Placement and Proficiency Examinations
In order to insure proper registration, placement tests are required of all students who continue their study of German in the dept after beginning their language in high school. Such tests are given during Summer Orientation and daily Monday-Friday each quarter. Consult the College of Humanities section of the Colleges of the Arts and Sciences Bulletin or the dept for details. Students who are given advanced standing in the dept as a result of the placement and proficiency examination become eligible for University credit.

Excess Entrance Credits in German
Freshmen who have excess credits in a foreign language are eligible for examination for advanced standing. The examination is given at the same time as the placement tests mentioned above.

Students studying foreign languages at the elementary and intermediate levels typically take the sequence of courses numbered 101-102-103-104 (including the decimal subdivisions such as 101.51, etc.) and then move on to advanced courses. Students who need to satisfy the Arts and Sciences foreign language requirement must demonstrate competence through the 104 level.

Military Science

Army ROTC

203 Converse Hall, 2121 Tuttle Park Place, 292-6075

The Department of Military Science offers instruction to all Ohio State students in basic soldier skills, leadership, organization of the Army, and military history. Additionally, those individuals meeting the requirements as outlined by the Department of Defense may choose to receive a commission in the United States Army, the United States Army Reserve, or the Army National Guard.

Military Science 100 and 200 level courses are open to all students. Students taking military science courses for credit and not seeking a commission will attend the classroom portion only. Military science 300 and 400 level courses are open to those students who meet the prerequisites as indicated below or receive the permission of the Professor of Military Science. The Department of Military Science offers two programs of instruction leading to a commission as a second Lieutenant.

The four-year program consists of a basic course and an advanced course. The basic course requires successful completion of Military Science 101 and 200-level courses during the freshman and sophomore years. The advanced course requires successful completion of Military Science 300- and 400-level courses during the junior and senior years. The courses are two and three credit hours for the basic program and four credit hours for the advanced program with three hours of classroom instruction. There are approximately 20 hours of leadership laboratory, in addition to the classroom instruction each quarter. Additionally, all advanced course students choosing to receive a commission in the United States Army must attend the Leaders Development and Assessment Course between their junior and senior years.

No military obligation is incurred for the first two years of the program. Following completion of the basic course, students may enter the advanced course of instruction. Those qualified students wishing to receive a commission must sign an ROTC contract which obligates the student to complete the program of instruction and accept a commission in the U.S. Army, U.S. Army Reserve, or the Army National Guard. Contracted students receive a subsistence allowance of up to $400 for each academic month of enrollment.

The two-year program is offered for students wishing to receive a commission who transfer from colleges that did not offer ROTC, who are veterans, or students whose academic course load did not permit them to take military science courses during their first two years. Students may qualify for the two-year program in one of several ways. The first is by attending Army ROTC Leader’s Training Course. Upon successful completion, the student may enter the advanced course. Alternatively, attending Leader’s Training Course does not require the student to continue in the program nor does it incur any military obligation. The second is to receive credit for honorable prior military service of at least one year, as determined by the professor of military science. Additionally, a student may receive credit for two years or more of Junior ROTC at the high school level. After receiving credit for the basic course, the student proceeds with the advanced course as previously described.
