

Priority Scheduling Logic

University Priority: This assigned priority allows students to enroll 2-3 days before any other enrollment appointments open. The University Registrar's office assigns this priority level. Groups are approved for inclusion after consideration with the Committee on Enrollment and Student Progress.

College Priority: This assigned priority allows students to enroll in the first hour of a typical enrollment block. For example, Rank 1 undergraduates typically enroll over a period of 3-5 days. Rank 1 students with College Priority are permitted to enroll during the first hour of the first day of that block (from 8am-9am). The regular Rank 1 appointments would begin at 9am on that first day. Senior advising administrators have the authority to assign this priority level.
