introduction to and career exploration of various segments of the hospitality-tourism field.

2700 Principles of Food Production Management U 3

Application of scientific food preparation and management principles to quantity food production in a commercial establishment. Prereq: 2600 or 1600 (230), or enrollment in Culinary Science major. Concur: 2710. Not open to students with credit for 350.01 or 350.02.

2710 Principles of Food Production Management Laboratory U 1

Applying scientific food preparation principles to quantity food production in a laboratory setting. Prereq: 2600 or 1600 (230), or enrollment in Culinary Science major. Concur: 2700 (350.01). Not open to students with credit for 350.01 or 350.02.

2800 Hotel Management U 3

An examination of the lodging firm as an operating entity, including structure, management strategies, functional departments, related financial reports and revenue management. Prereq or concur: 2600 (1600).

2810 Hotel Management Practicum U 1

Provide exposure to the lodging/hotel sector via experiences in Front of the House and Heart of the House in a real operating environment. Prereq or concur: 2600 (1600 (230)) and 2800 (4800). Not open to students with credit for 552.

2990 Professional Development U 1

The professional: overview of the internship and job search process, networking, involvement in professional development organizations and continued development. Prereq: Soph standing or above, and enrollment in CSHSPMG major. Not open to students with credit for 595. This course is graded S/U.

3191 Internship U 3

Supervised practical experience at a department approved internship site related to the student's selected major. Includes an investigation and analysis of assigned problems and documentation of experience. Prereq: 2990 (595), 2.0 CPHR or above, and Jr standing; and CSHSPMG major. Not open to students with credit for 589.02. This course is graded S/U.

3191.02 Healthcare Environmental Services Internship U 3

Supervised and practical experience at a department approved internship site related to environmental services in healthcare. Includes investigation and analysis of assigned problems and documentation of experience. Prereq or concur: 2200 and 3200. This course is graded S/U.

3200 Infection Prevention in Healthcare and Hospitality U 3

An application and discussion of introductory Microbiology, Epidemiology, Infection Prevention and Sanitation in healthcare and hospitality facilities.

3330 Corporate Social Responsibility, Sustainability & Entrepreneurship in Fashion & Hospitality Industries U 3

Examination of corporate socially responsible and sustainable decision-making and regulatory processes used in advertising and promoting fashion retail and hospitality products and services. Prereq: Jr or Sr standing, or enrolled in HRL certificate program. Cross-listed in CSFRSt.

3700 Controlling Food, Beverage, and Labor Costs U 3

Course will demonstrate effective and efficient controls of prime costs in a foodservice operation without sacrificing quality and good customer service. Prereq: 2600 (1600), and Hospitality Management major; or Hospitality Management premajor; or a Hospitality Management minor; or major in Human Nutrition: Dietetics, Culinary Science, or Professional Golf Management. Not open to students with credit for 370.

Consumer Sciences: Hospitality Management 111

3720	Food Service Management	U	3
<p>Identification of the crucial elements involved in the successful operation of a foodservice enterprise and demonstrate their inter-relationships. Special emphasis will be on customer service and employee development. Prereq or concur: 2600, or enrollment in pre-Human Nutrition or full-Human Nutrition: Dietetics major.</p>			
3730	Food Service Management Practicum	U	1
<p>Application of customer service and restaurant management responsibilities in a real operating foodservice environment. Prereq or concur: 2600 and 3720; or 3720, and enrollment in pre-Human Nutrition or full-Human Nutrition: Dietetics major.</p>			
3910	Customer Experience Management	U	3
<p>Provides students with an intellectual and hands-on understanding of the key consumer service management and consumer satisfaction theories and practices that are relevant in service sectors. Cross-listed in CSFRSt and CSCFFS.</p>			
3950	Use of Social Media and IT in Fashion, Hospitality, and Sport Industries	U	3
<p>An application and discussion of social media and information technology strategies in fashion, sport, and hospitality industries. Prereq: Jr or Sr standing, and a major, pre-major, or minor in CSFRSt, CSHspMg, or KNSISM. Cross-listed in CSFRSt.</p>			
4200	Managing the Customer Experience in Healthcare and Hospitality Services	U	3
<p>An application and discussion of hospitality principles and customer experience management in the healthcare industry.</p>			
4600	Special Events Planning and Management	U	3
<p>Course will examine techniques and procedures required for producing successful events of all types including effective procurement, organization, and implementation of all event aspects. Prereq: 2600.</p>			
4610	Beverage Management	U	3
<p>A discussion of the varieties, merchandising and management control of alcoholic and non-alcoholic beverages served in the hospitality industry. Prereq: 2600, or enrollment in Culinary Science major.</p>			
4620	Tourism & Culture	U	3
<p>An overview of the tourism industry including travel motivation and the impacts, both positive and negative, of social, environmental, and economic influences.</p>			
4650	Human Resources in the Hospitality Industry	U	3
<p>Advanced management skills in specific application to the many facets of the Hospitality Industry with a focus on Hospitality Organizational structure and behavior and human resource management. Prereq: 3720 (551) and 2800 (4800 or 560). Not open to students with credit for 650.</p>			
4680	Strategic Management in Fashion & Hospitality Industries	U	3
<p>Discussion, development and application of strategic management in fashion and hospitality industries. Prereq: Sr standing, or enrolled in HRL certificate program. Cross-listed in CSFRSt.</p>			
4750	Casino Operations	U	3
<p>Course will focus on the unique nature of the casino industry and its relationship to other hospitality enterprises. Prereq: 3720 and 4800.</p>			
4798	Tourism & Culture - Study Abroad - Bali	U	3
<p>An overview of the tourism industry including travel motivation and the impacts, both positive and negative, of social, environmental, and economic influences.</p>			
5555	Management Consulting for Hospitality and Fashion Retail Operations	U G	3
<p>A conceptual foundation, discussion, and application of management consulting in the hospitality and retail industries. Prereq: Sr or Grad standing, or permission of instructor. Cross-listed in CSFRSt.</p>			
5640	Marketing in Hospitality Enterprises	U G	3
<p>Designed to provide students with an intellectual and hands-on understanding of the key hospitality marketing and hospitality entrepreneurship. Prereq: Jr, Sr, or Grad standing.</p>			
5780	Leadership for the Service Industry	U G	3
<p>This course introduces leadership theory at two levels - the individual level (people as leaders) and the organizational level (companies as leaders). This course provides both an in-depth presentation of leadership theory and a discussion of how it applies to real-life business situations. Prereq: Sr or Grad standing, or permission of instructor. Cross-listed in CSFRSt.</p>			
5820	Revenue Management in the Hospitality Industry	U G	3
<p>An examination of the hotel revenue management practices including: pricing, occupancy management, cost-profit-volume analysis and forecasting. Prereq: 2800.</p>			
8630	Services in the Hospitality and Retail Industries	G	3
<p>Provides an extensive overview of research on services focused on the hospitality and retail industries. Emphasis builds on theories associated with service, quality, customer satisfaction, and customer loyalty. Prereq: Grad standing, or permission of instructor.</p>			

8640	Managing Hospitality and Retail Operations	G	3
<p>Provides an extensive overview of research focused on the hospitality and retail industries. Emphasis builds on theories associated with hospitality/retail operations. Prereq: Grad standing, or permission of instructor.</p>			

8660	Recent Developments in Hospitality and Retail Management	G	3
<p>Analysis of selected topics in hospitality and retail management. Prereq: Grad standing, or permission of instructor.</p>			

Crop and Soil Technology

1201T	Exploring Agronomy, Sustainable Agriculture, and Crop Management and Soil Conservation	U	½
<p>Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.</p>			
2189T	Practicum in Crop and Soil Technologies	U	1
<p>Supervised experiences in field, laboratory, and/or industry work. A grade of C or higher required to meet graduation requirements. Repeatable to a maximum of 3 cr hrs.</p>			
2191T	Crop and Soil Internship	U	3
<p>Supervised employed work experience on a crop production farm or related industries. A grade of C or better is required to meet graduation requirements. Prereq: Soph standing, and CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs.</p>			
2193T	Individual Studies	U	1 - 3
<p>Designed to give an individual student an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.</p>			
2194T	Group Studies	U	1 - 3
<p>Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.</p>			
2210T	Sustainable Agriculture Methods	U	1
<p>This course will give students experience with the practical on-farm skills, management practices and entrepreneurship expertise needed in various sustainable agriculture enterprises. Students will work as a team to select, plan and execute a hands-on or field-based project that integrates the environmental, social and economic aspects of sustainable agriculture. Prereq or concur: 2200T. Repeatable to a maximum of 2 cr hrs. This course is available for EM credit.</p>			
2228T	Manure Management	U	3
<p>A study of the biological, chemical, and physical components of animal manures; methods for safe handling and storage; and land application. This course is available for EM credit.</p>			
2265T	Integrated Pest Management	U	2
<p>A review and application of sustainable methods for controlling disease, insect, and weed pests in crops. Prereq or concur: 2411T (260T). Not open to students with credit for 265T. This course is available for EM credit.</p>			
2280T	Applied Precision Agriculture	U	3
<p>An introduction to precision agriculture technologies including auto-guidance, prescription mapping, variable rate technologies, and remote sensing with a focus on practical application of the technologies in modern production systems.</p>			
2300T	Introduction to Soil Science	U	3
<p>An introduction to soil physical, chemical, and biological properties related to plant systems, environmental quality, and construction. Prereq: Not open to students with credit for 221T. This course is available for EM credit.</p>			
2301T	Introduction to Soil Science Laboratory	U	1
<p>Laboratory analysis of soil physical, chemical, and biological properties related to plant systems, environmental quality, and construction. Prereq or concur: 2300T. Not open to students with credit for 221T. This course is available for EM credit.</p>			
2324T	Soil Management	U	3
<p>A study of sustainable-use of soil resources related to soil formation, mechanics, and erosion control. Prereq: 2300T and 2301T. This course is available for EM credit.</p>			
2412T	Technology and Field Management of Forage Crops	U	3
<p>An applied study of the crop species, field management practices, and agricultural technologies used to grow grasses, legumes, and forbs for forage and livestock production systems. This course is available for EM credit.</p>			
2422T	Weed Control Technology	U	3
<p>An introduction to the application of technologies used to control weeds in field cropping systems, including biological, chemical, and mechanical methods. This course is available for EM credit.</p>			
2580T	Soil Fertility and Fertilizers	U	3
<p>A study of plant nutrient cycles, fertilizer recommendations, application of ag-lime, fertilizers, animal manure, and municipal biosolids. Prereq: 2300T and 2301T. This course is available for EM credit.</p>			

112 Crop and Soil Technology

3800T Principles of Farm Business Management U 4

A study of economic and management principles involved in planning, organizing, operating, and administering a farm business; emphasis placed on developing a business plan and problem solving. Prereq: AEDEcon 2105 (BusTec 101T or 102T). Prereq or concur: BusTec 1151T (151T) or AEDEcon 2001 (200). Not open to students with credit for BusTec 240T. This course is available for EM credit. Cross-listed in AnmlTec.

Czech

1101 Elementary Czech I U 4

Introduction to Czech; development of speaking, listening, reading, and writing skills in cultural context. Closed to native speakers. Prereq: Not open to students with credit for 101, or 2 or more years of study in this language in high school, except by permission of department. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1102 Elementary Czech II U 4

Continued development of speaking, listening, reading, and writing skills in cultural context. Closed to native speakers of this language. Prereq: 1101 (101.01). Not open to students with credit for 102 or 103. This course is available for EM credit. GE for lang course. GE world languages course. FL Admis Cond course.

1103 Intermediate Czech I U 4

Continued development of speaking, listening, reading, and writing skills in cultural context. Prereq: 1102 (102.01). Not open to students with credit for 104, or to native speakers of this language through regular course enrollment or EM credit. This course is available for EM credit. GE for lang course. GE world languages course.

2104 Intermediate Czech II U 4

Increasing functional ability in speaking, listening, reading, and writing practice, vocabulary-building; new grammar structures; start developing higher-level language skills in Czech. Closed to native speakers. Prereq: 1103, or 5 cr hrs for 104.51 or 111. Not open to students with credit for 407.51.

Dance

1101 Contemporary I U 1-3

Non-major introduction to studio practice of contemporary movement forms; includes survey of the history, theory, and/or literature of contemporary movement forms. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.

1111 Ballet I U 1-3

Non-major introduction to studio practice of classical ballet; includes survey of the history, theory, and/or literature of classical ballet. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.

1141 Jazz I U 1-3

Non-major introduction to studio practice of jazz dance; includes survey of the history, theory, and/or literature of jazz dance. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.

1151 Hip Hop I U 1-3

Non-major introduction to studio practice of hip hop dance; includes survey of the history, theory, and/or literature of hip hop dance. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.

1161 Tap I U 1-3

Non-major introduction to studio practice of tap dance; includes survey of the history, theory, and/or literature of tap dance. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.

2102 Contemporary II U 1-3

Non-major intermediate level studio practice in contemporary movement forms; includes survey of the history, theory, and/or literature of contemporary movement forms. Prereq: One year of 1101 (201.01), or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2103 Contemporary III U 1-3

Non-major advanced level studio practice in contemporary movement forms; includes survey of the history, theory, and/or literature of contemporary movement forms. Prereq: One year of 2102 (202.01), or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2112 Ballet II U 1-3

Non-major intermediate level studio practice in classical ballet; includes survey of the history, theory, and/or literature of classical ballet. Prereq: One year of 1111 (201.02), or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2113 Ballet III U 1-3

Non-major advanced level studio practice in classical ballet; includes survey of the history, theory, and/or literature of classical ballet. Prereq: One year of 2112 (202.02), or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2121 Improvisation U 1-3

Introduction to studio practice of improvisation; includes survey of the history, theory, and/or literature of improvisation. Repeatable to a maximum of 8 cr hrs or 4 completions.

2142 Jazz II U 1-3

Non-major intermediate level studio practice of jazz dance; includes survey of the history, theory, and/or literature of jazz dance. Prereq: One year of 1141 (201.03) or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2143 Jazz III U 1-3

Non-major advanced level studio practice of jazz dance; includes survey of the history, theory, and/or literature of jazz dance. Prereq: One year of 2142 (202.03) or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2152 Hip Hop II U 1-3

Non-major intermediate/advanced level studio practice of hip hop dance; includes survey of the history, theory, and/or literature of hip hop dance. Prereq: One Year of 1151 (201.06) or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2162 Tap II U 1-3

Non-major intermediate/advanced level studio practice of tap dance; includes survey of the history, theory, and/or literature of tap dance. Prereq: One year of 1161 or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.

2175 Yoga U 1-3

Yoga practice for non-majors; includes survey of the history, theory, and/or literature of yoga. Repeatable to a maximum of 8 cr hrs or 4 completions.

2176 Bartenieff Fundamentals U 1-3

Bartenieff Fundamentals taught by certified practitioner (CMA) for non-majors; includes survey of the history, theory, and/or literature of Bartenieff Fundamentals. Repeatable to a maximum of 4 cr hrs or 2 completions.

2178 Floor Work U 1-3

Floor work for non-majors; includes survey of the history, theory, and/or literature of floor work. Repeatable to a maximum of 4 cr hrs or 2 completions.

2181 Social Dance U 1-3

Social dance for non-majors; includes survey of the history, theory, and/or literature of social dance. Repeatable to a maximum of 8 cr hrs or 4 completions.

2190 Movement Practice: Special Topics U 1-3

Special topics in movement practice for non-majors. Prereq: Enrollment in Dance major. Repeatable to a maximum of 8 cr hrs or 4 completions.

2201 Minors Composition U 2-3

Introduction to composition for dance minors. Prereq: Not open to students with credit for 211.03. Repeatable to a maximum of 4 cr hrs or 2 completions.

2301 Analysis for Minors U 1-3

Foundational level of analysis of movement for Dance Minors and elective students utilizing Laban's theories and concepts including Laban Movement Analysis (Effort/Shape), Motif Description, and Labanotation, focused in studio-based practice with elementary topics in notation, topical readings, and performance of scores.

2367 Writing About Dance U 3

Provides an opportunity to view, discuss, read, think and write about contemporary dance through the practice of criticism. Prereq: English 1110.01 (110) or equiv. Not open to students with credit for 367.01. GE writing and comm course: level 2. GE foundation writing and info literacy course.

2367H Honors Writing About Dance U 3

Provides a rigorous opportunity to view, discuss, read, think and write about contemporary dance and its history through the study and practice of criticism. Prereq: Honors standing, and English 1110.01 (110) or equiv, or permission of instructor. Not open to students with credit for 367.01H. GE foundation writing and info literacy course.

2401 Western Concert Dance: Renaissance to Present U 3

Includes European origins of classical ballet, Africanist contributions, postmodern impulses; looks at aesthetic, cultural, and political themes in the history of concert dance in America. Prereq: Not open to students with credit for 200. GE VPA course. GE foundation lit, vis and performing arts course.

Activities in dance production; includes lectures, readings, and discussions. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 3 cr hrs or 2 completions. VSP Admis Cond course.

2701 Music Skills for Dance U 2

This course is an introduction to essential music skills. The content will explore foundational music theory, appreciation, and music for dance. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 615.

2702	Creative Technologies for Dance	U	2	Introduction to technology used in the field of dance for promotional material development and art making. Includes digital image creation / manipulation, video editing, e-portfolio building, critical image analysis and foundational composition theory. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 289.	3501	Dance Education	U	3	Foundational study in dance education. Prereq: Enrollment in Dance major. VSP Admis Cond course.
2801	Introductory Seminar I	U	1	Introduction to The Ohio State University, the College of Arts and Sciences and the Department of Dance and the available resources, academic requirements, and diverse perspectives about dance research and creative activity. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 100 or 615. VSP Admis Cond course.	3801	Kinesiology	U	3	Exploration of the skeleton and muscles for mechanical efficiency of movement, including principles of stability and motion as they relate to dance, for dance majors and minors. Prereq: Enrollment in Dance major. Not open to students with credit for 671.01. VSP Admis Cond course.
2802	Introductory Seminar II	U	1	Continuation of introduction to The Ohio State University, the College of Arts and Sciences and the Department of Dance and the available resources, academic requirements, and diverse perspectives about dance research and creative activity. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 260 or 289.02. VSP Admis Cond course.	3999H	Research and Creativity in Dance	U	1 - 10	Honors Research and Creativity in Dance. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U. VSP Admis Cond course.
3003	African and Afro-diasporic Dance Forms I	U	1	Introduction to studio practice of dance forms rooted in the Africa and African Diaspora. Beginning with the body, this course includes a survey of the historical and cultural contexts of these dances which are broad from both embodied and geographical considerations; students learn deep respect for the nuances of culturally rooted dance practices with musical contributions. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 10 cr hrs.	4003	African and Afro-diasporic Dance Forms II	U	1	Beginner-intermediate studio practice of dances rooted in Africa and the African Diaspora. Addresses the fundamentals of movement vocabulary, rhythm, and cultural context of at least two traditional West African dance forms. Includes techniques of intricate footwork, spinal articulation, and speed from the Djola in Senegal and the Susu in Guinea. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 10 cr hrs.
3101	Contemporary Part I	U	1 - 3	Foundational level of contemporary movement forms for dance majors. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. VSP Admis Cond course.	4101	Contemporary Part I	U	1 - 3	Further expertise in contemporary movement forms for dance majors. Prereq: Enrollment in Dance major. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.
3102	Contemporary Part II	U	1 - 3	Foundational level of contemporary movement forms for dance majors. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. VSP Admis Cond course.	4102	Contemporary Part II	U	1 - 3	Further expertise in contemporary movement forms for dance majors. Prereq: Enrollment in Dance major. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.
3111	Ballet Part I	U	1 - 3	Foundational level of classical ballet for dance majors. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. VSP Admis Cond course.	4111	Ballet Part I	U	1 - 3	Further expertise in classical ballet for dance majors. Prereq: Enrollment in Dance major. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.
3112	Ballet Part II	U	1 - 3	Foundational level of classical ballet for dance majors. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. VSP Admis Cond course.	4112	Ballet Part II	U	1 - 3	Further expertise in classical ballet for dance majors. Prereq: Enrollment in Dance major. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.
3201	Composition I	U	3	Foundational level of composition. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 211.03, 211.04, or 620. VSP Admis Cond course.	4189	Field Experience	U	0 - 3	Internship, practicum, or professional development activity, including teaching experience, under a faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. VSP Admis Cond course.
3202	Composition II	U	3	Further experience in composition. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 211.03 or 645. VSP Admis Cond course.	4193	Independent Study	U	1 - 10	Independent projects undertaken by BFA students, under supervision of faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U. VSP Admis Cond course.
3301	Analysis	U	3	Foundational level of analysis of movement. Prereq: Enrollment in Dance major, or permission of instructor. Not open to students with credit for 621, 620, or 605. VSP Admis Cond course.	4193H	Independent Study: Honors	U	1 - 10	Independent projects undertaken by BFA students in honors, under supervision of faculty mentor. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U. VSP Admis Cond course.
3401	Dance in Popular Culture	U	3	Popular dance in the United States, with an emphasis on how movement constructs identity and community. Prereq: Not open to students with credit for 357. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies course.	4194	Group Studies	U	1 - 3	Group studies in dance. Prereq: Undergrad standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.
3402	Dance in Global Contexts	U	3	Surveys dance forms from around the globe, offering insights into the religious, social, and political functions of dances in their historical and contemporary practices. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course. VSP Admis Cond course.	4200	Choreography Workshop	U	1 - 3	Workshop providing a platform for ongoing choreographic projects, includes peer and faculty observation and critique. Prereq: 3201 (211.03) and 3202 (211.04), and enrollment in Dance major. Repeatable to a maximum of 18 cr hrs or 6 completions. VSP Admis Cond course.
3411	History/Theory/Literature I	U	3	Survey of dance from the Renaissance to the early twentieth century. Prereq: Enrollment in Dance major. VSP Admis Cond course.	4202	Music in Dance Composition	U	2 - 3	Study of music suitable for choreographic purposes and the various approaches to the use of music in dance composition. Prereq: Enrollment in Dance major, and 3201, or 3202, or 645 with Music 250 or 251. Repeatable to a maximum of 9 cr hrs or 3 completions. VSP Admis Cond course.
3412	History/Theory/Literature II	U	3	Survey of dance from the early twentieth century to the present. Prereq: Enrollment in Dance major. VSP Admis Cond course.	4203	Group Forms	U	2 - 3	Composing group dances and exploring compositional devices and craft unique to group choreography. Prereq: Enrollment in Dance major, and 3201 (211.03), or 3202 (211.04). Repeatable to a maximum of 9 cr hrs or 3 completions. VSP Admis Cond course.
3490	History/Theory/Literature Special Topics	U	3	This course offers advanced instruction in special topics in dance history, theory, culture, and literature focused on a specific dance topic that rotates given instructor expertise. It provides the opportunity for students to examine significant topics in dance history and cultural studies in depth, through reading literature, viewing video, and participating in practical experiences. Prereq: Soph standing or above. Repeatable to a maximum of 12 cr hrs.	4290	Composition: Special Topics	U	1 - 3	Special topics in composition. Prereq: Enrollment in Dance major. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.
					4490	History/Theory/ Literature Special Topics	U	1 - 3	Special topics in history/theory/literature. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.

114 Dance

4500	Directed Teaching	U	1 - 3	5100	Alternative Movement Practice	U G	1 - 3
<p>Designed to aid prospective teachers of dance in their development of essential teaching skills in a variety of settings. Prereq: Enrollment in Dance major, and 3501 (289.01 or 289.02), or permission of instructor. Repeatable to a maximum of 18 cr hrs or 6 completions. VSP Admis Cond course.</p>				<p>Alternative movement practice for dance majors and graduate dance students. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. <p>Special topics in repertory. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.</p>				<p>Advanced practice in classical ballet for dance majors and graduate dance students. Prereq: Enrollment in Dance major. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.</p>			
4801	Senior Seminar I	U	1	5112	Ballet Part II	U G	1 - 3
<p>The primary vehicle for the mentoring and advising of dance majors in the senior year; includes grant writing and professional development. Prereq: Enrollment in Dance major, and Sr standing, or permission of instructor. VSP Admis Cond course.</p>				<p>Advanced practice in classical ballet for dance majors and graduate dance students. Prereq: Enrollment in Dance major. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.</p>			
4802	Senior Seminar II	U	1	5114	Pointe	U G	1
<p>The primary vehicle for the mentoring and advising of dance majors in the senior year; includes production of the senior project, current trends in the dance field, and technology literacy for dancers. Prereq: Enrollment in Dance major, and Sr standing, or permission of instructor. VSP Admis Cond course.</p>				<p>Pointe work in classical ballet for dance majors and graduate dance students. Concur: 2113, or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.</p>			
4804	Interdisciplinary Workshop	U	1 - 3	5115	Ballet Practice Part 1	U G	1
<p>Advanced problems in dance and related areas; nature of workshop based on selected topics. Prereq: Permission of instructor. Repeatable to a maximum of 18 cr hrs or 6 completions. VSP Admis Cond course.</p>				<p>Intermediate and advanced practice in classical ballet for dance majors and graduate dance students, and others by permission. This is designed as a second technique class, offered later in the day, and is intended as an opportunity for deepening one's practice and technique. Prereq: Enrollment in Dance major, or permission of instructor or department. Repeatable to a maximum of 12 cr hrs.</p>			
4990	Research: Special Topics	U	1 - 3	5116	Ballet Practice Part II	U G	1
<p>Special topics in research. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.</p>				<p>Intermediate and advanced practice in classical ballet for dance majors and graduate dance students, and others by permission. This is designed as a second technique class, offered later in the day, and is intended as an opportunity for deepening one's practice and technique. Prereq: Enrollment in Dance major, or permission of instructor or department. Repeatable to a maximum of 12 cr hrs.</p>			
4998	Senior Project	U	1 - 5	5121	Improvisation	U G	1 - 3
<p>Activities leading to the completion of the BFA creative project; in partial fulfillment of the BFA degree. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U. VSP Admis Cond course.</p>				<p>This course is for experienced dance practitioners who have had some introductory experience with improvisation and allows for advanced explorations of dance improvisation methodologies and critical analysis of the relationship of this work to other domains. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 18 cr hrs or 6 completions.</p>			
4998H	Honors Senior Project	U	1 - 5	5173	Pilates Reformer I	U G	1 - 2
<p>Activities leading to the completion of the BFA creative project; in partial fulfillment of the BFA degree with honors. Prereq: Honors standing or permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U. VSP Admis Cond course.</p>				<p>Foundational level of Pilates reformer for dance majors and graduate dance students. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions. VSP Admis Cond course.</p>			
4999	Distinction Project	U	1 - 5	5174	Pilates Reformer II	U G	1 - 2
<p>Activities leading to the completion of the BFA distinction project; in partial fulfillment of the BFA degree. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U. VSP Admis Cond course.</p>				<p>Advanced practice in Pilates reformer for dance majors and graduate dance students. Prereq: Enrollment in Dance major, or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions.</p>			
4999H	Honors Distinction Project	U	1 - 5	5175	Yoga	U G	1 - 3
<p>Activities leading to the completion of the BFA distinction project; in partial fulfillment of the BFA degree with honors. Prereq: Honors standing, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U. VSP Admis Cond course.</p>				<p>Yoga practice for dance and health sciences majors and graduate students. Prereq: Enrollment in Dance or Health Sciences major, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.</p>			
5003	African and Afro-diasporic Dance Forms Level III	U G	1	5176	Bartenieff Fundamentals	U G	1 - 2
<p>Intermediate-advanced course for Dance majors and graduate students. The course will offer an in-depth understanding and embodiment of Polyrythm, polycentric techniques, and the multiple marker systems of Wango, Ndiass Pelobel and Rippo from the Pulaar people in the northern part of Senegal and Faass from the Wolof people in central Senegal. Prereq: Enrollment in Dance major or Dance Grad program, or permission of instructor. Repeatable to a maximum of 10 cr hrs.</p>				<p>Bartenieff Fundamentals taught by certified practitioner (CMA) for dance majors and graduate dance students. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions.</p>			
5004	African and Afro-diasporic Dance Forms Level IV	U G	1				
<p>Advanced course for Dance majors and graduate students. This course will offer an in-depth investigation of the complex rhythms and dances of Sabar from the Wolof people in Senegal, specifically focus on Bara Mbaye from the Lebour, Niary Gorone from the Walo Walo, and Kaolack from Saloum Saloum. Include core techniques of the 'Ndior' (the 5 steps of Sabar) and 'backs' (specific combinations). Prereq: Enrollment in Dance major or Dance Grad program. Repeatable to a maximum of 10 cr hrs.</p>							

5177 Alexander Technique	U G	1 - 2	5614 Sound Design for Dance	U G	1 - 3
The relationship of kinesthetic perception and the postural reflexes to physical coordination in performance. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. Cross-listed in Theatre and Music.			Course focusing on how music/sound design techniques are used in composing for dance. Prereq: Enrollment in Dance major, and 2601 (298), or Grad standing, or permission of instructor. Not open to students with credit for 632. VSP Admis Cond course.		
5178 Floor Work	U G	1 - 2	5615 Costume Design for Dance	U G	1 - 3
Floor work for dance majors and graduate dance students. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.			Course focusing on how costuming techniques are used in designing for dance. Prereq: 2601 (298), and enrollment in Dance major; or Grad standing; or permission of instructor. Not open to students with credit for 634.		
5190 Movement Practice: Special Topics	U G	1 - 3	5798 Study Tour	U G	1 - 15
Special topics in movement practice for dance majors and graduate dance students. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.			Off-campus study tour in dance outside the US. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 3 completions. This course is graded S/U. VSP Admis Cond course.		
5191 Eurhythmics	U G	1 - 3	6189 Field Experience	G	1 - 3
Eurhythmics for dance majors and graduate dance students. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.			Internship, practicum or professional development activity, including teaching experience, under a faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. VSP Admis Cond course.		
5194 Graduate and Undergraduate Group Studies	U G	1 - 3	6193 Independent Study: MFA	G	1 - 5
Group studies in dance. Prereq: Grad or Undergrad standing in Dance, or permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.			Independent projects undertaken by MFA students under supervision of faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 16 completions. This course is graded S/U. VSP Admis Cond course.		
5200 Concert Workshop	U G	1 - 3	6194 Graduate Group Studies	G	1 - 3
Workshop in preparation for bringing a choreographed piece to a performance setting, includes faculty and peer feedback. Prereq: Enrollment in Dance major. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.			Group studies in dance. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. VSP Admis Cond course.		
5211 Dance - Film I	U G	3	6200 Choreography Workshop	G	1 - 3
An introduction to creating short films of dance made specifically for the camera. Basics of camera and Final Cut Pro are taught as three film projects are created. Prereq: Jr standing, and enrollment in Dance major; or grad standing; or permission of instructor.			Workshop providing a platform for on-going choreographic projects, includes faculty and peer observation and critique. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. VSP Admis Cond course.		
5212 Dance - Film II	U G	3	6202 Music and Choreography	G	2 - 3
Continuing studies from Dance Film I in dance on camera, exploring aspects of history, composition and technology as a foundation for video production. Prereq: 5211, or permission of instructor.			Investigation of dance composition with emphasis on structure and the music/dance relationship. Prereq: Grad standing in Dance or permission of instructor. Not open to students with credit for 846. VSP Admis Cond course.		
5213 Intermedia Performance	U G	2 - 3	6203 Group Forms	G	2 - 3
Exploration of the unique characteristics of performance that integrates movement and digital media through hands-on creative and technological projects. Prereq: Enrollment in Dance major, and Jr standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. VSP Admis Cond course.			Composition of group dances, and exploration of devices and craft unique to group choreography. Prereq: Grad standing in Dance or permission of instructor. Not open to students with credit for 749. VSP Admis Cond course.		
5500 Anti-Racism in the Performing Arts	U G	3	6290 Composition: Special Topics	G	1 - 3
Build on foundation of anti-racist practices and reflection for artists, educators, and audiences. Interdisciplinary course materials address how racism operates systemically, institutionally, and interpersonally in live and digital performing arts. Consider personal biases and intersectional identities, examine the interdependent relationship between culture and society. Prereq: Jr, Sr, Grad, or professional standing; or permission of instructor.			Special topics in dance composition. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. VSP Admis Cond course.		
5505S Citizen Artists: Cultivating Community-Engaged Arts Partnerships	U G	3	6301 Analysis I	G	2 - 3
Service learning course to investigate fundamental questions about anti-oppression, arts-integrated practices as they work with and for local communities. Through movement and creative practice, training, readings, writings, viewings, and discussions, the class builds facilitation skills and explores dramaturgical approaches to devising performance with community partners. Prereq: Junior, Senior, or Graduate standing; or by permission of instructor. Repeatable to a maximum of 15 cr hrs or 3 completions.			Foundational course in Laban Movement Analysis (LMA), including studio-based studies, practice in observation, and topical readings and viewings. Prereq: Grad standing in Dance. Not open to students with credit for 707. VSP Admis Cond course.		
5601 Production: Practicum	U G	1 - 3	6700 Repertory	G	1 - 3
Hands-on exploration of elements of dance production. Prereq: Enrollment in Dance major, and 2601 (298), or Grad standing, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.			Studio-based experience in learning a new or existing dance work, may include informal performance. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. VSP Admis Cond course.		
5602 Lighting: Practicum	U G	1 - 3	6701 Performance	G	1 - 3
Hands-on exploration of elements of dance lighting. Prereq: Enrollment in Dance major or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.			Rehearsal process and performance of a dance work choreographed by resident or visiting artists. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.		
5603 Costume: Practicum	U G	1 - 3	6790 Repertory/Performance: Special Topics	G	1 - 3
Hands-on exploration of elements of dance costuming. Prereq: 2601 (298), and enrollment in Dance major; or Grad standing; or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions.			Special topics in repertory and performance. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.		
5611 Technology: Practicum	U G	1 - 3	6801 Foundations in Dance Research	G	3
Hands-on exploration of elements of dance technology Prereq: Enrollment in Dance major, and 2601 (298), or Grad standing, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.			Introductory graduate seminar presenting department and university resources for dance research, academic writing skills, and technological literacy. Prereq: Grad standing in Dance or permission of instructor. Not open to students with credit for 801.51, 801.91. VSP Admis Cond course.		
5612 Digital Video Editing: Practicum	U G	1 - 3	6802 Foundations in Dance Pedagogy	G	3
Introduction to practical skills in desktop non-linear digital video editing with particular attention to motion and action editing in dance. Prereq: Enrollment in Dance major, and 2601 (298), or Grad standing, or permission of instructor. Repeatable to a maximum of 16 cr hrs or 8 completions. VSP Admis Cond course.			Introductory graduate seminar including practical and theoretical approaches to studio- and lecture-based class pedagogy and topics in higher education. Prereq: Grad standing in Dance, or permission of instructor. Not open to students with credit for 801.81, 894.		
			6805 Introduction to Dance Studies	G	3
			Graduate seminar and writing workshop introduces the history, development, and prominent debates within the contemporary field of dance studies; moves between theoretical considerations of dance and practical exercises in writing about dance; exposes students to critical literature and choreography and trains students in the movement description and analytical writing. Prereq: Grad standing in Dance or Dance Studies major, or permission of instructor.		

116 Dance

6990	Research: Special Topics	G	1 - 4
Special topics in dance research. Prereq: Grad standing in Dance or permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. VSP Admis Cond course.			
7403	Postmodernism in Dance I	G	4
Inquiry into aesthetic points of view, beliefs and assumptions inherent in dance practices and dance criticism from the 1960s through the mid-1980s. Prereq: Grad standing or permission of instructor. Not open to students with credit for 759. VSP Admis Cond course.			
7404	Postmodernism in Dance II	G	4
Inquiry into aesthetic points of view, beliefs and assumptions inherent in dance practices and dance criticism from the mid-1980s to the present. Prereq: Grad standing or permission of instructor. Not open to students with credit for 759, 801.31. VSP Admis Cond course.			
7405	Black Continuum in American Dance	G	2 - 4
Examination of dance genres, performance venues, and cultural workers that have shaped the Black continuum in American dance from the antebellum era to the present. Prereq: Grad standing or permission of instructor. Not open to students with credit for 801.30. VSP Admis Cond course.			
7406	Theories of the Body	G	4
Cross-disciplinary seminar in critical theory considering the body as flesh and bone and as a discursive entity. Prereq: Grad standing or permission of instructor. Not open to students with credit for 860. VSP Admis Cond course.			
7408	Bodies on the Line	G	4
Interdisciplinary analysis of the body as a site of political investment and contestation in stage-based performances and everyday life. Prereq: Grad standing or permission of instructor. Not open to students with credit for 760.03, 860.01. VSP Admis Cond course.			
7409	Ethnographies of Dance and Performance	G	4
Reading and conducting ethnographic research in areas of dance and performance, including feminist and post-colonial approaches to Western, non-Western, and globalized forms. Prereq: Grad standing or permission of instructor. VSP Admis Cond course.			
7490	History/Theory/Literature: Special Topics	G	1 - 4
Special topics in history/theory/literature of dance. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 16 cr hrs or 4 completions. VSP Admis Cond course.			
7500	Directed Teaching MFA or PhD	G	1 - 3
Experience designed to aid prospective teachers of dance in their development of essential teaching skills in a variety of settings with a faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. VSP Admis Cond course.			
7600	MFA Project: Production	G	1 - 2
Seminar focusing on production elements relevant to MFA projects during semester of presentation. Prereq: Grad standing in Dance or permission of instructor. Not open to students with credit for 893.04. Repeatable to a maximum of 20 cr hrs or 20 completions.			
7900	Theories and Methods	G	4
Theories and methods of research in dance studies; PhD core course. Prereq: Grad standing in Dance or permission of instructor. Not open to students with credit for 880. VSP Admis Cond course.			
7901	History/Theory/Literature Choreography	G	4
Inquiry into selected topics within the history, theory and literature of choreography, PhD core course. Prereq: Grad standing in Dance or permission of instructor. VSP Admis Cond course.			
7902	History/Theory/Literature Analysis of Movement	G	4
Inquiry into selected topics within the history, theory and literature of the analysis of movement, PhD core course. Prereq: Grad standing in Dance or permission of instructor. VSP Admis Cond course.			
7998	MFA Comprehensive Examination	G	1 - 2
Examination questions written in partial fulfillment of the MFA degree. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U. VSP Admis Cond course.			
7999	MFA Project	G	1 - 10
Activities leading to the completion of the MFA creative project, in partial fulfillment of the MFA degree. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U. VSP Admis Cond course.			
8193	PhD Independent Study	G	1 - 5
Independent projects undertaken by PhD students under supervision of faculty mentor. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 16 completions. This course is graded S/U. VSP Admis Cond course.			
8200	PhD Qualifying Examination	G	1 - 2
Writing of qualifying examination question to determine capacity to proceed through the doctoral degree in Dance Studies. Prereq: Doctoral standing in Dance Studies.			
8800	PhD Pre-Candidacy Independent Readings	G	1 - 8
Selection and reading of appropriate texts toward designing candidacy examination areas. Prereq: Doctoral standing in Dance Studies. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			

8998	Candidacy Exams	G	3 - 10
Examination questions (written and oral portions) in partial fulfillment of the PhD degree. Prereq: Permission of instructor. Repeatable to a maximum of 16 cr hrs or 2 completions. This course is graded S/U. VSP Admis Cond course.			

8999	Dissertation	G	1 - 10
Culminating written document completed in fulfillment of the PhD degree. Prereq: Permission of instructor. Repeatable. This course is graded S/U. VSP Admis Cond course.			

Dental Hygiene

1100	Dental Hygiene Survey	U	1
Introduction to the university and the dental hygiene program. University policies, procedures and resources; students' rights and responsibilities; academic requirements; career and professional issues. Prereq: Admission to pre-DHY, or permission of instructor.			
2110	Oral Anatomy, Tooth Morphology and Occlusion	U	4
Instruction in the basics of dental morphology and oral anatomy to aid in providing dental hygiene therapy. Prereq: Admission to DHY major.			
2130	Oral Radiography	U	3
Introduction to physics, biology and technical components involved in exposing, processing and interpreting dental radiographs. Prereq: Admission to DHY major.			
2150	Periodontology	U	3
Introduction to principles of embryology, histology, and periodontology and periodontal medicine. Anatomy, physiology, histology and functions of dental tissue are discussed in relationship to health and disease of the periodontium. Prereq: Admission to DHY major.			
2170	Dental Materials Laboratory	U	2
Instruction in the composition, chemical and physical properties, proper manipulation and use of materials used in dentistry. Prereq: 2110.			
2220	The Profession of Dental Hygiene	U	1
Introduction to the history, professional, legal, and ethical aspects of dental hygiene. Prereq: Admission to DHY major.			
2240	Oral Health and Disease Prevention	U	2
Introduction and knowledge of appropriate use of materials and techniques in patient education and dental hygiene practice to prevent, arrest, and control dental diseases. Prereq: Admission to DHY major.			
2300	Dental Hygiene Pre-Clinic	U	4
Introduction to procedures and techniques necessary to function as a co-therapist in the dental clinical setting. Prereq: Admission to DHY major.			
2310	Dental Hygiene Clinic I	U	4
Clinical application of the principles and technical procedures of patient management in the practice of dental hygiene. Prereq: A grade of C- or above in 2110, 2130, 2150, and 2300, and recommendation of faculty.			
2400	Scientific Inquiry	U	1
Introduction to the process of scientific inquiry, research methodology, and basic statistical concepts. Research methodology from a dental perspective will be introduced for community dentistry and research poster projects. Prereq: Admission to DHY major. Not open to students with credit for 3410.			
3110	General Pathology and Medicine for Dental Hygiene	U	2
Introduction to general pathology and medicine for dental hygiene practice. Students will learn to review patient's medical history and recognize common medical conditions, implications for oral health care and how to alter treatment plans for medically compromised patients. Prereq: 2300.			
3130	Oral Pathology	U	2
Introduction to current concepts regarding the pathogenesis and clinical features of oral diseases. Prereq: 3110.			
3140	Pain and Anxiety Management	U	2
Instruction in commonly used dental office techniques for managing patient anxiety and pain primarily using nitrous oxide/oxygen inhalation and local anesthesia. Prereq: 2110 and 2300.			
3150	Periodontal Therapy	U	2
Instruction in initial and supportive therapy for periodontally compromised patients in dental practice settings, including discussion of adjunctive therapies and periodontal surgeries. Prereq: 2110, 2150, and 2300.			
3160	Pharmacology for Dental Hygiene	U	1
Introduction to pharmacology and its application to clinical dental hygiene. Topics include pharmacokinetics, pharmacodynamics, recognition of drug classes in patient's health history and how the pharmacologic regimen must be considered before dental treatment is rendered. Prereq: 2300.			
3170	Dental Materials	U	1
Instruction in the biologic, chemical and physical characteristics and properties of various biomaterials encountered in the practice of dental hygiene and dentistry. Prereq: 2110.			

3180	Management of Medical Emergencies	U	1
Introduces students to algorithms designed for the management of common medical emergencies in the dental office. This course includes a review of the signs and symptoms often seen in seven different medical emergencies. The medical emergencies covered in this course are: airway obstruction, syncope, hypoglycemia, seizure, acute asthma attack, angina, and anaphylaxis. Prereq: 2310, 3110, and 3230.			
3210	Community Oral Health	U	2
Introduction to the knowledge, skills and behaviors necessary to promote oral health through organized community efforts. Prereq: Admission to DHY major.			
3230	Care for Patients with Special Needs	U	2
Instruction to identify patients with special needs and development of skills and techniques to effectively treat this population. Prereq: 2240 and 2300.			
3320	Dental Hygiene Clinic II	U	3
Ongoing clinical experience with emphasis on development of fundamental clinical skills. Prereq: A grade of C- or above in 2310, 3110, 3140, 3150, and 3160, and recommendation of faculty.			
3330	Dental Hygiene Clinic III	U	5
A continuation of clinical patient care with emphasis on time management. Patient care parameters are expanded. Prereq: A grade of C- or above in 3320, and recommendation of faculty.			
3400	Research Application and Analysis	U	2
Continuation of 2400. Application of scientific inquiry, research methodology, basic statistical concepts, and interpretation of data analyses. Presentations of community dentistry and research poster projects will be completed. Prereq: 2400. Not open to students with credit for 3410.			
3410	Research Methods and Interpretation	U	4
Introduction to the process of scientific inquiry, research methodology, basic statistical concepts and interpretation of data analyses. Research methodology from a dental perspective will be introduced. Prereq: Admission to BDCP major.			
4193	Individual Studies in Dental Hygiene	U	1 - 3
Advanced studies in any relevant area of dental hygiene. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4194	Group Studies in Dental Hygiene	U	1 - 3
Group studies in selected topics in dental hygiene. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4210	Integrated Dental Hygiene Science I	U	1
Integration and review of all areas of dental hygiene related to dental hygiene practice. Application of analytical skills to case analysis. Prereq: Sr standing in DentHyg. This course is graded S/U.			
4220	Integrated Dental Hygiene Science II	U	1
Continuation of 4210. Prereq: 4210. This course is graded S/U.			
4240	Practice Management	U	2
Introduction to the economic and employment issues which impact dental hygiene practices and management skills to foster current standards of dental hygiene care. Prereq: Sr standing in DHY.			
4250	Dental Hygiene Senior Seminar	U	2
DH 4250 is designed for students to explore current issues related to opportunities and demands of the dental hygiene profession. The goal of DH 4250 is to prepare students to transition from dental hygiene school to registered dental hygienists, understand the business of dentistry and plan for their future careers within a potentially changing U.S. health care system and ever evolving profession. Prereq: 2220, and Sr standing in dental hygiene. This course is graded S/U.			
4340	Dental Hygiene Clinic IV	U	5
A final clinical experience incorporating all previously acquired knowledge, techniques, procedures, and evaluation of results of dental hygiene therapy with emphasis on time management. Prereq: A grade of C- or above in 3330, and recommendation of faculty.			
4420	Current Concepts in Dental Hygiene	U	2
Instruction in the significant aspects of dental hygiene practice within the context of dentistry and health care. Prereq: 3410.			
4430	Dental Hygiene Capstone	U	1 - 4
Supervised practice outside the traditional clinic in a setting similar to one in which the dental hygiene student may practice, teach, or conduct research upon graduation. Prereq: Sr standing in DHY or BDCP major. Repeatable to a maximum of 4 cr hrs or 4 completions. This course is graded S/U.			
4530	Oral Health Behavior Management	U	2
Instruction in advanced skills for dental hygienists to help patients achieve good oral health, with emphasis on clinical application and evaluation. Prereq: Admission to UDHY program.			

4620	Dental Hygiene Education I	U	3
Introduction to teaching in the dental hygiene setting. This course is designed to provide the future dental hygiene educator with insight into the fundamental principles of learning and teaching. This course highlights the behaviors, attitudes, and interactions of effective and inspiring teachers. Prereq: Admission to UDHY major.			
4630	Dental Hygiene Education II	U	3
Continuation of 4620. This course is designed to provide the future dental hygiene educator with an appreciation of foundations of teaching and learning, essential teaching skills, importance of communication in teaching, instructional planning, instructional strategies/activities, assessment fundamentals, methods of assessment, teaching in higher education, and personal philosophy of teaching. Prereq: 4620.			
4725	Expanded Functions for the Dental Auxiliary Pre-clinic	U	4
Introduction to theory and technical procedures for the expanded functions dental auxiliary in four-handed dentistry and restoring cavity preparations with amalgam alloy and filled resins. Prereq: A grade of C- or above in 2310.			
4740	Expanded Functions for the Dental Auxiliary Clinic I	U	1 - 3
Clinical application of expanded function duties permitted by law. Prereq: A grade of C- or above in 4725.			
4750	Expanded Functions for the Dental Auxiliary Clinic II	U	1
Clinical application of expanded function duties permitted by law. Prereq: A grade of C- or above in 4740.			
4760	Expanded Functions for the Dental Auxiliary Seminar	U	1
Instruction in current expanded functions, practice management techniques, and current law in Ohio including practical experiences in preparation for Ohio Expanded Functions Qualifying Examination. Prereq: A grade of C- or above in 4740.			
6000	Educational Policy and Management in Dental Hygiene	G	3
Designed to study the concept of policy as it relates to dental hygiene educational institutions and their governance and practices while providing knowledge and skills in basic management and administration. Prereq: Admission to Master's in Dental Hygiene, or permission of instructor.			
6100	Dental Hygiene Educational Theory and Methods	G	3
The study of theory, principles and research related to the faculty role in active teaching and learning, critical thinking, and development of course alignment in dental hygiene education. Prereq: Admission to Master's in Dental Hygiene, or permission of instructor.			
6200	Contemporary Issues in Dental Hygiene	G	3
Examines current issues which affect the overall dental profession with a strong focus on dental hygiene issues and the delivery of dental health care. It explores current and innovative strategies to make changes in dental hygiene to improve oral and overall health care. Prereq: Admission to Master's in Dental Hygiene, or permission of instructor.			
6400	Introduction to Dental Research Designs	G	3
Designed to present conception and technical problems in the development and implementation of clinical, behavioral and basic science research projects related to dentistry. Prereq: Admission to Master's in Dental Hygiene, or permission of instructor.			
6450	Statistical Analysis and its Application to Dental Hygiene	G	3
Designed to provide a conceptual foundation of statistics related to basic, clinical and behavioral dental science. Prereq: 6400, and admission to Master's in Dental Hygiene.			
7100	Instructional Strategies	G	3
Explores modern educational methodology and course design in the teaching of dental hygiene students including technological advances in online and traditional teaching. Prereq: 6100, or permission of instructor.			
7191	Dental Hygiene Internship	G	1 - 6
Supervised practical experience in the day to day operation of a dental hygiene program. Prereq: 6100, 7100, and 7200 for a teaching internship; or 6000 and 7300 for an administrative internship; and admission to the MDH program, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
7193	Individual Studies in Dental Hygiene	G	1 - 6
Provides an opportunity for students to pursue individual studies in dental hygiene topics not otherwise offered. Prereq: Admission to MDH program, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
7200	Clinical/Laboratory Instruction and Administration	G	3
Designed to study the theory and practice of laboratory, pre-clinical, and clinical dental hygiene instruction with an emphasis on psychomotor skill development, student mentoring, and evaluation. Prereq: Admission to MDH program, or permission of instructor.			
7300	Leadership and Administration in Dental Hygiene Education	G	3
Designed to study leadership theories and program administration unique to dental hygiene educational programs including accreditation, human resources, faculty evaluation, budgeting, administration and outcomes assessment. Introduces the administrative structure and duties required to become a faculty member or program director and focuses on leadership in the profession. Prereq: Admission to Master's in Dental Hygiene, or permission of instructor.			

118 Dental Hygiene

7999 Research: Thesis **G** **1 - 6**
 Provides graduate students with the opportunity to develop and conduct basic and applied Dental Hygiene research required for the completion of a master's thesis. Prereq: Admission to MDH program, and permission of thesis advisor. Repeatable to a maximum of 18 cr hrs or 6 completions. This course is graded S/U.

Dentistry

6200 Molecular and Cellular Biochemistry **D** **4**
 Basic principles of biochemistry, molecular and cellular biology with special emphasis on biochemical processes important in dentistry. Prereq: Enrollment in College of Dentistry. Repeatable to a maximum of 8 cr hrs.

6262 Communication and Ethics in Dentistry **D** **2**
 Communication basics with an emphasis on communication with patients. Also includes an introduction to cultural competence and ethics in dentistry.

6400 Microbiology and Immunology **D** **4**
 Major components of the human immune system, and the immune response to medically important pathogens including bacteria, viruses, fungi and parasites.

6415 Clinical Evaluative Sciences I **D** **1**
 Evidence Based Dentistry. Repeatable to a maximum of 2 cr hrs.

6416 Introduction to Clinical Dentistry I **D** **2**
 Introduction to prevention of oral disease, oral examination and modeling, patient evaluation, and use of the dental operator. May include observation or assistance with clinical patient care, simulations, and laboratory exercises. Prereq: Not open to students with credit for 415.02, 416, and 427. This course is graded S/U.

6417 Oral Anatomy **D** **3**
 Dental anatomy and anatomy of the head and neck.

6427 Introduction to Clinical Dentistry II **D** **2**
 Introduction to periodontal instrumentation, charting, ultrasonic scaling and recall. Topics also include: Rubber dam, coronal polishing and composite typodont exercise. This course is graded S/U.

6435.01 Fixed I Lecture **D** **1**
 This course provides information regarding how to prepare ivorine teeth (molars and premolars) for a complete veneer crown cast gold restoration. Repeatable to a maximum of 3 cr hrs.

6435.02 Fixed I Laboratory **D** **1**
 This course provides experience in preparing ivorine teeth (molars and premolars) for a complete veneer crown cast gold restoration.

6436.01 Fixed Dentistry II Lecture **D** **1**
 Students will learn to restore anterior teeth with crowns, applying scientific basis on principals of tooth preparations, provisional restorations, and material selections. The principals of esthetics will be introduced and applied in provisional restorations.

6436.02 Fixed Restorative Dentistry II Laboratory **D** **1**
 Students will learn to restore anterior teeth with crowns, applying scientific basis on principals of tooth preparations, provisional restorations, and material selections. This laboratory course is taught in conjunction with 6436.01.

6437.01 Fixed Restorative Dentistry III **D** **1**
 Students will learn to restore anterior partial edentulism with fixed dental prosthesis. Topics include: application of scientific basis to indications and contraindications, principals of tooth preparations, provisional restorations, and material selections and esthetics. Repeatable to a maximum of 6 ch hrs.

6437.02 Fixed Restorative Dentistry III Laboratory **D** **1**
 Students will learn to restore anterior partial edentulism with fixed dental prosthesis. Topics include: application of scientific basis to indications and contraindications, principals of tooth preparations, provisional restorations, and material selections and esthetics. The emphasis is on associated laboratory procedures. Repeatable to a maximum of 3 cr hrs.

6438.01 Fixed IV Lecture **D** **1**
 Clinical and theoretical considerations of tooth preparation design for fixed partial dentures and metal ceramics, the importance of diagnostic waxing, fabrication of direct provisional restorations, theoretical considerations in framework design, and the properties of materials used in the fabrication of metal-ceramic restorations. Repeatable to a maximum of 3 cr hrs.

6438.02 Fixed IV Laboratory **D** **1**
 Clinical and theoretical considerations of tooth preparation design for fixed partial dentures and metal ceramics laboratory experiences. Repeatable to a maximum of 3 cr hrs.

6482 Removable Complete Prosthodontics I **D** **2**
 Overview of complete removable prosthodontics for the general dentist. Includes a laboratory component.

6489 Removable Partial Prosthodontics I **D** **2**
 Introduction to removable partial prosthodontics. Survey edentulous casts and design removable partial dentures; prepare mouth for insertion. Includes a laboratory component.

6490 Advanced Principles in Cardiology **D** **1**
 Advanced Principles in Cardiology is a one semester, one credit elective course designed to help third year DDS program students who are interested in specialty programs (especially anesthesia and OMFS) gain a more in-depth understanding of the functions of the human heart. It will specifically focus on advanced principles related to cardiac anatomy, physiology, and pathology. Prereq: Enrollment in the third academic year of the DDS program, and permission of instructor. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

6491 Advanced Principles in Pulmonology **D** **1**
 In-depth understanding of the functions of the human respiratory system. Specific focus on advanced principles related to pulmonary anatomy, physiology, and pathology. Prereq: Enrollment as a Dentistry Year 3 student. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

6500 Histology, Development and Cell Biology of Oral Tissues **D** **3**
 Light microscopic and ultrastructural organization of adult and developing orofacial tissues including their underlying cellular and molecular basis.

6505 Oral Surgery I **D** **1**
 Introduction to principles of patient evaluation and management for common dento-alveolar surgical procedures.

6530 Post and Core Restoration of Endodontically Treated Teeth **D** **½**
 Restoration of endodontically treated teeth. Repeatable to a maximum of 1.5 cr hrs.

6533 Occlusion **D** **3**
 This course covers the impact of tooth form on function. Students will learn how to model a patient's dentition in the laboratory and appropriately relate it to the TMJ. This course will provide students with an understanding of the dynamics of mandibular movements, articulator design, occlusal schemes, anatomy of teeth.

6534.01 Operative Dentistry IV **D** **1**
 Diagnosis and treatment planning of intra-coronal restorations and facial veneers including principles of tooth preparation, fabrication of a provisional restoration and cementation of the final restoration. Additional topics include: CAD/CAM for dental restorations and treatment planning for diastemas. Repeatable to a maximum of 3 cr hrs.

6534.02 Operative Dentistry IV Laboratory **D** **1**
 This laboratory course provides students with skills related to providing intra-coronal restorations and facial veneers. Laboratory exercises include tooth preparation, fabrication of a provisional and final cementation of the permanent restoration. Repeatable to a maximum of 3 cr hrs.

6540.01 Operative Dentistry I **D** **2**
 Introduction to the principles of conservative tooth preparations, characteristics of dental amalgam and its use in the restoration of posterior teeth and class V lesions. Students will learn how to prepare different types of cavities. The course also include information related to the caries process, techniques to control lesions, and restorative dentistry materials. Repeatable to a maximum of 6 cr hrs.

6540.02 Operative Dentistry I Laboratory **D** **1**
 Introduction to principles of conservative tooth preparations, acquiring the skills to prepare different types of cavities

6541.01 Operative II Lecture **D** **1**
 This course provides students knowledge in the use of composite, resin-modified glass ionomer, and amalgam to restore teeth. Repeatable to a maximum of 3 cr hrs.

6541.02 Operative II Laboratory **D** **1**
 This course provides students experience in the use of composite, resin-modified glass ionomer, and amalgam to restore teeth. Repeatable to a maximum of 3 cr hrs.

6542.01 Operative Dentistry III Lecture **D** **1**
 Class III composite preparations and restorations, Class IV composite preparations and restoration technique, and extensive amalgam preparations and restorations. 6542.01 is taught in conjunction with 6542.02 and is the didactic portion of the course.

6542.02 Operative Dentistry III Laboratory **D** **1**
 Class III composite preparations and restorations, Class IV composite preparations and restoration technique, and extensive amalgam preparations and restorations. 6542.02 is taught in conjunction with 6542.01 and is the laboratory portion of the course.

6543 Oral Radiology II **D** **2**
 Advanced imaging techniques including panoramic imaging and CBCT imaging. Repeatable to a maximum of 6 cr hrs.

6544 Internal Medicine for Dentistry **D** **2**
 Review of common medical conditions and implications for dental treatment. Attention is placed on major organ pathophysiology, clinical medicine & pharmacologic management. Emergency medicine is also discussed.

6545 Oral Radiology **D** **1**
 Introduction of basic radiology concepts to DDS program students. Course topics: formation, x-ray interactions, intraoral anatomy, image exposure and technique, effects of radiation including radiation safety and protection. Prereq: Enrollment in DDS program.

6546.02	Operative Dentistry V Laboratory	D	1	The primary focus of Dent 6546.02 is the Dent II pre-clinical operative competency exam. The exam consists of eight operative dentistry procedures. The procedures are a combination of amalgam preparations ideal and complex, composite preparations, amalgam restorations, and composite restorations. Dentistry 6546.02 is taken concurrently with Dentistry 6546.01. Repeatable to a maximum of 3 cr hrs.	6632	Restorative and Prosthetic Dentistry Clinical Lecture Series II	D	1	Advanced topics related to treatment planning, dental materials, articulators and impressions.
6551	Pediatric Dentistry II	D	½	Introduction to basic restorative dentistry for the primary and transitional dentition.	6633	Restorative and Prosthetic Dentistry Clinical Lecture Series III	D	1	Advanced topics related to: esthetics, casting delivery, removable partial denture attachments, classification of edentulism, treating difficult denture patients and maxillofacial prostheses.
6564	Periodontology I	D	3	Introduction to periodontal disease and diagnosis.	6638	Implant Dentistry I	D	1½	Introduction to implant dentistry including discussion of treatment planning dental implants.
6565	Periodontology II	D	4	Periodontal disease prevention and therapy using an evidence-based patient management approach. Includes rationale for non-surgical and surgical therapy. Lab and clinic exercises in subgingival instrumentation.	6645	Oral Pathology I	D	2	Oral and maxillofacial pathologic conditions. Topics include dental and developmental anomalies, mucocutaneous and salivary gland disorders, odontogenic cysts and tumors and HIV infection.
6567	Endodontics I	D	1½	Overview of basic endodontic treatment, from access to the obturation technique. General terminology, basic instrument description, rationale for treatment. Includes laboratory component.	6648	Oral Pathology II	D	3	Oral and maxillofacial pathologic conditions. Topics include inflammatory and reactive conditions, epithelial and melanocytic pathology, Mesenchymal hard and soft tissue neoplasms, hematologic disorders and oral manifestations of systemic disease.
6569	Endodontics II	D	1	Topics related to endodontic treatment including: diagnosis, emergency treatment, traumatic injuries, internal bleaching, vital pulp therapy, relationship to the periodontium, surgery, and treatment outcomes.	6651	Pediatric Dentistry I	D	2	Overview of Pediatric Dentistry for the general dentist. Content includes treatment of infants, children, adolescents and those patients with special medical needs. Prereq: Enrollment in DDS program. Repeatable to a maximum of 6 cr hrs.
6571	Pharmacology I	D	4	Introduction to the mechanism of action and side effects of pharmacologic agents.	6654	Orthodontics Introduction	D	2	This course is intended to provide the general practitioner with knowledge and skill to evaluate child, adolescent and adult patients' orthodontic problems. Repeatable to a maximum of 6 cr hrs.
6579	Local Anesthesia	D	1	Techniques of intraoral local anesthetic administration with emphasis on predicting and preventing complications. Includes discussion of related basic science principles.	6655	General Pathology	D	3	Overview of human disease and the mechanisms associated with genetic, acquired, reactive and neoplastic conditions. Disease epidemiology, pathogenesis, diagnosis, treatment, prognosis and prevention are discussed.
6601	Physiology I	D	2	A course covering all areas of human physiology, plus topics related to oral physiology. The course begins in the summer semester and a second course will continue in the fall semester. An emphasis is placed on the integration of principals of basic science to clinical science by providing case histories and other material from the clinical literature. Prereq: Enrollment in Pre-doctoral Dental program. Repeatable to a maximum of 6 cr hrs. This course is progress graded.	6657	Orthodontics I	D	2	Orthodontics for general dental practitioners. Repeatable to a maximum of 6 cr hrs.
6602	Physiology II	D	3½	A course covering all areas of human physiology, plus topics related to oral physiology. The course begins in the summer semester and will continue in the fall semester. An emphasis is placed on the integration of principals of basic science to clinical science by providing case histories and other material from the clinical literature. Prereq: Enrollment in the DDS program. Repeatable to a maximum of 10.5 cr hrs.	6658	Clinical Orthodontics I	D	½	This course establishes the skills required for the clinical application of the principles of facial and dental growth and development, and orthodontic diagnosis. Students will develop the skills that they will need to address the orthodontic needs of their patients and to recognize when orthodontic treatment can add to the results of their restorative and periodontal treatment. Repeatable to a maximum of 1.5 cr hrs. This course is graded S/U.
6612	Pharmacology II	D	1	Applied pharmacology including the safe prescribing of drugs used in general dental practice. Includes principles of pharmacology and interaction concerns. Repeatable to a maximum of 3 cr hrs.	6659	Orthodontics II	D	1	Advanced topics in orthodontics for the general dentist including: growth and development and treatment evaluation.
6623	Geriatrics and Patients with Special Health Needs	D	2	Concerns associated with the provision of oral health care to Geriatric and Special Needs patients. Topics include: patient mobility, psychosocial and socioeconomic issues, medical considerations, and communication.	6684	Removable Complete Prosthodontics II	D	1	Finishing and polishing a complete denture, laboratory remount, occlusal equilibration, denture repair and relines. Includes a laboratory component.
6625	Practice Management I	D	1	Basic concepts in personal and business finance and business management. Topics include future trends in dentistry, economics, investments, and concepts in risk management and regulatory agency oversight.	6690	Introduction to Clinical Dentistry III	D	2	Introduction to interim partial dentures and border molding, dental photography, carries risk assessment, removal of large restorations and head and neck examination. Includes observation or assistance with clinical patient care. This course is graded S/U.
6626	Practice Management II	D	1	Career opportunities within Dentistry. Evaluation of Dental practice types relative to business structure, organization and productivity analysis.	6691	Introduction to Clinical Dentistry IV	D	2	Overview of clinic patient records. Exercise in local anesthesia administration, use of posterior rubber dam and dental charting. Also includes observation or assistance with clinical patient care. This course is graded S/U.
6627	Practice Management III	D	1	Topics include legal issues affecting Dental practice, peer review process, liability insurance, marketing, associateships, and evaluating and purchasing a Dental practice.	6693	Individual Studies in Dentistry I	D	½ - 12	Individual studies in any of the recognized fields of dentistry. Repeatable to a maximum of 36 cr hrs or 6 completions. This course is graded S/U.
6629	Dental Materials	D	1	Evaluation and effective use of dental materials by the general dentist. Topics also include requirements of ideal materials and procedures for working with dental laboratories. Repeatable to a maximum of 2 cr hrs.	6704	Oral Surgery II	D	1	Overview of advanced oral surgery practice.
6630	Diagnosis and Treatment Planning for Patients with Complex Restorative Needs	D	2	Introduction to procedures for collecting and evaluating information, particularly as related to occlusion, that enable proper diagnose and treatment of partially edentulous patients with complex restorative needs. Includes a laboratory component.	6744	Oral Pathology III	D	1	Case-based study of oral pathologic conditions including documentation, development of the differential diagnosis, strategies to establish the diagnosis and patient management.
6631	Restorative and Prosthetic Dentistry Clinical Lecture Series I	D	½	Advanced topics related to clinical guidelines, prevention of recurrent caries under fixed restorations, fluid control, soft tissue management, tooth isolation and pulpal protection.	7012.01	Neuroscience Laboratory	G D	1	Laboratory component of Dentistry 7012 in which students will learn anatomy of the human brain. Prereq: Permission of instructor. Cross-listed in NeuroSc 7200.01.
					7012.02	Experimental Neuroscience Lab	G D	1	Laboratory component of Dentistry 7012 in which students will learn the anatomy of the rodent brain using experimental techniques. Prereq: Permission of instructor. Cross-listed in NeuroSc 7200.02.

120 Dentistry

7012.03	Foundations of Neuroscience II	G D	4		
	Discusses the organization of selected systems in the nervous system including motor, sensory, autonomic, and higher cognitive centers. Course will cover anatomical, functional, and behavioral concepts. Prereq: Permission of instructor. Cross-listed in NeuroSc 7002.				
7400	Advanced Pediatric Dentistry	D	1		
	Advanced clinical experiences and background in Pediatric Dentistry for general practitioners. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.				
7500	Community Dentistry I	D	1½		
	General dental practice experience at external sites. Prereq: Not open to students with credit for 500, 501, 502, or 503.				
7501	Community Dentistry II	D	2		
	General dental practice experience at external sites. Prereq: Not open to students with credit for 500, 501, 502, or 503.				
7502	Community Dentistry III	D	2		
	General dental practice experience at external sites. Prereq: Not open to students with credit for 500, 501, 502, or 503.				
7616	Primary Care I	D	1½		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. Prereq: Not open to students with credit for 616, 617, 618, or 619. This course is graded S/U.				
7617.01	Primary Care II	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is graded S/U.				
7617.02	Primary Care II	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. Prereq: Not open to students with credit for 616, 617, 618, or 619. Repeatable to a maximum of 8 cr hrs. This course is progress graded.				
7618.01	Primary Care III	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is progress graded (S/U).				
7618.02	Primary Care III	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is progress graded.				
7652	Clinical Pediatric Dentistry I	D	1		
	Clinical experience treating child and adolescent patients. Prereq: Not open to students with credit for 652.02. This course is graded S/U.				
7658	Clinical Orthodontics	D	1		
	Clinical application of the principals of orthodontic growth and development, and orthodontic treatment. This course is graded S/U.				
7669	Clinical Endodontics I	D	1		
	Clinical experience in performing root canal treatment on uncomplicated permanent teeth. Also exposure to treatment modalities necessary in more complicated Endodontic cases. Prereq: Not open to students with credit for 668. This course is graded S/U.				
7676	Clinical Periodontology	D	1		
	Students participate in treatment of patients with periodontal needs.				
7693	Individual Studies in Dentistry II	D	½ - 12		
	Individual studies in any of the recognized fields of dentistry. Repeatable to a maximum of 36 cr hrs or 6 completions.				
7701	Clinical Oral Surgery I	D	4		
	Introductory clinical experience to the primary principles of patient evaluation and management for common dento-alveolar surgical procedures. Prereq: Not open to students with credit for 701. This course is graded S/U.				
7702	Clinical Oral Surgery II	D	½		
	Patient evaluation and management for common dento-alveolar surgical procedures. Includes an experience in hospital dentistry. Prereq: Not open to students with credit for 704. This course is graded S/U.				
7708	Clinical Pediatric Dentistry II	D	1		
	Experience treating child and adolescent patients in a clinic environment. Also includes experience in a hospital setting and exposure to complicated Pediatric Dentistry and Special Needs cases. Includes competency examinations. Prereq: Not open to students with credit for 708.03. This course is graded S/U.				
7716.01	Primary Care IV	D	3		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is graded S/U.				
7716.02	Primary Care IV	D	3		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is progress graded.				
7718.01	Primary Care V	D	3		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is graded S/U.				
7718.02	Primary Care V	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. Prereq: Not open to students with credit for 716, 717, 718, or 719. This course is progress graded.				
7719.01	Primary Care VI	D	3		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is graded S/U.				
7719.02	Primary Care VI	D	4		
	Clinical experience in primary care dentistry including diagnosis, prognosis, treatment planning, care delivery and evaluation. May include competency examinations and special projects. This course is progress graded.				
7746	Clinical Oral Radiology Introductory	D	½		
	Introductory clinical experience in Oral Radiology. Includes selection, and evaluation of radiographs in addition to techniques for obtaining appropriate images. This course is graded S/U.				
7747	Clinical Oral Radiology Intermediate	D	½		
	Intermediate level clinical experience in Oral Radiology. Includes selection, and evaluation of radiographs in addition to techniques for obtaining appropriate images. This course is graded S/U.				
7769	Clinical Endodontics II	D	1		
	Clinical experience in performing root canal treatment on uncomplicated permanent teeth. Also exposure to treatment modalities necessary in more complicated Endodontic cases.				
7776	Periodontology Clinical Competencies	D	1		
	Competency examinations related to Periodontology. Repeatable to a maximum of 3 cr hrs.				
7920	Oral Biology Seminar	G	½ - 2		
	Student presentations of recent research findings, both original and from the literature. Repeatable to a maximum of 40 cr hrs or 20 completions.				
7921	Oral Biology Journal Club	G	1 - 2		
	Weekly, one student will present a current paper from a top tier journal that reports important findings related to Oral Biology. Prior to class, all students will read the paper, write a brief summary, summarize the experimental design and statistical approach, and compose two questions for class discussion. Grading is based on presentation quality, completion of pre-work, and participation. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.				
7993	Individual Studies in Advanced Dentistry	G	½ - 12		
	Advanced individual studies in any of the recognized fields of dentistry. Repeatable. This course is graded S/U.				
8000.02	Orthodontics/Graduate Orthodontics Clinic	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable.				
8000.03	Periodontics	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable.				
8000.04	Prosthodontics/Graduate Prosthodontics Clinic	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable.				
8000.05	Oral Pathology I Clinical Assisting	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.				
8000.06	Endodontics	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.				
8000.07	Pediatric Dentistry I Graduate Pediatric Dentistry Clinic	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.				
8000.15	Oral Pathology II Surgical Pathology	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.				
8000.17	Pediatric Dentistry II Medical Clinical Rotations	G	½ - 10		
	Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.				

8000.22	Orthodontics III Craniofacial Anomalies Clinic	G	½ - 10
Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.			
8000.24	Prosthodontics III Maxillofacial Clinic	G	½ - 10
Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.			
8000.27	Pediatric Dentistry III Anesthesio Rotation	G	½ - 10
Broad exposure to advanced clinical principles and practices. Repeatable. This course is graded S/U.			
8001.01	Anesthesia Literature Review	G	½
The course will explore recent advances and opinions in anesthesiology and provide an understanding of key concepts of anesthesiology and approaches to clinical management. The course will consist of a monthly topic and at least two recent peer reviewed articles that will be presented to the class for discussion. One member of the class will develop and present the lecture for each class. Repeatable to a maximum of 3.5 cr hrs.			
8001.02	Orthodontics	G	½ - 10
Review of literature. Repeatable.			
8001.03	Periodontics	G	½ - 10
Review of literature. Repeatable.			
8001.04	Prosthodontics I Removable Prosthodontics	G	½ - 10
Review of literature. Repeatable.			
8001.05	Oral Pathology	G	½ - 10
Review of literature. Repeatable. This course is graded S/U.			
8001.14	Prosthodontics II Fixed Prosthodontics	G	½ - 10
Review of literature. Repeatable.			
8001.24	Prosthodontics III Dental Implants	G	½ - 10
Review of literature. Repeatable.			
8002.01	Anesthesia Grand Rounds	G	½ - 1
Discussion of clinical cases. The course is designed to teach advanced principles of hospital anesthesia to dental anesthesia residents and provide monthly morbidity and mortality case reports. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
8002.02	Orthodontics I Case Seminars	G	½ - 10
Discussion of clinical cases. Repeatable.			
8002.03	Periodontics I Faculty Presentations	G	½ - 10
Discussion of clinical cases. Repeatable.			
8002.05	Oral Pathology	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.06	Endodontics	G	½ - 10
Discussion of clinical cases. Repeatable.			
8002.07	Pediatric Dentistry I Contemporary Issues	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.12	Orthodontics II Case Presentations	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.13	Periodontics II Student Presentations	G	½ - 10
Discussion of clinical cases. Repeatable.			
8002.17	Pediatric Dentistry II Introductory Orthodontics	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.22	Orthodontics III Craniofacial Anomalies	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.27	Pediatric Dentistry III Advanced Orthodontics	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8002.32	Orthodontics IV Dental Facial Anomalies	G	½ - 10
Discussion of clinical cases. Repeatable. This course is graded S/U.			
8006	Dental Photography	G	1
Dental Photography. Topics include: equipment, setup and lighting; portrait and intra-oral photography; photo management and presentation; copystand photography. This course is graded S/U.			
8007	Legal Issues in Dentistry	G	1
Legal issues in the acquisition and management of a dental practice including issues associated with delivery of dental services to consumers, malpractice claims against practitioners and impact of government regulation on the delivery of care.			

8008	Advanced Oral Embryology and Histology	G	½
Development of the craniofacial region, odontogenesis, eruption and structure and function of the orofacial tissues.			
8009	Research Design I	G	1
Using different research designs as the foundation, this course reviews evidence-based dentistry and basic parametric and non-parametric methods of statistical inference commonly encountered in clinical research. The course also provides a background in ethical considerations for responsible conduct of research and protection of human subjects in biomedical research.			
8010	Research Design II	G	2
This course will cover many basic principles involved in the evaluation of dental literature, in the design of a research project, and in composing and evaluating a dental research proposal, with emphasis on ethical issues, variable descriptions, statistical designs and possible conclusions, and research involving human or animal subjects.			
8011	Advanced Oral and Maxillofacial Radiology	G	1½
Advanced Oral and Maxillofacial Radiology aims to present a systematic approach to interpretation of dental radiographs, including intraoral, extraoral, and cone-beam computed tomography (CBCT) images with an emphasis on CBCT studies. This course is graded S/U.			
8150	Orofacial Pain	G	1
Overview of musculoskeletal, neuropathic and neurovascular facial pain to enable accurate differential diagnosis of non-odontogenic facial pain. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.			
8151	Sedation	G	1
Covers the indications, complications, pharmacology and techniques of IV sedation for dentistry.			
8152	Physical Diagnosis	G	1
Reviews the skills and knowledge needed to perform a history and physical examination appropriate for hospital admission. This course is graded S/U.			
8153	Anesthesia Seminar	G	½ - 1
Comprehensive review of general anesthesia and sedation as well as related subjects to anesthesiology and oral and maxillofacial surgery residents in small group discussion format. Repeatable to a maximum of 10 cr hrs or 10 completions.			
8154	Integrated Anesthesia Studies	G	½
This course is designed to help dental anesthesia residents gain a deeper understanding of the practice of anesthesia. Residents will discuss applied principles and techniques that will be encountered during residency training and in private practice. Repeatable to a maximum of 5 cr hrs. This course is graded S/U.			
8155	Emergency Simulation Lab	G	½
This course will teach, test, and refine clinical skills related to anesthesia emergencies. Training will utilize high-fidelity simulation mannequins and planned emergency scenarios. The lab sessions will take place in the OSUMC simulation lab and in the College of Dentistry. The course will incorporate video monitoring of the training and an in-depth debriefing sessions after each lesson. Repeatable to a maximum of 5 cr hrs. This course is graded S/U.			
8156	Anesthesiology Science Core	G	1
The purpose of this course is to help dental anesthesiology residents review the principles of general physiology. This will help residents in their treatment of patients and as they prepare to take part I of the ADBA national board examination. Repeatable to a maximum of 5 cr hrs.			
8157	Graduate Ethics and Professionalism	G	½
This course will consist of a series of guest lectures and reading assignments designed to provide a foundation for application of the principles of ethical reasoning, ethical decision making and professional responsibility as they pertain to the academic environment, research, patient care, and practice management. Repeatable to a maximum of 1 cr hr. This course is graded S/U.			
8158	Case Conference for Dental Anesthesiology	G	½
Dent 8158 has two goals: to provide an open forum for residents and faculty to discuss the intricacies of anesthesia case planning and review, and to act as a morbidity and mortality conference as needed. Residents will be assigned to review specific cases when morbidity and mortality conference is in session. The course is designed to foster open discussion and the free exchange of ideas. Repeatable to a maximum of 5 cr hrs. This course is graded S/U.			
8201	Advanced Orthodontics Orientation	G	1
Orientation to methods used in conjunction with clinical care with an emphasis on diagnosis and treatment planning.			
8202	Contemporary Orthodontics	G	½
Introduction to concepts related to diagnosis, prioritization of problems and treatment planning orthodontic cases.			
8203	Orthodontic Appliance Design	G	½
Design, application and fabrication of orthodontic appliances frequently used in the clinical setting. The primary clinical function of these appliances includes: anchorage, tooth movement, skeletal change, habit management and retention.			
8204	Cephalometrics	G	½
Cephalometric techniques and interpretation in relation to orthodontic treatment and growth.			

8703	Children with Disabilities and Chronic Illnesses	G	1½
Management of the oral health of patients with special health care needs. Repeatable to a maximum of 15 cr hrs.			
8704	Pediatric Dentistry Behavior Issues	G	1
Basic principles and theories of child development and the age-appropriate behavior responses in the dental setting. Repeatable to a maximum of 10 cr hrs.			
8705	Pediatric Dentistry Restorative Treatment	G	1
Restorative and prosthetic techniques and materials for the primary, mixed and permanent dentitions. Repeatable to a maximum of 10 cr hrs.			
8706	Pediatric Dentistry Pulp and Trauma Treatment	G	1 - 1½
Evaluation, diagnosis, and management of the pulpal, periodontal and associated soft tissues following traumatic injury. Repeatable to a maximum of 10 cr hrs.			
8707	Pediatric Dentistry Sedation	G	½ - 2
The principles and objectives of conscious sedation, deep sedation and general anesthesia as behavior management techniques, including indications and contraindications for their use. Repeatable to a maximum of 20 cr hrs or 20 completions.			
8708	Pediatric Dentistry Cariology	G	½ - 1½
The scientific basis for the prevention and treatment of dental caries and periodontal diseases. Repeatable to a maximum of 15 cr hrs.			
8709	Pediatric Dentistry Dental Public Health and Advocacy	G	½ - 2
Introduction of the concepts and techniques of disease prevention and health promotion in dentistry and health. In-depth advocacy training with hands-on exercises. Repeatable to a maximum of 20 cr hrs.			
8710	Graduate Pediatric Oral Pathology	G D	1
Oral Pathology for Pediatric Dentists. Repeatable to a maximum of 5 cr hrs.			
8711	Management of a Contemporary Private Practice	G	½ - 1½
Dent 8711 includes lecture sessions, seminars, and visits to dental practices in the Central Ohio area. Lectures and seminars will focus on contemporary private practice. Areas of focus will include ethical reasoning, informed consent issues, liability mitigation, collaboration with dental specialties and medical specialties, purchasing of a practice, dental staff management, and value-based care. Repeatable to a maximum of 1.5 cr hrs or 2 completions.			
8712	Simulation in Pediatric Dentistry	G	½
This course provides practical experience for potentially difficult conversations, contemporary patient issues, and emergency management. The course is entirely rooted in standardized patient encounters and mannequin-based emergency simulations, and as part of accepted simulation methodology includes debriefing as an essential element. Repeatable to a maximum of 1 cr hrs or 2 completions. This course is graded S/U.			
8840	Current Issues in Oral Biology	G	½ - 2
Didactic overview of current areas of health research. Repeatable to a maximum of 40 cr hrs or 20 completions. This course is graded S/U.			
8993	Individual Studies in Advanced Dentistry	G	½ - 12
Advanced individual studies in any of the recognized fields of dentistry. Repeatable.			
8999	Research in Dentistry	G	½ - 12
Research for thesis purposes only. Repeatable. This course is graded S/U.			

Design

2110	Design Fundamentals I	U	3
Introduction to form, organizational structures and problem solving in the context of basic 2D design. Concur: 2310.			
2130	Design Fundamentals II	U	3
Application of acquired skills and knowledge of visual language and spatial constructs to generate design concepts in a given context. Prereq: 2110. Concur: 2330.			
2310	Visual Principles and Techniques I	U	3
Skill building in using drawing to observe, see, record and communicate characteristics of subjects, objects, information, environments, experiences and interactions. Concur: 2110.			
2330	Visual Principles and Techniques II	U	3
Skills and techniques mix media that assist in interpreting, translating and generating visual narratives that reveal relationships among subjects, objects, information, environments, experience and interactions. Prereq: 2310. Concur: 2130.			
2700	Introduction to Design Practice	U	3
Introduction to theory, rationale, practice, and societal impact of design; design process, critical issues, relationship to the environment.			
2750	Design History	U	3
A history of design as affected by technology, science, and cultural world view.			
3101	Introduction to Industrial Design I	U	3
Introduction to divergent thinking strategies including design research, observation, abstraction, evaluation and communication in the context of Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.			

3102	Introduction to Interior Design I	U	3
The study of the relationship of form, function and material within the context of Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.			
3103	Introduction to Visual Communication Design I	U	3
Design and application of graphic systems in the production of visual communications within frameworks of theories of communication and signs. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.			
3104	Introduction to Game Design	U	3
Introduction to Game Design introduces students to the principles of game design and provides opportunities for them to be put into practice using analog materials and methods. Students explore what motivates play, risk-taking and reward systems, and the visual design of games for serious applications and leisure. Create, test, and play games developed in the course.			
3105	Exploring Design Thinking	U	3
An overview of concepts, processes and modes of identifying problems and proposing effective solutions from a design-oriented perspective.			
3151	Introduction to Industrial Design II	U	3
Application of divergent thinking strategies including design research, evaluation, and prototyping in the context of design in the public sphere. Prereq: Enrollment in Industrial Design major, or permission of instructor.			
3152	Introduction to Interior Design II	U	3
The study of the relationship between the user and spatial form, function and material within the context of Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.			
3153	Introduction to Visual Communication Design II	U	3
Design and application of typographic systems in the production of visual communications within frameworks of theories of communication. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.			
3200	Design Research I	U	3
Introduction to techniques and methods of evaluative research. Prereq: Enrollment in Design major, or permission of instructor.			
3301	Visualization Strategies for Industrial Design I	U	3
Skill development in using freehand sketching for rapid concept generation, form development and communication in the context of Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.			
3305	Visualization as Thinking	U	3
An overview of concepts, processes and modes of communicating with visual media to effectively generate design proposals.			
3401	Design Media I for Industrial Design	U	3
Introductory-level digital, three-dimensional modeling and visualization strategies for Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.			
3402	Design Media I for Interior Design	U	3
Introductory-level digital, three-dimensional modeling and visualization strategies for Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.			
3403	Design Media I for Visual Communication Design	U	3
Time-based media and storytelling strategies for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.			
3451	Design Media II for Industrial Design	U	3
Intermediate-level digital, three-dimensional modeling and visualization strategies for Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.			
3452	Design Media II for Interior Design	U	3
Intermediate-level digital, three-dimensional modeling and visualization strategies for Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.			
3453	Design Media II for Visual Communication Design	U	3
Digital, web-communications, user-interface and user-experience strategies for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.			
3502	Materials, Process, and Production for Interior Design	U	3
An overview of current and emerging materials and manufacturing processes commonly applied in production for Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.			
3503	Typographic Design	U	3
Introduction to basic two- and three-dimensional practices in visual communication design; emphasis on typographic design and systematic method and research techniques. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.			
3505	Presentation as Thinking	U	3
An overview of concepts, processes and modes of presenting information to create effective printed and digital communications. GE foundation lit, vis and performing arts course.			

124 Design

3551 Materials, Process, and Production for Industrial Design U 3

An overview of current, emerging, and alternative materials and manufacturing processes applied in conventional production and responsible manufacturing. Prereq: Enrollment in Industrial Design major, or permission of instructor.

3552 Interior Design Technology I U 3

Principles of contract documentation, laws, ethics, codes, standards, guidelines and sustainable practices within the context of Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.

3553 Materials, Process, and Production for Visual Communication Design U 3

An overview of current and emerging materials and manufacturing processes commonly applied in production for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.

4101 Intermediate Industrial Design I U 3

Introduction to problem and opportunity identification in the context of product design. Experience with evaluative research methods and product design development process at the intermediate level. Prereq: Enrollment in Industrial Design major, or permission of instructor.

4102 Intermediate Interior Design I U 3

Principles of space organization with FF&E (furniture, fixtures and equipment); the study of human-interior product interface relationships. Prereq: Enrollment in Interior Design major, or permission of instructor.

4103 Intermediate Visual Communication Design I U 3

Design and application of information systems in the production of visual communications within frameworks of theories of communication. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.

4104 Intermediate Game Design I U 3

Intermediate Game Design 1 introduces students to concepts for designing and prototyping digital games for entertainment, learning and social good. Students create, test, and play screen-based games developed in the course. Prereq: 3104.

4151 Intermediate Industrial Design II U 3

Design and application of products, services, and systems within frameworks of Design Fiction, Design Futures, and Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.

4152 Intermediate Interior Design II U 3

Principles of order, spatial sequence and connectivity; the study of medium size space organization and interior and exterior design correlations. Prereq: Enrollment in Interior Design major, or permission of instructor.

4153 Intermediate Visual Communication Design II U 3

Design and application of graphic form explorations that emphasize seeing, interpreting, manipulating, composing, and creating visual communication signs and messages. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.

4154 Intermediate Game Design II U 3

Intermediate Game Design 2 introduces students to concepts for designing and producing fun and serious games and apps that include networked multi-player formats and mobile devices. Students create, test, and play mobile games developed in the course. Prereq: 4104.

4200 Design Research II U 3

Introduction to tools techniques and methods and mindsets of generative research. Prereq: Enrollment in Design major, or permission of instructor.

4401 Design Media III for Industrial Design U 3

Time-based media and storytelling strategies for Industrial Design. Prereq: Enrollment in Industrial Design major, or permission of instructor.

4402 Design Media III for Interior Design U 3

Time-based media and storytelling strategies for Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.

4403 Design Media III for Visual Communication Design U 3

Extended reality, immersive environments, and interactive media strategies for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or permission of instructor.

4405 Design Media for Non-Majors U 3

The application of electronic media technologies to design content.

4502 Interior Design Technology II U 3

An overview of current and emerging materials, construction methods and manufacturing processes in Interior Design. Prereq: Enrollment in Interior Design major, or permission of instructor.

4505 3-D Visualization U 3

Concepts of 3D modeling, rendering and animation for visualizing design forms.

4650 Collaborative Design U 3

Interdisciplinary knowledge and problems examined and discussed in the context of social responsibility (global and local). Prereq: Enrollment in Design major, or permission of instructor.

4750 Professional Practices U 3

Investigation of the administrative and legal aspects of the design profession contrasting the private firm with corporate and free-lance practices. Prereq: Enrollment in Design major, or permission of instructor.

4752 Professional Practice for Interior Design U 3

The study of business practices and professional responsibilities that define the practice of interior design including the study of project management, contract administration, legal environments of the profession and professional ethics.

4797 Study at a Foreign Institution U 6

A study abroad experience at a foreign institution approved by the Department of Design. Prereq: Enrollment in Design major, or permission of instructor. Not open to students with credit for 697.

4998 Undergraduate Scholarship: Research and Creative Activity in Design U 1 - 4

Undergraduate research and creative activities in varying topics. Prereq: Enrollment in Design major, or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions.

4998H Undergraduate Scholarship: Honors Research and Creative Activity in Design U 1 - 4

Undergraduate Honors research and creative activities in varying topics. Prereq: Honors standing, and enrollment in Design major; or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions.

4999 Undergraduate Scholarship: Thesis Research and Creative Activity in Design U 1 - 4

Undergraduate thesis research and creative activities in varying topics. Prereq: Enrollment in Design major, or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions. This course is graded S/U.

4999H Undergraduate Scholarship: Honors Thesis Research and Creative Activity in Design U 1 - 4

Undergraduate Honors thesis research and creative activities in varying topics. Prereq: Honors standing, and enrollment in Design major; or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions. This course is graded S/U.

5101 Advanced Industrial Design I U G 3

A competency with tools, skills, and materials in the exploration, creation, and production of products, artifacts, environments, systems, communication solutions, and services. Prereq: Enrollment in Industrial Design major, or Grad standing, or permission of instructor.

5102 Advanced Interior Design I U G 3

Principles of organizational strategy and interior identity development addressing the physical, social, and psychological context of work, leisure, and learning environments. Prereq: Enrollment in Interior Design major, or Grad standing, or permission of instructor.

5103 Advanced Visual Communication Design I U G 3

Application of planning, analyzing, and designing in two- or three-dimensional visual communication systems; emphasis on application of design research, strategic thinking, creative concepts, and graphic implementation. Prereq: Enrollment in Visual Communication Design major, or Grad standing, or permission of instructor.

5151 Advanced Industrial Design II U G 3

A competency with tools, technologies, skills and materials in the exploration, creation, and production of products, artifacts, environments, systems, communication solutions and services. Prereq: 5101, or Grad standing, or enrollment in Design major, or permission of instructor. Concur: 5800. Not open to students with credit for 661.04.

5152 Advanced Interior Design II U G 3

Student develops project that applies principles of organizational strategy and interior identity development addressing the physical, social, and psychological context of work, leisure, and learning environments. Prereq: 5102, or Grad standing or enrollment in Design major, or permission of instructor. Concur: 5552. Not open to students with credit for 661.08.

5153 Advanced Visual Communication Design II U G 3

Apply design research, problem definitions, concept development, and implementation approaches in creating comprehensive projects that are relevant to proposed subject, design objectives, and targeted audiences. Prereq: 5103, or Grad standing, or enrollment in Design major, or permission of instructor. Concur: 5453. Not open to students with credit for 661.02.

5191 Internship U G 1½ - 9

Field application of design in a capacity requiring a close working relationship within a professional environment. Prereq: Grad standing, or enrollment in Design major; or permission of instructor. Repeatable to a maximum of 27 cr hrs or 3 completions.

5193 Individual Studies U G 3 - 9

Advanced study for students in specialized programs. Prereq: Enrollment in Design major, or permission of instructor. Not open to students with credit for 693. Repeatable to a maximum of 27 cr hrs or 3 completions.

5194 Group Studies U G 3 - 9

Group studies for students in specialized programs. Prereq: Grad standing, or enrollment in Design major, or permission of instructor. Not open to students with credit for 694. Repeatable to a maximum of 27 cr hrs or 3 completions.

5201	Design Research III for Industrial Design	U G	3
Addresses design opportunities, including the skills of problem identification, formulation, qualitative and quantitative research, analysis, synthesis, and project proposals for Industrial Design. Prereq: Enrollment in Industrial Design major, or Grad standing, or permission of instructor.			
5202	Design Research III for Interior Design	U G	3
Addresses design opportunities, including the skills of problem identification, formulation, qualitative and quantitative research, analysis, synthesis, and project proposals for Interior Design. Prereq: Enrollment in Interior Design major, or Grad standing, or permission of instructor.			
5203	Design Research III for Visual Communication Design	U G	3
Addresses design opportunities, including the skills of problem identification, formulation, qualitative and quantitative research, analysis, synthesis, and project proposals for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or Grad standing, or permission of instructor.			
5301	Visualization Strategies for Industrial Design II	U G	3
Design and application of information systems in the production of visual communications within frameworks of Design Research and Industrial Design. Prereq: Enrollment in Industrial Design major, or Grad standing, or permission of instructor.			
5453	Design Media IV for Visual Communication Design	U G	3
Exploration of future media possibilities for Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or Grad standing, or permission of instructor.			
5502	Interior Design Technology III	U G	3
Principles of environmental controls with a focus on artificial and natural lighting within the context of Interior Design including professional standards, building codes, human center guidelines, industry standard communication methods, and sustainability. Prereq: Enrollment in Interior Design major, or Grad standing, or permission of instructor.			
5505	Information Design	U G	3
Design principles related to visualizing quantitative information, processes and systems.			
5552	Interior Design Technology IV	U G	3
Principles of material specifications, liability, contracts and bidding documentation within the context of Interior Design. Prereq: Enrollment in Interior Design major, or Grad standing, or permission of instructor.			
5600S	Design Matters	U G	3
Students in this interdisciplinary design/build studio have the opportunity to work on site in a collaborative design environment with a local non-profit organization. Prereq: Enrollment in Design major, or Grad standing, or permission of instructor.			
5650	Advanced Collaborative Design	U G	3
Interdisciplinary knowledge and problems examined and discussed in the context of social responsibility (global and local). Prereq: Enrollment in Design major, or Grad standing, or permission of instructor.			
5750	Advanced Design History: Interiors, Contents, Communication, and Culture	U G	3
Advanced study of the history of the designed environment, product, and communication systems.			
5798	Study Tour	U G	3 - 9
Specific content, location, term(s) of offering, and prerequisites vary; contact department office for details. Prereq: Grad standing, Design majors only, or permission of instructor. Not open to students with credit for 698.01 or 698.02. Repeatable to a maximum of 9 cr hrs or 2 completions.			
5801	Design Seminar for Industrial Design	U G	3
Investigation of issues and inquiry into topics of relevance to design; group discussions and analysis of events, processes, manifestations and procedures in Industrial Design. Prereq: Enrollment in Industrial Design major, or Grad standing, or permission of instructor.			
5803	Design Seminar for Visual Communication Design	U G	3
Investigation of issues and inquiry into topics of relevance to design; group discussions and analysis of events, processes, manifestations and procedures in Visual Communication Design. Prereq: Enrollment in Visual Communication Design major, or Grad standing, or permission of instructor.			
6100	Methods and Tools for Conducting Design Research	G	3
Hands-on learning experiences in using and analyzing design research methods, tools and techniques, user-centered design research (applied ethnography, contextual inquiry, evaluative research, usability) and generative design research. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 786. Repeatable to a maximum of 6 cr hrs.			
6200	Foundation for Graduate Design Studies	G	3
Expectations, orientation, and available resources in the department and university. Historical and contextual groundwork of the discipline of design through the study of a broad range of contemporary and emerging research approaches. Prereq: Design grad students only, or permission of instructor. Not open to students with credit for 785. Repeatable to a maximum of 6 cr hrs.			

6300	Exploration in Graduate Design Studies	G	3
Exploration and discovery in future-oriented domains of design practice and research. Students will practice the tools for exploration including reading, writing, making, planning, and reflection in order to establish their own research path. Prereq: Design grad students only, or permission of instructor. Not open to students with credit for 787. Repeatable to a maximum of 6 cr hrs.			
6400	Graduate Design Studio	G	3
Hands-on learning experiences in the studio or field. Collaborative teams work to explore, identify and/or solve problems. Topics vary depending on the opportunity for sponsored projects, emerging trends in practice and expertise of instructor. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 760. Repeatable to a maximum of 18 cr hrs.			
6500	Graduate Design Seminar	G	3
Reading, thinking, discussing, reflecting, and writing are used to explore topics of relevance. Topics vary depending on emerging trends in design practice and in the world as well as the expertise and research interest of the instructor. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 780. Repeatable to a maximum of 18 cr hrs.			
7193	Individual Studies	G	½ - 6
Individual studies. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 993. Repeatable to a maximum of 18 cr hrs or 6 completions.			
7194	Group Studies	G	3
Group studies for students in specialized programs. Prereq: Design grad students only, or permission of instructor. Not open to students with credit for 894. Repeatable to a maximum of 6 cr hrs.			
7998	Thesis Project Development	G	½ - 6
Development of project outcomes as part of Thesis research. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 950. Repeatable to a maximum of 18 cr hrs or 6 completions.			
7999	Thesis Writing Development	G	½ - 6
Development of writing outcomes as part of Thesis research. Prereq: Grad standing in Design, or permission of instructor. Not open to students with credit for 998. Repeatable to a maximum of 18 cr hrs or 6 completions.			

Disability Studies

4998	Undergraduate Research	U	1 - 4
Undergraduate research in variable topics related to Disability Studies. Student-initiated projects. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4998H	Undergraduate Honors Research	U	1 - 4
Undergraduate honors research in variable topics related to Disability Studies. Student-initiated projects. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4999	Undergraduate Research: Thesis	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and thesis. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
4999H	Honors Thesis Research	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.			
5191	Disability Studies Internship	U G	1 - 3
Offers undergraduate and graduate students the opportunity to work with disability-related organizations on or off campus. Prereq: English 2277 or SphHmg 4510, and permission of instructor who will supervise the internship. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
5193	Individual Studies	U G	1 - 3
Students may register for individual directed study under this number for work not typically offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
5194	Group Studies	U G	1 - 3
Students may register for group-directed study under this number for work not normally offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			
6700	Introduction to Graduate Study in Disability Studies	G	3
Introduction to Disability Studies as an interdisciplinary academic field of study; outlines major scholarly perspectives, methodologies, and professional issues in the study of disability. Prereq: Not open to students with credit for ArtsSci 6700 (700).			

Diversity and Identity Studies

126 Diversity and Identity Studies

5700 Diversity and Identity Studies Workshop U G 1 - 3

Students study topics about diversity (race, class, gender, disability, sexuality, etc) in a seminar-like setting, often focused on the work of visiting scholars. Prereq: Jr or Sr standing, Grad standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

Doctor of Nursing Education

8115 Wellness and Resilience in Nursing Education and Professional Development G 2

Includes an overview of the science of behavior change, dimensions of wellness, self-care, #Mindstrong, #mindbodystrong, resilience, and how to integrate these concepts with healthcare professionals and organizations as a leader. Incorporates methods to evaluate and create strategies for teaching and leading wellness and resilience in nursing education. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8116 Personal and Professional Growth in Nursing Education G 2

They will assess and evaluate leadership situations and persist using concepts and strategies, such as collaboration, communication, politics, team-building, and emotional intelligence. Includes assessment and consideration of workplace culture and principles of strategic planning. Prereq: 8115.

8193 Individual Studies G 1 - 5

Students will gain skills and knowledge within a focused area of study within the area of expertise of a nursing faculty mentor. The course will expose students to novel scholarly activities and provide individualized learning opportunities. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 4 completions. This course is graded S/U.

8441 Innovation in Nursing Practice and Education G 3

This course will address the trends in healthcare initiatives as they pertain to best educational practices. The student will learn how innovation and technology may be utilized to address these initiatives. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8442 Leading, Mentoring and Collaborative Partnerships in Nursing Professional Development G 3

The student will learn the importance of organizational culture for sustainable change in a healthcare environment, education or practice. A detailed look at assessment and opportunities for creation of an effective system will be explored. Prereq: 8441.

8462 Publication and Grant Writing in Nursing Education G 2

Provides an opportunity for socialization of students into doctoral work related to scholarly writing. This course will provide practical approaches for integrating and synthesizing theoretical content from previous or concurrent course work in the area of nursing education or special interest for publication. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8480 Quality Improvement for the DNE-Prepared Nurse G 3

Concepts and principles of nursing scholarship methods and measurement for DNE level nursing practice. This course will assist the student to outline the steps for the DNE Capstone project proposal. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8481 Program Management for Nursing Professional Development Practitioners G 3

Students will learn to develop, implement, and sustain effective programs that support organization's mission, vision, and strategic goals, and the professional growth of the interprofessional healthcare teams and team members. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8491 Professional Development in Nursing Education in a Diverse Society G 2

Students learn professional competencies in education and nursing professional development. Considerations of diversity in nursing education, nursing professional development, and health care, including cultural, religious, gender, LGBTQ, geographic, socioeconomic, generational, and political considerations. The student will learn the importance of organizational culture for sustainable change. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8500 Policy, Ethics, and Legal Considerations in Nursing Education G 3

Principles of policy-making at the institutional, local, state, and federal levels to influence policy change affecting nursing education and health care with incorporation of ethical and legal considerations. Role of regulation and legislation related to nursing education and practice. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8522 Design Thinking in Nursing Education G 3

Students learn to solve problems based on evidence from outside their typical context. Exploration of design thinking in action will include exemplars inside and outside of healthcare. Application of design thinking to nursing education will be highlighted. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8530 Instructional Strategies in Clinical Teaching G 3

The primary focus of this course is the differentiation of best pedagogical practices for effective teaching in clinical settings. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8536 Principles of Instructional Design for Nurses G 3

Theoretical and practical approaches to creation of learning experiences for nursing and health education with an emphasis on backward design and evidence-based instructional design strategies. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8537 Assessment and Evaluation in Nursing Education and Professional Development G 3

Principles and processes involved in assessment and evaluation of student learning, courses, curricula, program outcomes, and teaching practices. Also includes considerations of assessment and evaluation of registered nurses in the practice setting. Prereq: 8538.

8538 Curriculum Design for Nurse Educators G 3

Students learn alignment of the organization and program's vision, mission, values, and goals to inform, design, and implement a nursing curriculum. Curriculum design includes incorporation of national standards and clinical considerations in the practice of nursing. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8780 Evidence-based Practice in Nursing Education and Professional Development G 3

The student will learn evidence-based practice (EBP) and how to incorporate EBP in academic nursing education and nursing professional development (NPD). An emphasis on the steps of evidence-based practice will be utilized that is applicable to academic and practice settings. Students will select a topic in academic nursing education or NPD practice and build EBP synthesis tables. Prereq: Enrollment in the Doctor of Nursing Education (DNE) program, or permission of instructor.

8781 Evidence-based Teaching and Interprofessional Education in Nursing G 3

The student will learn and apply evidence-based teaching strategies for interprofessional education (IPE) and interprofessional continuing education (IPCE) for all academic and practice settings. Prereq: 8780, or permission of instructor.

8998.01 DNE Capstone Project I G 5

Student work in the program will culminate in a final capstone project. This course provides the student with supervised clinical experiences in context of DNE Capstone project implementation and evaluation. Prereq: 8115, 8441, 8442, 8462, 8480, 8481, 8491, 8537, 8538, 8780, and 8781.

8998.02 DNE Capstone Project II G 5

Student work in the program will culminate in a final capstone project. This course provides the student with supervised clinical experiences in context of DNE Capstone project implementation and evaluation. Prereq: 8998.01, and successful completion of the DNE Professional Examination.

Earth Science

1100 Planet Earth: How It Works U 4

The materials of the Earth's crust, the processes that produce and modify them, the development of the Earth and its life forms through time, and responsible stewardship of the earth's resources. Not intended for ASC B.S. students. Prereq: Not open to students with credit for 1121. This course is available for EM credit. GE nat sci phys course.

1105 Geology of the National Parks U 3

Geologic processes, materials, and history revealed in geologic settings of the National Parks. Autumn 2021 and after: Add EarthSc 1200 for Physical Science GE lab credit. Autumn 2022 and after: Add EarthSc 1200 to fulfill the GE Foundations: Natural Science requirement. Prereq: Not open to students with credit for 1100. GE nat sci phys course. GE foundation natural sci course.

1108 Gemstones U 3

General introduction to gemstones, including the origin of gems, identification techniques, and the history of important gems. Precious metals are also discussed. Autumn 2021 and after: Add EarthSc 1200 for Physical Science GE lab credit. Autumn 2022 and after: Add EarthSc 1200 to fulfill the GE Foundations: Natural Science requirement. GE nat sci phys course. GE foundation natural sci course.

1110 History of Life on Earth-Global Change in the Biosphere U 3

3.5 billion years of biosphere global change; introduction to major evolutionary and extinction events; processes responsible for change; biosphere, atmosphere, and lithosphere interrelationships. Autumn 2022 and after: Add EarthSc 1200 for Physical Science GE lab credit or to fulfill the GE Foundations: Natural Science requirement. Prereq: Not open to students with credit for 1100. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.

1110H	Honors History of Life on Earth-Global Change in the Biosphere	U	3
3.5 billion years of biosphere global change; introduction to major evolutionary and extinction events; processes responsible for change; and biosphere, atmosphere, and lithosphere interrelationships. Autumn 2022 and after: Add EarthSc 1200 for Physical Science GE lab credit or to fulfill the GE Foundations: Natural Science requirement. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 1100. GE nat sci phys course. GE foundation natural sci course.			
1110S	History of Life on Earth - Global Change in the Biosphere An Inside-Out Course	U	3
3.5 billion years of biosphere global change; introduction to major evolutionary and extinction events; processes responsible for change; biosphere, atmosphere, and lithosphere interrelationships. Add EarthSc 1200 for Physical Science GE lab credit or to fulfill the GE Foundations: Natural Science requirement. This service-learning course is an Inside-Out Prison Exchange Program class. Prereq: Not open to students with credit for 1100. GE nat sci phys course. GE foundation natural sci course.			
1121	The Dynamic Earth	U	3
This course introduces students to earth sciences. Topics include earth processes and human impacts; the structure and composition of the earth, plate tectonics, rock & water cycles, energy & mineral resources, and climate change. Autumn 2021 and after: Add EarthSc 1200 for Physical Science GE lab credit. Autumn 2022 and after: Add EarthSc 1200 to fulfill GE Foundations: Natural Science. Prereq: Math 1075 or above, or ACT Mathematics Subscore of 22 or higher, or Math Placement Level R or better. Not open to students with credit for 1100. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.			
1121H	Honors The Dynamic Earth	U	4
Minerals, rocks, and their origin; land forms and how they are produced; structural features of the Earth's crust. Prereq: Honors standing, and Math 1075 (104) or above, ACT Mathematics Subscore of 22 or higher, or Math Placement Level R or better; or permission of instructor. Not open to students with credit for EarthSci 1121 (121), 121H, GeolSci 121, or 121H. GE nat sci phys course. GE foundation natural sci course. NS Admis Cond course.			
1151	Natural Hazards	U	3
Occurrence and causes of earthquakes, volcanoes, and related hazards, and impact on climate, society, and history. Autumn 2021 and after: Add EarthSc 1200 for Physical Science GE lab credit. Autumn 2022 and after: Add EarthSc 1200 to fulfill the GE Foundations: Natural Science requirement. GE nat sci phys course. GE foundation natural sci course.			
1200	Introduction to Earth Science Laboratory	U	1
Laboratory application of basic earth sciences principles to identify and categorize rocks and minerals, use and construct maps to solve geological problems, and analyze Earth's physical processes. Pair with ES 1105, 1110(H), 1108, 1121, 1151, 2203, 2204, 2205, or 2206(S) for physical science GE with lab. Pair with ES 1105, 1110(H), 1108, 1121 or 1151 to fulfill GE Foundations Natural Sciences. Prereq or concur: 1105, 1108, 1110, 1110H, 1121, 1151, 2203, 2204, 2205, 2206, or 2206S. Not open to students with credit for 1100 or 2122. Not open to students with credit for EarthSc 1121 prior to Au 21. GE nat sci phys course. GE foundation natural sci course.			
2000	Preparation for Thesis and Careers in the Earth Sciences	U	1
In this course, students will be 1) exposed to the wide diversity of research in Earth Sciences and potential careers in the Earth Sciences and 2) prepared for the senior thesis, which is a requirement for Earth Sciences BS majors.			
2122	Climate and Life Over Billions of Years on Earth	U	4
Origin and evolution of Earth, including its physical, chemical and biological components; principles of geologic inference and their application to interpreting Earth. Prereq: Not open to students with credit for 1122. GE nat sci phys course.			
2122H	Honors Climate and Life Over Billions of Years on Earth	U	4
Origin and evolution of Earth, including its physical, chemical, and biological components; principles of geologic inference and their application to interpreting Earth. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 1122 or 1122H. GE nat sci phys course.			
2155	Energy and Environment	U	3
Introduces and examines the fundamentals of energy sources, energy use, energy efficiency, and resulting environmental implications of the various energy supplies. Prereq: Not open to students with credit for EarthSci 155 or ENR 2155 (155). GE nat sci phys course. Cross-listed in ENR.			
2194	Group Studies	U	1 - 4
Group studies in various fields of the earth sciences. Prereq: Permission of instructor. Not open to students with 10 cr hrs of EarthSci 294 or GeolSci 294. Repeatable to a maximum of 10 cr hrs or 10 completions.			
2203	Environmental Geoscience	U	3
Concepts and challenges of geological hazards and resources, environmental pollution, and health; regional and long-range planning; and global change and sustainability. GE nat sci phys course. GE theme sustainability course.			
2204	Exploring Water Issues	U	3
Water on Earth, human impacts, and scientific and technological issues related to water resource development and conservation. credit. GE nat sci phys course. GE theme lived environments course.			

2205	The Planets	U	3
Survey of the origin and evolution of our Universe, Solar System, Planets and moons with focus on surface environments, dynamics, and the ability to host life. Add EarthSc 1200 for Legacy General Education (GEL) Physical Science lab credit. GE nat sci phys course. GE theme origins and evolution course.			
2206	Principles of Oceanography	U	3
Introduction to the four basic disciplines of oceanography: biological, geological, chemical, and physical. Relevance of oceanography in contemporary issues. Prereq: Not open to students with credit for 2206S. GE nat sci phys course. GE theme lived environments course.			
2206S	Principles of Oceanography (Service-Learning)	U	3
Introduction to the four basic disciplines of oceanography: geological, chemical, physical, and biological. Relevance of oceanography in contemporary issues. Autumn 2021 and after: Add EarthSc 1200 for Physical Science GE lab credit. Prereq: Not open to students with credit for 2206. GE nat sci phys course.			
2210	Energy, Mineral Resources, and Society	U	3
Geologic origin, world distribution, and uses of mineral resources critical to society; topics include mineral and fossil fuels, metallic ores, and industrial minerals. GE nat sci phys course. GE theme sustainability course.			
2245	Introductory Data Analysis for Earth and Environmental Sciences	U	4
Data analysis using cooperative learning environment; topics include data visualization, error analysis, error propagation, probability distributions, hypothesis testing, ANOVA, linear regression, and spatial statistics. Prereq: Math 1151 or above, or concur: Math 1141, or permission of instructor. GE data anly course.			
2911	The Climate Crisis: Mechanisms, Impacts, and Mitigation	U	4
Examination of the basic science of climate change, of the ability to make accurate predictions of future climate, and of the implications for global sustainability by combining perspectives from the physical sciences, the biological sciences, and historical study. Team-taught with faculty members in EEOB and History. Prereq: Not open to students with credit for History 1911, 2911, EEOB 1911, 2911, or EarthSc 1911. GE historical study and nat sci bio and nat sci phys course. GE theme sustainability and lived environments course. Cross-listed in EEOB and History.			
2998	Undergraduate Research in Earth Sciences	U	1 - 10
Undergraduate research or creative activities in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
2998H	Honors Undergrad Research in Earth Sciences	U	1 - 10
Honors undergraduate research or creative activities in variable topics. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 15 credit hours or 15 completions. This course is graded S/U.			
3193	Individual Studies	U	1 - 3
Special problems in any branch of the earth sciences for which the student has the proper qualifications. Prereq: Permission of instructor. Not open to students with 6 cr hrs of EarthSc 3193 (EarthSci 293) or GeolSci 293. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
3411	Water Security for the 21st Century	U	3
Examine the major issues that are contributing to the decline in quantity and quality of global freshwater resources and the resultant environmental and societal impacts. Prereq: EarthSc 2245 (EarthSci 245) or other GEC or GE data anly course, and Soph standing and above. Not open to students with credit for EarthSci 411 or GeolSci 411.			
3530	Learning From Disasters: Extreme Events and Their Impact on Infrastructure, Engineering and Society	U	4
Introduction to six dimensions of sustainability while learning the main impacts and threats caused by various extreme events through the study of academic publications and reports covering six major extreme events. Long term impacts and recovery from extreme events, how historical decisions in planning, engineering and/or urban development, legislation play important roles. Prereq: Not open to students with credit for CivilEn 3530. GE theme sustainability course. Cross-listed in CivilEn.			
4194	Group Studies	U	1 - 4
Group study of special topics in various fields of the earth sciences. Prereq: Permission of instructor. Not open to students with 10 cr hrs for EarthSc 4194 (EarthSci 294) or GeolSci 294. Repeatable to a maximum of 10 cr hrs or 10 completions.			
4194H	Honors Group Studies	U	1 - 4
Group study of special topics in various fields of the earth sciences. Prereq: Honors standing, and permission of instructor. Not open to students with 10 cr hrs for EarthSc 4194 (EarthSci 294) or GeolSci 294. Repeatable to a maximum of 10 cr hrs or 10 completions.			
4421	Earth Materials	U	3
Internal and external symmetry of minerals; relationship of physical properties to crystal structure; introduction to modern and traditional identification methods; sight identification of about 30 minerals. Prereq or concur: Chem 1210. Not open to students with credit for EarthSci 421, GeolSci 221, or GeolSci 421.			

128 Earth Science

4423	Introductory Petrology	U	3		
	Origin, occurrence, association, and mineral composition of the common rocks; laboratory includes work by megascopic and microscopic methods. Prereq: 1100 or 1200 or 1121 prior to Au21. Prereq or concur: 4421.				
4450	Water, Ice, and Energy in the Earth System	U	3		
	Earth's energy budget and the transfer of water between reservoirs. Processes that regulate water transfer, common measurement approaches, and the importance of water in geological processes, global change, and as a resource. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, 2204, 2205, Geog 3901, or 5900; and Chem 1210 or Physics 1250; or permission of instructor.				
4501	Paleontology	U	4		
	Fundamentals of paleontology and processes responsible for the fossil record. Application of paleontology to geology, evolutionary studies, paleoclimatology, paleoenvironmental reconstruction. Prereq: 1122 or 2122, and 3 cr hrs in Biological Sciences.				
4502	Stratigraphy and Sedimentation	U	4		
	Principles of, and procedures in, stratigraphy and sedimentation, illustrated by field and laboratory studies of sedimentary rocks. Prereq: 1100 or 1200 or 1121 prior to Au21, and 1122 or 2122.				
4530	Structural Geology	U	4		
	An introduction to the principles of rock deformation, the classification and physical origin of rock structures, and crustal tectonic processes. Prereq: 1100 or 1200 or 1121 prior to Au21, and Physics 1250.				
4560	Applied Geophysics	U	3		
	Methods and techniques of pure and applied geophysics; geological interpretation of geophysical data. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, or 2205; and Math 1141 or 1151 or above; and Physics 1250 or above.				
4798	Environmental Sustainability in Costa Rica (Study Tour)	U	3		
	Traditional lectures and a study tour explore the complex relationship between the use and conservation of natural resources and economic development in Costa Rica, especially the role of protected areas in ensuring the country's environmental sustainability. Within the Earth Sciences B.S. degree, this course can only be used in the Earth System Science subprogram to meet the requirements for credits taken outside Earth Sciences. This course cannot be used to meet any other requirements within the Earth Sciences B.S. Prereq: One college-level geology, ecology, biology, or environmental sciences course; and one college-level Spanish course (or excellent achievement in at least three years in high school Spanish); and permission of instructor.				
4911	Earth's climate: Past and Future	U	3		
	This class will examine Earth's climate and its natural development as understood from the geologic record spanning the full history of the planet, as well as how the future climate is likely to evolve under ongoing human modifications. Prereq: 1911, EEOB 1911, History 1911, Geog 3900, or 3901H. Not open to students with credit for Geog 4911. Cross-listed in Geog.				
4998	Undergraduate Research in Earth Sciences	U	1 - 10		
	Undergraduate research or creative activities in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions for the combination of EarthSc 4998 (EarthSci 699) and GeolSci 699. This course is graded S/U.				
4998H	Honors Research	U	1 - 10		
	Honors undergraduate research or creative activities in variable topics. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.				
4999.01	Undergraduate Research for Thesis in Earth Sciences	U	1		
	Undergraduate research or creative activities in variable topics leading to completion of a B.S. thesis. To be taken during semester when thesis is turned in. Prereq: Sr standing, or permission of instructor. Not open to students with credit for 570.				
4999.01H	Honors Undergraduate Research for Thesis in Earth Sciences	U	1		
	A program of individual study arranged for students enrolled in the Honors Program with individual conferences and reports; requires presentation and oral defense of an honors thesis. Prereq: Honors standing, and permission of instructor.				
4999.02	Undergraduate Research for Thesis in Earth Sciences	U	1 - 3		
	Undergraduate research or creative activities in variable topics leading to completion of a B.S. thesis. Prereq: Sr standing, or permission of instructor. Not open to students with credit for EarthSci 570. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.				
4999.02H	Honors Undergraduate Research for Thesis in Earth Sciences	U	1 - 3		
	A program of individual study arranged for students enrolled in the Honors Program with individual conferences and reports; requires presentation and oral defense of an honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.				
5160	Geomicrobiology	U G	3		
	The role of microorganisms in shaping our environment through mineralogical and geochemical processes at both local and global scales, in the present day and over geologic time periods. Prereq: Sr or Grad student in School of Earth Sciences, Department of Microbiology, Department of Civil, Environmental, and Geodetic Engineering, or School of Environment and Natural Resources. Not open to students with credit for Microbio 5160. Cross-listed in Microbio.				
5189.01	Field Geology I	U G	3		
	Concentrated training in the basic essentials of field observation and mapping; the work is done in central Utah, with headquarters in Ephraim. Requires full time of student. Prereq: 1100 or 1200 or 1121 prior to Au21, and 4530 or 6530, and permission of instructor.				
5189.02	Field Geology II	U G	3		
	Concentrated training in the basic essentials of field observation and mapping; the work is done in central Utah, with headquarters in Ephraim. Continuation of 5189.01. Requires full time of student. Prereq or concur: 4421, 4423, and 5189.01.				
5191	Internship in the Earth Sciences	U G	1 - 5		
	Combines experience in earth science policy or practice in a governmental agency, private industry, or nonprofit organization with analysis of that experience. Prereq: Jr standing or above; and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.				
5191.01	Internship in the Earth Sciences, Natural History Museum	U G	3		
	Formal, independent study and practical training in a natural history museum. Students become acquainted with the research, teaching, and outreach activities of a museum, and enhance their knowledge of resources, research methodologies, curatorial procedures, exhibit development, institutional culture, and work environment. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs.				
5193.02	Individual Studies in Engineering Geology	U G	1 - 3		
	Special problems in any branch of engineering geology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.03	Individual Studies in Earth and Planetary Sciences	U G	1 - 3		
	Special problems in any branch of the earth and planetary sciences for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.04	Individual Studies in Field Geology	U G	1 - 3		
	Special problems in any branch of field geology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.05	Individual Studies in Geochemistry	U G	1 - 3		
	Special problems in any branch of geochemistry for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.06	Individual Studies in Geomorphology	U G	1 - 3		
	Special problems in any branch of geomorphology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.07	Individual Studies in Geophysics	U G	1 - 3		
	Special problems in any branch of geophysics for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.08	Individual Studies in Glaciology	U G	1 - 3		
	Special problems in any branch of glaciology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions for the combination of EarthSc 5193 (EarthSci 693) and GeolSci 693. This course is graded S/U.				
5193.09	Individual Studies in History of the Earth Sciences	U G	1 - 3		
	Special problems in any branch of the history of the earth sciences for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions for the combination of EarthSc 5193 (EarthSci 693) and GeolSci 693. This course is graded S/U.				
5193.10	Individual Studies in Hydrogeology	U G	1 - 3		
	Special problems in any branch of hydrogeology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions for the combination of EarthSc 5193 (EarthSci 693) and GeolSci 693. This course is graded S/U.				
5193.11	Individual Studies in Marine Geology, Limnology, and Oceanography	U G	1 - 3		
	Special problems in any branch of marine geology, limnology, or oceanography for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions for the combination of EarthSc 5193 (EarthSci 693) and GeolSci 693. This course is graded S/U.				
5193.12	Individual Studies in Paleobiology	U G	1 - 3		
	Special problems in any branch of paleobiology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				
5193.13	Individual Studies in Petrology and Petrography	U G	1 - 3		
	Special problems in any branch of petrology and petrography for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.				

5193.14 Individual Studies in Remote Sensing and Geographic Information Systems U G 1 - 3

Special problems in any branch of remote sensing and GIS for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.15 Individual Studies in Sedimentation U G 1 - 3

Special problems in any branch of sedimentology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.16 Individual Studies in Stratigraphy U G 1 - 3

Special problems in any branch of stratigraphy for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.17 Individual Studies in Structural Geology U G 1 - 3

Special problems in any branch of structural geology for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.18 Individual Studies in Earth Science Education U G 1 - 3

Special problems in any branch of earth science education for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.19 Individual Studies Unspecified U G 1 - 3

Special problems in any branch of the earth sciences for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.20 Individual Studies in Global Change and Sustainability U G 1 - 3

Special problems in any topic in global change and sustainability for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.21 Individual Studies in Neotectonics U G 1 - 3

Special problems in any branch of neotectonics for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.22 Individual Studies in Mineralogy U G 1 - 3

Special problems in any branch of mineralogy for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5193.23 Individual Studies in Mineral Physics U G 1 - 3

Special problems in any branch of mineral physics for which the student has the proper qualifications. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions with 5193 (693) and GeolSci 693. This course is graded S/U.

5194 Group Studies U G 1 - 4

Group study of special topics in various fields of the earth sciences. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 15 completions for the combination of 5194 (694) and GeolSci 694.

5203 Geo-environment and Human Health U G 3

Examine geo-environmental processes that are contributing to human health degradation and the resultant societal impacts. Prereq: EarthSc 2245 (EarthSci 245), or GE data any course, or equiv; and Soph standing or above; or permission of instructor.

5205 Planetary Science U G 3

A multidisciplinary approach to planetary science, integrating modern methods with the Earth and Astrophysical Sciences. Team-taught with faculty in Astronomy. Prereq: Math 1152 and a GE Data Analysis course, or Grad standing, or permission of instructor. Not open to students with credit for Astron 5205. Cross-listed in Astron.

5206 Advanced Oceanography U G 3

Advanced study of geological, chemical, physical, and biological oceanography; their interactions; and their interactions with relevant current issues such as global change modeling, fisheries management, and energy exploration. Prereq: Jr standing or above, and enrollment in any STEM major; or Grad standing; or permission of instructor.

5242 Exploring the Natural History of The Bahamas U G 4

The study of the geology and natural history of the small Bahamian island of San Salvador including an international 7-day field trip to the island during spring break. Prereq: 1100, 1105, 1108, 1110, 1121, 1151, 2203, 2204, 2205, 2206(S), 2210, 2122, or 2155, or equiv.; and permission of instructor.

5268 Soils and Climate Change U G 3

Soil processes, abrupt climate change, trace gases and their properties, global C cycle, gaseous emissions, C-neutral fuels, carbon sequestration, Kyoto Treaty, trading of C credits. Prereq: Not open to students with credit for ENR 5268. Cross-listed in ENR.

5310 Remote Sensing in the Earth Sciences U G 3

The overall learning of geodetic (active) and passive remote sensing technologies and in-depth data analytics of their processing to apply to research in Earth sciences and engineering. This course is focused on students learning the theory and data processing methods to enable the use of contemporary satellite or airborne platform-equipped observations for science and engineering applications. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, or 2205; and Math 1141 or 1151 or above; and Physics 1250 or above; or Grad standing; or permission of instructor.

5501 Natural History Museum Data Curation U G 3

An introduction to modern curatorial practice in a museum, with a particular emphasis on natural history collections. Use of public data repository including data acquisition and curation. Process physical specimens and other research materials, and make data available and searchable using electronic means. Prereq: Permission of instructor.

5550 Geomorphology U G 4

Investigation of the mechanics and chemistry of landscape development; interpretation of materials, processes, types, and evolution of landforms produced under diverse climates. Prereq: 1100 or 1200 or 1121 prior to Au21, and 1122 or 2122; or permission of instructor.

5615 Paleocology U G 4

Concepts and numerical methods for the advanced treatment of autecology, marine community paleocology, and evolutionary paleocology in the fossil record. Prereq: EarthSc 5614 (EarthSci 614) or GeolSci 614; or permission of instructor. Not open to students with credit for EarthSci 615 or GeolSci 615.

5617 Petrology of Earth and Planets U G 4

Interpretation of processes operating on Earth and on other planets from a petrological perspective. Prereq: EarthSc 4423 or 6423 (EarthSci 423), or GeolSci 423 or equivalent. Not open to students with credit for EarthSci 617 or GeolSci 617.

5618 Advanced Historical Geology U G 2

Principles of historical-geological analysis and interpretation of Earth's physical, chemical, and biological history. Prereq: EarthSc 4502 or 6502 (EarthSci 502), or GeolSci 502 or equivalent. Repeatable to a maximum of 12 or hrs with 5618 (618) and GeolSci 618.

5621 Introduction to Geochemistry U G 3

Introduction to the chemistry of the solid Earth and hydrosphere describing the processes controlling the distribution of elements. Prereq: Chem 1220 or above; Sr standing in EarthSc (EarthSci) or related field; or permission of instructor. Not open to students with credit for 621 or GeolSci 621.

5622 Stable Isotope Biogeochemistry U G 3

Focus on theoretical and applied aspects of stable isotope biogeochemistry in the natural environment with emphasis on carbon, oxygen and nitrogen. Prereq: Sr or Grad standing in any science program; or permission of instructor. Not open to students with credit for EarthSci 622 or GeolSci 622.

5629 Principles of Petrology U G 3

Application of physics, chemistry, and mathematics to the interpretation of igneous and metamorphic rocks. Prereq: Sr or Grad standing in EarthSc (EarthSci) or related field; or permission of instructor. Not open to students with credit for EarthSci 629 or GeolSci 629.

5641 Geostatistics U G 3

Applications of statistical methods to geoscience data, including linear error propagation, least-squares estimation, confidence interval estimation, analysis of variance. Role of computer graphics in data analysis. Prereq: Stat 5301 (528) or equiv, and Math 1152 (153) or above; or permission of instructor. Not open to students with credit for EarthSci 641, GeolSci 641, GeoSciM 5652 (GeodSciM 650 or 651), or 7763 (762).

5645 Advanced Structural Geology U G 4

Mechanisms of deformation; dynamic and kinematic analysis of rock structures; field and laboratory methods of structural analysis. Prereq: EarthSc 4530 or 6530 (EarthSci 530), or GeolSci 530 or equivalent. Not open to students with credit for EarthSci 645 or GeolSci 645.

5646 Geodynamics U G 3

Application of mathematical and physical methods to the solution of geologic problems in heat flow, plate tectonics, interior dynamics, mountain building, ground-water flow, river mechanics. Prereq: EarthSc 4530 or 6530 (EarthSci 530), or GeolSci 530 or equivalent; Math 1152 (153) or above; and Physics 1250 (131) or above; or permission of instructor. Not open to students with credit for EarthSci 646 or GeolSci 646.

5650 Glaciology U G 4

The fundamental processes controlling ice flow, glacier mass balance and the interaction of glaciers and ice sheets with the solid earth, ocean and atmosphere. Observational and computational methods are also addressed. Prereq: EarthSci 4450 (EarthSci 450) or permission of instructor. Not open to students with credit for EarthSci 650 or GeolSci 650.

5651 Hydrogeology U G 4

Geologic and hydrologic factors controlling the occurrence, movement, storage, and chemical quality of surface water and ground water; exploration, evaluation, development and management of water resources. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, or 2205; and Math 1152 or above.

130 Earth Science

5655	Land Surface Hydrology	U G	3		
	Physical processes of land surface hydrology in the context of the global hydrologic cycle. Consideration of the processes and mechanisms responsible for water and energy fluxes, with examples from various river basins. Prereq: Math 1152 or above, and Physics 1250 or above.				
5656	Ecohydrology in a Changing Climate	U G	3		
	Physical and ecological processes of plant-water interactions in natural ecosystems. Principles of water transport in the soil-plant system, plant drought response, and feedbacks of plants of plants to the climate through changing energy-water-carbon cycles. Exploration of ecohydrological datasets from ground and remote sensing measurements and physically based models. Prereq: Math 1141, or 1151 or above; and Physics 1250 or above; or Grad standing; or permission of instructor.				
5660	Geology of Mineral Resources	U G	4		
	Occurrence, origin, distribution, properties, exploration, and exploitation of mineral resources impacting modern society. Prereq: 4423 or 6423.				
5661	Petroleum Geology	U G	4		
	The formation, accumulation, and trapping of oil and natural gas. Geologic source beds and traps; hydrocarbon flow; hydraulic properties of reservoirs and confining units; hydrocarbon chemistry; thin-section analysis of reservoir rocks. Prereq: 4502 or 6502; or permission of instructor.				
5663	Global Change and Sustainability in the Earth System	U G	4		
	Analysis of Earth systems, global environmental change and options for sustainability. Prereq: Sr or Grad standing, or permission of instructor. Not open to students with credit for EarthSci 663 or GeolSci 663.				
5675	Scanning Electron Microscopy	U G	2		
	Basic theoretical concepts and practical applications of scanning electron microscopy (SEM). Prereq: Chem 1210 or 1220, or equivalent; or permission of instructor.				
5680	Deep Earth Geophysics	U G	3		
	Methods and techniques for study of Earth's crust and interior, involving potential fields, seismology, and heat flow. Prereq: Math 1152 or above, and Physics 1251 or above; or Grad standing.				
5687	Borehole Geophysics	U G	3		
	Principles and applications of borehole geophysical practices in the energy industry and in scientific drilling. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, or 2205; and Math 1141 or 1151 or above; and Physics 1250 or above.				
5718	Aquatic Geochemistry	U G	3		
	Examination of the processes that control chemical equilibria in natural waters: acid/base reactions, metal complexation/speciation and oxidation-reduction processes. Intended for students in EarthSci, CivilEn, and the Grad EnvSci program. Prereq: Chem 1220 or above; and Math 1151 or above; or equivalents. Not open to students with credit for EnvEng 5718. Cross-listed in EnvEng.				
5751	Quantitative Reservoir Modeling	U G	4		
	Principles of analytical and numerical techniques in modeling single- and multiphase flow in gas, oil, and water (aquifer) reservoirs. Development of Matlab code for two- and three-dimensional flow in porous media. Prereq: 2245 and Math 1152, or permission of instructor.				
5780	Reflection Seismology	U G	4		
	Basics of reflection seismic data processing and interpretation, using petroleum industry standard seismic processing software, hardware, and data. Prereq: 1100, 1105, 1108, 1121, 1151, 2203, or 2205; and Math 1141, or 1151 or above; and Physics 1250 or above; or Grad standing; or permission of instructor.				
5781	Gravity Exploration	U G	3		
	Analytical treatment of concepts and methods of gravimetry; introductory theory of gravitational potential; geological interpretation of gravity data; gravity surveying. Prereq: Math 1152 (153) or above, or Grad standing; or permission of instructor. Not open to students with credit for EarthSci 781 or GeolSci 781.				
5782	Magnetic Exploration	U G	3		
	Advanced magnetic theory and practice applied to investigations of the subsurface, including interpretation of surface, airborne, and satellite magnetic measurements. Prereq: Math 1152 or above, or Grad standing; or permission of instructor.				
5797.10	Study at a Foreign Institution: Antarctica	U G	3		
	Two weeks of field studies in Antarctica and Ushuaia, Argentina. This course is a collaborative effort between Ohio State, American Universities International Programs, University of Canterbury, New Zealand, and Gateway Antarctica: Centre for Antarctic Studies and Research. Cannot be used to satisfy M.S. or Ph.D. requirements in Earth Sciences. Within the Earth Sciences B.S. degree, this course can only be used in the Earth System Science subprogram to meet the requirements for credits taken outside Earth Sciences. This course cannot be used to meet any other requirements within the Earth Sciences B.S. Concur: 5790.10. Not open to students with credit for ENR 5797.10. Cross-listed in ENR.				
5797.20	Exploring Environmental and Human Health Issues in Japan	U G	3		
	A basic introduction to environmental earth science concepts and practice, and exploration of links between environment, human health, and socioeconomic developments with special emphasis on Japanese society, taught during a 2 week international trip to Japan. Undergrad Prereq: GE foundation writing and info literacy course, and GPA 2.0 or above, and Jr standing. Grad Prereq: GPA 2.0 or above, and Grad standing.				
6101	Finding Success in Earth Sciences: Grad School 101	G	1		
	In this seminar, we learn how to navigate through graduate school, research, relationships, responsibilities and securing a job after graduation. Seminar projects will be focused on promoting your research, abstract writing and resume/CV writing. Prereq: Grad standing.				
6502	Stratigraphy and Sedimentation	G	4		
	Principles of, and procedures in, stratigraphy and sedimentation, illustrated by field and laboratory studies of sedimentary rocks. Prereq: EarthSci 1121 (EarthSci 121 or GeolSci 121) and 1122 (EarthSci 122 or GeolSci 122). Not open to students with credit for EarthSci 4502 (EarthSci 502 or GeolSci 502).				
6530	Structural Geology	G	4		
	An introduction to the principles of rock deformation, the classification and physical origin of rock structures, and crustal tectonic processes. Prereq: 1121 (EarthSci 121 or GeolSci 121), and Physics 1250 (131) or above. Not open to students with credit for 4530 (EarthSci 530 or GeolSci 530).				
6560	Applied Geophysics	G	3		
	Methods and techniques of pure and applied geophysics; geological interpretation of geophysical data. Prereq: 1121 (EarthSci 121 or GeolSci 121), Math 1151 (151) or above, and Physics 1250 (131) or above. Not open to students with credit for 4560 (EarthSci 560 or GeolSci 560), or GeolSci 280.				
6750	Paleoclimatology	G	4		
	Examination of climate records in ice, lake, and marine cores, tree rings, corals and historical records for a global perspective of Quaternary climate change. Prereq: Grad standing or permission of instructor. Not open to students with credit for EarthSci 750 or GeolSci 750.				
7998	Research in the Earth Sciences	G	1 - 12		
	Graduate-level research. Prereq: Grad standing in EarthSci or GeodSci. Repeatable. This course is graded S/U.				
7999	Research for Thesis in the Earth Sciences	G	1 - 12		
	Graduate-level research for thesis purposes only. Prereq: Grad standing in EarthSci or GeodSci. Repeatable. This course is graded S/U.				
8570	Graduate Capstone Project in Earth Sciences	G	3		
	Examination of a problem in the Earth Sciences, integrating knowledge and skills acquired in the non-thesis M.S. subprogram. Prereq: Grad standing in non-thesis M.S. subprogram and approval of adviser.				
8800	Seminar in Stratigraphy and Basin Analysis	G	1 - 2		
	Consideration of current and classical problems and procedures in biostratigraphic and lithostratigraphic analysis and synthesis. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8821	Seminar in Geochemistry	G	1 - 2		
	Selected topics in applications of chemistry to earth science problems; geochronology, geochemistry, geochemical cycles, and cosmochemistry. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8822	Seminar in Mineralogy, Mineral Physics, and Petrology	G	1 - 2		
	Selected topics in optical mineralogy and igneous, sedimentary, and metamorphic petrology. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8850	Seminar in Glaciology and Geomorphology	G	1 - 3		
	Selected topics in glaciology, glacial history, and geomorphology. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8851	Seminar in Hydrogeology and Oceanography	G	1 - 2		
	Topics in hydrogeology and oceanography, such as ground-water hydrology and hydraulics, basin management, water resources, paleohydrology, reef and atoll development, or paleo-oceanography. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8860	Seminar in Energy Resources	G	1 - 2		
	Study of selected deposits of subsurface energy resources, including fossil fuels and geothermal. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.				
8870	Proposal Writing and Scientific Communication in Earth Science Is Your Job	G	2		
	Development of scientific communication skills including writing of publications and proposals, oral and poster presentations, and research ethics. Prereq: Grad standing in Earth Sciences or Geodetic Sciences, or permission of instructor.				
8871	Pursuing Justice, Equity, Diversity, and Inclusion in the Earth Sciences	G	2 - 3		
	Discuss issues of justice, equity, diversity and inclusion in the Earth sciences and take practical steps to engage in equitable and inclusive practices in research and education. Students have the option to combine the 2-credit seminar with 1 additional credit to pursue an individual research topic involving justice, equity, diversity and inclusion in the Earth sciences. Prereq: Grad standing.				

8878	Seminar in Geophysics	G	1 - 2
Investigation and discussion of recent developments in geophysics, including exploration geophysics, glaciology, solid-earth geophysics, paleomagnetism, tectonics, or engineering evaluation. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.			
8898	Colloquium in the Earth Sciences	G	1
Presentations and discussions of current research in the earth sciences provided by visitors, faculty and students. Prereq: Grad standing in EarthSci or GeodSci. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			
8998	Research in the Earth Sciences	G	1 - 12
Graduate-level research. Prereq: Grad standing in EarthSci or GeodSci. Repeatable. This course is graded S/U.			
8999	Dissertation Research in the Earth Sciences	G	1 - 12
Research for dissertation purposes only. Prereq: Grad standing in EarthSci or GeodSci. Repeatable. This course is graded S/U.			

East Asian Languages and Literatures

1231	East Asian Humanities	U	3
Introduction to the contemporary and traditional cultures of China, Korea, and Japan taught through readings, films, and demonstrations. GE cultures and ideas and diversity global studies course. GE foundation historical and cultural studies course.			
2284	Tea Culture in East Asia	U	3
Approaches tea from multiple perspectives, including, but not limited to, history, geography, agriculture, commerce, health, nutrition, arts and crafts, folklore, and transmission of everyday cultural practices. Classes include lectures, discussion, and a laboratory of preparation and tasting of a variety of tea. GE cultures and ideas course. GE foundation historical and cultural studies course.			
3223	The Buddhist Tradition	U	3
History and structure of Buddhism from founding to present in South, Southeast, and East Asia. Emphasis on rituals, beliefs, and local and regional variations. RelStds 2370 recommended. Prereq: Not open to students with credit for 323, CompStd 3673 (323), or RelStds 3673 (323). Cross-listed in RelStds 3673.			
3405	Introducing East Asia through Martial Arts Cinema	U	3
Examines martial arts films of East Asia, focusing on their social & cultural functions. Draws upon the philosophical, cultural and historical background to depict this unique genre of imagination. Analyzes the aspiration for personal freedom and social justice and the longing for heroes amidst losing battles for liberty in authoritarian societies. GE VPA and diversity global studies course. GE foundation lit, vis and performing arts course.			
4193	Individual Studies	U	1 - 3
Directed study to meet individual research needs of students in East Asian studies. Not a substitute for regular language courses. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
4194	Group Studies	U	1 - 3
Group investigation of issues in East Asian studies. Varying topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.			
4200	Topics in East Asian Culture	U	3
In-depth exploration of a theme, issue, or question in East Asian culture broadly conceived. Topics vary. Prereq: 1231; or Chinese 2231, Japanese 2231, or Korean 2231; or Chinese 2232; or Chinese 2451, Japanese 2451, or Korean 2451; or Japanese 2452; or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
5310	Strategies for Performance-Oriented Language Learning: Practicum	U G	3
An overview of language-learning strategies and practice in applying them to learning of East Asian languages. Prereq: Chinese 1102.01, 1102.02, or 4 credits of 1102.51; or Japanese 1102.01, 1102.02, or 4 credits of 1102.51; or Korean 1102.01, 1102.02, or 4 credits of 1102.51; or permission of instructor. Repeatable to a maximum of 9 cr hrs.			
5383	Scripts of East Asia	U G	3
A critical survey of writing systems that use Chinese characters, popular and scholarly myths about them, and their impact on the history of ideas. Prereq: Soph standing in Chinese, Japanese, or Korean, or permission of instructor. Not open to students with credit for 683.			
5475	Women Writers, Culture and Society in East Asia	U G	3
Close examination of representative works of major women writers from China, Japan, and Korea in the cultural and ideological context of each country. No knowledge of East Asian languages is required. All reading materials are in English. Prereq: Chinese 2231, 2232, Japanese 2231, or Korean 2231, or at least one literature course at the college level, or permission of instructor. Not open to students with credit for 675.			
5797	Study at a Foreign Institution	U G	3 - 9
An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Prereq: Admission to specific study abroad program that accepts this course. Repeatable to a maximum of 24 cr hrs or 8 completions.			

6193	Individual Studies	G	1 - 3
Individual investigation of East Asian cultures, languages, and literatures. Prereq: Permission of department chairperson. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
6194	Group Studies	G	1 - 3
Group investigation of issues in East Asian studies. Varying topics. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			
7700	Learning East Asian Languages in Cross-Cultural Contexts: College Level	G	1 - 3
Principles and practices of designing instruction and assessing performances in an East Asian language as a foreign language at post-secondary level American academic institutions. Concurrent registration in 7703 and 7704 recommended. Su Sem. Prereq: High-level competence in target East Asian language, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. FL Admis Cond course.			
7701	Pedagogical Syntax for East Asian Languages	G	3
Training in the presentation of grammar in East Asian language classes; special attention given to problems of translating linguistic studies into teachable units. Au, Sp Sems. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs.			
7702	Materials Preparation for East Asian Languages	G	3
Preparation of materials for teaching Chinese, Japanese, and Korean. Emphasis on the special problems faced by English-speaking students in learning these languages. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. FL Admis Cond course.			
7705	Seminar in the Learning of East Asian Languages and Cultures	G	3
Critical analysis of insights and theories from various disciplines relevant to the pedagogy of East Asian languages and cultures. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs. FL Admis Cond course.			
7706	Teaching Practicum in East Asian Cultures, Literatures, and Linguistics	G	3
A course to learn how to develop and teach a course on East Asian cultures, literatures, and linguistics. Students will learn how to set course objectives, how to select course materials, how to give effective lectures and engage students, how to assess students' performances, and how to develop a course syllabus and teaching statement by observing classes and practicing how to teach. Prereq: 8701. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.			
7897	Introduction to Graduate-level East Asian Studies	G	1
The origins, development and current state of East Asian Area Studies in the U.S., including its relationship to other intellectual disciplines. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 797, History 7405 (797), or HistArt 6801 (797). Repeatable to a maximum of 4 cr hrs. This course is graded S/U. Cross-listed in History 7405 and HistArt 6801.			
8701	Teaching East Asian Languages at the College Level	G	3
Techniques of teaching college-level East Asian languages; effective use of teaching, testing, and laboratory materials; observation of a variety of language classes. Au Sem. Prereq: Permission of instructor. Not open to students with credit for 801.			
8870	Research Presentations in East Asian Languages and Literatures	G	1 - 3
Research presentations and discussions of specific problems in East Asian languages and literatures. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.			

East European Languages and Literatures

5627	Reading Course in a Balkan or East European Language	U G	3
Fundamentals of grammar and vocabulary needed for reading a non-Slavic language of Eastern or East Central Europe or the Balkans (e.g., Albanian, Romanian, Estonian, Hungarian, Latvian, or Lithuanian). Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
5797	Study at a Foreign Institution	U G	1 - 9
Opportunity to study at an educational institution in East Central, Southeastern, or Eastern Europe and receive OSU credit. Students pay OSU fees, any fees in excess of tuition, travel & subsistence costs. Prereq: Permission of dept chairperson. Repeatable to a maximum of 36 cr hrs or 9 completions. This course is progress graded.			

Economics

1100.01	Current Economic Events in Historical Perspective	U	3
Introduction to economic analysis; historical background for interpreting current economic events. Discuss current issues in a historical context, including topics like taxes and unemployment. A one-course introduction to economics. Prereq: Not open to students with credit for 110.01. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.			

132 Economics

1100.02 Freakonomics U 3

Discuss current social problems and issues within an economics framework, including topics such as job discrimination and integration. A one-course introduction to economics. Prereq: Not open to students with credit for 110.02. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.

1101 Using Big Data to Solve Economic and Social Problems U 3

This course is designed to show how "big data" can address pressing social and economic challenges of today. The curriculum introduces students to the fundamentals of economics, regression analysis, and causal inference in an accessible manner without the need for prior knowledge in economics or statistics.

2001.01 Principles of Microeconomics U 3

Introduction to economic theory: supply and demand for goods, services, and factor inputs; market structure; international trade, the distribution of income. First required course for students planning to take 4000-level courses in Econ. Prereq: Not open to students with credit for 2001.02, 2001.03H, 200, 200H, or AEDecon 2001 (200). This course is available for EM credit. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course. SS Admis Cond course.

2001.03H Principles of Microeconomics U 3

An advanced introduction to economic theory: supply and demand for goods, services, and factor inputs; market structure; international trade, the distribution of income. First required course for students planning to take 4000-level courses in econ. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 2001.01, 2001.02 (200), or 200H, and AEDecon 2001 (200) or 2001H (200H). GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.

2002.01 Principles of Macroeconomics U 3

Introduction to the theory of national income determination; economic fluctuations; money; government policy; international economics. Prereq: Not open to students with credit for 2002.02, 2002.03H, 201, or 201H. This course is available for EM credit. GE soc sci orgs and politics course. GE foundation social and behavioral sci course.

2002.03H Principles of Macroeconomics U 3

An advanced introduction to the theory of national income determination; economic fluctuations; money; government policy; international economics. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 2002.01, 2002.02 (201, 201H). GE soc sci orgs and politics course. GE foundation social and behavioral sci course.

2194 Group Studies U 1-5

Current problems not covered in other courses. Credit for Econ 294 counts against hour cap. Prereq: 2001.01, 2001.02, 2001.03H (200 or 200H), or equiv. Repeatable to a maximum of 7 cr hrs or 2 completions.

2367.02 Current Economic Issues in the United States U 3

Study of problems currently facing the U.S. economy. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv, and English 1110 (110). Not open to students with credit for 367.02. GE writing and comm: level 2 and soc sci orgs and politics course. GE foundation social and behavioral sci course.

3001 Economy, Polity, and Community U 3

Examines how different ways of thinking about human nature shape our understanding of philosophy, politics and economics. Prereq: Econ 2001.XX or 2002.01 or 2002.03H; and Philos 2400 or PolitSc 2400 or 2400H; and Econ 5001 or Philos 2500 or 2540 or PolitSc 3500 or 4553 or 4553H; and Philos 3300; and Econ 3400 or IntStds 3400 or PolitSc 3780 or 3780H; and PolitSc 3280 or 4280 or 3380 or 4380 or 4381. Not open to students with credit for Philos 3001 or PolitSc 3001. Cross-listed in Philos and PolitSc.

3002 Tradition, Progress, and Utopia U 3

Examines how different ways of thinking about social and political change shape our understanding of philosophy, and economics. Prereq: Econ 2001.XX or 2002.01 or 2002.03H; and Philos 2400 or PolitSc 2400 or 2400H; and Econ 5001 or Philos 2500 or 2540 or PolitSc 3500 or 4553 or 4553H; and Philos 3300; and Econ 3400 or IntStds 3400 or PolitSc 3780 or 3780H; and PolitSc 3280 or 4280 or 3380 or 4380 or 4381. Not open to students with credit for Philos 3002 or PolitSc 3002. Cross-listed in Philos and PolitSc.

3048 Ethics and Social Responsibility in Economic Life U 3

Examines the role of ethical norms and social constraints in determining economic outcomes. Prereq: At least one of these courses, 1100.01 (110.01), 1100.02 (110.02), 1100.03 (110.03), 2001.01, 2001.02 (200), 2001.03H (200H), 2002.01 2002.02 (201), or 2002.03H (201H), is recommended. Not open to students with credit for 348. GE soc sci indivs and groups course.

3400 The Analysis and Display of Data U 3

Introduction to the analysis of data. Topics include sampling, data collection, probability, inference, random variables, display of data, correlation, and analysis of variance. This course does not count toward a course elective for Econ majors. Prereq: Not open to students with credit for 4400 (444), 5410 (641), 5420 (642), 443, IntStds 3400 (443), Stat 1430 (133), 1450 (145), 2450 (245) or AEDecon 2005 (205). GE data anyl course. GE foundation math and quant reasoning or data anyl course. Cross-listed in IntStds.

3820 The Economics of Gender in Labor Markets U 3

Application of economic analysis to the evolution and economic condition of women and men in the labor force; occupational distribution and segregation; wage gap; the glass ceiling. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv. Not open to students with credit for 482. GE diversity soc div in the US course.

3900.01S The Other Side of the Border: Immigration Economics U 3

This is a service-learning opportunity with Esperanza International in Tijuana, Mexico. The course will introduce micro and macroeconomic issues related to immigration. This case study will focus on the opportunity costs for immigrants, the effects of the flow of money, and the loss of labor and human capital on economic growth. Students will work with the immigrant community. Prereq: 2001.01, 2001.02, 2002.01 or 2002.02, or AEDecon 2001. GE service learning course. GE theme migration, mobility, and immobility course.

4001.01 Intermediate Microeconomic Theory U 3

Theory of consumer behavior; theory of the firm; costs and production; factor price determination; general equilibrium. Prereq: 2001.01, 2001.02, or 2001.03H, and 2002.01, 2002.02, or 2002.03H, or equiv. Not open to students with credit for 4001.02 or 4001.03.

4001.02 Intermediate Microeconomic Theory U 3

Theory of consumer behavior; theory of the firm; costs and production; factor price determination; general equilibrium. Designates a calculus-based version. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), and Math 1131 (132), 1151 (151), 1152 (152 and 153), 1161 (161 and 162), 2182H (263H), or 4181H (190H) or equiv; or permission of instructor. Not open to students with credit for 4001.01 (501.01 and 501.02) or 4001.03H.

4001.03 Intermediate Microeconomic Theory U 3

Theory of consumer behavior; theory of the firm; costs and production; factor price determination; general equilibrium. Designates an advanced calculus-based version. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), and Math 1131 (132), 1151 (151), 1152 (152 and 153), 1161 (162 and 161), 2182H (263H), or 4181H (H190), or equiv, or permission of instructor. Not open to students with credit for 4001.01 (501.01) or 4001.02 (501.02).

4002.01 Intermediate Macroeconomic Theory U 3

Analysis of the determinants of national output; income and employment levels; theory of economic growth and progressive equilibrium in an economy. Prereq: 2001.01, 2001.02, or 2001.03H; and 2002.01, 2002.02, or 2002.03H, or equiv. Not open to students with credit for 4002.02 or 4002.03.

4002.02 Intermediate Macroeconomic Theory U 3

Analysis of the determinants of national output; income and employment levels; theory of economic growth and progressive equilibrium in an economy. Designates a calculus-based version. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), and Math 1131 (132) or 1151 (151), 1152 (152 and 153), 1161 (161 and 162), 2182H (263H), or 4181H (190H), or equiv; or permission of instructor. Not open to students with credit for 4002.01 (502.01 or 502.02) or 4002.03.

4002.03 Intermediate Macroeconomic Theory U 3

Analysis of the determinants of national output; income and employment levels; theory of economic growth and progressive equilibrium in an economy. Designates an advanced calculus-based version. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), and Math 1152 (152 and 153), 1161 (161 and 162), 2182H (263H), or 4181H (190H), or equiv; or permission of instructor. Not open to students with credit for 4002.01 (502.01) or 4002.02 (502.02).

4050 Experimental Economics U 3

Introduction to economics as an experimental social science. Students participate in and study results of economic experiments dealing with markets, individual decision making, and a broad array of game theoretic economic models. Prereq: 2001.01, 2001.02, or 2001.03H or equiv.

4050H Experimental Economics U 3

Introduction to economics as an experimental social science. Students participate in and study results of economic experiments dealing with markets, individual decision making, and a broad array of game theoretic economic models. Prereq: 4001.01 or 4001.02 or 4001.03, and Stat 1450 or 2450. Not open to students with credit for 4050.

4130 World Economic Development in Historical Perspective U 3

A survey of economic development from the middle ages through the 20th century, emphasizing Europe, Asia and Africa. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or 2002.01, 2002.02 (201) or 2002.03H (201H), or equiv. Not open to students with credit for 5130 (614), or 515. GE historical study and diversity global studies course. GE foundation historical and cultural studies course.

4140 Economic History of the Americas U 3

A survey of economic development in the Americas emphasizing the United States from colonial times to the 20th century. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv. Not open to students with credit for 5140 (613) or 516. GE historical study and diversity global studies course. GE foundation historical and cultural studies course.

4191 Internship U 1-6

Allows students to apply knowledge from their economics courses and learn from hands on experience in approved positions. Applies toward an Econ 4000-level elective; 3 credit hours maximum toward major. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv; and Jr or Sr standing; and enrollment in Econ major; and permission of department. Not open to students with maximum qtr cr hrs in 589. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

4194	Group Studies	U	1 - 10	Intermediate current problems not covered in other courses. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H). Credit taken as 594 counts toward hour cap. Repeatable to a maximum of 10 cr hrs or 3 completions.
4200	Money and Banking	U	3	Organization, operation, and economic significance of our monetary and banking system; special reference to current conditions and problems. Students intending to take 5200 are encouraged to take it instead. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv. Not open to students with credit 4200H (520H), 5200, or 520.
4300	Government Finance in the American Economy	U	3	Analysis of fiscal institutions and decision-making in the public sector of the American economy; budget planning and execution; taxation, debt, and fiscal policy. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv. Not open to students with credit for 530.
4310	Local Public Finance	U	3	Financing public services by state/local governments. The fiscal relationship between state/local governments and the federal government. Apply techniques of economic analysis to policy issues. Prereq: 4300 (530), or PubAfrs 7120 (730), or equiv. Not open to students with credit for 531, or PubAfrs 4310 (531). Cross-listed in PubAfrs.
4320	Public Expenditure and Cost-Benefit Analysis	U	3	Economics of public choice, public goods, non-market allocations, collective decision-making, and net-benefit maximization for policy majors; case studies and empirical analysis of public choice problems for policy analysts. Does not count towards units in the economics major. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv, and enrollment in JGSPA major. Not open to students with credit for 4300, 4310, or 532.
4400	Elementary Econometrics	U	3	Basic linear regression analysis with applications; hypothesis testing and model specification. Prereq: 3400, IntStds 3400, Stat 1430 (133), 1450 (145), 2450 (245), or AEDEcon 2005 (205), or equiv. Not open to students with credit for 5410 (641), 5420 (642), or 444.
4537	Middle Eastern Economic Development	U	3	Introduction to current economic issues facing the Middle East; similarities and differences in Middle Eastern countries' growth, inflation, unemployment, fiscal and monetary policy, imports, exports, foreign debt and exchange rate policy. Prereq: 2001.01, 2001.02 (200), 2001.03H (200H), or AEDEcon 2001 (200), and 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv. Not open to students with credit for 537, AEDEcon 4537 (537), 437, IntStds 4537 (537), or 437. Cross-listed in AEDEcon and IntStds.
4553	Economics of Population	U	3	Using economic principles to analyze population growth, fertility, mortality, mating, dating, marriage, teen pregnancy, divorce, and migration. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or 2002.01, 2002.02 (201), or 2002.03H (201H). Not open to students with credit for 553.
4560	Cooperation and Conflict in the Global Economy	U	3	The economic, social, and political bases for and responses to increasing global economic integration. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H), or equiv. Not open to students with credit for 4560H (556H), 556, IntStds 4560 (556), or 4560H (556H). Cross-listed in IntStds.
4597.01	Issues of the Underground Economy	U	3	Focuses on the informal sector of the underground economy: illegal drugs, arms sales and human trafficking. Applies economic reasoning. Recommended prereqs: 2001.01, 2001.02 (200), 2001.03H (200H), and 2002.01, 2002.02 (201), or 2002.03H (201H). Prereq: Jr standing and above. Not open to students with credit for 597.01. GE cross-disciplinary seminar course.
4700	Government and Business	U	3	Economic and legal aspects of government regulation of business in the United States; philosophies and concepts of public control; contemporary problems. Students planning on taking 5700 are encouraged to take it instead. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv. Not open to students with credit for 5700 (670), or 570.
4700H	Government and Business	U	3	Economic and legal aspects of government regulation of business in the United States: philosophies and concepts of public control; contemporary problems. Prereq: Honors standing, and 2001.01, 2001.02, 2001.03H, 4001.01, 4001.02 or 4001.03, and Math 1151. Not open to students with credit for 4700 (570) or 5700 (670).
4797.01	Study at a Foreign Institution	U	1 - 10	An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Prereq: Permission of dept chairperson. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.
4797.02	Islamic Banking and Finance	U	3	The course covers Islamic banking and finance in theory and in practice. Including a study abroad component to Malaysia for students to experience Islamic banking and finance in practice, students will be prepared to: 1-Understand the relation between culture/religion and the economy 2-Better understand Islamic finance vs. conventional finance 3-Learn the challenges of Islamic finance in practice. Prereq: 2001.01, 2001.02, 2001.03H, 2002.01, 2002.02, or 2002.03H, or equiv.
4800	Labor Economics and Industrial Relations	U	3	Survey of the field of labor economics; trade unionism, collective bargaining; wage determination, employment, unemployment; labor legislation. Students planning on taking 5850 are encouraged to take it instead. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv. Not open to students with credit for 5850 (685) or 580.
4830	Economics of Sports	U	3	Analysis of economic and business aspects of sports teams and their strategic interactions in sports markets. Prereq: 2001.01, 2001.02 (200), or 2001.03H (200H), or equiv. Not open to students with credit for 583.
4831	Sports Data Analytics and Economic Analysis	U	3	An introduction to basic data analysis methods used by economists to explain economic reasoning in the sport industry and associated markets. Prereq: 2001.01, 2001.02, 2001.03H, AEDEcon 2001, or 2001H.
4960H	Honors Seminar in Economics	U	3	Prepares students to write an undergraduate thesis; group discussion of research problems, methods, and strategies. Prereq: Honors standing, and 4001.01, 4001.02, or 4001.03, and 4400, 5410, or 5420; or permission of instructor.
4998	Undergraduate Research in Economics	U	1 - 6	Directed research for an Economics major; collection and analysis of data and information for a research project. Prereq: 4001.01 (501.01), 4001.02 (501.02), or 4001.03, and 4002.01 (502.01), 4002.02 (502.02), or 4002.03, or equiv, and permission of instructor. Not open to students with credit for 4998H or 699. This course is graded S/U.
4998H	Honors Research in Economics	U	1 - 6	Directed research for an economics major; collection and analysis of data and information for a research project. Prereq: Honors standing; and 4001.01 (501.01), 4001.02 (501.02), or 4001.03, and 4002.01 (502.01), 4002.02 (502.02), or 4002.03, or equiv; and permission of instructor. Not open to students with greater than 9 cr hrs in 4998 or max credit in 699. Repeatable to a maximum of 10 cr hrs or 2 completions. This course is graded S/U.
4999	Undergraduate Thesis Research	U	1 - 5	A program of study arranged for each student, with individual conferences and reports, to write a senior thesis. At least two semesters are required of candidates for the degree with distinction in economics. Prereq: At least half of the Econ courses taken and an average of B in the remainder, and Sr standing, and permission of instructor. Not open to students with greater than 9 hours credit for 4999H (699) or max credit in 783H. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.
4999H	Honors Thesis Research	U	1 - 5	A program of study arranged for each student, with individual conferences and reports, to write a senior thesis. At least 2 sems required for distinction in econ. Failure to receive a mark of S in this course is a disqualification for special honors. Prereq: Honors standing, and a grade of A in at least half of the Econ courses taken, and an average of B in the remainder, and Sr standing, and permission of instructor. Not open to students with credit for 4999 (783H). Credit in 783H counts toward hour cap. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.
5001	Game Theory in Economics	U G	3	Analysis of behavior in strategic situations - when a person or firm's best action depends on what others do. Prereq: 4001.01 (501.01), 4001.02 (501.02), or 4001.03, and Math 1131 (132), 1151 (151 and 152), 1152 (153), 1161 (161 and 162), or 2182H (263H), or equiv. Not open to students with credit for 601.
5130	Economic History of Western Europe	U G	4	Survey of economic development of Europe from pre-industrialization to current globalization. Emphasis on critical analysis of long-run factors in economic growth. Prereq: 4400 (444), 5410 (641), or Stat 2450 (245), and Econ 4001.01 (501.01), 4001.02 (502.02), or 4001.03, and 4002.01 (502.01), 4002.02 (502.02), or 4002.03, or equiv; or Grad standing. Not open to students with credit for 614.
5140	Economic History of the United States	U G	4	General survey from discovery of America to present; European economic background; westward movement and its effects; development of economic institutions in the United States. Prereq: 4400 (444), 5410 (641), 4001.01 (501.01), 4001.02 (502.02), 4001.03, and 4002.01 (502.01), 4002.02 (502.02), or 4002.03, or Stat 2450 (245), or equiv; or Grad standing. Not open to students with credit for 613.
5193	Individual Studies	U G	1 - 10	Advanced readings in economics and related fields. Prereq: Jr standing or higher; and an average of B or better in all econ courses; and a CPHR of 3.00 or above. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.
5194	Group Studies	U G	1 - 5	Advanced current problems not covered in other courses. Prereq: 4001.01 (501.01), 4001.02 (501.02), or 4001.03, or equiv. Repeatable to a maximum of 10 cr hrs or 10 completions.
5250	National and International Money Markets	U G	3	Organization, functions, and control of money markets and their submarkets; flow of funds in these markets and investment policies of market participants. Prereq: 4400 (444), or 5410 (641), and 4001.01 (501.01), 4001.02 (501.02), or 4001.03, and 4002.01 (502.01), 4002.02 (502.02), or 4002.3, or Stat 2450 (245), or equiv. Not open to students with credit for 625.

134 Economics

5261	Financial Economics I	U G	3		6711	Survey of Microeconomics	G	4
Examination of the evolution of and economic issues facing financial markets, financial institutions, and financial market participants. Does not count as course credit towards the completion of a business major. Prereq: 4001.01, 4001.02, or 4001.03, and 4002.01, 4002.02, or 4002.03, and Math 1151, 1152, 1161, or 2182H, or equiv.; or Grad standing.				Methodology and scope of the neo-classical microeconomics paradigm; topics include the theory of competitive firms and consumers, general equilibrium, Pareto optimum, welfare theorems, non-competitive markets, uncertainty and asymmetric information. Prereq: 4001.01 or 501A, or equiv, and permission of economics director of graduate studies. Not open to students with credit for 8711 (804), 8712 (805), 704, or 705.				
5262	Financial Economics II	U G	3		6721	Survey of Macroeconomics	G	4
Examination of academic literature and econometric analysis of topics involving financial markets, financial institutions, and financial market participants. Does not count as course credit towards the completion of a business major. Prereq: 4001.01, 4001.02, or 4001.03, and 4002.01, 4002.02, or 4002.03, and 5261, and Math 1151, 1152, 1161, or 2182H, or equiv.; or Grad standing.				Survey of macroeconomics fluctuations, business cycles and economic growth, including Keynesian, monetarist and real business cycle models; topics also include money and banking, unemployment, inflation and endogenous economic growth. Prereq: 4002.01 (502) or equiv with permission of instructor and economics director of graduate studies. Not open to students with credit for 8721 (806), or 8722 (807) or 706, or 707.				
5410	Econometrics I	U G	3		6731	Survey of Econometric Methods I	G	3
The general linear regression model; multiple correlation, path analysis, analysis of variance and tests of significance; specification errors. Prereq: 4001.01 (501.01), 4001.02 (501.02), or 4001.03, and Stat 2450 (245), 4201, 4202 (420, 421), or 3470 (427, 428), or equiv. Not open to students with credit for 641, 444, or 4400.				Survey of methods as applied in econometric analysis, with applications to programming in R. Topics include data management and visualization, linear regression, causal inference, fixed/random effects, nonparametric analysis, and nonlinear models. Prereq: 4400 or 5410 or Stat 2450, and Math 2568 or equiv.; or permission of instructor. Not open to students with credit for 8731, 8732, or 8733.				
5420	Econometrics II	U G	3		6732	Survey of Econometric Methods II	G	3
Discrete choice models, panel data, endogeneity, instrumental variables, and systems of equations; stationary and nonstationary time series; applications in various fields of economics. Continuation of 5410. Prereq: 5410 (641) and 4002.01, 4002.02 (502.01), or 4002.03 (502.02), or PubAfrs 7571, or equiv. Not open to students with credit for 642.				Survey of econometric methods in time series and panel data with an emphasis on empirical examples in micro and macro economics; topics include GMM, time series models, VAR, cointegration, fixed and random effects and duration models. Prereq: 6731 (702), or equiv with permission of instructor and economics director of grad studies. Not open to students with credit for 8731 (740), or 8732 (741), or 8733 (742), or 703.				
5660	Financial Aspects of International Trade	U G	3		6745	Contemporary Political Economy	G	3
International payments and receipts; foreign exchange markets; balance-of-payments adjustment under different monetary systems; macroeconomic policy; international monetary reforms; foreign investments; multinational corporations. Prereq: 4400 (444), 5410 (641), or Stat 2450 (245), and 4002.01 (502.01), 4002.02 (502.02), or 4002.03, or equiv. Not open to students with credit for 666.				Survey of contemporary theories on the interactions between economic policies, domestic institutions and the international economy, and their consequences for political economy. Prereq: Grad standing or permission of instructor. Not open to students with 6 cr hrs for 6745 and PolitSc, or 10 cr hrs for 735 and PolitSc 735. Repeatable to a maximum of 6 cr hrs. Cross-listed in PolitSc 7280.				
5700	Industrial Organization	U G	3		7191	Internship in Professional Economics I	G	0 - 1
Nature, role, and regulation of competition; market structure and social performance; antitrust laws; current economic, legal, and policy problems in the antitrust area. Prereq: 4400 (444), 5410 (641), or Stat 2450 (245), and 4001.01 (501.01), 4001.02 (501.02), or 4001.03, or equiv; or Grad standing. Not open to students with credit for 670.				Practicum for economics graduate students who have completed the core curriculum in microeconomics, macroeconomics and econometrics to apply economic analysis on tasks and problems in an empirical economy or economic organizations. Prereq: Satisfactory completion of the first-year Ph.D. courses or equivalent with permission of Economics Director of Graduate Studies. Not open to students with credit for 901. Repeatable to a maximum of 5 cr hrs or 5 completions. This course is graded S/U.				
5720	Comparative Institutional Analysis of Firms and Markets	U G	3		7193	Individual Studies	G	1 - 4
Applications of economic analysis to industrial organizations including the firm's internal incentive structure, labor markets, and financial institutions, of major market economies such as U.S., and Japan from comparative perspectives. Prereq: 4001.01 (501.01), 4001.02 (501.02), or 4001.03, or equiv, or Grad standing. Not open to students with credit for 672.				Supervised and individually designed readings in economics for postqualifier students in economics or graduate students in noneconomic graduate programs. Prereq: Open to students who completed the first-year graduate PhD core course curriculum and with permission of instructor. Not open to students with credit for 893. Repeatable to a maximum of 2 cr hrs or 5 completions. This course is graded S/U. Letter Grade option available only with approval of economics director of graduate studies.				
5850	Labor Economics	U G	3		7194	Group Studies	G	1 - 4
Advanced study of the labor market including labor demand and supply, wage determination, and unemployment. Prereq: 4400 (444), 5410 (641), or Stat 2450 (245); and 4001.01 (501.01), 4001.02 (501.02), or 4001.03, or equiv. Not open to students with credit for 685.				Lecture course of select topics designed to complement existing graduate courses in economics. Prereq: Grad standing in economics or related disciplines; permission of instructor and economics director of graduate studies. Not open to students with credit for 894. Repeatable to a maximum of 44 cr hrs or 11 completions. S/U option only available with approval of economics director of graduate studies.				
5860	Health Economics	U G	3		7700	Mathematics for Economics I	G	3
An introductory course to the field of health economics. Students will to apply concepts from introductory and intermediate microeconomics to problems that are faced in health and medical care. The focus is on individual demand for medical care; health insurance; markets for, and institutional features of, health care providers; measuring and pricing quality, and healthcare reform. Prereq: 4400, 5410, or Stat 2450; and 4001.01, 4001.02, or 4001.03, or equiv, or Grad standing.				Mathematical concepts and techniques used in advanced economic research; real analysis; metric spaces; topology; measure and integration; convexity; separation theorems; contraction mapping; fixed point theorems; applications. Prereq: Permission of instructor and economics director of grad studies; primarily for PhD students in economics and related disciplines. Not open to students with credit for 700.				
5870	Neuroeconomics and Decision Neuroscience	U G	3		7789	Survey Research Practicum	G	3
The focus of this course will be on the psychology and neuroscience underlying economic behavior. Discussion will cover various domains of economic decision making and what Neuroeconomics has taught us about them. Prereq: ADEcon 2005, Stat 1450, 2450, Psych 2220, or Econ 3400; and Math 1148 or higher; and Econ 4001.01, 4001.02, 4001.03, ADEcon 4001, Psych 3313, 3513, or 4508. Not open to students with credit for Psych 5870. Cross-listed in Psych.				Hands-on applications for students interested in the planning, implementation, and analysis of a scientific sample survey. Prereq: Enrollment in Graduate Interdisciplinary Specialization program, or permission of program director. Not open to students with credit for Econ 789, AgrEduc 789, BusMktg 789, EduPL 789, Geog 789, JCom 789, PolitSc 789, Psych 789, PubHlth 789, PubPolM 789, Social 789, or Stat 789. Cross-listed in ADEcon, AgrEduc, BusMktg, EduPL, Geog, JCom, PolitSc, Psych, PubHlth, PubPolM, Social, and Stat.				
6193	Individual Studies	G	1 - 4		8191	Internship in Professional Economics II	G	0 - 1
Supervised and individually designed studies for pre-qualifier graduate students in economics or graduate students in non-economics graduate programs. Prereq: Permission of instructor. Not open to students with credit for 893. Repeatable to a maximum of 20 cr hrs or 5 completions. This course is graded S/U. Letter Grade option available only with approval of economics director of graduate studies.				Practicum for advanced economics graduate students who have completed Ph.D. course requirements to apply economic analysis on tasks and problems in an empirical economy or economic organizations. Prereq: Satisfactory completion of the Ph.D. core and field courses or equivalent with permission of Economics Director of Grad Studies. Not open to students with credit for 901. Repeatable to a maximum of 5 cr hrs or 5 completions. This course is graded S/U.				
6700	Survey of Mathematical Methods in Economics	G	3		8193	Individual Studies	G	1 - 4
Core analytical methods and techniques routinely used in the first-year graduate courses in economic theory; topics include basic real analysis, convexity, constrained optimization, envelope theorems and their economics applications. Prereq: 4001.01, 4001.02, 4001.03, or 501A and graduate mathematics courses in vector calculus and elementary linear algebra. Not open to students with credit for 704, or 705.				Supervised and individually specialized studies for PhD students who have finished regular course work in their economics PhD program. Letter grade option available only with approval of economics director of graduate studies. Prereq: Permission of instructor. Repeatable to a maximum of 44 cr hrs. This course is graded S/U.				
6701	Survey of Statistical Methods in Economics	G	3					
Probability and statistical methods frequently used in economic analysis; topics include random variables, moment generating functions, limit theorems, expectations, multiple correlations, tests of significance and their economic applications. Prereq: Math 1152 (153), or equiv; or permission of instructor and economics director of graduate studies. Not open to students with credit for Stat 5201 (520), or 6801 (620), or 640, or 720.								

8194	Group Studies	G	1 - 4
Advanced new course material in economics offered to complement existing PhD courses. Prereq: Grad standing in Econ or related field, and permission of instructor and Grad studies director for Econ. Not open to students with credit for 894. Repeatable to a maximum of 44 cr hrs or 11 completions.			
8711	Microeconomic Theory IA	G	3
Rigorous survey of the neoclassical paradigm dealing with individual economic agents, firms and markets; covers core concepts and methods such as equilibrium, optimality, duality, comparative statics and envelope theorems. Prereq: Grad standing in Econ, or related discipline with permission of Economics Director of Grad Studies.			
8712	Microeconomic Theory IB	G	3
Continuation and extension of Microeconomic Theory 1A to study competitive general equilibrium, optimality and welfare theorems; includes analysis of individual agents' behavior under uncertainty and markets subject to asymmetric information. Prereq: 8711, or equiv, and permission of Economics Director of Grad Studies.			
8713	Microeconomic Theory IIA	G	3
Rigorous introduction to game theoretic methods and concepts and their applications to study strategic interactions in economic organizations, including imperfectly competitive markets and economies with public goods and externalities. Prereq: 8711 or 8712, or equiv, and permission of economics director of grad studies.			
8714	Microeconomic Theory IIB	G	3
A theoretical treatment of information economics and mechanism design; topics include implementation, dominant strategy mechanism, Bayesian mechanism design, adverse selection, moral hazard, social choice and auctions. Prereq: 8713, or equiv, and permission of Economics Director of Graduate Studies.			
8721	Macroeconomic Theory IA	G	3
A rigorous introduction to modern macroeconomic analysis and models of economic growth with emphasis on dynamic competitive equilibrium analysis: topics include dynamic programming applied to stochastic environments. Prereq: Grad standing, and permission of Economics Director of Grad Studies.			
8722	Macroeconomic Theory IB	G	3
Continuation of 8721 with recent developments in macro and monetary economics; topics include business cycles, endogenous growth, equilibrium unemployment and risk sharing in incomplete markets. Prereq: 8721 or equiv, and permission of Economics Director of Grad Studies.			
8723	Macroeconomic Theory IIA	G	3
Continuation of Macroeconomic Theory IA-IB with emphasis on dynamic general equilibrium models with shocks and frictions and their empirical assessment. Prereq: 8722, or equiv, and permission of Economics Director of Grad Studies.			
8724	Macroeconomic Theory IIB	G	3
Micro foundations of aggregate demand from the perspective of dynamic optimization; topics also include permanent income, lifetime portfolio choice, Q-theory of investment, consumption CAPM, term structure and long term risk. Prereq: 8723, or equiv, and permission of Economics Director of Grad Studies.			
8731	Econometrics I	G	4
Probability; random variables; sampling distributions; limit theorems; point and interval estimation; statistical hypothesis testing; multiple regression analysis in the linear model including finite-sample and asymptotic statistical properties. Prereq: 6700, 6701, or Stat 5201; or equiv with permission of economics director of grad studies.			
8732	Econometrics II	G	4
Generalized least squares; specification tests; generalized method of moments; endogenous regressors and simultaneous equation systems; panel data; nonlinear estimation; discrete and limited dependent variable models; and basic time-series analysis. Prereq: 8731, or equiv with permission of Economics Director of Graduate Studies.			
8733	Econometrics III	G	3
Continuation of Economics 8731 and 8732 with an emphasis on applications of econometric theory and methods, including the use of advanced econometric software to various fields of economics. Prereq: Econ 8731 and 8732, or equiv with permission of instructor. Not open to students with credit for 640, 740, 741, and 742.			
8781.01	First Year Research Principles and Techniques in Core Microeconomics	G	1 - 3
Group independent study of research principles and techniques for first-year PhD students in economics with focus on microeconomics. Prereq: 8714 (808), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8781.02	First Year Research Principles and Techniques in Core Macroeconomics	G	1 - 3
Group independent study of research principles and techniques for first year PhD students in economics with focus on macroeconomics. Prereq: 8724 (809), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			

8781.03	First Year Research Principles and Techniques in Core Econometrics	G	1 - 3
Group independent study of research principles and techniques for first year PhD students in economics with focus on econometrics. Prereq: 8732 (742), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8781.05	First Year Research Principles and Techniques in Economics	G	1 - 3
Group independent study of research principles and techniques for first year PhD students in economics. Prereq: Grad standing in Economics, and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.01	Second Year Research Principles and Techniques in Economic Theory	G	1 - 3
Group independent study-cum-workshop to facilitate integrative reviews of concepts and techniques in major themes of economic theory, to prepare for field exams/papers, and to develop research perspectives. Prereq: 8816 (815), 8817 (817), or 8818 (818), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.02	Second Year Research Principles and Techniques in Macroeconomics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in macro-monetary economics and to develop research topics. Prereq: 8821 (810), 8822 (811), or 8823 (820), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.03	Second Year Research Principles and Techniques in Econometrics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in econometrics and to develop research topics. Prereq: 8830 (840), 8831 (841), or 8832 (842), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.04	Second Year Research Principles and Techniques in Public and Urban Economics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in public and urban economics and to develop research topics. Prereq: 7790 (790), 8841 (830), or 8842 (832), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.05	Second Year Research Principles and Techniques in Labor Economics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in labor economics and to develop research topics. Prereq: 8851 (883), 8852 (884), or 8853 (981), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.06	Second Year Research Principles and Techniques in International Economics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in international economics and to develop research topics. Prereq: 8861 (861), 8862 (862), or 8863 (863), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.07	Second Year Research Principles and Techniques in Industrial Organization	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in industrial organization and to develop research topics. Prereq: 8871 (871), 8872 (872), or 8873 (970), and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.08	Second Year Research Principles and Techniques in Economic History	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in economic history and to develop research topics. Prereq: 5130 (614), 5140 (613), or 5150 (615), and permission of instructor and economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.09	Second Year Research Principles and Techniques in Experimental Economics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in experimental and behavioral economics and to develop research topics. Prereq: 8873 (970) or 8875, and permission of economics director of graduate studies. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
8782.10	Second Year Research Principles and Techniques in Growth and Development Economics	G	1 - 3
Group independent study designed to integrate and reinforce field knowledge and methods in growth and development economics and to develop research topics. Prereq: 8863 (863), and a field course approved by economics director of graduate studies, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			

136 Economics

8782.20 Second Year Research Principles and Techniques in Economics G 1 - 3

Group independent study designed to integrate and reinforce knowledge and methods acquired in advanced field courses, and to develop research topics. Prereq: Major field courses approved by economics director of graduate studies, and permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

8783.01 Advanced Research Principles and Techniques in Economic Theory G 1 - 3

Group independent study to prepare students for original research and innovation in the field of advanced economic theory. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.02 Advanced Research Principles and Techniques in Macroeconomics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of macroeconomics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.03 Advanced Research Principles and Techniques in Econometrics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of econometrics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.04 Advanced Research Principles and Techniques in Public and Urban Economics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of public and urban economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.05 Advanced Research Principles and Techniques in Labor Economics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of labor economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.06 Advanced Research Principles and Techniques in International Economics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of international economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.07 Advanced Research Principles and Techniques in Industrial Organization G 1 - 3

Group independent study to prepare students for original research and innovation in the field of industrial organization. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.08 Advanced Research Principles and Techniques in Economic History G 1 - 3

Group independent study to prepare students for original research and innovation in the field of economic history. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.09 Advanced Research Principles and Techniques in Experimental Economics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of experimental and behavioral economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.10 Advanced Research Principles and Techniques in Growth and Development Economics G 1 - 3

Group independent study to prepare students for original research and innovation in the field of growth and development economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8783.20 Advanced Research Principles and Techniques in Economics G 1 - 3

Group independent study to prepare students for original research and innovation in economics. Open to students who have completed field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 15 cr hrs or 5 completions. This course is graded S/U.

8816 Advanced Economic Theory I G 3

A topic-driven course in advanced microeconomic theory, game theory and decision theory, and their theoretical applications with emphasis on important recent results. Prereq: 8714 (808), or equiv with permission of instructor. Not open to students with credit for 815.

8817 Advanced Economic Theory II G 3

Thorough treatment of major developments in game theory and a survey of major applied game theory topics such as mechanism design, bargaining, and oligopoly. Prereq: 8714 (808) or equiv with permission of instructor. Not open to students with credit for 817.

8818 Advanced Economic Theory III G 3

Theoretical approaches to economics of information; how information affects individual behavior and market equilibrium; moral hazard; adverse selection; incomplete contracts; rational expectations; and principal-agency models. Prereq: 8714 (808), or equiv with permission of instructor. Not open to students with credit for 818.

8819 Economics of Uncertainty G 3

Classical and modern approaches to decision-making and economic behavior under uncertainty; classical expected utility; subjective probability; behavioral theory of economic choice under uncertainty. S/U option available only with permission of Grad studies director for Econ. Prereq: 8714 (808) or equiv, or permission of instructor. Not open to students with credit for 819.

8821 Advanced Macroeconomics I G 3

Recent contributions to macro-monetary economics in theoretical, empirical and policy areas; topics include computational methods, econometric techniques, dynamic modeling and empirical assessment. Prereq: 8724 (809), or permission of instructor. Not open to students with credit for 810.

8822 Advanced Macroeconomics II G 3

Studies roles of preferences, technology, endowments, and market structures to determine the behavior of aggregate variables. Topics include: dynamic stochastic general equilibrium, rational expectations, business cycles, and propagation mechanisms. Prereq: 8732 (742), or 8724 (809), or permission of instructor. Not open to students with credit for 811.

8823 Advanced Macroeconomics III G 3

Studies the macroeconomic implications of discrete decisions by heterogeneous agents and assesses quantitative DSGE models. Topics include: lumpy adjustments, non-convex adjustment costs, and the interactions of real and financial frictions. Prereq: 724, or 809, or permission of instructor. Not open to students with credit for 820.

8825 Advanced Macroeconomic Methods G 3

Develops numerical methods for dynamic stochastic general equilibrium models with heterogeneity and non-convexities. Applications include: models of households with uninsurable risk and borrowing constraints, and firms with adjustment costs. Prereq: Not open to students with credit for 816.

8830 Advanced Econometrics I G 3

Fundamental elements of time series methods and recently developed techniques for the analysis of economic time series. Prereq: 8732 (742), or equiv with permission of instructor. Not open to students with credit for 840.

8831 Advanced Econometrics II G 3

Selected advanced topics in econometrics - such as nonparametric and semiparametric estimation, numerical optimization, simulation methods - including Markov chain Monte Carlo methods and duration models used in economics. Prereq: 8732 (742) or equiv with permission of instructor. Not open to students with credit for 841.

8832 Advanced Econometrics III G 3

Theory and applications of advanced econometric methods with emphasis on parameter estimation and testing in nonlinear models. Topics include: large sample theory, extremum estimators, likelihood approach, and the GMM framework. Prereq: 8732 (742) or equiv with permission of instructor. Not open to students with credit for 842.

8833 Micro Econometrics G 3

Recent advances in micro econometrics, covering both theoretical and applied areas, with emphasis varying with instructor's research interest such as spatial econometrics and social interaction models. Prereq: Econ 8732 (742), Econ 8831 (841), and Econ 8832 (842), or equiv, or permission of instructor. Not open to students with credit for 843. Repeatable to a maximum of 12 cr hrs.

8851 Labor Economics I G 3

Theoretical and empirical methods used to understand life-cycles and interpersonal variations in earnings. Topics include: human capital, job-market signaling, matching, schooling, and mobility. Prereq: 8712 (804, 805), and 8731 (741), or equiv with permission of instructor. Not open to students with credit for 883.

8852	Labor Economics II	G	3
Theories and empirical analysis of the demand for labor and changes in the wage structure over time; the determinants of youth outcomes and behaviors including the effect of family and peer groups. Prereq: 8712 (804, 805), and 8731 (741), or equiv with permission of instructor; 8851 (883) recommended. Not open to students with credit for 884.			
8853	Labor Economics III	G	3
An examination of models and methods used to study household labor supply behavior. Topics include: retirement, the determinants of child outcomes, and demographic behavior. 8852 (884) is recommended. Prereq: 8851 (883). Not open to students with credit for 981.			
8856	Health Economics	G	3
This course covers major research topics in health care and individual economics decisions related to health, structure of health care and insurance markets, and government policies. The course also provides a survey of data resources available to researchers in health economics, and the methodology of measurement and valuation of healthcare market performance and quality of healthcare providers. Prereq: 8712 and 8731; or permission of instructor.			
8861	International Economics I	G	3
Theory and empirics of the determinants of trade, analysis of comparative advantage, trade patterns, gains from trade, commercial policies on resource allocations, income distribution and growth. Prereq: 8712 (804, 805). Not open to students with credit for 861.			
8862	International Economics II	G	3
Theory and empirics of international macroeconomics. Topics include: open-economy business cycles, determinants of exchange rates, international capital flows and resource allocations, financial constraints, and computational and estimation methods. Prereq: 8712 (804, 805) 8722 (806, 807); and 8861 (861) recommended. Not open to students with credit for 862.			
8863	International Economics III	G	3
Evolution of world economy from theoretical and empirical perspectives; trade; growth and development; international capital markets; financial crises and sovereign default; international business cycle transmissions. Prereq: 8712 (804, 805), and 8722 (806, 807); and 8862 (862) recommended. Not open to students with credit for 863.			
8871	Industrial Organization I	G	3
A survey of theoretical concepts used to analyze industry structure, firm conduct, market performance and related issues of public policy; topics include recent developments in the theory of the firm as well as models of competition and rivalry. Prereq: 8713 (805, 808). Not open to students with credit for 871.			
8872	Industrial Organization II	G	3
A survey of empirical methods used to analyze industry structure, firm conduct, market performance and related issues of public policy. Prereq: 8871 (871), and 8732 (742); or permission of instructor. Not open to students with credit for 872.			
8873	Industrial Organization III: Economic Analysis of Auctions	G	3
A survey of auction theory, experiments, and empirics; topics include private and common value auctions, multi-unit demand auctions, sequential and simultaneous auctions, and related research material. Prereq: 8714 (808), or equiv, and permission of instructor.			
8874	Computational Econometric Methods in Applied Microeconomics	G	3
This course covers computational methods used in applied microeconomic research, with particular focus on applications to the estimation and analysis of structural discrete choice models used in the study of empirical industrial organization. Prereq: 8711 and 8731.			
8875	Experimental & Behavioral Economics	G	3
A survey of concepts and methods in experimental and behavioral economics for advanced graduate students; topics include impacts of heuristics and biases on "rational" behavior, other-regarding preferences, bargaining, public goods and market design. 8873 (970) recommended. Prereq: 8714 (808), 804, or 805, or equiv, or permission of instructor.			
8876	Industrial Organization IV: Empirical Research Methods	G	3
Recently developed techniques for estimating market power and costs with incomplete data, with applications to antitrust economics. The goal is to give you an understanding of state of the art empirical tools, with the purpose of preparing students for research. Prereq: 8714, and permission of instructor.			
8891.01	Economic Theory Seminar	G	1 - 3
Latest developments in advanced research in general economic theory, game theory and related fields. Prereq: 8714 (808), and permission of instructor. Repeatable to a maximum of 36 cr hrs or 12 completions. This course is graded S/U.			
8891.03	Colloquium in Economic Theory	G	1 - 3
A supervised workshop in which advanced graduate students report their latest research in progress on the themes chosen by the colloquium instructor in advanced theory and related fields. Open to students who have completed PhD field courses approved by economics director of graduate studies. Prereq: Permission of instructor and economics director of graduate studies. Repeatable to a maximum of 16 cr hrs or 8 completions.			
8892.01	Macroeconomics Seminar	G	1 - 3
Latest developments in advanced research in macro-monetary economics and related fields. Prereq: 8724 (809), and permission of instructor. Repeatable to a maximum of 36 cr hrs or 12 completions. This course is graded S/U.			

8892.02	Workshop in Macroeconomics	G	1 - 2
Forum to report and discuss the latest research results by graduate students, faculty members and outside speakers in macro-monetary economics and related fields. Prereq: Econ 8724 (809), and permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions. This course is graded S/U.			
8892.03	Colloquium in Macroeconomics	G	1 - 3
A supervised workshop in which advanced graduate students report their latest research in progress on the themes chosen by the colloquium instructor in macroeconomics and related fields. Open to students who have completed PhD field courses. Repeatable to a maximum of 16 cr hrs or 8 completions.			
8893.01	Econometrics Seminar	G	1 - 3
Latest developments in advanced research in econometrics and related fields. Prereq: 8732 (741 and 742), and permission of instructor. Repeatable to a maximum of 36 cr hrs or 12 completions.			
8893.03	Colloquium in Econometrics	G	1 - 3
A supervised workshop in which advanced graduate students report their latest research in progress on the themes chosen by the colloquium instructor in econometrics. Prereq: Successful completion of micro and macro qualifiers, successful completion of two Ph.D. field requirements (econometrics recommended), and permission of instructor and economics director of graduate studies. Repeatable to a maximum of 16 cr hrs or 8 completions.			
8894.01	Applied Microeconomics Seminar	G	1 - 3
Latest developments in advanced research in applied microeconomics fields. Prereq: 8714 (808), and permission of instructor. Repeatable to a maximum of 36 cr hrs or 12 completions.			
8894.02	Workshop in Applied Microeconomics	G	1 - 2
Forum to report and discuss the latest research results by graduate students, faculty members and outside speakers in applied microeconomics fields. Prereq: 8714 (808), and permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions. This course is graded S/U.			
8894.03	Colloquium in Applied Microeconomics	G	1 - 3
A supervised workshop in which advanced graduate students report their latest research in progress on the themes chosen by the colloquium instructor in applied microeconomics and related fields. Prereq: Completion of Ph.D. field courses approved by economics director of graduate studies, and permission of instructor and economics director of graduate studies. Repeatable to a maximum of 16 cr hrs or 8 completions.			
8999	Dissertation Research	G	1 - 3
Dissertation research in economics. Prereq: Doctoral candidate in Economics. Repeatable to a maximum of 60 cr hrs or 20 completions. This course is graded S/U.			

Education and Human Ecology

1100	Introduction to Education & Human Ecology and Degree Planning	U	1
Introduction to Education and Human Ecology degree programs, survey of university and college policies and procedures, and focus on degree planning. Prereq: Not open to students with credit for HumanEc 100 or EduPAES 100.			
1100H	Introduction to Education & Human Ecology and Degree Planning	U	1
Introduction to Education and Human Ecology degree programs, survey of university and college policies and procedures, focus on degree planning, establishment of Honors requirements, and development of Honors contracts. Prereq: Honors standing. Not open to students with credit for HumanEc 100 or EduPAES 100.			
2194	Group Studies	U	1 - 5
Study of special or interdisciplinary topics at an introductory level. Repeatable to a maximum of 15 cr hrs or 15 completions.			
2788H	Education and Human Ecology Undergraduate Honors Seminar	U	1
Seminar for sophomores and juniors in the Education and Human Ecology undergraduate honors program. Students will explore research topics, and learn about the process of completing a scholarly research project. Prereq: Honors standing, and Soph or Jr standing, and enrollment in EHE major or pre-major.			
2990	Professional Career Development	U	1
Job Search strategies for students including: Self-assessment, goal setting, job research, communication and correspondence, resumes, interviewing, portfolios and life after college. This course will not count for credit in any EHE major. Elective credit only. Prereq: Soph standing, and pre-majors and/or majors in College of Education and Human Ecology. Not open to students with credit for ConSci 2990, HDFS 3800, or EduPAES 2270.04. This course is graded S/U.			
3000	Foundations for Peer Leaders in First Year Experience	U	1
This foundational course introduces necessary skills/knowledge to work effectively as a Peer Leader in First Year Experience. Content covers first-year transition issues, student development theory, OSU policies and resources, relationship-building, and paraprofessional skills. Emphasis is on content relevant to experiences of New First Year Students across the university. Prereq: Only open to students who have been selected to participate in the FYE Peer Leader program, and permission of instructor. Repeatable to a maximum of 2 cr hrs.			

138 Education and Human Ecology

3191 Internships in Education and Human Ecology U 1 - 3

Fourteen week practical experience or equivalent in an approved organization related to student's major interest. This general internship option is for experiences that do not fit program specific EHE Internships. This course will not count for credit in any EHE major. Elective credit only. Prereq: CPHR 2.0 or above, and pre-major and/or major in Education and Human Ecology, and permission of instructor. Not open to students with credit for ConSci 3191 and 4191, or HDFS 2189, 3189.01, 3189.02, 3189.03, 3189.04, 3189.05, 3189.06, 3189.07, HumNtr 4189, EduPAES 2189.21, 4189.05, 4489.05, 4191.20, 4191.21, 4191.40, 5191.23, or 6191. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

4194 Group Studies U 1 - 3

Group studies on special issues in education. Repeatable to a maximum of 12 cr hrs or 4 completions.

4998 Undergraduate Research in Education & Human Ecology U 0 - 15

Undergraduate research or creative activities in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 5 completions. This course is graded S/U.

4998H Honors Undergraduate Thesis Research U 0 - 15

Undergraduate research or creative activities in variable topics. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 20 cr hrs or 4 completions. This course is graded S/U.

5193 Individual Studies U G 1 - 3

Individual study in the fields of education or human ecology. Prereq: Permission of instructor. This course is graded S/U.

5797 Study at a Foreign Institution U G 1 - 18

An opportunity for students to study at a foreign institution and receive OSU credit for work completed there. Students will pay OSU fees and any fees in excess of OSU tuition, as well as all travel and subsistence costs. Prereq: Permission of department chairperson. Repeatable to a maximum of 54 cr hrs or 3 completions.

5892 Workshop U G 1 - 5

Intensive study of a problem common to the participants for the purpose of developing sound principles and practices. Repeatable to a maximum of 20 cr hrs or 4 completions.

8000 Responsible Conduct of Research (RCR) G 1

Overview of the concepts and policies required for the Responsible Conduct of Research (RCR), with particular attention to federally funded research requirements. This course fulfills the NIH training requirement for research ethics. This is a condensed four-week course. Typically taught in session 1 of summer term. Prereq: Grad standing in the College of Education and Human Ecology, or permission of instructor. Repeatable to a maximum of 3 cr hrs. This course is graded S/U.

Education: Teaching and Learning

1010 Intensive English: Integrated Skills U 0

Integrated Skills for students in the Intensive English Program. Prereq: Admission to American Language Program, and permission of Director. Repeatable to a maximum of 10 completions.

1120 Intercultural Communication for Undergrad Business & Pre-business Majors U 2

This performance-based course focuses on the speaking skills that facilitate success in the Fisher College of Business, OSU, and ultimately in the global business community. Aimed at helping first-year international undergraduate students, the course features activities, discussions, and readings related to cross-cultural conventions of spoken English and business English. Prereq: First-year international student in the Fisher College of Business, and students who scored 24 or below on the oral proficiency section of the TOEFL.

1901 Introduction to Academic Writing for Multilingual Undergraduate Students U 3

Course focuses on building fundamental writing and critical thinking skills. As students engage in writing informational and evaluative texts, they will learn to make fundamental rhetorical choices and build necessary skills used in writing multiple paragraph essays. Additionally, students will read critically and evaluate the reliability and effectiveness of information sources. Prereq: Placement test score of 1901.

1902 Advanced Academic Writing for Multilingual Undergraduate Students U 3

Course emphasizes critical reading of diverse texts and applying varied writing strategies used in common academic genres to student writing. Students will learn to make appropriate decisions about integrating sources into their texts while maintaining a clear boundary between their own work and that of others. Prereq: 1901, or placement test score of 1902.

1902.04 Academic Writing in English as a Second Language U 4

Attention given to various practices involving reading and source-based writing. Rhetorical and linguistic issues addressed. Synthesis and argumentative writing in response to literary and nonliterary texts. Intended for undergraduates. Prereq: Placement test.

2100 Dramatic and Arts-Based Teaching and Learning U 3

Students will become comfortable with, and knowledgeable about arts integration: dramatic and arts-based approaches to teaching and learning in diverse settings (schools, art museums, theatres, community centers).

2189 Field Experience U 1 - 2

The EDUTL 2189 field experience is designed to provide undergraduate students, in pre-education programs, with an opportunity to work with youth within a professional setting in a school, tutoring environment or community agency. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions.

2367 Education, Society and Writing U 3

Designed to help students reflect critically, both orally and in writing, on the social, political, and cultural contexts that influence education in today's society. Prereq: A GE level 1 writing course. GE writing and comm course: level 2. GE foundation writing and info literacy course.

2368 Introduction to Children's Literature U 3

This is a survey course in which students study the historical and contemporary elements of literature intended for children, including picturebooks; traditional tales; novels of realism, and fantasy; nonfiction; poetry; and multicultural books. Prereq: English 1110, or equiv. Not open to students with credit for 467. GE lit course. GE foundation lit, vis and performing arts course.

2744 Technologies Used In STEM Education U 3

The role and scope of educational technology for standards based STEM instruction. Exploration of areas in which mathematics, science education, and technology education can effectively use educational technology in a pedagogically sound manner. Technology has two roles in STEM education; to teach and learn with, and as a tool for doing STEM.

2820 Creativity and the Arts in Early Childhood Development and Education U 3

This course introduces students to basic definitions, theories, and practical examples of using creativity, imagination, and the arts as means for educating young children within and outside of traditional early childhood educational settings.

3005 Urban Teaching and Learning U 3

This course introduces students to issues related to teaching and learning in urban school contexts. GE soc sci indivs and groups and diversity soc div in the US course. GE foundation race, ethnicity and gender div course.

3101 Playing our Way into Learning U 3

Playing is at the heart of being human. In this course we'll play together as we explore the significance of theories and practices of playful learning and teaching in informal as well as formal settings. GE theme lived environments course.

3160 Application of Development in Learning Contexts U 3

Designed for students to apply theories and research of child growth and development in multiple learning contexts. Prereq: Not open to students with credit for 460. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.

3189.01 Field Experience: Early Childhood Education U 1 - 2

This field experience is designed as a practice-based companion to the EC Pedagogy class. Prereq: Admission to Early Childhood Education Major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.02 Field Experience: Middle Childhood Education U 1 - 2

The experience is designed to provide : lesson planning, teaching, and classroom management; student learning, interests, and perspectives; (3) the requirements of being a professional educator; and effectively bringing together the work done in a university classroom with work done in grade 4-9 classrooms. Prereq: Admission to Middle Childhood Education Major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.03 Field Experience: English Language Education U 1 - 2

The field experience is designed to provide: (1) lesson planning, teaching, and classroom management; (2) student learning, interests, and perspectives; (3) the requirements of being a professional educator; and (4) effectively bringing together the work done in a university classroom with work done in 7-12 integrated language arts classrooms. Prereq: Admission to English Language Arts Education Major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.04 Field Experience U 1 - 2

The field experience is designed to provide you with an opportunity to work with a mentor teacher to gain insight into: (1) lesson planning, teaching, and classroom management; (2) student learning, interests, and perspectives; (3) the requirements of being a professional educator; and (4) effectively bringing together the work done in a university classroom with work done in grade 7-12 classrooms. Prereq: Admission to Integrated Social Studies BSEd licensure major.

3189.05 Field Experience: Early Childhood Visual Impairment U 1 - 2

The experience is designed to provide: how students think & learn; how teachers engage students with visual impairments & others in the classroom in learning; how to work with children with VI in groups, including effectual guidance & discipline strategies; how to connect the classroom to families & community; how you can effectively bring the work done in pedagogy to work with VI students. Prereq: Admission to Early Childhood Education Major and Visual Impairments licensure program. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.06 Field Experience: World Language Education U 1 - 2

Directed field experience emphasizing appropriate teaching strategies for world language education with different school age children and settings. Prereq: Admission to World Language Education Major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.07 Field Experience U 1

The purpose of this 1-day a week field experience for non-final year STEM BSED interns is to develop and reflect on (i) knowledge of subject matter, content standards, and subject-specific pedagogy; (ii) evidence of the effects of instruction on student learning, (iii) professionalism, classroom management, and communication skills prior to their final year in the program.

3189.08 Field Experience: TESOL U 1 - 2

Directed field experience emphasizing appropriate teaching strategies for TESOL with different school age children and settings. Prereq: Admission to TESOL major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3189.09 Field Experience: Child and Youth Studies U 1 - 2

Field experience designed to provide undergraduate students in the Child & Youth Studies program an opportunity to work with a cooperating professional within an educational or community organization focusing on teaching & learning. Prereq: Admission to Child and Youth Studies Major. Repeatable to a maximum of 4 cr hrs or 4 completions.

3193 Individual Studies U 1 - 3

Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 20 completions. This course is graded S/U.

3194 Group Studies U 1 - 3

Group studies on special problems in education. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.

3356 Literature for Adolescents U 3

Literature for individual, group, and whole-class reading in junior and senior high schools; interest factors and literary value as criteria for selection; bibliographic aids. Prereq: English 1110 or equivalent. Not open to students with credit for 656 or 3356E. GE lit course. GE foundation lit, vis and performing arts course.

3356E Literature for Adolescents U 3

Literature for individual, group, and whole-class reading in junior and senior high schools; interest factors and literary value as criteria for selection; bibliographic aids. Prereq: English 1110 or equivalent. Not open to students with credit for 3356 (656). GE lit course. GE foundation lit, vis and performing arts course.

3368 Black Voices Matter: Resisting Anti-Blackness via Black Youth Literature and Media U 3

This course introduces intersectionality as an analytical framework for engaging literature, media, arts, etc., written about/for Black Youth by focusing on a broad body of children's and youth literature that also reflects how aspects of a person's social and political identities, including gender, and ethnicity, combine to create different modes of discrimination and privilege. GE foundation lit, vis and performing arts and race, ethnicity and gender div course.

4015 Sexualities and Education U 3

Examination of sexual orientation as an arena of diversity in K-12 and higher education as well as society. Prereq: Not open to students with credit for EduPL 415.

4174 Family Participation in Early Childhood School Programs: General Student Body U 3

The purposes and importance of family involvement in early childhood school programs, types of programs, resources, methods, and curricula.

4189.01 Advanced Field Experience: Early Childhood Education U 1 - 4

The field experience is designed to provide: classroom practices in lesson planning, teaching, and guidance and discipline; student learning, interests, and perspectives; the official and unofficial requirements of being a professional educator; and how you can effectively bring together the work done in a university classroom with your work in classrooms with students age 3 to grade 3. Prereq: Admission to Early Childhood Education Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.02 Advanced Field Experience: Middle Childhood Education U 1 - 4

The field experience is designed to provide: best practices in lesson planning, teaching, and classroom management; student learning, interests, and perspectives; the official and unofficial requirements of being a professional educator; and how you can effectively bring together the work done in a university classroom with grade 4-9 classrooms. Prereq: Admission to Middle Childhood Education Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.03 Advanced Field Experience: English Language Arts Education U 1 - 4

The advanced field experience is designed to provide: lesson planning, pedagogy, and classroom management; student learning, interests, and perspectives; the requirements of being a professional educator; and effectively bringing together the work done in a university classroom with work done in 7-12 integrated language arts classrooms. Prereq: Admission to English Language Arts Education Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.04 Advanced Field Experience U 1 - 2

The advanced field experience is designed to provide you with an opportunity to work with a mentor teacher to gain insight into: (1) lesson planning, teaching, and classroom management; (2) student learning, interests, and perspectives; (3) the requirements of being a professional educator; and (4) effectively bringing together the work done in a university classroom with work done in 7-12 Social Studies classrooms. Prereq: 3189.04, and admission to Integrated Social Studies BSED licensure major.

4189.05 Advanced Field Experience: Early Childhood/Visual Impairment U 1 - 4

The field experience is designed to provide: best practices in lesson planning, teaching, & classroom management; (2) student learning, interests, & perspectives; official & unofficial requirements of being a professional educator; & how you can effectively bring together the work done in a university classroom with your work in classrooms or educational settings with students in ECVI. Prereq: Admission to Early Childhood Education Major and Visual Impairments licensure program. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.06 Advanced Field Experience: World Language Education U 1 - 4

Directed field experience emphasizing appropriate teaching strategies for World Language K-12 students. Prereq: Admission to World Language Education Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.07 Advanced Field Experience: STEM Education U 1 - 4

The purpose of this field experience is to support & enhance the development of educational leaders who engage in & implement research-based practices to support & advance STEM 7-12 educational progress. Our program prepares interns for initial licensure & engage experienced educators who aspire to advance their practice. Prereq: Admission to STEM Education Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4189.08 Advanced Field Experience: TESOL U 1 - 4

Directed field experience emphasizing appropriate teaching strategies for TESOL grades K-12. Prereq: Admission to TESOL Major. Repeatable to a maximum of 12 cr hrs or 3 completions.

4191 Internship U 1 - 15

Internship in an educational or community setting. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions.

4303 Language, Diversity, and Education U 3

This course is designed to develop your critical language awareness with respect to language diversity and to prepare you to engage effectively with linguistically diverse populations in educational contexts. We explore language diversity, how it shapes teaching and learning, and how we can reshape linguistic environments to make them more equitable. GE theme lived environments course.

4998 Undergraduate Research in Teaching and Learning U 1 - 4

Undergraduate Research is completed by junior and/or senior students as an independent study under the supervision of a faculty member. The student will conceptualize a research study, identify theories and methods appropriate to the research, and assume responsibility for data collection, data management, and other activities pertaining to the research project including scholarly writing. Prereq: A cumulative GPA of 3.0 or above. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

4998H Undergraduate Research in Teaching and Learning U 1 - 4

Undergraduate Research is completed by junior and/or senior honors students as an independent study under the supervision of a faculty member. The student will conceptualize a research study, identify theories and methods appropriate to the research, and assume responsibility for data collection, data management, and other activities pertaining to the research project including scholarly writing. Prereq: Honors standing, and an overall GPA of 3.40 or above. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

5005 Equity and Diversity in Education U G 3

Focuses on issues of diversity, equity, justice, teacher agency, and interdisciplinary approach to curriculum and pedagogy. Emphasis is placed on the role of teachers in affirming students' identities and lived experiences and its influences on approaches to teaching and learning in diverse educational settings. GE theme citizenship for div and just wrld course.

5030 Spoken English for Academic Contexts U G 2

This course is designed for international undergraduates and graduates who would like to improve their oral English proficiency and confidence speaking for academic purposes, as well as their familiarity with the languages and cultures of the U.S. and of OSU. The course is based on the principle that speaking improves only with ample opportunities to speak. Repeatable to a maximum of 4 cr hrs.

5040 Advanced Spoken English for Int'l Graduate Students I U G 4

Designed to improve the spoken English fluency, pronunciation, grammar, and listening comprehension of non-native English speaking graduate students. Public speaking skills and an awareness of American culture. Prereq: Placement test, and permission of instructor. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

5050 Classroom English for International Graduate Teaching Associates U G 3

Designed to improve the classroom communication skills of non-native English speaking TAs. With a focus on teaching, linguistic and discourse competence are developed for success in the cultural context of the American university. Prereq: Placement test, and permission of instructor. This course is graded S/U.

5055 Teaching Workshop for International Graduate Teaching Associates U G 2

Addresses the particular issues of non-native English speaking graduate students as TAs. Involves discussion of teaching issues, classroom observations, and extensive teaching practice and feedback in both class and tutorials. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

140 Education: Teaching and Learning

5060	Special Topics: Spoken English for International Graduate Students	U G	1		
	Focuses on areas of language acquisition challenges for students needing extra work in a specific aspect of language development to progress through completion and certification in a timely manner. Prereq: Placement test required or permission of English as a Second Language department. Repeatable to a maximum of 18 cr hrs. This course is graded S/U.				
5101	Teaching and Learning with Drama: Introduction	U G	3		
	Introduction to the use of drama and social imagination in education. Prereq: Jr or Sr standing with some field experience, or experienced teacher. Not open to students with credit for 633. Repeatable to a maximum of 6 cr hrs.				
5102	Teaching & Learning of Literacy in Grades Pre K-5	U G	3		
	Examination of children's oral and written language development and related theoretical understandings instrumental for teaching language arts including evaluation processes and instructional materials. Prereq: 5469, and enrollment in Education major or Master of Education.				
5108	Teaching and Learning of Mathematics in Grades Pre-K - 3	U G	3		
	Prepares preservice teachers with knowledge, skills of, and ability to use standards, learning theories, pedagogies, assessment, and technology for the teaching and learning of Pre-K - 3 early childhood mathematics in a diverse classroom. Prereq: Admission to Early Childhood teaching licensure program, or permission of instructor.				
5120	Arts-Based Integrated Learning	U G	3		
	Focuses on using arts-based, inquiry-based, and project-based learning as interdisciplinary, integrated approaches to curriculum and building multiple literacies and supporting multiple learners simultaneously.				
5123	Early Childhood Pedagogy	U G	3		
	Pedagogy I explores sociocultural perspectives on teaching and learning in early childhood and elementary education, the role of teacher as researcher/inquirer, and the ways in which sociocultural pedagogies interface with standard-based education. Prereq: Admission to major or M.Ed. Not open to students with credit for 723.				
5124	Early Childhood and Elementary Inclusive Pedagogy	U G	3		
	This course explores sociocultural perspectives as the primary framework for understanding a social constructivist approach to learning and teaching in early childhood education. This course draws on the original sociocultural learning theory of Lev Vygotsky. This approach to teaching supports a diverse community of learners and is one in which sociocultural pedagogies interface with standards. Cross-listed in ESSpEd.				
5125	Redefining Roles: Investigating Reggio-inspired Practice	U G	3		
	Students are introduced to foundational principles of the Reggio Emilia approach for children from infancy-elementary years. Using these tenets, students will develop a theory of how Reggio principles interface with teaching and learning within an American context, emphasizing the reexamination of teacher roles and the learner through an inquiry-based approach.				
5129	Teaching and Learning of Science in Grades Pre K - 5	U G	3		
	This course is designed to prepare early childhood teacher candidates to teach PreK-5 students science. Prereq: Enrollment in Education major or Master of Education.				
5137	Teaching and Learning of Social Studies Grades Pre-K - 3	U G	3		
	Designed to provide opportunities to examine interesting and effective social studies content knowledge, cultural understandings, and pedagogies for the early childhood learner within global contexts. Prereq: Not open to students with credit for 737.				
5174	Family Participation in Early Childhood School Programs	U G	3		
	The purposes and importance of family involvement in early childhood school programs, types of programs, resources, methods, and curricula. Prereq: Education pre-major or admission to licensure program.				
5189.01	Planned Field Experience: Early Childhood	U G	1 - 15		
	Planned field experience under supervision in a PK-5th grade classroom. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.02	Field Experience: Middle Childhood	U G	1 - 15		
	Planned field experience under supervision in a 4th-9th grade classroom. Prereq: Enrollment in Master of Education program, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.03	Field Experience: Integrated Language Arts & Social Studies	U G	1 - 15		
	Planned field experience under supervision in a ILA or ISS 7th-12th grade classroom. Prereq: Enrollment in Master of Education program, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.04	Field Experience: Social Studies	U G	1 - 15		
	Planned field experience under supervision in an Integrated Social Studies 7th-12th grade classroom. Prereq: Admission to Integrated Social Studies MEd program. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.05	Planned Field Experience: Visual Impairment	U G	1 - 15		
	Planned field experience for Visual Impairment license. Prereq: Enrollment in Master of Education VI or TVI program, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.06	Field Experience: TESOL or World Language	U G	1 - 15		
	Planned field experience under supervision in TESOL or World Language Classroom. Prereq: Enrollment in Master of Education program, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.07	Field Experience: STEM	U G	1 - 15		
	Planned field experience under supervision in STEM 7th-12th grade classroom. Prereq: Enrollment in Master of Education program, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5189.11	Field Experience: Early Childhood Generalist Endorsement	U G	1		
	This field experience is designed to provide an opportunity to work with a mentor teacher to gain insight into: best practices in lesson planning, teaching, and classroom management; student learning, interests, and perspectives; how to effectively implement methods and pedagogical approaches specific to grades 4 & 5 for the ECG endorsement. Prereq: Enrollment in the Early Childhood Generalist endorsement program, or Jr or Sr standing in BSEd in ECE.				
5189.22	Field Experience: Middle Childhood Generalist Endorsement	U G	1		
	This field experience is designed to provide an opportunity to work with a mentor teacher to gain insight into: best practices in lesson planning, teaching, and classroom management; student learning, interests, and perspectives; how to effectively implement methods and pedagogical approaches specific to grades 4-6 grade MCG content areas. Prereq: Enrollment in the Middle Childhood Generalist endorsement program, or Jr or Sr standing in BSEd in MCE.				
5189.33	Field Experience Bilingual Endorsement	U G	1 - 3		
	Opportunity to work with a mentor teacher to gain insight into best practices in lesson planning, teaching, and classroom management; student learning, interests, and perspectives; how to effectively implement methods and pedagogical approaches specific to bilingual students and bilingual, dual language, and/or immersion classrooms. Prereq: Enrollment in the Bilingual Endorsement program. Prereq or concur: 5303.				
5189.66	Planned Field Experience: TESOL	U G	1 - 15		
	This course comprises and complements the field experience in which students in the TESOL endorsement are required to take part. The course is used primarily as a place where students can reflect upon and discuss what they have observed in their field experience with LEP students. Prereq: Enrollment in Grad-level TESOL Endorsement, and permission of instructor. Repeatable to a maximum of 30 cr hrs or 4 completions.				
5191	Orientation and Mobility Internship	U G	4		
	This internship requires direct O&M assessment, planning and instruction of a variety of students within at least one setting (e.g., private agency, state school for the blind, and/or a VA Blind Rehabilitation Center) under the supervision of a COMS. Students must complete all other program requirements prior to entering internship. Students must also complete at least 100 documented hours of field experience (supervised observation, co-teaching, and direct instruction) prior to beginning the O&M Internship. Prereq: Admission to the Orientation and Mobility program.				
5191.01	Supervised Student Teaching Internship: Early Childhood Education	U G	3 - 15		
	Student teaching is designed to assess and support preservice preK-3rd grade teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to Early Childhood Education major or MEd program. Repeatable to a maximum of 30 cr hrs or 2 completions.				
5191.02	Supervised Student Teaching Internship: Middle Childhood Education	U G	3 - 15		
	Student teaching is designed to assess and support preservice 4th-9th grade teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to Middle Childhood Education Major or MEd program. Repeatable to a maximum 30 cr hrs or 2 completions.				
5191.03	Supervised Student Teaching Internship: English Language Education	U G	3 - 15		
	Student teaching is designed to assess and support preservice 7-12 grade teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to English Language Arts Education Major or MEd program. Repeatable to a maximum of 30 cr hrs or 2 completions.				
5191.04	Supervised Student Teaching Internship: Integrated Social Studies	U G	3 - 15		
	Student teaching is designed to assess and support preservice 7-12 grade teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to Integrated Social Studies MEd program. Repeatable to a maximum of 30 cr hrs or 2 completions.				

Education: Teaching and Learning 141

5191.05 Supervised Student Teaching Internship: Visual Impairment U G 3 - 15

Student teaching is designed to assess and support preservice visual impairment teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to Early Childhood Education Major with Visual Impairment specialization, Grad non-degree visual impairment licensure only program, MA in Sensory Impairment program, or MEd program in Visual Impairment. Repeatable to a maximum of 30 cr hrs or 2 completions.

5191.06 Supervised Student Teaching Internship: World Language Education U G 3 - 15

Student teaching is designed to assess and support preservice World Language teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to World Language Education Major or MEd program. Repeatable to a maximum of 30 cr hrs or 2 completions.

5191.07 Supervised Student Teaching Internship: STEM Education U G 3 - 15

Student teaching is designed to assess and support preservice STEM, 7-12th grade teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to STEM Education Major or MEd program. Repeatable to a maximum of 30 cr hrs or 2 completions.

5191.08 Supervised Student Teaching Internship: TESOL U G 3 - 15

Student teaching is designed to assess and support preservice TESOL teachers as they develop the necessary knowledge, skills, and dispositions required for beginning level teachers. Prereq: Admission to TESOL Major. Repeatable to a maximum of 30 cr hrs or 2 completions.

5195.01 Reflective Seminar: Early Childhood Education U G 1 - 4

This course serves as the place for mediating learning & applying it to the practical. You will engage in reading, discussion, & reflection to develop your understanding of the relationship between what you learn in the university classroom & what you experience in the elementary classroom. Prereq: Admission to Early Childhood Education Major or MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.02 Reflective Seminar: Middle Childhood Education U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to Middle Childhood Education Major or MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.03 Reflective Seminar: English Language Education U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to English Language Arts Education Major or MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.04 Reflective Seminar: integrated Social Studies U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to Integrated Social Studies MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.05 Reflective Seminar: Visual Impairment U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to Early Childhood Education Major with Visual Impairment specialization, Grad non-degree visual impairment licensure only program, MA in Sensory Impairment program, or MEd program in Visual Impairment. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.06 Reflective Seminar: World Language Education U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to World Language Education Major or MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.07 Reflective Seminar: STEM Education U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to STEM Education Major or MEd program. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.08 Reflective Seminar: TESOL U G 1 - 4

Reflective Seminar is part one of a 3-part seminar that takes place over the course of 3 semesters. This course includes what is often viewed as the more traditional 'science' of teacher preparation. Prereq: Admission to TESOL Major. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5195.09 Reflective Seminar: Child and Youth Studies U G 1 - 4

This course is designed to assess and support student in their final year as they develop the necessary knowledge, skills, and dispositions required for entry level education professionals. Prereq: Admission to Child and Youth Studies Major. Repeatable to a maximum of 10 cr hrs or 5 completions. This course is graded S/U.

5220 Foundations of Middle Childhood Teaching and Learning U G 3

Introduces the foundations and major concerns in middle childhood education using contemporary research, scholarship, and practice, and exploring traditional and newer course materials. Prereq: Advanced Major in Middle Childhood Education.

5225 Diverse Literature and Comprehension - Elementary-Middle Education U G 3

Meets state requirements for understanding theory and methods linking the teachers' understanding of diverse literature with comprehension theory and practice and the related construction of literate environments.

5226 Composing Print + Digital Multimodal Texts U G 3

This course focuses on interactive, creative, critical, dialogic approaches for teaching and learning composing in both print and digital multimodal formats, and is particularly applicable to early and middle childhood classrooms.

5230 Language Arts Methods for Preservice Middle Childhood Teachers U G 3

Preservice teachers study methods for teaching middle childhood students' reading and writing. They explore the significance of students' interests, language, and communities to their knowledge and meaning-making of the Language Arts. Prereq: Not open to students with credit for 706.

5270 Mathematics Methods for Preservice Middle Childhood Teachers U G 3

Preservice teachers study methods for teaching middle childhood mathematics. These methods include instruction, assessment, and learning theory to support the teaching and learning of mathematics in grades 4 through 9.

5275 Science Methods for Preservice Middle Childhood Teachers U G 3

This course provides future middle childhood science teachers with the skills, knowledge, and resources for providing quality learning experiences for all students. Course activities will focus on the preparation and implementation of inquiry-based instruction. This course will also cover issues such as styles of inquiry, standards-based teaching, lesson planning, assessment, and differentiation.

5280 Social Studies Methods for Preservice Middle Childhood Teachers U G 3

Preservice teachers study planning, teaching and assessing of students' learning of social studies education, emphasizing the value of using effective and diverse teaching strategies and meaningful learning activities appropriate for grades 4-9. Prereq: Not open to students with credit for 738.

5281 Development of 4th and 5th Grade Learners Across the Curriculum U G 3

Aids students in acquiring a working understanding of the physical, cognitive and language development of the children in 4th/5th grades. Prereq: 3160 or HDFS 2410, and EduTL 3189, 4189, or 5189; or Grad standing.

5282 The Social Transitions of 4th and 5th Grade Learners U G 3

Focuses on the social and emotional development of the early adolescent in society, home and in the classroom setting. Prereq: 3160 or HDFS 2410, and EduTL 3189, 4189, or 5189; or Grad standing.

5283 Teaching Mathematics, Science and Culture in 4th and 5th Grades U G 3

Related to teaching mathematics and science with consideration of pedagogy, content, assessment and equity. Prereq: 5108 and 5129; or Grad standing.

5284 Integrating Language Arts and Social Studies in 4th and 5th Grades U G 3

Related to the integration of LA/SS. The focus is on curriculum, pedagogy, and integration specific to 4th/5th grades. Prereq: 5102, 5137, and 5339; or Grad standing.

5301 Foundations of Bilingual Education U G 3

This course will provide a space to discuss and deconstruct the history, theoretical foundations, and practices of bilingual education in the United States, with a particular focus on the experiences of immigrant children. Participants will explore the definitions and characteristics of bilingual education, including its historical, political, legal, and ideological foundations.

5330 LGBTQ+-themed Literature for Children and Young Adults U G 3

This course focuses on children and young adult literature that represents the diversity of lesbian, gay, bisexual, transgender, queer, and other non-heterosexual and non-cisgender people across social dimensions defined by race, class, religion, and nationality, among others. It takes a historical view before focusing closely.

5339 Evaluation and Instructional Decision-Making in Literacy U G 3

Assessment instruments and processes to determine students' abilities and needs and instructional strategies to meet those needs as useful to early and/or middle childhood teachers are explored. Prereq: 5469, and enrollment in a B.S. Ed. major or Master of Education program. Not open to students with credit for 705 or 739.

5341 Journalism and New Media in the 7-12 Classroom U G 3

Designed for pre-service teachers who plan to teach school newspaper, yearbook, broadcast and news media in middle school or high school (grades 7-12).

142 Education: Teaching and Learning

5345 Teacher Inquiry & Methods: Writing U G 3

Designed to assist students to understand writing development to develop process-oriented approaches to writing instruction. Prereq: Admission to the Teaching & Learning B.S.Ed. or M.Ed. program. Not open to students with credit for 645.

5346 Teacher Inquiry & Methods: Literature U G 3

Designed to assist students in learning about literary understanding and in developing pedagogical content knowledge for teaching environment-oriented approaches to literature instruction. Laboratory experience required. Prereq: Admission to B.S.Ed., M.Ed., EHE major, or permission of instructor. Not open to students with credit for 646.

5362 Roots of Fantasy U G 3

A study of selected works of fantasy for children grades 4-9 along with their source in traditional literature; works based on Greek and Arthurian legends, the Welsh Mabinogion and other folklore. Prereq: Not open to students with credit for 862.

5365 Linguistics for Literacy Education U G 3

This is an introduction to educational linguistics. Through exploration of linguistic concepts and their relevance to teaching, learning, and literacy, students develop new ways of seeing and supporting students' development as skilled language users. Prereq: Not open to students with credit for 665.

5442 Teaching Reading Across the Curriculum U G 3

Provides the knowledge and tools needed to support the developmental reading and literacy skills for students seeking licensure in AYA (7-12), multi-age and Voc Ed programs. Laboratory experience required. Prereq: Admission to B.S.Ed., M.Ed., EHE major, Agriscience Ed major, or permission of instructor.

5453 Critical Literacy in Content Area Classrooms U G 3

Teaches teachers to provide the support many students need throughout their schooling to develop their literacy skills in content areas; recognizing that learning the discourses of various fields and genres is a life-long endeavor. Prereq: Not open to students with credit for 853.

5455 Hip-hop Literacies U G 3

Combines the study of Hip-hop Based Education and new literacy studies. Students will investigate Hip-hop cultural arts and discourses of everyday life as a form of culturally relevant teaching and learning.

5468 Foundations of Reading and Literacy U G 3

Introduction to the theories and practices of teaching and learning of literacy for children in early and middle childhood. Major themes of the course are a child-centered philosophy of literacy instruction and diversity awareness - the need for teachers to be aware of the diversity of backgrounds and abilities that children bring to the classroom and of strategies for dealing with that diversity.

5469 Language and Word Study for All Learners U G 3

This course provides a detailed examination of the ways that oral and written languages work and how this supports development of English word reading and spelling skills for learners who are monolingual speakers of Standard English as well as those who speak other languages and varieties of English. Prereq: 5468.

5470 Assessment and Instruction for Struggling Readers U G 3

Provides an introduction to theories, assessments, and instructional practices that effectively address the literacy needs of struggling and at-risk readers. Laboratory experience required. Prereq: 5468 and 5469, or permission of instructor.

5471 Clinical Practice in Treating Reading Disabilities U G 3

Use of test materials in the diagnosis of reading disabilities; practice with remedial procedures. Prereq: 5470, or permission of instructor. Not open to students with credit for 671. Repeatable to a maximum of 6 cr hrs.

5501 Inclusion: Philosophical, Social, and Practice Issues: General Student Body U G 3

Philosophical, social, and practice issues related to the inclusion of students with disabilities in the P-12 general education classroom. Prereq: Not open to students with credit for 809.07.

5505 Multi-Tiered Systems of Support U G 3

Introduces students to the concept of multi-tiered systems of support. Emphasis on 1) strategies for assessing and teaching social skills to diverse learners in inclusive classrooms; 2) designing and implementing multi-tiered instructions within Response-to-Intervention Model; 3) collaborative differentiated instruction for whole class, small group, one-on-one teaching. Prereq: 5501 or ESSpED 5650. Cross-listed in ESSpED.

5506 Reading and Writing Braille U G 3

This course provides future teachers of the visually impaired an efficient, learn-by-doing experience to attain mastery of the literary braille code and to develop positive attitudes toward this valuable medium. The essential features and rules of usage of the braille code as published in The Rules of Unified English Braille (UEB), 2nd Edition (2013) are presented. Prereq: Not open to students with credit for 6505 or 833.

5507 Visual Processes U G 3

Introduces students to the historical foundations, laws, and regulations that affect students with visual impairments. Students will also learn about anatomy and physiology of the eye, diseases, disorders, and eye specialists' reports.

5508 Modes of Communication and Instructional Materials for Students with Visual Disabilities U G 1

Continuation of the examination of expressive modes of written communication with a focus on the Nemeth Code for mathematics and science. Knowledge of teaching strategies for mathematics is also studied. Prereq: 6505 or 5505. Not open to students with credit for 6506.

5510 Basics of Orientation and Mobility U G 2

Presents an overview of the major historical events, mobility systems, resources, accessibility, safety, and roles of the O&M provider. Basic O&M techniques and instructional strategies are also provided.

5521 Co-Teaching and Co-Planning in the Inclusive Classroom U G 3

This three-credit hour course will examine the co-teaching and co-planning process across subject matter and disciplines such as general education and special education. Students will learn the approaches to co-teaching and co-planning, critically analyze the roles and responsibilities of each team member in the process, and contextually analyze leadership roles within the process.

5525 Curriculum and Instruction for Students with Visual Impairments and Multiple Disabilities U G 3

Introduces individuals to principles of curricular and instructional design for all children with visual impairments (K-12). Adaptations and modifications, especially for the general education curriculum, are emphasized. Prereq: Not open to students with credit for 6501 or 747.

5529 Introduction to Visual Impairments U G 1

This course explores theories and practices that connect relationships between general and special education needs of students with visual impairments, highlighting the use of a merged model of collaboration within learning environments. Coursework addresses an overview of services for students with visual impairments, including an emphasis on impact of vision loss.

5530 Professional Development in the Field of Visual Impairment U G 3

Designed to allow the student to develop knowledge and skills in adaptive technology, early childhood intervention, and issues that are unique to the field of visual impairments. Prereq: 5506, 5507, or 6507.

5600 Language as a Resource: The Functions of Language in Teaching and Learning U G 3

The functions of language in teaching, learning, and schooling in general can reveal the underlying features of language use in these contexts. Whether in content-area literacy, Bilingual Education, Teaching English to Speakers of Other Languages (TESOL), or World Language Education, this course explores the language choices available based on the particular context in which language is used. Prereq: Enrollment in the appropriate Foreign, Second and Multilingual Language Education program.

5610 Literacy Development for Multilingual Learners U G 3

Research, theories, and practices linking second language acquisition and methods of teaching reading, writing, listening, speaking and grammar in ESL and EFL classrooms. Prereq: Admission to an undergraduate, graduate, or graduate non-degree program.

5612 Methods for K-12 World Language Education U G 3

Theory and practice of teaching world language in secondary (middle and high school) classrooms; use and preparation of instructional materials current theory and practice in world language teaching, learning, and assessment. Meets concurrently with 5613. Prereq: Enrollment in Foreign Language B.S. Ed. or Master in Education program.

5613 Core Practices in World Language Education U G 3

This course will present theory and practice of teaching world language in beginning classes, based on current research on a practice-based approach to learning to teach focused on core practices. Teacher candidates will apply the practices studied in their field-based experience in the P-12 classroom, as preparation for the student teaching experience. Prereq: Enrollment in World Language B.S. Ed. or M. Ed. program, or enrollment in Graduate Certificate in Core Practices in World Language Education.

5615 Methods and Culture in TESOL U G 3

Study of the use of new instructional materials for intermediate and advanced TESOL classes; teaching of reading, writing, literature, and culture; evaluation.

5616 Core Practices for World Language Assessment U G 3

This course familiarizes students with current theory, standards, principles and practices of world language assessment. An understanding of the World-Readiness Standards for Language Learning is necessary for this course, since we will build up on this foundational knowledge to design formative and summative performance assessments using backward design.

5618 Advanced Core Practices in World Language Education U G 3

As the final course in the Graduate Certificate Program in Core Practices in World Language Education, this course caps participants' repertoire of core practices addressed in the certificate program.

5620 Language Acquisition in Multilingual Learners U G 3

Studies of the theories underlying the teaching and learning of English as a second language and bilingual education: analyses of curricular designs and innovative programs.

5640 Instructional Planning and Advocacy for Multilingual Learners U G 3

The development of syllabi and materials for language courses in alignment with theories of second language learning. Prereq: Enrollment in Education major or Master in Education program.

5645 Core Practices in Language Assessment U G 3

Focuses on theories, models, and techniques associated with second language students' learning and language proficiency with the aim of preparing students to critique established testing procedures and develop their own assessment instruments.

5700 Training in Informal Science Outreach U G 3

Provides students with hands-on training in informal science education at the COSI museum. All students will learn to provide outreach education at the museum; advanced students will develop outreach materials, assist in the visible research operations, and mentor other students. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs. Cross-listed in Psych and Ling.

5711 Methods in Teaching STEM Secondary Mathematics I U G 3

Increase pedagogical content knowledge of number and probability concepts as appropriate for secondary students. Concepts such as ratio, fractions, decimals, percents, proportionality, data analysis and probability will be included. Prereq: Admission to major or M.Ed. Not open to students with credit for 621 and 749.

5712 Methods in Teaching STEM Secondary Mathematics II U G 3

Pedagogical content knowledge of geometry and measurement as appropriate for Grades 7-12. Concepts such as similarity, transformations, representations, justification, and spatial reasoning will be included. Prereq: Admission to the STEM major or M.Ed. Not open to students with credit for 749.01.

5721 Methods in Teaching STEM Secondary Science: I U G 3

Preservice science teachers are introduced to the principles of safe scientific inquiry through activity-based lessons for grades 7-12. Microteaching experiences offer opportunities for students to develop and present science lessons. Prereq: Enrollment to Education major or Master in Education program. Not open to students with credit for 636.01.

5722 Methods in Teaching STEM Secondary Science II U G 3

The nature of science is viewed from scientific, philosophical, sociological, and historical perspectives. Ideas fundamental to all science fields such as observation, inference, inquiry, hypothesis testing, models, theories, and laws are addressed. Prereq: Enrollment to Education major or Master in Education program.

5741 Learning, Cognition, and Teaching in STEM Education U G 3

Cognitive development, cognition and affect in the learning of STEM subjects with implications for teaching in secondary school STEM.

5744 Technologies Used in STEM U G 1½

This course addresses the role and scope of educational technology for standards-based STEM instruction. Students will explore areas in which mathematics education, science education, and technology and engineering education can effectively use educational technology in a pedagogically sound manner.

5745 Assessment in STEM I: Introduction U G 1½

Explores how prior knowledge and reasoning strategies impact meaningful learning in STEM fields. Discussions of assessment design and evaluation are framed within a value-added model of STEM teaching and learning. Prereq: Admission to major or M.Ed.

5798 Study Tour U G 1 - 3

Specific content, location, terms of offering, and prerequisites vary; contact school office for details. Repeatable to different titled study tours only. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 12 completions.

5808 Social Studies Methods I U G 3 - 4

Integrates methods of teaching social studies with daily field experiences to effect authentic teaching and learning for preservice teachers. Prereq: Admission to MEd program and completion of content courses.

5809 Social Studies Methods II U G 3

Focuses on lesson/unit planning with an emphasis on authentic learning, higher level thinking skills, global and multicultural perspectives, active learning strategies, and performance-based assessment. Prereq: Enrollment in Master of Education program and completion of content courses. Not open to students with credit for 639.

5892 Workshop U G 1 - 4

Intensive study of a problem common to the participants for the purpose of developing sound principles and practices relating to it. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 12 completions.

5901 Introduction to Academic Writing for Multilingual Graduate Students U G 3

Provides English language learners with extensive field-specific writing practice, with an emphasis on academic writing conventions, grammatical accuracy, and syntactic complexity. Intended for graduate students. Prereq: Grad standing, and placement test score of 5901.

5902 Advanced Academic Writing for Multilingual Graduate Students U G 3

Attention given to various practices involving reading and source-based writing. Rhetorical and linguistic issues addressed. Writing about and presenting research findings in specific disciplines. Prereq: A grade of D or above in 5901, or placement test score of 5902; and Grad standing.

5992 Special Topics in Education U G 1 - 3

Special topics focused on education. Repeatable to a maximum of 12 or hrs or 4 completions.

6050 Multiple Perspectives on Teaching and Learning: MA G 3 - 4

Investigates diverse ways of conceptualizing cognitive development and its relationship to learning and teaching and examine specific factors such as the development of memory, attention, problem solving, and specific academic skills. Prereq: Not open to students with credit for 871.

6052 Classroom-Based Inquiry: MA G 1 - 4

Focuses on the history and evolving status of classroom-based inquiry and teacher action research. Students will develop a proposal for a classroom-based inquiry project, and will practice collecting and analyzing data and summarizing findings. Repeatable to a maximum of 4 or hrs or 2 completions.

6053 Balanced Assessment for Teaching and Learning G 3

Organized to follow the conceptualization, design, and implementation of a balanced, coordinated approach to formative instructional and assessment practices.

6101 Dramatic Inquiry Across the Curriculum G 3

Using drama to extend inquiry-based learning in literacy and content areas. Repeatable to a maximum of 6 or hrs.

6189 O&M Field Placement G 1

This one (1) hour graduate level course includes field experience requirements for students enrolled in the O&M Program. Prereq: Enrollment in the Orientation and Mobility licensure program.

6301 Exploring Language and Learning in Classrooms G 3

Introduction to the use of discourse analysis in classroom instruction. Focus on principles, practices, analysis of instructional conversations, and implications for enhancing student learning. The course engages students in conducting discourse analyses of their own classrooms. Students must currently be teaching or co-teaching in a classroom and be able to video record events in that classroom. Prereq: Enrollment in either M.A or M.Ed programs; or permission of instructor. Repeatable to a maximum of 6 or hrs.

6302 Teaching Digital Composition in Elementary and Secondary Classrooms G 3

Intended for elementary and secondary in-service teachers who want to explore and improve their students use of digital composition. The course emphasizes teachers using digital composition themselves as well as design of instruction for promoting students' use of digital composition. Prereq: 7393, or permission of instructor. Repeatable to a maximum of 6 or hrs.

6303 Linguistic Diversity in Education G 3

An introduction to linguistic diversity; how it relates to cultural diversity; how linguistic/cultural diversity shapes teaching and learning in educational settings; & what research says about effective instruction. Prereq: Not open to students with credit for 703.07.

6350 Graphic Novels for Youth and Social Change G 3

This course will examine how book-length comics for young people engage with socio-political issues related to diversity, equity, and inclusion. Students will consider a wide array of different literary schools and narrative styles of graphic narratives about social justice, including fiction, nonfiction, and memoir.

6510 Orientation and Mobility Intermediate Seminar G 3

Introduces a view of the history of the profession of orientation and mobility. It provides students with a foundation of understanding the process of planning, skill assessment, goal-setting, and designing and sequencing O&M programs. Prereq: 5510 and 5507.

6511 Orientation and Mobility Advanced Seminar G 3

Presents important background information for Orientation and Mobility practitioners upon which techniques for instruction may be based. Unique characteristics of environments and principles for accessing them are presented. Prereq: 6510.

6512 Orientation and Mobility Special Topics Seminar G 2

Highlights strategies for adaptations for early childhood and geriatric populations in the area of orientation and mobility. Considerations encountered in working with both types of populations explored. Prereq: 6511.

6520 Orientation and Mobility Techniques and Methods I G 2

Covers introduction of the long cane, adaptive mobility devices, indoor travel, indoor orientation skills, route travel and residential travel skills. Practical instruction under a blindfold is a major component. Prereq: 5510 and 5507.

6521 Orientation and Mobility Techniques and Methods II G 2

This hands-on course covers O&M techniques and methods for business areas, special travel environments, and public transportation. Practical skill instruction under blindfold is a major component of this course. Prereq: 6520.

144 Education: Teaching and Learning

6600 Language as a Resource: Function of Language in Research and Practice G 3

The functions of language in teaching, learning, and schooling in general can reveal the underlying features of language use in these contexts. Whether in content-area literacy, Bilingual Education, Teaching English to Speakers of Other Languages (TESOL), or World Language Education, this course explores the application of SFL to understand language use in classroom and community-based research. Prereq: Enrollment in the appropriate Foreign, Second and Multilingual Language Education program.

6808 Critical and Cultural Perspectives in Teaching and Learning G 3 - 4

Examines knowledge, pedagogy, reforms, and resources that support education for cultural diversity and equity in an interconnected world.

6890 M.Ed Capstone Seminar G 3

Seminar to prepare M.Ed students for the comprehensive written examination or approved alternative. Prereq: Not open to students with credit for 926.

6892 Special Topics in Education G 1 - 4

Special topics for professional educators and graduate students; designed to provide the opportunity to update professional skills and review current research developments. Repeatable to a maximum of 16 cr hrs or 16 completions. This course is graded S/U.

6911 Writing for Coursework for International and 2nd Language Graduate Students G 2

Guidance and practice with writing in various genres essential to an academic career-essays, reviews, reports-the kind of writing required in grad-level coursework and end-of-term and comp. Tutorial time arranged. Intended for international graduate students. Prereq: 5902, or qualified status; and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

6912 Research Writing for International and 2nd Language Graduate Students G 2

Designed to help international graduate students in preparing a conference paper and in preparing a manuscript for publication. Prereq: 5902, or qualified status; and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

6913 Thesis Proposal and Dissertation Writing for International and 2nd Language Graduate Students G 2

Assist international graduate students in writing their thesis, dissertation, or thesis/dissertation proposal. Tutorial time arranged. Intended for international graduate students. Prereq: 5902 (508), or qualified status; and permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7008 Sociocultural Studies of Teaching and Teacher Education G 3

A sociocultural look at ways teaching as a profession has been shaped by history, culture, gender; multiple agendas for teacher education; structure of current practice; different programs of reform; studies of teacher education.

7010 Diverse Approaches to Research on Teaching and Learning G 3 - 4

Explores the wide range of teaching and learning research genres; including multiple forms of statistical (quantitative), ethnographic (qualitative), historical and theoretical scholarship on teaching and learning. Prereq: Not open to students with credit for 842.

7014 Epistemologies and Theories of Race, Justice, & Equity in Education G 3

Examine and focus in depth on various critical epistemologies, theories, and assumptions and the relationships between them and the pursuit of social justice.

7015 Curricular Approaches to Studies of Race, Justice & Equity in Education G 3

Provides an overview of curricular approaches in MESE drawn from local, national and global scholarship and contexts. Students examine a variety of curricular approaches towards social justice and activist praxis in education.

7016 Critical Social Theory and Analyses of Power in Education G 3

Introduces students to a social and cultural critique of education and society. Additionally, the nature of power will be examined and the way that social groups position themselves in such relations.

7025 Culturally Relevant and Sustaining Pedagogies G 3

Focuses on the research that informs culturally relevant pedagogy.

7030 Transnational Issues and Approaches to Education G 3

The course will address transnational issues and approaches to education and what theories, practices, and processes are made visible when we center non-Western non-US perspectives. Prereq: Grad standing.

7035 Teaching and Research for Social Justice G 3

An exploration into economic, political, technological and ecological components of multicultural education as it relates to diversity and social justice.

7075 Disabilities in Education G 3

This three-credit graduate course for both MA and Ph.D. students will examine the historical nature of disabilities in society and in particular in the education system, the foundation of public laws to benefit persons with disabilities, the family- community connection for students with disabilities, and current critical issues for students with disabilities in classrooms.

7169 Children's Social Development and the Social World of the Classroom G 3

Emphasizes children's social development through the understanding of children's social worlds including the phenomenon of their play from the early through the middle school years.

7170 Rethinking Early Childhood and Elementary Education: The Politics of Childhood G 3

Examination of important classical and contemporary research concerning young children with a focus on the preschool-early elementary years.

7189 Advanced Field Placement G 1 - 12

Field or research experience in a P-12 school, higher education or other educational setting, agency, or cross-cultural settings. Repeatable to a maximum of 20 cr hrs or 4 completions. This course is graded S/U.

7193 Individual Studies G 1 - 15

Individual study projects. For thesis option, not more than 12 cr hrs will apply toward the master's degree. For non-thesis option, not more than 15 cr hrs will apply. Not more than 20 cr hrs will apply toward the doctoral degree. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 20 completions. This course is graded S/U.

7194 Group Studies G 1 - 3

Group studies on special problems in education. Repeatable to a maximum of 12 cr hrs or 12 completions.

7306 Language Socialization G 3

Introduces the field of language socialization, providing theoretical, conceptual and methodological frameworks for research on linguistic and social development, teaching, and learning in various contexts. Prereq: Not open to students with credit for 906.

7308 Literary Experience and Understanding: Readers, Texts and Contexts G 3

Examines historical and current research on the interrelationships among children's and young adults' literary experiences, understanding, qualities of literary genres and formats, and reading in educational contexts. Prereq: Not open to students with credit for 908.

7316 Language Arts in the Early and Middle Childhood Program G 3

Process and support for language development in the early years. Problems, research, and current teaching method in the major areas of language arts: listening, speaking, reading, writing, viewing, and constructing images. Prereq: Not open to students with credit for 860.

7317 Advanced Children's Literature G 3

An evaluation of the changing role of children's literature in the education of children and youth; emphasis on identifying quality selections developmentally appropriate books. Prereq: Not open to students with credit for 817.

7322 Literature Across the Curriculum G 3

Children's Literature for grades K- 8 as it contributes to social studies, the sciences, language arts, and the creative arts: emphasis on identifying quality selections in genre of nonfiction, and on planning related to learning experiences. Prereq: Not open to students with credit for 722.

7324 Literary Theory and Adolescent Literature G 3

Explores the application of diverse theories to young adult literature for in-depth literary study in secondary classrooms. Prereq: Not open to students with credit for 923.

7341 Poetry for Children G 3

In-depth study of poetry for children including children's speech play & school yard rhymes, children's interests in poetry, forms of poetry & representative poets, classroom approaches for encouraging children's involvement & appreciation of poetry. Prereq: Grad standing.

7343 Literature in Middle Childhood Education G 3

Analysis and study of fiction and nonfiction for children age 8-14; emphasis on literary quality, strategies for classroom use and relevant issues. Prereq: Not open to students with credit for 843.

7344 Bilingualism and Biliteracy G 3

Explores research on bilingualism, bilingual communities, and bilingual education, as well as methods for studying bilingualism in social context. Issues are viewed from global perspective, especially language policies and language ideologies.

7348 Linguistic Diversity and Literacy: Varieties of English and Education G 3

Explores variation in English and its implications for literacy education, focusing on global Englishes, U.S. vernaculars, and English-based Creoles. Course considers use of research for school testing and for the teaching of Academic English.

7356 Advanced Literature for Adolescents G 3

An evaluation of literature for adolescents and the role it plays in the education of youth.

7361	Literature in Early Childhood Education	G	3
Analysis and study of fiction and nonfiction for children age 2-8; emphasis on the importance of early exposure to literature for language acquisition visual literacy, and cognitive and affective development. Prereq: Not open to students with credit for 861.			
7364	Multicultural Literature for Children and Young Adults	G	3
Focus on educational and interdisciplinary research concerned with selecting, analyzing, and discussing diverse children's and YA literature, created by historically marginalized authors and illustrators. Literature selections include the life experiences, histories, and fantastic visions representing LGBTQ, Native American, African American, Latinx, Asian American, and new immigrant experiences. Prereq: Not open to students with credit for 864.			
7371	Teaching Writing in the Secondary School	G	2 - 3
Designed to assist teachers' understanding of writing development and writing assessment in order to develop process-oriented approaches to writing instruction. Prereq: Not open to students with credit for 970.			
7374	Sociocultural Theory and Literacy Education and Research	G	3
Examines the core concepts of sociocultural theory, several branches of this work in education, and their implications for contemporary studies of literacy teaching and learning.			
7393	Teaching Writing	G	2 - 6
Serves as the Summer Institute of the Columbus Area Writing Project. It focuses on improving the teaching of writing for experienced teachers of all subject areas in grades K-16. Prereq: Not open to students with credit for 898.			
7418	Synthesizing Research in Reading and Literacy	G	3
Students gain an in-depth understanding of how to review, analyze, and synthesize research in reading and literacy. The focus is on the process of reviewing and synthesizing research (rather than on the content). Repeatable to a maximum of 6 cr hrs.			
7420	Teaching Literature for Engagement and Equity	G	3
Study of theory and arts-based practices in reading and literature education, that demonstrate how teachers can support readers' engagement with cross-cultural perspectives, social positioning, cultural identity and social justice.			
7427	Advanced Study of the Development of Reading and Writing	G	3
Designed to provide experienced teachers the opportunity to extend and update their knowledge of reading and writing development and the principles underlying effective reading and writing instruction in the early and late childhood years.			
7428	Trends and Issues in Teaching Reading	G	3
In-depth examination of major trends and issues in teaching reading in the elementary school including research over the last three decades and major issues and concerns currently debated among members of the literacy education profession. Prereq: Not open to students with credit for 828.			
7429	Reading Complex Texts	G	3
For elementary, middle, and secondary teachers who want to develop new multimodal approaches for challenging students to read with greater attention to details and deeper meaning, with a more difficult range of vocabulary and texts.			
7431	The Ethnography of Literacy and Language I	G	4
Introduces the ethnography of literacy and language as fields of inquiry, providing theoretical, conceptual and methodological frameworks for research on written and oral language practices that are embedded in various social, cultural, and political contexts. Prereq: Not open to students with credit for 905. This course is progress graded.			
7432	The Ethnography of Literacy and Language II	G	4
Building on the first course of this two-course sequence, this course provides students experience in doing their own research by focusing on data gathering, fieldwork issues, data analysis, and writing aspects of the ethnographic research process. Prereq: 7431 (905), or permission of instructor. Not open to students with credit for 925.10.			
7500	Teacher Leadership in Teaching Digital Writing	G	2
Prepares teachers and other educators to conceptualize and deliver teacher education for the integration of digital writing in K-12 classrooms. Through a series of face-to-face and online interactions, participants develop a portfolio of digital writing, a theoretical framework for the use of digital writing in instruction, and a research-based framework for professional development. Prereq: 7393, or permission of instructor.			
7625	Technology in Language Learning and Teaching	G	3
Intro to application of technology for multilingual language education research and pedagogy. Explore and discuss using technology to promote language learning and teaching, and methodological aspects of conducting research about Computer-Assisted Language Learning, Technology-Enhanced Language Learning, Web-Enhanced Language Learning, & Mobile-Assisted Language Learning. Suggested that students have prior or current experience learning and/or teaching additional languages using technology.			
7645	Research and Policy in Language Assessment	G	3
Focuses on theories and practices for testing and assessing the knowledge and skills of second language learners. Topics include constructing tests and assessments, validity, reliability, grading, and test score interpretation test scores. Prereq: Enrollment in a graduate program in T&L or graduate non-degree program.			

7701	Mathematics Teaching and Learning in Elementary and Middle Schools	G	3
Provides elementary or middle school teachers with skills and knowledge that will strengthen their teaching of mathematical content knowledge and process skills. Prereq: Not open to students with credit for 812.			
7705	Cognition and Socio-Cultural Issues in School Mathematics	G	2
To be successful educators, participants need to have knowledge of child development, child psychology, and influences on student learning such as cultural diversity, limited English proficiency, gender, and physical challenges. Prereq: Not open to students with credit for 721.01.			
7706	Science and Early Childhood Education	G	3
The nature, scope, and role of science experiences in the learning and development of young children; integration and application of current developments; theory and research in science with early childhood education. Prereq: Not open to students with credit for 852.			
7711	K-6 Number and Algebra	G	2
Students will understand concepts such as number, number sense, variable, and equality through an opportunity to learn at a deeper level and to examine instructional strategies to help children. Prereq: Not open to students with credit for 711.			
7712	K-6 Measurement and Geometry	G	2
Students will understand concepts such as spatial sense, units of measure, and work with two- and three-dimensional objects through an opportunity to learn at a deeper level and to examine instructional strategies to help children. Prereq: Not open to students with credit for 711.			
7713	K-6 Data Analysis and Probability	G	2
Students will understand concepts such as chance and possible outcomes and predicting events as likely or unlikely, and testing predictions, and representational skills to depict and analyze data sets. Prereq: Not open to students with credit for 711.			
7715	Learning Progressions in Mathematics Education	G	3
Examine the construction, use, and research on learning progressions in mathematics education. Prereq: Not open to students with credit for 742.			
7716	Conceptual and Procedural Knowledge in Mathematics Education: Theory, Research, and Controversy	G	3
Examine research on students' learning of conceptual and procedural knowledge. We will carefully examine the nature of each type of knowledge, how they are acquired, how they are used, and how they are related.			
7718	Student Learning Processes in Mathematics	G	3
Student cognition and learning. The topics of arithmetic, algebra and geometry will be used to explore issues of student thinking. We will investigate how the nature of these topics affect students' reasoning and problem solving and thinking. Prereq: Not open to students with credit for 802.05.			
7719	Providing Professional Development in Mathematics Education	G	2
Require teachers to develop a professional development program that will provide them the opportunity to implement and reflect upon this development as a final assessment of their endorsement. Prereq: Not open to students with credit for 714.			
7724	Teaching Evolution in Schools	G	3
Focuses on issues, alternative practices, and curricular approaches related to teaching evolution in public schools. Research, court cases, and policies related to the teaching of evolution are examined. Prereq: Coursework in Evolutionary Biology, or teaching licensure in life science; or permission of instructor.			
7725	The Nature of Science and Implications for Science Teaching	G	3
Focuses on the nature of science and scientific knowledge from philosophical, historical, and sociological perspectives, examines the implications for science teaching at all levels, with particular emphasis on K-12 public education. Prereq: Not open to students with credit for 877.			
7726	STEM Education in Informal Settings	G	3
Provides STEM educators with experiences to develop skills, content knowledge, professional knowledge, assessment strategies, and integration skills to maximize learning of all students in informal STEM settings. Prereq: Not open to students with credit for 880.			
7731	Multimedia Tools For STEM Education	G	3
Introduction to a wide variety of multimedia tools for use in STEM Education. The tools are constantly changing but some of the areas included are sensors, data collection, graphics, animation, presentation, audio, video, and multimedia authoring. Prereq: Not open to students with credit for 735. Repeatable to a maximum of 9 cr hrs.			
7732	Robotics and Automation for STEM Educators	G	3
An introduction to robotics and automation systems, their applications, and methods of teaching about and with them. Will include experiences related to the design, selection, set-up, and programming of robotic and automation systems.			
7741	Advanced Study of Learning and Cognition in STEM Education	G	3
Theories of learning and cognition as applied to learning, teaching and research in the STEM Education areas. Additional focus may be on affective issues. Prereq: Not open to students with credit for 721.			

146 Education: Teaching and Learning

7742 Knowledge Representations in STEM Learning G 3

Theory and classroom practices to promote various physical, visual, symbolic and mental representations of STEM knowledge structures.

7744 Problem Solving in STEM G 3

Help students gain a deeper understanding of the process of mathematical problem solving from an epistemological standpoint. Current theories and perspectives associated with teaching and learning problem solving will be studied. Prereq: Not open to students with credit for 802.04.

7745 Classroom Discourse in STEM Learning G 3

Theory and practice on discourse patterns in STEM classrooms, including speaking, reading and writing to learn STEM subject matter in schools or colleges. Prereq: Not open to students with credit for 802.

7749 History, Future, and Practical Applications of Concept Inventories in STEM Education G 3

Introduction to creation, validation, evaluation and application of concept inventories in STEM education; a gateway course for future academic career in both STEM and education. Prereq: Not open to students with credit for 610.

7999 Thesis Research G 1 - 15

Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 12 completions. This course is graded S/U.

8001 Discourse Analysis and Educational Research I G 4

Introduction to discourse analysis in educational research, theories, field work, data collection, analytic procedures including video and audio analysis, and ethics. First course of two course sequence. Prereq: Permission of instructor. 8001 and 8002 must be taken in the same academic year. Not open to students with credit for 933. Repeatable to a maximum of 8 cr hrs. This course is progress graded.

8002 Discourse Analysis and Educational Research II G 4

An in-depth exploration and application of discourse analysis theories and procedures for the analysis and interpretation of video, audio, and textual data collected in field-based educational research. This is the second course of two courses Prereq: Permission of instructor. 8001 and 8002 must be taken in the same academic year. Not open to students with credit for 934. Repeatable to a maximum of 8 cr hrs.

8003 Logics of Inquiry in Educational Research G 3

Examines how learning and teaching have been theorized and researched and provides an opportunity for students to begin conceptualizing their own studies. Emphasis is placed on teaching and learning as contextualized processes.

8004 Leadership for Reading Recovery Professionals G 3

Reading Recovery teacher leaders/trainers in training will acquire skills toward fulfilling their role as a literacy leader and advocate in the implementation of Reading Recovery. Master's Degree required, acceptance for Reading Recovery training, as well as advanced understanding of reading and writing processes and experience teaching school-aged children.

8005 Black Feminist Theories in Teaching and Learning G 3

An overview of classic theorists and texts related to Black feminist theories, the extent to which they inform teaching and learning and manifest as Black feminist pedagogies both in K-12 and higher education settings. Prereq: Doctoral level students only.

8006 Literacy Processing Theory for Reading Recovery Professionals G 3

The purpose of this course is for Reading Recovery professionals to develop a deep understanding of Marie Clay's Literacy Processing Theory, which is the foundation of the Reading Recovery intervention. A comprehensive investigation of the theory will be grounded in practice through close observation of young children as readers and writers. Master's Degree required, acceptance for Reading Recovery training, as well as advanced understanding of reading and writing processes and experience teaching school-aged children.

8010 Critical Discourse Analysis G 3

Explores perspectives on discourse analytical research that primarily studies the way social power abuse, dominance, and inequality are enacted, reproduced, and resisted by text and talk in social and political contexts. Prereq: Must have taken at least 1 PhD level course. Not open to students with credit for 933.

8015 Diversity and Equity in Education G 3

Provides an overview of the pervasive individual, epistemological, structural, systemic, and institutional dimensions and complexities of equity, diversity and multiculturalism.

8020 Critical Race Theory in Education G 3

Advanced doctoral seminar on Critical Race Theory and its application in education. Prereq: Not open to students with credit for 977.

8030 Case Study of Teaching and Learning G 3

Students will conduct an in-depth exploration of case study as a qualitative research methodology for examining language and literacy practices in everyday contexts, like classrooms. Students will examine the underlying assumptions of case study design and consider how case study might fit into a logic of inquiry that supports answering questions related to how teaching and learning are practiced. It is helpful if you have taken another qualitative research course, but not necessary. Prereq: Graduate standing.

8040 Professional Seminar for Doctoral Students in Teaching and Learning G 3

In this seminar, students will gain professional knowledge aimed at facilitating success within the doctoral program. Students will become acquainted with both the explicit and tacit expectations of doctoral study and acquire competencies that will support their continued development as scholars. Prereq: Not open to students with credit for 8420. Repeatable to a maximum of 9 cr hrs.

8095 Post-candidacy Qualitative Research Design & Analysis Seminar G 2 - 3

Seminar course for post-candidacy dissertators engaged in qualitative dissertation research. Throughout the course students will focus on methods of data collection, data analysis, and writing, primarily but not exclusively within the paradigms of qualitative, ethnographic, and/or discourse analytic research. The majority of the sessions will focus on students' own dissertation research. Prereq: - Doctoral students should be post-candidacy - Students should have completed at least 1 qualitative research course - Students should be conducting (or planning to conduct) a qualitative dissertation - Please check with your dissertation advisor prior to enrolling in the course to ensure she/he agrees that it would be beneficial for your dissertation work Repeatable to a maximum of 12 cr hrs or 4 completions.

8301 Perspectives on Literacies and English Language Arts G 3

Critical examination of trends and issues in research and theory on adolescent, post-secondary, and community literacies.

8306 African American Language and Literacies G 3

Examination of research and theory in African American language and literacies studies. Prereq: Credit for at least one Doctoral-level course. Not open to students with credit for 906.

8307 History of Children's and Young Adult Literature G 3

A seminar focusing on the history of American and English Children's literature from earliest times to the present. Prereq: Not open to students with credit for 907.

8313 Research and Theory in Written Composition G 3

Considers writing in variety of contexts-primary school, middle school, high school, college, and the larger community--from the perspective of research; broader issues of how attention to culture and context can provide more responsive instruction.

8334 Research Methods for Literature for Children and Young Adults G 4

Immerses students in the methodology, practice, and application of conducting academic research in the field of Literature for Children and Young Adults. The class will aid in their professionalization by having students explore an array of peer-reviewed journals, a variety of major national as well as international conferences, and current scholarly trends in the field.

8363 Sociolinguistics and Language Education G 3

Surveys foundational theories, issues, & methodologies in sociolinguistics. We examine how these theoretical insights & empirical approaches have been used to study & illuminate topics of concern to language education. Prereq: Not open to students with credit for 863.

8421 Guided Survey of Research in Reading G 3

Explores various investigations of reading and literacy. It examines major trends in reading/literacy research and exemplary studies that address major topics, including methodological issues, basic processes, and instructional practices. Prereq: Not open to students with credit for 921. Repeatable to a maximum of 6 cr hrs.

8425 Understanding Reading and Writing Development: From Novice to Conventional Processes G 3

Focuses on the young child as a learner and on the reading process itself. Explores and extends personal models of the reading process and grounds theory building in close observations of young children reading.

8426 Advanced Study in Reading Difficulties of Young Children G 3

Current thinking on reading and learning processes relative to young, low progress, "at risk" students, and seminal research and theories which have influenced the reading difficulties field will be related to students who are difficult to teach.

8427 Learning and Teaching Reading Comprehension G 3

Designed to provide doctoral students knowledge of the research on reading comprehension.

8610 Second Language Acquisition G 3

Provides an overview of theories and research in the field of second language acquisition (SLA). We examine the development of SLA as a field, exploring cognitive, linguistic, sociocultural, and critical research perspectives. Prereq: Not open to students with credit for 703.09.

8615 Research Methods for Educational Linguistics G 3

Aims to help doctoral students to understand the steps involved in designing a qualitative second-language (L2) research project, to critically evaluate published research, and to consider key issues in designing their own L2 study.

8617 Topics in Educational Linguistics G 3

Lecture and discussion course focused on current issues related to second language acquisition research. Prereq: 8610.

Education: Teaching and Learning 147

8620	Language Teacher Education	G	3
This course explores language teacher education over 30 years, considering evolving goals in relation to local and national language teaching priorities (e.g., Bilingual Education, TESOL). Theoretical frameworks and research methods used in investigating teacher learning will be examined, critically evaluating their relevance to evolving education priorities. Prereq: Grad admission as a foreign and 2nd lang ed program major or in an equiv. program related to global ed, multicultural ed, or a foreign language major in one of the OSU lang. dept (e.g., Spanish, German, Chinese).			
8635	Research on Second Language Reading and Writing	G	3
Explores research and research practices related to Second Language reading and writing. Prereq: Not open to students with credit for 960.			
8711	Current Issues and Trends in STEM Education	G	3
An introductory seminar for new STEM education doctoral students and other advanced graduate students seeking increased familiarity with STEM education research communities.			
8721	Advanced Study of Thinking, Learning, and Assessment in STEAM Education	G	3
Develop a deep, foundational knowledge of various theories and types of research on mathematical thinking and learning. Students will also develop knowledge of ways of assessing mathematical knowledge, thinking, and reasoning.			
8722	Advanced Study of Thinking, Learning, & Assessment in Science Education	G	3
Focuses on advanced skills and knowledge used to understand how thinking, learning, and assessment occur in science education programs. Prereq: Not open to students with credit for 938.27.			
8731	Teaching and Teacher Education in STEM Education	G	3
Students develop the knowledge and skills necessary to critically analyze reports of educational research, current thinking and perspectives, critical issues associated with science and mathematics teacher education and teacher preparation.			
8741	History of Curriculum in STEM Education	G	3
Familiarizes students with the changing curriculum in school mathematics. It will examine the history and evolution of K-16 STEM curricula in the United States with particular emphasis on the past century (1890 to 2010). Prereq: Not open to students with credit for 937.26.			
8742	History of Curriculum in Science Education	G	3
Focuses on the forces that have shaped the emergence of contemporary curriculum patterns in science education, with particular emphasis given to the trends, issues, and policies that have shaped science curriculum design and development. Prereq: Not open to students with credit for 937.27.			
8743	History of Curriculum in Technology/Engineering Education	G	3
The history of curriculum development in technology and engineering education from the elementary grades to the graduate level. Prereq: Not open to students with credit for 937.21.			
8751	Survey and Critical Analysis of Research in STEAM Education	G	3
Examines critical issues associated with conducting and analyzing research in STEM education including formulating and evaluating the following: research questions, methodologies, data collection instruments, and analysis techniques.			
8890	Advanced Seminar	G	1 - 4
Advanced graduate seminar focusing on educational scholarship. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 10 completions.			
8891	Exploring Whiteness	G	3
This is an intensive course that immerses students in the exploration of whiteness. It will foreground language and pay specific attention to how privilege and power influences identity around issues of race, ethnicity, class, gender, sexual orientation, and popular culture in various contexts.			
8998	Research Apprenticeship in Teaching and Learning	G	2 - 8
The process of researching teaching and learning are explored through working with a faculty member on an established research project. Prereq: Permission of PhD coordinator required. Repeatable to a maximum of 30 cr hrs or 15 completions. This course is graded S/U.			
8999	Research	G	1 - 15
Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 40 cr hrs or 12 completions. This course is graded S/U.			

Educational Studies

1500	Student Tech for Academic Success	U	3
This course is designed to help students with the transition from high school to college level academics by improving study skills, regulating academic behaviors and continuing personal development. This course is designed to promote your self-awareness. This hands-on, active-learning course will also teach students how to engage with mobile technology for academic advancement and organization. Prereq: Permission of instructor.			

2189S	First Education Experience Program (FEEP)	U	3 - 5
Provides opportunities for students to explore education as a possible career path via a combination of field and seminar requirements. Students spend time in local, public PreK-12 school-based settings, interacting with various professionals and students. GE service learning course.			
4998	Undergraduate Research: Educational Studies	U	1 - 3
Opportunity for undergraduate students to conduct mentored independent research on various topics related to educational studies. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
5189	First Education Experience Program (FEEP)	U G	3 - 5
The purpose of this course is to provide opportunities for students to explore education settings via a combination of field and seminar requirements and to reflect on how those experiences in this course intersect with the chosen career. The students will spend time in local preK-12 school settings, interacting with various professionals and students.			
5193	Individual Studies: Educational Studies	U G	1 - 15
Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.			
5194	Group Studies: Educational Studies	U G	1 - 15
Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
5777	Anti-racist, Culturally Responsive Education: Theories, Models, and Strategies	U G	3
This course focuses on cultural diversity/differences and the ways in which culture (related extensively to race and ethnicity) has been and continues to be defined and addressed in the American educational system (P-12 primarily, with attention to higher education). The fundamental course focus is the achievement gap (which has many other names, such as expectation and opportunity gap). Cross-Listed in ESSpEd 5777.			
5798.01	Study Tour: Domestic	U G	1 - 5
Specific content, location, semester(s) of offering, and prerequisites vary; contact department office for details. Repeatable for different titled study tours only. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
5798.02	Study Tour: Foreign	U G	1 - 5
Global education/Study Abroad. Specific content, location, quarter(s) of offering, and prerequisites vary; contact department office for details. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions for different titled study tours only.			
5880.01	Interprofessional Education: Seminar on Interprofessional Care	U G	2
Develop and practice skills necessary for interprofessional collaboration in solving complex human problems. Case based. Prereq: Jr standing, or above. Repeatable to a maximum of 4 cr hrs. Cross-listed in HthRhSc and Nursing and MedColl 6880.01.			
5880.07	Interprofessional Approaches to Child Abuse and Neglect	U G	2
Interdisciplinary approach to exploring issues in the identification, treatment, and prevention of child abuse and neglect. Prereq: Jr standing, or above. Repeatable to a maximum of 4 cr hrs. Cross-listed in MedColl 6880.07.			
6891	Proseminar in Educational Studies	G	3
An introduction to the areas of research in the Department of Educational Studies This is a core requirement for doctoral students. Prereq: Admission to a doctoral program in Educational Studies.			
6892	Educational Policy and Inequality in Social and Cultural Context: Integrating Research Traditions	G	3
An introductory seminar course addressing issues of race, ethnicity, language, class, gender, sexuality, and disability as they influence and are influenced by educational policy processes. This is a core requirement for doctoral students. Prereq: Admission to a doctoral program in Educational Studies.			
7406	Course Design for Higher Education	G	3
Students will gain an understanding of how to design a course based on goals and objectives. They will begin the work of planning, within a community of peers, and will leave with the basic structure for a course and the beginnings for materials. Participants will share experiences and ideas, design and implement instructional activities, and develop strategies for assessing teaching and learning.			
7717	Interdisciplinary Perspectives on Developmental Disabilities	G	3
Introduction to the psychosocial, medical, and educational implications of developmental disabilities. Prereq: Permission of instructor. Not open to students with credit for EduPAES 717.01 or 717.03. Cross-listed in HthRhSc, SocWork, Psych, Nursing, and SphHrng.			
7765	Grant Writing	G	3
Provides an overview of the grant writing process. Repeatable to a maximum of 6 cr hrs.			
7999	Thesis Research: Educational Studies	G	1 - 18
Research related to the Master's thesis. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.			

148 Educational Studies

8081 Introductory Seminar: Applied Developmental Science in Education G 3

An introductory professional seminar for doctoral students seeking the Interdisciplinary PhD Specialization in Applied Developmental Science in Education (ADS-E). Cross-listed in EduTL and HDFS.

8189 Planned Field Experience: Educational Studies G 1 - 15

Planned professional teaching experience under supervision in a public school or other educational agency. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

8191 Research Apprenticeship: Educational Studies G 1 - 12

Internship experiences in research, development, or evaluation settings. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.

8193 Advanced Individual Studies: Educational Studies G 1 - 15

Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8194 Advanced Group Studies: Educational Studies G 1 - 15

Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8895 Seminars: Educational Studies G 2 - 5

Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.

Educational Studies: Counseling Psychology

6057 Foundations in Counseling Psychology G 3

The purpose of this course is to provide incoming doctoral students in counseling psychology the foundation of the discipline. In learning about the discipline, the students will develop the professional identity of counseling psychology and be guided in the scholarship and practice of the aspects that help define counseling psychology as a distinct identity. Prereq: Enrollment in Counseling Psychology Doctoral program.

8040 Advances in Multicultural Psychology G 3

This course aims to develop counseling psychology graduate students' multicultural orientation (i.e., knowledge, awareness, skills, and disposition) and cultural humility (i.e., openness, curiosity, an orientation toward the other) to prepare them to serve as clinicians, researchers, supervisors, educators, and advocates in a diverse world. Prereq: Enrollment in Counseling Psychology Doctoral program.

Educational Studies: Counselor Education

2189.01S First Education Experience Program-International U 3

The main purpose of this course is to provide opportunities for students to explore education as a possible career path via a combination of field and seminar requirements. This is also an opportunity to engage in community service. Students spend time in preK-12 school-based settings, interacting with various professionals (e.g., teachers, school psychologists, school counselors) and students. Repeatable to a maximum of 12 cr hrs.

2272 Seminar: Personal Growth to Increase Career Competencies U 2

Designed to provide opportunities to assist in self-exploration of and clarification for more effective development beyond the level of average performance. Prereq: Not open to students with credit for EduPAES 270.02. This course is progress graded (S/U).

2273 Seminar: Study Skills Related to Career Goals U 2

Designed to assist underachieving students with their efforts to ascertain and resolve the causes of low academic productivity; attitudinal and behavioral skills emphasized. Prereq: Not open to students with credit for EduPAES 270.03. This course is progress graded (S/U).

5193 Individual Studies: Counselor Education U G 1 - 15

In conjunction with the instructor, students will engage in individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

5271 Wellness: Achieving a Healthy Lifestyle U G 3

Study and application of a holistic approach to understanding and implementing individual wellness for healthy lifestyles.

5272 Wellness: Intervention U G 3

The purpose of this course is to train students to understand the theories and practical applications involved in assisting individuals and targeted groups with the lifestyle modifications and habit changes that contribute to overall well being. Students must have completed ESCE 5271 before enrolling in this course. Prereq: 5271.

6189.01 Practicum In School Counseling G 4

Field practicum in school counseling. Prereq: 6731, 6732, and 6733; and admission into Counselor Education program.

6189.02 Practicum in Clinical Health Counseling G 4

Practicum in clinical mental health counseling. Prereq: 6731, 6732, and 6733; and admission into Counselor Education program.

6731 Foundations and Ethics of Professional Counseling G 3

Foundations and ethics of professional counseling, to develop professional identity of the counselor and the practice of counseling in various settings so that upon graduation, they become 'highly qualified, ethical, and culturally competent professional counselors who exemplify compassion, social justice, and empathy for the human condition.' Prereq: Admission to Counselor Education program.

6732 Theories of Professional Counseling G 3

Theories of change, personality development, and methods to foster client growth. Prereq: Admission to Counselor Education program. Concur: 6733.

6733 Techniques of Counseling G 3

Techniques to facilitate the individual counseling process for client growth. Prereq: Admission to Counselor Education program. Concur: 6732.

6734 Assessment in Counseling G 3

Studies that provide an understanding of individual and group approaches to counseling assessment and evaluation. Prereq: Admission to Counselor Education program.

6735 Counseling Across the Lifespan G 3

Developmental issues across the lifespan, including identity development, diversity, values programming, poverty, and events that alter the developmental trajectory such as trauma. Prereq: Admission to Counselor Education program.

6736 Career Development and Counseling G 3

The course focuses on strategies, theories, assessments, resources, and knowledge used in practicing career counseling with individuals and groups. Prereq: Admission to Counselor Education program.

6737 Group Counseling G 3

Study of group counseling theories and developmental processes for therapeutic and psychoeducational groups. Prereq: 6731 and 6732, and admission to Counselor Education program.

6738 Techniques of Group Counseling G 1½

Experiential group participation and leadership. Prereq: 6731 and 6733, and admission to Counselor Education program.

6739 Legal and Ethical Issues in Counseling G 1½

Legal and ethical issues in professional counseling. Prereq: 6731, and admission to Counselor Education program.

6740 Techniques for Counseling Children and Adolescents G 1½

Techniques to facilitate the counseling process with children and adolescents. Prereq: 6731, and admission to Counselor Education program.

6831 Professional School Counseling G 3

Foundation concepts for providing professional school counseling through comprehensive school counseling programs. Prereq: 6731, and admission to Counselor Education program.

6931 Diagnosis of Mental and Emotional Disorders G 3

Study and application of the principles and practices of diagnosis according to the DSM. Prereq: 6731, and admission to Counselor Education program.

7191.01 Internship in School Counseling G 5

Field internship in school counseling. Prereq: 6189.01 or 6189.02, and admission to Counselor Education program. Repeatable to a maximum of 15 cr hrs.

7191.02 Internship in Clinical Mental Health Counseling G 5

Internship in clinical mental health counseling. Prereq: 6189.01 or 6189.02, and admission to Counselor Education program. Repeatable to a maximum of 15 cr hrs.

7741 Multicultural and Social Justice Counseling G 4

Study and application of concepts for understanding diversity of clients and self, and implications for communication and counseling practice. Prereq: Admission to Counselor Education program.

7742 Addiction, Trauma, and Crisis Counseling G 3

This course is designed to place emphasis on the application of counseling skills applicable to addictions, crisis, and trauma situations within the clinical and community settings. Prereq: 6731, and admission to Counselor Education program.

7743 Counseling Families, Couples, and Children G 3

Introduction to knowledge and techniques necessary for working with families, couples, and children through counseling. Prereq: 6731, and admission to Counselor Education program.

7745 Theories of Consultation G 1½

Study and application of concepts and practices of consultation in counseling. Prereq: 6731, and admission to Counselor Education program.

7832 Current Issues in Professional School Counseling G 3

Study of the current issues in school counseling including student issues, schools issues, and community issues. Prereq: 6831, and admission to Counselor Education program.

Educational Studies: Counselor Education 149

7833	Evidence-Based School Counseling	G	3
Students will gain historical perspective of the inequity of education and current data-driven approaches for increasing equity and access to educational programming for all students. School counselors in-training will use data to identify and clarify issues facing students in educational settings, explore research to identify and evaluate effective interventions. Prereq: Admission to Counselor Education program.			
7932	Psychopathology, Abnormal Behavior, and Personality	G	3
The diagnosis of mental health disorders is fundamental to clinical treatment in professional counseling while the ability to critically conceptualize psychopathology, or the study of mental health disorders, is paramount. This course will provide students an opportunity to expand upon psychiatric diagnoses through the integration of theoretical, critical, and other socio-cultural perspectives. Prereq: 6731 and 6931, and admission to Counselor Education program.			
7933	Wellness and Prevention Counseling	G	3
Study and application of principles and practices of wellness and prevention in counseling. Prereq: 6731, and admission to Counselor Education program.			
7934	Theories of Counseling Supervision	G	1½
Study and application of concepts and practices of supervision for counselors and therapists. Prereq: Admission to Counselor Education program.			
7935	Advanced Assessment: Evaluation of Mental & Emotional Disorders	G	3
Study and application of principles and practices of comprehensive psychological assessments with a focus on evaluations of mental and emotional disorders. Prereq: 6731 and 6734, and admission to Counselor Education program.			
8100	Leadership in Counselor Education	G	3
Study and application of the principles and practices of leadership in professional counseling and counselor education. Prereq: Admission to Doct program in Counselor Education.			
8191.01	Doctoral Practicum in Counselor Education	G	2 - 8
Practicum in doctoral studies in counselor education. Prereq: Admission to Doc program in Counselor Education, and permission of instructor. Repeatable to a maximum of 8 or hrs or 4 completions. This course is graded S/U.			
8191.02	Doctoral Internship: Counselor Education - Supervision	G	2 - 10
Field experience in doctoral studies in counselor education: Supervision. Prereq: Admission to Doc program in Counselor Education, and permission of instructor. Repeatable to a maximum of 10 or hrs or 4 completions. This course is graded S/U.			
8191.03	Doctoral Internship: Counselor Education - Teaching	G	2 - 10
Field experience in doctoral studies in counselor education: Teaching. Prereq: Admission to Doct program in Counselor Education program, and permission of instructor. Repeatable to a maximum of 10 or hrs or 4 completions. This course is graded S/U.			
8191.04	Doctoral Internship: Counselor Education - Counseling	G	0 - 10
Field experience in doctoral studies in counselor education: Counseling. Prereq: Admission to Doct program in Counselor Education program, and permission of instructor. Repeatable to a maximum of 10 or hrs or 4 completions. This course is graded S/U.			
8191.05	Doctoral Internship: Counselor Education: Research	G	2 - 10
Field Experience in Counselor Education: Research. Prereq: Admission to Doctoral program in Counselor Education, and permission of instructor. Repeatable to a maximum of 10 or hrs or 5 completions. This course is graded S/U.			
8193	Advanced Independent Studies: Counselor Education	G	1 - 12
Advanced independent study in Counselor Education. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 12 completions. This course is graded S/U.			
8200	Critical Pedagogy Issues In Counselor Education	G	3
Study and application of the principles and practices of teaching counseling in graduate counselor education programs. Prereq: Admission to Doct program in Counselor Education.			
8300	Developing a Research Identity in Counselor Education	G	3
Study and application of principles and practices of developing a research agenda and professional scholarship in counselor education. Prereq: Admission to Doct program in Counselor Education.			
8400	Critical Research Issues in Counselor Education	G	3
Study and application of principles and practices of research and professional scholarship in counselor education. Prereq: Admission to Doct program in Counselor Education.			
8895	Seminars: Counselor Ed	G	1 - 4
Study, discussion, and application of concepts related to doctoral study in counselor education. Repeatable to a maximum of 4 or hrs or 4 completions. This course is graded S/U.			
8999	Dissertation/Thesis Research: Counselor Education	G	1 - 9
Dissertation research - research conducted for dissertation, under supervision of faculty advisor. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 9 completions. This course is graded S/U.			

Educational Studies: Cultural Foundations of Educ

5194	Group Studies: Cultural Foundations of Education	U G	1 - 15
Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 or hrs or 15 completions. This course is graded S/U.			
8193	Advanced Individual Studies: Cultural Foundations of Education	G	1 - 15
Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 or hrs or 30 completions. This course is graded S/U.			
8194	Advanced Group Studies: Cultural Foundations of Education	G	1 - 15
Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 or hrs or 15 completions. This course is graded S/U.			
8999	Dissertation or Thesis Research: Cultural Foundations of Education	G	1 - 18
Research for thesis or dissertation purposes. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			

Educational Studies: Educational Administration

5193	Individual Studies: Educational Administration	U G	1 - 15
Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 or hrs or 24 completions. This course is graded S/U.			
5194	Group Studies: Educational Administration	U G	1 - 15
Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 or hrs or 15 completions. This course is graded S/U.			
6189.01	Field Experience: PK-6 principal licensure	G	½ - 3
The planned field experience course is the capstone experience for students in PK-6 principal licensure. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
6189.02	Field Experience: 4-9 principal licensure	G	½ - 3
The planned field experience course is the capstone experience for students in 4-9 principal licensure. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
6189.03	Field Experience: 5-12 principal licensure	G	½ - 3
The planned field experience course is the capstone experience for students in 5-12 principal licensure. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
6350	Introduction to Educational Administration	G	3
Introduction to the organizational setting of the school, the nature of administration, and personal decision making about careers in educational administration. This is a core course in administrator certification. Prereq: Not open to students with credit for EduPL 846 or 886.			
6356	Legal Aspects of School Administration	G	3
A study of statutory and case law, executive opinions, legal principles, and provisions relevant to educational administration, particularly in areas of student rights, personnel, finance, curriculum, contracts, property, liability, and organization. Prereq: Not open to students with credit for EduPL 952.			
6360	School Community Relations and Politics	G	3
Principles and practice in developing and maintaining appropriate school community relationships; communication processes; decision-making patterns; politics and micro-politics of schools.			
6362	Strategic Human Capital Management for P-12 Administration	G	3
Provides a foundation of human resource function in theory and practice; explores laws, policies, and practices related to the effective management of human capital management in P-12 education. Prereq: 6350.			
6366	School Finance and Business Administration	G	3
This course is designed for Master of Arts and licensure students concentrating their studies on PK 12 educational administration at the building level. Because this is a licensure course, i.e., Principal Licensure, it is part of the larger educator preparation unit for which the mission and conceptual framework are articulated in subsequent sections of this document. Suggested prereq: 6350 and 6374.			
6372	Educational Technology Leadership and Administration	G	3
Overview of the uses of technology in schools. Prepares leaders with knowledge and skills to help shape, evaluate, and supervise technology initiatives in educational organizations. Prereq: Not open to students with credit for EduPL 707.			
6374	Database Decision Making for School Leaders	G	3
Designed to assist building leaders in their understanding and ability to systematically use a variety of student and school related data to guide educational decision-making. This course will also emphasize ways in which school leaders can collaboratively work with stakeholders to use data to inform the development of a school vision.			
7189	Planned School District Field Experience	G	2 - 5
The candidate synthesizes and applies knowledge and skills through substantial, sustained, standards-based field work, planned and guided cooperatively by the licensure adviser and school district. Repeatable to a maximum of 8 or hrs or 2 completions. This course is progress graded (S/U).			

150 Educational Studies: Educational Administration

7350	School Improvement for Educational Leaders	G	3
Applies theory from classroom management, learning, motivation, and teaching to the practice of PreK-12 education. Repeatable to a maximum of 6 cr hrs.			
7356	Instructional Leadership and Supervision	G	3
Instructional leadership requires the development of an organization and its members in support of its teaching and learning mission. Prereq: Not open to students with credit for EduPL 726 or 891.01.			
7359	Leadership, Inquiry, and Ethics	G	3
Authentic learning leading to application to practice in educational organizations. This is a core course in administrator certification. Learning promotes three primary principles: leadership, inquiry, and ethics.			
7362	Board Politics and Public Relations	G	3
Explores board of education and superintendent roles and responsibilities in the governance of the school district and the dynamic nature of board-superintendent relationships. Prereq: Not open to students with credit for EduPL 962.			
7364	Finance of School Districts	G	3
This course is designed for advanced licensure students concentrating their studies on PK 12 educational administration at the school district level of analysis. Because this is a licensure course, i.e., Superintendent Licensure, it is part of the larger educator preparation unit for which the mission and conceptual framework are articulated in subsequent sections of this document. Prereq: 7362 and 7366.			
7366	Administrative Responsibilities, Policy, and Perspectives	G	3
Role of the superintendent in standards-based education reform and the improvement of the instructional program to serve diverse student needs effectively and equitably. Prereq: Permission of instructor. Not open to students with credit for EduPL 725 or 843.			
7368	Educational Facility Planning	G	3
Introduces knowledge, dispositions, and performances necessary for planning, designing, and building schools; explores notions of architectural quality, aesthetic experience, and school as public place. Prereq: Not open to students with credit for EduPL 958.			
7881	Instructional Leadership	G	1 - 3
This course will provide opportunities for students analyze and evaluate the meaning, practice and impact of instructional leadership in schools. Course readings will focus on the mechanisms through which school principals lead teacher teams to improve instruction by developing internally coherent systems of collaboration and common understandings of effective teaching practice. Prereq: Enrollment in BRIGHT MBA. Repeatable to a maximum of 3 cr hrs. This course is progress graded.			
7882	Theories of Instruction	G	1
This course will explore three different conceptual frameworks for learning developed over the course of the twentieth century, including socio-cognitive, soci-historical and cultural-historical, and instruction using technologies. Prereq: Enrollment in BRIGHT MBA program.			
7883.01	Culture & Efficacy In Education	G	1½
The course will provide participants with the opportunity to develop a multicultural awareness and develop cultural competency as they explore the impact of an increasingly diverse society in the United States. Particular emphasis will be placed on gaining self-awareness around issues of cultural diversity as well as expanding one's knowledge base in the area of diversity. Prereq: Enrollment in BRIGHT MBA. Concur: 7883.02.			
7883.02	Culture & Efficacy In Education	G	1½
The course will provide participants with the opportunity to develop a multicultural awareness and develop cultural competency as they explore the impact of an increasingly diverse society in the United States. Particular emphasis will be placed on gaining self-awareness around issues of cultural diversity as well as expanding one's knowledge base in the area of diversity. Prereq: 7883.01, and enrollment in BRIGHT MBA.			
7884	Curriculum Design	G	1½
This course is a compilation of curriculum history, issues, and development, primarily to facilitate an understanding of what curriculum means, looks like, and how it can be created, implemented, critiqued, assessed and modified for use in classrooms. Prereq: Enrollment in BRIGHT MBA program.			
7885	School Law	G	1½
The course is designed to help school leaders explore the interplay of law, policy, and educational leadership and practice. Prereq: Enrollment in BRIGHT MBA.			
7886	Data Driven Improvement for School Leaders	G	1 - 2
This course is designed to assist school leaders in their understanding and ability to systematically use a variety of school data to impact teaching, learning, and decision-making for the purpose of increasing student success. The course also focuses on how school leaders can create conditions that foster effective data use. Prereq: Enrollment in BRIGHT MBA program. Repeatable to a maximum of 2 cr hrs. This course is progress graded.			
7887	Literacy	G	1
This course presents an overview of reading achievement of students in American schools and instructional strategies for teaching reading skills in low resource schools with high poverty populations. Prereq: Enrollment in BRIGHT MBA program.			

7888	Academic Motivation for School Administrators	G	1
This course is designed to introduce school administrators to current theory and research on academic motivation. Prereq: Enrollment in BRIGHT MBA program.			
7897	Special Topics: Educational Administration	G	1 - 5
Special topics for professional educators and graduate students in selected areas; designed to provide the opportunity to update professional skills and review current research developments. Prereq: Grad standing, or registration in one of the professional schools. Repeatable to a maximum of 18 cr hrs or 18 completions. This course is graded S/U.			
7999	Thesis Research: Educational Administration	G	1 - 18
Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.			
8193	Advanced Individual Studies: Educational Administration	G	1 - 15
Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.			
8194	Advanced Group Studies: Educational Administration	G	1 - 15
Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
8200	Place, Space and Leadership	G	3
The place and space are fundamental dimensions of the human experience. In this course, we will examine the ways in which place and space are produced and inhabited by people in various contexts and we will consider how place and space help shape experiences of belonging, citizenship, and community in everyday life. Prereq: Admission to the EdD in Educational Administration program, or permission of instructor.			
8201	Community-Based Research and Evaluation in Educational Administration	G	3
This course focuses on identifying, understanding and addressing problems of practice at the community level. Through class discussions and assignments, students will become familiar with the paradigm shift, developing community inquiry through problem mapping and evaluation and community based participatory research (CBPR). Cross-listed in ESQual.			
8202	Positive Psychology and Educational Administration	G	3
This course helps present and future educational leadership understand the pressure on educational systems from the economic, technological, social, cultural, and political conditions of contemporary society, while exploring their implications and ways to enhance positive and effective leadership.			
8220	School Business Administration	G	3
School business administration is an important aspect of how school functions. In this course, we will examine multiple aspects of school business administration from the perspectives of research and professional practice. In particular, we will consider aspects of planning, budgeting, taxation, human resources, facilities, risk mitigation, and technology. Prereq: Admission into the Doctor of Education (EdD) in Educational Studies specializing in Educational Administration; and ESEAdm 8356.			
8317	Legal Aspects of Special Education Administration	G	3
Legislative, executive, and judicial policy and action pertaining to the rights of students with special needs, with a focus on the responsibilities of school administrators and state officials. Prereq: Not open to students with credit for EduPL 963.			
8356	Economic Viewpoints in Education	G	3
A study of K-12 education with emphasis on economic viewpoints about schooling. Human capital theory asserts that education is an investment. Signaling theory asserts that formal education is credentialing. Prereq: Admission to Educational Administration Doctoral Cohort.			
8359	Organizational Behavior: Theory and Research	G	3
Analysis of relevant research and organizational theory for understanding schools. This is the first course in the Ph.D. doctoral core in educational administration. Prereq: 6350 or EduPL 6350 (846). Not open to students with credit for EduPL 959.			
8361	Social and Political Contexts of Education	G	3
Examines societal conditions - economic, technological, social, cultural, and political - that exert intense pressures on the educational system and pose great challenges to educational leaders.			
8375	Culturally Responsive School Leadership	G	3
This course looks at emancipatory, decolonial, liberatory, and culturally responsive models of schooling. We look at how community-based and indigenous knowledge can be used to inform schooling. We dig deep into culturally responsive leadership practice, spending time unpacking 4 major strands of culturally responsive school leadership.			
8421	Leading Professional Learning for Educators	G	3
Study of research on teacher education and teacher education programs at the collegiate and university levels. Repeatable to a maximum of 6 cr hrs.			
8700	Inquiry in Educational Administration	G	3
This course will examine conducting research on problems of practice in school environments with a focus on critical leadership.			

Educational Studies: Educational Administration 151

8895 Seminars: Educational Administration G 2 - 5
Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.

8997 EdD Final Project Writing G 1 - 3
Writing the final project for the EdD. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is graded S/U.

8999 Dissertation or Thesis Research: Educational Administration G 1 - 18
Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Educational Studies: Educational Policy

3312 Conflict, Power, and Voice in Public Education U 3
This course introduces students to the contested interests, ideologies, and goals that sit at the center of the educational political arena. The course explores multiple and often competing purposes of education, politics of education governance, and issues of representation, agency, and change.

5217 Comparative Perspective on Education, Globalization, and National Development U G 3
Examines comparative perspectives on the role of educational processes in national development and globalization, including "out of school" contexts that impact where and what children learn.

6000 Introduction to Educational Policy G 3
Introduction to the educational policy process and common dilemmas in educational policy.

7100 Writing for Educational Policy Audiences G 3
Develop policy writing skills, including the translation of educational research to policy briefs, the development of policy scholarship, and understanding the nuances of publication in various policy venues.

7224 Educational Policy Analysis in Contemporary Culture G 3
Examines key theories and research perspectives on educational policy. Explores major policy processes and agendas unfolding at the time of the course. Introduction to methods for studying educational policy. Prereq: Not open to students with credit for EduPL 824.

7225 Inquiry into Education Policy Research G 3
Introduction to guiding principles for policy inquiry and analyses. The focus is on learning analytical vocabularies and approaches distinctive to policy inquiry. Students learn to read and think critically and creatively about public policy problems and solutions through the lens of research. Cross-listed in ESQual.

7897 Special Topics: Educational Policy G 1 - 5
Special topics for professional educators and graduate students in selected areas; designed to provide the opportunity to update professional skills and review current research developments. Prereq: Grad standing or registration in one of the professional schools. Repeatable to a maximum of 20 cr hrs or 20 completions. This course is graded S/U.

7999 Thesis Research: Educational Policy G 1 - 3
Research for master's thesis purposes. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8193 Advanced Individual Studies: Educational Policy G 1 - 15
Advanced individual study. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8209 Cultural Processes in Education G 3
Examines the role of cultural processes in educational practices at school, after school, in the home, and on the job. Explores how culture, ethnicity, and power operate in formal and informal educational settings. Prereq: Not open to students with credit for EduPL 909.

8286 Critical Qualitative Approaches to Policy and Race in Education G 3
This advanced course explores contemporary qualitative methodologies and theories and their application to education policy analysis. With a focus on critical qualitative approaches, this course will support students who desire to study diverse methodologies and theories from their ontological and epistemological basis of research design to their implementation. Prereq: ESHESA 7256, ESQual 7256, or 8280; and Grad standing, or enrollment in one of the professional schools. Cross-listed in ESQual.

8312 Governance and Control in American Education G 3
A critical examination of national, state, and local politics and governance in American education.

8352 Educational Policy in Democratic Society G 3
Focuses on conceptions of democracy, the democratic aims of public education, and the processes of developing, implementing and analyzing policies that further those aims. Prereq: Not open to students with credit for EduPL 922.

8895 Seminars: Educational Policy G 2 - 5
Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.

8999 Dissertation or Thesis Research: Educational Policy G 1 - 3
Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

Educational Studies: Educational Psychology

1159 Online Learning Strategies and Skills U 3
Explores how to use the web for a successful college experience. Covers navigating online resources, communicating academic content, and enhancing learning via the web. This course has been peer reviewed and is officially recognized by Quality Matters as meeting the standards of a quality online course. For more information, visit www.qmprogram.org.

1259 Learning and Motivation Strategies for College Success U 3
Teaches learning and motivation strategies to help students manage time, improve grades, and achieve college success. Students will develop practical skills for personal and academic effectiveness, while also understanding the related research. Topics include boosting motivation, overcoming procrastination, enhancing organization and concentration, and applying effective study strategies.

1359 Critical Thinking and Collaboration in Online Learning U 3
Teaches skills for effective collaboration, research, communication, and critical thinking in college and beyond. Students will develop as modern learners who are able to self-regulate while also functioning effectively as team members. Topics covered include online learning tools, search strategies, organization, use of evidence in argumentation, presentations, and self-assessment.

2059 Becoming a Self-Regulated Learner U 2
This course will build strategies and motivation to overcome recent academic challenges and prepare for success in the future. Main topics we will cover include self-regulation, active learning, studying, using resources, planning, goal setting, and time management. Our entire course is geared toward helping students become self-regulated learners.

2060 Academic Success Strategies for International Students U 2
Supports the academic transition for international students by teaching study habits and strategies for success in the U.S. classroom. Covers expressing original ideas, understanding instructor and course expectations, engaging in class and with classmates, using support resources on campus, managing time, incorporating active learning into study methods, and thinking critically.

2309 Psychological Perspectives on Education U 3
This course deals with the major theories of human development, motivation and learning. Planning of instruction, teaching strategies, assessment and classroom management are examined. Authentic pedagogical practices are used to gain an understanding of the teaching and learning process. Prereq: Not open to students with credit for EduPL 309.

5193 Individual Studies: Educational Psychology U G 0 - 15
Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

5194 Group Studies: Educational Psychology U G 1 - 15
Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

5401 Adolescent Learning and Development in School Contexts U G 3
Provides students with an introduction to the field of adolescent development and psychology and applications to education. Teacher education licensure course.

7401 Controversies, Myths, and Dilemmas in Education G 3
This course examines research on classroom learning and teaching and educational policy, and considers the implications of this research for teaching practice. Course will examine the research evidence behind school- and classroom-level practices, particularly focusing on issues on which opinion is sometimes sharply divided. Prereq: Not open to students with credit for EduPL 803.

7402 Educational Psychology: Cognition, Learning, and Instruction G 3
Examination of theory and research about cognitive perspectives on classroom learning and instruction, particularly research on the teaching and learning of school subjects. Prereq: Not open to students with credit for EduPL 880.

7403 Motivation in Learning and Teaching G 3
Examines research and theory about motivation to learn in academic settings, including studies of goal theory, social cognitive approaches, and teaching practices. Prereq: Not open to students with credit for EduPL 901.

7404 College Teaching G 3
Designed as initial preparation for instruction at the college level; focuses on the generic skills, strategies, and issues common to university teaching. Open to grad students committed to teaching in any area or discipline at the college level.

152 Educational Studies: Educational Psychology

7405 Cooperative Learning: Research and Practice G 3

Examines research, theory, and practice related to cooperative and collaborative learning, including teacher's role, strategies and structures, and assessment of outcomes. Prereq: Not open to students with credit for EduPL 797.

7406 Social Basis of Behavior in Education G 3

Focuses on the role of behavior in schools as social contexts, social perception, social influence, and social relations from a psychological perspective. The emphasis in this course is on understanding and mastery of conceptual, theoretical, and practical issues in social behavior in educational settings.

7434 Professional Development Around Teaching in Higher Education G 3

Study aspects of teaching and teaching support at the university level, and examine models for university teaching preparation and support programs. Prereq: Permission of instructor.

7999 Thesis Research: Educational Psychology G 1 - 18

Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8193 Advanced Individual Studies: Educational Psychology G 1 - 15

Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8194 Advanced Group Studies: Educational Psychology G 1 - 15

Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8402 Classroom Research on Student Motivation G 3

In depth study of theories and research that address the development and support of students' motivation to achieve in classroom settings. Prereq: Not open to students with credit for EduPL 944.

8403 Advanced Seminar in Educational Psychology G 3

Advanced seminar in educational psychology for doctoral students. Current trends in theory and research will be critically examined.

8404 Academic Writing in Education: Reviewing the Literature G 3

The class will focus primarily on systematic work on students' individual literature reviews. Topics covered will include the writing process in general, including developing personal writing habits; strategies for locating and evaluating existing research literature; structuring literature reviews for different purposes and building a logical rationale, and APA format and style. This course is graded S/U.

8405 Classroom Learning and Instruction G 3

This advanced seminar is designed to guide students through contemporary issues in classroom learning and instruction. Students will critically review classroom-based research on how students learn and how to help students learn in various subject areas and with a variety of learners, including K-16 students and adult learners.

8406 Self-regulated Learning G 3

This class will critically examine major constructs and relations proposed by different models. We will analyze and discuss empirical research designed to investigate students' self-regulated learning, including its assessment. We also will evaluate how self-regulated learning can be fostered through instructional interventions.

8407 Self-efficacy G 3

This course explores the concept of collective efficacy, especially as media. The issue of self-efficacy in the social world and Bandura's theories will also be discussed.

8408 Race, Ethnicity, & Multiculturalism in Education & Psychology G 3

This seminar is designed to discuss current conceptual, theoretical, and methodological work in education and psychology and consider the role of race and ethnicity in students' school experiences, academic achievement, and development in multicultural settings.

8895 Seminars: Educational Psychology G 2 - 5

Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Repeatable to a maximum of 24 cr hrs or 12 completions.

8999 Dissertation or Thesis Research: Educational Psychology G 1 - 18

Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Educational Studies: Higher Educ & Student Affairs

2239 Land-Grant Universities: Mission and Leadership U 3

This course provides students with the opportunity to learn about land-grant institutions and their place in the American higher education system, including the evolving nature of the land-grant mission in 21st century America, as well as how higher education leaders are reconfiguring our nation's preeminent public institutions to meet the needs of the communities they were designed to serve. Cross-listed in HDF5.

2570 Team and Organizational Leadership U 3

Overview of the theory and skills necessary for the practice of effective leadership in team and organizational settings. Leadership is explored as an integral component of a student's career and life plan. Repeatable to a maximum of 12 cr hrs.

2571S Leadership In Community Service U 3

Introduction to the knowledge, skills, and competencies for responsible service and leadership in diverse communities. Preparation for engaged, responsible, and active community involvement and leadership. Please note: Although this course is repeatable in special circumstances (study abroad requirement, for example), only one iteration will count for GE credit. Repeatable to a maximum of 12 cr hrs. GE service learning course.

2572 Introduction to Leadership Development in Learning Organizations U 3

Concepts and strategies that are necessary to be an effective leader. Through a variety of leadership assessments, students will learn about their leadership styles and preferences. Repeatable to a maximum of 12 cr hrs.

2575 Student Organization Leadership Training U 3

Overview of the theory and skills necessary for the practice of effective leadership in student organization settings. Leadership is explored as an integral component of a student's activity in Ohio State student organizations. Repeatable to a maximum of 12 cr hrs.

2576 Leadership for Resident Advisors U 1 - 3

Provides an overview of the theory and skills necessary for the practice of effective leadership in team and organizational settings. Leadership is explored as an integral component of a student's role as a Resident Advisor. Repeatable to a maximum of 12 cr hrs or 4 completions.

2577 Diversity and Social Justice in Leadership U 3

Builds on intellectual and experiential engagement with issues of difference, diversity, social justice, and alliance-building, with a particular emphasis on race, ethnicity, and gender. GE diversity soc div in the US course. GE foundation race, ethnicity and gender div course.

2578 Leadership for Residence Managers U 1 - 3

Provides an overview of the theory and skills necessary for the practice of effective leadership in team and organizational settings. Leadership is explored as an integral component of a student's role as a Resident Manager. Repeatable to a maximum of 12 cr hrs or 4 completions.

3200 So You Want to Work with College Students? Intro to Student Affairs U 3

Course focuses on the role of student development theory and its use in helping students examine how they grow as a result of the college experience.

3202 International Student Experience U 3

Course examines two aspects of internationalization on American college campuses: American students studying abroad and international students studying in the US.

3221 Innovation and Leadership U 3

This course is built on intellectual and experiential engagement with innovative leadership. Students are challenged to develop better problem solving skills in a team-oriented atmosphere, and through the use of creativity, learn to view challenges from new and different perspectives. Cross-listed in BusMHR.

3573 Theories of Leadership in Learning Organizations U 3

A focus on the particular opportunities and challenges that exist in understanding the theories related to leadership development in a complex and changing world. Repeatable to a maximum of 12 cr hrs.

4201 The Asian American Student Experience U 3

Course examines the histories and contemporary issues affecting Asian American students from the perspectives of educational history and policies from K-12 through higher education.

4202 The Latinx Student Experience U 3

Course examines the educational experiences and outcomes of Latinx students throughout the P-20 pipeline.

5193 Individual Studies: Higher Education and Student Affairs U G 1 - 15

Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

5194 Group Studies: Higher Education and Student Affairs U G 1 - 15

Group study projects. Repeatable to a maximum of 15 cr hrs or 15 completions.

7239 Land-Grant Universities: Mission and Leadership G 3

This course provides students with the opportunity to learn about land-grant institutions and their place in the American higher education system, including the evolving nature of the land-grant mission in 21st century America, as well as how higher education leaders are reconfiguring our nation's preeminent public institutions to meet the needs of the communities they were designed to serve.

7256 Qualitative Research in Higher Education Settings G 3

This course provides an introduction to the philosophical and epistemological foundations that guide qualitative inquiry, and an overview of the methodologies and methods associated with qualitative research designs appropriate in higher education and student affairs settings. Cross-listed in ESQual.

Educational Studies: Higher Educ & Student Affairs 153

<p>7290 Contemplative & Creative Practice in Higher Ed: On the Art and Soul of Student Affairs G 3</p> <p>This seminar uses a variety of contemplative and creative practices to spark deep exploration of issues concerning values, consciousness, mindfulness, spirituality, and relationships in higher education and student affairs with the goal of improving professional practice. Prereq: Grad standing or registration in one of the professional schools. Repeatable to a maximum of 9 cr hrs.</p>	<p>7576 Assessment in Higher Education G 3</p> <p>An introduction to assessment practices in higher education. Students will consider the impact of assessment on student learning and success in a university environment.</p>
<p>7500 Introduction to the Profession of Student Affairs G 3</p> <p>Overview of history of higher education and student affairs, the philosophical and theoretical foundations of the profession, codes of ethics, contemporary issues, and organizational structures. Prereq: Not open to students with credit for EduPL 780.</p>	<p>7750 Facilitating Intergroup Dialogues in Higher Education G 3</p> <p>This course is based on the intergroup dialogue model where two facilitators of differing social identities facilitate dialogue about critical issues relating to social identities (e.g., race, class, gender).</p>
<p>7510 College Student Development G 3</p> <p>An analysis of psychosocial theories of and research on college student development and their use in the design of educational practice.</p>	<p>7850 Critical Race Theory in Higher Education G 3</p> <p>Critical Race Theory in Higher Education explores the history and development of CRT over time, paying close attention to how CRT can be (and has been) applied and used to address issues of structural injustice and inequality in American society and higher education specifically.</p>
<p>7512 Interaction of Students and Environments G 3</p> <p>The purpose of this course is to understand college student populations, campus environments, and their interactions. By exploring the influences of campus environments on students' experiences, as well as how students influence environments, this course will provide opportunities to learn how to enhance campus environments to maximize student success.</p>	<p>7854 Activism on College Campuses G 3</p> <p>The purpose of this course is to understand student activism as a form of engagement on college campuses, as well as how to support activists in their efforts.</p>
<p>7513 Understanding Educational Organizations G 3</p> <p>Introduction to organization theory and its application to the study of leadership, culture, adaptation, and change in higher education. Prereq: Not open to students with credit for EduPL 813.</p>	<p>7897 Special Topics: Higher Education and Student Affairs G 1 - 5</p> <p>Special topics for professional educators and graduate students in selected areas; designed to provide the opportunity to update professional skills and review current research developments. Prereq: Grad standing, or registration in one of the professional schools. Repeatable to a maximum of 18 cr hrs or 18 completions.</p>
<p>7518 Leadership and Group Facilitation in Higher Education G 3</p> <p>Emphasis on group theory, processes, and dynamics and the development of structured learning experiences that facilitate interpersonal growth and group development in educational organizations. Prereq: Permission of instructor.</p>	<p>7999 Thesis Research: Higher Education and Student Affairs G 1 - 18</p> <p>Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.</p>
<p>7520 Diversity in Higher Education G 3</p> <p>Examines structural and cultural diversity in higher education in relation to race, ethnicity, gender, socio-economic status, sexual orientation, and religion of college/university constituents. Prereq: Not open to students with credit for EduPL 887.</p>	<p>8191 Professional Internship G 3 - 12</p> <p>Registration for approved Higher Education & Student Affairs professional/academic internships, and approved study abroad collaborative programs. Prereq: Permission of instructor. Repeatable to a maximum of 20 cr hrs or 4 completions.</p>
<p>7530 Practicum in Higher Education and Student Affairs G 4</p> <p>Allows students to reflect on internship experiences by offering opportunities to share perspectives about duties and gain appreciation of how theory informs practice. Repeatable to a maximum of 12 cr hrs.</p>	<p>8193 Advanced Individual Studies: Higher Education and Student Affairs G 1 - 15</p> <p>Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.</p>
<p>7540 Higher Education Institutions and Core Academic Issues G 3</p> <p>Explores different types of institutions, and central issues related to academic quality, through a systems perspective, addressing missions, curriculum, faculty, students and evaluation. Prereq: Not open to students with credit for EduPL 806 or 842.</p>	<p>8194 Advanced Group Studies: Higher Education and Student Affairs G 1 - 15</p> <p>Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.</p>
<p>7545 Case Studies in Higher Education Administration G 3</p> <p>Applies theoretical and scholarly research in the field of higher education to the analysis of real-life cases from U.S. colleges and universities. Prereq: Not open to students with credit for EduPL 858.</p>	<p>8511 College Student Development II G 3</p> <p>Analysis of theories of reflective judgment and intellectual development of college students and their uses in educational practice. Prereq: Not open to students with credit for EduPL 954 and 954A.</p>
<p>7550 Gender in Higher Education G 3</p> <p>This course provides a critical overview of gender dynamics in higher education. It examines current situations of women and nonbinary people in higher education; focuses on understanding the diversity of experiences and perspectives relevant to organizational structure, policy development, and curriculum as they relate to gender dynamics.</p>	<p>8515 Advanced Seminar in Theories of College Student Development G 3</p> <p>The purpose of this course is to provide an opportunity for in-depth study, dialogue, and reflection about theoretical frameworks for understanding the development of college students. Through guided reading focusing on a variety of theoretical perspectives, class discussions, and analysis of theories students will gain increased understanding about student development. ESHESA 7510 highly recommended but not required.</p>
<p>7554 Admission and Retention of College Students G 3</p> <p>Considers the recruitment, admission, financial aid, advising, student services and retention processes that result in successful students. Social issues and theoretical models are discussed. Prereq: Not open to students with credit for EduPL 910.</p>	<p>8526 Advanced Qualitative Inquiry toward Educational Equity and Social Justice G 3</p> <p>The focus of this advanced capstone qualitative course is to analyze and write up a small pilot study touching all areas of a research study (i.e., epistemological, ontological, axiological, methodological, collection, analysis, writing up the discussion, research dissemination) with Educational Equity and Social Justice lens. You, the researcher, and your decisions are important to this course. Prereq: 7256, ESQual 7256, 8280, or equivalent course. Cross-listed in ESQual.</p>
<p>7562 Broad Access Institutions and Community Colleges G 3</p> <p>This course is designed for graduate students who are interested in learning about not-for-profit broad access institutions and community colleges through the lenses of race, ethnicity, and class.</p>	<p>8552 The Impact of College on Students G 3</p> <p>Analysis of the philosophical assumptions and statistical evidence about the impact of college on students. Prereq: Not open to students with credit for EduPL 912.</p>
<p>7564 Finance of Higher Education G 3</p> <p>A study of finance of higher education with emphasis on public issues affecting higher education; criteria for identifying and developing resources for higher education institutions; and perceived productivities of departmental and academic units. Prereq: Admission to Higher Education Student Affairs program or EducSt-ED program.</p>	<p>8560 Legal Aspects of Higher Education Administration G 3</p> <p>Statutory, regulatory, and case law are analyzed for the development and maintenance of college and university policy and administrative decision making; recent legal developments in college and university governance patterns. Prereq: Not open to students with credit for EduPL 840.</p>
<p>7566 Strategy & University Leadership G 3</p> <p>Explores different approaches to developing strategy for colleges and universities. Examines leadership and decision-making broadly. Current special focus on the strategic use of technology in higher education, using the simulation Virtual U. Prereq: Not open to students with credit for EduPL 914.</p>	<p>8850 Intersectionality in Higher Education G 3</p> <p>This course is an essential course for graduate students who will conduct research on individual, social, and organizational diversity in higher education. There is an increasing need for educational research to address the role of multiple social identities simultaneously (for example, gender, race, and class) in affecting equity in educational outcomes.</p>
<p>7570 Internationalizing Colleges and Universities G 3</p> <p>Examines the rationale and various strategies for internationalizing colleges & universities. Prereq: Not open to students with credit for EduPL 870.</p>	<p>8895 Seminars: Higher Education and Student Affairs G 2 - 5</p> <p>Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.</p>

154 Educational Studies: Higher Educ & Student Affairs

8999 Dissertation or Thesis Research: Higher Education and Student Affairs G 1 - 18

Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Educational Studies: Learning Technologies

2011 Keys to Academic Success for Online Learners U 2

Introduces essential learning strategies and technologies to guide students to successful online learning experiences and ultimately academic success. This two-credit, seven-week online course is designed for students entering online degree programs or taking online courses.

4270 Technology, Education and Community-based Programming U 3

Comprehensive educational programs can meet a variety of learning needs in a community. In this class you will design and develop collaborative community-based educational programming using technology.

5193 Individual Studies: Educational Technology U G 1 - 15

Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

5194 Group Studies: Educational Technology U G 1 - 15

Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

5280 Educational Videography U G 3

Functions and operations of digital video production and post-production equipment; application of theory and research to the production of video materials for instruction. Prereq: Not open to students with credit for EduPL 680.

5281 Introduction to Developing Educational Web Sites U G 3

In this introductory course students will begin to develop the visual, technical, and pedagogical design skills to create educational web sites.

5286 Enhancing Teaching and Learning with Digital Resources U G 3

This course offers students a foundational understanding of the technology integration, instructional design and the evaluation of digital contents. It is intended to help pre-service teachers and in-service teachers to perform effective digital contents evaluation in teaching practice. Students will acquire the key concept and theories of the technology integration and the instructional design model.

6223 Issues and Practices in Educational Technology G 3

Critical examinations of the issues raised by the implementation and use of information and communications technologies (ICTs) in education. Prereq: Not open to students with credit for EduPL 823.

6273 Improving Professional Practice of Teaching with Technology G 3

Teachers learn to study the effective use of technology in teaching and learning in their classroom(s).

6274 Instructional Design for K12 Technology Integration G 3

Apply instructional design practices to support the use of technology in teaching at the school and classroom levels. K12 instructional design topics include needs, formative and summative assessments, higher order learning outcomes, and technology-based differentiation.

6278 Introduction to Instructional Design G 3

Paradigms of instructional design; phases of the instructional design process including needs assessment, learner, task, and curriculum analysis, instructional strategies, evaluation, and assessment.

6282 Introduction to Teaching Online for K-12 Educators G 3

Introduction for educators to the methods of teaching K-12 students online. Prereq: Not open to students with credit for EduPL 682.

7277 Computer-Supported Collaborative Learning G 3

Explores the ways in which technologies have impacted the research and practice of teaching and learning, especially collaborative learning, in K-12 schools and higher education. Prereq: Not open to students with credit for EduPL 677.

7278 Formative Evaluation of Learning Technologies G 3

Theory and practice of developmental testing and field evaluation of learning technologies.

7289 Practicum in Educational Technology G 3

Group observation, limited participation, and functional analysis of technology-enhanced learning environments. Prereq: Not open to students with credit for EduPL 889.

7297 Designing Multimedia for Instruction G 3

Introduction to the instructional capabilities and hands-on development of multimedia; topics include relevant learning theories, authoring techniques and design models. Prereq: Not open to students with credit for EduPL 897.

7392 Theories of Learning with Technology G 3

Overview of learning theories, and an in depth study of social and cultural influences on student, teacher, and organizational learning in technology-rich education settings. Prereq: Not open to students with credit for EduPL 892.

7999 Thesis Research: Educational Technology G 1 - 18

Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8193 Advanced Individual Studies: Educational Technology G 1 - 15

Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8194 Advanced Group Studies: Educational Technology G 1 - 15

Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8216 Scholarly Perspectives in Learning Technologies G 3

Survey of the theories and research within the field of Learning Technologies.

8226 Methods of Inquiry in Learning Technologies G 3

This course will introduce research methodologies specifically in technology-supported learning environments, including self-report and experience sampling method, data intensive research, big data movement, learning analytics, data collection issues, data access and privacy, content analysis of online discussions, social network analysis, as well as design based research.

8295 Applied Instructional Design G 3

Advanced theories of instructional design applied to the process of instructional development. Prereq: Not open to students with credit for EduPL 895.

8297 Internship: Learning Technologies G 0 - 1

The purpose of this course is for students in the Learning Technologies program to have the opportunity to engage in real-work experiences in a variety of workplace settings. These experiences do not require the students' physical presence in the internship site as most of these will be supported by technology and are unpaid. Prereq: A grade of B+ or above in 6278, or permission of instructor. This course is graded S/U.

8999 Dissertation or Thesis Research: Educational Technology G 1 - 18

Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Educational Studies: Philo & Hist of Education

2241 Integrative Learning: How the Brain Learns U 3

Current and emerging theoretical and cultural conception of integrative learning based on current brain research. GE soc sci indivs and groups course. GE foundation social and behavioral sci course.

3200H Mindful Resilience: Individuals to Organizations U 3

The overarching framework for the course is a critical exploration of mindfulness practices and their influence on how individuals and groups function. Exploring the physiological impact of mindfulness on the individual, students will then be able to critically examine and apply these practices to communication, implicit bias, awareness of the self and others.

3206 School and Society U 3

Use of concepts and methods of history, philosophy and the social sciences to grasp the interrelationship between a diverse society and education. GE diversity soc div in the US course. GE foundation race, ethnicity and gender div course.

3410 Philosophy of Education U 3

An introduction to key philosophical issues in education, focusing on the questions: Who should be educated? What should be taught? Who gets to decide? GE cultures and ideas course. GE foundation historical and cultural studies course.

4245 Education and Spirituality: Holistic Perspectives U 3

Cross-disciplinary examination of spirituality from personal and cultural perspectives, including feminist, ecological, and postmodern views, with inquiry into spiritual practices impact on education. Prereq: Not open to students with credit for EduPL 705.

4280 History of Modern Education U 3

Development of educational institutions, practices, and theories in the modern world, particularly in U.S., and the social and intellectual movements influencing them.

4403 Ethics and the Professional Context of Teaching U 3

Examination of the practice of teaching at national, state and local levels, highlighting the legal, professional, and ethical issues surrounding American schools and teaching.

5194 Group Studies: Philosophy and History of Education U G 1 - 15

Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

5440	Philosophical Perspectives on Race, Education, and Citizenship	U G	3
This course allows participants to pursue philosophical questions at the intersection of race, education, and political life. These include: Does education play a very specific role in racialized patterns of benefit/detriment? What role does race play in understandings of educational policy & practice? How does race affect understandings of 'education for citizenship'? Cross-listed in Philos.			
6250	History of Education	G	3
Examines the historical role of educational institutions in the development of nations; theoretical perspectives regarding the purposes of education and teaching practices.			
6403	Ethics and the Professional Context of Teaching	G	3
Examines the practice of teaching at national, state, and local levels, highlighting the legal, professional, and ethical issues surrounding American schools and teaching.			
6410	Philosophy of Education	G	3
An introduction to key philosophical issues in education, focusing on the questions: Who should be educated? What should be taught? Who gets to decide? Prereq: Not open to students with credit for EduPL 650.01.			
7222	History of Educational Policy	G	3
Historical analysis of social, economic, and political factors shaping public school policy in the US since 1800. Prereq: Not open to students with credit for EduPL 722.			
7240	Life History & Interview Methods	G	3
Explores Life History interview methods in education; provides students opportunity to conduct life history interviews. Cross-listed in ESQual.			
7324	History of Educational Administration	G	3
A historical study of educational administration and leadership with particular attention to developments in the United States. Repeatable to a maximum of 6 cr hrs.			
7410	Modern Trends in Philosophy of Education	G	3
A study of contemporary work in philosophy of education and applications of that work to educational practice. Prereq: Not open to students with credit for EduPL 702.			
7414	Examining Knowledge, Truth, and Objectivity: Philosophy of Science for Educational Researchers	G	3
Examines the ongoing controversies in educational research in light of work from the philosophy of science and social science. Prereq: Not open to students with credit for EduPL 882.			
7572	History of Colleges and Universities	G	3
A historical study of higher education with particular attention to the development of colleges and universities in the United States. Prereq: Not open to students with credit for EduPL 927.			
7999	Thesis Research: Philosophy and History of Education	G	1 - 18
Research for master's thesis purposes. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.			
8193	Advanced Individual Studies: Philosophy and History of Education	G	1 - 15
Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.			
8194	Advanced Group Studies: Philosophy and History of Education	G	1 - 15
Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
8201	Social Foundations of Education	G	3
Multiple theoretical perspectives that have shaped discussions regarding the social foundations of education from the 19th century to the present. Prereq: Not open to students with credit for EduPL 906.			
8410	Ethics and Education: Equality, Freedom, and Justice in Schools	G	3
Examines the moral dimensions of educational policy and practice. Topics of consideration will include school choice, educational equality and school funding, civic education, religious and cultural accommodations, and parent and student rights. Prereq: Not open to students with credit for EduPL 828.			
8411	Educational Philosophy of John Dewey	G	3
A systematic study of the writings of John Dewey and their bearings upon educational theory and practice. Prereq: Not open to students with credit for EduPL 902.			
8895	Seminars: Philosophy and History of Education	G	2 - 5
Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.			
8999	Dissertation or Thesis Research: Philosophy and History of Education	G	1 - 18
Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.			

7225	Approaches to Policy Inquiry	G	3
Introduction to guiding principles for policy inquiry and analyses. The focus is on learning analytical vocabularies and approaches distinctive to policy inquiry. Students learn to read and think critically and creatively about public policy problems and solutions through the lens of research. Cross-listed in ESEPol.			
7230	Qualitative Research for Educators	G	3
Introduction to qualitative research at the Master's level and to the history, methods, and substantive topics of educational ethnography. Prereq: Not open to students with credit for EduPL 798.			
7240	Life History & Interviewing Methods	G	3
Explores Life History and other interview methods in education; provides students opportunity to conduct life history interviews. Cross-listed in ESPHE.			
7256	Qualitative Research in Higher Education Settings	G	3
This course serves as an introduction to the field of qualitative research in higher education contexts. As such, it provides an introduction to the epistemological, theoretical, and methodological foundations that guide qualitative inquiry. Cross-listed in ESHESA.			
8201	Community-Based Research and Evaluation in Educational Administration	G	3
The course focuses on identifying, understanding and addressing problems of practice at the community level. Through class discussions and assignments, students will become familiar with developing community inquiry that centers on community strengths and issues through problem-mapping, evaluation and community based participatory research (CBR). Prereq: Permission of instructor. Cross-listed in ESEAdm.			
8280	Qualitative Research in Education: Paradigms, Theories, and Exemplars	G	3
Examination of issues and problems of qualitative research in education research, with emphasis on the connections of theory, methods, politics, design, and practice in the conduct of qualitative research in schools and other educational settings.			
8285	Qualitative Data Analysis Methods and Applications	G	3
In this class, we discuss and practice some foundational analytical skills that I hope will serve you regardless of the specific analysis method you use or end up using. We will also apply these skills to specific data analysis to different data analysis methods so that you can get a better sense of how these differ. Cross-listed in ESPHE and ESHESA.			
8286	Critical Qualitative Approaches to Policy and Race in Education	G	3
This advanced course explores contemporary qualitative methodologies and theories and their application to education policy analysis. With a focus on critical qualitative approaches, this course will support students who desire to study diverse methodologies and theories from their ontological and epistemological basis of research design to their implementation. Prereq: ESHESA 7256, ESQual 7256, or 8280; and Grad standing, or enrollment in one of the professional schools. Cross-listed in ESEPol.			
8287	Narrative Inquiry in Educational Studies	G	3
This qualitative research course introduces students to narrative inquiry as a research tradition and practice. Drawing upon the major assumptions of critical qualitative inquiry, we will engage narrative inquiry through academic texts, popular readings, course discussions, field observations, and reflective writing practices. Prereq: Grad standing or enrollment in one of the professional schools.			
8288	Intersectionality in Qualitative Research	G	3
This course introduces students to the historical, philosophical, and theoretical underpinnings of intersectional qualitative research. We will examine how race, gender, and other overlapping identities intersect with systems of power to shape our understandings of social phenomena. Students contemplate intersectionality as a critical methodological tool and as a social justice intervention. Prereq: Grad standing, or registration in one of the professional schools.			
8289	Digital Tools in Qualitative Research	G	3
Seminar and workshop in using digital tools for qualitative research. Uses of audio, video, and text technologies in qualitative fieldwork; uses of web-based media and on-line documents. Prereq: 8280 or EduPL 8280, or permission of instructor.			
8290	Qualitative Research in Education: Methods and Analysis	G	3
Qualitative research practicum. Students learn to use qualitative methods (including interviewing, observation, participant observation, and document-based research), analysis, and writing by designing and conducting a small-scale study. Prereq: 8280 or EduPL 8280.			
8526	Advanced Qualitative Inquiry toward Educational Equity and Social Justice	G	3
The focus of this advanced capstone qualitative course is to analyze and write up a small pilot study touching all areas of a research study (i.e., epistemological, ontological, axiological, methodological, collection, analysis, writing up the discussion, research dissemination) with Educational Equity and Social Justice lens. You, the researcher, and your decisions are important to this course. Prereq: 7256, 8280, ESHESA 7256, or equivalent course. Cross-listed in ESHESA.			
8895	Seminars: Qualitative Research in Education	G	3
Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Repeatable to a maximum of 24 cr hrs.			

156 Educational Studies: Quant Rsrch, Evaltn & Msrmt

Educational Studies: Quant Rsrch, Evaltn & Msrmt

3005 Learner Centered Classroom Assessment U 3

Offers an in-depth look at classroom assessment that meets the needs of 21st century teaching and learning. During this course, prospective teachers will determine how classroom assessment strategies can benefit their teaching practices and their students learning. They will study how to plan, develop, and manage student-centered assessment.

5193 Individual Studies: Quantitative Research, Evaluation, and Measurement U G 1 - 15

Individual study projects. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 24 completions. This course is graded S/U.

5194 Group Studies: Quantitative Research, Evaluation, and Measurement U G 1 - 15

Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

6621 Introduction to Educational Evaluation G 3

Introduction to educational evaluation, including history, models, theories, politics of evaluation, and ethical standards for evaluators and the conduct of evaluations.

6625 Introduction to Educational Research G 3

Designed to acquaint students with the nature of the research process and strategies for conducting studies of various aspects of education and related fields.

6641 Introduction to Educational Statistics G 4

An introduction to quantitative techniques, with an emphasis on educational settings. Prereq: Not open to students with credit for EduPL 786.

6661 Introduction to Educational Measurement G 3

Provides a general survey of measurement and testing, including test evaluation, basics of test construction, validity and reliability. Prereq: Introductory grad level statistics course (e.g., Stat 6641) or equiv. Not open to students with credit for EduPL 744.

7635 Advanced Research Methods G 3

In-depth analysis of threats to causal inferences and methods for developing research designs to address those threats. Experimental, quasi-experimental, and data collection strategies will be discussed. Prereq: 6641 or EduPL 6641, or equiv.

7648 GLM I: Introduction to Regression and ANOVA G 4

Analysis of univariate outcomes via regression and analysis of variance models for experimental and non-experimental research designs. Connections between ANOVA and regression models will be stressed, including analysis of variance, multiple comparison procedures, factorial analysis of variance, regression models and methods of entry, coding for categorical variables, analysis of covariance. Prereq: 6641 or permission of instructor.

7658 GLM II: Advanced Regression and ANOVA G 4

This course covers advanced regression and analysis of variance through the lens of the linear and generalized linear model (GLM). Value of the GLM and its connections between anova and regression models, and treatment of continuous versus discrete outcomes will be stressed. We will cover interactions between categorical and continuous predictors in experimental and non-experimental designs, etc. Students should be comfortable analyzing data in SPSS; lab work will be supplemented with R. Prereq: 7648, or permission of instructor.

7661 Instrument Construction G 3

Design of instruments for use in educational research and assessment, including surveys, with emphasis on standards for educational and psychology testing and cultural issues in instrument design.

7663 Test Reliability and Validity G 3

Conceptual underpinnings of test reliability and validity, historical examination of developments in reliability and validity, classical and modern trends of reliability and validity.

7999 Thesis Research: Quantitative Research, Evaluation, and Measurement G 1 - 18

Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8193 Advanced Individual Studies: Quantitative Research, Evaluation, and Measurement G 1 - 12

Advanced individual projects. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8194 Advanced Group Studies: Quantitative Research, Evaluation, and Measurement G 1 - 15

Advanced group projects. Prereq: Permission of instructor. Students with permission of advisers may register for more than one section or the same section two or more times. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8648 Multivariate Analysis G 3

This course provides comprehensive coverage of statistical methods for multivariate designs and builds on your knowledge of univariate designs and regression analysis. A variety of multivariate techniques will be covered. The goal of this course is to prepare students to analyze and interpret multivariate data and be good consumers of multivariate research. Prereq: 7648 and 7658, or permission of instructor.

8658 Applied Multilevel Data Analysis G 3

Methods for the analysis of multilevel data with an emphasis on impact of intraclass correlation, analysis strategies, estimation, model testing, and interpretation. Prereq: 7648 and 7658, or permission of instructor.

8659 Structural Equation Modeling G 3

Basic concepts of structural equation modeling, including approaches to regression, path analysis, confirmatory factor analysis, and structural model building, as well as some advanced models. Prereq: Students should have successfully completed several introductory and intermediate level graduate statistics courses. Not open to students with credit for EduPL 883.

8668 Longitudinal Data Analysis G 3

This course is designed to teach students the uses of longitudinal data analysis in educational/social science research. We will cover modern methods to analyze longitudinal data mainly under the multilevel modeling framework. The traditional approaches, such as repeated measures of ANOVA and MANOVA, will be briefly discussed. Students are expected to have strong background in regression analysis (ANOVA and Multiple Regression). Prereq: 7648 and 7658, or permission of instructor.

8669 Advanced Structural Equation Modeling G 3

This course will cover the advanced topics of structural equation models including: structural equation models with categorical observed variables, interaction effects between latent factors, multilevel structural equation models, latent growth models, and growth mixture models. These techniques are useful for both experimental and non-experimental data; for cross-sectional datasets; and others. Prereq: 8659.

8674 Scaling and Item Response Theory (IRT) G 3

Models and methods for scaling data, with a focus on various IRT methods including the one-parameter model. Prereq: 6661 or EduPL 6661. Not open to students with credit for EduPL 874.

8725 Quantitative Methods Capstone Seminar G 3

This seminar is the capstone experience of the GIS in Quantitative Research Methods. Much of the work will be student-identified and student-led. The course will consist of work in: identification of new or emerging topics or software in quantitative methods; readings and discussion on advanced topics; student-led demonstrations or presentations; and GISQRM paper updates and progress reports. Students entering this course must have completed or nearly completed their GISQRM coursework. See the GISQRM website for details. Cross-listed in HDF5 and VetPrev.

8895 Seminars: Quantitative Research, Evaluation, and Measurement G 2 - 5

Seminar in topics of special interest. Students with permission of advisers may register for more than one section of 8895, or for the same section two or more times. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 12 completions.

8999 Dissertation or Thesis Research: Quantitative Research, Evaluation, and Measurement G 1 - 18

Research for thesis or dissertation purposes only. Prereq: Permission of instructor. Repeatable. This course is graded S/U.

Educational Studies: School Psychology

6189 Field Based Experience in School Psychology G 3

Practical experience conducting school psychological services in public schools. Repeatable to a maximum of 6 cr hrs.

7028 Cultural Diversity G 3

Provide students with the opportunity to develop a multicultural awareness as they explore the impact of an increasingly diverse society in the United States. Prereq: Not open to students with credit for EduPAES 728.

7029 Urban Issues in Education G 2

Understanding of the dynamics of urban schools and the relationship between minority status and poverty, and educational achievement in urban schools. Prereq: Not open to students with credit for EduPAES 729.

7189 Advanced Practicum in School Psychology I G 3

Advanced practical experiences conducting school psychological services in multiple settings. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7193 Advanced Individual Studies: School Psychology G 1 - 12

Advanced individual studies in School Psychology. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

8056 Roles and Function of School Psychologists G 3

Introduction to the multiple professional roles and functions of school psychologists including professional and ethical principles of professional practice.

8057 Cognitive Assessment G 3

This course trains school psychology student in the scientist-practitioner model of psychological assessment. The course covers theories of intelligence and the administration, scoring, and interpretation of cognitive ability assessments. Use of these assessments in disability determination and consultation in the schools and clinical settings will be stressed. Prereq: Not open to students with credit for EduPAES 857 or 858.

8058 Assessment of Academic Achievement G 3
 Explores various ways to assess academic achievement for the purposes of diagnosing disability and other learning needs. Students will be exposed to a variety of academic achievement assessments and learn to administer, score, and interpret them. Types of academic achievement assessments will include norm-referenced standardized academic achievement and curriculum-based instruments. Prereq: 8057.

8060 Linking Academic Assessment to Intervention G 3
 Using curriculum-based assessments to target specific academic skills and appropriate interventions, implementing academic interventions, and evaluating their effectiveness.

8077 Mental Health I: Mental Health Issues in the Schools G 3
 Child and adolescent psychopathology, characteristics, etiology, and empirically supported interventions and programming that address these issues. Prereq: Not open to students with credit for EduPAES 877.

8078 Mental Health II: Counseling in the Schools G 3
 Common social-emotional issues of children and adolescents and how to effectively implement empirically supported interventions to address these issues with a focus on counseling in the schools. Prereq: 8077 or EduPAES 8077, or permission of instructor.

8079 Mental Health III: Social Emotional Assessment G 3
 Social-Emotional and behavioral assessment of children in the school setting; introduction to linking assessment to intervention; and discussion of developmental, diversity, and urban issues related to assessment with children. Prereq: Not open to students with credit for EduPAES 878.

8080 Biological Basis of Behavior: Neuropsychology in the Schools G 3
 Discussion of brain development and functioning as it relates to typical and atypical outcomes among children and adolescents; overview of learning and psychological disorders from a school neuropsychological perspective.

8081 Professional Ethics and Supervision in School Psychology G 3
 This course is designed to help students understand and apply professional ethics and supervision skills in the professional practice of school psychology. Prereq: 8056.

8082 School-based Consultation: Implementing Behavioral Interventions G 4
 Development of a conceptual understanding of school-based consultation and its use as the foundation for the implementation of behavioral interventions both individual and group. Prereq: Not open to students with credit for EduPAES 882 or 883.

8189 Advanced Practicum in School Psychology II G 2
 Application of school psychology supervisory and leadership skills. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.

8191.01 EdS Internship: School Psychology G 3 - 6
 Application of school psychologists roles and functions as intern in a public school setting for EdS students. Prereq: Majoring in School Psychology. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

8191.02 Doctoral Internship: School Psychology G 3 - 6
 Application of school psychology roles and functions as intern in a public school setting for PhD students. Prereq: Admission to the School Psychology major. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is graded S/U.

8998 Research: School Psychology G 1 - 12
 Conducting dissertation research. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

8999 Dissertation/Thesis Research: School Psychology G 1 - 12
 Conducting thesis or dissertation research in school psychology. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

Educational Studies: Special Education

2251 Introduction to the Special Education Profession U 3
 An overview of special education, including individuals with sensory, orthopedic, behavioral, or learning disabilities plus individuals identified as gifted.

2252 Becoming a Special Education Professional and Lifelong Learner U 1½
 This course was designed to create a learning community among incoming undergraduate students new to the Special Education program. The course focuses on increasing student understanding of our profession including the professional competencies and the path towards achieving them.

2650 Introduction to Young Children with Exceptionalities U 3
 Intro to Young Children with Exceptionalities is an overview of the education and early care of exceptional learners from birth to the early grades. This course will focus on young children whose attributes/learning abilities differ from the norm to such an extent that an individual family service plan (IFSP) or an individualized program of special education (IEP) is required to meet their needs.

3189 Field Experience: Special Education U 1 - 12
 Professional service in school or community settings. Prereq: Admission to the Special Education program, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

3251 Introduction to Explicit Instruction U 1½
 This course lays the foundations for providing evidence-based instruction to students by learning how to design lessons that focus on explicit instruction. Students will learn how to plan intensive, specially-designed instruction for students with disabilities. The course focuses on designing lessons that are driven by clearly defined learning objectives, planned and effective modeling.

3252 Strategies for Active Student Responding U 1½
 This course provides guiding principles, basic strategies, and practical techniques for enhancing: designing lessons to ensure that each student makes many active curriculum-related responses and providing effective and efficient instructional feedback to students. These strategies can also be applied to one-to-one instruction, peer/cooperative-learning activities, independent work and homework

4190 Preparing for Professional Life as an Intervention Specialist U 6
 This course is designed to ready you for student teaching, licensure requirements, and life as a professional intervention specialist. It includes a semester-long partial-week practicum in addition to group seminars. Candidates will engage in their pre-student practicum in the delivery mode dictated by respective local boards of education. This course is graded S/U.

4191.01 Student Teaching in Special Education: Early Childhood U 12
 Student teaching for Special Education students in early childhood intervention. Prereq: 5761. This course is graded S/U.

4191.02 Student Teaching in Special Education: Mild/Moderate U 1 - 12
 Student teaching for Special Education students in mild/moderate intervention. Prereq: 5735. This course is graded S/U.

4191.03 Student Teaching in Special Education: Moderate/Intensive U 12
 Student teaching for Special Education students in moderate/intensive intervention. Prereq: 5737. This course is graded S/U.

4251 Classroom Management U 1½
 This course focuses on current teaching practices in the field, with an emphasis on the examination of the research base of classroom management and social skill instruction. We focus on how to establish and maintain a positive learning environment. This course is intended for persons in professions related to education or service for children in the K-12 school system. Prereq: 5742.

4252 Intensive Interventions for Behavior Change U 1½
 In this course, future teachers will learn how to assess student behavior to determine the function or reason behind the behavior, design function-based interventions that reduce challenging behavior and increase desired behavior, train team members and families to implement interventions with fidelity and monitor and adjust the intervention plan as needed. Prereq: 4251.

4350 Teaching Adaptive Behaviors, Life Skills, and Executive Functioning Skills U 4½
 Evidence-based practices that will be emphasized in this course include systematic prompting, video prompting, video modeling, social narratives, cognitive behavioral therapy, and self-regulated strategy development. Students will not only be expected to develop intervention plans, but also to implement them with fidelity through role play. Prereq: 2251.

4360 Teaching Writing to Students with Disabilities U 3
 Students will learn about how to use the following approaches to support students' writing development: strategy instruction, explicit instruction, writing process approach, and writers' workshop. During the field-based clinical placement, students will administer informal pre- and post-assessments, identify appropriate student goals and objectives, implement lesson plans to align with goals. Prereq: 2650 or 5651.

4743 Individualized Education Programs U 1½
 This course will focus on the role intervention specialists play throughout the IEP process - before, during, and after the IEP meeting. Completion of this course will help candidates gain skills in gathering and analyzing assessment data, participating in the evaluation team (ETR process), collaborating with families and professionals, writing ambitious and realistic goals, identifying services. Prereq: 2251, or equiv.

4744 Supporting Secondary Transition for Students with Disabilities U 3
 This course is designed to provide teachers with skills to promote successful transition of students with disabilities from school to adult life. It will cover issues in defining, planning, promoting, and programming for transition that encompass employment, post-secondary education, residential, and community supports.

5124 Early Childhood and Elementary Inclusive Pedagogy U G 3
 This course explores sociocultural perspectives as the primary framework for understanding a social constructivist approach to learning and teaching in early childhood education. This course draws on the original sociocultural learning theory of Lev Vygotsky. Prereq: Permission of department. Cross-listed in EduTL.

158 Educational Studies: Special Education

5150 Introduction to Assistive Technologies to Support Students with Disabilities in Classrooms U G 1½

This introductory online course is designed to provide special educators with knowledge of low- and high-tech assistive technology (AT) in order to expand the ability of their students to communicate and to access learning in classroom settings. The course will explore how intervention specialists can work within a team of professionals to assess students' needs

5151 Twice and Thrice Exceptional Students U G 1½

This course introduces participants to gifted and talented (GATE) students with disabilities/exceptionalities, also known as Twice Exceptional (2E) and Thrice Exceptional (3E). We focus primarily on 2E and 3E students who have learning disabilities (LD). We also focus on ADHD, autism, visual and hearing impairments, and developmental delays. Prereq: 2251 or 5651.

5152 Strategic Integration of Content Across Settings for Students With Disabilities U G 1½

This course is designed to help teacher candidates acquire the skills and knowledge needed to develop interdisciplinary unit and lesson plans that meet the needs of learners with disabilities. Specifically, they will learn how to integrate individualized instruction into the general curriculum through strategic integration, strategy instruction, and flexible grouping. Prereq: 2251, or equiv.

5153 Programming for Generalized Outcomes U G 1½

Planning and delivering instruction that promotes the generalization and maintenance of the knowledge and skills taught is a major challenge faced by all teachers. This course presents guiding principles, general strategies, and specific tactics for planning and implementing instruction that promotes the generalization of newly learned knowledge and skills across people, time, settings, & behaviors. Prereq or concur: 5742, or equiv.

5154 Measuring Academic and Behavioral Progress for Learners with Disabilities U G 1½

This course focuses on identifying accurate and sensitive measures of student behavior and implementing appropriate observation and recording procedures. Prereq or concur: 5742 or 8200.

5189 Field Experience: Special Education U G 1 - 12

Professional service in school or community settings. Prereq: Admission in Special Education program, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

5189.01 Field Experience: Special Education: Early Childhood U G 1 - 12

Professional service in school or community settings. Prereq: Admission in Special Education: Early Childhood program, or permission of instructor. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

5189.02 Field Experience: Special Education: Mild/Moderate U G 1 - 12

Professional service in school or community settings. Prereq: Admission in Special Education: Mild/Moderate program, or permission of the instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

5189.03 Field Experience: Special Education: Moderate/Intensive U G 1 - 12

Professional service in school or community settings. Prereq: Admission in Special Education: Moderate/Intensive program, or permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

5191.01 Supervised Teaching in Special Education: Deaf & Hard of Hearing U G 8

This course is designed to assist preservice teachers in developing the necessary skills required for beginning level inservice teachers in P-12 settings for d/Deaf and hard of hearing children. Candidates are expected to perform all activities required of a typical classroom teacher. Prereq: 5189, Grad standing, and permission of instructor.

5193 Individual Studies: Special Education U G 1 - 12

Independent study in Special Education. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

5222 Working with Paraeducators U G 1½

Paraeducators are important members of the educational teams who serve students with disabilities. In this course, future special education teachers will learn about roles of paraeducators, a teacher's responsibilities in training and supervising paraeducators, strategies for fading paraeducator support, and approaches for resolving common problems that arise when supervising paraeducators. Prereq: 5283, or permission of instructor.

5239 Effective Instruction for Students with Dysgraphia and Other Learning Differences/Disabilities U G 3

Dysgraphia describes a condition that manifests as fine motor skill difficulties and language processing deficits that make writing tasks more difficult and time-consuming for students with dysgraphia. Enrollees will examine developmental theories and research related to the condition. They will also learn and implement effective instruction for struggling writers.

5282 Collaboration and School/Community Partnerships U G 1½

The goal of this course is to provide educators with information and competencies to develop, implement, and evaluate collaborative programs between school and community settings. Educators in all positions should be prepared to collaborate with community members so that students with disabilities are supported across settings.

5283 Collaboration with Diverse Families & Professionals U G 1½

Collaboration is important for reflective educators and research supports its positive effects for teachers and students as well as the impact of leadership on collaborative practices. Educators in all positions should be supported to collaborate with one another as well as with families and students.

5505 Multi-Tiered Systems of Support U G 3

Introduces students to the concept of multi-tiered systems of support. Emphasis on 1) strategies for assessing and teaching social skills to diverse learners in inclusive classrooms; 2) designing and implementing multi-tiered instructions within Response-to-Intervention Model; 3) collaborative differentiated instruction for whole class, small group, one-on-one teaching. Prereq: 5650 or EduTL 5501. Cross-listed in EduTL.

5651 Introduction to Exceptional Children U G 3

Introduction to Exceptional Children is an overview of the education of exceptional learners. This course focuses on students whose attributes/learning abilities differ from the norm to such an extent that an individualized program of special education is required to meet their needs. Enrollees will learn about the categories of special education (and their criteria), prevalence, and demographics.

5670 Cultural Diversity and Equity in Special Education Classrooms and Settings U G 3

This course focuses on the special educational needs of minoritized learners with exceptionalities. This course will examine and interrogate how the U.S. educational system's norms, beliefs, assumptions, and practices/actions about culture (race, ethnicity, income and class, ability, and language) influence access, opportunities, and the outcomes of CRELD students with exceptionalities.

5722 Language and Communication Development for Children with Mild to Intensive Disabilities U G 3

Examines current principles and practices in the development of alternative communication programs for individuals with mild to intensive disabilities. Prereq: Admission to special education program, or Grad standing, or permission of instructor.

5722.01 Language and Communication Development for Children with Mild to Intensive Disabilities: Early Child U G 3

Examines current principles and practices in the development of alternative communication programs for individuals with moderate to intensive disabilities. Prereq: Admission in Special Education: Early Childhood program, or permission of instructor.

5722.02 Language and Communication Development for Children with Mild to Intensive Disabilities: Mild/Mod U G 3

Examines current principles and practices in the development of alternative communication programs for individuals with mild to intensive disabilities. Prereq: Admission in Special Education: Mild/Moderate program, or permission of instructor.

5722.03 Language and Communication Development for Children with Mild to Intensive Disabilities: Mod/Int U G 3

Examines current principles and practices in the development of alternative communication programs for individuals with mild to intensive disabilities. Prereq: Admission in Special Education: Moderate-Intensive program, or permission of instructor.

5722.04 Language and Communication Development for Children with Mild to Intensive Disabilities: HI U G 3

Examines current principles and practices in the development of alternative communication programs for individuals with mild to intensive disabilities. Prereq: Admission to Special Education: Hearing Impairment program, or permission of instructor.

5734 Methods of Instruction for Elementary Children with Mild/Moderate Disabilities U G 3

This is a method course with a field placement that will provide students with information and strategies for working with children who have mild disabilities. Prereq: 5742 or EduPAES 5742 (742). Open only to special education majors, or by permission of instructor. Not open to students with credit for EduPAES 734.

5734.01 Methods of Instruction for Elementary Children with Mild/Moderate Disabilities: Early Childhood U G 3

This is a method course with a field placement that will provide students with information and strategies for working with children who have mild disabilities. Prereq: 5742, or 5742.01, or EduPAES 5742 (742); and enrollment in Special Education: Early Childhood major; or permission of instructor.

5734.02 Methods of Instruction for Elementary Children with Mild/Moderate Disabilities: Mild/Moderate U G 3

This is a method course with a field placement that will provide students with information and strategies for working with children who have mild disabilities. Prereq: 5742 or 5734.02; and enrollment in Special Education: Mild/Moderate major; or permission of instructor.

5735 Methods of Instruction for Secondary Students with Mild/Moderate Disabilities U G 3

Provides advanced training in specialized techniques and advanced teaching strategies for middle and high school students with mild/moderate disabilities. Prereq: 5743 or EduPAES 5743, and Special Education major; or permission of instructor. Not open to students with credit for EduPAES 735.

5735.02 Methods of Instruction for Secondary Students with Mild/Moderate Disabilities: Mild/Moderate U G 3

Provides advanced training in specialized techniques and advanced teaching strategies for middle and high school students with mild/moderate disabilities. Prereq: 5743 or 5743.02; and enrollment in Special Education: Mild to Moderate major; or permission of instructor.

5736	Methods of Instruction I for Students with Moderate/Intensive Disabilities	U G	3
Introduction to designing and developing instructional programs for children with moderate to intensive disabilities, provides skills to identify instructional goals and objectives for children using meaningful assessment techniques. Prereq: 5742 or EduPAES 5742, and admission to Special Education program; or permission of instructor.			
5736.03	Methods of Instruction I for Students with Moderate/Intensive Disabilities: Moderate/Intensive	U G	3
Introduction to designing and developing instructional programs for children with moderate to intensive disabilities, provides skills to identify instructional goals and objectives for children using meaningful assessment techniques. Prereq: 5742, or 5742.02, or EduPAES 5742; and admission in Special Education: Moderate to Intensive program; or permission of instructor. Not open to students with credit for EduPAES 736.			
5737	Methods of Instruction II for Students with Moderate/Intensive Disabilities with Practicum	U G	3
Provides teacher candidates with the skills to implement and evaluate student performance using systematic data collection so that skill acquisition can be monitored over time. Prereq: Open only to special education majors, or permission of instructor.			
5737.03	Methods of Instruction II for Students with Moderate/Intensive Disabilities with practicum: M/I	U G	3
Provides teacher candidates with the skills to implement and evaluate student performance using systematic data collection so that skill acquisition can be monitored over time. Prereq: Enrollment in Special Education: Moderate/Intensive majors, or permission of instructor.			
5738	Reading Instruction for Children with Disabilities or Severe Reading Deficits	U G	3 - 4½
Course presents instructional strategies for teaching reading skills to learners who struggle with reading. Provides alternative strategies for the explicit teaching of reading and will focus on effectively teaching the five critical areas of reading instruction designated by the National Reading Panel. Prereq: Enrollment in the Special Education Program.			
5738.01	Reading Instruction for Children with Disabilities or Severe Reading Deficits: Early Childhood	U G	3
Information on how to effectively instruct reading to children with reading disabilities. Students will be paired with an urban learner whom is significantly below basic reading level for his/her grade. Prereq: 5734 or 5734.01, and 5736 or 5736.01; or EduPAES 5734 (734), and 5736 (735); or Grad standing in Special Education: Early Childhood. Coreq: 5189.01. Repeatable to a maximum of 6 ch hrs.			
5738.03	Reading Instruction for Children with Disabilities or Severe Reading Deficits: Moderate/Intensive	U G	3
Information on how to effectively instruct reading to children with reading disabilities. Students will be paired with an urban learner who is significantly below basic reading level for his/her grade. Prereq: 5734 or 5734.03, and 5736 or 5736.03; or EduPAES 5734 (734), and 5736 (735); or Grad standing in Special Education: Moderate/Intensive. Coreq: 5189.03. Repeatable to a maximum of 6 cr hrs.			
5739	Teaching Math to Students With Disabilities	U G	4½
Course designed to teach pre-service teachers effective instructional strategies for elementary learners (K-6) with mild to moderate disabilities. Students will be taught methods for diagnostic assessment and monitoring student progress as well as concurrently adjusting instruction based on data to meet student needs. Prereq: 3251 and 3252.			
5742	Applied Behavior Analysis for Teachers	U G	3
Study of principles of behavior for the development and maintenance of academic and social behaviors.			
5743	Educational Assessment of Students With Mild/Moderate Disabilities	U G	3
Advanced training and specialized techniques in teaching methods for middle and secondary students with mild disabilities. Prereq: 5742; and admission to the Special Education program, or Grad standing; or permission of instructor.			
5750	Classroom and Behavior Management for Students with Disabilities	U G	3
Developing a positive learning environment and understanding definition of social skills; importance of teaching social skills, special social skill needs of individuals with disabilities; how to assess, teach, and evaluate social skill instruction. Prereq: Admission to the Special Education program, or permission of instructor.			
5755	Inclusive Classroom Management	U G	3
Students will learn best practice for positive behavior support and inclusion of students with special needs. Prereq: 5742.			
5760	Educational Assessment in Early Childhood Special Education	U G	3
Study of the assessment of infants and preschoolers and young children with special needs with particular emphasis placed on measurement for screening and instructional program planning. Prereq: Admission to Special Education program, or Grad standing, or permission of instructor.			

5760.01	Assessment in Early Childhood Special Education	U G	3
Study of the assessment of infants and preschoolers and young children with special needs with particular emphasis placed on measurement for screening and instructional program planning. It is recommended to complete ESSpEd 5742 prior to this course, but not required. Prereq: Grad standing, or admission in Special Education: Early Childhood program, or permission of instructor.			
5761	Educational Intervention for Young Children with Disabilities	U G	3
Study of instructional programming for language, communication, sensorimotor, cognitive, and social development in early childhood environments. Prereq: Admission to Special Education program, or Grad standing, or permission of instructor. Not open to students with credit for EduPAES 761.			
5761.01	Instructional Programming in Early Childhood Special Education	U G	3
Study of instructional programming for language, communication, sensorimotor, cognitive, and social development in early childhood environments. Prereq: Grad standing, or admission in Special Education: Early Childhood program, or permission of instructor.			
5769	Delivering Effective Services to Enhance the Inclusion of Students with Special Needs	U G	3
Designed to prepare special education teachers to work with administrators, general education teachers, parents and paraprofessionals to deliver instruction in inclusive settings. Prereq: Enrollment in Special Education major, or permission of instructor.			
5777	Anti-racist, Culturally Responsive Education: Theories, Models, and Strategies	U G	3
This course focuses on cultural diversity/differences and the ways in which culture (related extensively to race and ethnicity) has been and continues to be defined and addressed in the American educational system (P-12 primarily, with attention to higher education). The fundamental course focus is the achievement gap (which has many other names, such as expectation and opportunity gap). Cross-listed in EducSt 5777.			
5850	Fundamentals of Dyslexia Screening & Intervention	U G	3
This course provides a solid foundation for understanding what dyslexia is and what constitutes effective instruction/intervention for students with dyslexia, as well as for those who exhibit the characteristics of dyslexia but have not been identified as having it.			
5887	Introduction to Gifted and Talented Education	U G	3
This introductory course is designed to expose teachers, administrators, counselors, and others who work with gifted and talented (GATE) students (or are interested in GATE) to the fundamental literature and issues in gifted and talented education, as well as programs and services designed to meet the needs of GATE students. Prereq: 2650.			
5888	Equitable and Culturally Responsive Gifted and Talented Education	U G	3
The goal of this course is to prepare you to develop knowledge, skills, and dispositions related to research, theory, policy, and practice in GATE that is equitable and culturally responsive. Recognizing and appreciating race, class, gender, and linguistic diversity/differences within home, schools, and community settings is of critical concern within this course.			
5889	Socio-Emotional, Psychological, and Academic Development and Needs of Gifted and Talented Students	U G	3
This course is designed to expose educators who work with GATE students to the fundamental literature and theories on the socio-emotional/affective, psychological, and achievement-oriented development and needs of GATE students in general, along with those who are racially, ethnically, and culturally different. Prereq: 2650.			
5890	Curriculum, Programs, and Services for Gifted and Talented Students	U G	3
This course is designed to expose teachers, administrators, counselors, and others who work with gifted and talented (GATE) students (or are interested in GATE) to curriculum, programs, and services to meet the academic needs of GATE students. A field placement is required. Prereq: 2650.			
6556	Reading for Students who are Deaf or Hard of Hearing	G	3
Designed to introduce students to selected issues, concerning literacy and deafness: theories of literacy, research, and current practices, reading materials and assessment, and the relationship between reading and writing.			
6650	Introduction to Exceptional Children	G	3
An overview of the education of exceptional learners including a discussion of their characteristics and a review of historical approaches to their education and of contemporary educational practices.			
7189	Advanced Field Placement in Orientation and Mobility	G	1
This course addresses observing and co-teaching a variety of blind/low vision students under the direct supervision of a Certified Orientation and Mobility Specialists (COMS) within a variety of settings. Emphasis is experience working with a diverse group of students, in a variety of settings; moving to reflection on the process and continuity of teaching (a student(s) over time. Prereq: Admission to Orientation and Mobility licensure program. Repeatable to a maximum of 15 or hrs. This course is graded S/U.			

160 Educational Studies: Special Education

7239 Effective Instruction for Students with Dysgraphia and Other Learning Differences/Disabilities G 3

This course serves as part of a larger study of struggling students with learning and attention issues. In this course, enrollees will examine developmental theories related to dysgraphia. They will also read research that supports the best practices and effective instruction for struggling writers at all age and grade levels and with various learning differences and/or disabilities.

7550 Advanced Studies in Deafness G 3

Designed to introduce graduate students to advanced issues concerning the linguistic, cognitive, and psychosocial aspects of students who are deaf and hearing impaired, including educational approaches and bilingualism/second-language.

7831 High Incidence Disability (HID) Seminar G 3

This is a doctoral seminar designed to address the critical issues and research in the area of high incidence disabilities (e.g., learning disabilities, behavior disorders, dyslexia, mild cognitive disabilities, attention deficit disorder, etc.). Prereq: Grad standing in ESSpED or related field.

7833 Severe Disabilities Seminar G 3

This course will provide graduate students the opportunity to explore current topics and issues specific to people with severe disabilities. In this course, we will explore the evidence-base related to improving outcomes for people with severe disabilities, directions that future researchers might take, and challenges currently faced by the field. Prereq: Grad standing in ESSpED or related field.

7892 Topics in Special Education Research G 3

Students will be introduced to a range of research agendas that focus on students with a range of exceptionalities and support needs. Specifically, they will be introduced to seminal literature across different special education populations, as well as current research that builds on the seminal literature.

7999 Thesis Research: Special Education G 1 - 6

Research for master's thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 30 cr hrs or 30 completions. This course is graded S/U.

8189 Field Experience in Special Education G 1 - 15

Planned counseling, supervisory, assessment, or teaching experience in a public school or other human service setting under supervision. Prereq: Admission to Special Education graduate program or permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions.

8191 BCBA Supervision G 3

This course is designed to provide students seeking BCBA certification with the required experiences in applied behavior analysis in school and clinical settings. Prereq: Admission to graduate program in Special Education (either MA or PhD level). Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

8193 Advanced Individual Studies: Special Education G 1 - 12

Advanced independent study in Special Education. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

8200 Basic Behavior Analysis G 3

This course provides students with an overview of basic behavioral processes related to human and nonhuman learning. This course focuses on the basic principles of the science of behavior, the direct application of these principles, and the use of data collection procedures for analysis of behavior.

8300 Behavioral Assessment G 3

This course will provide an overview of process for determining the function of a behavior and how to align behavioral interventions with the results of functional assessments. Content for this course is based on the BCBA Task List (5th ed.), which sets forth the knowledge and skills that serve as the foundation for BCBA certification. Specifically, this is an application-oriented course. A basic understanding of the principles of applied behavior analysis is required prior to enrollment.

8400 Behavioral Interventions in Special Education G 4

The purpose of this course is to equip practitioners with the knowledge and skills needed to effectively and efficiently produce successful outcomes for individuals with disabilities or who struggle with learning. Prereq: 8200, or permission of instructor.

8500 Personnel Management and Supervision G 2

Providing supervised field experience is often one of several job responsibilities required of a Board Certified Behavior Analyst (BCBA). Providing BCBA supervision requires the synthesis of interpersonal, management, problem-solving, and mentoring skills as well as a thorough knowledge of the certification board's field experience standards and evidence-based practices.

8662 Research Designs and Scholarship in Special Education G 3

This course is designed for special education doctoral students who are in their first or second year of study and has three major aims. Students will critically evaluate special education research studies, they will be able to identify examples of high-quality studies aligned with their research interests, and students will begin to conceptualize their own research agendas.

8832 Advanced Applied Behavior Analysis G 3

Advanced study of principles of behavior for the development and maintenance of academic and social behaviors.

8861 Single Case Research Design G 3

Designing, conducting, and critically evaluating research involving applications of the experimental analysis of behavior to problems and needs of individuals with disabilities in educational, clinical, and community settings.

8871 Behaviorism: Schedules and Translational Research G 3

Focuses on schedules of reinforcement and specialized areas of basic research that have influenced application with persons with developmental disabilities. Prereq: 8861 or EduPAES 8861 (861), and major in Special Education; or permission of instructor. Not open to students with credit for EduPAES 861.

8874 Behavioral Research in Education G 3

Examines methodological issues, strategies, tactics, advances, and ethical standards in behavioral research. Concepts will be applied in reviews and critiques of research in education. Prereq: 8871 or EduPAES 8871, and major in Special Education; or permission of instructor. Not open to students with credit for EduPAES 874.

8875 Professional Writing/Publishing in Special Education G 3

Allows students to acquire skills needed to write for publication in refereed journals. Prereq: Admission to Special Education program, or Grad standing, or permission of instructor.

8891 Contemporary Issues in Special Education G 3 - 9

Weekly teleconference seminars discussing current issues and research in special education with prominent scholars from other universities and research centers. Prereq: Admission to Grad program in Special Education, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions.

8916 Behaviorism: Applications and Implications of Skinner's Works G 1½

Students will be introduced to radical behaviorism as the philosophical foundation of behavior analysis and the implications of that philosophy for research and practice in special education. Graduate students preparing for leadership positions in special education should acquire a thorough understanding and appreciation of the philosophical foundations of the science of behavior. Prereq: 5742 or EduPAES 5742 (742), and a major in Special Education; or permission of instructor. Not open to students with credit for EduPAES 917.

8917 Verbal Behavior G 1½

Overview along with the implications and applications of Skinner's Verbal Behavior. Empirical and conceptual advances in the analysis of verbal behavior will be reviewed. Prereq: 5742 or EduPAES 5742 (742), and major in Special Education; or permission of instructor. Not open to students with credit for EduPAES 917.

8921 Ethical Issues in Applied Behavior Analysis G 3

Allows students to understand and engage in decision-making regarding general and special education practices. Identify critical issues of legal cases and ethical dilemmas.

8998 Research: Special Education G 1 - 15

Research for thesis and dissertation purposes only. Prereq: Grad standing in Special Education, or permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8999 Dissertation/Thesis Research: Special Education G 1 - 15

Research for the thesis and dissertation purposes only. Prereq: Major in Special Education, or permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

Educational Studies: Teacher Educ Policy & Ldrshp

5194 Group Studies: Teacher Education U G 1 - 15

Group study projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8194 Advanced Group Studies: Teacher Education G 1 - 15

Advanced group projects. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

Educational Studies: Workforce Development & Educ

5189.01 Career and Technical Education Field Experience I U G 2

Observation of career and technical education classrooms in a field-based setting. Prereq: Enrollment in EHE major, or Grad standing; or permission of instructor. Repeatable to a maximum of 6 cr hrs.

5189.02 Career and Technical Education Field Experience II U G 2

Supervised clinical teaching in a career and technical education classroom, field-based setting. Prereq: Enrollment in EHE major, or Grad standing; or permission of instructor. Repeatable to a maximum of 6 cr hrs.

5189.03 Career and Technical Education Clinical Field Experience I U G 2

Supervised clinical teaching in a career and technical education setting. Prereq: Grad or EHE standing, or permission of instructor. Not open to students with credit for EduPAES 575.02 or 668.02.

Educational Studies: Workforce Development & Educ 161

5189.04 Career and Technical Education Clinical Field Experience II U G 2

Supervised clinical teaching in a career and technical education setting. Prereq: Grad standing, EHE enrollment, or permission of instructor. Not open to students with credit for EduPAES 575.03 or 668.03.

5193 Individual Studies: Workforce Development & Education U G 1 - 12

Independent research on content and issues related to Workforce Development and Education. Prereq: Enrollment in the WDE program or working on a topic relevant to WDE and permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

5194 Group Studies: Workforce Development & Education U G 1 - 3

Group Study on topics related to workforce development and education. Prereq: Jr standing or above, or CED enrollment; and permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions.

5622 Introduction to Software Applications for Teachers and Trainers U G 3

Foundational understanding and skill development of computer software applications.

5623 Advanced Software Applications for Teachers and Trainers U G 3

Advanced understanding and skill development of computer software applications.

5624 Foundations of Workforce Development and Education U G 3

Offers economic, social, psychological and educational foundations of the fields in workforce development. Prereq: Not open to students with credit for EduPAES 624.

5649S Teaching Adults in the Workplace U G 3

Developmental and instructional approaches. Prereq: Jr standing or above.

5655 Coordination of Work-Based Learning for Career and Technical Education U G 3

Strategies for the development of work-based learning programs in career and technical education programs. Prereq: Standing in EHE, or Grad standing, or permission of instructor. Not open to students with credit for EduPAES 646.

5656 Foundations of Career and Technical Education Teaching U G 2

A foundational course in career and technical education for previously licensed teachers in other subject areas. Covers lab management, career-technical student organizations, advisory committees, funding, and other specialized topics related to career and technical education. Prereq: Grad standing, or enrollment in EHE major.

5665 Teaching Methods for Career and Technical Education U G 3

Instructional concepts for teaching career and technical education, including teaching methods and classroom/lab management. Prereq: Grad standing or enrollment in EHE, or permission of instructor. Not open to students with credit for EduPAES 665.

5667 Curriculum/Instruction and Assessment in Career and Technical Education U G 3

Study of curriculum/instruction and assessment procedures in career and technical education courses and programs. Prereq: Grad standing, or enrollment in EHE, or permission of instructor. Concur: 5189.02. Not open to students with credit for EduPAES 667 or 675.

5668 Career and Technical Education Capstone U G 1

Development of professional teaching portfolio. Prereq: Standing in EHE, or Grad standing, or permission of instructor. Not open to students with credit for EduPAES 575.06 or 668.06.

5672 Lifelong Learning in the Adult Years U G 3

Nature, extent and significance of adult in society. History, forms, methodologies, theoretical issues and philosophies. Prereq: Jr standing or above.

5677 New Career and Technical Education Teacher Clinic U G 4

Development of basic cognitive and performance skills for new career and technical education teachers. Prereq: Standing in EHE, or Grad standing, or permission of instructor. Not open to students with credit for EduPAES 668.01. This course is graded S/U.

5701 Fundamentals of Teaching Adults Online U G 3

Apply the concepts of teaching presence, social presence, and cognitive presence to the design and implementation of an online course. Prereq: Jr standing or above. Not open to students with credit for EduPAES 701 or 701D.

5784 Student Teaching in Career and Technical Education U G 12

Supervised clinical practice for career and technical education majors in a school setting. Passage required of either the Ohio Assessment for Educators content assessment for Integrated Business, or the Ohio Assessment for Educators content assessment for Family and Consumer Sciences. Prereq: Major in EHE, or Grad standing.

7000.01 Contemporary Research in Workforce Development and Education: Career and Technical Education G 3

This course is designed as an examination of the current research across the workforce development landscape. It will provide the opportunity to explore scholarly work, policy reports, and practitioner-focused reports that support the development of individuals for success in the workforce. It will delve into contemporary issues in WDE with a focus on career and technical education. Repeatable to a maximum of 30 cr hrs.

7000.02 Contemporary Research in Workforce Development and Education: Human Resource Dev and Adult Ed G 3

This course is designed as an examination of the current research across the workforce development landscape. It will provide the opportunity to explore scholarly work, policy reports, and practitioner-focused reports that support the development of individuals for success in the workforce. Repeatable to a maximum of 30 cr hrs.

7289 Practicum in Teaching Adults Online G 3

Course management system and content area. Learners will design and teach a lesson online. Provides an opportunity for students to practice the skills developed in the grad minor. Specialization in teaching in a virtual environment. Prereq: 7701 or EduPAES 7701, and ESWDE 5701 or EduPAES 5701; or ESETec 6282 or EduPL 6282.

7648 Evaluation of Adult Education and Human Resource Development G 3

Introduces methods of evaluating instructional approaches in education and corporate settings.

7701 Teaching and Learning at a Distance: Foundations of the Virtual Classroom G 3

An examination of the socio-cultural, political, economic, and educational trends and issues influencing the development and delivery of distance education. Issues of accessibility, access, affordability, technology, will be discussed.

7727 Assuring Quality in Online Course Design: Moving from Face to Face to Online G 3

In this fully online course learners will use the quality matters rubric and supporting documents to inform the design and implementation of instruction specifically for an online teaching/learning environment. The learner will develop and submit for peer review an online course or portion of an online course. Learners will also serve as a peer reviewer using the quality matters standards. Cross-listed in Nursing.

7757 Aspects of Human Resource Development G 3

Overview of theories, principles and practices of the human resource development field. Prereq: Not open to students with credit for EduPAES 757.

7935.40 Program Planning in Adult Education G 3

Examines the political, social and educational and cultural components in planning educational programs for adults.

8193 Advanced Individual Studies: Workforce Development & Education G 1 - 12

Advanced independent research on topics related to workforce development and education. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.

8911 Theoretical and Scholarly Perspectives on Workforce Development and Education G 3

Provides a framework for examining the theories and concepts in Workforce Development and Education. Prereq: Not open to students with credit for EduPAES 911 or 912.

8932 Adult Learning Theory G 3

Examination of significant learning theories and their application to adult learning experiences.

8961 Comparative Workforce Development Policy G 3

Provides a detailed overview of national workforce development policies across the world.

8999 Dissertation/Thesis Research: Workforce Development & Education G 1 - 3

An individual study course for those graduate students conducting independent research for a thesis or dissertation. Prereq: Doctoral standing, and permission of instructor. Repeatable to a maximum of 18 cr hrs or 18 completions with 999.40. This course is graded S/U.

Electrical and Computer Engineering

2020 Introduction to Analog Systems and Circuits U 3

Circuit theory and applications of passive components and Op amps. Introduction to analog systems using differential equations and Laplace transforms. Prereq: Math 1152, 1161.01, 1161.02, 1172, or 1181H; and Physics 1250, 1250H, 1260, CHEM 1210, or 1250. Not open to students with credit for 2100, 2100.02, 2100.06, 2100.07, 2100.08, 2105, 2106, 2110, 2127, 2137, 2300, or 2360.

2021 Introduction to Analog Systems and Circuits for Transfer Students Lecture U 2½

Lecture-only component of ECE 2020, for transfer students. Circuit theory and applications of passive components and Op amps. Introduction to analog systems using differential equations and Laplace transforms. Prereq: Math 1152 or 1161.01 or 1161.02 or 1172 or 1181H, and Physics 1250, 1250H or 1260, and CSE 1222 or 2221 or Engr 1281.01H or 1281.02H or 1222; and Engr 1182.01 or 1182.02 or 1182.03 or 1282.01H or 1282.02H or 1282.03H, or Engr 1186 and 1187 and concur: 1188 concurrent, or 1187 and 1188 and concur: 1186; and CPHR 2.00 or above. Not open to students with credit for 2020, 2100, 2100.02, 2100.06, 2105, 2106, 2110, or 2300.

2027 Introduction to Analog Systems and Circuits Lab for Transfer Students U ½

Laboratory-only component of ECE 2020, for transfer students. Laboratory practice with circuit theory, analog systems, and applications of passive components and Op amps. Prereq: 2021, and CPHR 2.00 or above. Not open to students with credit for 2020, 2100, 2100.02, 2100.07, 2100.08, 2127, 2137, 209, 292, or 294.03.

162 Electrical and Computer Engineering

2050 Introduction to Discrete Time Signals & Systems U 3

Introduction to sampled time signals and linear time invariant sampled time systems. Prereq: 2060, 2000, or 2061 and 2067; and CSE 1222. Prereq or concur: Math 2174 or 2568. Not open to students with credit for 2100, 2100.01, 2100.04, 2104, or 2110.

2051 Introduction to Discrete Time Signals & Systems Lecture U 2½

Introduction to sampled time signals and linear time invariant sampled time systems. Lecture only. Prereq: 2000, or 2060, or 2061 and 2067. Prereq or concur: Math 2174 or 2568. Not open to students with credit for ECE 2100, 2100.01, 2100.04, 2104, or 2050.

2057 Introduction to Discrete Time Signals & Systems Laboratory U ½

Introduction to sampled time signals and linear time invariant sampled time systems. Lab only. Prereq or concur: 2051. Not open to students with credit for 2100, 2100.01, 2100.04, 2104, 2110, or 2050.

2060 Introduction to Digital Logic U 3

Introduction to the theory and practice of combinational and clocked sequential networks. Prereq: Not open to students with credit for 2000, 2000.02, 2000.07, 2001, 2010, or 2017.

2061 Introduction to Digital Logic for Transfer Students Lecture U 2½

Lecture-only component of ECE 2060, for transfer students. Introduction to the theory and practice of combinational and clocked sequential networks. Prereq: Math 1152 or 1161.01 or 1161.02 or 1172 or 1181H, and Physics 1250, 1250H or 1260, and CSE 1222 or 2221 or Engr 1281.01H or 1281.02H or 1222; and Engr 1182.01 or 1182.02 or 1182.03 or 1282.01H or 1282.02H or 1282.03H, or Engr 1186 and 1187 and concur: 1188 concurrent, or 1187 and 1188 and concur: 1186, or major in CIS or CIS-PRE; and CPHR 2.00 or above. Not open to students with credit for 2000, 2000.02, 2001, 2010, or 2060.

2067 Introduction to Digital Logic Lab for Transfer Students U ½

Laboratory-only component of ECE 2060 for transfer students. Laboratory practice with and application of the theory of combinational and clocked sequential networks. Prereq: 2061, and CPHR 2.00 or above. Not open to students with credit for 2000, 2000.02, 2000.07, 2017, 2060, 270, 290, or 294.01.

2193 Individual Studies in Electrical and Computer Engineering U 0 - 10

Individual studies project. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 10 completions. This course is graded S/U.

2300 Electrical Circuits and Electronic Devices U 3

Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; theory and applications of electronic devices; operational amplifiers; electrical instruments and measurements. Prereq: Physics 1251 or 1261, and Math 1172 or 1544 or 2153 or 2162.01 or 2162.02 or 2182H or 4182H, and CPHR 2.0 or above, and enrollment in College of Engineering. Not open to students majoring in ECE.

2301 Electrical Circuits and Electronic Devices Lecture U 2½

Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; theory and applications of electronic devices; operational amplifiers; electrical instruments and measurements. Lecture portion only. Prereq: Physics 1251 or 1261, and Math 1172 or 1544 or 2153 or 2162.01 or 2162.02 or 2182H or 4182H, and CPHR 2.0 or above, and enrollment in College of Engineering. Not open to students with credit for 2300, or students majoring in ECE.

2307 Electrical Circuits and Electronic Devices Laboratory U ½

Introduction to circuit analysis; circuit analysis concepts and mechanical systems analogies; applications of electronic devices; operational amplifiers; electrical instruments and measurements. Lab only. Prereq or concur: 2301. Not open to students with credit for 2300, or students majoring in ECE.

2360 Electronics for CSE majors U 3

Electronics course for CSE majors. Basics of circuit analysis and design around embedded systems. Prereq: Engr 1182.01, 1182.02, 1182.03, 1282.01H, 1282.02H, 1282.03H, or 1282.04H, or 1186 and 1187 and 1188 concurrent; and Math 1152, 1161.01, 1161.02, 1172, or 1181H; and Physics 1250 or 1260; and CPHR 2.00 or above; and enrollment in CSE major. Not open to students with credit for 2020 or 2300.

2560 Introduction to Microcontroller-Based Systems U 2

Hardware and software organization of a typical microcontroller; machine language programming, interfacing peripheral devices, and input-output programming; real-time computer applications. Prereq: 2000, 2001, 2060, or 2061 and prereq or concur: 2000.07 or 2017; and CSE 1221, 1222, Engr 1281.01H, 1281.02H, or 1222, and enrollment in ECE, CSE, or EngPhysics major; or prereq or concur: 2010 or 2067, and permission of department. Not open to students with credit for CSE 2421.

2998.01 Undergraduate Research U ½ - 3

Supervised undergraduate research in various topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions.

2998.02 Undergraduate Research U ½ - 3

Supervised undergraduate research in various topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.

3010 Introduction to Radio Frequency and Optical Engineering U 3

Waves and pulses on transmission lines; charges, fields, and potentials; inductance and capacitance; Faraday's law; Maxwell's Equations; plane wave propagation, polarization, reflection, and transmission. Prereq: 2020, 2021, 2100, 2100.02, 2100.06, or 2105; and Physics 1251 or 1261, or both 1240 and 1241; and Math 2415 or 2174; and enrollment in ECE or EngPhysics major; or prereq or concur: 2010 or 2061, and permission of department. Not open to students with credit for 3010.01 or 3010.02.

3020 Introduction to Electronics U 3

Electronics: diode and transistor models for amplifiers, switches, and logic gates. Multiple transistor circuit analysis, op amps, and electronic systems. Prereq: 2100 or 2020; or 2021 or 2106, and 2027 prereq or concur; and ECE or EngPhysics major, or 2110 prereq or concur and permission of department.

3027 Electronics Laboratory U 1

Electronic amplification, signal processing, timing, and power regulation circuits. Experiments with electronics evaluation modules and use of an analog system lab kit for electronics testing. Prereq: 3020; and ECE or EngPhysics major.

3030 Semiconductor Electronic Devices U 3

Semiconductor materials and devices. Crystals; bandstructure; charge carrier statistics; excess carriers, transport; PN junction; Schottky barrier; bipolar and field-effect transistors; optoelectronic devices; nanoscale devices. Prereq: Physics 1251, 1261, or both 1240 and 1241; and Chem 1210, 1220, or 1250; and enrollment in ECE, MSE, or EngPhysics major. Prereq or concur: Math 2415 or 2174.

3040 Sustainable Energy and Power Systems I U 3

Introduction to electrical energy systems: history, current trends, renewable and non-renewable sources, rotating machines and their operation, and smart grid initiatives. Prereq: 2100, 2100.02, 2105, 2020, 2021, 205, 292, or 294 (Spring 2011), and enrollment in ECE or EngPhysics major. Not open to students with credit for 341.

3047 Sustainable Energy and Energy Conversion Lab U 1

Laboratory introducing basics of energy conversion processes for electrical energy supply systems utilizing conventional rotating machines and hardware-in-the-loop simulation system for sustainable energy systems. Prereq: 3040, and enrollment in ECE or EngPhysics major.

3050 Signals and Systems U 3

Linear systems and models in continuous and discrete time; convolution; Fourier series and transform; frequency response; Laplace transform; z-transform; applications. Prereq: 2020, 2050, and 2060; or 2100; and Math 2568; and enrollment in ECE or EngPhysics major.

3090 Technical Writing and Presentations U 1

Technical writing and communications skills. Concur: 3905, Engr 5901.01, or 5902.02.

3551 Introduction to Feedback Control Systems U 3

Provides fundamental concepts in feedback control systems design and analysis. Prereq: 3050.

3561 Advanced Digital Design U 3

Design and analysis of sequential circuits; digital circuit design using building blocks, programmable logic devices; design of basic computer components such as arithmetic logic units. Prereq: 2000, 2060, 2061, 2010, 2000.02, 290, 294 (Autumn 2010) or 206 and 261. Prereq or concur: 3020 (323), and enrollment in ECE, EngPhys, or CSE majors; or prereq or concur 2010 and permission of department. Not open to students with credit for 561.

3567 Microcontroller Lab U 1

Laboratory in which a microcontroller is used to interface real-world hardware to make a functioning system. Prereq: 2560 or CSE 2421, and enrollment in ECE, CSE, or EngPhysics major. Not open to students with credit for 3567.01.

3900 Capstone Design I U 1

Fundamentals of the engineering design process. Design principles and methodology. Project management during design. Prereq: Sr standing and enrollment in the ECE major. Prereq or concur: 3090. Not open to students with credit for 4900, 4900H, 4901, Engr 4901, 4903, 5901.01, or 5901.02H.

3905 Capstone Design I U 3

Fundamentals of the engineering design process. Application of design principles and methodology to conceptual and detailed technical design. Project management during design. Prereq: Option 1: Prereq or concur: 3080 or Philos 1332, and ECE 2560, 3010, 3020, 3027, 3030, 3040, 3050, and 3090, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Option 2: Prereq or concur: ECE 2050 or 2100, and 3080 or Philos 1332, and ECE 3020, 3027, 3090, 3561, 3567, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Not open to students with credit for 3900, 4900, 4900H, 4901, Engr 5901.01, 5901.02H, 5902.01, or 5902.02H. This course is progress graded.

Electrical and Computer Engineering 163

<p>3906 Capstone Design I U 4</p> <p>Fundamentals of the engineering design process. Application of design principles and methodology to conceptual and detailed technical design. Technical writing and communications skills. Project management during design. Prereq: Option 1: Prereq or concur: 3080 or Philos 1332, and ECE 2560, 3010, 3020, 3027, 3030, 3040, and 3050, and credit for a first writing course, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Option 2: Prereq or concur: ECE 2050 or 2100, and 3080 or Philos 1332, and ECE 3020, 3027, 3561, 3567, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Not open to students with credit for 3900, 3905, 4900, 4900H, 4901, or Engr 5901.01. This course is progress graded.</p> <p>4021 Analog Integrated Circuits I U 3</p> <p>Fundamentals of analog integrated circuits. CMOS transistors and diodes large-signal and small-signal operation and modeling. On-chip passive components operation and modeling. Simple and advanced current mirrors, single-ended and differential CMOS amplifiers, CMOS OTAs and Op-Amps. Integrated Circuits Fabrication, Packaging, and Testing. Prereq: 3020. Not open to students with credit for 5021.</p> <p>4193 Individual Studies in Electrical and Computer Engineering U 0 - 12</p> <p>Individual studies project. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 12 completions. This course is graded S/U.</p> <p>4567 Design of Mobile Internet-of-Things U 4</p> <p>This course focuses on theoretical and practical insights into design of Internet of Things architectures and mobile platforms. Concepts covered in this course include general IoT architectures, sensor, processing, and communication resources, device and cloud connectivity, mobility support. Practical aspects will be studied with lab assignments and the semester-long group projects. Prereq: 2560, 3020, and 3027.</p> <p>4900 Capstone Design II U 3</p> <p>Application of design principles and methodology to conceptual and detailed technical design, implementation, and testing of a capstone project. Prereq: Option 1: 2560, 3010, 3020, 3027, 3030, 3040, 3050, 3090, and 3900, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Prereq or concur: 3080 or Philos 1332. Option 2: 2050 or 2100; 3020, 3027, 3090, 3561, 3567, 3900, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Prereq or concur: 3080 or Philos 1332, and ECE 5362. Not open to students with credit for 4900H, 4901, or Engr 4903 or 5902.01.</p> <p>4900H Design II with Honors Thesis Project U 3</p> <p>Application of design principles and methodology to conceptual and detailed technical design, implementation and testing, culminating in a capstone design project. Prereq: Honors standing, and permission of department, and: Option 1: 2560, 3010, 3020, 3027, 3030, 3040, 3050, 3090, 3900, and Sr standing, and enrollment in Electrical Engineering Program of Study (EES subplan) of the ECE major. Prereq or concur: 3080 or Philos 1332. Option 2: 2050 or 2100; 3020, 3027, 3090, 3561, 3567, 3900, CSE 2231, and 2451, and Sr standing, and enrollment in Computer Engineering Program of Study (CES subplan). Prereq or concur: 3080 or Philos 1332, and ECE 5362. Not open to students with credit for 4900, 4901, Engr 4903, or 5902.01.</p> <p>4905 Capstone Design II U 3</p> <p>Application of project management, design principles and methodology to conceptual and detailed technical design, implementation, and testing of a capstone project. Prereq: 3905 and 3090, or 3906. Not open to students with credit for 4900, 4900H, 4901, Engr 5901.01, 5901.02H, 5902.01, or 5902.02H.</p> <p>4905H Capstone Design II with Honors Thesis U 3</p> <p>Application of design principles and methodology to conceptual and detailed technical design, implementation and testing, culminating in a capstone design project. Prereq: Honors standing; and 3905 and 3090, or 3906; and permission of department. Not open to students with credit for 4900, 4900H, 4901, Engr 5902.01 or 5902.01H.</p> <p>4998.01 Undergraduate Research U ½ - 3</p> <p>Supervised undergraduate research in various topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions.</p> <p>4998.01H Undergraduate Honors Research U ½ - 3</p> <p>Supervised research in various topics for undergraduate honors students. Prereq: Honors standing; or GPA 3.4 or above, and permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions.</p> <p>4998.02 Undergraduate Research U ½ - 3</p> <p>Supervised undergraduate research in various topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.</p> <p>4999.01 Undergraduate Thesis Research U ½ - 3</p> <p>Undergraduate Thesis (Distinction) research on topics in Electrical & Computer Engineering. Prereq: GPA 3.0 or above, and enrollment in ECE major, and approved Thesis (Distinction) project. Repeatable to a maximum of 6 or hrs or 6 completions.</p> <p>4999.01H Undergraduate Honors Thesis Research U ½ - 3</p> <p>Undergraduate Honors Thesis (Distinction) research on topics in Electrical & Computer Engineering. Prereq: Honors standing, or GPA 3.4 or above; and enrollment in ECE major; and approved Honors Thesis (Distinction) project. Repeatable to a maximum of 6 or hrs or 6 completions.</p>	<p>5000 Introduction to Analog and Digital Communications U G 3</p> <p>Communications channel modeling, analog communication schemes, digital communication schemes, error rate analysis, and error control coding. Prereq: 3050, and Stat 3470 or Physics 3700; or Grad standing.</p> <p>5007 Communications Laboratory U G ½</p> <p>A laboratory in digital data communication implementing a software-defined modem: quadrature modulation; phase-shift keyed modulation; inter-symbol interference; timing and frequency recovery. Prereq or concur: 5000 (501), and enrollment in ECE or EngPhysics major; or Grad standing in ECE. Not open to students with credit for 4007 or 508.</p> <p>5010 Wireless Propagation and Remote Sensing U G 3</p> <p>Practical methods for predicting tropospheric, groundwave, and ionospheric propagation, including refraction, reflection, and extinction effects. Study of remote sensing systems and their applications. Prereq: 3010, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p> <p>5011 Antennas U G 3</p> <p>Electromagnetic radiation; fundamental antenna parameters; dipole, loops, patches, broadband and other antennas; array theory; ground plane effects; horn and reflector antennas; pattern synthesis; antenna measurements. Prereq: 3010 (312), or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 711.</p> <p>5012 Integrated Optics U G 3</p> <p>Fundamentals of planar lightwave circuits and guided wave devices; laser light in anisotropic media; electrooptic and nonlinear optical effects; concepts in telecommunications, RF photonics, nanobiotechnology. Prereq: 3010, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p> <p>5013 Introduction to Radar Systems U G 3</p> <p>Introduces the fundamentals of radar such as the main concepts and techniques used in modern radar systems. The class is a survey course exposing students to a wide range of radar applications and design issues. Prereq: 3050, and 3010 or 3010.01, and Stat 3470; or Grad standing in Engr. Not open to students with credit for 5194.01.</p> <p>5017 Microwave Engineering U G 4</p> <p>Transmission line theory; multiconductor; S-parameters; transformers, couplers, filters, resonators, circulators; electromagnetic interference and compatibility; computer-aided design; microstrip realization and testing with a network analyzer. Prereq: 3010, and enrollment in ECE major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p> <p>5020 Mixed Signal VLSI U G 3</p> <p>Design and circuit analysis of basic VLSI structures such as registers, cell libraries, digital and analog I/O. Physical layout, timing analysis, PLLs, design tools. Prereq: 3020, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p> <p>5021 Analog Integrated Circuits II U G 3</p> <p>Advanced analog integrated circuits. Linear feedback networks design and stability analysis, multi-stage CMOS op-amp design and compensation, fully-differential op-amps and common-mode feedback networks, comparators, transconductors, bandgaps, sample and hold circuits, switched-capacitor circuits, noise analysis of CMOS circuits. Prereq: 4021; or Grad standing in Engineering, and permission of instructor.</p> <p>5022 Introduction to RF Systems U G 3</p> <p>Intuitive system design methods to dissect the radio modem in analog & digital domains with emphasis on: a) performance evaluation using hand calculations and simulation, and b) understanding of the interaction between RF components and radio architectures. Topics include: system parameters, propagation & antennas, noise, distortion, modulation & aerial access, phase noise, RF transceivers. Prereq or concur: 4021 or 5021, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p> <p>5023 Fundamentals of Integrated Data Converters U G 3</p> <p>This course focuses on the fundamentals of Nyquist-rate and oversampled (Delta-Sigma) integrated data converters, including system and circuit architectures, performance metrics and characterization, practical implementations, and design considerations in advanced semiconductor processes. Nyquist-rate ADC architectures covered include flash, two-step, pipelined, SAR, and integrating architectures. Prereq: 4021, or Grad standing in Engr or Physics.</p> <p>5025 Power Electronics: Devices, Circuits, and Applications U G 3</p> <p>Provides an introduction to power electronic conversion principles. Analytical techniques will be developed through the study of widely used converter circuits. Prereq: 3020 (323), or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 624, 724, or 844.</p> <p>5027 Microwave Electronics U G 4</p> <p>Design principles of microwave transistor amplifiers and oscillators; low-noise, power and broadband amplifiers; linearization; computer-aided design; microstrip realizations and testing in the laboratory. Prereq: 3020 (323), and enrollment in ECE major; or Grad standing in Engineering, Biological Science, or Math and Physical Sciences. Not open to students with credit for 723.</p> <p>5031 Semiconductor Process Technology U G 3</p> <p>Discrete and integrated circuit device design, silicon VLSI processing technologies, III-V compound semiconductor device fabrication technologies: epitaxy, doping, bandgap engineering; and device measurements and failure mechanisms. Prereq: 3030, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.</p>
---	---

164 Electrical and Computer Engineering

5033 Surfaces and Interfaces of Electronic Materials U G 3

Provides the fundamental and practical basis for designing, processing, and characterizing the interfaces controlling the next generations of microelectronic and optoelectronic device structures. Prereq: 3030, or MatScEn 3271; or Grad standing in Engineering, Biological Science, or Math and Physical Sciences.

5037 Solid State Electronics and Photonics Laboratory U G 4

Introduction to laboratory techniques for semiconductor device fabrication including photolithography, oxidation, diffusion, chemical processes, reactive ion etching, and metallization; fabrication and measurements of visible light emitting diodes (LED) and GaN High Electron Mobility Transistor (HEMT). Prereq or concur: 3030, and acceptance in ECE, MSE or EngPhysics major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.

5041 Electric Machines U G 3

Principles of electromechanical energy conversion; basic structures of electric machines; steady state models and performance analysis; advanced topics on AC machine control. Prereq: 3020 (323) and 3040 (341), or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 743.

5042 Power Systems U G 3

A power system analysis course presenting power systems loads, modeling of transformers and power system model for voltage calculation and faults. Prereq: 3040, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.

5043 Power Systems - Analysis and Operation U G 3

Power systems analysis and operations, including steady-state analysis, state estimation, and economic operation. Prereq: 3040, Sr standing, and ECE major; or Sr standing and ISE major; and Math 2568; or Grad standing in engineering or biological sciences or math and physical sciences. Cross-listed in ISE.

5047 High Voltage Engineering and Laboratory U G 3

Dielectric strength and breakdown of gases, liquids, and solids, electric field design problems in power system equipment; laboratory study of high voltage insulation. Prereq: 3040 (341), and enrollment in ECE major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 747.

5050 Humanitarian Engineering U G 3

Poverty and underdevelopment. Goal of social justice. Development strategies. Engineering for the poor, weak, and developing communities. Humanitarianism in the university and engineering enterprise. Prereq: 1182 or 1282; or Grad standing; or permission of instructor. Not open to students with credit for Engr 5050.

5078 Empowering the Entrepreneurial Electrical and Computer Engineer U G 3

This course will teach entrepreneurial minded engineers the process of value creation from their ECE relevant technology or inventions. Topics covered will include self-assessment as an entrepreneur and innovator, analysis and validation of new venture opportunities, intellectual property creation and assessment new venture planning and project management, leadership and team building. Prereq: 3010, 3020, 3030, 3040, or 3050; or Grad standing in Engr. Not open to students with credit for 5194.13.

5101 Introduction to Wireless Networking U G 3

Fundamental concepts in cellular design, Wireless-LANs, MANETs, and sensor networks will be explored. Specific topics will include propagation, fading, cellular-design, power-management, routing, scheduling, and control. Prereq or concur: 3561 (561) or CSE 3461 (677), or Grad standing in Engineering or Math and Physical Sciences. Not open to students with credit for CSE 5463. Cross-listed in CSE 5463.

5120 Introduction to Integrated Circuits Test and Measurement U G 3

Parametric testing techniques for analog, digital, mixed and RF ICs, DSP-based testing; noise effects on accuracy; Design-for-Test and Built-in-Self Tests. Prereq: 3020, or 323 and 351, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 625, 694 (Spring 2009), or 694.04.

5127 Power Electronics Lab U G 1

Laboratory introducing basic circuits of power electronics, and simulation and control hardware and software for various power and energy applications. Prereq: 3040 (341) and enrollment in ECE major, or Grad standing in Engineering. Not open to students with credit for 628 or 647.

5131 Lasers U G 3

Atomic interaction with radiation, cavities with gain, optical processes in semiconductors, strain in laser design, diode lasers, and advanced semiconductor lasers. Prereq: 3010 and 3030, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.

5132 Photonics U G 3

Fiber optics, optical systems and devices, optical detection, photonic band gaps, holography, and optical data storage. Prereq: 3010, 3010.01, or 3010.02, and 3030 or 3030.01; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 5132.01.

5200 Introduction to Digital Signal Processing U G 3

Sampling and reconstruction; discrete-time rate conversion; processing of discrete-time signals; design of discrete-time filters, selected topics in adaptive filtering, time-frequency analysis, and wavelets. Prereq: 3050, and Stat 3470 or Math 4530; or Grad standing.

5206 Medical Imaging and Processing U G 3

Introduction to medical imaging techniques (CT, MRI, PET, ultrasound), including data collection, image reconstruction, physics of tissue interactions, and digital processing of medical images. Undergrad Prereq: 3050, and Concur: 3905; or BME 4110, and Concur: 3701. Grad Prereq: Grad standing in ECE, BiomedE, or Biophys. Not open to students with credit for BME 5160. Cross-listed in BME 5160.

5227 Fundamentals of Power Management Integrated Circuits for VLSI Systems U G 4

Theory, design and applications of integrated power management integrated circuits in VLSI systems. This includes: system and circuit architectures, performance metrics, practical implementations, design considerations in VLSI systems in advanced CMOS processes, and design techniques for integrated power regulators and battery chargers. Background in basic analog design is strongly recommended. Prereq: 4021, or Grad standing in Engineering or Physics.

5237 Photovoltaics Laboratory U G 4

Introduction to laboratory techniques for processing and fabrication of inorganic and organic solar cells, and photovoltaic testing and measurement techniques to characterize solar cells. Prereq: 3030 or MatScEn 3271, and enrollment in ECE or MatScEn major; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Cross-listed in MatScEn.

5244 Si and Wide Band Gap Power Devices U G 3

Basic design and operation of Si and Wide Band Gap (WBG: SiC, GaN and ultra wide band gap semiconductors) power devices and the applications of commercial devices in power electronics applications. Trade-offs between various devices. Static and dynamic operation. Comparison of Si and SiC devices and design differences. Prereq: 3030, or MatScEn 3271; or Grad standing in Engr or Physics. Not open to students with credit for 5194.07 or 5234.

5307 Introduction to Machine Learning for ECE U G 4

Introduction to Machine Learning. Coverage includes linear regression, linear classification, model and feature selection, neural networks, clustering, and principle components analysis. Python will be used for implementation examples. Prereq: CSE 1222 or Engr 1281.xx, and Math 2568 and Stat 3470, and enrollment in ECE major; or Grad standing. Not open to students with credit for 4194.02 (Sp19, Machine Learning), 4300, 5300, or MechEng 5194 (Au19, Applied ML for MAE).

5362 Computer Architecture and Design U G 3

Design of general purpose digital computers including arithmetic and control units, input/output, and memory subsystems. Prereq: 2560 and 3561, and undergraduate enrollment in ECE, CSE, or EngPhysics major; or Grad standing in Engineering. Not open to students with credit for CSE 3421.

5400 Instrumentation, Signals, and Control in Transportation Applications U G 3

Interdisciplinary course bringing together electrical engineering tools and transportation applications. Students gain valuable experience working in teams while learning traffic flow, surveillance and control. Prereq: 2020 and 2050, and Math 2415; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences, or permission of instructor. Not open to students with credit for CivilEn 4750 or 6750. Cross-listed in CivilEn 5750.

5460 Image Processing U G 3

Fundamentals and research directions in image processing: cameras, geometry, calibration, 2D and 3D image reconstruction, stereo, structure from motion, Radiometry, filtering, motion estimation, and applications. Prereq: Stat 3470, and Math 2568; or Grad standing in Engr, BioSci, Stat, BioMinf, or PhysSci.

5463 Introduction to Real Time Robotics Systems U G 3

Components of a robot system, robot forward and reverse kinematics; robot dynamics; robot force generation, robot trajectory generation. Prereq: Math 2177 or 2174, or 2415 and 2568; and Physics 1250, 1250H, 1260, or 2300; and CSE 1221, 1222, Engr 1181, 1281.01H, 1281.02H, 1221, or 1222; or Grad standing in Engr; or permission of instructor. Not open to students with credit for MechEng 5463 or 7752. Cross-listed in MechEng.

5465 Advanced Microcomputers U G 3

An investigation of current microcomputer structures with emphasis on hardware implementation of I/O, direct memory access, interrupts, memory, and microprogramming. Prereq: 5362, or 662 and 694A, or Grad standing in Engineering. Not open to students with credit for 765.

5466 Embedded Computer Systems U G 3

This course introduces the design principles, analysis methods and case studies of microprocessor-based and time-critical embedded systems, such as sensor and actuator networks, multimedia devices, mobile phones, and avionics. Topics include real-time operating systems, processor scheduling, performance control, resource management, power-aware design, energy optimization, etc. Prereq: 5362, or Grad standing in Engr. Not open to students with credit for 8194.03.

5500 Nonlinear and Dynamic Programming for ECE U G 3

Introduction to Optimization, including unconstrained optimization, gradient descent, Newton's method, convexity, constrained optimization, KKT, duality, dynamic programming, basic reinforcement learning, and applications of optimization in ECE. Prereq: Math 2568 and 2415; or Grad standing in Engineering or Math and Physical Sciences. Not open to students with credit for 5759.

Electrical and Computer Engineering 165

5510	Introduction to Computational Electromagnetics	U G	3
Numerical methods for solving Maxwell equations both static and electrostatics, introduction to finite difference, finite element and integral equation methods, and applied linear algebra. Prereq: 3010; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 715 or 813.			
5530	Fundamentals of Semiconductors for Microelectronics and Photonics	U G	3
Crystal structure, semiconductor energy band structure, electron transport and carrier recombination, heterostructures, and optical and dielectric properties. Prereq: 3030, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.			
5537	Semiconductor Device Characterization and Modeling Lab	U G	4
Laboratory course in material characterization, device fabrication, testing and modeling. Prereq: 3030; or grad standing in Engineering or Physics. Not open to students with credit for ECE 5194.17.			
5550	Feedback Control Engineering for Social Justice	U G	3
Models of individual and group poverty and underdevelopment; computational social justice; assessing social impact of technology; sensitivity analysis for technology prioritization and design; feedback control for computer automation of helping to meet social justice objectives. Feedback control for organizational diversity, optimal diverse team formation and functioning. Prereq: Jr, Sr or Grad standing in College of Engineering; or permission of instructor. Not open to students with credit for 5194.06.			
5551	State-Space Control Systems	U G	3
Discrete-time state variable representations; pole placement via state-feedback; introduction to realization theory; observer design; introduction to Kalman filtering; linear quadratic regulator theory. Prereq: 3050 and Stat 3470; or Grad standing.			
5553	Autonomy in Vehicles	U G	3
First course on automated driving vehicles and their sub-systems; automated driving history and architectures; car following control; steering control for path tracking, lane keeping; collision mitigation and avoidance; localization and situational awareness; lower and higher-level decision making including deep learning; connected vehicle technologies; evaluation of autonomous driving function. Prereq: 3551, 5551, or Grad standing in Engineering.			
5554	Powertrain Control Systems	U G	3
Application of digital control system theory, from viewpoints of input-output and state variable representations, to realistic problems in automotive powertrain systems. Prereq: 3551 or 5551, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences.			
5555	Securing Autonomous Systems	U G	3
The course covers different security measures for safeguarding against cyberattacks, detecting cyberattacks, and mitigating the effects of cyberattacks on autonomous control systems. Prereq: 3050 and 3551; or Grad standing in Engineering, Math, or Statistics.			
5560	Advanced Hardware Architecture Design Techniques	U G	3
This course introduces highly-practical methodologies and techniques that can be broadly used to improve the efficiency and achieve speed-area-power tradeoffs in the design of application-specific hardware implementation architectures for various algorithms. Efficient implementation architectures of commonly used arithmetic and digital signal processing functional blocks will also be discussed. Prereq: 2050, and prereq or concur: 3561 or 3050; or Grad standing in Engr; or permission of instructor. Not open to students with credit for 5194.08.			
5561	Introduction to Cybersecurity	U G	3
Introduction to cybersecurity. Technical fundamentals of data, software, component, network, and system security. Cybersecurity from an organizational and societal view point, including human factors. Prereq: Jr, Sr, or Grad standing, or permission of instructor. Not open to students with credit for CSE 5471. Cross-listed in CSE 5471.			
5567.01	Offensive Security	U G	3
This course will give students an overview of existing offensive computing techniques, which include well known attacks that break confidentiality, integrity and availability of computing resources. Attacks targeting on human weaknesses without taking special care to security will also be discussed. Prereq: CSE 2431, 5431, or Grad standing. Not open to students with credit for CSE 5477.01. Cross-listed in CSE 5477.01.			
5567.02	Reverse Engineering and Software Security	U G	3
This course will give students an overview of cutting edge reverse engineering techniques as well as software security and defense practices. Programming experience in C required. Prereq: CSE 1222, or permission of instructor. Prereq or concur: ECE 5561. Not open to students with credit for CSE 5547.02. Cross-listed in CSE 5547.02.			
5570	Antiracist Technology	U G	4
Discrimination against racial and ethnic minorities is prevalent, systemic, and global. Racism and racial justice principles are outlined. Case studies on racist technologies, those that promote or sustain racism, are studied. Engineering design methodology is used to modify or create several new technologies that help the antiracist oppose racism. Prereq: Engr 1182, 1282, Grad standing in Engr, or permission of instructor.			
5832	Photovoltaics and Energy Conversion	U G	3
Photovoltaic materials and devices; solar cell device physics; solar cell simulation, design and operation; silicon cell technologies; thin film technologies; III-V technologies; nanostructures; terrestrial and space applications. Prereq: 3030, or Grad standing in Engr or Physics.			

5833	Organic and Printed Flexible Electronics	U G	3
Conducting organic small molecules and polymers (structural, optical and electrical properties); printable metal-oxide semiconductors; Printing techniques, organic light emitting diodes; transport and carrier injection; organic transistors; organic lasers. Prereq: 3030, or permission of instructor for non-ECE majors; or Grad standing in engineering, biological sciences, or math and physical sciences. Not open to students with credit for 7833 or 5194.04.			
6001	Probability and Random Variables	G	3
Probability, random variables, and random vectors for analysis and research in electrical engineering. Distribution functions, characteristic functions, functions of random variables and vectors, Markov chains. Prereq: Grad standing. Not open to students with credit for 804 or 805.			
6010	Electromagnetic Field Theory I	G	3
Maxwell's Equations; plane waves; field representations and solutions in unbounded space; waveguides and cavities; elements of Green's Functions; cylindrical and spherical waves; electromagnetic theorems. Prereq: 5010 (713), and 5011 or 613; or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 719, 810, or 811.			
6011	Bioelectromagnetics	G	3
This course provides an introduction to the interdisciplinary field of bioelectromagnetics for graduate students. Lectures cover the interaction of electromagnetic fields with biological tissues across the frequency spectrum; bioelectromagnetic dosimetry; and various applications of bioelectromagnetics (medical, consumer, and more). Prereq: Grad standing in Engineering, Biological Sciences, Mathematical and Physical Sciences; or permission of instructor.			
6070	Project Management in Electrical and Computer Engineering	G	3
Students learn project management principles and apply them to Electrical and Computer Engineering real-world projects. Prereq: Grad standing in ECE. Not open to students with credit for 6194.02.			
6101	Computer Communication Networks	G	3
Foundational understanding of network analysis, error-control, routing, congestion-control, multi-access, and their examples in the context of the existing communication networks. A previous course in statistics is recommended for students taking this course. Prereq: Grad standing in Engr. Not open to students with credit for CSE 6461. Cross-listed in CSE 6461.			
6102	Wireless Networks	G	3
Design principles and communication algorithms for wireless networks with a focus on MAC and routing protocols, scheduling algorithms, power control, and scaling properties.			
6193	Individual Studies in Electrical and Computer Engineering	G	0 - 12
Individual studies project. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
6202	Stochastic Signal Processing	G	3
Spectrum estimation, array processing, and adaptive filtering. Prereq: Not open to students with credit for 800 or 801.01.			
6244	Design and Process Integration for Wide Band Gap Power Devices	G	3
Design and processing of wide band gap power devices (including SiC, GaN and ultra wide band gap semiconductors) and reliability considerations. 2D device simulations, layout considerations for power chip from 600 V to 15 kV. Prereq: Grad standing in Engineering or Physics. Not open to students with credit for 6234.			
6500	Convex and Stochastic Network Optimization	G	3
Convex and stochastic optimization theory and algorithms applied to selected electrical engineering application areas. Prereq: Grad standing. Not open to students with credit for 7100.			
6511	Nonlinear Optics	G	3
Nonlinear optics for the generation, propagation, amplification, and control of laser light; all-optical switching and solitons; modern applications in high speed lightwave devices and systems. Prereq: 5012, or Grad standing.			
6531	Fundamentals of Semiconductor Devices	G	3
An overview of the physics, design, and engineering of semiconductor electronic and optoelectronic devices. Applications of silicon, compound semiconductor, and nanotechnology will be covered. Prereq: 5530 (730), or permission of instructor. Not open to students with credit for 5531.			
6532	Nanofabrication and Nanoscale Devices	G	3
Fundamentals of nanostructures and devices; engineering and physics of new devices, confined structures in low dimensions and their effects on traditional devices; nanofabrication and nanomanufacturing. Prereq: 6531, 5531, or 730, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 5532 (835.03).			
6533	Infrared Detectors and Systems	G	3
This course covers the basics of infrared photodetectors and systems. It will include basic geometrical optics, radiometry, figures of merit and types of infrared detectors. Prereq: 5530, or permission of instructor. Not open to students with credit for 5194.10.			

166 Electrical and Computer Engineering

6535 Semiconductor Optoelectronic Devices G 3

This course will cover the basics and physics of semiconductor optoelectronic devices including light-emitting diodes, semiconductor lasers, photodetectors, and solar cells. Prereq: Grad standing in Engineering or Physics.

6541 Advanced Topics in Sustainable Energy and Power Systems G 3

Advanced topics in sustainable energy and power systems; basic issues and solutions to sustainable energy; the concept of smart grid; cyber control and security. Prereq: 5025 (624) or 724. Not open to students with credit for 5541.

6750 Linear Systems Theory G 3

In-depth treatment of linear dynamical systems. State equations solution. Controllability and observability. Canonical forms. Internal and external stability. Linear feedback and observer design. Geometric theory. Prereq: Not open to students with credit for 5750 (750).

6754 Nonlinear Systems Theory G 3

Provides fundamental mathematical tools for the analysis of nonlinear dynamical systems. Basic techniques for the synthesis of nonlinear control systems are introduced. Prereq: Not open to students with credit for 5754.

6999 Research for Thesis G ½ - 15

Research for thesis. Repeatable to a maximum of 15 cr hrs or 30 completions. This course is graded S/U.

7001 Stochastic Processes, Detection, and Estimation G 3

Stochastic processes; detection and decision theory; hypothesis testing, parameter estimation; and applications to communications and signal processing. Prereq: 6001 (804). Not open to students with credit for 806.

7003 Wireless Communication Theory G 3

Theory and analysis of wireless communication systems. Topics include: multipath fading channels; modulation, equalization, and coding for fading channels; MIMO systems; capacity calculations. Prereq: 6001 (804). Not open to students with credit for 807 or 809.

7005 Information Theory G 3

Mathematical models for channels and sources: entropy, information, data compression, channel capacity, Shannon's theorems, rate distortion theory. Prereq: 6001 (804). Not open to students with credit for 801.02.

7010 Electromagnetic Field Theory II G 3

Green's functions with applications; spectral representation of sources; sources in layered media and Sommerfeld integrals; time-domain fields, retarded potentials, and transients; periodic structures; integral equations. Prereq: 6010 (719). Not open to students with credit for 810 or 811.

7011 Computational Electromagnetics G 3

Advanced topics in numerical methods for solving Maxwell equations, including finite element methods, integral equation methods, and their hybridization. Prereq: 5510 (715) or 6010. Not open to students with credit for 813 or 814.

7020 Advanced Data Converters and Phase-Locked Loops G 3

A comprehensive overview of the most recent system architectures of data converters and phase-locked loops. Provides a good understanding how performance specifications and process technology limitations lead to implementation decisions. The presented principles are illustrated by examples and real life case studies. Prereq: 5021 or 5023, or permission of instructor.

7022 Advanced RF Integrated Circuits G 3

Advanced topics on RF and mm-wave circuits. Frequency synthesizers, transmitter linearization techniques (e.g. polar circuits), MIMO and phase array circuits, power D/As. Prereq: 5022 (620), or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 694K or 694.02.

7023 High Speed Interface Circuits and Systems Design G 3

Analysis and design of link architectures and circuits for wireline communication systems. Emphasis on design intuition, link budgeting and power/performance trade-offs in implementation of data links in advanced CMOS process. Topics include channel characterization, noise analysis, equalization, transmitter and receiver circuits, signaling schemes, clocking, synchronization and timing recovery. Prereq or concur: 5020 and 5021, or permission of instructor.

7027 Advanced Topics in Analog VLSI Design G 4

Advanced topics in analog VLSI design, such as integrated data converters, or power management integrated circuits, or high-performance analog circuits. This includes: system and circuit architectures, performance metrics, practical implementations, design considerations in advanced semiconductor processes, chip design projects, and lab characterization. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs.

7032 Physical Electronics of Advanced Semiconductor Devices G 3

MOSCAPs, Gated Diode, CMOS Bulk/SOI Transistors, Photodiodes, Carrier Transport/Storage, Scaling, Mobility, CCDs, CMOS, EEPROMs, SiGe, SiC, ISFETs, BJTs, Noise and Modeling. Prereq: 5530 (730) or 6531. Not open to students with credit for 894 (Sp12, Advanced Semiconductor Devices) or 8194.04.

7103 Discrete Stochastic Processes G 3

Stochastic processes in discrete time or space for electrical engineering. Renewal theory, Markov chains and processes, dynamic programming, basic large deviations theory and martingales. Prereq: 6001 (804). Not open to students with credit for 894Q or 894.01.

7202 Reinforcement Learning G 3

Fundamentals of Markov decision processes and reinforcement learning algorithms. Prereq: Grad standing in Engineering or Math. Not open to students with credit for ISE 7202. Cross-listed in ISE.

7402 Advanced Machine Learning for Remote Sensing Image Interpretation G 3

Introduces basic high-resolution remote sensing concepts with focus on optical remote sensing, and computational solutions for typical remote sensing problems. Students are assumed to know basic knowledge in statistical estimation, linear algebra and numerical methods for engineering. Students with prior experiences on remote sensing/machine learning/computer vision will find this easier to follow. Prereq: Grad standing, or permission of instructor. Not open to students with credit for CivilEn 7421. Cross-listed in CivilEn 7421.

7531 Epitaxial Heterostructures G 2

Science and techniques behind thin film growth and engineering for combining different materials, altering chemical composition at the nanometer scale, while controlling defects and strain. Epitaxial crystal growth will be explained. Students will gain an understanding of the kinetics, thermodynamics, and technology involved in epitaxial heterostructures and self-assembled nanostructures. Prereq: Grad standing. Not open to students with credit for MSE 7531. Cross-listed in MSE.

7811 Electromagnetic Interference and Compatibility G 3

Electromagnetic interference and compatibility, signal integrity in ICs, conducted emissions and electromagnetic radiation susceptibility, and crosstalk and shielding. Prereq: 6010 (719). Not open to students with credit for 614.

7813 Advanced Antenna Theory and Design G 3

Topics in Advanced Antenna Theory and Design. Prereq: 5011 or 613, or Grad standing in Engineering, Biological Sciences, or Math and Physical Sciences. Not open to students with credit for 815.

7814 Microwave Remote Sensing G 3

Description of microwave remote sensing systems. Theories of scattering from random media and rough surfaces. Prereq: 6010.

7821 Mixed Signal Verification and CAD Tools G 3

Principles of combining analog, RF, and digital design, simulation, and verification strategies using modern CAD tools. Prereq: 5020, 622, or 720. Not open to students with credit for 894Z or 822.

7822 Advanced Nonlinear Microwave Circuit Engineering G 3

Large-signal characterization and modeling of nonlinear RF circuits; power amplifiers; oscillators; modulators; wideband linearization, power efficient design. Prereq: 5027 or 723. Not open to students with credit for 694K or 694.02.

7831 Microwave Semiconductor Devices G 3

Principles of microwave semiconductor devices; scattering and high-field transport; Gunn effect; FET wave equation, HEMT; HBT; large signal RF modeling and measurements; noise; traps; self-heating. Prereq: Grad standing in Engr or Physics.

7841 Advanced Topics in Power Electronics G 3

Advanced topics of power electronics, beginning with utility and vehicle applications and evolving into advanced circuit topologies and control. Prereq: 5025 (624). Not open to students with credit for 844.

7842 Advanced Topics in Electric Machines G 3

Advanced topics of electric machines, beginning with dynamic modeling and principles of vector control and evolving into new design and control of electric machines for advanced traction motors and renewable energy generator systems. Prereq: 5041 and 5025, or permission of instructor.

7843 Advanced Topics in Power Systems G 3

Advanced topics of power system protection, beginning with equipment protection and evolving into system wide protection design and operation to accommodate smart-grid technologies. Prereq: 5042 or 740. Not open to students with credit for 741.

7854 Nonlinear and Adaptive Control G 3

Advanced analysis of uncertain nonlinear systems. Design methodologies for complex interconnected nonlinear systems. Applications of nonlinear and adaptive control design to aerospace and robotic systems. Prereq: 6754 (5754 or 754) and 6750 (5750 or 750). Not open to students with credit for 857.

7858 Intelligent Control G 3

Fuzzy control, neural control, genetic algorithms, learning control, and distributed intelligent control. Prereq: 5551 (551) or equiv. Not open to students with credit for 858.

7859 Sliding Mode Control in Electromechanical Systems G 3

Sliding modes an efficient tool to control high order dynamic plants operating under uncertainty conditions. Prereq: 5750 (750) or MechEng 5372. Not open to students with credit for 859 or MechEng 7259 or 859. Cross-listed in MechEng 7259.

Electrical and Computer Engineering 167

7866	Computer Vision	G	3
Computer vision systems, image models, feature extraction, shape representation and recognition, object modeling and recognition, matching, probabilistic and statistical modeling, semantic knowledge, and face perception. Prereq: 5460 (707). Not open to students with credit for 863.			
8001	Advanced Topics in Communications	G	3
Current topics in information theory and the practice of digital communications. Prereq: 7001 (806). Repeatable to a maximum of 6 cr hrs.			
8019	Advanced Topics in Electromagnetics and Optics	G	3
Topics are chosen to prepare graduate students for research and application in current problems in electromagnetics and optics. Prereq: 6010 (719). Repeatable to a maximum of 9 cr hrs.			
8101	Advanced Topics in Networking	G	3
Advanced topics and new areas of interest in the theory of networking and networked systems. Prereq: 6001 (804). Repeatable to a maximum of 6 cr hrs.			
8193	Individual Studies in Electrical and Computer Engineering	G	0 - 12
Individual studies project. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
8201	Advanced Topics in Signal Processing	G	3
Current topics in the theory and practice of signal processing. Prereq: 7001 (806). Repeatable to a maximum of 6 cr hrs.			
8250	Continuous Time Optimal Control	G	3
Embraces the three historical trends in dynamic optimization: Calculus of Variations, Pontryagin's Minimum Principle, and Bellman's Principle of Optimality. Not only mathematical aspects of the three principles will be taught, but also their strengths and weaknesses - it is often less important to know how to apply a given principle than to know when. Prereq: 5551 or MechEng 5372, or permission of instructor. Not open to students with credit for MechEng 8220. Cross-listed in MechEng 8220.			
8850	Robust Multi-Variable Control with Applications	G	3
Advanced concepts for robust control of uncertain dynamic systems with applications. Prereq: 6750 or AeroEng 5620 or 5621, or permission of instructor. Not open to students with credit for AeroEng 8850. Cross-listed in AeroEng.			
8851	Advanced Topics in Control Theory	G	3
Current topics in control theory, optimization, and decision theory. Prereq: Permission of instructor.			
8862	Special Topics in Advanced Computer Design Methodologies	G	3
Design automation, computer aided design, testing, and design for energy efficiency. Prereq: Grad standing in Engineering. Repeatable to a maximum of 9 cr hrs.			
8891	Seminar in Electrical and Computer Engineering	G	½ - 2
Seminar in Electrical and Computer Engineering. Prereq: Grad standing in ECE. Repeatable to a maximum of 12 cr hrs or 6 completions. This course is graded S/U.			
8898	Open Graduate Seminar	G	½ - 3
Introduction to potential research areas. Students will attend OSU sponsored talks relevant to topics in Electrical Engineering and critique them through written reports. Prereq: Grad standing in ECE. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
8999	Research for Dissertation	G	½ - 15
Research for dissertation. Repeatable to a maximum of 30 completions. This course is graded S/U.			

Engineering

1100.02	Introduction to Ohio State and Aviation	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			
1100.03	Introduction to Ohio State and Biomedical Engineering	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			
1100.06	Introduction to Ohio State and Computer Science and Engineering	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			

1100.07	Introduction to Ohio State and Electrical and Computer Engineering	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			
1100.08	Introduction to Ohio State and Engineering Physics	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			
1100.15	Introduction to Ohio State and Engineering	U	1
Introduction to the University community and College of Engineering: Strategies for successful transition, academic requirements, University procedures, grading system, resources, overview of engineering academic areas of study and services. Prereq: Enrollment in the College of Engineering. Not open to students with credit for FAES 1100, ArtsCol 1100, ArtsSci 1100, HumanEc 1100, and Exp 1100.			
1110.01	Introduction to Ohio State and Aeronautical and Astronautical Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.02	Introduction to Ohio State and Aviation I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.03	Introduction to Ohio State and Biomedical Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.05	Introduction to Ohio State and Civil Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).			
1110.06	Introduction to Ohio State and Computer Science and Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.07	Introduction to Ohio State and Electrical and Computer Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.08	Introduction to Ohio State and Engineering Physics I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			
1110.09	Introduction to Ohio State and Environmental Engineering I	U	½
Introduction to the University community and College of Engineering: Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).			

168 Engineering

1110.11 Introduction to Ohio State and Industrial and Systems Engineering I U ½

Introduction to the University community and College of Engineering; Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1110.12 Introduction to Ohio State and Materials Science and Engineering I U ½

Introduction to the University community and College of Engineering; Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1110.13 Introduction to Ohio State and Mechanical Engineering I U ½

Introduction to the University community and College of Engineering; Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1110.14 Introduction to Ohio State and Welding Engineering I U ½

Introduction to the University community and College of Engineering; Strategies for successful transition; Academic requirements; University procedures; Grading system; Resources; Overview of engineering academic areas of study and services. Prereq: Enrollment in Engineering. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1120.01 Introduction to Ohio State and Aeronautical and Astronautical Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1120.02 Introduction to Ohio State and Aviation II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), or USAS 1100 (100).

1120.03 Introduction to Ohio State and Biomedical Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.05 Introduction to Ohio State and Civil Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.06 Introduction to Ohio State and Computer Science and Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.07 Introduction to Ohio State and Electrical and Computer Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.08 Introduction to Ohio State and Engineering Physics II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.09 Introduction to Ohio State and Environmental Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.11 Introduction to Ohio State and Industrial and Systems Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.12 Introduction to Ohio State and Materials Science and Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.13 Introduction to Ohio State and Mechanical Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1120.14 Introduction to Ohio State and Welding Engineering II U ½

Assessment of major / academic interests, advanced study skills, campus activities, program enrichment opportunities, engineering services, internships, and development of a personalized four-year curricular plan in an engineering major. Prereq or concur: Engr 1110.XX. Not open to students with credit for Engr 1100 (Engineer 100), FABEng 1100 (100), ENR 1100 (100), and USAS 1100 (100).

1138 Fundamentals of Mathematics for Engineers U 4

This application-oriented, hands-on, introduction to engineering mathematics course will provide an overview of the salient math topics most heavily used in beginning engineering courses. All math topics will be presented within the context of an engineering application, and reinforced through extensive examples of their use in the core engineering courses. Prereq: Math Placement Level N. Not open to students with credit for Math 1151. Cross-listed in Math.

1180 Spatial Visualization Practice and Development U 1

Provide instruction and exercises to develop spatial visualization skills in preparation for Fundamentals of Engineering and advanced coursework.

1181.01 Fundamentals of Engineering I U 2

Engineering problem solving utilizing computational tools such as Excel and MATLAB; hands-on experimentation; modeling; teamwork; written, oral and visual communications. Prereq or concur: Math 1140, or 1141; or Math 1150 or above. Not open to students with credit for Engr 1182.01, 1182.02, 1182.03, 1182.04, 1282.01H, 1282.02H, 1282.03H, 1282.04H, 1186.01, 1187, or 1188.

1181.02 Fundamentals of Engineering I - Scholars U 2

Engineering problem solving utilizing computational tools such as Excel and Matlab; hands-on experimentation; modeling; ethics; teamwork; written, oral and visual communications. Prereq or concur: Math 1140 or 1141; or Math 1150 or above; and Scholar status. Not open to students with credit for Engineer 183.01, 183.02, Engr 1182.01, 1182.02, 1182.03, 1186.01, 1187, or 1188.

1182.01 Fundamentals of Engineering II U 2

Introduction to 3D visualization and CAD; engineering design-build process; teamwork; written, oral and visual communications; project management. Prereq: 1181.01, or 1181.02, or 1281.01H, or 1281.02H, or 1281.03H. Prereq or Concur: Math 1141; or Math 1151 or above. Not open to students with credit for 1186.01, or 1187, or 1188; not repeatable if credit earned for 1182.01, or 1182.02, or 1182.03, or 1182.04, or 1282.01H, or 1282.02H, or 1282.03H, or 1282.04H.

1182.02 Fundamentals of Engineering II - Scholars U 2

Introduction to 3D visualization and CAD; engineering design-build process; teamwork; written, oral and visual communications; project management. Prereq: 1181.01, or 1181.02, or 1281.01H, or 1281.02H, or 1281.03H, and Scholars status. Prereq or concur: Math 1141; or Math 1151 or above; engineering student, or permission of department. Not open to students with credit for 1186, or 1187, or 1188; not repeatable if credit earned for 1182.01, or 1182.02, or 1182.03, or 1182.04, or 1282.01H, or 1282.02H, or 1282.03H, or 1282.04H.

1182.04 Fundamentals of Engineering 2 - Engineering Technology U 2

Introduction to 3D visualization and CAD; engineering design-build process; teamwork; written, oral and visual communications; project management. Regional campuses and Engineering Technology majors who are concurrently enrolled in EngrTec 2500 Manufacturing Processes II. Concur: EngrTec 2500.

1186.01	Fundamentals of Engineering for Transfer - CAD	U	1½
Introduction to 3D visualization and CAD; written, oral and visual communications. Prereq: Not open to students with credit for Engineer 186.			
1187	Fundamentals of Engineering for Transfer - MATLAB	U	1
Engineering problem solving utilizing computational tools such as MATLAB. Prereq or concur: Math 1150 or above. Not open to students with credit for 1221.			
1188	Fundamentals of Engineering for Transfer - Problem Solving and Design	U	1½
Introduction engineering problem solving and design through a hands-on design build project; teamwork; written, oral and visual communications; project management. Prereq: 1186 and 1187. Concur: Math 1141, or MATH 1151 or above, or equiv.			
1194	Group Studies in Engineering	U	1 - 4
Special topics of general interest to engineering students. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
1194H	Group Studies in Engineering - Honors	U	1 - 4
Special topics of general interest to engineering honors students. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
1195	First-Year LEAP Seminar	U	1
Special topics and guest speakers of interest to College of Engineering (COE) and Knowlton School (KSA) first-year students; class discussions about career options; activities for building academic and professional awareness. Prereq: First-year Women in Engineering learning community students (Autumn semester only). Repeatable to a maximum of 5 cr hrs. This course is graded S/U.			
1195.02	LEAP Second Year Seminar Course	U	1
This Seminar Course will provide 2nd year students in the Living-Learning Community for Engineers, Architects, and Planners (LEAP) with information and content relative to second year engineering students in terms of professional development, undergraduate engineering research opportunities, faculty and professional engineering interactions. Prereq: Soph or Jr standing, and enrollment in the College of Engineering. This course is graded S/U.			
1196	Minority Engineering Program Seminar	U	1
Course is designed to assist beginning engineering students in making a smooth and informed transition from high school to college. The goal is to aid each student in making a positive adjustment to his/her new environment while exploring and planning career opportunities in the broad field of engineering along with enhancing their personal growth and development. Repeatable to a maximum of 5 cr hrs. This course is graded S/U.			
1197.01	Green Engineering Scholars Seminar	U	1
Scholars Program academic and co-curricular requirements and expectations; University procedures relative to the Scholars experience; resources and opportunities related to Scholars program theme; students rights, responsibilities, and expectations; overview of relevant major and careers. Prereq: Enrollment in Green Engineering Scholars Program, or permission of instructor. Repeatable to a maximum of 2 ch hrs.			
1197.02	Humanitarian Engineering Scholars Seminar	U	1
Scholars Program academic and co-curricular requirements and expectations; University procedures relative to the Scholars experience; resources and opportunities related to Scholars program theme; students rights, responsibilities, and expectations; overview of relevant major and careers. Prereq: Enrolled in Humanitarian Engineering Scholars Program, or permission of instructor. Repeatable to a maximum of 2 ch hrs.			
1221	Introduction to Computer Programming in MATLAB for Engineers and Scientists	U	2
Introduction to computer programming and problem solving techniques with MATLAB applications in engineering and the physical sciences; algorithm development; programming lab experience. Prereq: Engr 1181.01 or 1181.02 or 1187 or 1281.01H or 1281.02H or 1281.03H. Not open to students with credit for Engineer 167 or CSE 205. This course is available for EM credit. Cross-listed in CSE.			
1281.01H	Fundamentals of Engineering for Honors I	U	5
Engineering problem solving utilizing computational tools such as Excel and MATLAB; algorithm development; introduction to C++ programming for engineering; hands-on experimentation; modeling; ethics; teamwork; written, oral and visual communications. Prereq: Honors standing, and enrollment in the College of Engineering; or permission of instructor. Prereq or concur: Math 1151, 1161.02, or 1181H. Not open to students with credit for 1181.01, 1181.02, Engineer 191.01H, 191.02H, or CSE/Engr 1222.			
1281.02H	Fundamentals of Engineering for Honors I - Advanced Programming	U	5
Engineering problem solving utilizing computational tools such as Excel and MATLAB; algorithm development; introduction to C++ programming for engineering; hands-on experimentation; modeling; ethics; teamwork; written, oral and visual communications. This variant of the course is intended for students who are advanced in computer programming skills. Prereq: Honors standing, and enrollment in the College of Engineering; or permission of instructor. Prereq or concur: Math 1151, or 1161.02, or 1181H. Not open to students with credit for 1181.01, 1181.02, Engineer 191.01H, 191.02H, or CSE/Engr 1222.			

1282.01H	Fundamentals of Engineering for Honors II - Robotics	U	3
Introduction to 3D visualization and CAD; engineering design-build process; teamwork; written, oral and visual communications; project management. Standard course incorporating a robot design-build project. Prereq: Honors standing, and 1281.01H, or 1281.02H, or 1281.03H, and enrollment in the College of Engineering; or permission of instructor. Not open to students with credit for 1182.01, 1182.02, 1182.03.			
1282.02H	Fundamentals of Engineering for Honors II - Nanotechnology	U	3
Introduction to 3D visualization and CAD; engineering design process; teamwork; written, oral and visual communications; project management. Alternative course with an emphasis on a nanotechnology research and development project. Prereq: Honors standing; and 1281.01H, or 1281.02H, or 1281.03H; and enrollment in the College of Engineering; or permission of instructor. Not open to students with credit for 1182.01, 1182.02, 1182.03.			
1282.04H	Fundamentals of Engineering for Honors 2 - Integrated Business & Engineering	U	3
Introduction to 3D visualization and CAD; engineering design process; teamwork; written, oral and visual communications; project management. An alternative to the standard 1282.01H course with an emphasis on a product design project within the Integrated Business and Engineering (IBE) Honors program. Prereq: Honors standing; and 1281.01H, or 1281.02H, or 1281.03H, or permission of instructor; and enrollment in Integrated Business and Engineering (IBE) program. Not open to students with credit for 1182.01 or 1182.02 or 1182.03.			
1300	Introduction to Writing for STEM	U	3
Engr 1300 will introduce students to college writing with an emphasis on information literacy and the technical writing style conventions common to STEM academic and professional fields. Students will examine STEM-related topics in their field and will identify how these involve professional ethics in professional/public communications. Prereq: EPLR Student Group, or EduTL 1902, or 1902.04, or English Placement Level 4. Not open to students with credit for English 1109, 1110.01, 1110.01H, 1110.02, 1110.02H, 1110.03, or 1167H. GE foundation writing and info literacy course.			
1510	Metacognitive Engineering Problem Solving Strategies	U	1
The course teaches students the concept of metacognition and informs its application to problem solving in engineering courses. Student engage in guided problem solving practice that hones their thinking and helps them make informed decisions about mastering engineering course concepts. Concur: Math 1151, and permission of instructor. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.			
2193	Individual Studies in Engineering	U	1 - 4
Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
2194	Group Studies in Engineering	U	1 - 4
Special topics of general interest to engineering students. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
2194H	Group Studies in Engineering	U	1 - 4
Special topics of general interest to engineering honors students not otherwise offered. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
2230	Mentorship in Robotics	U	1
This course will support students to engage with FIRST Robotics Competition teams by supporting their development as mentors for K-12 robotics teams. Students will learn both mentorship and robotics fundamentals from both the course instructors as well as OSU students engaged with these programs. Class time will be a mix of lecture and interactive and interactive learning modules. Prereq or concur: 1100.			
2231	FIRST Robotics Mentorship	U	1 - 3
This course will support students to engage with FIRST robotics by supporting their development as mentors for K-12 robotics teams. Students will be paired with a local K-12 robotics team and be tasked with mentoring students the foundations of engineering, design, leadership, outreach, and teamwork. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
2300	Citizenship in Engineering Contexts	U	3
This course engages with thematic concepts and definitions of citizenship, diversity, equity, inclusion, and justice through historical and contemporary lenses. Students explore the applications and implications of these concepts across a wide range of engineering contexts. Students will approach the writing process from a rhetorical perspective. Prereq: GE foundation writing and info literacy course. Not open to students with credit for 2301. GE theme citizenship for div and just wrld course.			
2301	Exploring Citizenship in Engineering: Integrative Designation	U	4
Students will use the engineering design and writing processes to define a meaningful problem within specific local or global communities and formulate and propose a solution to that problem. Students will explore themes of diversity and inclusion in engineering and citizenship in a just and diverse world through a comprehensive, semester-long proposal project. Prereq: GE foundation writing and info literacy course. Not open to students with credit for 2300. GE theme citizenship for div and just wrld course.			

170 Engineering

2367	American Attitudes About Technology	U	3	Discussion, analysis, and intensive writing in a technical and professional context based on study of American attitudes about technology. Prereq: English 1110 (110), and Soph standing or above. Not open to students with credit for Engineer 367. GE writing and comm: level 2 and diversity soc div in the US course.	4891	Colloquia, Workshops, and College Seminars	U	1 - 4	Special colloquia, workshops or seminars of general interest to engineering students. Repeatable to a maximum of 4 cr hrs or 4 completions. This course is graded S/U.
2367.01H	Honors American Attitudes About Technology	U	3	Discussion, analysis, and intensive writing in a technical and professional context based on study of American attitudes about technology. Prereq: Honors standing; and English 1110.01 (110.01) or 1110.01H (110.01H); and Soph standing or above. Not open to students with credit for Engr 2367 (367). GE writing and comm: level 2 and diversity soc div in the US course.	4891.01	College Seminar - Perspectives on Sustainability	U	1	A broad view of sustainability and the environment, with the opportunity to see sustainability through different perspectives. Speakers from different areas of expertise will present on a variety of sustainability topics so students can better understand why sustainability is both important and complex. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.
2797.01	Engineering Study Abroad in North America	U	½ - 12	Study abroad in North America. Repeatable to a maximum of 30 cr hrs or 4 completions.	4891.02	College Seminar - Promoting Creativity and Innovation	U	2	Tools to refine creative motivation and to encourage multidisciplinary innovation. Fostering an appreciation for the processes of innovative design and prototyping by enabling students to explore the concept of creativity through a variety of speaker experiences. Repeatable to a maximum of 4 cr hrs.
2797.02	Engineering Study Abroad in Central America	U	½ - 12	Study abroad in Central America. Repeatable to a maximum of 30 cr hrs or 4 completions.	4998.01	Undergraduate Research in Engineering Education	U	1 - 4	Opportunity for undergraduates to conduct research in engineering education. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.
2797.03	Engineering Study Abroad in South America	U	½ - 12	Study abroad in South America. Repeatable to a maximum of 30 cr hrs or 4 completions.	4998.02	Undergraduate Research in Engineering	U	1 - 4	Opportunity for undergraduates to conduct research in engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.
2797.04	Engineering Study Abroad in East Asia	U	½ - 12	Study abroad in East Asia. Repeatable to a maximum of 30 cr hrs or 4 completions.	4999H	Engineering Education Research for Thesis	U	1 - 5	Honors program students are offered the opportunity to pursue independent project/research. Student presentation and thesis writing included. Prereq: Honors standing, and Sr standing, and CPHR 3.4 or above; or permission of instructor. Repeatable to a maximum of 5 cr hrs or 5 completions. This course is graded S/U.
2797.05	Engineering Study Abroad in South Asia	U	½ - 12	Study abroad in South Asia. Repeatable to a maximum of 30 cr hrs or 4 completions.	5081.01	Engineering Capstone Collaboration I	U G	3	Students contract to collaborate with an engineering capstone design team for two semesters and contribute their disciplinary expertise. Prereq: Permission of instructor. Not open to Engineering Majors.
2797.06	Engineering Study Abroad in Central Asia	U	½ - 12	Study abroad in Central Asia. Repeatable to a maximum of 30 cr hrs or 4 completions.	5081.02	Engineering Capstone Collaboration II	U G	3	Students contract to collaborate with an engineering capstone design team for second semester and contribute their disciplinary expertise. Prereq: Permission of instructor. Not open to Engineering Majors.
2797.07	Engineering Study Abroad in Oceania	U	½ - 12	Study abroad in Oceania. Repeatable to a maximum of 30 cr hrs or 4 completions.	5194	Group Studies in Engineering	U G	1 - 4	Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.
2797.08	Engineering Study Abroad in Middle East	U	½ - 12	Study abroad in Middle East. Repeatable to a maximum of 30 cr hrs or 4 completions.	5194.01	Engineering Study Abroad in North America	U G	½ - 12	Study abroad in North America. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
2797.09	Engineering Study Abroad in Africa	U	½ - 12	Study abroad in Africa. Repeatable to a maximum of 30 cr hrs or 4 completions.	5194.02	Engineering Study Abroad in Central America	U G	½ - 12	Study abroad in Central America. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
2797.10	Engineering Study Abroad in Europe	U	½ - 12	Study abroad in Europe. Repeatable to a maximum of 30 cr hrs or 4 completions.	5194.03	Engineering Study Abroad in South America	U G	½ - 12	Study abroad in South America. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
2797.11S	Service Learning Trip to Montana de Luz, Honduras	U	3	Students will take this course and then participate in the in-country field portion of the Engineering Service-Learning/Montana de Luz, Honduras program series. Students will travel to Honduras and implement and evaluate the projects they developed in the Spring Semester. In addition, the students will complete technical documentation and present their projects in a conference-style format. Application required. Repeatable to a maximum of 9 cr hrs.	5194.04	Engineering Study Abroad in East Asia	U G	½ - 12	Study abroad in East Asia. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
3194	Group Studies in Engineering	U	1 - 4	Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.	5194.05	Engineering Study Abroad in South Asia	U G	½ - 12	Study abroad in South Asia. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4191	Professional Practice in Engineering	U	0	Students complete a cooperative or internship assignment in private industry or for a government agency; assignments are supervised by the employer and monitored and evaluated by Co-op and Internship Program. Prereq: Permission of instructor. Repeatable to a maximum of 8 completions. This course is progress graded (S/U).	5194.06	Engineering Study Abroad in Central Asia	U G	½ - 12	Study abroad in Central Asia. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4193	Individual Studies in Engineering	U	1 - 4	Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.	5194.07	Engineering Study Abroad in Oceania	U G	½ - 12	Study abroad in Oceania. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4194	Group Studies in Engineering	U	1 - 4	Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.	5194.08	Engineering Study Abroad in Middle East	U G	½ - 12	Study abroad in the Middle East. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4194H	Group Studies in Engineering Honors	U	1 - 4	Special topics of general interest to engineering honors students not otherwise offered. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.	5194.09	Engineering Study Abroad in Africa	U G	½ - 12	Study abroad in Africa. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4375	Inclusive Leadership Practice for Emerging Professionals	U	1	To provide engineering students with the tools and techniques that allow them to develop their confidence, leadership style, and community of support in their academic and professional careers.	5194.10	Engineering Study Abroad in Europe	U G	½ - 12	Study abroad in Europe. Repeatable to a maximum of 30 cr hrs or 4 completions. This course is graded S/U.
4850S	Translating Engineering Research to K-8 (TEK8)	U	3	Students translate a prior engineering research experience through developing and delivering and documenting mini-design challenges for an underserved K-8 school partner. Prereq: 1182, 1188, or 1282H; and permission of instructor.					

5797.11S Engineering Service-Learning in Honduras	U G	3	5797.23 Humanitarian Engineering and Culture in Guyana	U G	3
During the Engineering Service-Learning in Honduras program, students will travel to Honduras and implement, test, and evaluate the technologies they developed through Spring Semester. In addition, the students will complete technical documentation and present their projects in a conference-style format once they have returned from spring break travel. Prereq: Jr, Sr, or Grad standing, or permission of instructor.			This course offers an opportunity to be engaged in a humanitarian engineering project trip to Georgetown, Guyana to work on solar education projects. Students who are a part of this course will learn about Guyanese history, culture, and current events; energy challenges, needs, and clean energy solutions; solar panel systems; complete technical design/evaluation challenges; and travel to Guyana. Prereq: Jr, Sr, or Grad standing in Engr, and permission of instructor.		
5797.12 Exploring Culture and Engineering in India	U G	3	5797.24 Sustainable Community Development - Honduras	U G	3
Students will travel to Jaipur, Agra, and Delhi, India to focus on the culture, history, and religion of India. Students will implement a design project they created in spring semester. Prereq: 4692.01S in Sp Sem.			The course seeks to provide an opportunity for students to experience application of a broad range of engineering & non-engineering skillsets in a teambased environment working towards sustainable outcomes to humanitarian development challenges. Student teams from OSU & Zamorano University will work collaboratively with nonprofit Heart to Honduras to develop & support community-driven projects. Prereq: Pre-major, major, or Grad standing in the College of Engineering, AgSysMt, ConSysM, or Industrial Design; and Engr 5050 or FABEng 2200 or international study abroad experience; and permission of instructor.		
5797.13 Engineering the Castles and Cathedrals of England and Wales	U G	3	5797.25 International Perspectives on Aviation	U G	3
A study abroad trip to England and Wales for the purpose of understanding the importance of several iconic castles and cathedrals and the various methods used for their construction. Participants must be physical fit enough to walk an extended length of time, negotiate rough terrain, climb steep steps, and not be afraid of heights. GE historical study and diversity global studies course. GE foundation historical and cultural studies course.			This course will explore the implications of the Aviation Industry on world as a whole. Content will be organized to consider the social, economic and environmental impacts of aviation in a global context. Classroom learning will be reinforced through international travel during the semester. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs.		
5797.14 OSU - Colombia Collaboration	U G	3	5797.26 Japanese American Design Experience (JADE)	U G	3
This study abroad course is to focus on development of education in Colombia at the K-12 level via STEM education for students and collaborations with teachers to develop materials for students; and at the university level by collaboratively developing low-cost engineering experiments for laboratories, along with on-line instructional materials. Prereq: 5050 or permission of instructor. Repeatable to a maximum of 15 cr hrs.			In fields like automobiles, high-speed rail, semiconductors, gaming consoles, and optical/precision equipment, Japan is famous for its technological advancements and engineering marvels. This new course will focus on exploring design, engineering and sustainability in a Japanese cultural context. The class will focus on how education and culture influences design choices and technology in STEM. Repeatable to a maximum of 6 cr hrs or 2 completions.		
5797.15 Korea Aerospace University International Summer Program	U G	3	5797.27 Drones and UAS in Switzerland	U G	3
This course allows students to enroll in the Korea Aerospace University's International Summer Program and earn credits towards a degree in Aviation. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.			This course explores drones and UAS ecosystem by examining the state of the industry in Switzerland. Switzerland will be used as a model to compare the relative levels of success and adoption that drones have found there, the European Union and the U.S. This course examines the regulatory, cultural, and economic factors that led to the current state of the industry. Repeatable to a maximum of 6 cr hrs.		
5797.16S Solar Engineering Service-Learning	U G	3	5901.01 Multidisciplinary Engineering Capstone Design Project I	U G	3
During the Solar Engineering Service-Learning program, students will travel abroad and collaborate with partner organizations and communities, to evaluate, assess, design, pilot, and implement various solar technologies. Must be admitted to the program through the Office of International Affairs before enrolling. Students will enroll in ENGR 4692.XXS (1 credit hour) for second session spring term. Repeatable to a maximum of 9 cr hrs.			A multidisciplinary engineering capstone design experience which will utilize principles of multiple engineering disciplines for sponsored design projects. This course is full semester (14 week) course. Progress graded with ENGR 5902.01. Prereq: Sr or Grad standing, and permission of instructor. Not open to students with credit for 5901.01 and 5902.01. This course is progress graded.		
5797.17S Engineering Service-Learning Ghana In Country	U G	4	5901.02H Multidisciplinary Engineering Capstone Design Project II - Honors IBE	U G	3
The Engineering Service-Learning in Ghana course takes place during autumn semester in preparation for winter break travel; Travel and service will be conducted during the break between autumn and spring semesters. Prereq: Enrollment in the College of Engineering, or permission of instructor. Repeatable to a maximum of 12 cr hrs.			This course is an honors version of ENGR 5901.01 and is required for the Integrated Business and Engineering (IBE) program. Students in multidisciplinary teams work on realistic and open-ended product development projects in conjunction with an industry sponsor. Teams practice modern development principles applying the concept of design thinking, user-focused design, and minimally viable product. Prereq: Honors standing, and Sr standing in Engineering or Business, and enrollment in Integrated Business and Engineering (IBE) program; or permission of instructor.		
5797.18 Engineering of Ancient Greece	U G	3	5902.01 Multidisciplinary Engineering Capstone Design Project II	U G	3
A study abroad trip to Greece for the purpose of understanding the importance of the influences and continuing contributions to society of Ancient Greece's Engineering and Technological advancements. Students will visit various significant engineering marvels and examine the methods used for their formulation and construction. GE cultures and ideas course. GE foundation historical and cultural studies course.			An integrated sequence constituting a multidisciplinary engineering capstone design experience which will utilize principles of multiple engineering disciplines for sponsored design projects. Sequenced with 5901.01. Prereq: 5901.01, or permission of instructor. This course is progress graded.		
5797.19 Design Principles and Biomedical Research at Nanjing University	U G	3	5902.02H Multidisciplinary Engineering Capstone Design Project II - Honors IBE	U G	3
Internationalized medical device design course. Introduction to design principles; needs finding, idea generation, and presentation of projects that focus on helping persons with medical based problems. Documentation and technical skills are developed throughout the course. Activities in team-building, cultural awareness and global engineering are emphasized throughout the course. Prereq: Math 2177, or 2174, or 2255 and 2568, or 2415 and 2568, or for CSE students 2568; Jr or Sr standing in the College of Engineering; and permission of instructor. Repeatable to a maximum of 6 cr hrs.			This course is an honors version of ENGR 5902.01 and is required for the Integrated Business and Engineering (IBE) program. Students in multidisciplinary teams work on realistic and open-ended product development projects in conjunction with an industry sponsor. Teams practice modern development principles applying the concept of design thinking, user-focused design, and minimally viable product. Prereq: 5901.02H, and Honors standing, and Sr standing in Engineering or Business, and enrollment in the Integrated Business and Engineering (IBE) program; or permission of instructor.		
5797.20 Sustainable and Resilient Infrastructure in Italy	U G	3	6000 ENGR Graduate Professional Development	G	1
During pre-travel lectures and assignments and a two-week in country trip, eligible students will compare and contrast differences between Italy and US built infrastructure, explore historical and cultural reasons for differences between the countries, and envision more sustainable and resilient built infrastructure. Application to the College of Engineering Study Abroad Program required. Prereq: EnvEng 3200 or CivilEn 3310.			This course will provide graduate students with key professional skills related to their successful navigation through their degree and into their careers. Prereq: Grad standing in ENGR. This course is graded S/U.		
5797.21S Sustainable and Resilient Tanzanian Communities - Engineering	U G	1 - 3	6193 Individual Studies in Engineering	G	1 - 4
Sustainable and Resilient Communities focuses on applied, service-learning projects around Kilimanjaro, Tanzania. Students will contribute to the sustainability of partner community's long-term food, water, energy, and health systems. In addition to participating in service in a global context, students will explore the complex challenges and opportunities of sustainable development in rural TZN. Prereq: CivilEn 4000.01. Concur: CivilEn 4000.02, or permission of instructor. Repeatable to a maximum of 4 cr hrs or 2 completions.			Opportunity for students to participate in supervised individual engineering experiences. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.		
5797.22S Guatemala Service-Learning	U G	3	6194 Group Studies in Engineering	G	1 - 4
Participating students will: (i) learn about poverty challenges, needs, and potential technical solutions, (ii) complete technical design/evaluation challenges, (iii) learn about Guatemalan history, culture, and current events, and (iv) learn about trip logistics/rules, (v) travel to Guatemala and support group objectives. Repeatable to a maximum of 6 cr hrs.			Special topics of general interest to engineering students not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.		

172 Engineering

6210	Leadership and Team Effectiveness for Engineers	G	3
Introduction to topics in leadership and team effectiveness with a focus on applications for engineers. Prereq: Grad standing, and enrollment in MGEL degree program; or permission of instructor.			
6220	Financial and Managerial Accounting for Engineers	G	3
Provides an overview of the basic topics in financial and managerial accounting. The primary focus will be on helping engineering students understand the meaning of the numbers in financial statements, their relationship to one another, and learning how they are used in planning, decision-making and control towards achieving the objectives of an organization. Prereq: Grad standing, or permission of instructor; and enrollment in MGEL degree program. Not open to students with credit for AcctMIS 5000.			
6230	Technology Strategy & Innovation for Engineers	G	3
How technology strategy may lead to creation/persistence of competitive advantage. In contrast to core strategy course, provides series of strategic frameworks for managing high-tech businesses. Prereq: Grad standing, and enrollment in MGEL degree program; or permission of instructor. Not open to student with credit for BusMHR 7461.			
6240	Operational Excellence Master of Engineering Management Capstone	G	3
We will focus on applying the principles of operational excellence, lean systems, and focus on value and creativity as engines for change. Students will demonstrate reflection, critical thinking, effective professional communication, and mastery of the principles and knowledge learned in MEM courses. Prereq: Permission of instructor.			
6850S	Translating Engineering Research to K-8 (TEK8)	G	3
Guides graduate students through the development of design challenges inspired by prior research experiences. Develops the skills to teach engineering in under-resourced schools & recognize how to relay engineering skills to diverse populations. Design challenges are created to be age-appropriate for middle school, low cost, & facilitated by someone with little technical background in <90			
7100	MGEL Integrative Project	G	1 - 5
Non-thesis research investigation; instructor-guided; comprehensive report required. Required course for MGEL program, in final or final two semesters of program. Total credits required: 5. Prereq: Enrollment in the Master Global Engineering Leadership program. Repeatable to a maximum of 5 cr hrs or 2 completions.			
7193	Individual Studies in Engineering	G	1 - 4
Opportunity for students to participate in supervised individual engineering experiences. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
7194	Group Studies in Engineering	G	1 - 4
Special topics of general interest to engineering students. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions. This course is graded S/U.			
7200	Engineering Ethics and Professionalism	G	1
To learn professionalism and ethical decision-making strategies; topics include codes of ethics, moral frameworks, engineering as social experimentation, assessment of safety and risk, employer and employee rights and responsibilities, confidentiality and conflict of interest, whistle-blowing, research integrity, consulting engineers, expert witnesses. Engineering ethics case studies in detail			
7240	Education Research Methods in Engineering	G	3
Designing engineering educational research projects including authoring proposals for funding agencies. Prereq: Grad standing.			
7710	Engineering Research Communications	G	3
Students will practice skills related to scholarly and industry communications for engineering. Topics include reading and analyzing scholarly articles; organizing and writing abstracts and research papers; strategies for problem definition, citation conventions, preparing papers for publication, developing and delivering effective presentations appropriate to scholarly and industry audiences. Prereq: Grad standing in Engineering. Repeatable to a maximum of 6 cr hrs.			
8194	Group Studies in Engineering	G	1 - 4
Special topics of general interest to engineering students. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs or 4 completions.			
8998	Research in Engineering Education	G	1 - 10
Opportunity to conduct research in engineering education. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
8999	Research in Engineering Education for Dissertation	G	1 - 10
Opportunity to conduct dissertation research in engineering education. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			

Engineering Education

4999	Undergraduate Thesis Research in Engineering Education	U	1 - 5
Undergraduate thesis research on topics in Engineering Education. For students pursuing Research Distinction. Prereq: CPHR 3.0 or above, and Sr standing in the College of Engineering, and permission of instructor. Repeatable to a maximum of 5 cr hrs or 5 completions.			
4999H	Undergraduate Honors Thesis Research in Engineering Education	U	1 - 5
Undergraduate Honors Thesis research on topics of Engineering Education. For student pursuing Honors Research Distinction. Prereq: Honors standing, CPHR 3.4 or above, Sr standing in the College of Engineering, and permission of instructor. Repeatable to a maximum of 5 cr hrs.			
6100	Foundations and the Field of Engineering Education	G	3
This course is designed to prepare students for future courses, and careers in engineering education. Students will engage with literature focusing on theories and frameworks which highlight fundamental issues, questions, and approaches in engineering education. Prereq: Enrollment in EngrEdu Grad program, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
6200	Learning Theory, Pedagogy, and Assessment in Engineering Education	G	3
This course is designed to provide foundational understandings of educational learning theory, pedagogy and assessment methods within engineering education. The processes learned will inform research and instructional practice decisions, approaches and analysis. Prereq: Enrollment in EngrEdu Grad program, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
7189.01	Teaching Preparation and Support	G	2
This course supplements teaching content based training by exposing teachers to instructional pedagogies. It is a practical introduction to engineering education for instructors. Topics include using assessment for learning, best practices in instructional methods, techniques for self-reflection, etc. This version of the course is designed for new instructors. Prereq: Grad standing in the College of Engineering.			
7189.02	Professional Development in College Teaching	G	1
This course supplements teaching content based training by exposing teachers to instructional pedagogies. It is a practical extension of ENGREU 7189.01. Topics include developing new teaching modules, creating training materials for fellow instructors, furthering techniques for reflection, etc. This version of the course is designed for experienced instructors. Prereq: Grad standing in the College of Engineering.			
7193	Individual Studies in Engineering Education	G	1 - 4
Individual Studies in Engineering Education for graduate students. Prereq: Grad standing in the College of Engineering, and permission of instructor. Repeatable to a maximum of 16 cr hrs or 16 completions.			
7780	Research Design in Engineering Education	G	3
This course is designed to prepare students for productive research in engineering education throughout their graduate experience and professional careers. Research methods are highlighted and explored including quantitative, qualitative, and mixed methods. Prereq: Grad standing in the College of Engineering.			
7881	Seminar in Engineering Education	G	1
This course is designed to provide students with the ability to maintain contemporary knowledge of the field of engineering education, understand how to communicate within the field, provide exposure to different stakeholders, and build community among engineering educators. Prereq: Grad standing in the College of Engineering. Repeatable to a maximum of 4 cr hrs.			
7900	Career Exploration and Professional Development	G	3
This course is designed to prepare students for future careers and professional advancement at universities, colleges, community colleges, and technical colleges (both in tenure-track and clinical faculty appointments), government agencies, private industry, corporate training organizations, non-profits, and high schools challenged with incorporating engineering design into core science standards. Repeatable to a maximum of 6 cr hrs.			
8998	Research in Engineering Education	G	1 - 5
This course offers graduate students an opportunity to conduct research in engineering education. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.			
8999	Research in Engineering Education for Dissertation	G	1 - 18
Research in Engineering Education for Dissertation. Prereq: Enrollment in EngrEdu Grad program. Repeatable. This course is graded S/U.			

Engineering Technology

1201.01T	Exploring Engineering Technologies	U	½
Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.			
1201.02T	Exploring Construction Careers and Industry	U	½
Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.			

1201.03T Exploring Agricultural Systems Management U ½

Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.

2011T Small Engine Basics U 4

A study of the theory of operation, service and maintenance and repair of small off-road gasoline and diesel engines. Prereq: Not open to students with credit for 240T and 247T. This course is available for EM credit.

2015T Agricultural Equipment Operation and Maintenance U 2

A study of tractors and other agricultural equipment with emphasis on operation, maintenance and adjustment for safe, efficient operation. Prereq: Not open to students with credit for 215.01T or 215.02T. This course is available for EM credit.

2016T Tillage, Planting, Harvesting, and Storage Equipment U 3

Principles and applications of safely operating, adjusting, and maintaining agricultural equipment and storing crops. Recommended prereq: Completion of tractor/mobile equipment safety certification process. This course is available for EM credit.

2040T Soil and Water Conservation Systems U 4

Introduction to erosion control, irrigation, drainage, and wetland systems with an emphasis on land surveying and mapping, system selection, and design. Prereq: CrpSoil 2300T and CrpSoil 2301T (221T). Not open to students with credit for 224T. This course is available for EM credit.

2110T Construction Drawings & Basic Estimating U 1

Reading and interpretation of various types of construction drawings, as well as an introduction to material quantity calculations and estimate development. Prereq: GenMath 1030T or Math placement level S or higher. This course is available for EM credit.

2120T Building Science: Methods & Materials U 4

A study of materials science and installation methods used in residential and commercial construction. Emphasizes structural and architectural systems, moisture managed designs, air sealing, and thermal design for energy efficient structures. Prereq or concur: English 1110.01; GenMath 1145T or Math 1148 or higher. This course is available for EM credit.

2121T Drafting & Computer-Aided Design U 2

Principles and applications of technical drawing utilizing proper drafting techniques for creating two dimensional, scaled drawings both by hand and by using current computer-aided design software. Basic computer skills required. Recommended prereq: Previous experience with mechanical drawing, engineering graphics, drafting, or equivalent. This course is available for EM credit.

2160T Estimating and Scheduling U 2

Estimating complete projects and developing project schedules for standard construction projects in the residential or commercial sectors of the industry. Prereq: 2110T, 2120T, 2440T, and Soph standing. This course is available for EM credit.

2170T Construction Project Management U 2

Principles and practices of construction project and construction business management. Prereq or concur: 2160T, and Soph standing. This course is available for EM credit.

2191.01T Construction Management Internship U 2-3

Construction Management occupational internship, structured to provide occupational experiences; supervised by an industry employer and coordinated by faculty. A grade of C or better is required to meet graduation requirements. Prereq: 2110T and 2120T (253T, 256T, and 257T), and 2600T, and CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.

2191.02T Hydraulic Power and Motion Control Internship U 3

Employment in fluid power industries; structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty. A grade of C or better is required to meet graduation requirements. Prereq: 2224T (274T), 2226T (271T), and 2322T (202T); CPHR 2.0 or above; permission of instructor. Repeatable to a maximum of 6 cr hrs.

2191.03T Power Equipment Internship U 3

Employment in power equipment industries; structured to provide varied occupational experiences; supervised by an industry employer and coordinated by faculty. A grade of C or better is required to meet graduation requirements. Prereq: 2314T (241T), 2322T (202T), and 2324T (245T), and CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs.

2191.04T Agricultural Systems Technology Internship U 2

Agricultural Systems Technology occupational internship structured to provide occupational experiences; supervised by an industry employer and coordinated by faculty. A grade of C or better is required to meet graduation requirements. Prereq: CPHR 2.0 or above, and permission of instructor. Repeatable to a maximum of 4 cr hrs.

2193T Individual Studies U 1-3

Designed to give an individual student an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

2194T Group Studies U 1-3

Designed to give groups of students an opportunity to pursue special studies not offered in other courses. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

2214T Fundamentals of Fluid Power and Components U 4

An introduction to the fluid power industry and the principles of fluid power system operation. Characteristics of operation and performance are investigated for pumps, motors, and valves. A grade of C or better required to meet graduation requirements for Hydraulic Power and Motion Control. Prereq: GenMath 1030T, or Math placement level S or higher. This course is available for EM credit.

2221T Component Rebuilding U 2

Supervised laboratory experience with emphasis on developing and improving hydraulic component service competencies related to classroom and career activities. Prereq: 2214T (262T or 270T). Prereq or concur: 2224T (274T) and 2336T (273T). Not open to students with credit for 289.03T.

2224T Fluids, Filtration, and Fluid Conveyance U 2

Characteristics of hydraulic fluids; methods of filtering oils and of conveying pressurized fluids. Prereq: 2214T (262T or 270T). Not open to students with credit for 274T. This course is available for EM credit.

2226T Components and Hydraulic Circuits U 2

A study of advanced hydraulic component topics and of how fluid power components are integrated into a complete system, including performance characteristics and energy efficiency. A grade of C or better required to meet graduation requirements for Hydraulic Power and Motion Control. Prereq: 2214T. Prereq or concur: GenMath 1145T. This course is available for EM credit.

2234T Basic Pneumatic Systems U 2

Principles, operation, maintenance, service, and application of pneumatic components and systems used for control and automation on industrial equipment. Prereq or concur: GenMath 1145T. This course is available for EM credit.

2238T Electrohydraulics and System Design U 3

A study of the interface and design applications of electricity and electronics with fluid power components integrated into a complete system, including performance characteristics and energy efficiency. A grade of C or better required to meet graduation requirements for Hydraulic Power and Motion Control. Prereq: 2226T (272T). Not open to students with credit for 278T. This course is available for EM credit.

2240T Welding Technology U 3

A study of basic welding including materials, equipment, and techniques. Prereq: Not open to students with credit for 250T. This course is available for EM credit.

2242T Metals and Metal Manufacturing U 2

Introduction to metals and metal manufacturing; including materials, equipment, processes, and products. Prereq: GenMath 1040T or Math 1050 or Math placement level R or higher. This course is available for EM credit.

2248T Instrumentation and Control Systems U 4

Techniques and equipment used for instrumentation of fluid power systems for the purposes of data acquisition and control. Prereq: 2238T (278T). Not open to students with credit for 279T. This course is available for EM credit.

2310T Building Science: Electrical and Lighting Systems U 3

Principles, equipment, and applications of building electrical and lighting systems with emphasis on energy and resource conservation and sustainability. Prereq: TecPhys 1150T. Not open to students with credit for 2150T.

2312T Engineering Technology Fundamentals U 3

An introduction to basic scientific and engineering concepts commonly encountered by engineering technicians emphasizing calculations, measurements, and instrumentation. This course is available for EM credit.

2314T Introduction to Power Equipment U 3

An introduction to the off-road machinery industries, their past and future, and the application of engineering principles to the associated equipment. Prereq: GenMath 1030T, or Math placement level S or higher. This course is available for EM credit.

2322T Basic Electricity and Electronics U 3

Principles of AC and DC electricity and electronics with emphasis on components, operations, and applications. Prereq: GenMath 1040T, Math 1050, or Math placement level R or higher. This course is available for EM credit.

2324T Engine Diagnosis and Repair U 3

An advanced study of multiple cylinder diesel engine diagnostic techniques including repair and rebuilding procedures. A grade of C or better required to meet graduation requirements for Power Equipment. Prereq: 2011T (240T) or 2314T (241T). Not open to students with credit for 245T. This course is available for EM credit.

2325T Analog and Digital Electronics U 3

An introduction to analog and digital electronics with emphasis on industry applications. A grade of C or better required to meet graduation requirements for Hydraulic Power and Motion Control. Prereq: 2322T (202T). Not open to students with credit for 203T. This course is available for EM credit.

2331T Distributor Management U 2

Organization and operation of distributor marketing of mobile equipment and fluid power components and systems; emphasis on service and parts distribution. Prereq or concur: BusTec 1151T or AEDecon 2001. This course is available for EM credit.

174 Engineering Technology

2332T	Mobile Heating and Air Conditioning	U	1
Principles, operation, maintenance, service, and repair of mobile heating and air conditioning components and systems. Prereq: GenMath 1030T, or Math placement level S or higher. This course is available for EM credit.			
2334T	Vehicle Electrical and Electronic Systems	U	2
A study of electrical and electronic systems utilized in off-road machinery. A grade of C or better required to meet graduation requirements for Power Equipment. Prereq: 2322T. This course is available for EM credit.			
2336T	Methods of Power Transmission	U	2
Comparison and evaluation of power transmission by mechanical, electrical, and fluidic means. This course is available for EM credit.			
2338T	Diesel Engine Systems	U	3
A study of the principles, operation, and service of diesel engine systems with emphasis on fuel systems and engine controls. Prereq: 2324T. Prereq or concur: 2334T and TecPhys 1150T. This course is available for EM credit.			
2345T	Building Science: Mechanical Systems	U	3
Principles, equipment, and applications of building mechanical systems with emphasis on energy and resource conservation and sustainability. Prereq: TecPhys 1150T. Not open to students with credit for 2150T. This course is available for EM credit.			
2348T	Performance of Mobile Power Units	U	2
A study of operator comfort and safety, ballast, traction, stability, hitching, engine power ratings, fuel efficiency and other factors affecting the performance and application of mobile power units. A grade of C or better required to meet graduation requirements for Power Equipment. Prereq: Completion of tractor/mobile equipment safety certification process. Prereq: 2336T (273T), 2338T (248T), TecPhys 1150T (102T). Not open to students with credit for 249T. This course is available for EM credit.			
2440T	Site Development and Surveying	U	4
Principles of hydrology, soil mechanics, and surveying as applied to residential and commercial construction. Prereq or concur: 2110T or HortTec 2320T (235T); GenMath 1145T (145T) or Math Placement Level L, M, or N. Not open to students with credit for 253T. This course is available for EM credit.			
2600T	Construction Safety & Health	U	2
Health and construction safety awareness; focusing on OSHA 30-hour training and certification, OSHA mandated recordkeeping, and corporate health plan development. Prereq: English 1110.01.			

Engineering Technology (BS)

1200	Introduction to Engineering Technology	U	1
Introduction to the roles available in engineering technology, professional development planning for students pursuing this degree, and exposure to common elements in engineering technology. Course work will emphasize written and verbal communication skills. Prereq: Enrollment in the BSET program.			
1500	Manufacturing Processes I	U	3
History of manufacturing, tools and machines, and operations of the machine shop equipment. Opportunity to function individually and on teams, and communicate effectively to learn to work in groups to accomplish a task. The skills learned from this class are transferable to all areas of day to day professional life which makes it valuable in other contexts.			
1600	Engineering Graphics	U	3
Develop skills in graphic design and visualization through experience creating and interpreting 2D Computer Aided Drawings in AutoCAD. Explore various forms of technical graphics used in the field of Engineering Technology including facility layouts, piping and instrumentation diagrams, and electric schematics. Emphasis on utilizing technical graphics to solve Engineering Technology problems.			
2100	Introduction to Robotics with Vision	U	2
Introduction to Robotics teaches the basics of robotics, focused on the role of an operator, technician, or engineer/programmer. It covers robots, robot safety, robot programming, and setup and training of a 2D vision system. The knowledge learned in lectures will be applied to a robot in a laboratory environment through a series of guided labs. Prereq or concur: 2500.			
2300	Electrical Circuits for Engineering Technology	U	3
Fundamentals of electrical circuits, measuring & analyzing data, & troubleshooting those circuits. Analysis of Direct Current (primarily) & Alternating Current circuits (less content) & effects of different components- resistors, capacitors, inductors, and other components in electrical circuits. DC/AC circuit dynamics that will be used in studies of industrial & electronic control applications. Prereq: Math 1155 or 1172, and Physics 1231 or 1251. Not open to students with credit for ECE 2300.			
2500	Manufacturing Processes II	U	2
Modern manufacturing processes. Design, create, and assembly of structure/objects by combining the manufacturing and graphical design knowledge. Opportunity to function individually and on teams and communicate effectively to learn to work in groups to accomplish a task. The skills are transferable to all areas of day-to-day professional life which makes it valuable in other contexts. Prereq: 1500.			

3100	Material Science with Engineering Technology Applications	U	½
-------------	--	----------	----------

Supplemental course for BSET students that should be taken along with MatScEn 2010. This course will provide hands-on exposure to common manufacturing materials physical and chemical characteristics (like electrical and heat conductance) as well as testing methods (like stress, strain, hardness, brittleness, and microstructure.) Prereq: Physics 1250 or 1260, and Math 1151 or 1154, and Chem 1210 or 1250; or permission of instructor.

3600	Technology, Structure and Applications for Controls	U	3
-------------	--	----------	----------

This course communicates the structure of a manufacturing organization, the technology and systems in each level of the organization and the roles in the automation, control, and monitoring of automation manufacturing systems. It provides insight in the types of manufacturing systems, equipment/machinery, sensors/control devices and how to develop code for these systems for an integration. Prereq: 3900.

3700	Mechanical Processes	U	3
-------------	-----------------------------	----------	----------

Mechanical Processes is a 3-hr course designed to help students become familiar with modern mechanical processes as well as hydraulics/pneumatics and mechanical systems in manufacturing applications. The fundamentals and applications of mechanical systems included include pneumatics and hydraulics, cams, gears, bearings, gears, rotary and linear actuation. Prereq: 2500 and Engr 1182.

3800	Project Management for Engineering Technology	U	3
-------------	--	----------	----------

Project Management is a course that focuses on waterfall (PMBOK) and Agile methodologies for managing projects in the manufacturing industry. Emphasis is placed on project initiation, planning, executing, monitoring & controlling, and closing processes. This course will provide students with an overview of leadership roles and responsibilities, as well as interpersonal skills, conflict resolution. Prereq: 2500 and ISE 2040, or permission of instructor. Not open to students with credit for ISE 3800.

3900	Industrial Automation PLC1	U	3
-------------	-----------------------------------	----------	----------

Industrial Automation PLC1 is a 3-credit hour course designed as the first of two courses intended to provide the students with skills in industrial automation that can be applied in a variety of technical fields related to manufacturing. Prereq: 2300; and CSE 1222 or 1223; and Math 1155 or 1172.

4191.01	Professional Development Internship in Eng Tech I	U	1
----------------	--	----------	----------

An engineering work experience with an approved employer for minimum of 10 hours per week for approximately 15 weeks while simultaneously taking classes. Prereq: 1200, 1500, 1600, and 2500. This course is graded S/U.

4191.02	Professional Development Internship in Eng Tech II	U	2
----------------	---	----------	----------

An engineering work experience with an approved employer for minimum of 32 hours per week for approximately 10+ weeks during a period when the student is not taking regular classes. To earn credit students must demonstrate satisfactory work performance, complete monthly reporting requirements and submit a final report. Prereq: 1200, 1500, 1600, and 2500. This course is graded S/U.

4200	Industrial Automation - PLC2	U	3
-------------	-------------------------------------	----------	----------

Industrial Automation PLC2 is designed as the second of two courses to provide the students with skills in industrial automation for manufacturing. The course is designed to provide students with the comprehensive review of functions, operation, and communication of automated industrial systems including PID loops, HMIs, data transfer, troubleshooting PLC networks for equipment/process integration. Prereq: 3900.

4250	Lean Six Sigma Foundations	U	3
-------------	-----------------------------------	----------	----------

This course will provide a broad exposure to topics in quality improvement that encompass the body of knowledge for Six Sigma Green Belts in both manufacturing and service industries, including hospitals, banks and retailers. Essential concepts, practices, methods and tools for quality improvement, lean management, and effective teamwork are examined, along with the Six Sigma DMAIC methodology. Prereq: 3800, and Stat 3440.

4300	Facility Layout and Integration	U	3
-------------	--	----------	----------

Facility Layout and integration is a 3-hr course designed to give student skills needed to create effective layouts considering people, technology, process, throughput, and support systems. The class will build upon skills gained in previous classes in AutoCAD and Manufacturing Processes as well as use skills in analysis and design skills. Prereq: 3800.

4400	Leadership and Change Management	U	3
-------------	---	----------	----------

In-depth evaluation of the concepts and principles of effective leadership, the characteristics of leaders and followers, and the principles of change management. Course work will emphasize written and verbal communication skills, in addition to presentation skills and exposure to real-world case examples. Prereq: 4300.

4500	Intelligent Manufacturing and Automation	U	3
-------------	---	----------	----------

Intelligent Manufacturing and Automation is a 3-credit course in advanced robotics and automation designed to teach students complex integrated manufacturing systems to solve industry-related issues. Along the way, this course will provide you with opportunities to work individually as well as in teams to accomplish tasks using the Connected Smart Manufacturing system cell. Prereq: 2100, 3600, and 4200.

4600	Power and Drives	U	3
-------------	-------------------------	----------	----------

ENGRTEC 4600, Power and Drives, is a 3-hour course designed to introduce the student to high-voltage power generation/transmission to production facilities and distribution within the facility. Further the course will focus on applications related to motors and variable frequency drives. Applications for power (12,000 volts to 120 volts) are found in typical production facilities. Prereq: 2300.

4700 Networks, Security, & Safety Applications U 3

This course will provide you with an understanding of the basics of networking devices and systems along with the cyber security considerations and technology required for the deployment of these solutions. The cyber security materials will include a study of the human elements that impact this space. The course will provide an introduction to the safety control systems deployed in manufacturing. Prereq: 3600.

4900 ENGRTEC Capstone I U 3

This course is designed to provide students the opportunity to test their level of acquired knowledge, experience, and leadership in an actual, well-defined customer project environment. Students will be provided an assigned project of interest, work in project teams, interacting with an engineering client leadership/people, to define, design, test and implement an actual working product, service. Prereq: 3800.

4910 ENGRTEC Capstone II U 3

This is the second course of the series designed to provide students the opportunity to test their level of acquired knowledge, experience, and leadership in an actual, well-defined customer project environment. Students will be provided an assigned project of interest, work in project teams, interacting with an engineering client. Prereq: 4900.

English

1109 Intensive Writing and Reading U 4

Provides intensive practice in integrating academic reading and writing. Credit may not count toward graduation in some degree programs. Prereq: English Placement Test score of 6. Not open to students with credit for 1110.01 (110.01), 1110.01H (110.01H), 1110.02 (110.02), 1110.02H (110.02H), 052, 060, or 110.03, or equiv.

1110.01 First-Year English Composition U 3

Practice in the fundamentals of expository writing, as illustrated in the student's own writing & in the essays of professional writers. May be available as a service learning course with five hours community service required at the Lima campus only. Prereq: EduTL1902 (108.01) or 1902.04 (108.01), or English Placement Level 4. Not open to students with credit for 1109 (109.01 or 109.02), 1110.01 (non-DL version), 1110.01H (110.01H), 1110.02 (110.02), 1110.02H (110.02H), 1110.03 (110.03), 1167H (167H), 110.01. This course is available for EM credit. GE writing and comm course: level 1. GE foundation writing and info literacy course.

1110.01H Honors First-Year English Composition U 3

Provides intensive practice in the fundamentals of expository writing, as illustrated in the student's own writing and in the essays of professional writers. Prereq: Honors standing, and 28 or above on the English section of the ACT or 660 on the verbal section of the SAT; or permission of instructor. Not open to students with credit for 1110.01 (110.01), 1110.02 (110.02), 1110.02H (110.02H), 110.01H, 1110.03 (110.03), or 1167H (167H). This course is available for EM credit. GE writing and comm course: level 1. GE foundation writing and info literacy course.

1110.02 First-Year English Composition U 3

Practice in the fundamentals of expository writing, as illustrated in the student's own writing and in the essays of professional writers. Taught with an emphasis on literary texts. Prereq: EduTL 1902 or 1902.04, or English Placement Level 4. Not open to students with credit for 1109, 1110.01, 1110.01H, 1110.02 (non-DL version), 1110.02H, 1110.03, 1167H, or equiv. This course is available for EM credit. GE writing and comm course: level 1. GE foundation writing and info literacy course.

1110.02H Honors First-Year English Composition U 3

Provides intensive practice in the fundamentals of expository writing, as illustrated in the student's own writing and in the essays of professional writers. Taught with an emphasis on literary texts. Prereq: Honors standing, and 28 or above on the English section of the ACT or 660 on the verbal section of the SAT; or permission of instructor. Not open to students with credit for 1110.01 (110.01), 1110.01H (110.01H), 1110.02 (110.02), 110.02H, 1110.03 (110.03), or 1167H (167H). GE writing and comm course: level 1. GE foundation writing and info literacy course.

1110.03 First-Year English Composition U 3

Intensive practice in fundamentals of expository writing illustrated in the student's own writing and essays of professional writers; offered in a small class setting and linked with an individual tutoring component in its concurrent course, 1193. This course is available for EM credit only through the AP program. Prereq: 1109, or English Placement Level 5 (Placement Level 4 allowed if student requests service). Concur: 1193. Not open to students with credit for 1110.01 (110.01), 1110.01H (110.01H), 1110.02 (110.02), 1110.02H (110.02H), 1167H (167H), or 110.03, or equiv. GE writing and comm course: level 1. GE foundation writing and info literacy course.

1167H First-Year Writing Seminar in the Humanities U 3

Intensive critical reading and writing concerning central issues in the humanities. Prereq: Honors standing, and a 4 or 5 on the Advanced Placement Test; or permission of instructor. Not open to students with credit for 167H. GE cultures and ideas course. GE foundation historical and cultural studies course.

1193 Individual Studies U 1-4

Intensive practice in the fundamentals of expository writing. Prereq: Permission of Director of First-Year Writing. Concur: 1110.03. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.

2150 Career Preparation for English and Related Majors U 3

This general elective course helps English majors and students from other Humanities disciplines to explore and prepare for careers after graduation. Students will analyze texts to gain a practical and theoretical understanding of the world of work. They will learn to identify their own strengths and preferences to guide their job activity and career choices.

2176 Rhetorics of Race, Ethnicity, and Gender U 3

In this course students study the basic elements of rhetoric and rhetorical representations of various historically constituted categories, including race, gender, and ethnicity, and use rhetoric as a lens for examining messages about race, gender, and ethnicity. Students analyze the ways that these categories are rhetorically constructed and the material consequences of those constructions. Prereq: 1110. GE foundation race, ethnicity and gender div course.

2194 Group Studies U 1-3

Topic varies from semester to semester on subjects not otherwise covered by English courses. Prereq: 1110.01 (110.01), or equiv. Not open to students with 30 qtr cr hrs for 294. Repeatable to a maximum of 18 cr hrs or 18 completions.

2201 Selected Works of British Literature: Medieval through 1800 U 3

An introductory critical study of the works of major British writers from 800 to 1800. Prereq: 1110.01, or equiv. Not open to students with credit for 2201H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2201H Selected Works of British Literature: Medieval through 1800 U 3

An introductory critical study of the words of major British writers from 800 to 1800. Prereq: Honors standing, and 1110.01 (110.01) or equiv. Not open to students with credit for 2201 (201) or 201H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2202 Selected Works of British Literature: 1800 to Present U 3

An introductory critical study of the works of major British writers of the 19th and 20th centuries. Prereq: 1110, or GE foundation writing and info literacy course. Not open to students with credit for 2202H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2202H Selected Works of British Literature: 1800 to Present U 3

An introductory critical study of works of major British writers of the 19th and 20th centuries. Prereq: Honors standing, and 1110.01 (110.01), or equiv. Not open to students with credit for 2202 (202) or 202H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2220 Introduction to Shakespeare U 3

Study of selected plays designed to give an understanding of drama as theatrical art and as an interpretation of fundamental human experience. Prereq: Completion of GE Foundation Writing and Information Literacy course. Not open to students with credit for 2220H. GE lit and diversity global studies course. GE foundation lit, vis and performing arts course.

2220H Introduction to Shakespeare U 3

Study of selected plays designed to give an understanding of drama as theatrical art and as an interpretation of fundamental human experience. Prereq: Honors standing, and 1110.01 (110.01) or equiv. Not open to students with credit for 2220 (220) or 220H. GE lit course and diversity global studies course. GE foundation lit, vis and performing arts course.

2221 Introduction to Shakespeare, Race, and Gender U 3

This course explores the historical roots of our ideas about race and gender by way of Shakespeare and the culture in which he wrote. Students will learn how Shakespeare's formulations of issues of race and gender are products of a time when both categories were undergoing significant conceptual development and how Shakespeare's ways of imagining this turbulence continues to resonate today. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE foundation race, ethnicity and gender div course.

2260 Introduction to Poetry U 3

Designed to help students understand and appreciate poetry through an intensive study of a representative group of poems. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 2260H (260H) or 260. GE lit course. GE foundation lit, vis and performing arts course.

2260H Introduction to Poetry U 3

Designed to help students understand and appreciate poetry through an intensive study of a representative group of poems. Prereq: Honors standing, and 1110.01 (110.01) or equiv. Not open to students with credit for 2260 (260) or 260H. GE lit course. GE foundation lit, vis and performing arts course.

2261 Introduction to Fiction U 3

Examination of the elements of fiction -- plot, character, setting, narrative, perspective, theme, etc. -- and their various interrelations; comparisons with nonfictional narrative may be included. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 2261H (261H) or 261. GE lit course. GE foundation lit, vis and performing arts course.

2261H Introduction to Fiction U 3

Examination of the elements of fiction -- plot, character, setting, narrative, perspective, theme, etc. -- and their various interrelations; comparisons with nonfictional narrative may be included. Prereq: Honors standing, and 1110.01 (110.01) or equiv. Not open to students with credit for 2261 (261) or 261H. GE lit course. GE foundation lit, vis and performing arts course.

176 English

2262 Introduction to Drama U 3

A critical analysis of selected dramatic masterpieces from Greek antiquity to the present, designed to clarify the nature and major achievements of Western dramatic art. Prereq: GE foundation writing and info literacy course. Not open to students with credit for 2262H. GE lit course. GE foundation lit, vis and performing arts course.

2263 Introduction to Film U 3

Introduction to methods of reading film texts by analyzing cinema as technique, as system, and as cultural product. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 263. GE VPA course. GE foundation lit, vis and performing arts course.

2264 Introduction to Popular Cultures U 3

This course introduces students to the interdisciplinary field of Popular Culture Studies through a variety of methods and case studies. The specific focus will be on the entanglement of race, ethnicity, and gender in popular cultures. Prereq: Completion of English 1110 or one GE Foundation Writing and Information Literacy course. Not open to students with credit for CompStd 2264. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in CompStd.

2265 Introductory Fiction Writing U 3

An introduction to the fundamentals of technique, craft, and composition; practice in the writing of fiction; and analysis and discussion of student work as well as published stories by masters of the genre. Prereq: 1110.

2266 Introductory Poetry Writing U 3

An introduction to the fundamentals of technique, craft, composition, and prosody; practice in the writing of poetry; and analysis and discussion of student work as well as published poems by established poets. Prereq: 1110.

2267 Introduction to Creative Writing U 3

An introduction to the writing of fiction, poetry, and creative nonfiction. Analysis and discussion of student work, with reference to the general methods and scope of all three genres. Prereq: 1110.01 or equiv.

2268 Introductory Creative Nonfiction Writing U 3

An introduction to the fundamentals of technique, craft, and composition; practice in the writing of creative nonfiction; and analysis and discussion of student work as well as published essays by masters of the many forms of creative nonfiction. Prereq: 1110.

2269 Digital Media Composing U 3

A composition course in which students analyze and compose digital media texts while studying complex forms and practices of textual production. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 269. GE VPA course. GE foundation lit, vis and performing arts course.

2270 Introduction to Folklore U 3

A general study of the field of folklore including basic approaches and a survey of primary folk materials: folktales, legends, folksongs, ballads, and folk beliefs. Prereq: 1110.01 or equiv. Not open to students with credit for 2270H, CompStd 2350, or 2350H. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in CompStd 2350.

2270H Introduction to Folklore U 3

A general study of the field of folklore including basic approaches and a survey of primary folk materials: folktales, legends, folksongs, ballads, and folk beliefs. Prereq: Honors standing, and English 1110 or equiv. Not open to students with credit for 2270, CompStd 2350, or 2350H. GE cultures and ideas course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in CompStd 2350H.

2275 Thematic Approaches to Literature U 3

An introduction to literature through the examination of a major theme as treated in different genres and periods; topic varies by semester. Prereq: 1110.01 (110.01) or equiv. Not open to students with 10 qtr cr hrs for 275. Repeatable to a maximum of 6 or hrs. GE lit course. GE foundation lit, vis and performing arts course.

2276 Arts of Persuasion U 3

Introduces students to the study and practice of rhetoric and how arguments are shaped by technology, media, and cultural contexts. Prereq: GE foundation writing and info literacy course. GE cultures and ideas course. GE theme citizenship for div and just wrld course.

2276H Arts of Persuasion U 4

Introduction for honors students to the study and practice of rhetoric and how arguments are shaped by technology, media, and cultural contexts. Prereq: Honors standing, and GE foundation writing and info literacy course. GE theme citizenship for div and just wrld course.

2277 Introduction to Disability Studies U 3

Foundational concepts and issues in disability studies; introduction to the sociopolitical models of disability. Prereq: 1110.01. GE cultures and ideas course. GE theme health and well-being course.

2280 The English Bible U 3

The Bible in English translation, with special attention to its literary qualities, conceptual content, and development within history. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 2280H (280H) or 280. GE lit course. GE foundation lit, vis and performing arts course.

2280H The English Bible U 3

The Bible in English translation, with special attention to its literary qualities, conceptual content, and development within history. Prereq: Honors standing, and 1110.01 (110.01) or equiv. Not open to students with credit for 2280 (280) or 280H. GE lit course. GE foundation lit, vis and performing arts course.

2281 Introduction to African-American Literature U 3

A study of representative literary works by African-American writers from 1760 to the present. Prereq: Completion of GE Foundation Writing and Information Literacy course. Not open to students with credit for AfAmAst 2281. GE lit and diversity soc div in the US course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course. Cross-listed in AfAmAst.

2282 Introduction to Queer Studies U 3

Introduces and problematizes foundational concepts of the interdisciplinary field of queer studies, highlighting the intersections of sexuality with race, class, and nationality. Prereq: 1110.01. Not open to students with credit for WGSSt 2282. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed in WGSSt.

2290 Colonial and U.S. Literature to 1865 U 3

Introductory study of significant works of U.S. literature from its Colonial origins to 1865. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 290. GE lit course. GE foundation lit, vis and performing arts course.

2291 U.S. Literature: 1865 to Present U 3

Introductory study of significant works of U.S. literature from 1865 to the present. Prereq: 1110. GE lit course. GE foundation lit, vis and performing arts course.

2367.01 Language, Identity, and Culture in the U.S. Experience U 3

Extends & refines expository writing & analytical reading skills, emphasizing recognition of intertextuality & reflection on compositional strategies on topics pertaining to education & pop culture in America. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: 1110.01 (110.01), and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English. Not open to students with credit for 2367.01H (367.01H), 210, 267, 267H, 301, 303, or equiv. GE writing and comm: level 2 and diversity soc div in the US course.

2367.01H Language, Identity, and Culture in the U.S. Experience U 3

Extends & refines expository writing & analytical reading skills emphasizing recognition of intertextuality & reflection on compositional strategies on topics pertaining to education & pop culture in America. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: Honors standing; and 1110.01 (110.01), and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English; or permission of instructor. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, or equiv. GE writing and comm: level 2 and diversity soc div in the US course.

2367.01S Language, Identity, and Culture in the U.S. Experience U 3

Extends & refines expository writing & analytical reading skills emphasizing recognition of intertextuality & reflection on compositional strategies on topics pertaining to education & pop culture in America. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: 1110.01 (110.01), and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, or equiv. GE writing and comm: level 2 and diversity soc div in the US course.

2367.02 Literature in the U.S. Experience U 3

Discussion & practice of the conventions, practices, & expectations of scholarly reading of literature & expository writing on issues relating to diversity within the U.S. experience. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: 1110.01 (110.01) or equiv, and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, or equiv. GE writing and comm: level 2 and lit (BS only) and diversity soc div in the US course. GE foundation lit, vis and performing arts course.

2367.02H Literature in the U.S. Experience U 3

Discussion & practice of the conventions, practices, & expectations of scholarly reading of literature & expository writing on issues relating to diversity within the U.S. experience. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: Honors standing; and 1110.01 (110.01) or equiv, and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English; or permission of instructor. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, or equiv. GE writing and comm: level 2 and lit (BS only) and diversity soc div in the US course. GE foundation lit, vis and performing arts course.

2367.03 Documentary in the U.S. Experience U 3

An intermediate course that extends and refines skills in critical reading and expository writing through analysis of written texts, video, and documentaries. Only one 2367 (367) decimal subdivision may be taken for credit. Prereq: 1110.01 (110.01) or equiv, and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, or equiv. GE writing and comm course: level 2.

2367.04 Technology and Science in the U.S. Experience U 3

Explores how technological changes impact our culture & relationships; students build & expand skills in rhetorical analysis & composition through experimentation with new forms of communicating. One 2367 (367) subdivision may be taken for credit. Prereq: 1110.01 (110.01) or equiv, and Soph standing; or EM credit for 1110.01 (110.01) or equiv; or a declared major in English. Not open to students with credit for 2367.01 (367.01), 210, 267, 267H, 301, 303, 367.04H, or equiv. GE writing and comm course: level 2.

2367.05	Writing About the U.S. Folk Experience	U	3
Concepts of American folklore and ethnography; folk groups, tradition, and fieldwork methodology; how these contribute to the development of critical reading, writing, and thinking skills in the context of lived environments. Prereq: 1110. GE writing and comm: level 2 and diversity soc div in the US course. GE theme lived environments course.			
2367.06	Writing about Disability	U	3
Students will critically examine writing about disability, health, and wellness from a variety of genres (scholarly essays, personal essays, documentaries, comics, music, film) and use their findings to produce creative, scholarly, and professional documents appealing to multiple audiences and rhetorical situations. Prereq: GE foundation writing and info literacy course. GE writing and comm: level 2 and diversity soc div in the US course. GE theme health and well-being course.			
2367.07S	Literacy Narratives of Black Columbus	U	4
This service-learning course focuses on collecting and preserving literacy narratives of Columbus-area Black communities. Through engagement with community partners, students refine skills in research, analysis, and composition; students synthesize information, create arguments about discursive/visual/cultural artifacts, and reflect on the literacy and life-history narratives of Black Columbus. Prereq: 1110. Not open to students with credit for AfAmAST 2367.07S. GE writing and comm: level 2 and diversity soc div in the US course. GE theme lived environments course. Cross-listed in AfAmAST.			
2367.08	The U.S. Experience: Writing About Video Games and Virtual Worlds	U	3
Emphasizes persuasive and researched writing, revision, and composing in various forms and media. Focusing on digital literacy, development of critical thinking skills and skill in producing analytical prose, students explore key conversations in the field of game studies and analyze a variety of types of video game writing. No prior knowledge of video games or game studies is required. Prereq: 1110 or completion of GE Foundation Writing and Information Literacy course. GE writing and comm course: level 2. GE theme lived environments course.			
2381	Introduction to the Black Atlantic	U	3
The term 'Black Atlantic' describes encounters between Africans, Europeans, and Americans that have shaped our modern world: its politics, its literature, its art, and its economics. This class examines the literature of these encounters and relevant media in visual art and cinema depicting enslavement of Africans and resistance to slavery, racism, and the politics of white supremacy. Prereq: 1110. GE foundation race, ethnicity and gender div course.			
2463	Introduction to Video Games Analysis	U	3
An introduction to humanities-based methods of analyzing and interpreting video games in terms of form, genre, style, and theory. No background in video game play is necessary. All students will have regular opportunities for hands-on experience with different game types and genres in both the computer-based classroom and the English Department Video Game Lab. Prereq: English 1110. GE VPA course.			
2464	Introduction to Comics Studies	U	3
Study of sequential comics and graphic narrative and the formal elements of comics, how word and image compete and collaborate in comics to make meaning and how genre is activated and redeployed. Students analyze comics texts, articulate and defend interpretations of meaning and learn about archival research at OSU's Billy Ireland Cartoon Library and Museum. No background in comics is required. Prereq: 1110. GE VPA course. GE foundation lit, vis and performing arts course.			
2581	Introduction to U.S. Ethnic Literatures and Cultures	U	3
This course provides a broad survey of literature produced by and about the major racial groups in the United States, examining how social movements of the 1960s and 70s led to the emergence of ethnic studies in higher education and how the literature addresses a wide range of historical events and political processes that have constructed racial differences and hierarchies in the U.S. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE foundation race, ethnicity and gender div course.			
3000	Writing for Social Change	U	3
In this course we will use academic writing and research practices across various forms of media to investigate the role of citizenship historically and currently, exploring the ways that we as citizens can work towards a more just and diverse society. We will develop a definition of citizenship that emphasizes a citizen's relationship to their local, national, and global environments. Prereq: GE foundation writing and info literacy course. GE theme citizenship for div and just wrld course.			
3011.01	Digital Activism	U	3
This course is both critical and creative. Students will tinker with digital media tools and think about digital media and social change and citizenship within a rich and safe environment, investigating and experimenting with the consequences of humans' relationships with digital media; studio days will afford hands-on guidance in mobilizing digital media for the purpose of protest and activism. Prereq: 1110. GE theme citizenship for div and just wrld course.			
3011.02	Social Media Rhetoric	U	3
This course examines the everyday rhetoric of social media, focusing on how people use social media to engage in the public sphere, to form communities, and to encounter other political, cultural, and global communities. Prereq: GE foundation writing and info literacy course. GE theme citizenship for div and just wrld course.			

3020	Writing About Sustainability	U	3
This course asks students to consider their place in the natural world by conducting primary and secondary research, analyzing data, composing and revising written arguments, and becoming more proficient with the conventions of academic discourses. We will employ rhetorical theory as one approach to engage in advanced, in-depth, and scholarly investigations about sustainability. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme sustainability course.			
3022	Media Sustainability	U	3
This course explores the sustainability of digital media infrastructure and its impact on the environment as well as the social and cultural effects of the web, analyzing the ecological impacts of producing and maintaining digital devices and the internet, the human cost of modern manufacturing practices, and the social and cultural upheavals caused by digital computing and networking. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme sustainability course.			
3031	Rhetorics of Health, Illness, and Wellness	U	3
Students examine rhetorical concepts and how rhetorical devices construct our understanding of our bodies, health and wellness. Students learn how power structures and ideologies enable commonplace rhetorical devices to structure normative beliefs about bodies, health, and wellness and how rhetoric shapes perceptions of health and wellness and makes and unmakes healthy bodies, including your own. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme health and well-being course.			
3110	Citizenship, Justice, and Diversity in Literatures, Cultures, and Media	U	3
Since the beginning of the modern nation state, cultural texts (poems, novels, films, pamphlets, zines, short stories, advertisements, comics, etc.) have been the essential medium through which the discourse of citizenship has been developed, constructed, refined, and debated. In this course student examine a range of literary periods, genres, and media focused on citizenship and social justice. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme citizenship for div and just wrld course.			
3161	Drug Use & Addiction in Literature	U	3
Students will read fiction, poetry, memoirs, songs, comics, and films that portray drug use and addiction. Through literature students will discover the history of the human experience with substance use and abuse, and learn how literary texts provide human beings with unique tools to describe, explain, and analyze the complicated relationship between people and drugs. Prereq: GE foundation writing and info literacy course. GE theme health and well-being course.			
3264	Monsters Without and Within	U	3
Storytellers have long used monsters not only to frighten us but also to jolt us into thinking deeply about ourselves, others, and the world we live in. This course examines how various horror genres use monsters to explore issues of wellbeing and citizenship, and debates about race, gender, sexual orientation, mental health, social justice, and personal responsibility. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme citizenship for div and just wrld and health and well-being course.			
3271	Structure of the English Language	U	3
Students learn basic characteristics of English linguistics focusing on the basic building blocks of language; the sounds of English and how they are put together, word formation processes, and rules for combining words into utterances/sentences. Students investigate and explore linguistic variation, accents of American English, and the implications of language evaluation in educational settings. Prereq: 1110.01 (110.01). Not open to students with credit for 4570 (570), 6760 (760), 271, 669, 671, 2271, or Linguist 601. GE cultures and ideas course. GE foundation historical and cultural studies course.			
3273	Modernist Thought & Culture, 1880-1945	U	3
This is a team-taught course that surveys modern Western cultural history and its revolutionary developments in physics, genetics, philosophy, psychiatry, visual art, architecture, music, dance, and literature. The team-teaching format ensures that students will have the opportunity to approach modernist ideas and forms of expression from more than one disciplinary perspective. Prereq: English 1110 and any History 2000-level course, or permission of instructor. Not open to students with credit for History 3273. Cross-listed in History.			
3304	Business and Professional Writing	U	3
The study of principles and practices of business and professional writing. Prereq: 1110.01 or equiv.			
3305	Technical Writing	U	3
Study of principles and practices of technical writing. Emphasis on the style, organization, and conventions of technical and research reports, proposals, memoranda, professional correspondence, etc.. Prereq: 1110.01.			
3331	Thinking Theoretically	U	3
Study of fundamental texts and practices informing contemporary understandings of theory in the humanities and social sciences. Prereq: 1110 or equiv. Not open to students with credit for ArtsSci 3331 (331).			
3340	Reimagining Climate Change	U	3
The course focuses on literature and media (fiction, non-fiction, film, video games, comics) that discuss the broad issue of climate change and the long relationship between humans and the environment. Prereq: 1110 or completion of GE foundation writing and information literacy course. GE theme sustainability course.			

178 English

3350	Time & Space Travel in Science Fiction	U	3	This course will focus on a classic trope in science fiction: traveling to imaginary lands and times. Travel has allowed writers to reimagine human relationships to lived environments by inviting comparisons between the past and present, between the here and there. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme lived environments course.	3662	An Introduction to Literary Publishing	U	3	An introduction to the theory and practice of editing and publishing literature. Prereq: 2265, 2266, 2267, or 2268. Not open to students with credit for 5662.01 or 662.
3360	Ecopoetics	U	3	'Ecopoetics' is a thematic literature course focused on interpretation and analysis of literary texts that represent interactions between humans and the natural world within specific cultural and historical settings, through a contextual examination of how human activity has impacted the environment, how social and natural systems interact, and the long-term impact of human choices. Prereq: Completion of GE Foundation Writing and Information Literacy course. GE theme lived environments course.	4150	Cultures of Professional Writing	U	3	Examine writing in various workplaces. Analyze writing discourse that shapes professional organizations. Explore ongoing technological and cultural shifts required of workplace writers and the role of digital media. Prereq: 1110 and any 2367. Not open to students with credit for HumCol 450.01, 450.02, 450.03, or CSTW 4150.
3361	Narrative and Medicine	U	3	Study of fictional and nonfictional narratives offering diverse perspectives on such medical issues as illness, aging, treatment, health and healing, and doctor-patient relationships. Prereq: 1110.01 (110.01) or equiv. Not open to students with credit for 361. GE lit course.	4189	Professional Writing Minor: Capstone Internship	U	3	Students work onsite in an organization doing writing-related work and meet weekly to discuss related topics. Prereq: 4150 or CSTW 4150, and 2 courses in Professional Writing minor. Not open to students with more than 6 cr hrs of CSTW 4191. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.
3364	Special Topics in Popular Culture	U	3	Focused study in reading popular culture texts, organized around a single theme, period, or medium. Prereq: 1110.01 (110.01) or equiv. Repeatable to a maximum of 6 cr hrs. GE cultures and ideas course. GE foundation historical and cultural studies course.	4321	Environmental Literatures, Cultures, and Media	U	3	Examines past and present environmental issues from the perspective of English studies, including literary, rhetorical, and cultural analysis of texts and media. Prereq: 2367, or permission of instructor. Repeatable to a maximum of 6 cr hrs.
3372	Special Topics in Science Fiction or Fantasy	U	3	Introduction to the tradition and practice of speculative writing. Provides students the opportunity to examine and compare works of science fiction and/or fantasy. Prereq: 1110. Repeatable to a maximum of 6 cr hrs. GE lit course. GE foundation lit, vis and performing arts course.	4400	Literary Locations	U	3	Study of sites of literary importance, and texts connected with them in the British Isles, Ireland, and elsewhere. Concludes with 10-day visit to location. Taught in conjunction with English 5797. Prereq: Permission of instructor. Concur: 5797. Not open to students with 10 qtr cr hrs for 595. Repeatable to a maximum of 6 cr hrs.
3378	Special Topics in Film and Literature	U	3	Focuses on the relationship between film and literature; topics may include adaptation, cross-media themes and modes, influence of cinema on literature and vice versa. Prereq: 1110. Not open to students with 10 qtr cr hrs for 378. Repeatable to a maximum of 6 cr hrs. GE cultures and ideas course. GE foundation historical and cultural studies course.	4410	Healthcare Experiences: Observing, Reading, Writing	U	3	An elective for the Medical Humanities Minor, this course combines practical experience in a health care setting via volunteer work or shadowing with formal study of health, illness, and treatment in contemporary culture. It brings academic and practical learning into productive dialogue to illuminate relations between "theory" and "practice" in health care settings. Prereq: Completion of at least 9 credit hours toward the Medical Humanities Minor or permission of instructor.
3379	Methods for the Study of Writing, Rhetoric and Literacy	U	3	Introduction to the interrelated fields of Writing, Rhetoric, and Literacy, familiarizing students with key concepts that underlie work in these interrelated fields and to the scholarly methods of WR. Together, this discipline studies the ways people use language and other symbols to convey messages, persuade audiences, and create meaning, and how these practices are learned and taught. Prereq: 1110. Not open to students with credit for 2279.	4420	Capstone Course for Integrated Major in Mathematics and English	U	3	Students combine the Mathematics and English knowledge and skills they have acquired in the integrated major through a capstone experience. Prereq: Sr standing in Integrated Major in Mathematics and English (IMME) Program, or permission of instructor. Not open to students with credit for Math 4420. Cross-listed in Math.
3395	Literature and Leadership	U	3	In this course students consider leadership as a component of national citizenship and literature as a mode of exploring and analyzing a range of perspectives on leadership. The course will encourage students to think about how responses to power are mediated by race, gender, and class and how literary study can help them reflect on and articulate their own leadership strengths and aspirations. Prereq: 1110. GE theme citizenship for div and just wrld course.	4450	Literature and Culture of London	U	3	A month-long Education Abroad course focusing on past and present London as the center of British literature and culture. The course is taught by Ohio State faculty while students are resident in London. Offered in May term. 3 credit hours. Prereq: Permission of instructor.
3398	Methods for the Study of Literature	U	3	Serves as the "Methods" course for the Literature and Creative Writing concentrations within the English major. Its purpose is to familiarize students with literary studies in such a way as to prepare them for advanced courses in all literary fields and the genres of Creative Writing. Required of English majors. Open to English majors only or others by dept permission. Prereq: 1110.01, and declared major in English. Sr students must have the permission of the Director of Undergraduate Studies. Not open to students with credit for 2298 or 3398H.	4513	Introduction to Medieval Literature	U	3	The study of masterpieces from the Middle Ages, chosen for their values in interpreting medieval culture as well as for their independent literary worth. Prereq: 6 cr hrs in English at 2000-3000 level, or permission of instructor. 5 qtr cr hrs of 367 or 6 sem cr hrs of 2367 in any subject are acceptable towards the 6 cr hrs. Not open to students with credit for 513.
3405	Special Topics in Professional Communication	U	3	Study of principles and practices in technical communication, technical editing, managerial communication, international business communication, visual rhetoric, writing for the web, and scientific writing. Prereq: A 2367 (367) second writing course. Not open to students with 10 qtr cr hrs for 405. Repeatable to a maximum of 6 cr hrs.	4514	Middle English Literature	U	3	A study of non-Chaucerian classics from late medieval England, such as Sir Gawain and the Green Knight, Piers Plowman, and The Book of Margery Kempe. Prereq: 6 cr hrs in English at 2000-3000 level, or permission of instructor. 5 qtr cr hrs of 367 or 6 sem cr hrs of 2367 in any subject are acceptable towards the 6 cr hrs. Not open to students with credit for 514.
3465	Special topics in Intermediate Fiction Writing	U	3	For students who have experience with the basic elements of writing fiction. Special topics focus on particular aspects of the genre; advanced techniques are explored. Prereq: Grade of C or above in 2265. Repeatable to a maximum of 6 cr hrs.	4515	Chaucer	U	3	A close study of Troilus and Criseyde and The Canterbury Tales as introduction to the artist and his period. Prereq: 6 cr hrs in English at 2000-3000 level, or permission of instructor. 5 qtr cr hrs of 367 or 6 sem cr hrs of 2367 in any subject are acceptable towards the 6 cr hrs. Not open to students with credit for 515 or 615.
3466	Special Topics in Intermediate Poetry Writing	U	3	For students who have experience with the basic elements of writing poetry. Special topics focus on particular aspects of the genre; advanced techniques are explored. Prereq: Grade of C or above in 2266.  A program of reading arranged for each student, with individual conferences, reports, and honors thesis. Open only to candidates for distinction in English. Prereq: Honors standing, and Sr standing, and permission of the professor under whose supervision the work is to be completed. Repeatable to a maximum of 10 or hrs or 10 completions. This course is graded S/U.

5189S Comparative Studies Field School U G 3
 Introduction to ethnographic field methods (participant-observation, writing field notes, photography, interviewing), archiving, and public humanities. An introduction to fieldwork is followed by a field experience (where students will reside together in local housing) followed by accessioning, exhibition planning and reflection. Maximum credit hours include those for CompStd 5189S. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs. Cross-listed in CompStd.

5191 Internship in English Studies U G 1 - 3
 Students may receive credit for internships across a wide variety of career fields including, but not limited to, the arts and nonprofit administration; creative, business, and technical writing; communications, marketing and public relations; consulting; education; human resources; law and politics; media production; publishing; sales; social services and counseling; and technology services. Prereq: Permission of instructor. Not open to students with 15 qtr cr hrs for 689. Repeatable to a maximum of 9 or hrs or 9 completions. This course is graded S/U.

5193 Individual Studies U G 1 - 3
 Students may register for individual directed study under this number for work not normally offered in courses. Prereq: Permission of instructor and department undergraduate or graduate committee. Not open to students with 10 qtr cr hrs for 693. Repeatable to a maximum of 9 or hrs or 9 completions. This course is graded S/U.

5194 Group Studies U G 1 - 3
 Group studies. Prereq: Permission of instructor. Not open to students with 15 qtr cr hrs for 694 or 9 sem cr hrs for 5194. Repeatable to a maximum of 9 or hrs or 9 completions.

5612 The History of the Book in Modernity U G 3
 This course explores books and other printed matter as material objects rather than neutral containers for texts; literally judging books by their covers, examining production, design, and materials as well as the myriad uses to which books been put in the world over the past two centuries. The course is embedded in the collections of OSU's Rare Books and Manuscripts Library.

5662.02 Literary Publishing U G 3
 Theory and practice of editing and publishing literature. Prereq: 2265 (265), 2266 (266), or 2268 (268), and permission of instructor. Not open to students with credit for 5662 (662). This course is graded S/U.

5664 Studies in Graphic Narrative U G 3
 Introduction to advanced study in graphic narrative and theory; thematic topics include the contemporary graphic novel, graphic autobiography, the history of comics, and comics journalism. Prereq: 9 or hrs at the 3000, 4000, or 5000-level in English, or permission of instructor. Repeatable to a maximum of 9 or hrs.

5710.01 Introduction to Old English Language and Literature U G 3
 Introduction to Old English language, followed by selected readings in Anglo-Saxon prose and verse texts. Prereq: 9 or hrs at the 3000, 4000, or 5000 level, or equiv work in allied departments, or permission of instructor. Not open to students with credit for 5710.01 (710) or 5710.02.

5710.02 Introduction to Old English Language and Literature U G 3
 Introduction to Old English language, followed by selected readings in Anglo-Saxon prose and verse texts. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 5710.01 (710) or 5710.02. This course is graded S/U.

5711 Intermediate Old English U G 3
 Students with intermediate or advanced reading knowledge of Old English will continue their study of Old English to strengthen translation skills, explore scholarship in the field, and learn discipline-specific research tools. Prereq: 5710, or equivalent, or permission of the instructor. Repeatable to a maximum of 6 cr hrs or 2 completions.

5720.01 Graduate Studies in Shakespeare U G 3
 Study of topics, themes, and problems in advanced studies of Shakespeare. Prereq: 10 qtr cr hrs of 300, 400, or 500 level, or 9 sem cr hrs of 3000, 4000, or 5000 level, or Grad standing, or permission of instructor. Not open to students with 5 qtr cr hrs for 720 or 6 sem cr hrs for 5720.01 or 5720.02. Repeatable to a maximum of 6 cr hrs.

5720.02 Graduate Studies in Shakespeare U G 3
 Study of topics, themes, and problems in advanced studies of Shakespeare. Prereq: 10 qtr cr hrs at the 300, 400, or 500 level, or 9 sem cr hrs at the 3000, 4000, or 5000 level, or Grad standing, or permission of instructor. Not open to students with 5 qtr cr hrs for 720 or 6 sem cr hrs for 5720.01 or 5720.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

5721.01 Graduate Studies in Renaissance Drama U G 3
 Study of topics, themes, and problems in advanced studies of English drama from the early sixteenth century to 1660. Prereq: 10 qtr cr hrs at 300, 400, or 500 level, or 9 sem cr hrs at 3000, 4000, or 5000 level, or Grad standing, or permission of instructor. Not open to students with more than 5 qtr cr hrs for 720 or 6 sem cr hrs for 5721.01 or 5721.02. Repeatable to a maximum of 6 cr hrs.

5721.02 Graduate Studies in Renaissance Drama U G 3
 Study of topics, themes, and problems in advanced studies of English drama from the early sixteenth century to 1660. Prereq: Grad standing, or permission of instructor. Not open to students with more than 5 qtr cr hrs for 720 or 6 sem cr hrs for 5721.01 or 5721.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

5722.01 Graduate Studies in Renaissance Poetry U G 3
 Study of topics, themes, and problems in advanced studies of English poetry from the early sixteenth century to 1660. Prereq: 10 qtr cr hrs in English at the 300, 400, or 500 level, or 9 sem cr hrs at the 3000, 4000, or 5000 level, or permission of instructor. Not open to students with 6 sem cr hrs for 5722.01 or 5722.02. Repeatable to a maximum of 6 cr hrs.

5722.02 Graduate Studies in Renaissance Poetry U G 3
 Study of topics, themes, and problems in advanced studies of English poetry from the early sixteenth century to 1660. Prereq: Grad standing, or permission of instructor. Not open to students with 6 cr hrs for 5722.01 or 5722.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

5797 Study at a Foreign Institution U G 1 - 27
 An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Arranged. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Prereq: Permission of instructor. Not open to students with 45 qtr cr hrs for 697 or 27 sem cr hrs for 5797. Repeatable to a maximum of 27 cr hrs or 27 completions. This course is progress graded (S/U).

6194 Group Studies G 1 - 3
 Group Studies Prereq: Grad standing, or permission of instructor. Not open to students with 9 sem cr hrs or 15 qtr cr hrs for 6194 (894). Repeatable to a maximum of 9 or hrs or 9 completions.

6410.01 Introduction to Graduate Study in Medical Humanities and Social Sciences G 3
 Study of medicine from the perspective of the humanities and social sciences; emphasis on how these perspectives complicate an understanding of medicine as pure science. Prereq: Grad standing.

6410.02 Introduction to Graduate Study in Medical Humanities and Social Sciences G 3
 Study of medicine from the perspective of the humanities and social sciences; emphasis on how these perspectives complicate an understanding of medicine as pure science. Prereq: Grad standing. This course is graded S/U.

6662 Literary Publishing G 3
 Theory and practice of editing and publishing literature for MFA students in creative writing. Prereq: MFA (Creative Writing) standing, or permission of instructor. Not open to students with credit for 662 or 5662.01.

6700.01 Introduction to Graduate Study in English G 3
 Introduction to bibliography, research methods, critical theory, and the principles of literary criticism for advanced work in English studies. Required of all English doctoral candidates. Prereq: Permission of Director of Graduate Studies. Not open to students with credit for 6787.02, 700, or 800.

6700.02 Introduction to Graduate Study in English G 3
 Introduction to bibliography, research methods, critical theory, and the principles of literary criticism for advanced work in English studies. Required of all English doctoral candidates. Prereq: Permission of Director of Graduate Studies. Not open to students with credit for 6787.01, 700, or 800. This course is graded S/U.

6716.01 Introduction to Graduate Study in the Middle Ages G 3
 Introduction to advanced study and current scholarship and criticism in medieval literature, 1300-1500. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6716.01 (716) or 6716.02.

182 English

6716.02	Introduction to Graduate Study in the Middle Ages	G	3
Introduction to advanced study and current scholarship and criticism in medieval literature, 1300-1500. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6716.01 (716) or 6716.02. This course is graded S/U.			
6718.01	Introduction to Graduate Study in Chaucer	G	3
Introduction to advanced study in Chaucer, with a focus on The Canterbury Tales and Troilus and Criseyde. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6718.01 (718) or 6718.02.			
6718.02	Introduction to Graduate Study in Chaucer	G	3
Introduction to advanced study in Chaucer, with a focus on The Canterbury Tales and Troilus and Criseyde. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6718.01 (718) or 6718.02. This course is graded S/U.			
6746.01	Introduction to Graduate Study in British Literature of the Romantic Period	G	3
Introduction to advanced study and current scholarship and criticism in British literature of the Romantic period. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6746.01 (746) or 6746.02.			
6746.02	Introduction to Graduate Study in British Literature of the Romantic Period	G	3
Introduction to advanced study and current scholarship and criticism in British literature of the Romantic period. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6746.01 (746) or 6746.02. This course is graded S/U.			
6747.01	Introduction to Graduate Study in British Literature of the Victorian Period	G	3
Introduction to advanced study and current scholarship and criticism in British Victorian literature. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6747.01 (747) or 6747.02.			
6747.02	Introduction to Graduate Study in British Literature of the Victorian Period	G	3
Introduction to advanced study and current scholarship and criticism in British Victorian literature. Prereq: Grad standing or permission of instructor. Not open to students with credit for 6747.01 (747) or 6747.02. This course is graded S/U.			
6750.01	Introduction to Graduate Study in Literacy	G	3
Introduction to advanced study of the development of reading and writing, the study of literacy; attention to historical, theoretical, ideological, and technological issues and change. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6750.01 (750) or 6750.02.			
6750.02	Introduction to Graduate Study in Literacy	G	3
Introduction to advanced study of the development of reading and writing, the study of literacy; attention to historical, theoretical, ideological, and technological issues and change. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6750.01 (750) or 6750.02. This course is graded S/U.			
6751.01	Intro to Graduate Study in Folklore I: The Philology of the Vernacular	G	3
Introduction to the canonical folklore genres and the history of folklore as a discipline. Why and how do we examine the vernacular? Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6751.11, 770.01, or CompStd 6750.01 (770.01). Cross-listed in CompStd 6750.01.			
6751.02	Intro to Graduate Study in Folklore II: Fieldwork and the Ethnography of Communication	G	3
Intro to fieldwork & ethnology in humanities: interviewing, participant observation, ethics, ethnographic representation. Ethnography of communication as an approach to community-based expressive forms. Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 770.02, 770.03, 6751.22, CompStd 770.02, 770.03, or 6750.02. Cross-listed in CompStd 6750.02.			
6751.11	Intro to Graduate Study in Folklore I: The Philology of the Vernacular	G	3
Introduction to the canonical folklore genres and the history of folklore as a discipline. Why and how do we examine the vernacular? Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6751.01 (770.01) or CompStd 6750.01 (770.01). This course is graded S/U.			
6751.22	Intro to Graduate Study in Folklore II: Fieldwork and the Ethnography of Communication	G	3
Introduction to fieldwork and ethnology in the humanities: interviewing, participant observation, ethics, ethnographic representation. The ethnography of communication as an approach to community-based expressive forms. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 770.02, 770.03, 6751.02, CompStd 770.02, 770.03, or 6750.02. This course is graded S/U.			
6755.01	Introduction to Graduate Study in American Literature, Origins to 1840	G	3
Introduction to advanced study and current scholarship and criticism in early American literature. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6755.01 (755) or 6755.02.			

6755.02	Introduction to Graduate Study in American Literature, Origins to 1840	G	3
Introduction to advanced study and current scholarship and criticism in early American literature. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6755.01 (755) or 6755.02. This course is graded S/U.			
6756.01	Introduction to Graduate Study in American Literature, 1840-1914	G	3
Introduction to advanced study and current scholarship and criticism in American literature, 1840-1914. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6756.01 (756) or 6756.02.			
6756.02	Introduction to Graduate Study in American Literature, 1840-1914	G	3
Introduction to advanced study and current scholarship and criticism in American literature, 1840-1914. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6756.01 (756) or 6756.02. This course is graded S/U.			
6757.02	Introduction to Graduate Study in African-American Literature, 1900 to Present	G	3
A survey of creative texts and critical interpretations representing and reflecting black culture and literary expression in the United States from 1900 to the present. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6757.22, 757.02, or AfAmAST 6757.02 (757.02). Cross-listed in AfAmAST.			
6757.22	Introduction to Graduate Study in African-American Literature, 1900 to Present	G	3
A survey of creative texts and critical interpretations representing and reflecting black culture and literary expression in the United States from 1900 to the present. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6757.02 (757.02) or AfAmAST 6757.02 (757.02). This course is graded S/U.			
6758.01	Introduction to Graduate Study in U.S. Ethnic Literature and Culture	G	3
Introduction to graduate study of representative literature and culture of a U.S. ethnic group, such as American-Indian, Jewish-American, Latino/a. Prereq: Grad standing, or permission of instructor. Not open to students with 6 sem cr hrs for 6758.01 (758) or 6758.02. Repeatable to a maximum of 6 cr hrs.			
6758.02	Introduction to Graduate Study in U.S. Ethnic Literature and Culture	G	3
Introduction to graduate study of representative literature and culture of a U.S. ethnic group, such as American-Indian, Jewish-American, Latino/a. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs or 6 sem cr hrs for 6758.01 (758) or 6758.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.			
6760.01	Introduction to Graduate Study in Postcolonial Literature and Theory	G	3
Introduction to graduate-level study of representative examples of the literary, cultural, and theoretical texts that inform postcolonial studies. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 760, 6760.01, or 6760.02.			
6760.02	Introduction to Graduate Study in Postcolonial Literature and Theory	G	3
Introduction to graduate-level study of representative examples of the literary, cultural and theoretical texts that inform postcolonial studies. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 760, 6760.01, or 6760.02. This course is graded S/U.			
6761.01	Introduction to Graduate Study in Narrative and Narrative Theory	G	3
Study of narrative in its different manifestations, e.g., novel, autobiography, film, legal testimony, and of theories of its form and significance. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6761.02 or 761.			
6761.02	Introduction to Graduate Study in Narrative and Narrative Theory	G	3
Study of narrative in its different manifestations, e.g., novel, autobiography, film, legal testimony, and of theories of its form and significance. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6761.01 or 761. This course is graded S/U.			
6763.01	Graduate Workshop in Poetry	G	3
A graduate-level workshop in the writing of poetry. Prereq: MFA standing, or permission of instructor. Not open to students with 20 qtr hrs for 763 or equivalent. Repeatable to a maximum of 12 cr hrs.			
6763.02	Graduate Workshop in Poetry	G	3
A graduate-level workshop in the writing of poetry for MFA students in fiction or creative non-fiction with limited experience as poets. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr hrs for 763 or equivalent. Repeatable to a maximum of 12 cr hrs.			
6764	Graduate Workshop in Screenwriting	G	3
Students with expertise in fiction- or creative nonfiction-writing or poetry will learn the art and craft of screenwriting and complete their first full-length screenplays. Prereq: English MFA standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
6765.01	Graduate Workshop in Fiction	G	3
A graduate-level workshop in the writing of fiction. Prereq: MFA standing, or permission of instructor. Not open to students with 20 qtr hrs for 765 or equivalent. Repeatable to a maximum of 12 cr hrs.			

6765.02 Graduate Workshop in Fiction	G	3	6780.02 Current Theory and Practice in the Teaching of Writing	G	3
A graduate-level workshop in the writing of fiction for MFA students in poetry or creative non-fiction with limited experience as fiction writers. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr hrs for 765 or equivalent. Repeatable to a maximum of 12 cr hrs.			Modern theories of composition; topics include: invention, style, sentence combining, evaluation, and the composing process. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6780.01 (870) or 6780.02. This course is graded S/U.		
6766.01 Introduction to Graduate Study in 20th Century Literature, 1900-1945	G	3	6781 Introduction to the Teaching of First-Year English	G	3
Introduction to advanced study and current scholarship and criticism in literature written in English 1900-1945. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6766.02 or 766.			Introduction to the theory and practice of teaching first-year English. Required of new GTA's in English. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 781 or 881.01. This course is graded S/U.		
6766.02 Introduction to Graduate Study in 20th Century Literature, 1900-1945	G	3	6788.01 Studies in the Theory and Practice of Imaginative Writing	G	3
Introduction to advanced study and current scholarship and criticism in literature written in English 1900-1945. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 766 or equivalent. This course is graded S/U.			Instruction in imaginative writing as a method for studying scholarly issues in English, e.g., disability narratives, ethnicity and literature, gender and genre. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr or hrs for 788, or equiv. Repeatable to a maximum of 6 or hrs.		
6767.01 Introduction to Graduate Study in 20th Century Literature, 1945-Present	G	3	6788.02 Studies in the Theory and Practice of Imaginative Writing	G	3
Introduction to advanced study in 20th-century literature written in English since 1945. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6767.02 or 767.			Instruction in imaginative writing as a method for studying scholarly issues in English, e.g., disability narratives, ethnicity and literature, gender and genre. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr or hrs for 788, or equiv. Repeatable to a maximum of 6 or hrs. This course is graded S/U.		
6767.02 Introduction to Graduate Study in 20th Century Literature, 1945-Present	G	3	6789.01 Introduction to Graduate Study in Digital Media	G	3
Introduction to advanced study in 20th-century literature written in English since 1945. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6767.01 or 767. This course is graded S/U.			Explores how scholars in English studies use computer technologies and multiple media to make meaning, represent and analyze information, teach, and conduct research. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6789.01 (789) or 6789.02.		
6768.01 Graduate Workshop A in Creative Nonfiction	G	3	6789.02 Introduction to Graduate Study in Digital Media	G	3
A graduate-level workshop in the writing of creative nonfiction for MFA students specializing in creative nonfiction. Prereq: Enrollment in MFA program, or permission of instructor. Repeatable to a maximum of 12 cr hrs.			Explores how scholars in English studies use computer technologies and multiple media to make meaning, represent and analyze information, teach, and conduct research. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6789.01 (789) or 6789.02. This course is graded S/U.		
6768.02 Graduate Workshop B in Creative Nonfiction	G	3	6795.01 Introduction to Research Methods in Rhetoric and Composition	G	3
A graduate-level workshop in the writing of creative nonfiction for MFA students specializing in poetry and fiction. Prereq: Enrollment in MFA program, or permission of instructor. Repeatable to a maximum of 12 cr hrs.			Introduction to the research methods most widely used in rhetoric, composition, and literacy studies. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 795 or equiv.		
6769 Graduate Workshop in Creative Writing (Special Topics)	G	3	6795.02 Introduction to Research Methods in Rhetoric and Composition	G	3
A special topics course in the writing of fiction, poetry, and/or creative nonfiction. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr hrs for 769 or equivalent. Repeatable to a maximum of 6 cr hrs.			Introduction to the research methods most widely used in rhetoric, composition, and literacy studies. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 795 or equiv. This course is graded S/U.		
6776.02 From 1900 to the Contemporary Period	G	3	6998 Graduate Research in English	G	1 - 18
A two-course sequence (with English 6776.01) in literary criticism from Plato to contemporary theory. Major texts and issues from 1900 to the present. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 676. 776.02, 6776.02, or 6776.22.			Graduate research. Arranged. Prereq: Permission of Director of Grad Studies. Not open to students with 30 qtr or hrs for 696 or 18 sem or hrs for 6998. Repeatable to a maximum of 18 cr hrs or 18 completions. This course is graded S/U.		
6778.01 Introduction to Graduate Study in Film and Film Theory	G	3	7350.01 Theorizing Folklore I: Tradition and Transmission	G	3
An advanced survey of the methodologies, contexts, and development of film and film theory. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6778.01 (778) or 6778.02.			The transmission of cultural forms through time and space across social networks, with special attention to the dynamics of conservation, and innovation, reflexivity, and habit. Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7350.11, 870, or CompStd 7350.01 (792). Cross-listed in CompStd.		
6778.02 Introduction to Graduate Study in Film and Film Theory	G	3	7350.02 Theorizing Folklore II: The Ethnography of Performance	G	3
An advanced survey of the methodologies, contexts, and development of film and film theory. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6778.01 (778) or 6778.02. This course is graded S/U.			Performance as a heightened mode of communication characteristic of vernacular cultural process, studied in the context of ongoing social interaction. Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7350.22, 870, or CompStd 7350.02 (792). Cross-listed in CompStd.		
6779.01 Introduction to Graduate Study in Rhetoric: Classical to Early Renaissance	G	3	7350.03 Theorizing Folklore III: Differentiation, Identification, and the Folk	G	3
Provides foundational study in the history and theory of rhetoric from classical Greece to early modern Europe. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6779.01 (779.01) or 6779.11.			Cultural form as a social tool for both differentiation and integration. "Folklore" and other metacultural concepts in the history of modernity. Folklore GIS course. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 870 or CompStd 7350.03 (792). Cross-listed in CompStd.		
6779.02 Introduction to Graduate Study in Rhetoric: Renaissance to 20th Century	G	3	7350.11 Theorizing Folklore I: Tradition and Transmission	G	3
Provides foundational study in the history and theory of rhetoric from the Renaissance to the present. 6779.01 (779.01) recommended. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6779.02 (779.02) or 6779.22.			The transmission of cultural forms through time and space across social networks, with special attention to the dynamics of conservation, and innovation, reflexivity, and habit. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7350.01 (870) or CompStd 7350.01 (792). This course is graded S/U.		
6779.11 Introduction to Graduate Study in Rhetoric: Classical to Early Renaissance	G	3	7350.22 Theorizing Folklore II: The Ethnography of Performance	G	3
Provides foundational study in the history and theory of rhetoric from classical Greece to early modern Europe. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6779.01 (779.01) or 6779.11. This course is graded S/U.			Performance as a heightened mode of communication characteristic of vernacular cultural process, studied in the context of ongoing social interaction. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7350.02 (870) or CompStd 7350.02 (792). This course is graded S/U.		
6779.22 Introduction to Graduate Study in Rhetoric: Renaissance to 20th Century	G	3			
Provides foundational study in the history and theory of rhetoric from the Renaissance to the present. 6779.01 (779.01) recommended. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6779.02 (779.02) or 6779.22. This course is graded S/U.					
6780.01 Current Theory and Practice in the Teaching of Writing	G	3			
Modern theories of composition; topics include: invention, style, sentence combining, evaluation, and the composing process. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 6780.01 (870) or 6780.22.					

184 English

7350.33 Theorizing Folklore III: Differentiation, Identification, and the Folk G 3

Cultural form as a social tool for both differentiation and integration. "Folklore" and other metacultural concepts in the history of modernity. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7350.03 (870) or CompStd 7350.03 (792). This course is graded S/U.

7817.01 Seminar in Early Medieval English Literature G 3

Topics include: Beowulf and its background; Old English poetry exclusive of Beowulf. Prereq: 5710 (710), or equiv. Not open to students with 10 qtr cr hrs for 817 or 6 sem qtr cr hrs for 7817.01 or 7817.02. Repeatable to a maximum of 6 cr hrs.

7817.02 Seminar in Early Medieval English Literature G 3

Topics include: Beowulf and its background; Old English poetry exclusive of Beowulf. Prereq: 5710 (710) or equivalent. Not open to students with 6 sem hrs of 7817.01 or 7817.02, or 10 qtr hrs of 817. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7818.01 Seminar in Later Medieval Literature G 3

Topics include: Poetry of the alliterative revival; medieval English drama; fifteenth-century non-dramatic literature. Prereq: Grad standing, or permission of instructor. Not open to students with 12 sem hrs of 7818.01 or 7818.02, or 20 qtr hrs of 818. Repeatable to a maximum of 12 cr hrs.

7818.02 Seminar in Later Medieval Literature G 3

Topics include: Poetry of the alliterative revival; medieval English drama; fifteenth-century non-dramatic literature. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 818 or 12 sem cr hrs for 7818.01 or 7818.02. Repeatable to a maximum of 12 cr hrs or 4 completions. This course is graded S/U.

7820.01 Seminar in Shakespeare G 3

An intensive consideration of selected problems in the scholarly study of Shakespeare. Prereq: Grad standing, or permission of instructor. Not open to students with 6 sem hrs of 7820.01 or 7820.02, or 10 qtr hrs of 820. Repeatable to a maximum of 6 cr hrs.

7820.02 Seminar in Shakespeare G 3

An intensive consideration of selected problems in the scholarly study of Shakespeare. Prereq: Grad standing, or permission of instructor. Not open to students with 6 sem hrs of 7820.01 or 7820.02, or 10 qtr hrs of 820. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7827.01 Seminar in English Renaissance Literature G 3

Topics include: Renaissance and early seventeenth-century poetry; Spenser; Renaissance drama; Milton; Renaissance prose. Prereq: Grad standing, or permission of instructor. Not open to students with 12 sem hrs of 7827.01 or 7827.02, or 20 qtr hrs or 827. Repeatable to a maximum of 12 cr hrs.

7827.02 Seminar in English Renaissance Literature G 3

Topics include: Renaissance and early seventeenth-century poetry; Spenser; Renaissance drama; Milton; Renaissance prose. Prereq: Grad standing, or permission of instructor. Not open to students with 12 sem hrs of 7827.01 or 7827.02, or 20 qtr hrs of 827. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

7837.01 Studies in 18th Century Genre G 3

Introduction to advanced study and current scholarship and criticism of one of the following: eighteenth-century fiction, poetry, drama, or non-fiction. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 737, 7837.01 or 7837.02.

7837.02 Studies in 18th Century Genre G 3

Introduction to advanced study and current scholarship and criticism of one of the following: eighteenth-century fiction, poetry, drama, or non-fiction. Prereq: Grad standing or permission of instructor. Not open to students with credit for 737, 7837.01 or 7837.02. This course is graded S/U.

7838.01 Seminar in Critical Issues in the Restoration and 18th Century G 3

An intensive consideration of a selected critical problem or a selected intellectual focus in the scholarly study of Restoration and/or eighteenth-century literature and culture. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 838 or 12 sem cr hrs for 7838.01 or 7838.02. Repeatable to a maximum of 12 cr hrs.

7838.02 Seminar in Critical Issues in the Restoration and 18th Century G 3

An intensive consideration of a selected critical problem or a selected intellectual focus in the scholarly study of Restoration and/or eighteenth-century literature and culture. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 838 or 12 sem cr hrs for 7838.01 or 7838.02. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

7840.01 Seminar in English Romantic Literature G 3

Literary romanticism in relation to contemporary intellectual and political movements; topic varies from year to year. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 840 or 9 sem cr hrs for 7840.01 or 7840.02. Repeatable to a maximum of 9 cr hrs.

7840.02 Seminar in English Romantic Literature G 3

Literary romanticism in relation to contemporary intellectual and political movements; topic varies from year to year. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 840 or 9 sem cr hrs for 7840.01 or 7840.02. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.

7844.01 Seminar in Victorian Literature G 3

Topics include: Victorian poetry; nineteenth-century non-fictional prose; nineteenth-century novels. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 844 or 9 sem cr hrs for 7844.01 or 7844.02. Repeatable to a maximum of 9 cr hrs.

7844.02 Seminar in Victorian Literature G 3

Topics include: Victorian poetry; nineteenth-century non-fictional prose; nineteenth-century novels. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 844 or 9 sem cr hrs for 7844.01. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.

7850.01 Seminar in U.S. Literatures before 1900 G 3

Topics include: American authors (Poe, Melville); history of genres, forms, and media (poetry, U.S. serial fiction); intensive study of 'periods' (the early Republic, the 1890s). Prereq: Grad standing, or permission of instructor. Not open to students with credit for 850. Repeatable to a maximum of 12 cr hrs.

7850.02 Seminar in U.S. Literatures before 1900 G 3

Topics include: American authors (Poe, Melville); history of genres, forms, and media (poetry, U.S. serial fiction); intensive study of 'periods' (the early Republic, the 1890s). Prereq: Grad standing, or permission of instructor. Not open to students with credit for 850. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

7851.01 Seminar in Critical Approaches to Black Literatures G 3

A close reading of major literary critical discourses that have shaped and determined the course of black literary production in Africa, North America, and the Caribbean. Prereq: A course in AfAmASt literature, or permission of instructor. Not open to students with 6 sem hrs of 7851.01 or 7851.02, 10 qtr hrs of 851, or AfAmASt 7851 (851). Repeatable to a maximum of 6 cr hrs. Cross-listed in AfAmASt 7851.

7851.02 Seminar in Critical Approaches to Black Literatures G 3

A close reading of major literary critical discourses that have shaped and determined the course of black literary production in Africa, North America, and the Caribbean. Prereq: A course in AfAmASt literature, or permission of instructor. Not open to students with 6 sem hrs of 7851.01 or 7851.02, 10 qtr hrs of 851, or AfAmASt 7851 (851). Repeatable to a maximum of 6 cr hrs. This course is graded S/U. Cross-listed in AfAmASt 7851.

7858.01 Seminar in U.S. Ethnic Literatures and Culture G 3

Advanced work in U.S. ethnic literatures and cultures through study of a specific issue, theme, or problem of central concern to the field. Topic varies. Prereq: Grad standing, or permission of instructor. Not open to students with 6 sem hrs of 7858.01 or 7858.02, or 10 qtr hrs of 858. Repeatable to a maximum of 6 cr hrs.

7858.02 Seminar in U.S. Ethnic Literatures and Culture G 3

Advanced work in U.S. ethnic literatures and cultures through study of a specific issue, theme, or problem of central concern to the field. Topic varies. Prereq: Grad standing, or permission of instructor. Not open to students with 6 sem hrs of 7858.01 or 7858.02, or 10 qtr hrs of 858. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.

7860.01 Seminar in 20th Century British and/or American Literature G 3

Problems, forms, and themes in twentieth-century British and/or American literature; study of particular twentieth-century British and/or American writers. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 860, 860.01, 860.02, or 860.03 or 9 sem cr hrs for 7860.01 or 7860.02. Repeatable to a maximum of 9 cr hrs.

7860.02 Seminar in 20th Century British and/or American Literature G 3

Problems, forms, and themes in twentieth-century British and/or American literature; study of particular twentieth-century British and/or American writers. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 860 or 9 sem cr hrs 7860.01 or 7860.02. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.

7861.01 Studies in Narrative and Narrative Theory G 3

Seminar in narrative theory and practice; focus on an approach (e.g., feminist narratology), a problem (ethics), or subcategory of narrative (the graphic novel). Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 861 or 12 sem cr hrs for 7861.01 or 7861.02. Repeatable to a maximum of 12 cr hrs.

7861.02 Studies in Narrative and Narrative Theory G 3

Seminar in narrative theory and practice; focus on an approach (e.g., feminist narratology), a problem (ethics), or subcategory of narrative (the graphic novel). Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 861 or 12 sem cr hrs for 7861.01 or 7861.02. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.

7864.01 Postcolonial/Transnational Literatures G 3

Topics include postcolonial and transnational literature in English; theories of colonial, postcolonial, and transnational literature and culture. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 864 or 9 sem cr hrs for 7864.01 or 7864.02. Repeatable to a maximum of 9 cr hrs.

7864.02 Postcolonial/Transnational Literatures G 3

Topics include postcolonial and transnational literature in English; theories of colonial, postcolonial, and transnational literature and culture. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 864 or 9 sem cr hrs for 7864.01 or 7864.02. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.

7871.01 Seminar in the Forms of Literature	G	3
A graduate seminar in the forms of poetry, fiction, and/or creative nonfiction. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 781, or equiv. Repeatable to a maximum of 12 cr hrs.		
7871.02 Seminar in the Forms of Literature	G	3
A graduate seminar in the forms of poetry, fiction, and/or creative nonfiction. Prereq: Grad standing, or permission of instructor. Not open to students with 20 qtr cr hrs for 871 or equiv. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.		
7872.01 Seminar in English Linguistics	G	3
Advanced English linguistics study; topics vary. Prereq: Not open to students with 6 sem cr hrs for 7872.01 or 7872.02. Repeatable to a maximum of 6 cr hrs.		
7872.02 Seminar in English Linguistics	G	3
Advanced English linguistics study; topics vary. Prereq: Not open to students with 6 sem cr hrs for 7872.01 or 7872.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
7878.01 Seminar in Film & Media Studies	G	3
An intensive study of selected issues, themes, and forms in Film & Media Studies. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 878 or 6 sem cr hrs for 7878.01 or 7878.02. Repeatable to a maximum of 6 cr hrs.		
7878.02 Seminar in Film & Media Studies	G	3
An intensive study of selected issues, themes, and forms in Film & Media Studies. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 878 or 6 sem cr hrs for 7878.01 or 7878.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
7879.01 Seminar in Rhetoric	G	3
Rhetoric of a particular period; major figures in rhetoric, rhetorical analysis of literature. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 879 or 6 sem cr hrs for 7879.01 or 7879.02. Repeatable to a maximum of 6 cr hrs.		
7879.02 Seminar in Rhetoric	G	3
Rhetoric of a particular period; major figures in rhetoric, rhetorical analysis of literature. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 879 or 6 sem cr hrs for 7879.01 or 7879.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
7880.01 Seminar in Composition	G	3
Invention; the composing process and revision; evaluating and responding to writing; discourse analysis. Prereq: Grad standing or permission of instructor. Not open to students with 10 qtr cr hrs for 880 or 6 sem cr hrs for 7880.01 or 7880.02. Repeatable to a maximum of 6 cr hrs.		
7880.02 Seminar in Composition	G	3
Invention; the composing process and revision; evaluating and responding to writing; discourse analysis. Prereq: Grad standing or permission of instructor. Not open to students with 10 qtr cr hrs for 880 or 6 sem cr hrs for 7880.01 or 7880.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
7881.02 Teaching Basic Writing	G	3
Theory and practice in the teaching of basic writing. Prereq: 781 or equiv, or permission of instructor. Not open to students with credit for 881.02, 7881.02 or equiv. Repeatable to a maximum of 9 cr hrs.		
7881.04 Teaching Business and Professional Communication	G	3
Theoretical foundations of and teaching techniques for major units in business communication, designed to prepare graduate students to do research in and to teach business and professional writing. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 881.04, 7881.44 or equiv.		
7881.22 Teaching Basic Writing	G	3
Theory and practice in the teaching of basic writing. Prereq: 6781 or equiv., or permission of instructor. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.		
7881.44 Teaching Business and Professional Communication	G	3
Theoretical foundations of and teaching techniques for major units in business communication, designed to prepare graduate students to do research in and to teach business and professional writing. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 7881.44 (881.04) or equiv. This course is graded S/U.		
7883.01 Seminar in Literacy Studies	G	3
Study of a special topic in literacy studies; topics vary, but may include race, popular culture, gender, technology, or globalization. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 883 or 9 sem cr hrs for 7883.01 or 7883.02. Repeatable to a maximum of 9 cr hrs.		
7883.02 Seminar in Literacy Studies	G	3
Study of a special topic in literacy studies; topics vary, but may include race, popular culture, gender, technology, or globalization. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 883 or 9 sem cr hrs for 7883.01 or 7883.02. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.		

7888.01 Interdepartmental Studies in the Humanities	G	1 - 3
Two or more departments present colloquia on subjects of mutual interest; topics to be announced. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 792 or 9 sem cr hrs for 7888.01 or 7888.02 or equiv. Repeatable to a maximum of 9 cr hrs or 9 completions. Cross-listed in AfAmASt, Clas, English, French, German, NELC, Spanish and WGSST.		
7888.02 Interdepartmental Studies in the Humanities	G	1 - 3
Two or more departments present colloquia on subjects of mutual interest; topics to be announced. Prereq: Grad standing, or permission of instructor. Not open to students with 15 qtr cr hrs for 792 or 9 sem cr hrs for 7888.01 or 7888.02 or equiv. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U. Cross-listed in AfAmASt, Clas, English, French, German NELC, Spanish or WGSST.		
7889.01 Seminar on Digital Media Studies	G	3
Advanced theoretical and practical approaches to digital media in English studies. Examines such intellectual questions as authorship, narrative, argument, and the nature of texts. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 889 or 6 sem cr hrs for 7889.01 or 7889.02. Repeatable to a maximum of 6 cr hrs.		
7889.02 Seminar on Digital Media Studies	G	3
Advanced theoretical and practical approaches to digital media in English studies. Examines such intellectual questions as authorship, narrative, argument, and the nature of texts. Prereq: Grad standing, or permission of instructor. Not open to students with 6 credits of English 7889.01 or 7889.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
7891.01 Seminar in Disability Studies Theory	G	3
Intensive study of disability-studies theory, with focus on a specific topic such as 'Disability and Materiality' or 'Mind and Brain.' Prereq: Grad standing, or permission of instructor. Not open to students with 12-semester credits for 7891.01 or 7891.02. Repeatable to a maximum of 12 cr hrs.		
7891.02 Seminar in Disability Studies Theory	G	3
Intensive study of disability-studies theory, with focus on a specific topic such as 'Disability and Materiality' or 'Mind and Brain.' Prereq: Grad standing, or permission of instructor. Not open to students with 12-semester credits for 7891.01 or 7891.02. Repeatable to a maximum of 12 cr hrs. This course is graded S/U.		
7895.01 Seminar in Research Methods in Rhetoric and Composition	G	3
Advanced study in a specific quantitative or qualitative research method in rhetoric and composition. Prereq: 6795 (795), or permission of instructor. Not open to students with 10 qtr cr hrs for 895 or 6 sem cr hrs for 7895.01 or 7895.02. Repeatable to a maximum of 6 cr hrs.		
7895.02 Seminar in Research Methods in Rhetoric and Composition	G	3
Advanced study in a specific quantitative or qualitative research method in rhetoric and composition. Prereq: Grad standing, or permission of instructor. Not open to students with 10 qtr cr hrs for 895 or 6 sem cr hrs for 7895.01 or 7895.02. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.		
8193 Individual Studies	G	1 - 9
Doctoral students may register for individual study in areas not normally covered by courses. Prereq: Permission of grad committee. Not open to students with 30 qtr cr hrs for 993 or 18 sem cr hrs 8193. Repeatable to a maximum of 18 cr hrs or 18 completions. This course is graded S/U.		
8858.01 Seminar in Folklore	G	3
Advanced seminar on current or specialized topics in folklore studies. Prereq: Grad standing, or permission of instructor. Not open to students with 9 sem cr hrs of English 8858.01 (can include equiv qtr cr hrs for 870), English 8858.02, or CompStd 8858. Repeatable to a maximum of 9 cr hrs. Cross-listed in CompStd 8858.		
8858.02 Seminar in Folklore	G	3
Advanced seminar on current or specialized topics in folklore studies. Prereq: Grad standing, or permission of instructor. Not open to students with 9 sem cr hrs of 8858.01 (can include equiv qtr cr hrs for 870), 8858.02, or CompStd 8858. Repeatable to a maximum of 9 cr hrs. This course is graded S/U.		
8903 Teaching College English	G	1 - 3
Students work as apprentices to faculty members in the planning and execution of an undergraduate English course; 8903 (903) must be taken prior to the candidacy exam. Not open to ABD students. Prereq: 8903 (903). Not open to students with 15 qtr cr hrs for 903 or 9 sem cr hrs for 8903. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.		
8904 Writing for Publication	G	1 - 3
Assists students in English in learning to write publishable critical essays and in becoming familiar with publishing protocols. Prereq: Not open to students with credit for 904, except by permission of director of Graduate Studies. Repeatable with permission of director of Graduate Studies. This course is graded S/U.		
8982.01 Textual Criticism and Editing	G	1 - 3
Evaluation of literary editorial methods, past and present; training in skills requisite to the textual critic and scholarly editor; practice in textual editing. Prereq: 8980 (980) or equiv. Not open to students with credit for 982, 8982.01, or 8982.02.		

186 English

8982.02	Textual Criticism and Editing	G	1 - 3
Evaluation of literary editorial methods, past and present; training in skills requisite to the textual critic and scholarly editor; practice in textual editing. Prereq: 8980 (980) or equiv. Not open to students with credit for 982, 8982.01, or 8982.02. This course is graded S/U.			
8996	Research in English: Candidacy Examination	G	1 - 18
Research in preparation for PhD exams; arranged. Prereq: Permission of director of Grad studies. Not open to students with 30 qtr or hrs for 996 or 18 sem or hrs for 8996. Repeatable to a maximum of 18 cr hrs or 18 completions. This course is graded S/U.			
8997	The Dissertation Seminar	G	1 - 3
Doctoral candidates present their research-in-progress to faculty and each other. Prereq: Successful completion of candidacy exam. Not open to students with 15 qtr or hrs for 997 or 9 sem or hrs for 8997. Repeatable to a maximum of 9 cr hrs or 9 completions. This course is graded S/U.			
8998	Research in English	G	1 - 18
Research in English. Prereq: Not open to students with credit for 998. Repeatable. This course is graded S/U.			
8999	Research in English: Dissertation	G	1 - 18
Research for dissertation purposes only. Prereq: Not open to students with credit for 999. Repeatable. This course is graded S/U.			

Entomology

1100	Exploring Entomology	U	½
Basic understanding of the global trends within entomology, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development.			
1101	Insect Biology	U	4
Acquaints people with the incredible biological diversity represented by the largest group of living animals, the insects. Insects will be used to illustrate important biological principles and functions as well as the scientific process. Prereq: Not open to students with credit for 1111, 3000, 4000, or 4600. GE nat sci bio course. GE foundation natural sci course.			
1111	Biology of Insects, Animals & Fungi Affecting Buildings	U	4
Acquaint construction engineers with the incredible biological diversity found on Planet Earth using insects as examples and biological models. Management of building attacking and inhabiting insects, animals and fungi will be covered. Prereq: Not open to students with credit for 1101 (101), 3000 (500), 4000 (500), or 4600. GE nat sci bio course. GE foundation natural sci course.			
1260	Introductory Insect Field Biology	U	2
Biology of insects and their relatives, with emphasis on behavior, ecology, and diversity; collection is required. Offered as one week summer course at Stone Lab. Prereq: Course in high school biology. Not open to students with credit for Entomol 126.			
1350	The Biology of Hope and Belief	U	3
The underlying premise of this course is that the human mind and human behaviors have been shaped throughout our evolutionary history by the force of natural selection. This course critically evaluates evidence that the human capacity for hope and the human desire to believe in a supernatural deity evolved because they helped our ancestors survive. GE nat sci bio course. GE foundation natural sci course.			
1351	Experimentally Evaluating the Biology of Hope and Belief	U	1
This course provides an introduction to and foundation for the study of Natural Science by allowing us to explore the experimental evidence that supports whether the human capacity to hope and believe in a higher power is hardwired into our biology and could have been acted upon by Natural Selection as humans evolved. Prereq or concur: 1350. GE foundation natural sci course.			
2101	Insects and Human Affairs: Pests, Plagues, Poisons and Politics	U	3
Insects are a daily fact of life, exerting major influence on human affairs over the course of history. The course analyses the extensive and sometimes uncomfortable relationships between insects and humans, including historical roots of insect/human interactions, impact of insects on development of scientific thought, use of insects as experimental models in drug design and military applications. GE nat sci bio course. GE foundation natural sci course.			
2102	Insects and Human Affairs: Virtual Laboratory	U	1
Insects are a daily fact of life, exerting major influence on human affairs over the course of history. The course gives students experience in observing, recording and analyzing data associated with insect-human interactions. Prereq or concur: 2101. GE foundation natural sci course.			
2200	Beekeeping	U	3
This class presents general information on the biology, behavior and management of honey bee colonies, including pollination behavior and simple honey processing.			

2400H	Evaluating Evidence in Biology & Medicine	U	3
Explores information and scientific literacies in biology and medicine, with emphasis on science as reported in the media and the use of insects and other organisms as model systems. We use evolutionary theory as the unifying framework for all life on earth. The ability to scrutinize science as reported in popular sources and to procure additional, credible information is emphasized. Prereq: Honors standing. GE nat sci bio course.			
3100	Insect Symbioses	U	3
This course focuses on insect symbioses, the intimate associations among insect species and other organisms that are commonplace in nature. Prereq: Biology 1113, 1113H, 1114, or 1114 H.			
3300	Insects of Ohio	U	2
This lecture and field course focuses on the basic biology and diversity of insects and related arthropods of Ohio. We will study anatomy, physiology, behavior, and evolutionary processes associated with insects, and learn how these principles contribute to the diversity of insects in Ohio. Students will also learn how to identify insects during field based collection and ID sessions. Prereq: Not open to students with credit for 4001.			
3330	Social Insects	U	3
Three hour general education course. Exploration of biological factors that permit ants, bees, wasps, and termites to maintain large and complex societies. Includes lecture and recitation. Prereq: Entmglg 1101 (101) or Biology 1101 (101), or equiv. Not open to students with credit for Entmglg 4440H (Entomol 444H) or Entomol 333. GE nat sci bio course.			
3797.01E	Evolution in Darwin's World and Ours: Context	U	2
Practice historical thinking and research skills while exploring Darwin's life, intellectual development, and theory of species origin in broad historical context. Discussions will include modern evolutionary theory and its broad applications in biology, medicine, and other human endeavors. These themes will be explored during travels abroad in the post-requisite course Entmglg 3797.02E. Prereq: Fresh standing or above. Not open to students with credit for 3790H or 3797H. GE historical study course. GE foundation historical and cultural studies course.			
3797.02E	Evolution in Darwin's World and Ours: Abroad	U	1
Building on the context of the development of evolutionary theory explored during Entmglg 3797.01E, we will visit key museums and sights in London, Cambridge, and the village of Downe, England. Special visits with archivists, historians, scientists, and certified guides augment course readings and discussion. Prereq: 3797.01E. Not open to students with credit for 3790H or 3797H. GE historical study course. GE foundation historical and cultural studies course.			
4000	General Entomology Lecture	U	3
The course serves both as a single, concise exposure to the subject and as a foundation for advanced work in entomology (systematics, evolution, ecology, management). Lectures cover all fundamental aspects but emphasize basic biological phenomena, including diversity, evolution, classification, structure, function, development, reproduction, behavior, and ecology. Prereq: Biology 1113, 1113H, 1114, or 1114H. Not open to students with credit for 3000.			
4001	General Entomology Laboratory	U	1
Laboratories will introduce the major patterns of diversity among insects and will provide experience and develop abilities in the identification of insects. We will explore insect and other arthropod diversity and evolution by collecting, identifying and curating invertebrate specimens. A personally collected and identified insect collection is a major component of the laboratory grade. Prereq: Biology 1113, 1113H, 1114, or 1114H. Prereq or concur: Entmglg 4000. Not open to students with credit for 3000.			
4191	Internship Experiences in Entomology	U	1 - 2
Ten or more weeks of an individualized experiential learning opportunity designed to link theoretical classroom knowledge with practical field application or research experience in an ongoing research environment. Prereq: 3000 (500) or 4000 (500), and an additional Entmglg course at the 3000 (300) level or above, and Soph standing or above, and permission of advisor. Repeatable to a maximum of 4 cr hrs or 2 completions. This course is graded S/U.			
4193	Individual Studies	U	1 - 3
Individual work in the field of entomology, involving laboratory, field, or library studies, appropriate for the student's needs. Prereq: Permission of instructor. Repeatable to a maximum of 6 cr hrs or 6 completions. This course is graded S/U.			
4194	Group Studies	U	1 - 3
Special group study of a selected area in the field of entomology not provided in other courses. Repeatable to a maximum of 9 cr hrs or 9 completions.			
4440H	Honors Social Insects	U	3
Exploration of biological factors that allow ants, bees, wasps, and termites to maintain large complex societies. Prereq: Honors standing, and Entmglg 1101 (Entomol 101) or Biology 1101 (101), or equiv. Not open to students with credit for Entmglg 3330 (Entomol 333) or 444H.			
4600	Introduction to Insect Science	U	1
This digital course provides basic information on insects to students intending to take additional coursework in entomology. Prereq: Biology 1101 (101), 1113 (113), or 1115H (115H), or equiv. Not open to students with credit for 1101 (101), 1111, 3000 (500), 4000 (500), 460, or 462.			
4601	General Insect Pest Management	U	2
Exploration of insect pests that affect crops, landscapes, public health, and domestic animals, and the biological, cultural, and chemical tactics used to manage them. Prereq: 1101, 1111, 3000, 4000, or 4600.			

<p>4607 Veterinary Entomology U 2</p> <p>The goal of this on-line course is to introduce students to the fascinating world of arthropod pests that impact the health and well-being of domesticated animals. The course will place an emphasis on understanding the remarkable biology of blood-feeding arthropods and the diseases that they transmit to companion and livestock animals.</p> <p>4998 Undergraduate Research in Entomology U 1 - 3</p> <p>Undergraduate experience in entomological research in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.</p> <p>4999 Research with Distinction U 1 - 5</p> <p>Conducting and reporting research with distinction. Prereq: GPA 3.0 or above overall, GPA 3.0 or above in the major, and permission of project supervisor. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman University Undergraduate Research Forum. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.</p> <p>4999H Honors Research with Distinction U 1 - 5</p> <p>Conducting and reporting Honors research with distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the University's Denman Undergraduate Research Forum. Completion of online Honors Research Workshop required prior to enrollment. Prereq: Honors standing, and CPHR 3.40 or above, and GPA 3.40 or above in major, and permission of honors project supervisor. This course is graded S/U.</p> <p>5001 Entomological and Environmental Approaches to Fly Fishing U G 3</p> <p>Students will study the life histories and behaviors of the most common aquatic insects that serve as a primary food source for rainbow, brown and steelhead trout in Ohio streams. To enhance student success and enjoyment of fly fishing, the course content will include stream ecology, hydrology, and hydrodynamics, water quality, how to sample and identify macroinvertebrates, and fly-tying. This course is grades S/U.</p> <p>5060 Practical Experiences in Plant Health: Insects & Diseases of Plants U G 2</p> <p>Plants are attacked by a multitude of pathogens and insects. Each plant in a production region has documented pests that can negatively impact plant health. Environment and production practices can influence the outcome of interactions between pathogens and pests. This is a beginning course for students to learn how to recognize signs and symptoms of economically important pathogens and insects. Prereq: 5600 or PlntPth 5603, or permission of instructor. Not open to students with credit for PlntPth 5060. Cross-listed in PlntPth.</p> <p>5110 Ecology and Management of Pathogens and Insects Affecting Trees in Forest and Urban Environments U G 3</p> <p>Overview of major pathogens and insects affecting health of forest and shade trees with emphasis on diagnosis, ecology, and management. Video-linked to Wooster. Sp Sem. Prereq: Not open to students with credit for Entomol 461 or PlntPth 610. Cross-listed in PlntPth.</p> <p>5121 Insect Pathology U G 3</p> <p>The basic principles of pathology as applied to pathogens infecting insects and related arthropods. Course content will include how pathogens manifest diseases in individuals and populations, descriptions of major micro- and macro-organisms that routinely cause reduced fitness in arthropods, as well as how insects respond to pathogen challenge, both physiologically and behaviorally. Prereq: Biology 1113 or 1114, or Grad standing.</p> <p>5150 Pollinator Biology and Conservation U G 2</p> <p>This course explores the biology and conservation of animal (primarily insect) pollinators of plants. Special focus will be given to economically important insect pollinators (e.g., bees, moths, flies and beetles). Prereq: 4000 or 4600, or Grad standing, or permission of instructor.</p> <p>5350.01 Taxonomy and Behavior of Aquatic Invertebrates U G 3</p> <p>Taxonomy and behavior of the major groups of aquatic invertebrates, with an emphasis on North American freshwater macroinvertebrates. 1-2 required field trips. Prereq or concur: ENR 5280, or permission of instructor. Not open to students with credit for ENR 5350.01. Cross-listed in ENR.</p> <p>5490 Insect Behavior: Mechanisms and Function U G 3</p> <p>The behavior of insects mediates all aspects of their ecological interactions and evolution. This course describes the multitude of behaviors expressed by insects and explores how behavior determines survivorship and fitness. We will discuss selective forces and constraints driving evolution of behaviors and mechanisms that make possible complex expression within simple insect nervous systems. Prereq: Jr standing or above. Not open to students with credit for 5420. Cross-listed in EEOB.</p> <p>5500 Biological Control of Arthropod Pests U G 3</p> <p>Covers philosophy, science, and application of biological control. Biology, mass-production, formulation, and application of various parasites, predators, and pathogens of pests will be discussed. Prereq: Jr standing or above. Not open to students with credit for 650.</p> <p>5600 Principles and Applications of Integrated Pest Management U G 3</p> <p>Overview of the principles of integrated pest management (IPM) of arthropod pests using an ecological approach, including examining how various management tactics can be used in an integrated manner. Prereq: Jr standing or above. Not open to students with credit for 660.</p>	<p>5604 Capstone Course: Problem-Based Studies in Plant Health U G 2</p> <p>Students will be presented with a current plant health problem from the industry. They will gather diverse information from consultants, synthesize novel solutions, and develop implementation plans. Prereq: Jr, Sr, or Grad standing in Entmlgy, PlntPth, or Plant Hlth Mgmt. Not open to students with credit for PlntPth 5604. Cross-listed in PlntPth.</p> <p>5605 Vector Biology and Vector Borne Diseases U G 3</p> <p>An overview of the insect vectors that pose the greatest threats to human health. Learn about their basic ecology and behavior, the pathogens they transmit, the diseases caused by those pathogens, and the fascinating biology behind these vector-pathogen-host interactions. Learn also about current methods being implemented around the globe to control vector borne disease transmission. Prereq: Biology 1101, 1113, or 1113H, or equiv.; or Grad standing.</p> <p>5608 Turfgrass Insect and Mite Pests - Identification, Biology, and Management U G 2</p> <p>This course provides information on the insect groups that attack managed turfgrass (lawns, grounds, sport fields, and golf courses) in such a manner that participants will learn how to diagnose and identify common pests, and be able to select appropriate methods of managing these pests. Prereq: 1101 (101), 1111, 3000, 4000 (500), or 4600.</p> <p>5609 Landscape Ornamental Plant Insect and Mite Pests - Identification, Biology and Management U G 3</p> <p>This course covers insects and mites that attack landscape ornamental plants (trees, shrubs, perennials, annuals). Students learn to diagnose and identify common pests, and select appropriate management methods. Management strategies include monitoring techniques, pesticides, biocontrol, resistance, cultural/mechanical controls, in an Integrated Pest Management (IPM) approach. Prereq: 1101, 1111, 3000, 4000, or 4600.</p> <p>5610 Greenhouse Plant Health and Pest Management U G 3</p> <p>Overview of the principles of plant health and pest management applied to the production of plants and other commodities in controlled environments, including greenhouses, urban vertical agriculture, high tunnels, hydroponic systems, and interiorscapes. Prereq: Sr standing or above.</p> <p>5797 Emerging Arthropods, Pathogens, and Challenges in Vector Biology U G 3</p> <p>Provides students with immersive field and lab experiences that span the entire spectrum of vector biology. The course consists of a study abroad component in Xalapa, Mexico (INECOL) focused on the collection and identification of arthropod vectors (e.g., mosquitoes) in the field, and a local component in Wooster, OH (OARDC) focused on molecular approaches used in vector biology. A prior introductory course in entomology or public health/infectious diseases is highly encouraged. Familiarity with the Spanish language is highly recommended for OSU students, and English is needed for INECOL students. Prereq: Jr or Grad standing.</p> <p>5800 Pesticide Science U G 3</p> <p>Exploration of pesticide toxicology and practical use; modes of action in target organisms, regulations, application methods, environmental fate, resistance management, and use in integrated pest management programs. Prereq: Jr standing or above.</p> <p>6193 Individual Studies G 1 - 6</p> <p>Individual work in the field of entomology, involving laboratory, field, or library studies, appropriate for the student's needs. Prereq: Permission of instructor. Repeatable to a maximum of 6 or hrs or 6 completions. This course is graded S/U.</p> <p>6194 Group Studies G 1 - 3</p> <p>Special group study of a selected area in the field of entomology not provided in other courses. Repeatable to a maximum of 9 or hrs or 9 completions.</p> <p>6210 Evolution and Diversity of Insects G 4</p> <p>The scope of this course extends from the molecular to at least the community and ecosystem levels. Elucidation of the pattern of insect evolution builds upon molecular, anatomical, and behavioral data. Students will study and learn about the evolutionary and developmental origins of anatomical structures and understand how those structures interact and function. Prereq: 3000 or 4000 (500), or equivalent, or permission of instructor.</p> <p>6310 Insect Physiology and Molecular Biology G 3</p> <p>Explores physiological and molecular mechanisms that regulate insect development and function. Prereq: Credit for one Entmlgy course, and Grad standing; or permission of instructor. Not open to students with credit for 631.</p> <p>6320 Experimental Insect Physiology and Molecular Biology G 1</p> <p>This laboratory course uses both classical and cutting-edge experimental techniques to uncover aspects of insect biology. We will conduct a series of novel experiments on diapausing and non-diapausing model insects to show physiological and molecular mechanisms used to survive winter. The course goal is to create a student co-authored manuscript to submit to the Journal of Insect Physiology. Prereq or concur: 6310.</p> <p>6410 Insect Ecology and Evolutionary Processes G 3</p> <p>Overview of abiotic and biotic factors influencing the diversity, distribution, and abundance of insects with a focus on general ecological and evolutionary principles. Prereq: Grad standing, or permission of instructor.</p> <p>6501 Mentored Teaching in Entomology G 1 - 3</p> <p>Students will work with faculty members to gain intensive hands-on mentored experiences focused on direct interaction with students and on the scholarly aspects of effective teaching. Prereq: Grad standing. Repeatable to a maximum of 12 or hrs or 12 completions. This course is graded S/U.</p>
--	--

188 Entomology

6502	Mentored Extension Experience in Entomology	G	1 - 3
Students will work with faculty members to gain intensive hands-on mentored experiences focused on direct interaction with community stakeholders and on various aspects of extension work. Prereq: Grad standing. Repeatable to a maximum of 12 cr hrs or 12 completions. This course is graded S/U.			
6702	Entomological Techniques and Data Analysis	G	2
A hands-on course about techniques used with living insects, and design and analysis of simple experiments. Entomological techniques include rearing, colony establishment, behavior assays, growth analysis, and insecticide dose/response bioassays. Prereq: 3000 or 4000, or equiv.			
6703	Molecular Techniques and Data Analysis	G	2
Deals with basic molecular biology techniques required to conduct genomics, proteomics and metabolomic studies. Hands-on experience in bioinformatics, functional genomics and metabolite analysis will be emphasized.			
7300	Plant Health Management Seminar	G	1
This course is designed to cover current topics in plant health management for students in the Master in Plant Health Management program. Topics and guest speakers may differ from semester to semester and will depend on student interest. Repeatable to a maximum of 6 cr hrs. This course is graded S/U. Cross-listed in PlntPth.			
7890	Special Topics in Entomology	G	1 - 3
Seminar on publications, current research, or research techniques. Repeatable to a maximum of 6 cr hrs or 6 completions.			
7910	The Nature and Practice of Science	G	2
Analysis and application of logic underlying scientific reasoning, theory, hypothesis, and their integration with experimental design, discovery, ethics, and science as a human endeavor. Prereq: Not open to students with credit for Entomol 790.			
7920	Presentation Skills for Scientists	G	2
Professional development course for graduate students who are interested in developing and improving their presentation skills for communicating with peer scientists and the public, using a variety of media.			
7930	Scientific Writing & Grant Proposal Development	G	2
For graduate students who wish to develop and improve their written skills for communicating with technical and nontechnical audiences.			
7999	Research in Entomology, MS	G	1 - 16
Research for thesis purposes only. Research may take place in laboratory, greenhouse, and/or field resources at The Ohio State University in Columbus, Wooster and other associated research areas as determined by student and instructor. Research may include experimental studies, revisional studies, or studies that create original data or technology that contributes to the discipline. Prereq: Grad standing in Entomology. Repeatable. This course is graded S/U.			
8000	Entomology Seminar	G	1
Weekly departmental seminars given by experts in the field are used to give students insight into current trends in entomological research. Prereq: Grad standing in Entmlgy. Repeatable to a maximum of 10 cr hrs. This course is graded S/U.			
8800	Research and Training Seminar	G	1
Presentation of procedures, resources, and faculty research in the Department of Entomology. Required of all graduate majors during the first year of registration. Prereq: First year Grad standing in Entmlgy. Not open to students with credit for Entomol 880. This course is graded S/U.			
8998	Research in Entomology, PhD Pre-Candidacy	G	1 - 16
Research for dissertation purposes only. Research may take place in laboratory, greenhouse, and/or field resources at The Ohio State University in Columbus, Wooster and other associated research areas as determined by student and instructor. Research may include experimental studies, revisional studies, or other studies that create original data or technology that contributes to the discipline. Prereq: PhD Grad student standing in Entomology without completion of a candidacy exam. Repeatable. This course is graded S/U.			
8999	Research in Entomology, PhD Post-Candidacy	G	1 - 16
Research for dissertation purposes only. Research may take place in laboratory, greenhouse, and/or field resources at The Ohio State University in Columbus, Wooster and other associated research areas as determined by student and instructor. Research may include experimental studies, revisional studies, or other studies that create original data or technology that contributes to the discipline. Prereq: PhD Grad student standing in Entomology having completed the candidacy exam. Repeatable. This course is graded S/U.			

Environment and Natural Resources

1100	Environment and Natural Resources Survey	U	1
Survey course for ENR students. Covers academic requirements; university procedures, grading system, resources; student rights and responsibilities; overview of academic areas of study. Also covers career opportunities in Env't and Nat Res. Prereq: Not open to students with credit for 119 or FAES 100.			

1100H	Environment and Natural Resources Survey - Honors Section	U	1
--------------	--	----------	----------

Survey course for ENR Honors students. Covers academic requirements; university procedures, grading system, resources; student rights and responsibilities; overview of academic areas of study. Also covers career opportunities in Env't and Nat Res. Prereq: Honors standing. Not open to students with credit for 119 or FAES 100H.

1150	ENR Scholars Seminar	U	1
-------------	-----------------------------	----------	----------

Designed for first year Environment and Natural Resources Scholars students to explore personal interests, interdisciplinary opportunities, campus and local community resources, and issues and activities related to Environment and Natural Resources. Prereq: Must be an ENR Scholar. Repeatable to a maximum of 2 cr hrs.

1200	Exploring Sustainability: SUSTAINS LC Seminar	U	1
-------------	--	----------	----------

This seminar course is designed for SUSTAINS Learning Community students to explore their interests within sustainability, learn about opportunities to be involved in campus and local community sustainability efforts, and connect with campus partners and faculty working and researching in the field. Students must be a part of the SUSTAINS Learning Community in order to take this seminar. Prereq: Must be in the SUSTAINS Learning Community. Repeatable to a maximum of 2 cr hrs. This course is graded S/U. Cross-listed in AEDEcon.

1500	Career Development and Success	U	1
-------------	---------------------------------------	----------	----------

Professional development course for SENR majors. The purpose of the course is to help students explore career options and next steps, develop career-specific skills such as interviewing, networking, and resume development, and to connect students with professionals in the field. Prereq: Soph standing or above, and enrollment in ENR major.

2000	Natural Resources Data Analysis	U	3
-------------	--	----------	----------

Introductory data analysis course that focuses on understanding and applying basic statistical concepts, problem solving, and interpreting the results of statistical analysis. Au, Sp Sems. GE data anyl course. GE foundation math and quant reasoning or data anyl course.

2100	Introduction to Environmental Science	U	3
-------------	--	----------	----------

Introduction to environmental science, the ecological foundation of environmental systems, the ecological impacts of environmental degradation by humans, and strategies for sustainable management of environment and natural resources. This course is available for EM credit. GE nat sci bio course. GE foundation natural sci course.

2101	Introduction to Environmental Science Laboratory	U	1
-------------	---	----------	----------

Introduction to environmental science and Earth systems; biodiversity and ecology; natural resources and sustainability; water and atmospheric sciences; scientific writing, communication and literacy; exploration of observational studies, laboratory instrumentation, techniques, and methods. Prereq or concur: 2100. GE foundation natural sci course.

2155	Energy and Environment	U	3
-------------	-------------------------------	----------	----------

This course introduces and examines the fundamentals of energy sources, energy use, energy efficiency, and resulting environmental implications of the various energy supplies. Sp Sem. Prereq: Not open to students with credit for 155 or EarthSc 2155 (EarthSci 155). GE nat sci phys course. Cross-listed in EarthSc.

2191	Part-time Professional Practice in Environment and Natural Resources	U	1
-------------	---	----------	----------

Part-time practical professional experience in an environmental/natural resources field. Prereq or concur: 3191. Repeatable to a maximum of 4 cr hrs. This course is progress graded (S/U).

2300	Society and Natural Resources	U	3
-------------	--------------------------------------	----------	----------

Introduction to interactions between humans, natural resources, and ecosystems from a social science perspective. GE soc sci human, nat, and econ resources course. GE foundation social and behavioral sci course.

2360	Ecology and Conservation of Birds	U	2 - 3
-------------	--	----------	--------------

Introduction to the ecology and conservation of birds, with special emphasis on field ornithology and student research projects. Course integrates many concepts to build understanding of how research and management can support bird conservation. Prereq: Not open to students with credit for 230 or 231.

2367	Communicating Environmental and Natural Resources Information	U	3
-------------	--	----------	----------

Concepts, skills development, and practice in accessing and communicating information about the environment and natural resources to varied audiences; emphasis on written and oral communication. Prereq: English 1110, and Soph standing or above. GE writing and comm course: level 2.

2400	Citizenship Across the Rural-Urban Divide	U	3
-------------	--	----------	----------

Foundational concepts of citizenship in historical, current, and social science contexts; definitions, benefits, and responsibilities of citizenship. Citizenship and community participation in rural, urban, or suburban locations, differing perspectives, community institutions and civic engagement. Impacts of agricultural and environmental issues locally, nationally, and globally. GE theme citizenship for div and just wrld course.

2501	Introduction to Sustainability	U	4
-------------	---------------------------------------	----------	----------

Introduces students to principles from various disciplines related to social, economic and environmental sustainability. Students will evaluate key concepts and examine tradeoffs that are a part of sustainability action using case studies representing diverse perspectives. Team-taught course with faculty member in AEDE. Prereq: Not open to students with credit for 2500, AEDEcon 2500, or AEDEcon 2501. GE theme sustainability course. Cross-listed in AEDEcon.

Environment and Natural Resources 189

2501E	Introduction to Sustainability	U	4
<p>Introduces students to principles from various disciplines related to social, economic and environmental sustainability. Students will evaluate key concepts and examine tradeoffs that are a part of sustainability action using case studies representing diverse perspectives. Team-taught course with faculty member in AEDE. Prereq: Honors standing; and Soph standing, or permission of instructor. Not open to students with credit for AEDEcon 2501E, ENR/AEDEcon 2501, or ENR/AEDEcon 2500. GE theme sustainability course. Cross-listed in AEDEcon.</p>			
3000	Soil Science	U	3
<p>Introduction to soil physical, chemical, and biological properties related to land use, environmental quality, and crop production. This course is available for EM credit. GE nat sci phys course. GE foundation natural sci course.</p>			
3001	Soil Science Laboratory	U	1
<p>Observation and quantitative determination of soil properties. Prereq or concur: 3000. GE nat sci phys course. GE foundation natural sci course.</p>			
3005	Soil and Site Evaluation for Onsite Wastewater Treatment	U	3
<p>This is a hybrid course (online & field labs) in assessing sites and soils for designing environmentally responsible on-site wastewater treatment systems. It covers assessing soil conditions, description of soil horizons and properties, identification of limiting conditions, mapping methods to develop site plans, and understanding of soil hydrology relevant to onsite wastewater treatment.</p>			
3100	Introduction to Sustainable Agriculture	U	3
<p>This course is an introduction to the issues, concepts and practices associated with sustainable agriculture. Since agriculture is a complex social-ecological system which integrates a wide range of economic, environmental and social aspects, this course uses a multidisciplinary approach to enable students to assess the sustainability of agricultural systems.</p>			
3191	Conducting Your Internship in the School of Environment and Natural Resources	U	0
<p>SENR strives to provide opportunities for students to develop the critical competencies and technical knowledge and skills that employers demand in the job market and that are necessary for student success in their chosen field. This class provides students the structure to complete the initial requirements of their internship experience and begin reflecting on that experience. Prereq: Internship approval, and permission of instructor. Repeatable to a maximum of 4 completions. This course is graded S/U.</p>			
3200	Environmental and Natural Resources Policy	U	3
<p>This course covers topics such as the constitutional foundations of environmental policy, the role of congress and the executive branch in designing policy and bureaucratic agencies in implementing them, and the courts system as the final arbiter for environmental disputes. It also covers some of the foundational legislation in the U.S. to protect the environment and advance sustainability. Prereq: 2100 and 2300, or permission of instructor. Not open to students with credit for 4000. GE soc sci orgs and politics course. GE theme sustainability course.</p>			
3280	Water Quality Management	U	2
<p>Causes, consequences, and solutions of pollution in lakes, rivers, wetlands, and groundwater; analysis of the physical, chemical, and biological indicators of water quality.</p>			
3300	Introduction to Forestry, Fisheries, and Wildlife	U	3
<p>This course is an introduction to the basic elements of forestry, fisheries, and wildlife (FFW) ecology and management for majors in environment and natural resources. This course has also been organized to provide an introduction to non-majors who may not have the opportunity to take further courses in these fields. Prereq: 2100 or EEOB 3410. Not open to students with credit for 3300E.</p>			
3300E	Introduction to Forestry, Fisheries, and Wildlife	U	3
<p>This course is an introduction to the basic elements of forestry, fisheries, and wildlife (FFW) ecology and management for majors in environment and natural resources. This course has also been organized to provide an introduction to non-majors who may not have the opportunity to take further courses in these fields. Prereq: Honors standing, and 2100 or EEOB 3410. Not open to students with credit for 3300.</p>			
3321	Biology and Identification of Woody Forest Plants	U	3
<p>Field identification of trees, shrubs, and vines in temperate forest ecosystems; basic biological principles of morphology, reproduction, growth, genetics, and taxonomy of major woody species. Au Sem. Prereq: Not open to students with credit for 221.</p>			
3322	Forest Ecosystems	U	3
<p>Structure and function of temperate forest ecosystems; field-oriented study of the relationships among ecosystem components, and of the composition and successional dynamics of forest communities. One or more all-day field trips. Au Sem. Prereq or concur: 2100 (210), 2300 (203), and 3321 (221), or permission of instructor. Not open to students with credit for 322.</p>			
3323	Forest Biometrics	U	3
<p>A study of the quantitative decision tools necessary to measure the forest resource; confidence and probability measures of land area, timber, water, wildlife, and recreation. Sp Sem. Prereq: 2000 (222), Stat 1450 (145), HCS 2260 (260), or AnimSci 2260 (260). Not open to students with credit for 323.</p>			

3333	Silviculture	U	3
<p>Ecological principles and practical applications of methods for controlling forest ecosystem structure and function; prescription of silvicultural practices in the field. One or more all-day field trips. Sp Sem. Prereq or concur: 2100 (201), 2300 (203), and 3321 (221), or permission of instructor. Not open to students with credit for 333.</p>			
3335.01	Introduction to Wildland Fire Management	U	2
<p>Wildland fire behavior, fire safety, control of wildland fires, and the use of prescribed fire in management objectives. Meets S-100 and S-190 requirements for wildland firefighter certification.</p>			
3335.02	Wildland Fire Management Laboratory	U	1
<p>Teaches wildland firefighter skills and safety, and provides familiarity with tools and apparatus. Meets S-130 requirements for wildland firefighter certification. One weekend field work required. Prereq or concur: 3335.01.</p>			
3400	Psychology of Environmental Problems	U	3
<p>The theory and psychology behind individual and group behavior as it relates to environmental problems. Prereq: 2300 or Psych 1100. GE theme sustainability course.</p>			
3470	Religion and Environmental Values in America	U	3
<p>Examines development & influence of religious environmental values & their impact on environmental citizenship in America; Jewish, Muslim, Buddhist & Christian environmental perspectives; stewardship, eco-justice & creation spirituality. Sp Sem. Prereq: Not open to students with credit for 347. GE cultures and ideas course. GE foundation historical and cultural studies course.</p>			
3470E	Religion and Environmental Values in America	U	3
<p>Examines development & influence of religious environmental values & their impact on environmental citizenship in America; Jewish, Muslim, Buddhist & Christian environmental perspectives; stewardship, eco-justice & creation spirituality. Prereq: Honors standing. Not open to students with credit for 3470. GE cultures and ideas course. GE foundation historical and cultural studies course.</p>			
3500	Community, Environment and Development	U	3
<p>Social change related to natural resource and environmental issues. Includes a focus on community-level initiatives, environmental social movements, and issues of environmental justice. Prereq: 2300, Rur/Soc 1500, or Sociol 1101. GE theme lived environments course.</p>			
3530	Women, Environment and Development	U	3
<p>Interdisciplinary study of women's roles as environmental stewards and in resource-based development in global context. Attention given to gender differences in environmental and rural development practices. Cross-listed in WGSST.</p>			
3600	Recreation Management on Public Lands	U	3
<p>Examination of parks and recreation concepts including development, rationale, and frameworks for park and recreation systems in the United States. Prereq or concur: 2100 and 2300.</p>			
3612	Introduction to Environmental Education & Communications	U	3
<p>This course introduces best practices for environmental education and communications, including approaches for direct instruction in formal (e.g., K-12 schools) and informal settings (e.g., parks and museums), as well indirect communications with a general audience (e.g., blog posts, social media). We will also focus on strategies for addressing complex and/or controversial environmental topics. Prereq: Not open to students with credit for 3611.</p>			
3700	Introduction to Spatial Information for Environment and Natural Resources	U	3
<p>Introduction to methods of collecting and utilizing spatial information (GIS, RS and GPS) for Environmental and Natural Resources management.</p>			
3800	Principles and Tools of Ecosystem Restoration	U	2
<p>The new Anthropocene era brings with it mass extinctions, climate change, and ecosystem degradation. Restoration provides us with hope for the future. We will examine the philosophical and practical basis for restoration, reviewing how decisions are made and implemented. Prereq: 2100 or Biology 1114, or permission of instructor. Not open to students with credit for 5560.</p>			
3900	Sustainability Metrics	U	4
<p>Addresses the use of metrics, data, and indicators to measure sustainability and track progress. The course will survey a broad range of environmental challenges and evaluate the choices confronting public and private groups. Students will use software tools to quantify sustainability measures. Prereq: 2000 or AEDEcon 2005, or other GE Data Analysis course.</p>			
4191	Professional Practice in Environment and Natural Resources	U	2
<p>Full-time practical professional experience in an environmental/natural resources field. Prereq or concur: 3191. Not open to students with 4 cr hrs of 4191. Repeatable to a maximum of 4 cr hrs. This course is graded S/U.</p>			
4193	Individual Studies in Environment and Natural Resources	U	1 - 3
<p>Individual Studies in Environment and Natural Resources. Au, Sp Sems. May Term. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.</p>			

190 Environment and Natural Resources

4260 Soil Resource Management U 3

Degradation of the soil by erosion, compaction and salinity. Methods of preventing degradation and remediating existing problems. Special emphasis on conservation tillage, crop rotations, and irrigation management. Prereq: 3000 (300.01), or permission of instructor. Not open to students with credit for 442.

4285 Watershed Hydrology U 3

Covers hydrologic processes in watersheds, including precipitation, evapotranspiration, infiltration, runoff, and streamflow. We will evaluate how watershed characteristics, climate, and land use control these processes. In addition, we will discuss and practice current physical, chemical, and computational techniques for characterizing the hydrologic functioning of watersheds. Prereq: Chem 1210, and Math 1151 or 1156.

4320 Sustainable Forest Products U 3

Study of forest operations & environmental effects, including timber harvesting & transport from forest to the mill. Uses of wood, fiber products, & wood waste, including solid wood products, wood composites, biomass energy, & biofuel. Sp Sem. Prereq: 2100 (201) and 2300 (203), or permission of instructor. Not open to students with credit for 432.

4342 Freshwater Fisheries Management U 3

Ecological principles applied to conservation and management of aquatic vertebrates. Principles of fisheries management including social and economic factors. Prereq: 3300, or permission of instructor.

4345 Methods in Aquatic Ecology U 4

Introduction to experimental designs, field and laboratory techniques, and statistical methods commonly used to study aquatic ecosystems. Prereq: 2000, Stat 1450, or other GE Data Analysis course, or permission of instructor. Not open to students with credit for 5345.

4360 Zoo Science and Management U 2

Introduces students to zoo science and management through combination of formal course work and experience with zoo/aquarium professionals. Sp Sem. Prereq: 3300 (319), 3600 (340), or 3611 (311), or permission of instructor. Not open to students with credit for 415.

4400 Law and Legal Process U 3

Introduction to American law and legal process. Addresses law, science, and administrative process esp. in regard to planning and management of land, natural resources, and the environment; examines related cases, statutes, rules, permits. Prereq: Not open to students with credit for 694.

4450 Climate Change Policy U 3

Climate change adaptation and mitigation policy instruments and governance processes; theoretical frameworks for analysis of climate change governance.

4567 Assessing Sustainability: Project Experience U 3

Students gain experience in sustainability assessment by applying concepts and quantitative methods to evaluate environmental, economic, social, & technical sustainability of specific projects. EEDS major capstone. Co-taught by ENR/AEDE/FABE faculty. Prereq: 2500 or AEDEcon 2500, and Sr standing; or permission of instructor. Not open to students with credit for AEDEcon 4567. Cross-listed in AEDEcon.

4610 Natural History of Ohio U 3

Field course emphasizing inter-relationship among physical and biological factors in various ecological settings; field techniques and identification skills used for research paper. Sat field trip. Sp Sem. Prereq: Not open to students with credit for 510.

4611 Environmental Interpretation and Visitor Services U 3

Principles and practice in communicating with visitors in leisure and non-formal education settings. Sp Sem. Prereq: Not open to students with credit for 410.

4648 Environment and Natural Resources Law Enforcement U 3

An examination of the law enforcement function in environment and natural resources and recreation management. Prerequisite for acceptance to the Natural Resources Ranger Academy program. Sp Sem. Prereq: Not open to students with credit for 448.

4800 Practical Skills for Terrestrial Ecosystem Restoration U 2

This course develops practical skills in restoration ecology and gives the ability to implement restoration management plans. This includes invasive species control, planting native species, seed collection, soil seedbank assays, plant propagation, and ground preparation. Prereq: 3800.

4890H Honors Colloquium U 1

Instruction in the preparation of research proposals and discussion of current research in natural resources. Required of all ENR honors students. Prereq: Honors standing, and Jr standing in ENR. Not open to students with credit for 590H. This course is graded S/U.

4900.01 Environment and Natural Resources Management U 3

Integration of technical knowledge with social and institutional constraints as they relate to professions in ENR management. Prereq: Sr standing in ENR.

4900.02 Environment and Natural Resources Management for Forestry, Fisheries, and Wildlife U 3

Application and integration of technical knowledge and methodologies in the forestry, fisheries, and wildlife sciences to planning, problem-solving, and decision-making in environment and natural resources. Prereq: Sr standing in ENR.

4950 Wilderness Leadership Education U 3

Affiliate program with the North Carolina Outward Bound School (NCOBS). Field studies and practice of wilderness expedition skills, leadership, group dynamics, safety, judgment, and environmental studies. Approval of NCOBS application required. Specific content, location, semester(s) of offering and prerequisites vary. Students will pay OSU fees and any fees in excess of OSU tuition, incl. travel. Prereq: Permission of instructor.

4998 Undergraduate Research U 1-6

Conducting and reporting undergraduate research. Prereq: Permission of research project supervisor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4999 Research with Distinction U 1-6

Conducting and reporting undergraduate research. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman Undergraduate Research Forum. Prereq: 3.0 CPHR or above, and permission of project supervisor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

4999H Honors Research With Distinction U 1-6

Conducting and reporting honors research with distinction. Prereq: Honors standing, and CPHR 3.4 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.

5194 Group Studies U G 1-3

Group studies on the nature and management of environmental and natural resources encompassed in various developing and special topics. Au, Sp Sems. Prereq: Permission of instructor. Not open to students with maximum qtr cr hrs for 694. Repeatable to a maximum of 6 cr hrs or 2 completions.

5210 US Environmental Impact Assessment U G 3

Study of impact of human activity in natural resources through evaluation of environmental impact. Prereq: Jr, Sr, or Grad standing.

5211 International Environmental Impact Assessment U G 3

Fundamental concepts of international environmental impact assessment including the legal and institutional frameworks, practice and performance, and social and cultural contexts that shape EIA's implementation worldwide. Prereq: Jr, Sr, or Grad standing, or permission of instructor.

5250.01 Wetland Ecology and Restoration U G 3

Wetland hydrology, biogeochemistry, vegetation, biotic adaptations. Ecosystem services, classification, and management of wetlands. Fundamental concepts of ecological engineering applied to wetland creation and restoration and river restoration. Prereq: EEOB 503.01 or Grad standing. Not open to students with credit for 725 or 726.

5250.02 Wetland Field Laboratory U G 1

Laboratory on wetland hydrology, vegetation, water quality, soils, and aquatic biota. Prereq: Concur: 5250.01. Not open to students with credit for 725 or 726.

5260 Soil Landscapes: Morphology, Genesis and Classification U G 3

Course in soil genesis, classification and mapping. Au Sem. Prereq: 3000 (300.01) and 3001 (300.02); or Grad standing; or permission of instructor. Not open to students with credit for 650.

5261 Environmental Soil Physics U G 3

Principally involves the state and transport of water, heat and gas within soil, and the associated soil physical properties. Prereq: Not open to students with credit for Physics 5261. Cross-listed in Physics.

5262 Environmental Soil Chemistry and Remediation U G 3

Environmental soil chemistry relevant to soil and contaminant remediation. Excessive phosphorus fertilizer, degraded coal mineland soils; salt degradation; heavy metal contamination; urban soils. Socioeconomic considerations including cost and community/regulatory agency acceptance. Laboratory focuses on hands-on soil investigation/problem solving using soil geochemical computer models. Prereq: One semester of Chemistry, or Grad standing.

5263 Biology of Soil Ecosystems U G 3

A comprehensive study of microbial communities and their role in providing ecosystem services. Prereq: 3000, or Grad standing.

5268 Soils and Climate Change U G 3

This course is designed for students interested in learning basic soil and geologic processes as they impact climate change and are impacted by it. Topics covered include soil processes, abrupt climate change, trace gases and their properties, global C cycle, gaseous emissions, C-neutral fuels, carbon sequestration, Kyoto Treaty, and trading of C credits. Prereq: Not open to students with credit for EarthSc 5268. Cross-listed in EarthSc.

5270 Soil Fertility U G 3

Provides a broad overview of the principles of soil fertility, plant nutrition, & nutrient management in managed ecosystems. Covers foundational information on the cycling of individual nutrients in soil, including the biotic and abiotic factors that influence these dynamics. Exposure to many contemporary issues around nutrient management and basic practical skills for managing nutrients. Prereq: 3000, or Grad standing, or permission of instructor.

Environment and Natural Resources 191

5272	Turfgrass Soils	U G	2
Soil properties and processes of specifically designed and constructed soils meeting the agronomic and playability requirements of golf course and athletic field venues. Sp Sem. Prereq: 3000 (300.01); or Grad standing; or permission of instructor. Not open to students with credit for 540.			
5273	Environmental Fate and Impact of Contaminants in Soil and Water	U G	3
An overview of contaminant sources, transport through soil and water, and environmental fate and impact to human and ecosystem receptors. Sp Sem. Prereq: Grad standing or two semesters of chemistry. Not open to students with credit for 675.			
5279	Urban Soils and Ecosystem Services: Assessment and Restoration	U G	3
A comprehensive study focused on assessment and restoration of urban soil to provide essential ecosystem services. Urban soil laboratory provides hands-on experience with soil assessment and restoration.			
5280	Stream Ecology	U G	4
Structure, function, and biota of streams and rivers. Emphasis on ecosystem processes and community dynamics over space and time. Conservation, restoration, water policy, and environment-justice issues are also addressed. Prereq: 3300, or Grad standing, or permission of instructor.			
5310	Ecological Engineering and Science	U G	4
Definition, classification, and practice of Ecological Engineering. Course explores ecological ecosystems, ecosystem restoration, and the utilization of natural processes to provide societal services and benefits to nature. Prereq: One course in Biology, Ecology, Engineering, or Geology, and Jr standing or above. Not open to students with credit for EnvEng 5310 or FABEng 5310. Cross-listed in EnvEng and FABEng.			
5320	Forest Management	U G	3
Application of biological, economic, and planning principles to address the sustainable management of forest resources with emphasis of the timber resource and associated products. Sp Sem. Prereq: 3323 (323) and 3333 (333), or Grad standing, or permission of instructor. Not open to students with credit for 635.			
5325	Forest and Public Lands Policy	U G	3
Explores important, relevant and leading-edge concepts in U.S. forest and public lands policy. Emphasizes political, legal, and administrative issues of federal and state lands, including forests, parks, rangelands, and wildlife refuges. Moderate proficiency with GIS expected. Prereq: 3200, or Grad standing.			
5335	Ecology of Infectious Disease	U G	3
This course provides an introduction to the ecology of infectious diseases. We will investigate infectious disease transmission and control in single- and multi-host systems and for vector-borne diseases. Prereq: One undergraduate-level Biology course; or permission of instructor. Not open to students with credit for PubHEHS 5335 or VetPrev 5335. Cross-listed in PubHEHS and VetPrev.			
5340	Forest Ecosystem Management	U G	3
Concepts and methods applied to managing forests across broad landscapes for biodiversity, multiple uses, and ecosystem integrity within the context of traditional forest management. Au Sem. 2 1.5-hr cl. Prereq: Sr or grad standing, and permission of instructor. Not open to students with credit for 734.			
5348	Aquatic Population Ecology & Management	U G	3
Applies concepts and principles from the fields of population ecology, demography and population genetics to current conservation and management problems facing populations of aquatic organisms. Prereq: 3300 or EEOB 3410, or Grad standing, or permission of instructor.			
5350.01	Taxonomy and Behavior of Aquatic Invertebrates	U G	3
Taxonomy and behavior of the major groups of aquatic invertebrates, with an emphasis on North American freshwater macroinvertebrates. 1-2 required field trips. Prereq or concur: 5280, or permission of instructor. Not open to students with credit for Entmlyg 5350.01. Cross-listed in Entmlyg.			
5350.02	Taxonomy and Behavior of Fishes	U G	3
Taxonomy and behavior of the major groups of fishes, with an emphasis on North American freshwater fishes.			
5355	Aquaculture	U G	3
Overview of physical, biological, and economical factors influencing fish culture systems. World fish production practice comparisons. Emphasis on propagation and conservation efforts. 3 cl, 1 4-hr lab, 2 hatchery trips. Prereq: 2000, and 3300 or BIOCHEM 4511, and CHEM 1210, or grad standing. Not open to students with credit for 628.			
5358	Applied Vertebrate Physiological Ecology	U G	3
An examination of the physiological responses of vertebrate animals to human-induced environmental change, and the consequences of these responses for individuals and populations. This will be accomplished by an exploration of the current primary literature. SP semester only. Prereq: EEOB 3410 or permission of instructor.			
5360	Principles of Wildlife Ecology and Management	U G	3
Principles of population and community ecology applied to conservation and mgmt of terrestrial vertebrates. Principles of wildlife management including social and economic factors. Au Sem. Prereq: Not open to students with credit for 623.			

5362	Wildlife Ecology Methods	U G	3
Methods used by wildlife ecologists to measure population characteristics and habitat quality for wild terrestrial vertebrates. 1-2 Sat and 1 full weekend field trips required. Au Sem. Prereq: 2000, 3300, Stat 1450, or Grad standing. Not open to students with credit for 662.			
5364.01	Mammalian Wildlife Biology and Management	U G	3
Identification, ecology, and population management of North American mammals. 1-2 Sat field trips required. Au Sem. Prereq: 3300 (319) or equiv, or Grad standing, or permission of instructor. Not open to students with credit for 624.			
5364.02	Avian Wildlife Biology and Management	U G	3
Identification, ecology, and population management of North American birds. 1-2 Sat field trips required. Sp Sem. Prereq: 3300 (319) or equiv, or Grad standing, or permission of instructor. Not open to students with credit for 624.			
5370	Management of Wildlife Habitat	U G	3
Introduction to the principles of wildlife-habitat relationships, natural history of major North American ecosystems with an Ohio focus, and the conservation and management of wildlife habitats within those ecosystems. Prereq: 3300, or Grad standing.			
5374	Landscape Ecology for Natural Resource Management	U G	3
In this course, students will gain a practical working understanding of landscape ecology, with the goals of understanding how landscape processes operate at different scales, knowing how to assess spatial patterns and processes, and understanding how landscape ecology principles and theory apply to natural resource assessment and management. Prereq: Grad standing, or permission of instructor.			
5400	Interventions to Promote Pro-environmental Behavior	U G	3
This course focuses on using psychology to change human behavior in service of sustainability. We will explore a variety of approaches for promoting pro-environmental behavior. You will learn how to design and evaluate behavioral intervention programs. Prereq: 3400 or Psych 1100, or permission of instructor.			
5451	Water Policy and Governance	U G	3
This class examines institutions to manage water effectively at a variety of levels -state, federal, and international- and analyzes how they affect water access and use in different areas (agriculture, energy, etc.). Students in the class will also engage in a careful examination of the sources of conflict and cooperation among water stakeholders on a regional and global scale. Prereq: 3200 or 4000, or Grad standing.			
5480	Local Peoples and International Conservation	U G	3
Uses interdisciplinary thinking to explore the global environmental crises and the conflicts between indigenous/local peoples, conservationists, and policy makers regarding natural resource use. The course examines biodiversity conservation, protected areas, community-based conservation, global inequities, environmental history and politics, and sustainable development.			
5510	Interdisciplinary Team Science	U G	3
This course aims to teach students the necessary skills to lead or participate in scientific or interdisciplinary teams. Prereq: Sr standing, and permission of instructor; or Grad standing. Not open to students with credit for Anthro 5510, EEOB 5510, or VetPrev 5510. Cross-listed in Anthro, EEOB, and VetPrev.			
5560	The Dynamics of Ecosystem Restoration	U G	3
Ecosystems undergoing restoration are dynamic and witness major changes in their species diversity, composition, and ecosystem function. This course develops an understanding of how biotic and abiotic conditions interact with management to influence ecosystems' development. EEOB 3410 is recommended for success in this course. Prereq: 3800 and 4800; or Grad standing; or permission of instructor.			
5600	Sustainable Agriculture and Food Systems	U G	3
Integrative look at the social, economic, and production/environmental dimensions of sustainable agriculture and food systems. Particular attention to sociological, soil science and related disciplinary perspectives. Prereq: 3000 (300.01) and 3500, or grad standing.			
5640	Natural Resources Program Planning	U G	3
Inventory and evaluation of natural resources for program planning with consideration of goals, objectives and actions, budgeting, and planning documents. Prereq: 3600. Prereq or concur: 3200 and 3700; or Grad standing.			
5642	Environment and Natural Resources Administration	U G	3
Organization and administration of environment and natural resource agencies and non-governmental organizations. Sp Sem. Prereq: 4000 (400), or grad standing, or permission of instructor. Not open to students with credit for 642.			
5649	Wildlife Conservation Policy	U G	3
Overview of fish and wildlife policy in the US and key issues affecting wildlife conservation in North America. Sp Sem. Prereq: 4000 (400), or Grad standing. Not open to students with credit for 649.			
5690	Workshop in Environmental Education	U G	2
Problems of instruction in environmental education with consideration of both traditional approaches and current developments in content and methodology. Taught at F.T. Stone Lab. Su Sem. Prereq: Jr standing or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs.			

192 Environment and Natural Resources

5790.06 Iceland Education Abroad Seminar U G 1

Pre-departure preparation for Iceland Study Abroad. Provides a general introduction to the country so that learning opportunities in-country will be maximized. Prereq: Accepted and committed to participate in the SENR Study Abroad Program in Iceland.

5790.07 Dominican Republic Study Abroad Seminar U G 1

Pre-departure preparation for Dominican Republic Study Abroad. Prereq: Accepted and committed to participate in the SENR Study Abroad Program in Dominican Republic.

5790.08 China Research Abroad Seminar U G 1

Pre-departure seminar for students participating in the China Research Abroad trip. Students will develop a research project during this course with the guidance from the instructor, creating the protocols necessary to execute the project in China. Prereq: Students must be participating in the China Research Study Abroad program. This course is graded S/U.

5797.01 Study at a Foreign Institution: Australia U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Au, Sp, Su Sems. Prereq: Permission of dept chairperson. Not open to students with 30 or hrs or 2 completions of 5797 (697). Repeatable to a maximum of 30 cr hrs or 2 completions. This course is progress graded.

5797.02 Study at a Foreign Institution: Australia U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of resident director. Not open to students with 2 completions or 30 cr hrs of 5797 (697). This course is progress graded.

5797.03 Study at a Foreign Institution: New Zealand U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of resident director. Not open to students with 30 or hrs or 2 completions of 5797 (697). This course is progress graded.

5797.04 Study at a Foreign Institution: New Zealand U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of resident director. Not open to students with 30 or hrs or 2 completions of 5797 (697). This course is progress graded.

5797.05 Study at a Foreign Institution: Fiji U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of resident director. Not open to students with 2 completions of 5797 (697). This course is progress graded.

5797.06 Study at a Foreign Institution: Iceland U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of dept chairperson.

5797.07 Study at a Foreign Institution: Dominican Republic U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of the resident director. Not open to students with 2 completions of 5797 (697). This course is progress graded.

5797.08 Study at a Foreign Institution: China Research U G 3

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of resident director. Not open to students with 2 completions of 5797 (697). This course is progress graded.

5797.09 Study at a Foreign Institution U G 1 - 15

An opportunity for students to study at a foreign institution and receive Ohio State credit for that work. Students pay OSU and other fees. Prereq: Permission of department chairperson. Not open to students with 2 completions or 30 cr hrs of 5797 (697). Repeatable to a maximum of 30 cr hrs or 2 completions. This course is progress graded.

5797.10 Study at a Foreign Institution: Antarctica U G 3

Two weeks of field studies in Antarctica and Ushuaia, Argentina. This course is a collaborative effort between Ohio State, American Universities International Programs, University of Canterbury, New Zealand, and Gateway Antarctica: Centre for Antarctic Studies and Research. Prereq: Acceptance into the Antarctica Study Abroad program. Concur: 5790.10. Not open to students with credit for EarthSc 5797.10. Cross-listed in EarthSc.

5797.11 Study at a Foreign Institution: Tanzania U G 3

Three weeks of field studies in Tanzania. Prereq: 5790.11.

6000 Research in Environment and Natural Resources G 2

The use of science and research to address natural resource problems; development of a thesis proposal. Au Sem. Prereq: Grad standing. Not open to students with credit for 800. This course is graded S/U.

6100 Advanced Principles in Environmental Science G 3

This course will cover principal concepts of environmental science including global environmental challenges. A major focus of the course will be to understand different global nutrient cycles and their linkages to pressing environmental issues. A special emphasis will be placed on the ecological and social science frameworks required to manage critical air, soil, and water resources.

6193 Individual Studies in Environment and Natural Resources G 1 - 3

Individual Studies in Environment and Natural Resources. Au, Sp, Su Sems. May Term. Prereq: Permission of instructor. Not open to students with 9 or hrs for 6193 (693). Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.

6194 Advanced Group Studies G 1 - 3

Group studies on the science and discipline of environmental and natural resources encompassed in various developing and special topics. Au, Sp Sems. Prereq: Permission of instructor. Not open to students with 6 cr hrs or 2 completions for 894. Repeatable to a maximum of 6 cr hrs or 2 completions.

6400 Theories in Environmental Social Sciences G 3

This course provides a broad, interdisciplinary overview of theories and frameworks for understanding and addressing environmental and natural resource management dilemmas. The primary goals of this course are to introduce graduate students to (1) theories that explain why/how human beings impact their environment, and (2) interdisciplinary frameworks for addressing environmental problems.

6510 Research Design for the Environmental Social Sciences G 3

Introduction to designing research for building and testing theory in environmental social science disciplines. Bridges qualitative and quantitative research approaches. Prereq: 6000, or permission of instructor. Not open to students with credit for 8510.

7004 Social-Ecological Systems G 3

This course provides an overview of frameworks, theories and methods used in the interdisciplinary study of social-ecological systems, including complex adaptive systems, resilience, institutional analysis, cultural evolution, ecosystem services, and coupled human and natural systems. Students will also learn how to effectively collaborate in interdisciplinary studies of social-ecological systems. Prereq: Grad standing. Not open to students with credit for Anthro 7004. Cross-listed in Anthro.

7150 Environment, Risk, and Decision Making G 3

Theory of individual and participatory decision making processes under risk and uncertainty and applications to improve decision making in environmental risk management contexts. Prereq: Not open to students with credit for 8150.

7191 MENR Internship G 3

Internship experience for Master of Environment and Natural Resources (MENR) program. Prereq: Enrollment in the Master of Environment and Natural Resources program.

7333 Successional Dynamics of Forests G 3

Analysis of past development of forest stands; examination of major processes causing changes over time in communities of trees. One or more all-day field trips. * Sp Sem (odd yrs). Prereq: Grad standing, and permission of instructor. Not open to students with credit for 733.

7380 Climate and Society G 3

Examines links between climatic changes and human societies and examines social influences on our current state of knowledge, impacts, and potential responses. Au Sem. Prereq: Grad standing, or permission of instructor. Not open to students with credit for 738.

7400 Communicating Environmental Risk G 3

Introduction to the design and implementation of public-focused risk communication as it relates to environmental, agricultural and public health contexts. Sp Sem. Prereq: Grad standing, or permission of instructor.

7425 Collective Action in Environmental Governance G 3

Introduction to the theories and methods for evaluating collective action in environmental governance contexts. Prereq: Grad standing.

7430 Sustainability Psychology G 3

This course helps students expand their understanding of the psychological bases of environmental problems. It focuses on leveraging psychological tools to address such problems. Students learn about theories and methods relevant to behavior change, explore the applicability of these approaches to changing environmental behaviors, and gain practical experience doing this with real-world problems. Prereq: 3400, 5400, or Psych 1100, or permission of instructor.

7450 Frameworks and Theories of Environmental Policy G 3

This course provides students with an in-depth look at the theories and frameworks that explain how governance systems in complex social-ecological systems (and the institutions that shape them) can successfully tackle environmental problems at the local, national, and international levels.

7480 Human Values and Nature Conservation G 3

This course makes a cross-disciplinary examination of theories of human values and related phenomena (e.g., value orientations, worldviews, moral foundations), explores their use in explaining conservation-related judgments, decisions, and behaviors, and discusses their implications for sustainability.

7520 Environmental Science and Law G 3

This course introduces students to the laws and legal systems that address environmental issues, with an emphasis on the significance of science and technology. Interdisciplinary case-studies will complement the coursework. Prereq: 4000, or Grad standing, or permission of instructor.

7530 Soils and Carbon: Stabilization and Permanence G 3

Soil carbon, globally, is larger than both atmospheric and terrestrial biomass carbon stocks, but how permanent is soil carbon and in what forms? Minerals play an important role in carbon stability and permanence. Students gain experience on methods to investigate soil carbon stabilization, mineralogy and soil carbon permanence, and mechanistic understanding of organo-mineral interactions.

Environment and Natural Resources 193

7580	Root and Rhizosphere Ecology	G	2
The rhizosphere mediates plant nutrient acquisition, sustains microbial communities, contributes to disease suppression, and regulates global nutrient cycles, directly impacting crop production and ecosystem services. This course will provide an overview of root morphology, root production and turnover, rhizosphere communities, nutrient cycling and rhizosphere responses to climate change.			
7650	Applied Bayesian Hierarchical Models in Natural Resources	G	3
This is an applied graduate-level course that will provide students with the skills to implement, diagnose, and interpret hierarchical models fit in a Bayesian framework.			
7888	MENR Project	G	1 - 3
Conducting and reporting MENR applied science project. Prereq: Grad standing, and permission of advisor. Not open to students with 9 cr hrs for 7888 (893). Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
7981	MENR Seminar	G	1
Environmental professional practice-oriented seminars and forums. Prereq: Enrollment in the Master of Environment and Natural Resources (MENR) program. This course is graded S/U. Repeatable to a maximum of 4 cr hrs.			
8375	Design of Natural Resource Studies	G	3
This is a discussion-driven course that will emphasize student understanding of different types of study design, critical considerations when designing studies, and appropriate analytical approaches and inferential frameworks. The course is practical in that students can use this course as an opportunity to develop or flesh out the design of a study relevant to their graduate research.			
8600	Introduction to R for Environmental Sciences	G	2
Hands-on course intended to give students a broad overview and introduction to R, a language and environment for statistical computing and graphics.			
8780	Quantitative Methods for Environment and Natural Resources	G	3
Multivariate statistical methods used by natural resource scientists to study environmental relationships of plants and animals. Analytical methods are explained with real Forestry, Fisheries, and Wildlife data sets. * Sp Sem (even years). Prereq: Stat 5302 (530) or equiv, and Grad standing; or permission of instructor. Not open to students with credit for 822.			
8785	Research Paradigms	G	3
An examination of research paradigms and techniques used in the disciplines involved in natural resource science and management. * Sp Sem (odd years). Prereq: Doct standing, or permission of instructor. Not open to students with credit for 985.			
8890.01	Fisheries and Wildlife Science Seminar	G	1 - 12
Seminar on special topics in fisheries and wildlife science in environment and natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.02	Ecological Restoration Seminar	G	1 - 12
Seminar on special topics in ecological restoration in environment and natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.03	Ecosystem Science Seminar	G	1 - 12
Seminar on special topics in ecosystem science in environment and natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.04	Soil Science Seminar	G	1 - 12
Seminar on special topics in soil science in environment and natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.05	Forest Science Seminar	G	1 - 12
Seminar on special topics in forest science in environment natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.06	Environmental Social Sciences Seminar	G	1 - 12
Seminar on special topics in environmental social sciences in environment and natural resources. Prereq: Grad standing or permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8890.07	Rural Sociology Seminar	G	1 - 12
Seminar on special topics in rural sociology in environment and natural resources. Prereq: Grad standing and permission of instructor. Repeatable to a maximum of 96 cr hrs or 8 completions.			
8897	Research Proposal Symposium	G	1
A symposium for graduate students to present thesis and dissertation proposals. Arr. Sp Sem. Prereq: Grad standing. Not open to students with 2 cr hrs or 2 completions for 897. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
8980	Environment and Natural Resources Seminar	G	1
Required seminar for all MS and PhD graduate students in environment and natural resources. Au, Sp Sems. Prereq: Grad standing. Repeatable to a maximum of 20 cr hrs. This course is graded S/U.			

8998	Research	G	1 - 18
Research for thesis or dissertation purposes only. Prereq: Grad standing. Repeatable. This course is graded S/U.			

Environmental Engineering

2100	Environmental Engineering Analytical Methods	U	3
Application of analytical methods to calculate, measure and interpret chemical characteristics of water, soil, and air. Prereq: Chem 1220 (122) or 1250 (125), and enrollment in CivilEn major or EnvEng major or minor. Not open to students with credit for 610.			
2193	Individual Studies in Environmental Engineering	U	1 - 5
Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
2194	Group Studies in Environmental Engineering	U	1 - 5
Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
3200	Fundamentals of Environmental Engineering	U	3
Quantitative assessment of water quality, air quality, and solid/hazardous waste management, with an emphasis on minimizing human health and environmental impacts through sustainable design. Prereq: Chem 1210 or 1250, and CivilEn or EnvEng major or EnvEng minor. Not open to students with credit for 6200.			
3210	Environmental Engineering Unit Operations	U	3
Selection and Design of Unit Operations and Processes used in Environmental Engineering. Prereq: 413 or CivilEn 3130 (413), and Chem 1220 (122) or 1250 (125), or permission of instructor. Not open to students with credit for 520 or CivilEn 520.			
4090	Environmental Engineering Capstone Design	U	3
Culminating design course for the Environmental Engineering program. Must be taken as close to graduation as possible. Prereq: 3200, 3210, CivilEn 3160, and 2060, or permission of instructor.			
4193	Individual Studies in Environmental Engineering	U	1 - 5
Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
4194	Group Studies in Environmental Engineering	U	1 - 5
Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.			
4200	Environmental Engineering Unit Operations Lab	U	1
Laboratory measurements and analysis of environmental engineering treatment processes. Prereq: 2100 (610) or CivilEn 610, and EnvEng 3210 (520) or CivilEn 520. Concur: 5110 (711). Not open to students with credit for 620.			
4218	Measurement and Modeling of Climate Change	U	3
A study of the atmospheric boundary layer, its interaction with the land surface and vegetation in particular, and hand-on experience with micrometeorological and eddy-covariance instrumentation and data analysis. Prereq: CivilEn 2060, or permission of instructor.			
4400	Integrated Environmental Chemical Fate and Transport	U	3
Fate and transport of pollutants within and between air, water, and soil. This requires an understanding of thermodynamics and mass transfer concepts related to environmental engineering, which is the focus of the first portion of the course. In the second portion, students apply these concepts to develop predictive fate and transport models. Prereq: Sr standing in Engineering, or permission of instructor.			
4998	Undergraduate Research in Environmental Engineering	U	1 - 5
Opportunity for undergraduate students to conduct research in Civil and Environmental Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
4998H	Undergraduate Research in Environmental Engineering	U	1 - 5
Supervised undergraduate honors research on various topics in Environmental Engineering. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.			
4999	Environmental Engineering Research for Thesis	U	1 - 5
Supervised research and project work. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is progress graded (S/U).			
4999H	Environmental Engineering Research for Thesis	U	1 - 5
Supervised research and project work arranged individually for honors students. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is progress graded (S/U).			
5110	Environmental Engineering Bioprocesses	U G	3
Principles and design of biological processes in environmental engineering. Prereq: 3200 (511), or Grad standing. Not open to students with credit for 711.			

194 Environmental Engineering

5120 Bioremediation of Groundwater and Soil U G 3

An overview of biotechnology methods for remediation of groundwater and soils. Overview of theory and bio-remediation component design. Includes a study of the role of key microbial groups capable of transforming common contaminants in subsurface media with a particular emphasis on molecular genetic biotechnology methods to identify and document their ecology and metabolic condition. Prereq: A course in Microbio; or Grad standing; or permission of instructor. Not open to students with credit for CivilEn 818.

5140 Air Quality Engineering U G 3

This course introduces several concepts which will provide students with a basic knowledge of several air quality issues. We will first discuss sources and classifications of air pollutants, followed by a brief primer on relevant atmospheric science. Following this, we will focus on two aspects related to atmospheric chemistry: tropospheric ozone formation and secondary aerosol production. Prereq: Chem 1220, 1250, or equiv, and Math 2177, 2174, or 2415, and enrollment in CivilEn or EnvEng major; or Grad standing; or permission of instructor.

5170 Sustainability and the Circular Economy U G 3

An introduction to life-cycle thinking and the circular economy with emphasis on quantitative sustainability assessment and decision-making. Prereq: 3200, or Grad standing in Engineering, or permission of instructor. Not open to students with credit for EnvSci 5170. Cross-listed in EnvSci.

5194 Group Studies in Environmental Engineering U G 1 - 5

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

5195 Engineering Design for Environmental Health U G 3

Students in this course will learn how to incorporate health information into the engineering design process. This material complements risk assessment by focusing on the design of engineering systems. Course will discuss balancing financial, health, performance, and other considerations. Quantitative analysis will be conducted in soil, water, air, buildings, and occupational health scenarios. Prereq: Math 1151, 1161.01, or 1161.02, and Chem 1210 or 1250, and enrollment in the CivilEn, EnvEng, or PubHEHS major program; or grad standing; or permission of instructor.

5210 Advanced Physical Chemical Treatment Processes U G 3

Principles and design of physical and chemical processes for water and wastewater treatment including mixing, mass transfer, chemical kinetics, oxidation-reduction, disinfection, emerging contaminants, and water reuse. Prereq: 3210 (520) or CivilEn 520, or Grad standing in Engineering or EarthSc, or permission of instructor. Not open to students with credit for CivilEn 810.

5600 Science, Engineering, and Public Policy U G 3

Presents a history of the interactions between science, engineering, and public policy in the United States and in the context of global concerns (e.g. climate change, competitiveness), inquire into how various federal government, universities, & corporations conduct & fund science and engineering & explore how public sector interests & processes influence sci, engr & public policy. Prereq: Jr, Sr, or Grad standing; or permission of instructor. Cross-listed in PubAfrs.

5718 Aquatic Chemistry U G 3

Examination of the processes that control chemical equilibria in natural waters: acid/base reactions, metal complexation/speciation and oxidation-reduction processes. Intended for students in EarthSci, CivilEn, and the Grad EnvSci program. Prereq: Chem 1220 or above, and Math 1151 or above; or equivalents. Not open to students with credit for EarthSc 5718. Cross-listed in EarthSc.

5719 Environmental Organic Chemistry U G 3

Fate and distribution of organic pollutants in the environment including aqueous solubility, vapor pressure, environmental partition coefficients, and transformation reactions. Intended for students in EarthSc, CivilEn, and the Grad EnvSci program. Prereq: 5718 and Chem 4200, or permission of instructor. Not open to students with credit for EarthSc 5719. Cross-listed in EarthSc.

5760 Design of Urban Stormwater Control Measures U G 3

Modification of hydrologic methods for urban systems, urban pollutants of concern, stormwater regulations, low impact development, green infrastructure, design of stormwater control measures [(SCMs), also known as Best Management Practices (BMPs)], and discussions of stormwater control performance. Design focused projects that offer real world challenges, diverse set of method and tools. Prereq: CivilEn 3160 or FABEng 2720, or Grad standing in Engineering, or permission of instructor. Not open to students with credit for FABEng 5760. Cross-listed in FABEng.

6020 Foundations of Data-Driven Sustainable Energy Systems G 3

Introduction to issues impacting sustainable energy systems across technology, law and policy, business models, resilience, data, geospatial, and decision sciences. Prereq: Not open to students with credit for AEDEcon 6500, FABEng 6020, Geog 6020, ISE 6020, or PubAfrs 6020. Cross-listed in AEDEcon 6500, FABEng 6020, Geog 6020, ISE 6020, and PubAfrs 6020.

6100 Environmental Engineering Analytical Methods G 3

Application of analytical methods to calculate, measure and interpret chemical characteristics of water, soil, and air. Prereq: Chem 1220 (122) or 1250 (125), or Grad standing. Not open to students with credit for 2100 (610) or CivilEn 610.

6193 Individual Studies in Environmental Engineering G 1 - 5

Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

6194 Group Studies in Environmental Engineering G 1 - 5

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

6200 Fundamentals of Environmental Engineering G 3

Quantitative assessment of water quality, air quality, and solid/hazardous waste management, with an emphasis on minimizing human health and environmental impacts through sustainable design. Prereq: Chem 1220 (122) or 1250 (125), or Grad standing, or permission of instructor. Not open to students with credit for 3200 (511) or CivilEn 511.

6210 Environmental Engineering Unit Operations G 3

Selection and Design of Unit Operations and Processes used in Environmental Engineering. Prereq: 413 or CivilEn 3130 (413), and Chem 1220 (122) or 1250 (125); or Grad standing; or permission of instructor. Not open to students with credit for 3210 (520) or CivilEn 520.

6218 Measurement and Modeling of Climate Change for Graduate Students G 3

The course will focus on the science behind climate change, and specifically on physical processes at the earth surface, and the interactions between the ecosystem, human activities and climate change. Design of data analysis research project, testing hypotheses regarding climate change and its effects using observational data, hands-on climate data analysis experience through personal project. Prereq: Grad standing in CivilEn or EnvEng, or permission of instructor.

6220 Data Analysis in Environmental Engineering G 3

Application of programming and statistical methods for engineering data analysis. Will explore distribution, variance, and multivariate methods. Will provide a deeper understanding of analysis theories in the space, time, and spectral domain. Students will develop computer programming toolboxes and theoretical skills for analyzing and modeling data in their own research. Prereq: Stat 3450, 3460, 3470, or CivilEn 2050, or equiv; and Grad standing in the Civil Engineering or Environmental Science Graduate programs.

6400 Integrated Environmental Chemical Fate and Transport for Graduate Students G 3

Fate and transport of pollutants within and between air, water, and soil. Understanding this fate and transport requires an understanding of thermodynamics and mass transfer concepts related to environmental engineering, which is the focus of the first portion of the course. In the second portion, students apply these concepts to develop predictive fate and transport models. Prereq: Grad standing in Engineering, Earth Science, or Environmental Science, or permission of instructor.

6610 Analytic Frameworks for Analysis of Science, Engineering, and Policy G 3

Introduces a number of analytic frameworks and tools that are used to address issues where science and engineering are important considerations for public policy. Complements EnvEng/PubAfrs 5600 'Science, Engineering, and Public Policy', which is a survey of the interconnectedness of science, engineering, and public policy. Prereq: Grad standing, or permission of instructor.

6999 Environmental Engineering Research Thesis G 1 - 15

Research for thesis purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is progress graded (S/U).

7220 Colloidal and Interfacial Processes in Aquatic Systems G 3

Fundamental concepts of the chemistry of the solid-water interface, adsorption/desorption, coagulation, and deposition in natural and engineered systems. Prereq: 2100 (610), or Grad standing, or permission of instructor. Not open to students with credit for both CivilEn 819 and 822.

8193 Individual Studies in Environmental Engineering G 1 - 5

Individual conferences, assigned readings, and reports on minor investigations. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions. This course is graded S/U.

8194 Group Studies in Environmental Engineering G 1 - 5

Provides groups of students opportunities to pursue special studies not otherwise offered. Prereq: Permission of instructor. Repeatable to a maximum of 10 cr hrs or 10 completions.

8998 Graduate Research in Environmental Engineering G 1 - 15

Opportunity for graduate students to conduct research in Environmental Engineering. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is graded S/U.

8999 Environmental Engineering Research Dissertation G 1 - 15

Research for dissertation purposes only. Prereq: Permission of instructor. Repeatable to a maximum of 15 cr hrs or 15 completions. This course is progress graded (S/U).

Environmental Science

5170	Sustainability and the Circular Economy	U G	3
An introduction to life-cycle thinking and the circular economy with emphasis on quantitative sustainability assessment and decision-making. Prereq: Grad standing, or permission of instructor. Cross-listed in EnvEng.			
6193	Individual Studies in Environmental Sciences	G	1 - 12
Afford the qualified student the opportunity for independent reading, study, practical experience, or laboratory work in specialized field of interest. Repeatable to a maximum of 12 or hrs or 4 completions. This course is graded S/U.			
6194	Group Studies	G	1 - 5
Group studies in environmental sciences. Prereq: Permission of instructor. Repeatable to a maximum of 10 or hrs or 4 completions.			
7899	Current Issues in Environmental Sciences	G	1
Graduate seminar where faculty from within and outside the University and graduating students will present their research. Au, Sp Sems. Repeatable to a maximum of 4 cr hrs.			

Environmental Sciences Technology

1201T	Exploring Environmental Sciences	U	½
Promotes student success in college and preparation for a career; explores personal and career interests, needs, goals, and the support services available for student success.			

Ethnic Studies

2193	Individual Studies	U	1 - 3
Individual directed study for work not typically offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
2321	Introduction to Asian American Studies	U	3
Introduction to how Asian Americans as a whole and as specific ethnic groups have been racialized throughout U.S. history; examination of diverse Asian American experiences, cultural practices, and political viewpoints through gender, sexuality, class, immigrant status, dis/ability, and other social differences. Prereq: English 1110.XX, or GE foundation writing and info literacy course. Not open to students with credit for CompStd 2321. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed with CompStd.			
2323	Introduction to American Indian Studies	U	3
This course explores the legal, cultural, historic, and political foundations, experiences, and perspectives and futures of American Indians in the U.S., with an emphasis on race, ethnicity, and gender diversity. Prereq: English 1110.XX or equiv; or GE foundation writing and info literacy course; or permission of instructor. Not open to students with credit for CompStd 2323. GE cultures and ideas and diversity soc div in the US course. GE foundation historical and cultural studies and race, ethnicity and gender div course. Cross-listed with CompStd.			
2340	Si Se Puede: Latinx Gender Studies	U	3
Explores the various layers of complexity that have historically made up the Latinx experience in the United States at the intersections of class, race, ethnicity, gender and sexuality. Prereq: Not open to students with credit for WGSST 2340. GE foundation race, ethnicity and gender div course. Cross listed in WGSST.			
3605	East West Photography	U	3
Investigation of social relations and how they are constructed by photographs with a particular focus on interactions between North America, Asia, and Europe. Prereq: Not open to students with credit for 3605H, HistArt 3605, or HistArt 3605H. GE VPA course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course. Cross-listed in HistArt.			
3605H	Honors East West Photography	U	3
Investigation of social relations and how they are constructed by photographs with a particular focus on interactions between North America, Asia, and Europe. Prereq: Honors standing, or permission of instructor. Not open to students with credit for 3605, HistArt 3605, or HistArt 3605H. GE VPA course. GE foundation lit, vis and performing arts and race, ethnicity and gender div course. Cross-listed in HistArt.			
4998	Undergraduate Research	U	1 - 4
Undergraduate research in variable topics related to Ethnic Studies. Student-initiated projects. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
4998H	Undergraduate Honors Research	U	1 - 4
Undergraduate honors research in variable topics related to Ethnic Studies. Student-initiated projects. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
4999	Undergraduate Research: Thesis	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and thesis. Prereq: Permission of instructor. Repeatable to a maximum of 12 or hrs or 4 completions. This course is graded S/U.			
4999H	Honors Thesis Research	U	1 - 4
A program of reading, research, writing, and/or creative work arranged for each student, with individual conferences, progress reports, and honors thesis. Prereq: Honors standing, and permission of instructor. Repeatable to a maximum of 12 or hrs or 4 completions. This course is graded S/U.			

5191	Internship	U G	1 - 3
Workplace experience requiring writing and/or research. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
5193	Individual Studies	U G	1 - 3
Individual directed study for work not typically offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 9 or hrs or 3 completions. This course is graded S/U.			
5700	Ethnic Studies Workshop	U G	1 - 3
Students study topics in the field of ethnic studies in a seminar-like setting, often focused on the work of visiting scholars invited to lead events organized during the semester of offer. Prereq: Jr, Sr, or Grad standing, or permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			

Evolution, Ecology and Organismal Biology

1910	Introduction to Biological Studies- Local Plants (Stone Lab)	U	2
Structures, processes, and stages of the plant life cycle; common families of flowering plants; plant geography, ecology, and conservation; and uses of plants. 1-wk course available summer session at Stone Lab. Prereq: Completion of high school Biology course. Not open to students with credit for 110.			
1920	Introduction to Biological Studies - Birds (Stone Lab)	U	2
An introductory course for students interested in ornithology including bird identification, behavior, and ecology, with an emphasis on field and laboratory techniques. 1-wk course available summer session at Stone Lab. Prereq: Completion of high school Biology course. Not open to students with credit for 126.			
1930	Introduction to Biological Studies - Aquatic Biology (Stone Lab)	U	2
An introduction to the organisms of the ecosystem in freshwater aquatic environments. 1-wk course available summer session at Stone Lab. Prereq: Completion of high school Biology course. Not open to students with credit for 125.			
2210	Biodiversity of Ohio - Plants	U	2
A lecture and field course in identifying common Ohio plants; emphasis on taxonomic principles, use of keys and manuals, and field recognition of plants; includes some Saturday field trips. Prereq: 4 sem cr hrs in Biological Sciences. Not open to students with credit for 210. NS Admis Cond course.			
2220	Biodiversity of Ohio - Birds	U	2
The general biology of birds with emphasis on their natural histories and field identification of local species. Prereq: 4 sem cr hrs in Biological Sciences. Not open to students with credit for 322.			
2250	Dynamics of Dinosaurs	U	3
A review of current information on dinosaur biology, emphasizing scientific approaches to reconstructing dinosaurs as living, dynamic animals. Prereq: 4 credit hrs in Biological Sciences or Earth Sciences. GE theme origins and evolution course.			
2270	Parasites and Evolution: How Worms, Mosquitoes, etc. Manage Their/Our World	U	2
Introduction to life history of and pathology caused by a number of parasites of invertebrates and vertebrates (including humans). Parasites and disease vectors are used to illustrate broad evolutionary and ecological concepts. Prereq: 4 sem cr hrs in Biological Sciences.			
2410	Biological Invasions: The Ecology and Evolution of Species Introductions	U	3
Invasion ecology is the study of introduced, non-native species and the factors that sometimes lead to their population explosions and negative ecological impacts in the new region. This course will make explicit connections between fundamental concepts in ecology and evolutionary biology, topics specific to invasion ecology, and the idiosyncratic details surrounding particular invasive species. Prereq: One course in Life Sciences (or a related field), or permission of instructor.			
2510	Human Anatomy	U	3
An introduction to human anatomy; small mammal dissection. Prereq: 3 sem cr hrs in Biological Sciences. Not open to students with credit for 235. GE nat sci bio course. NS Admis Cond course.			
2511	Human Anatomy	U	4
This introductory course in human anatomy introduces students to the principles of vertebrate anatomy with emphasis on human systems. Weekly laboratory meetings provide students with experience dissecting a small mammal as a model for human organ systems. Prereq: 3 sem cr hrs in Biological Sciences. GE nat sci bio course. GE foundation natural sci course.			
2520	Human Physiology	U	3
A survey of the human nervous system, sense organs, muscle function, circulation, respiration, digestion, metabolism, kidney function, and reproduction. Prereq: 3 sem cr hrs in Biological Sciences. Not open to students with credit for 232. GE nat sci bio course. NS Admis Cond course.			

196 Evolution, Ecology and Organismal Biology

2911 The Climate Crisis: Mechanisms, Impacts, and Mitigation U 4

Examination of the basic science of climate change, of the ability to make accurate predictions of future climate, and of the implications for global sustainability by combining perspectives from the physical sciences, the biological sciences, and historical study. Team-taught with faculty members in EarthSc and History. Prereq: Not open to students with credit for History 1911, History 2911, EEOB 1911, EarthSc 1911 or EarthSc 2911. GE historical study and nat sci bio and nat sci phys course. GE theme lived environments and sustainability course. Cross-listed in EarthSc and History.

3191 Undergraduate Internship U 1 - 3

Internship held as undergraduate for credit. Prereq: 8 cr hrs in Biological Sciences, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.

3193 Undergraduate Individual Studies U 1 - 3

Individual work in the field of the chosen problem. Prereq: 8 cr hrs in Biological Sciences. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.

3194 Undergraduate Group Studies U 1 - 3

Study of selected topics in evolution, ecology and organismal biology. Prereq: 8 cr hrs in Biological Sciences. Repeatable to a maximum of 12 cr hrs or 3 completions.

3270 Infectious Disease Ecology, Evolution, and Transmission U 3

This course will focus on innate and adaptive immunity, host-pathogen evolution, phenotypic plasticity, host jump, wild life ecology, the role of social behavior, diet, habitat, geography, and life history in disease transmission in human and nonhuman animals. It will also cover research methods, common statistical and geospatial analyses in investigations of infectious diseases. Prereq: Soph standing or above.

3310.01 Evolution U 4

Basic conceptual issues and processes in evolution with an emphasis on the ecological basis of adaptation and consequences of natural selection. Also available summer term at Stone Lab. Prereq: Biology 1114 or 1114H, or permission of instructor. Not open to students with credit for 3310 or 3310.02.

3310.02 Evolution (Hybrid Online) U 4

This course surveys the many processes that underlie biological evolution and illustrates the patterns they generate, with a focus on adaptation, types of selection, population genetics, species interactions and biodiversity. This course is presented in a hybrid online format. Prereq: Biology 1114 or 1114H, or permission of instructor. Not open to students with credit for 3310 or 3310.01.

3320 Organismal Diversity U 3

A survey of organismal diversity and the evolutionary relationships between and within major groups of organisms. Class is laboratory based. Prereq: 3310. Not open to students with credit for 405.01 and 405.02.

3410 Ecology U 4

Distribution and abundance of species, population dynamics, community ecology, ecosystem dynamics, and applied perspectives. Also available summer term at Stone Lab. Prereq: Biology 1114 or 1114H, or permission of instructor. Not open to students with credit for 503.01, 503.02, and 503.03.

3420 Behavioral Ecology U 4

Comparative study of animal behaviors, and analysis of their adaptive value, physiological mechanisms, development, and evolution, within their ecological and social context. Also available summer session at Stone Lab. Prereq: Biology 1114 or 1114H, or permission of instructor. Not open to students with credit for 440, 620, 730, or 740.

3420E Behavioral Ecology (Honors Embedded) U 4

Comparative study of animal behaviors, and analysis of their adaptive value, physiological mechanisms, development, and evolution, within their ecological and social context. Prereq: Biology 1114 or 1114H, or permission of instructor. Not open to students with credit for 440, 620, 730, or 740.

3494 Entering Independent Research U 3

Designed to equip students in the Natural and Mathematical Sciences with necessary skills to become independent researchers. The main emphasis is given to experimental methods, experimental and quasi-experimental design, hypothesis testing, sampling, research ethics, basic statistics, and presentation of data.

3495 Research Ethics and Protocols in Behavior, Ecology and Evolution U 2

This course aims to equip students with important skills in doing responsible and equitable research in natural and behavioral sciences. Students will explore ethics in science, including conflict of interest, scientific misconduct, reduced research benefits for underserved populations, gender, racial, and language bias in designing, supporting, and communicating research. Prereq: 3 credit hours in biological sciences.

3496 Career Exploration in Evolution & Ecology U 2

This course aims to provide resources for students who would like to seek careers in Ecology and Evolution in academia, industry, government, and non-government organizations. Students will have mock interviews and be advised on graduate and professional school applications. In addition, students will prepare personal and research statements and a formal CV/resume. Prereq: 3 credit hours in biological sciences.

3498 Undergraduate Research in Behavioral Ecology U 4

Supervised independent research opportunities in behavioral ecology for undergraduates considering careers in basic scientific research, secondary education, or graduate research programs in biological and behavioral sciences. Formal instruction on experimental research design, literature review, research ethics, and elementary statistical analyses. Prereq: Biology 1113, 1113H, 1114, 1114H, or Soph standing or above; or permission of instructor.

3510 Cellular and Developmental Biology U 3

Introduction to the structure and function of animal cells, and to patterns of early development in vertebrates and invertebrates. Prereq: 3310, and Biology 1113 or 1113H. Not open to students with credit for 415 and MolGen 5602.

3520 Microscopic Anatomy U 3

Examination and analysis of the functional morphology of cells and tissues of vertebrate animals, with emphasis on mammalian histology. Prereq: Biology 1113, 1114, 1113H, or 1114H.

3798 Undergraduate Study Tour U 1 - 12

Undergraduate study tour. Prereq: 8 sem cr hrs in Biological Sciences, and permission of instructor. Not open to students with credit for 698. This course is graded S/U.

4210 Focused Study of Ecology and Evolution - Vertebrates U 2

Analysis of the anatomical, physiological, behavioral, and ecological characteristics of the major vertebrate groups. Prereq: 3410. Not open to students with credit for 470.

4220 Focused Study of Ecology and Evolution - Mammals U 3

Mammals of the world, their natural history, distribution, taxonomy, and major anatomical and physiological adaptations; study of local species emphasized in lab. Prereq: 3310.

4230 Focused Study of Ecology and Evolution - Invertebrates U 2

Analysis of the anatomical, physiological, behavioral and ecological characteristics of the major invertebrate groups. Prereq: 3310.

4240 Focused Study of Ecology and Evolution - Plants and People U 3

Overview of the importance of plants to humans. Students will gain an understanding of the interrelations between humans and plants, including plant domestication, history and uses of spices and flavorings derived from plants, as well as non-food uses of plants. Recommended prereq: previous or concurrent enrollment in EEOB 2210. Prereq: 1 course in Biological Sciences (Plant Biology Preferred). Not open to students with credit for 502.

4410 Conservation Biology U 3

Application of ecology, population genetics, and biogeography to the study and conservation of biodiversity, threatened communities, and endangered species. Prereq: 3310 and 3410, or permission of instructor. Not open to students with credit for 661.

4420H Tropical Field Studies U 3

This course will give students first-hand knowledge of tropical biology with an emphasis on evolutionary and behavioral ecology. This is an intensive foreign study tour in Panama, a country renowned for its biological diversity. The course includes travel to several tropical habitats and experiences with common field methods in ecology and animal behavior. Prereq: Honors standing, and 3310 or 3410; or permission of instructor.

4430 Ecological Methods I U 2

Hands-on course for learning basic field and quantitative methods for ecological studies. Prereq: Biology 1114 or 1114H. Repeatable to a maximum of 8 cr hrs or 4 completions.

4510 Comparative Vertebrate Anatomy U 3

Evolutionary trends within vertebrates will be revealed through a study of anatomical homology across representative taxa. Concepts will be expanded upon as students explore the hands-on methods of comparative anatomical study, including dissection and skeletal staining. Prereq: 2 courses in Biological Sciences.

4520 Comparative Physiology U 3

Functional systems in invertebrates and vertebrates: respiration, circulation, water, ion, and energy balance; communication; locomotion; and reproduction. Prereq: Biology 1114 or 1114H, and 1 course in Biological Sciences.

4550 Neurobiology of Behavior U 3

Integration of studies of sensory, integrative and motor systems with evolution and ecology. Prereq: 2 courses in Biological Sciences. Not open to students with credit for 632.

4560 Comparative Endocrinology U 2

Introduction to hormones and hormone action; comparison between vertebrates and invertebrates with emphasis on special situations such as metamorphosis. Prereq: 4520 and Biochem 4511, or equiv, or permission of instructor. Not open to students with credit for 550 or Entomol 550. Cross-listed with Entomol 550.

4950 Field Ecology (Stone Lab) U 2

Field-based introduction to the distribution and abundance of animals and plants in pond, lake, river, marsh, beach, field, and woodland ecosystems for teachers, undergraduates and graduate students. 1-wk course available summer session at Stone Lab. Prereq: 12 sem cr hrs of Biological Sciences, and GPA 2.5 or above, and Jr standing or above, or permission of instructor. Not open to students with credit for 513.

Evolution, Ecology and Organismal Biology 197

<p>4990 Undergraduate Seminar in Mathematical Biology Research U 1</p> <p>Seminar on research in mathematical biology and its applications, with an emphasis on evolutionary biology, ecology, neuroscience, and cell biology. Prereq: Permission of instructor. Repeatable to a maximum of 3 cr hrs. This course is graded S/U. Cross-listed in Math.</p> <p>4998 Undergraduate Research U 1 - 12</p> <p>Undergraduate research in evolution, ecology, and organismal biology. Prereq: 2 courses in Biological Sciences, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.</p> <p>4998H Undergraduate Research - Honors U 1 - 12</p> <p>Honors undergraduate research in evolution, ecology, and organismal biology. Prereq: Honors standing, and 2 courses in Biological Sciences, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.</p> <p>4999 Undergraduate Thesis Research U 1 - 12</p> <p>Undergraduate research towards a thesis in Evolution and Ecology, or Zoology. Prereq: 8 cr hrs in Biological Sciences, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.</p> <p>4999H Undergraduate Thesis Research - Honors U 1 - 12</p> <p>Undergraduate research towards an honors thesis in Evolution and Ecology, or Zoology. Prereq: Honors standing, and 8 cr hrs in Biological Sciences, and permission of instructor. Repeatable to a maximum of 12 cr hrs or 5 completions. This course is graded S/U.</p> <p>5210 Spider Biology - Stone Lab U G 2</p> <p>Study of the biology of spiders including functional anatomy, behavior, webs and web-building, field and lab methods, identification, and ecology. 1-wk course available summer term at Stone Lab. Special fees assessed. Prereq: GPA 2.5 or above, and completion of 12 sem cr hrs of biological sciences, and Jr standing or above; or permission of instructor.</p> <p>5310 Advanced Principles of Evolution U G 3</p> <p>Origin of variation in plants and animals with an emphasis on evolutionary processes. Prereq: 3310, or Grad standing. Not open to students with credit for 673.</p> <p>5320 Society and Evolution U G 3</p> <p>Philosophical and historical survey of the social conflict of scientific and religious perspectives on origins. Prereq: 3310, or Grad standing. Not open to students with credit for 710.</p> <p>5330 Population Genetics & Phylogeography U G 3</p> <p>An introduction to basic concepts in population genetics and phylogeography. Topics include genetic variation, mutation, equilibrium models, population structure, gene flow, natural selection, historical demography, quantitative genetics, and inbreeding depression. Prereq: 3310 or 3310.01 or 3310.02, or Grad standing.</p> <p>5340 Evolution and Taxonomy of Vascular Plants U G 4</p> <p>The course will focus on the diversity and evolution of extant and fossil vascular plants and the features and data that are used to understand their phylogenetic relationships. Prereq: Biology 1114, or permission of instructor.</p> <p>5350 Evolutionary Ecology U G 3</p> <p>This course explores the interactions among evolutionary and ecological patterns and processes, including evolutionary approaches to understanding life histories, reproductive and social behavior, host-pathogen, predator-prey and other interspecific interactions, evolutionary conservation biology and eco-evolutionary dynamics. Prereq: 3310.01, 3310.02, 3420, 3420H, or 3420E, or permission of instructor.</p> <p>5360 Biodiversity Informatics U G 3</p> <p>This course will provide students with the knowledge and practical skills to access, manage, analyze, and utilize biodiversity data for scientific research and conservation efforts. The course covers a comprehensive understanding of diverse biodiversity data sources and introduces a range of analytical, statistical, and computational tools essential for biodiversity data analysis. Prereq: 3410, or 3310.01, or 3310.02; or permission of instructor.</p> <p>5410 Aquatic Ecosystems - Ocean Ecology U G 1½</p> <p>Diversity and distribution of marine organisms; population dynamics, productivity, and structure of marine ecosystems; human impact on ocean resources. Prereq: 3410, or Grad standing. Not open to students with credit for 505.</p> <p>5420 Aquatic Ecosystems - Ecology of Inland Waters U G 1½ - 4</p> <p>A study of the physical, chemical, and biological factors influencing the biological productivity of inland waters, and of techniques and equipment used in evaluating them. Also available summer session at Stone Lab. Prereq: 3410, or Grad standing, or permission of instructor. Not open to students with credit for 647 and 655.</p> <p>5430 Fish Ecology U G 3</p> <p>Lecture emphasis on the behavior, migration, distribution, and evolution of fish; laboratory emphasis on ecological and systematic ichthyology. Lab fee required. Prereq: 3410, or Grad standing, or permission of instructor. Not open to students with credit for 621 and 626.</p> <p>5440 Plankton Ecology U G 3</p> <p>Material in this course focuses on the ecology of freshwater plankton (both phytoplankton and zooplankton) and the advanced study of lake ecology. The study of plankton ecology is central to understanding lake food web structure and production, which is important to fisheries, biogeochemistry, and freshwater responses to anthropogenic activities. Prereq: 5420</p>	<p>5450 Population Ecology U G 3</p> <p>Quantitative study of the concepts, methods, and applications of population ecology. Prereq: 3410, or Grad standing. Not open to students with credit for 671.</p> <p>5460 Physiological Ecology U G 3</p> <p>Study of the physiological adjustment, tolerance, and acclimatization to the abiotic and biotic environment by animals and plants. Prereq: 3410, or Grad standing. Not open to students with credit for 654.01 and 674.</p> <p>5470 Community and Ecosystem Ecology U G 3</p> <p>A quantitative and descriptive approach to the establishment, development, succession, and dynamics of communities and their interrelations with historic, climatic, soil, and biotic factors. Prereq: 3410, or Grad standing. Not open to students with credit for 700 or 720.</p> <p>5480 Advanced Plant Ecology U G 3</p> <p>Plants are central to many of the ecological and evolutionary dynamics that drive variation in community structure and ecosystem functioning. In this course we will learn about and critically appraise major themes in plant ecology, covering key topics from ecophysiology, population biology, interspecific interactions, community ecology, and biogeography. Prereq: 3410.</p> <p>5490 Insect Behavior: Mechanisms and Function U G 3</p> <p>Understanding the mechanisms and evolution of insect behavior and communication. Course will address behavioral physiology and ecology, sociality, learning and cognition, as well as applied aspects of insect behavior. Prereq: Jr standing, or permission of instructor. Not open to students with credit for Entmlyg 5420 or 5490. Cross-listed in Entmlyg.</p> <p>5505 Wicked Science U G 3</p> <p>This course aims to train students to become wicked scientists who are able to tackle the grand challenges of today and tomorrow - what are otherwise known as wicked problems. Prereq: Not open to students with credit for Anthrop 5505 of FABEng 5505. Cross-listed in Anthrop and FABEng.</p> <p>5510 Interdisciplinary Team Science U G 3</p> <p>This course aims to teach students the necessary skills to lead or participate in scientific or interdisciplinary teams. Prereq: Sr standing, and permission of instructor; or Grad standing. Not open to students with credit for Anthrop 5510, VetPrev 5510, or ENR 5510. Cross-listed in Anthrop, VetPrev, and ENR.</p> <p>5610 Translating Evolution U G 3</p> <p>Hands-on study of the theory and practice of informal science education, with an emphasis on the translation of concepts and research on evolutionary biology to non-specialist audiences. Prereq: 3310, or 3310.01, or 3310.02, or Biology 1114, or 1114H; and 3 additional credit hours in Biological Sciences. Not open to students with credit for EEOB 5610S.</p> <p>5610S Translating Evolution U G 3</p> <p>Hands-on study of the theory and practice of informal science education, with an emphasis on the translation of concepts and research on evolutionary biology to non-specialist audiences. Prereq: 3310.01, or 3310.02; or Biology 1114, or 1114H; and 3 additional credit hours in Biological Sciences. Not open to students with credit for 5610.</p> <p>5798 Tropical Behavioral Ecology and Evolution U G 3</p> <p>Focus on the evolutionary processes that shape the ecology and behavior of invertebrate systems in a diverse tropical forest with a special emphasis on symbioses. Students will build skills in proposal writing, experimental design, and field research conducted at the world renowned Smithsonian Tropical Research Institute in Panama. Prereq: 3193 (Adams) or 8896.02 (Adams). Repeatable to a maximum of 12 cr hrs. This course is graded S/U.</p> <p>5910 Evolution and Ecology of Reptiles and Amphibians U G 2</p> <p>Study of the evolution and ecology of reptiles and amphibians, with emphasis on the fauna of Ohio. Prereq: 12 sem cr hrs of Biological Sciences, and GPA 2.5 or above, and Jr standing or above, or permission of instructor. Not open to students with credit for 622.</p> <p>5911 Tropical Herpetology U G 4</p> <p>Field course on the study of reptiles and amphibians, with emphasis on tropical species identification, field techniques and methods, population ecology, and conservation strategies. Course will be conducted at a tropical field site such as the Biological Field Station El Zota, Tapezco, Costa Rica. Prereq: GPA of 2.5 or above, completion of 12 semester cr hrs of biological sciences, and Jr standing or above by autumn of enrollment; or permission of instructor.</p> <p>5930 Ichthyology (Stone Lab) U G 3 - 4</p> <p>Study of the distribution and classification of fishes, which includes methods of identification, collection, and preservation. Available summer session at Stone Lab. Prereq: GPA 2.5 or above, and Jr standing or above, and 12 sem cr hrs in Biological Sciences; or permission of instructor. Not open to students with credit for 621.</p> <p>5940 Field Zoology (Stone Lab) U G 3 - 4</p> <p>Field and laboratory identification of aquatic and terrestrial vertebrates and invertebrates of the region, in relation to habitats occupied. Available summer session at Stone Lab. Prereq: GPA 2.5 or above, and Jr standing or above, and 12 sem cr hrs in Biological Sciences; or permission of instructor. Not open to students with credit for 651.</p> <p>5970 Larval Fish Identification Workshop (Stone Lab) U G ½</p> <p>Workshop on the techniques involved with the collection and identification of common larval fishes of the Lake Erie drainage basin. 1-day course available summer session at Stone Lab. Prereq: 12 sem cr hrs of Biological Sciences, and GPA 2.5 or above, and Jr standing or above, or permission of instructor. Repeatable to a maximum of 6 cr hrs. This course is graded S/U.</p>
---	---

198 Evolution, Ecology and Organismal Biology

6193	Graduate Individual Studies	G	1 - 3
Individual work in the field of the chosen problem. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 8 completions. This course is graded S/U.			
6194	Graduate Group Studies	G	1 - 3
Group work in the field of the chosen problem. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 24 cr hrs or 8 completions.			
6210	Ecotoxicology	G	2 - 4
Technical examination of the environmental fate and toxicity of organic xenobiotics, inorganics, and metals; emphasis on chemistry of interactions with physical environment, fugacity models, risk assessment, and predictive toxicology. Prereq: 3410, or Chem 2510 and 2520 or equiv, or Grad standing, or permission of instructor. Not open to students with credit for Entomol 762.			
6310	Molecular Evolution	G	3
The genetic basis of evolution and the molecular mechanisms of evolution. Prereq: 3310, 5310, MolGen 4500, 5606, or equiv. Not open to students with credit for 640 or MolGen 640.			
6330	Phylogenetic Methods	G	4
Methods for phylogenetic analysis: cladistics, maximum likelihood, Bayesian approaches; character coding and data management. Prereq: Permission of instructor. Not open to students with credit for 626.			
6620	Scientific Writing in Evolution & Ecology: Manuscripts	G	1½
This graduate-level course focuses on improving the scientific writing ability of students. This course will focus specifically on writing scientific manuscripts. During the course, students will learn how to approach the writing process, practice writing, and learn to effectively critique their own writing and that of others. This course is graded S/U.			
6630	Scientific Writing in Evolution & Ecology: Proposals	G	1½
This graduate-level course focuses on improving the scientific writing ability of students. This course will focus specifically on writing scientific proposals. During the course, students will learn how to approach the proposal writing process, practice writing, and learn to effectively critique their own writing and that of others. This course is graded S/U.			
6999	Research for Thesis	G	1 - 12
Research for masters thesis. Prereq: Permission of instructor. Repeatable to a maximum of 24 cr hrs or 14 completions. This course is graded S/U.			
7210	Molecular Methods in Evolution and Ecology	G	1
Hands-on course for learning the use of molecular markers in evolutionary and ecological studies. Prereq: 3310 or 3410, and 8 additional sem or hrs of coursework in EEOB; or Grad standing. Not open to students with credit for 713.			
7220	Modeling in Evolutionary Ecology	G	4
Optimization models in evolutionary ecology, including dynamic optimization, evolutionary game theory, and adaptive dynamic models. Prereq: Permission of instructor. Not open to students with credit for 714.01 and 714.02.			
7890	Agricultural Acarology	G	4
An intensive review of mites associated with crops, ornamental plants, and stored food products with emphasis on taxonomy and ecology of these animals. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs.			
7891	Medical-Veterinary Acarology	G	4
The mites associated with humans, domestic animals, and wildlife, stressing their ecology and behavior in relation to transmission of viral, rickettsial, bacterial, and protozoan diseases. Prereq: Permission of instructor. Repeatable to a maximum of 8 cr hrs.			
8194	Graduate Group Studies	G	1 - 3
Group work in the field of a chosen problem. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 24 cr hrs or 8 completions.			
8894	EEOB Graduate Student Seminar	G	1 - 2
Required of all graduate students in evolution, ecology, and organismal biology during first Autumn semester of registration. Repeatable to a maximum of 4 cr hrs or 2 completions. This course is graded S/U.			
8896.01	EEOB Graduate Seminar: Anatomy and Physiology	G	1 - 2
Current topics in anatomy and physiology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.02	EEOB Graduate Seminar: Behavior	G	1 - 2
Current topics in behavior as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.04	EEOB Graduate Seminar: Ecology	G	1 - 2
Current topics in general ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.05	EEOB Graduate Seminar: Evolution	G	1 - 2
Current topics in evolution as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			

8896.06	EEOB Graduate Seminar: Marine Biology	G	1 - 2
Current topics in marine biology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.07	EEOB Graduate Seminar: Wildlife Biology	G	1 - 2
Current topics in wildlife biology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.08	EEOB Graduate Seminar: Fisheries Biology	G	1 - 2
Current topics in fisheries biology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.09	EEOB Graduate Seminar: Ecotoxicology	G	1 - 2
Current topics in ecotoxicology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.10	EEOB Graduate Seminar: Systematics	G	1 - 2
Current topics in systematics as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.11	EEOB Graduate Seminar: Population Ecology	G	1 - 2
Current topics in population ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.12	EEOB Graduate Seminar: Molecular Ecology	G	1 - 2
Current topics in molecular ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.13	EEOB Graduate Seminar: Physiological ecology	G	1 - 2
Current topics in physiological ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.14	EEOB Graduate Seminar: Aquatic Ecology	G	1 - 2
Current topics in aquatic ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.15	EEOB Graduate Seminar: Population Genetics	G	1 - 2
Current topics in population genetics as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.17	EEOB Graduate Seminar: Invertebrate Zoology	G	1 - 2
Current topics in invertebrate zoology as related to evolution, ecology, and organismal biology that vary with the interests of the students and instructor. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.18	EEOB Grad Seminar: Behavioral Ecology	G	1 - 2
Current topics in behavioral ecology as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.19	EEOB Grad Seminar: Current Topics in Quantitative Methods	G	1 - 2
Current topics in quantitative methods as related to evolution, ecology, and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8896.20	Women in Science	G	1
In this seminar course, participants will read key papers concerning the status of women in the STEM disciplines (Science, technology, engineering, and mathematics). Prereq: Grad standing, or permission of instructor. This course is graded S/U. Cross-listed in WGSST.			
8896.21	EEOB Graduate Seminar: Diversity, Equity and Inclusion in Science	G	1 - 2
Current topics in diversity, equity and inclusion in science, with a focus on evolution, ecology and organismal biology. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 20 cr hrs or 10 completions. This course is graded S/U.			
8998	Graduate Research	G	1 - 12
Graduate research. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 65 cr hrs or 18 completions. This course is graded S/U.			
8999	Research for Dissertation	G	1 - 12
Research for dissertation. Prereq: Grad standing, and permission of instructor. Repeatable to a maximum of 40 cr hrs or 20 completions. This course is graded S/U.			

1100.01	University Exploration Survey	U	1
Introduction to the process of decision making and exploring majors at Ohio State; introduction to university community; strategies for successful transition to and participation in that community; university resources and procedures. Prereq: Fresh standing in Exp. and permission of instructor. Not open to students with credit for 100.01, 100.01H, 100.02, or 100.03.			
1100.01E	University Exploration Honors Survey	U	1
Introduction to the process of decision making and exploring majors at Ohio State; introduction to university community; strategies for successful transition to and participation in that community; university resources and procedures. Prereq: Fresh standing in Exp. and permission of instructor. Not open to students with credit for 100.01, 100.01H, 100.02, or 100.03.			
1100.01H	Exploration Survey	U	1
University survey class for new freshmen honors students. Prereq: First year student in Exp or permission of instructor. Not open to students with credit for 100.01, 100.01H, 100.02 or 100.03.			
1100.02	University Exploration Survey	U	1
Introduction to the processes of decision making and exploring majors at Ohio State; introduction to the university community; strategies for success transition to and participation in that community; university resources and procedures. Prereq: Transfer student in EXP, and permission of instructor. Not open to students with credit for a university survey course from another college or with credit for: 1100.01 (100.01), 1100.01H (100.01H), 100.02, 100.03, USAS 100, 100.11, or 100.21.			

2000	Major Exploration for Continuing Students	U	1
The How to Re-decide course is a seven week, one credit hour course which meets once a week with one additional hour of online material per week. The course guides students through the re-deciding process and formulating a new academic plan at OSU by exploring potential majors through assessments, exposure to OSU degrees and various ways to explore and determine the best fit. Prereq: Not open to students with credit for 1100.01 or 1100.02.			
2100	Spring Forward Summer Experience: Strategies for Academic and Personal Success	U	1

EXP 2100 provides opportunities to strengthen academic resiliency, by focusing on skills and strategies in and out of the classroom that impact a student's academic success. Students work to better understand themselves and their goals and strengthen their connections to Ohio State and its resources. This course builds on prior strategies covered in learning strategies courses.

Film Studies

2270.01	Introduction to Film Studies	U	3
An introduction to the field of Film Studies based on a survey of the major theories of film analysis. Prereq: Not open to students with credit for 2270.02 or 2271 (270). GE VPA course.			
2270.02	Introduction to Film Studies Online	U	3
An introduction to the field of Film Studies based on a survey of the major theories of film analysis. Prereq: Not open to students with credit for 2270.01 or 2271 (270). GE VPA course.			
2271	Introduction to Film Studies for Majors	U	3
An introduction to the field of Film Studies based on a survey of the major theories of film analysis, specifically geared for incoming majors. Prereq: English 2263 (263), or HistArt 2901 (260). Not open to students with credit for 2270 (270). GE VPA course. GE foundation lit, vis and performing arts course.			
2367.01	The American Film Auteur	U	3
An intermediate course centering around the work of one important US filmmaker that extends and refines expository writing and analytic reading / viewing skills. Prereq: English 1110 (110) and Soph standing, or enrollment in Film Studies major. Repeatable to a maximum of 6 cr hrs. GE writing and comm course: level 2. GE foundation writing and info literacy course.			
2367.02	The American Film Genre	U	3
An intermediate course centering around the works of one important US film genre that extends and refines expository writing and analytic reading / viewing skills. Prereq: English 1110 (110) and Soph standing, or enrollment in Film Studies major. Repeatable to a maximum of 6 cr hrs. GE writing and comm course: level 2. GE foundation writing and info literacy course.			
2797	Introductory Study at Foreign Institution	U	1 - 6
An opportunity for students to study at a foreign institution and receive Ohio State credit for work completed. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Specific content, location, semester(s) of offering, and prerequisites vary; contact Office of International Affairs for available programs. Prereq: Department permission. Repeatable to a maximum of 15 cr hrs or 5 completions.			
3660	Documentary Film Studies	U	3
An upper-level course in documentary geared toward film studies majors. Prereq: 2270 or 2271, or permission of instructor. Repeatable to a maximum of 9 cr hrs.			

3797	Advanced Study at Foreign Institution	U	1 - 6
An opportunity for students to study at a foreign institution and receive Ohio State credit for work completed. Students will pay Ohio State fees and any fees in excess of Ohio State tuition, as well as all travel and subsistence costs. Specific content, location, semester(s) of offering, and prerequisites vary; contact Office of International Affairs for available programs. Prereq: Department permission. Repeatable to a maximum of 15 cr hrs or 5 completions.			
4191	Film Studies Internship / Field Practicum	U	1 - 12
An opportunity for work experience and on-the-job learning in film studies or film production related employment. Permission of department required. Prereq: Permission of department. Repeatable to a maximum of 36 cr hrs or 3 completions. This course is graded S/U.			
4194	Group Studies	U	1 - 3
Group studies for work in various fields of film studies not normally offered in courses. Repeatable to a maximum of 6 cr hrs or 3 completions.			
4580	Studies in a Major Director	U	3
A course in the films, style, themes, and career of a single director. Prereq: 2271 or 2367.01, and Jr standing, or permission of instructor. Repeatable to a maximum of 6 cr hrs.			
4640	Studies in Cinema History	U	3
An upper-level course on aspects of film history geared toward film studies majors. Prereq: 2270 or 2271, or permission of instructor. Repeatable to a maximum of 9 cr hrs.			
4650	Studies in Regional Cinema	U	3
An upper-level course on topics in a (sub-)national, geographic, or cultural region's cinema conducted in English and geared toward film studies majors. Prereq: 2270 or 2271; or permission of instructor. Repeatable to a maximum of 9 cr hrs.			
4670H	Cinema and the Historical Avant Garde	U	3
Historicizes cinema's political and artistic roots, concentrating on the perceived and real possibilities of the medium. Fosters critical awareness of "film culture" historically and currently. Prereq: Honors standing, and English 1110 (110) or equiv. Not open to students with credit for 670H, or German 4670H (670H). Cross-listed in German.			
4800	Story Development for Film and Television	U	3
In this course, students will harness their pre-existing critical thinking skills and historical knowledge to develop a personal statement-of-purpose that enables them to generate and refine their own original film and television concepts for subsequent production projects. Prereq: Permission of instructor. Not available for students with credit for FilmStd 4194 AU 14 or English 4800. Cross-listed in English.			
4880	Screenwriting and the Business of Cinema	U	3
This course examines screenwriting as both a literary art form and a challenging profession. Prereq: Theatre 5331 (636), or permission of instructor. Not open to credit to students with credit for 680.			
4881	Screenwriting and the Business of Television	U	3
This course examines television writing from both a creative and business perspective. Each student will individually pitch, and then write the show's bible, outline, and pilot. Students learn about teleplay structure, as well as ways to develop intriguing characters, realistic dialogue, and engaging episodes. In small groups students develop, write, and read others' work collectively. Prereq: Theatre 5331 or permission of instructor. Not available to students with credit for 5194 Sp15.			
4890	Advanced Screenwriting	U	3
An intensive writing course in which each student completes a feature-length screenplay based on work previously completed in Film Studies 680 or Film Studies 4880. Prereq: 4880 (680), and permission of director. Not open to students with credit for 690.			
4895	Advanced Seminar: Topics in Film Studies	U	3
Selected problems (themes, movements, theories, genres, styles, etc.) in film studies; topics vary per semester. Prereq: Enrollment in FilmStd major, and Sr standing, or permission of instructor. Repeatable to a maximum of 15 cr hrs.			
4998	Undergraduate Research	U	1 - 9
Undergraduate research or creative activities in variable topics. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 3 completions. This course is graded S/U.			
4999	Distinction Project	U	2 - 12
Completion of a distinction project developed in consultation with advisor. Prereq: Sr Standing, and permission of instructor. This course is graded S/U.			
4999H	Honors Thesis	U	2 - 12
Completion of an honors thesis. Should be scheduled in consultation with advisor. Topics vary. Prereq: Honors, Sr standing, and permission of instructor. This course is graded S/U.			
5193	Individual Studies	U G	1 - 3
Students may register for individual directed study under this number for work in various fields of film studies not normally offered in courses. Prereq: Permission of program director. Repeatable to a maximum of 6 cr hrs or 3 completions. This course is graded S/U.			

200 Film Studies

5600	Pathways in Film Practice and Theory	U G	3
Explorations of the rich interconnections between the understanding and the production of moving-image works. Students will be introduced to alternative modes of the moving image in the context of other modes of artistic expression and critical thought, with the aim of increasing intellectual breadth and production skills. Prereq: 2271, or Grad standing; or permission of program. Repeatable to a maximum of 6 cr hrs.			
7000	Graduate Studies in Film History	G	3
Study of the social, industrial, technological, and intellectual history of cinema, including cinema's relationships to modernity and its transnational developments. Prereq: Grad standing, or permission of instructor.			
7001	Advanced Theory Seminar: Methods and Applications	G	3
A theory and methods seminar which focuses on one scholarly approach to cinema (auteurism, formalism, historicism, feminism, etc). Repeatable to a maximum of 9 cr hrs.			
7193	Graduate Independent Study	G	1 - 3
Graduate independent study. Students may register to pursue study in various fields of film studies not normally offered in courses. Prereq: Permission of instructor. Repeatable to a maximum of 12 cr hrs or 4 completions.			
7999	MA Thesis Research	G	1 - 3
Research for M.A. Thesis. Prereq: Permission of instructor and director of graduate studies or program director. Repeatable to a maximum of 12 cr hrs or 4 completions.			

Food Science and Technology

1100	Exploring Food Science and Technology	U	½
Basic understanding of the global trends within food science and technology, the diversity of career opportunities within the industry, planning for a career and opportunities for professional development.			
1110	Chocolate Science	U	1
Introduction to the science and business of chocolate. The course covers the history, agriculture and processing of cacao, components and nutritional benefits of chocolate, basic steps in the production of chocolate, uses of chocolate, marketing of chocolate and chocolate products, and current events related to chocolate agriculture, production, and marketing.			
1120	Wine and Beer in Western Culture	U	2
To familiarize students with the terminology, production and practices related to wine, beer, and distilled spirits as well as critical historical and cultural events. Basic biology and chemistry understanding will help the student succeed.			
1140	Kitchen Science	U	2
Students are introduced to sanitation rules, basic culinary/baking methods, fundamentals of cooking, & the science behind its methodology. Students gain an understanding of common foods & their function in cooking. Cooking techniques will be demonstrated & methodology for each formulation is explained on a scientific basis. Basic biology and chemistry understanding will help the student succeed.			
1150	Caffeine Science	U	1
Explore the science of caffeine and production of caffeinated products, how it affects the human body along with a study of the historical importance of some of today's most popular caffeine sources.			
1200	The Science of Cooking	U	4
This course covers the scientific method, sanitation, hygiene, and safety in the kitchen and laboratory; weights and measurements; cooking methods; tasting and evaluation; food components; correlations to industrial food processing and preservation; and events, laws, and persons of importance in the development of food science as a discipline. GE foundation natural sci course.			
2193	Individual Studies	U	1 - 3
Individual study course to permit undergraduate students to explore in-depth selected areas of food science and nutrition. Prereq: GPA 2.5 or above, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is progress graded (S/U).			
2200	The Science of Food	U	3
Food and nutrition in modern health; principles involved in digestion, metabolism and contribution of food to diseases processes, including food poisoning and the role of science, biotechnology and processing in meeting health and food needs. Prereq: Biology 1101 (101) or 1113 (113). Not open to students with credit for 201. GE nat sci bio course.			
2300	Role of Food Science in Human Health	U	3
This course explores the role of food in an individual's health by addressing mainstream controversies. Students will have an understanding of food supply chain, food components, food safety, food processing, food additives, labeling, food laws and regulations and their impact on ensuring a safe food supply and protecting consumer's health. Prereq: Not open to students with credit for 2200 or 4597.02. GE theme health and well-being course.			
2400	Introduction to Food Processing	U	3
Introductory class applying chemistry, biology, and engineering to hands-on experience on the production and evaluation of foods. Includes basic food regulations, sanitation and formulation. Prereq: Biology 1101 or 1113, and Chem 1110 or 1210; or permission of instructor. Not open to students with credit for 1401.			

2410	Brewing Science	U	2
To understand the scientific principles of brewing as related to modern beer production. Prereq: Biology 1101 or 1113, and Chem 1110 or 1210.			
3100	Global Cuisines: Food Science and Health	U	3
This course discusses elements impacting food safety and human health through the lens of global cuisine. Faculty will introduce related concepts in food and health sciences and illustrate how advancements in science, technology, and globalization impact food, health, and well-being. Students will develop an appreciation of cuisines and sound judgement on dietary practices for health and well-being. GE theme health and well-being course.			
3110	Alternative Packaging for a Greener Planet	U	4
This Sustainability course focuses on the dependence of humans on earth and environmental systems through the lens of alternative packaging. Plastic packaging accounts for >30% of global plastic consumption. Sustainable alternatives to current packaging methods are urgently needed. This course addresses sustainability through the dimensions of engineering, technology, and design. Prereq: Soph, Jr, or Sr standing. GE theme sustainability course.			
3400	Food Supply-Chain Equipment Operations	U	2
The focus of this course is description of equipment used throughout the food supply chain from harvest/assembly to preparation for consumption. After completing this course, students will recognize how equipment systems are assembled within a facility and the role of sensing and control systems in operation of facilities for handling, manufacturing, storage, distribution and preparation of foods. Cross-listed in AgSysMt.			
3400.01	Sustainability of the Food Supply Chain	U	3
Sustainability of the food supply chain depends on the efficiency of transforming raw food materials into consumer food products. This course introduces key operations in each sector of the supply chain along with sustainability parameters, focusing on energy, water, and waste. Students will recognize the challenges of maintaining a sustainable food supply while minimizing environmental impact. Prereq: Not open to students with credit for 3400, AgSysMt 3400, or FABEng 3400.01. GE theme sustainability course. Cross-listed in FABEng.			
3450	Physical Principles in Food Processes	U	3
Food physico-chemical properties are critical in processes involving the handling, processing, preserving, packaging, storing, and distribution of food. They determine food quality and impact nutritional properties and safety. After completing the class, students will be able to use material and energy balances in food processes and identify the impact of food properties on processing and quality. Prereq: 2400, and Math 1151, and Physics 1106 or 1200, and Chem 1210; or permission of instructor.			
4035	Pet Food Production - From Concept to Consumer	U	3
The scientific principles and physical process of producing pet food, from concept through manufacture to reaching the consumer, while building on animal physiology and nutrition foundations. This course provides in person lectures, field trip experience, and peer evaluations to provide exposure to multiple career paths, including veterinary medicine, animal and nutrition industries, and research. Prereq: AnimSci 3140 or EEOB 2520; and AnimSci 3130 or HumnNtr 2210; and AnimSci 3133 or FdScTe 2400 or 3400; and AEDEcon 2001 or Econ 2001. Cross-listed in AnimSci.			
4191	Internship	U	1
Following time spent working at an internship, this course is intended to allow students to reflect on the skills learned in the workplace. Students will submit written and oral presentations of this reflection during the semester. There is no formal class meeting for this credit. Prereq: 2400, and enrollment in a Food Science and Technology major, and permission of instructor. Prereq or concur: FAES 3191. Repeatable to a maximum of 2 cr hrs. This course is graded S/U.			
4193	Individual Studies	U	1 - 3
Individual study course to permit undergraduate students to explore in-depth selected areas of food science and nutrition. Prereq: CPHR 2.5 or above, sophomore standing, and permission of instructor. Repeatable to a maximum of 6 cr hrs or 2 completions. This course is progress graded (S/U).			
4194	Group Studies	U	1 - 3
Group studies on selected topics in food science and nutrition. Prereq: Permission of instructor. Not open to students with credit for 494.			
4410	Hazard Analysis and Critical Control Points (HACCP)	U	2
Teaches the basics of HACCP. Upon completion of the course, students will understand the relationship of GMPs (Good Manufacturing Practices), SSOPs (Sanitation Standard Operating Procedures), pre-HACCP steps and the Seven Principles of HACCP. The students will select a food processing operation and develop a HACCP plan. Prereq: 2400, or permission of instructor.			
4536	Food Safety and Public Health	U	3
Principles and practice of food safety; transmission, inactivation and control of foodborne pathogens, hazards, toxins and allergens; risk assessment, sanitation, and pest control in foods. Prereq: Micrbio 4000 or 4100, or permission of instructor. Not open to students with credit for PubHEHS 4530. Cross-listed in PubHEHS 4530.			
4597.01	Alcohol and Society	U	3
The historical, nutritional, medical, social, technical, and economic aspects of the use of beverage and industrial alcohol. Prereq: Jr standing. Not open to students with credit for 4597.02. GE cross-disciplinary seminar course. GE theme health and well-being course.			

Food Science and Technology 201

<p>4597.02 Food and Health Controversies in the 21st Century U 3</p> <p>Students will investigate such topics as food labeling and processing, including the natural and organic labels and science behind biotech foods. Other topics of discussion include diets and obesity in developed countries, relevant food ingredients such as sweeteners and caffeine and a global look at food aid and trade of agricultural goods. GE cross-disciplinary seminar course.</p>	<p>5536 Food Microbiology Lecture U G 3</p> <p>Microbiology as applied to food. Students learn about microorganisms that spoil food or cause food-transmitted diseases, as well as beneficial microorganisms. Control of harmful microorganisms in food is discussed. Prereq: Micrbio 4000 (Micrbiol 509) or 4100 (520), or Grad standing. Not open to students with credit for 636.01 or Micrbio 5536 (Micrbiol 636.01). Cross-listed in Micrbio.</p>
<p>4600 Food Composition and Function U 3</p> <p>This course provides a comprehensive introduction to diverse and modern topics in Food Composition and Function. At the end of the course, students should have clear understanding of the macro-components of foods, understand basic food chemistry principles, and understand the composition-function relationship in foods. Prereq: Biology 1101 or 1113, and Chem 1110 or 1210.</p>	<p>5546 Food Microbiology Laboratory U G 3</p> <p>Microbiological analyses as applied to food. Students learn how to detect and quantify microorganisms that spoil food or cause food-transmitted diseases, as well as beneficial microorganisms. Prereq: 5536 (636.01) or Micrbio 5536, or Grad standing. Not open to students with credit for 636.02 or Micrbio 5546 (636.02). Cross-listed in Micrbio.</p>
<p>4999 Research with Distinction U 1 - 5</p> <p>Conducting and reporting research with Distinction. Students are expected to present research findings at two or more local or national meetings (e.g. CFAES Undergraduate Research Forum, Denman, OVIFT Poster Competition, Undergraduate Research Festival, IFT, etc). Prereq: CPHR 3.0 or above, and GPA 3.0 or above in FdScTe major, and permission of project supervisor. Repeatable to a maximum of 6 hrs or 6 completions. This course is progress graded (S/U).</p>	<p>5600 Food Chemistry U G 3</p> <p>Describe the sources and compositions of food components. Develop a relationship between the composition of the individual food components and their chemical and physical properties. Understanding the chemistry of food components during processing and storage. Prereq: 2400 and Chem 2510, or Grad standing. Prereq or concur: Biochem 4511.</p>
<p>4999H Honors Research with Distinction U 1 - 3</p> <p>Conducting and reporting research with Distinction. Students are expected to present at the CFAES Undergraduate Research Forum and the Denman University Undergraduate Research Forum. Prereq: Honors standing, and FAES 4590.01H (590H), and CPHR 3.4 or above, and GPA 3.4 or above in FdScTe, and permission of honors project supervisor. Not open to students with credit for 683H. Repeatable to a maximum of 6 hrs or 3 completions. This course is graded S/U.</p>	<p>5610 Food Analysis U G 3</p> <p>Chemical, physical and functional properties of foods and effects of processing on those constituents using an array of chemical, biochemical and instrumental technologies in accordance with current food industry and regulatory agency practices. Prereq: 5600 (605), or Grad standing. Not open to students with credit for 601.</p>
<p>5310 Food Quality Assurance U G 3</p> <p>Provides students with a knowledge of quality assurance concepts and procedures and tools for establishing quality control programs to produce high quality safe foods. Prereq: 2400 and Stat 1430 or 1450 or equiv., or Grad standing.</p>	<p>5710 Food Additives U G 2</p> <p>Chemical and physical nature of food additives; functions and effects on chemical, rheological, microbiological, and nutritional properties of foods. Prereq: 10 or hrs in FdScTe, or Grad standing. Not open to students with credit for 621.</p>
<p>5320 Food Laws and Regulations U G 2</p> <p>Major food laws/regulations, food regulatory agencies, good manufacturing practices, HACCP, ingredients, labeling regulations, adulteration and misbranding, compliance/investigations/enforcements, crisis management, recall, Ohio State food laws. Prereq: 2400 (401), or Grad standing, or permission of instructor. Not open to students with credit for 640.</p>	<p>5720 Food Product Development U G 3</p> <p>Development of a new food product including generation of concepts, consumer panel testing, development of prototypes, process optimization and consumer testing. Prereq: 2400, and Sr standing, or Grad standing. Not open to students with credit for 650.</p>
<p>5330 Food Plant Management U G 2</p> <p>Covers the essentials of food plant operations from a business and management, rather than a scientific or technical, perspective. Prereq: 2400 and Stat 1350 or equivalent, or Grad standing. Not open to students with credit for 648.</p>	<p>5721 Applied Food Product Development U G 1</p> <p>A problem-based interdisciplinary capstone learning experience designed to enhance career skills (critical thinking, decision making, team work, communication, etc.) in the context of industry's approach to developing new and improved food products. Prereq: 5720. Not open to students with credit for 650.</p>
<p>5400 Unit Operations in Food Processing U G 3</p> <p>Study of various engineering principles relevant for preserving foods by thermal and alternative food processing methods. Laboratory section would include mathematical problem recitation section as well as use of pilot plant equipment. Interdependence of food engineering, chemistry, and microbiology principles in food preservation. Prereq: 3450 and Micrbio 4000; or Grad standing in FdScTe, FABEng, or related major. Not open to students with credit for FABEng 4410. Cross-listed in FABEng 4410.</p>	<p>5730 Technical Problem Solving U G 3</p> <p>Analysis of technical problems in food science; fostering creative thinking to the approach and solution of problems; preparation and oral presentation of paper. Prereq: 5600 or 5710, and 5536 or 4536, and 5400, 5410, 5420, 5430, 5450, or MeatSci 4510, and Sr standing; or Grad standing.</p>
<p>5410 Fruit and Vegetable Processing U G 3</p> <p>Composition of fruits and vegetables, how this affects quality during processing, principles, equipment and quality changes during common processing methods, including juicing, drying, freezing, canning, and jelly manufacture. Prereq: 2400, or Grad standing. Not open to students with credit for 613.</p>	<p>5750 Brewing Science Capstone U G 3</p> <p>This course uses the biological and chemical principles of brewing to understand aspects of malting, mashing, fermentation, and the making of different beer styles that is complemented by laboratory exercises to investigate flavors, aromas, brewing methods, and techniques. Hands-on experiments will follow the brewing process from 'malting grains to glass'. Prereq: Biology 1101 or 1113, and Chem 1110 or 1210, and Jr or Sr standing; or Grad standing.</p>
<p>5420 Dairy Processing U G 3</p> <p>This course is a specialized processing area focused on Dairy Foods production. The general objective is to familiarize and describe the unit operations used to produce dairy foods and ingredients used by the food industry. An overview of the chemical composition of milk, chemistry, and biochemistry of changes during processing and main equipment used in the production of dairy foods is presented. Prereq: 2400, or Grad standing, or permission of instructor.</p>	<p>5797.01 Food Science and Policy in Italy U G 3</p> <p>This 3 credit, 3 week education abroad course will integrate knowledge gained in the required course PubAfrs 5890 with real-world experience to enhance the students' understanding of food science and policy in Italy. Tours will include food production and processing facilities, wineries, traditional meat processors, various retail formats, restaurants and cultural venues. Prereq: PubAfrs 5890.</p>
<p>5430 Food Fermentations U G 3</p> <p>Making fermented foods (dairy, alcoholic, meat, vegetable products, etc.) and understanding the microbiological and biochemical changes involved. Prereq: Micrbio 4000. Not open to students with credit for 611.</p>	<p>6320 Global Health and Environmental Microbiology G 3</p> <p>Fundamentals and emerging issues of health significant microorganisms (bacteria, viruses, protozoa) from water, air, soil and food, and their sources, transmission routes, treatments, detection methods and study tools. Prereq: Undergrad-level Micrbio course, or permission of instructor. Not open to students with credit for PubHEHS 6320. Cross-listed in PubHEHS.</p>
<p>5450 Food Packaging U G 3</p> <p>A discussion of terminology and literature of commercial packaging, principal methods of packaging, and principles of selecting packaging materials. Prereq: 2400 (401), or Grad standing. Not open to students with credit for 649.</p>	<p>6400 Study Design and Quantitative Methods for Food Science G 3</p> <p>This graduate-level course is designed to introduce students to research study design and data analytic methods commonly used in food science. Since study planning is critical to the success of any research project, this course will focus primarily on appropriate study design. Prereq: Stat 1450, 1550, or 2450; or permission of instructor.</p>
<p>5500 Measurement of Food Perception and Liking U G 3</p> <p>Explores the principles and procedures for accurately assessing the sensory and hedonic properties of foods and consumer products. Appropriate test design, statistical analyses and data interpretation will be discussed and the physiological and psychological principles impacting sensory judgments will be explored. A proficiency in basic statistics and Excel is required. Prereq: Comldr 3537, AEDEcon 2005, AnimSci 2260, HCS 2260, ENR 2000, or Stat 1450; or Grad standing.</p>	<p>7193 Individual Study G 1 - 3</p> <p>Individual study course to permit graduate students to explore in-depth selected areas of food science and nutrition. Prereq: Permission of instructor. Not open to students with credit for 693. Repeatable to a maximum of 6 hrs or 2 completions. This course is graded S/U.</p>
	<p>7194 Group Studies G 1 - 3</p> <p>Selected topics in food science. Prereq: Permission of instructor. Repeatable to a maximum of 9 hrs or 3 completions.</p>

202 Food Science and Technology

7360 Water Contamination: Sources and Health Impact G 3

Water contamination affects our health and daily life. Water contaminants include biological infectious agents, chemical pollutants, and other toxic agents that are transmitted primarily via water, but also through air, soil, food, and human activities. Lectures will cover emerging and fundamental issues, sources of contamination, pathways of transport, public health impacts, and interventions. Prereq: Credit for Undergrad-level Biology course, or permission of instructor. Not open to students with credit for PubHEHS 7360. Cross-listed in PubHEHS.

7430 Advanced Food Process Design G 3

An integration of quantitative parameters describing changes in the quality attributes of foods with quantification of the physical changes occurring between the time of raw material harvest or assembly and the point of food consumption. Models to predict changes in quality attributes as a function of process parameters will be developed and demonstrated. Prereq: 5400, 5536, 5600, or FABEng 3481 or 4410, or permission of instructor. Not open to students with credit for FABEng 7430. Cross-listed in FABEng.

7536 Advanced Food Microbiology G 2

This course is designed to help students to build a comprehensive understanding about foodborne microorganisms and gut microbiota and their interactions with the environment and with the host. Genetics and molecular biology approaches important for studying foodborne microorganisms, microbiome, and cutting edge techniques in solving industrial food microbial problems will be introduced. Prereq: Grad standing, or permission of instructor. Not open to students with credit for Microbio 7536. Cross-listed in MicrBio.

7550 Advanced Concepts in Sensory Science G 2

This course explores advanced concepts in Sensory Science including flavor perception, food intake and sophisticated methodological and data analysis procedures. The structure of this course will involve open discussion of important concepts obtained from seminal readings. Prereq: 5500, or Stat 5000 or above.

7560 The Science of Human Sensory Measurements: Theoretical Principles and Industrial Applications G 2

This course provides students with a critical overview of the science behind perception measurements in sensory evaluation with a focus on sensory discrimination testing. This course will describe a theoretical foundation to sensory measurements with central industrial applications, including concepts borrowed from other fields such as psychology, mathematical modeling, and statistics. Prereq: 5500, or permission of instructor.

7600 Metabolomics, Principles and Practice G 3

Introduces students to the principles and practice of metabolomics. Metabolomics is the study of the totality of small molecules existing within a system. We will focus here on the application of metabolomics to plant, food, nutrition and health-related research, although concepts are applicable to other disciplines. Prereq: Permission of instructor. Cross-listed in BMI, HCS, and HumNtr.

7610 Instrumental Analysis I: Spectroscopic and Chromatographic Techniques in Food Analysis G 3

Theory and practice of analytical chemistry applied to the identification and quantitation of analytes in food. Emphasis on chromatography, optical spectroscopy, mass spectrometry as well as sample preparation techniques and statistical data treatment. Prereq: 5610 (601) or equiv.

7611 Instrumental Analysis II Molecular and Spectral Analysis Techniques G 3

Methods of analysis of foods including thermal analysis, NMR, microscopy and rheology. Prereq: Chem 2520 (252), or 2310 and 2540, or Biochem 4511 (511), or Grad standing, or permission of instructor. Not open to students with credit for 833.

7620 Food and Nutritional Toxicology G 2

Basic principles of food and nutritional toxicology with emphasis on food components and food toxins including absorption, metabolism and excretion of xenobiotics, allergenic and toxic constituents, role of diet and nutrients in mutagenesis and carcinogenesis. Prereq: Biochem 4511 or 5613. Not open to students with credit for 830, AnimSci 830, or HumNtr 830.

7630 Food Colors and Pigments G 3

Chemistry and reactivity of pigments and colors in foods. Prereq: 5600 (605), 5610, or Grad standing, or permission of instructor. Not open to students with credit for 724.

7640 Food Proteins G 2

Chemical, physical, biological, and functional properties of food proteins and their interactions with other food components. Prereq: 2400 or equiv., 5600 or equiv., or permission of instructor.

7641 Food Carbohydrates G 2

Chemical, physical, biological, and functional properties of food carbohydrates and their interactions with other food components. Prereq: 2400 or equiv., 5600 or equiv., or permission of instructor.

7650 Food Lipids G 2

Provide the students with an understanding of the chemistry and physical properties of lipids and their effects on quality and functional properties of food systems. Prereq: Not open to students with credit for 820 and 821.

7670 Flavor Chemistry G 2

This course will provide students with an understanding of the chemical stimuli that impact flavor perception, analytical approaches to characterize flavor stimuli, mechanisms of flavor formation, flavor-ingredient interactions, and industrial methods of flavor production.

7725 Research Advances in Food Engineering G 1

This class is part of a multi-university seminar course organized by USDA Committee NC1023-Engineering for Food Safety and Quality. The course provides a broad perspective of innovation as applied to food engineering. Students learn general overview and case studies of current and emerging research areas in food and agricultural engineering and processing by different research groups in the U.S. Prereq: Grad standing in Food Science and Technology or Food Ag Bio Engineering. Cross-listed in FABEng.

7727 Current Topics in Food Safety G 1

Weekly graduate seminar on current and emerging topics in food safety. Presentations from OSU faculty and invited external experts from industry, academia and government. The course is designed to expose graduate students to the wide range of topics and expertise needed to address food safety. Students will learn the role of the public sector in ensuring food safety. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 4 cr hrs. This course is graded S/U. Cross-listed in VetPrev.

7830 Phytochemicals in Human Health: Crops to the Clinic G 3

Covers the function and control of phytochemicals in plants, the function of phytochemicals in human health, delivery of phytochemicals through foods in the diet, strategies when designing studies examining foods for health, and policy and sustainability considerations. Prereq: Biochem 4511 (511) or 5613 (613), or equiv; or permission of instructor. Not open to students with credit for 7810. Cross-listed in HCS, HumNtr, BSGP, and PubHEpi.

7999 Thesis Research G 1 - 18

Research for thesis purpose only. Repeatable. This course is graded S/U.

8193 Individual Studies G 1 - 3

Research experience and preparation of technical paper. Prereq: 10 cr hrs in Grad level FdScTe. Repeatable to a maximum of 15 cr hrs or 4 completions. This course is progress graded (S/U).

8991 Graduate Seminar G 1

Discussion of current topics and research findings in food science. Prereq: Grad standing. Not open to students with credit for 850.01. Repeatable to a maximum of 5 cr hrs.

8992 Graduate Seminar in Food Science and Technology G 1

A weekly seminar series on current and emerging topics in Food Science and Technology. Graduate students participate in all dimensions of the course, including presentations, as well as through interactions with all other speakers. Seminar speakers will include graduate students, as well as faculty and invited representatives from industry, academia and government. Prereq: Grad standing, or permission of instructor. Repeatable to a maximum of 3 cr hrs.

8998 Dissertation Research, Pre-Candidacy PhD G 1 - 18

Research for PhD dissertation purposes only. Research may take place in laboratory and/or field resources at The Ohio State University in Columbus, Wooster and other associated research areas as determined by student and instructor. Research may include experimental studies, revisional studies, or other studies that create original data or technology that contributes to the discipline. Prereq: Enrollment in Food Science and Technology PhD program. Repeatable. This course is graded S/U.

8999 Dissertation Research Post-Candidacy PhD G 1 - 18

Research for PhD dissertation purposes only. Research may take place in laboratory and/or field resources at The Ohio State University in Columbus, Wooster and other associated research areas as determined by student and instructor. Research may include experimental studies, revisional studies, or other studies that create original data or technology that contributes to the discipline. Prereq: Enrollment in Food Science and Technology PhD program, and completion of candidacy exam. Repeatable. This course is graded S/U.

Food, Agricultural, and Biological Engineering

2100 Energy In Biological Systems U 1

An introduction to energy flow and transformations within and for biological systems that include the human environment and the production and processing of plants, animals and micro-organisms the student will encounter in the food, agricultural and biological engineering program. Prereq: Soph standing in Engineering. Not open to students with credit for 325.

2110 Fluid Mechanics in Food, Agricultural and Biological Systems U 3

Fluid statics. Introduction to momentum transfer. Equation of continuity. Equation of motion. Navier-Stokes equations. Compressible flow. Applications in fluid transport and mixing. Dimensional analysis. Prereq: Physics 1250, or 1250H. Prereq or concur: Math 2177, or 2174.

2193 Individual Studies U 1 - 3

Individualized study of topics and problems not included in regular courses of this department. Prereq: Permission of instructor. Repeatable to a maximum of 9 cr hrs or 4 completions. This course is graded S/U.

2194 Group Studies U 1 - 5

Basic group studies in Food, Agricultural and Biological Engineering. Prereq: Will be specified with course proposal. Repeatable to a maximum of 10 cr hrs or 4 completions.

Food, Agricultural, and Biological Engineering 203

<p>2200 Introduction to Humanitarian Engineering U 1</p> <p>This course will introduce students to the field of Humanitarian Engineering, cover a variety of potential career paths in this field, explore introductory engineering equations as they apply to problem solving in low-resource settings, introduce students to reflection and communication skills for working as engineers in development and discuss cultural constraints for engineering problems.</p>	<p>3400.01 Sustainability of the Food Supply Chain U 3</p> <p>Sustainability of the food supply chain depends on the efficiency of transforming raw food materials into consumer food products. This course introduces key operations in each sector of the supply chain along with sustainability parameters, focusing on energy, water, and waste. Students will recognize the challenges of maintaining a sustainable food supply while minimizing environmental impact. Prereq: Not open to students with credit for AgSysMt 3400, FdScTe 3400, or FdScTe 3400.01. GE theme sustainability course. Cross-listed in FdScTe.</p>
<p>2201 Introduction to Humanitarian Engineering Laboratory U 2</p> <p>This course will introduce students to the field of Humanitarian Engineering through experience based learning. Weekly experiential activities will build context for engineering design in low resource and international settings as humanitarian development workers. Students will learn about lifestyles, challenges and physical limits in human existence to better inform engineering design decisions. Prereq or concur: 2200.</p>	<p>3481 Introduction to Food Engineering U 3</p> <p>Introduction to material and energy balances, momentum, heat and mass transfer. Applications of basic engineering principles in food processing through problem solving and laboratory experiments. Offered for Food Science & Technology. Prereq: Math 1151 (151), Physics 1106 (106), 1200 (111), Chem 1210 (121), or FdScTe 2400 (401); or permission of instructor. Not open to students with credit for 481. Not open to Engineering majors.</p>
<p>2710 Surveying U 2</p> <p>Introductory course designed to teach the measurement and collection of data using traditional methods, total stations and GPS. These techniques will be integrated and applied to traversing, topographic mapping and water flow analysis. Prereq: Soph standing in Engineering. Not open to students with credit for 373.</p>	<p>3500 Biological Engineering U 3</p> <p>An Integration of biology, biochemistry and engineering fundamentals for analysis of biological systems in industrial, environmental, and agricultural processes. Prereq: 2110. Prereq or concur: Microbio 4000.</p>
<p>2720 Principles of Soil and Water Engineering U 2</p> <p>Applications of soil and water processes in agricultural and ecological engineering, including: precipitation, infiltration, runoff, hydrographs, water quality, and geospatial analysis of natural resource problems.</p>	<p>3610 Utilization of Energy in Agriculture U 3</p> <p>Study of motive and stationary power needs in agriculture, mechanics of traction, characteristics and selection of power sources, power transmission, principles and design of hydraulic systems. Prereq: 2110. Not open to students with credit for 565.</p>
<p>3120 Thermodynamics in Food, Agricultural and Biological Engineering U 4</p> <p>Fundamentals of thermodynamics applied to food, agricultural, biological, and ecological systems. Prereq or concur: Math 2177, 2255, 2415 or 2174. Not open to students with credit for ChBE 508 and 509, or MechEng 501. This course is available for EM credit.</p>	<p>3810 Agricultural Structures U 3</p> <p>Analysis and design of frames and members for agricultural structures. Prereq: MechEng 2020 or 2040. Not open to students with credit for 545.</p>
<p>3130 Heat and Mass Transfer in Food, Agricultural and Biological Engineering U 4</p> <p>Heat and mass transfer principles and applications to food, agricultural, biological and ecological systems. Prereq: 2110, or 2120, or 3120.</p>	<p>4193 Individual Studies U 1 - 3</p> <p>Advanced individual study of problems not included in regular courses of this department. Prereq: 6 cr hrs taken at the 3000 level or higher in Engineering. Repeatable to a maximum of 10 cr hrs or 4 completions. This course is graded S/U.</p>
<p>3140 Professional Development in Food, Agricultural, and Biological Engineering U 1</p> <p>Professional development related to food, agricultural, biological and ecological engineering; business communication skills for professional advancement; engineering ethics; health and safety; and the engineer's responsibilities to society. Prereq: 3rd year standing in Food, Agricultural and Biological Engineering. Not open to students with credit for 695.</p>	<p>4410 Unit Operations in Food Engineering U 3</p> <p>Study of unit operations in preserving foods by thermal and alternative food processing methods through problem solving and experimentation. Interdependence of food engineering, chemistry, and microbiology principles in food preservation. Prereq: 3120 and Microbio 4000 (Microbio 509) or equiv, or permission of instructor. Not open to students with credit for 584 or FdScTe 5400 (630). Cross-listed in FdScTe 5400.</p>
